169. Given the lacunae, the restoration of this bicolon remains provisional. But this approach, also taken by Gibson (1978: 113) and del Olmo (1981a: 386), is consistent with the following bicolon which apparently describes the destruction of the bow. The two bicola make further sense as the first object of Anat's attention. She turns to Aqhat only when her first concern is shown to be a false hope. The restorations of de Moor (1987: 247) and Margalit (1989a: 156) are implausible, and in Renfroe's view (1992: 119-20) incautious. Striking the right balance with such intractable materials is extremely difficult. But simple minimalism is not likely to further our understanding. There is room for possibilities to be raised in the absence of certainties.

170. Caquot (1985: 96) prefers to think that Anat broke the bow (active vb) out of spite at being unable to string it. On the present interpretation, the goddess is thwarted by the bow falling to the ground. This perhaps better explains the savagery of her immediate attack on Aqhat's corpse. She blames *him* for it! This is after all the logic of the warmonger, of whom she is patron goddess: he attacks his enemy because his enemy would not cede to his demands, and then blames him for provocation. The goddess's behaviour is almost the paradigm.

1.19 i 5 shattered was 'Precious',[171] [the bow of the son of Danel].

Virgin Anat [came back?],
[the Beloved of the Powerful One[172]] returned[173].

She picked up[174] the quiver[175]
[ ][176] in his hands,

171. Text: *yṯbr ṯmn*: 'shattered his eight [arrows]': de Olmo (1981: 387). I tentatively take *ṯmn* to be the name of the bow (see n. 70 at KTU 1.17 v 2). Note that the bow (f.) is subj. of *ṯṯbr*, while its name (m.) is subj. of *yṯbr*. Watson (1996a: 80-81) proposes 'gift' on the basis of Akk. *šummannu*, 'gift, present'. I find this attractive. It would also conform to the gender matter just noted. For another view see Pardee (1997c: 350 n. 80).

172. There is just room for the seven signs of *ybmt limm*, (and [*n*], n. 173) despite the allowance in *KTU*^{2} of only six signs overall. Cf. del Olmo (1981a: 387; 1984: 128 and n. 288). It remains conjectural, however. Virolleaud offers no guide, *CTA* six spaces. Margalit (1989a: 157) construes differently.

173. '[Came back]... returned'. Text [ ]... *ṯṯb*. Del Olmo (1984: 128; cf. 1981: 387) restoring *wt'n* in the lacuna, reads 'Virgin Anat [replied]... repeated', and takes the immediate sequel to be a speech by the goddess. I understand her to return at this juncture to the scene of the crime (like a dog to its vomit!), where she now picks over the fragments of bow and Aqhat, and becomes maudlin.

174. Text [ ]*ša*. The fin. vb with Anat as subj. would be *tšu*. I take this to be the narrative use of the inf. abs., [*n*]*ša* (Heb. *nāsâ*): *UT*, 80 §9.29.

175. Ug. *tlm*. For this sense see del Olmo (1984: 128 n. 289), followed by Cooper (1988: 21), citing Heb. *t^{e}lî*, Akk. *tillu* and Aram. *tly*. 'She struck' (√*hlm*): Virolleaud (1936d: 135) and Caquot (1985: 98-99). 'Hills' (with some hesitation): Caquot and Sznycer (1974: 441). Cf. *WUS*, 325-26 §2760. 'Mountain': Margalit (1989a: 157). Caquot (1985: 98-99) also notes Heb. *telem*, 'furrow'. The translation remains provisional, depending on the force one gives to Caquot's observation (1985: 99) that Ilimilku has left a considerable gap at the end of l. 6, thus separating [*t*]*ša* and its putative subj. *tlm*. But it would be hazardous to read too systematic a reason for this space on the tablet. Was the subj. of the vb intended (e.g. *btlt 'nt*) but not written on account of a minor distraction? We could speculate for ever. Caquot's translation is attractive: 'Her hand struck like... her fingers (struck) like a singer (strikes) the lyre'. I might be tempted to follow Caquot here, but it would leave the [ ]*ša* without a context. Besides, his translation gives no clue as to what Anat is actually doing. The suggestion of Dijkstra and de Moor (1975: 197): 'Raise, furrow, the cry: "How bitter!"' (for *ša tlm kmr*) looks rather desperate.

176. Text *k*mr[ ]: *KTU*^{2}. Virolleaud (1936d: 125) read *km*[*r*(?)..], *CTA km*[---?]. The k is also uncertain in my view. Margalit's (1989a: 131) restoration is intriguing: *km* (.) *r*[u]*m*... This would by no means fill the lacuna, and—to follow the conjecture—we might on this basis read rather **rimt*, 'bull-shaped instrument'

as a singer a lyre in his finge<rs>.[177]
Like a chisel was her mouth[178]:
her teeth seized (him)[179]
and she devoured[180] his [en]trails[?].[181]

providing the parallel term to *knr*, though reversed from the usual order (as in KTU 1.101.16-17, which fixes the order for 1.3 iii 4, 1.7.22).

177. Anat delicately, fastidiously, lovingly picks up the pieces of bow and quiver... 'His hands... fingers': applying the suffix to the singer of the simile. Alternatively, applying the simile more directly to Anat, 'her hands... fingers'. On this broad approach see Cooper (1988: 22).

178. Ug. *kḫrṣ abn ph*, construing the first two words together ('like an instrument of stone'—sc. a stone-working tool), following Caquot (1985: 100-101) rather than the second two 'stones of her mouth', sc. teeth, as Caquot and Sznycer (1974: 441), Gibson (1978: 113) and de Moor (1987: 248). Cf. Dijkstra and de Moor (1975: 197): 'his mouth-stones are decaying | his teeth are affected' (*tiḫd šnth* following) seems to have no serious contextual sense, except as a portent of the future rotting of the vegetation. To *ḫrṣ* cf. rather Heb. *ḥārîṣ*, 'sharp instrument', and see the verbal form below, l. 10 and n. 182. Thus Dietrich and Loretz (1978b: 196), apparently endorsed by Caquot (1985: 100). The delicacy of her handling of the shattered bow contrasts with Anat's treatment of the shattered Aqhat!

179. Ug. *tiḫd*: lit. 'seized'. No obj. is given, and technically the vb governs the 'entrails' of the following colon, the obj. of both vbs. I have rephrased in translation for euphony. Or: 'her teeth seized his entrails and she devoured them'. Margalit's (1989a: 157) understanding that 'she grasped his teeth' (a necrophiliac dentist?) as part of a mortuary rite (see his further translation) is quite unconvincing.

180. Text *wakl* accepted from Virolleaud (1936d: 125) through to *KTU*^{2}. Narrative inf. abs., or possibly, regrouping the *w* as *kt*: *kt* ˡ*akl*: 'she indeed devoured'. We would however expect **tikl*. Margalit (1989a: 131, 157, 218 and n. 21) proposes a more radical regrouping: *p*ˡ*t*ˡ*n*ˡ*kl*: 'and she extracted (his teeth)'. This might be the more compelling if the analogy of the Jericho skulls were to be taken seriously. See preceding note.

181. Anat's mood changes abruptly as she seeks someone to blame for this catastrophe. Cf. n. 170 above. Why, it must have been Aqhat's fault! But she will make short work of him, punishing him even when dead, by devouring him, and thus preventing his burial. A sexual frisson is also surely present here. 'Entrails': tentatively reading m'*mm* (Heb. *mᵉʿîm* [pl. of *mᵉʿâ*], 'intestines, bowels') rather than *š* (?)*mm* of Virolleaud (1936d: 125), where only the final stroke of the putative *š* is given on the transcription, pl. I. *CTA*, followed by *KTU*$^{1 \text{ and } 2}$, reads *bqmm*, interpreting this final stroke as the wedge-stroke at the end of the q. A large vertical crack, bisecting the upper half of KTU 1.19 at this point, has obliterated the beginning of the sign, and Gaster's (1950: 452) proposal, *b*[*m*]'*mm*, followed by Driver (1956: 58: *b*̊'*mm*) and del Olmo (1976: 240-41 n. 40; 1981: 387, 618) and adopted

1.19 i 10 She cleft him[182] like the heart of a terebinth[183],
and cut the cadaver in two[184].
She divided his cadaver,
She dismembered[185] Aqhat.[186]

here, is no less likely (*pace* Herdner, *CTA* i 87 n. 3), and has to be judged in any event on context rather than epigraphy, since the latter allows all three options. Caquot and Sznycer (1974: 441): 'she devours the adversaries', on reading *bqmm*, but why pl.?

182. Ug. *tšṯḥrṣ*. The word-divider of *KTU*[1 and 2] (*tšt.ḥrṣ*) is unwarranted. Virolleaud (1936d: 125) and *CTA* invite this error by leaving a 'hermeneutical' gap. I take this to be 3 f. sg. Št of √*ḥrṣ* (Heb. *ḥāraṣ* occurs only in qal and niph.). Cf. Caquot (1985: 100). On the divided form it might alternatively be construed as 'she set (i.e. applied) a chisel'. Cf. Caquot and Sznycer (1974: 442): 'she chops in pieces...'. Del Olmo (1981a: 387) divides the words between two cola.

183. Ug. *klb ilnm*. Again, there is no word-divider (as given by *KTU* [1 and 2]), though Virolleaud (1936d: 125) and *CTA* leave a space as before. Many have understood there to be an allusion to an Ugaritic prototype of Cerberus here (thus, e.g., Caquot and Sznycer 1974: 442; del Olmo 1976: 240; 1981: 387; Caquot 1985: 100) and Margalit (1989a: 350). But at KTU 1.3 iii 45 (and n. 52) the dog is female, and the pl. of *iln* is *ilnym* in all its other occurrences, at KTU 1.3 iv 35; 1.6 vi 46; 1.20 i 2; 1.21 ii 4. Margalit's (1996: 157) 'in accordance with the wishes of the chthonics' (similarly Pardee 1997c: 351) is unconvincing, and partly for this reason. Cooper (1988: 20) has 'a stag's (alt: a ram's) innards'. I believe that Dijkstra and de Moor (1975: 197) are right to take *ilnm* to refer to trees. Cf. Heb. *'allôn*, 'oak', *'ēlôn*, 'terebinth'.

184. Ug. *wṯn gprm*. The range of interpretations indicates the difficulty. Many leave untranslated. 'And declares [*sic*] "Who has subdued him...?"': Caquot and Sznycer (1974: 442; Akk. *guppuru*, 'dominate'). 'And two heroes recite': Dijkstra and de Moor (1975: 197, 199; Akk. *gabru*, *gapru*, 'strong, superior', Heb. *geber*, *gibbōr*, 'young man, hero'). 'And twice she attacked': del Olmo (1981a: 387, 534, 1984: 129; Akk. *gapāru*, 'attack'). *DLU*, 149 cites Akk. *guppuru* (*AHw*, 281) and *gubburu* (*CAD*). 'And the instructions of the Nethergods': Margalit (1989a: 157, 348 and n. 15; 'those of the pits', Ar. *jafr*, *jufrat*, 'cavity'). Cf. *WUS*, 68 §689. 'And she cuts his carcass in two': Cooper (1988: 20). He cites Ar. *jufrat*, 'chest cavity, middle of (a horse's) body', *jafīr*, 'carcass'. *ṯn* parallel *mn*: 'cut in two... divide'.

185. Ug. *šr*. Cooper (1988: 20, 22) proposes 'she splits Aqhat down the middle' (Ar. *sarra*, 'cut the umbilical cord...'). This is attractive, in that it completes a tetracolon, a particularly graphic way of representing the *total* carving up of the hero, a semantic rectangle in miniature! I have chosen to adopt Cooper's alternative suggestion, which I think is even better: he cites Ar. *šarra*, 'to expose meat (for drying in the sun)'. This still completes a fourfold process (carving three times followed by this action), and I have taken it as metaphorical for more general exposure, but with overtones of dismemberment from its juxtaposition to the previous

'He was put down[187] like a mighty serpent[188],
like a huge viper[189] in a sheepfold,

actions. Not only is Aqhat now unable to perform the burial rites on his father, but no one will be able to perform them on him. This fulsome revenge is a severe case of overkill! It will also allow the mother of the falcons to eat his scraps. Some other interpretations: 'Prince Aqhat': Caquot and Sznycer (1974: 442) followed by Caquot (1985: 102). 'His heroes (*gprh*) sing about Aqhat': Dijkstra and de Moor (1975: 197). Syntactical break: 'the prince. Aqhat was felled...': del Olmo (1981a: 387). 'Aqhat beheld': Margalit (1989a: 157, 353; Heb. √*šwr* 'see' || '*n* in l. 12).

186. The translation of these lines is provisional, and offered with due diffidence. It seems that the sequence is the antitype to Anat's apparent devouring of her victim in the hunt in the opening lines of KTU 1.18 col. iv. See n. 138 *ad loc.*

187. Text *y'n*. This can hardly mean 'he said', for Aqhat is dead, and Yatipan appears to be absent from the present scene. Error for *t'n*, with Anat as subject? 'They call out' (sc. their two putative heroes): Dijkstra and de Moor (1975: 197) followed by de Moor (1987: 248). Del Olmo (1984: 127) notes that the beginning of a speech formula would be *wy'n* PN (in Anat's case *wt'n 'nt*). Cf. *tphn* where we might expect *yphn* at KTU 1.19 ii 27. Following Gibson (1978: 114: 'humbled') he therefore proposes seeing here √*'ny* III, 'be bowed down, afflicted' (BDB, 776). So also Cooper (1988: 20, 'abased'). I have followed this suggestion, but not del Olmo's syntax, since with Cooper I take *aqht* with the previous colon. Since Aqhat is not merely humiliated, but murdered, 'put down' seems *le mot juste*, since it has both nuances. Margalit (1989a: 157) has Aqhat the subject, now in the underworld: 'From his grave-pit. Aqhat beheld...'.

188. Ug. *knr knrm*. I have taken the second *k* to be dittographic. Alternatively the entire second word is dittographic. The form **knr nrm* would have the superlative sense (as in Heb. *qōdeš haqqᵉdāšîm, šîr haššîrîm*). See also *'dmt 'dmt* at KTU 1.161.17. Wilfred Watson has suggested to me that the text as it stands, retaining the *k*, means 'like a snake, yes, like a snake', the *-m* being a conventional element when a word is repeated. For the sense of 'serpent' for *nr* see del Olmo (1984: 127 and n. 285: parallel *ap'* in following colon), followed by Cooper (1988: 20, 22), though his 'like a...snake, like two snakes' is unconvincing. Dijkstra and de Moor (1975: 197) followed by de Moor (1987: 248): 'how bitter, how bitter!'. Margalit (1989a: 157): 'he perceived the heart of darkness'. Pardee (1997c: 351): 'like a veritable fugitive'. These also lack conviction. Discussion in Caquot (1985: 103).

189. Ug. *kap'.il*. Most take *ap'* to mean 'serpent', 'viper' or the like; e.g. Dijkstra and de Moor (1975: 197) followed by de Moor (1987: 248); del Olmo (1981a: 387, 517; 1984: 127); Caquot (1985: 104); Cooper (1988: 20) and Margalit (1989a: 157, 353): cf. Heb. *'ep 'ê*, Ar. *'af'a*. The *il* is the superlative usage. Pardee (1997c: 351): 'vicious viper'. Driver (1956: 59, 136 n. 4, 162 n. 24), followed by Gibson (1978: 114): 'Surely I gave a cry (like) a ram' (*k* emphatic, √*p'*, 'bleat' and *il*, 'ram'). This lacks any prosodic plausibility.

(like[190]) a dog deserving a stick[191] I smote him.

1.19 i 15 Now because of his bow I smote him;
on account of his arrows I certainly did not let him live[192],
yet his bow has not been given to me;
and because of [his] death [the is] atrophied[193],

190. The *k* is perhaps haplographic. Cf. del Olmo (1984: 128 n. 287), Cooper (1988: 20).

191. Ug. *lḫṭh*. For this sense see de Moor (1987: 248 and n. 165). Less probably, 'because of his sin': Dijkstra and de Moor (1975: 197) followed by de Moor (1987: 248 n. 165 as a second suggestion), emending text to *lḫṭ<i>h*. 'For its stick': Driver (1956: 59), Gibson (1978: 114), Cooper (1988: 20). 'At his sceptre(-side)': Margalit (1989a: 157). I have no idea what this means. The sequence *bgdrt klb lḫṭh* is read as 'in the dog's prison, look at him then' by Caquot and Sznycer (1974: 442 and n. r; Akk. *ḫâṭu*, *ḫiâṭu*, 'observe'). Caquot (1985: 105) modifies this to 'his sceptre has kept him in a prison'. Aqhat really *is* in the dog-house on these interpretations!

192. Ug. *laḫw*. Driver (1956: 59): 'but verily I will surely revive him'. This seems to fly in the face of the sense of the context.

193. Text *wbmt* ××*ḫmṣ*×× (colour slide). The *ḫ* may be a *ṭ*. Virolleaud (1936d: 125), followed by *CTA*: *w bmt* [ ]*ḫ*(?) *nṣṣ*(?) [ ]*t* (?). *KTU*[1]: b*mt*(?)×*ḫ**m*ṣṣr**(?)×(?). Apparently with increasing confidence in a continuous reading: *KTU*[2]: *w bm*th.*ḫmṣ ṣrr*. No clear sense can be made. Margalit (1989a: 131, 157, 219, 353-54), restoring *wḃmṁ*[h.y]*ḫmṣ*(.)*ṩr*[*ḫ*], has 'and behind there loom[ed] a to[wer]'. He has understood ll. 11-17 to be a description of the underworld into which Aqhat has fallen. Dijkstra and de Moor (1975: 197) followed by de Moor (1987: 248 and n. 166) have 'and because of his death the sprouts turn sour' ('and through [his] death the young ear of corn is parched'), understanding the seasonal interpretation to apply to the episode. See also de Moor (1988b: 66-67): here de Moor argues that a sirocco in late spring is causing the drought. It seems to me that such a rationalizing hermeneutical programme actually does a serious disservice to the real literary and theological nature of the narrative. If, for the sake of argument, we accept the translation, which I am happy to do provisionally, it is adequately explained by the fact that a murder causes cosmic mayhem in the environs (*à la* Deut. 21.1-9, a text prescribing an apotropaic rite to prevent precisely this danger). The vb [*y*] *ḫmṣ* is better explained, following de Moor (1988b: 67) by reference to Ar. *ḥmṣ*, 'to be roasted, dried up' (‖ *y*[*bl*], 'to be shrivelled': see next note). We may even draw conclusions about the time of year of the narrative events from the vocabulary, but that is a far cry from endorsing the view that the story is telling us something about agricultural cycles and their rituals. There is no point in having a drought in winter: its effects are not so graphically obvious.

the first-fruits of summer shr[ivelled][194],
the ears of corn in their husks.'

1.19 i 20 Then Danel the man of healing,
at once the hero, the devotee of *Hrnm*, arose

[and sat by the entrance to the g]ate,
[ben]eath [the trees[195] which were by the threshing-floor].

He tried [the case of the widow],
1.19 i 25 [he] judged [the cause of the orphan].

[ ]
[ ]
[ ][196]

[On l]ifting up her eyes she saw[197]
1.19 i 30 [that the fleece[198]] on the threshing-floor was dry,
that the [ ] was wilted,
that the fruit of the orchard was shrivelled.

Over her father's house some falcons hovered,
a flock of hawks was watching.

Pughat wept in her heart,
1.19 i 35 she cried in her liver[199].

194. Reading uncertain. Virolleaud (1936d: 125): *y*[*bl*(?).]. *CTA* *y*[ ], but (n. 6) tending to accept Virolleaud's proposal. *KTU*[1] *yḥ**, *KTU*[2] *yḥ*. Margalit (1989a: 132) accepts this reading. A colour slide shows a left-hand vertical wedge following the *y*, which seems to preclude a *ḥ*. But its reading as a [*b*] remains hypothetical. Dijkstra and de Moor (1975: 200) postulate *yb*[*l*] from √*nbl*, Heb. *nābal* (*sic*, perhaps *nābēl*), 'sink, languish, wither' (BDB, 615), Akk. *abālu*).

195. Text [*t*]*ḫt* [*adrm*], restored from parallel at KTU 1.17 v 6-7.

196. Ll. 26-27 and most of 28 are missing, but unlike ll. 22-25, which can be restored with reasonable confidence, these cannot be. For different reconstructions see, e.g., *KTU*[2] and Margalit (1989a: 132). *CTA* leaves blank.

197. Text *tphn*. I take it that Pughat is the subj.: she would have been mentioned in ll. 25-28 (see *KTU*[2] reconstruction), and this is supported by reference to *abh*, sc. 'her (Pughat's) father' rather than 'his (Aqhat's) father' in l. 32. Caquot and Sznycer (1974: 443, n. z) explain as 3 pl. with *'nh*, 'his eyes' (not clear from the French ses yeux) as subj. But 'eyes' are du., not pl. Cf. n. 218.

198. Following Margalit (1989a: 158). See n. 208 below.

199. Margalit (1989a: 11) draws attention to the inner nature of Pughat's weeping: 'she is *stifling* sobs!'. Cf. Pardee (1997c: 351). This is Pughat's instinctive emotional reaction to what she sees. Nothing shows outwardly. The poet is attempt-

She tore the garment[200] of Danel the man of healing,
the cloak of the hero, the devotee of *Hrnm*.

Then
1.19 i 40 Danel the man of healing cursed[201] the clouds,
which rain on the dreadful heat[202],

ing to analyze her reaction. Cf. the similarly internal nature of various laughter episodes, at KTU 1.3 ii 25-26 (Anat), and 1.12 i 12-13 (El). Contrast El's public laughter at KTU 1.4 iv 28-30, and Anat's at 1.4 v 25. Cf. n. 211 below.

200. Pughat, who has spiritual gifts (see at KTU 1.19 ii 1-3, unless these be merely agricultural skills), immediately discerns that some dreadful event has occurred, and anticipates the mourning she will have to observe by this ritual and symbolic gesture. Reading the text as we have it, there is no evidence that either she or Danel knows that Aqhat is dead. Just the sight of the birds is enough to awaken her worst fears. It is possible, however, that Anat's words in the beginning of the column are not merely a soliloquy, but a confession, perhaps addressed to Pughat, who would then indicate to Danel through a wordless gesture that she had bad news for him. Against this, however, is the inner nature of her emotions (previous note), which tell against her having more than a premonition. The vb here is *tmz*', which Dijkstra and de Moor (1975: 201) take as a rare 3 m. sg. form and translate as 'was rent'. But the subj. being the f. n. *kst*, it is hard to appreciate their point. Cf. n. 218 below. Dijkstra and de Moor further reject a 3 f. sg. interpretation, with Pughat as subj., on the ground that mourners rent their own garments. (Del Olmo 1981a: 388 also treats it as passive.) However, Danel is not yet in mourning, and this translation requires an impersonal sense, in which the garment for no obvious reason tore spontaneously. Caquot and Sznycer (1974: 444 and n. d) translate the vb as a 3 m. sg. form, explained as an internal deponent on the model of Ar. *maza'a*, 'tear'. Margalit (1989a: 158) translates it as 'fluttered', in which case no question of tearing arises.

201. Ug. *yṣly*. *WUS*, 266 §2317, 'pray'. On the nuances Watson (1976c: 377), del Olmo (1984: 132-35), Margalit (1989a: 368-70) and Pardee (1997c: 351 n. 95). De Moor (1987: 250): 'adjured', with all Danel's speech as a series of questions. Margalit (1989a: 158): 'did entreat the clouds anxiously', with an ambiguous treatment of the sequel, half question, half curse. Caquot and Sznycer (1974: 444) produce a text with inner contradictions, as shown by Watson.

202. A difficult sequence: *b ḥm.un.yr*. As translated above it is a clause qualifying the previous one; alternatively, it is a parallel colon: 'he cast a spell on the dreadful heat'. I have taken *yr* as narrative inf. abs. Above, it has its common sense of 'rain' (parallel *tmṭr* in following colon) with the clouds as subj.; in the alternative suggestion it would have its more radical sense of 'throw, cast', with Danel as subj. Margalit (1989a: 371-73) has some apposite discussion on *yr*. Cf. de Moor (1987: 250). On the expression *ḥm un* see del Olmo (1984: 134-35), and for *un*, Margalit (1989a: 370-71; 'affliction, sorrow'). Pardee (1997c: 351): 'the heat of the season'.

the clouds which rain on the summer-fruit,
the dew which settles on the grapes:

'For seven years Baal shall fail,
for eight, the Charioteer of the clouds!

No dew,
no rain,
1.19 i 45 no welling up of the deeps,[203]
no goodness[204] of Baal's voice[205]!

For she has torn[206] the garment of Danel the man of healing,
the cloak of the hero, the devotee of *H*[*rnm*]!'[207]

203. This interesting formula has thrown light on the strange form of David's curse on Mt Gilboa in 2 Sam. 1.21. See Ginsberg (1938). A comparison of the texts suggests a correction to the Heb.:

Ugaritic	Heb. MT	Heb. Corrected	Translation
bl ṭl	*'al ṭal*	*'al ṭal*	Neither dew
bl rbb	*w^{e}'al māṭār 'alêkem*	*w^{e}'al māṭār 'alêkem*	nor rain (upon you Heb.)
bl šr^{c} thmtm	*ûs^{e}dê t^{e}rûmōt*	*ûs^{e}rê t^{e}hômōt*	nor rising up of the two deeps (Ug.).

The final line of the Heb. (MT 'nor fields of offerings') would on the corrected reading mean 'nor rising up of the deeps'. While MT makes a kind of sense (the 'Fields of Offering' are the Egyptian subterranean 'paradise' represented in BD 110 and its accompanying vignettes), the corrected text, like the Ug. form, represents a threefold curse against life-giving water from any of the three natural sources: dew, rain or springs. Pardee's (1997c: 351) translation as a narrative past tense weakens the force of the curse formula.

204. Ug. *ṯbn*. Or 'rain'? Thus Watson (1976c: 377 and n. 52), following Dahood (1973).

205. Sc. the thunder, which announces the return of the rains. Cf. the (sevenfold) voice of Yahweh in Ps. 29, which echoes Baal's seven lightnings || eight thunders in KTU 1.101.3-4.

206. This could be passive, but is best construed as 3 f. sg. act., with Pughat as the subject. Pardee (1997c: 352) makes this the narrative continuation: 'When she had torn the garment...'.

207. I understand the whole of Danel's speech to be in the form of a curse, in reaction to Pughat's tearing of his garment. If this sounds an extravagant response, we should recognize the powerful symbolism of her gesture, calling forth a powerful response. It may be compared to the regular submission of a lock of hair and a piece of the hem of a garment of a 'respondent' (prophet) at Mari, which provide a guarantee of the authenticity of the oracle proclaimed, precisely on the ground that these extensions of the respondent's person may be destroyed, which will in effect

Aloud to his daughter [Daniel cried]:

1.19 ii 1 'Listen, Pughat who carry water on your shoulder,
wring the dew from the fleece[208],
and know the courses of the stars[209],
harness an ass,
rope up a donkey;[210]

destroy their owner. Thus Pughat has committed a sacrilegious act. But she, being a wise and lore-learned woman, has done it in the full knowledge of its significance. The vigour of Danel's curse here also serves a literary purpose: it anticipates the greater curses which will be uttered when Danel realises what has happened, that his son and heir has been murdered and devoured. It also prepares Danel psychologically for that later catastrophe, which thus enables him to handle that appropriately later on.

208. I have accepted de Moor's (1975; 1987: 251 and n. 181) and Margalit's (1982b; 1989: 365-67) explanation for this colon. They draw attention to Exod. 16.13-14; Num. 11.9; Judg. 6.36-40. The Heb. term *ś ʿr* has the basic sense of 'hairy', so that *śāʿîr* is a hairy animal ('goat') or a demonic form ('satyr'), while *śᵉʿōrâ* is a hairy plant ('barley'). The radical corresponds to Ug. *ś ʿr*, and Margalit suggests that gathering dew from a fleece makes better sense than collecting water for barley (watering a whole field by hand?). This is also an improvement on Caquot and Sznycer (1974: 445): 'you who collect dew for (your) hair'; 'dew for her hair': Watson (1976c: 378). The 'barley' sense is adopted by others, with some odd results. 'She who skimmed the dew from the barley' (Gibson 1978: 115; del Olmo 1981a: 389) suggests collecting drinking water, which is probably the motivation behind the fleece-technique. 'Who gathers dew for barley' (Pardee, 1997c: 352) suggests some dew-channelling agricultural practice such as was pursued in the Negev.

209. On the significance of 'knowing the courses of the stars' we have no specific information from Ugarit, but we should presumably envisage this as involving elements of astronomy and astrology, scarcely to be distinguished in the ancient world. Texts KTU 1.78 (solar eclipse?) and 1.163 (lunar phenomena) show a dimension of Ugaritic religious practice of which we know next to nothing. But the gods are stars (*kbkbm*) in KTU 1.10 i 4, and Shahar and Shalem are so identified in KTU 1.23.54 and n. 50. This suggests a dimension yet to be discovered. For general studies on ancient astrology-astronomy with bibliography see Baigent (1994) and Barton (1994). However, in view of the mundane nature of Pughat's other skills, this may mean no more than reading the agricultural seasons off from the celestial calendar. But I am not inclined to lend too much weight to this, since she is a king's daughter, and will later play the part of a warrior. She is no mere farmgirl!

210. On the technical language used here see KTU 1.4 iv 4-5 and nn. 121-22. The fact that a donkey is to be used for Danel's journey may point to his royal status. Cf. Zech. 9.9 and its notorious misapplication in Mt. 21.1-7. Do both the Ug.

put on my trappings of silver,
1.19 ii 5 of gold my fitments!'

She obeyed, Pughat who carries water on her shoulder,
wrings the dew from the fleece,
and knows the courses of the stars.

Weeping,[211] she harnessed an ass,
weeping, she roped up a donkey,
1.19 ii 10 weeping, she lifted up her father,

she set him on the back of the ass,
on the most comfortable part of the back of the donkey.[212]

<Dan>el drove (it) on[213];
he went round his heat-cracked fields[214].

A shoo[t][215] he saw in the heat-cracked field,

and the Heb. texts allude to a ritual royal progress?

211. Ug. *bkm*. Taking *-m* as adv. on √*bky*. Thus most commentators, e.g. Caquot and Sznycer (1974: 446) and Pardee (1997c: 352). Presumably Pughat's inward grief (see n. 199) now becomes a public display. Cf. however Margalit (1989a: 159, 360-61 n. 13): 'silently', that is, continuing as before. This is to accept *bkm* as cognate with Ar. *bakima*, 'be dumb, silent'. It is a tempting alternative. Gibson (1978: 115): 'forthwith'; cf. Del Olmo (1981: 390, 526): 'thereupon', de Moor (1987: 252); cf. Heb. *bᵉkēn*, a late usage. The threefold repetition, which gives some prominence to the word, makes a conjunction unlikely, since it fulfils no convincing poetic function. Gibson (115 n. 11) allows 'weeping' as an alternative.

212. This bicolon occurs at KTU 1.4 iv 14-15.

213. The text reads *ydnil* here, and *ydnh* at l. 19. The former is usually corrected (*pace* Virolleaud 1936d: 150), to *ydn<.dn>il*, as proposed by Cassuto (1938). The second is read *ydn<.dn>i<l>* by *KTU*^{2}, *CTA* and *KTU*^{1} still reading *ydnh*. The vb *ydn* is variously translated: 'directs' (Caquot and Sznycer 1974: 446); 'whipped it' (Dijkstra and de Moor [1975: 203]; note their discussion of the haplography); 'urged it on' (del Olmo 1981a: 390, 558; de Moor 1987: 252)—all Ar. *wadana*. Gaster (1961: 360): 'proceeds'. Pardee (1997c: 352): 'approached'. Margalit (1989a: 159, 223-24) rejects the alteration, appears to want to retain the *y* (his argument is obscure), and makes *ydnil* subj. of the following clause, but on the cognate *wadana* his objection (that 'judging', *ydn*, is absurd) is met.

214. Ug. *palt*. *WUS*, 252 §2184, cf. Ar. *ba'īl*, 'thin, lean', Akk. *pēlu*, 'suppress'. Discussed Dijkstra and de Moor (1975: 203), Margalit (1989a: 388-89), Renfroe (1992: 159) and Tropper (1994). A recent suggestion by Watson (1995a: 224-25; 1996: 77) is 'ill-omened (land)'.

215. Ug. *bṣq[l]*. See Margalit (1989a: 389-92) for discussion.

a shoot he saw among the wilted plants.

1.19 ii 15 The shoot he embraced and kissed:

'Oh!
May this shoot rise up in the heat-cracked field,
May the shoot rise up among the wilted plants!

Plant,
may the hand of Aqhat the hero harvest you,
may it put you in the midst of the granary!'[216]

He drove (the donkey) on[217];
he went round his parched land.

1.19 ii 20 He saw an ear of corn in the parched land,
an ear of corn he saw among the withered stalks.

The ear of corn he emb[raced] and kissed:

'Oh!
May this ea[r of corn] rise from the parched land,
may the ear of corn rise up [among the wit]hered stalks.

Plant,
May the hand of Aqhat the he[ro] harvest you,
1.19 ii 25 may it put you into the midst of the granary!'

From his mouth the word had scarcely gone forth,
from his lips [his speech],

(when) in lifting up their eyes, they saw[218]

216. Danel sees the first result of his curse, still ignorant of the tragedy. He hopes that a counter-blessing will revive the shrivelling plant. But his wish that it may be harvested by Aqhat only lends greater irony: it is Aqhat's death which lies behind the drought. It would be wrong to conclude from this wish that Danel and Aqhat are simply of farming stock. It is bucolic language used of the king and his heir, for they are the true authors of bounty in the land.

217. Text *ydnh* may be retained, following the sense discussed in n. 213. Translation requires further reference to the donkey for clarity.

218. Text *wtphn*. Apparently 3 f. sg., with Pughat as subj. Thus Gibson (1978: 116), del Olmo (1981a: 391) and Pardee (1997c: 352). We should expect *wyphn*, with Danel as subj., since Pughat is not the immediate antecedent, having last been subj. of a vb in l. 10, 22 cola previously. See Dijkstra and de Moor (1975: 205-206). They suppose that the present form is a rare 3 m. sg. as with *tmz'* in KTU 1.19 i 36 (but note my comments at n. 200 above). Caquot and Sznycer (1974: 447 n. z) take it as at KTU 1.19 i 29 above (see my comment at n. 197). The putative eyes are not mentioned here. A third solution to the problem is to read the vb as 3

that [ ] was not coming;[219]
two young men[220] were comi[ng forth] by themselves;
they came forth hesitantly[221].

1.19 ii 30 Smitten [twice on the s]kull,
three times above the ea[r],[222]
the locks of their heads were dis[hev]elled[223];

m. du., serving for both genders, with both Danel and Pughat, who is after all still present, as subjects. The sight of the two messengers immediately shatters the hope that Aqhat might appear, as though in response to his father's words, to fulfil his hope.

219. Text *e*(= *i*)*n*. [ ] [?] *hlk* (Virolleaud 1936d: 153; followed by *CTA*); in.š*[ ] b*(?) hlk* (*KTU*[1]); *in* š[ ] b*hlk* (*KTU*[2]). A colour slide shows no certain evidence of the *š, in my estimation. (The *h* of *hlk* could also be *i*.) Dijkstra and de Moor (1975: 206), read *in* [*aqht*] *hlk*: 'Aqhâtu was not coming!'. De Moor (1987: 253) following the new reading as restored by de Moor and Spronk (1987: 113: š[*lm*]): 'there was no peace in the walking (of the two lads)'. Similarly Margalit (1989a: 134, 159, 225).

220. Ug. *ǵlmm*. Elsewhere the term *ǵlm* and its f. form *ǵlmt* have explicitly divine or royal reference, as discussed above at n. 99 to KTU 1.2 i 13. Jirku (1962: 131 n. 6) wonders whether they are divine messengers. Cf. Pardee in n. 222.

221. Ug. *yṣa wl.yṣa*: lit. 'came forth and did not come forth'. The three instances of *yṣa* in ll. 28-29 are all narrative inf. abs., with the young men as subj. De Moor (1987: 253) draws a contrast in subj. of the two latter instances: '[Surely] they came back, but he did not come back', which implies that the two were hunting companions of Aqhat.

222. Most commentators understand this to be a description of a mime by the two young men. Thus Driver (1956: 61); Gibson (1978: 116); Xella (1982: 209); de Moor (1987: 253); Margalit (1989a: 159). Pardee (1997c: 352 and n. 103), taking this line, implies by his rubric that they are messengers of Mot. Del Olmo (1981a: 391) supposes it to be their opening words. In this case they take an inordinate time to get to the point. On the common view, adopted here, there remains some dubiety in view of the vb form *hlm*; I have understood this to be G pass. pt. du. Any active or finite verbal sense would however require the presence of a reflexive element (thus **y/thtlmn* or similar). De Moor's 'they struck' is pl., Pardee's 'he/they struck' sg. or pl. The mime would be a mixture of non-verbal communication to Danel, reflecting the messengers' distress, and gestures of mourning, in which they show solidarity with Aqhat in the particular manner of his death. We need not conclude that the messengers are miming. Rather do we have here a description of two people emotionally distraught at the news they bear, with the poet choosing his words in such a way that their behaviour unconsciously evokes the murderous activities of Anat and Yatipan.

223. Text [*wt*(?)*a*]*sr*: Virolleaud (1936d: 153); [---]*sr*: *CTA*; ×[ ]sr: *KTU*[1]; l[a]*sr*:

over the locks the band[224] [ ]
[ ] tresses,

and they poured out tears
like quarter-shekel weights[225].

They [ ] with (their) hand[226].

1.19 ii 35 Their secret overwhelmed (them)[227],
their secret overpowered[?] (them)[228]![229]

KTU[2]. Any reading is uncertain. Provisionally, 'not bound'.

224. Ug. *asr*. 'A band': de Moor (1987: 254), on the basis of a missing headband, which would have retained their hair. Unbound hair would be a sign of mourning.

225. Taking it as a fraction, with, e.g., Caquot and Sznycer (1974: 448); Gibson (1978: 116); del Olmo (1981a: 391); de Moor (1987: 254); and Margalit (1989a: 160). Unless perhaps these are 'four shekel weights'? Cf. n. 27 on the translation above at KTU 1.14 i 29-30, on the more heroic scale of Keret's weeping.

226. The *bm yd* is construed by most commentators with what follows. On Margalit's (1989a: 160) understanding, followed here, this concludes the previous colon. Margalit: 'they cla[sp the(ir) lips] with the hand' (that is, they cover their mouths in horror at the news they have to impart).

227. Reading *tliym* on the basis of Margalit's approach (n. 229 below), rather than the alternative discussed there, which would make better sense with **nliym* (as read by Dijkstra and de Moor 1975: 207; *KTU*[2]); some are victorious': de Moor (1987: 254, following de Moor and Spronk 1987: 113), reading *tliym* (vb) with Virolleaud (1936d: 153, *CTA*, *KTU*[1]). So also del Olmo (1981a: 391): 'triumph' (n.).

228. Ug *nṣḥy*. 'Is oppressive': Margalit (1989a: 160, 227). Cf. Heb. √*nṣḥ* (pi.) 'be preeminent'. Following the alternative construction outlined in the following note, 'triumph' (n.): Gibson (1978: 116, 153), 'victory': del Olmo (1981a: 391, 592); Heb. *niṣṣāḥôn*. 'If we are disgraced': Dijkstra and de Moor (1975: 207)—√*ṣḥy*, 'be disgraced'; 'with[out] triumph': de Moor (1987: 254).

229. Most commentators who attempt this bicolon divide *ṣpnhm* into two words as *ṣpn hm*. This gives the following sense, open to a number of different nuances on different individual analyses:

> (It is) in the hands of Saphon if we are victorious
> in the hands of Saphon if we endure!

Let us firstly consider this interpretation. Note the invocation of Saphon as a DN (cf. KTU 1.47.[14] and parallels). The expression has the appearance of an early form of '*inshallah*!' A strength of polytheistic theology was its ability to offer a comprehensive theodicy, since various deities were responsible for different aspects of life, both good and evil. By acknowledging that a given human problem was simply, in the nature of things, the province of this or that deity, the anxiety level involved in dealing with it could be reduced. This was not a solution open to

[ ]
{'We bring you[230] news, Danel,}
{from [ ]}
{Beneath Anat he fell;}
{she felled him.}
{She drove out his life-breath like the wind,}
{like spittle his vitality[231]!'}[232]

1.19 ii 40 They arrived;
they lifted up their voices and c[ried]:
'Listen, O Danel, man of [healing]:
Aqhat the hero is dead!
Virgin Anat [drove out his life-breath] like the w[ind],

monotheistic theodicy, which has always had a peculiar moral dilemma to face, accommodating the evil in the world to the principle of a just god, as eloquently reflected in the book of Job, or in balancing the rival demands of justice and mercy, as in later forms. Saphon was an 'umbrella-deity', containing all the contradictions of the pantheon at large, but providing a short-hand synthesis of them, without the difficulties raised by strict monotheism.

Margalit (1989a: 160, 396-97) has an entirely different approach, which has the merit of reading the text we actually have, *ṣpnhm*, as *ṣpn*, n., with 3 du. suff. *-hm*. I am inclined to follow his argument, and have translated accordingly. It fits the context better, since the common view (above) represents a rather commonplace wisdom-saying which is hardly very apposite in the present context. On this understanding it is the √*ṣpn*, 'to hide', which determines the sense of the terms. Cooper's (1988: 23-26) interpretation of this passage is nothing if not original: he has Pughat grab the messengers by the 'scrota' (to Ug. *ṣpn* cf. Ar. *ṣafnu*, 'scrotum')!

230. Text *abšrkm*: the pl. suff. makes no sense, unless we suppose that Pughat is included in the address; but this is contradicted by the reference only to Danel here and at l. 41. Read **n[l]bšrk*?

231. 'His life-breath... his vitality'. Text *npšhm... brlthm*, the obvious sense of which is the *non-sequitur* 'their life-breath... their vitality'. Cf. previous note.

232. The text of ll. 36-39, much broken, is difficult to fit into a meaningful sequence. It appears that the young men arrive and address Danel (but why the pl. suffixes?—see previous notes). But they arrive again at l. 40. Do we have here a reflection of a double recension, with both texts included? Since the former is hard either to make sense of or to reconcile with ll. 40-44, I have bracketed it, { ... }, as best left out of account in following the narrative. Margalit (1989a: 135, 160, 227-30, 381-88) has attempted to deal with the problem by splicing the two texts, but I think unsuccessfully.

like spittle his vitality!'[233]

[ ]

1.19 ii 45 [At this his feet] trembled;
abo[ve, his face sweated],
his tendons sna[pped about him],
[the tendons of his back contracted],
as did the muscles o[f his shoulders.][234]

[He lifted up his voice] and cri[ed]:

'[ ]
[ ] smite
1.19 ii 50 [ ]'

(gap of 5 lines)

edge In lifting up [his eyes he saw,]
[he caught sight of some falcons] in the clouds.

1.19 iii 1 [He lifted up his voice] and cried:

'The win[gs of the falcons] may Baal sma<sh>,[235]
may Baal smash [their pinions[236]]!

Let them fall a<t> my feet[237]!

233. *KTU*[2] reads [k qṯr b aph bh p'nm]; Margalit (1989a: 135): *ẏqḷ.l*{ }*tḥ*[*wy*.] *hwt*, which he labels as displaced l. 38. It does not correspond to anything in l. 38, however.

234. The formula of ll. 44-47 can be restored on the basis of parallels at KTU 1.3 iii 32-35 and 1.4 ii 16-20.

235. Text *yṯb*, here and in l. 17. Elsewhere the forms *yṯbr* (ll. 2, 8, 17, 31) or *ṯbr* (ll. 9, 22, 23, <36>, 37) appear. Most correct the first form to *yṯb*<*r*>. Watson (1976c: 371-72) suggests that instead of the usual explanation (√*ṯbr*, 'smash') this form (√**nṯb*) is to be related to a putative Ar. *naṯaba*, 'pluck'. Were there more examples of the spelling without *r* a case might be made, but for it to be sustained it would mean correcting several examples of the other forms.

236. Text [*diy hmt*], restored on basis of the parallel at l. 9. Elsewhere I have translated the parallel to *nšr*(*m*), 'falcons', *diy*(*m*) (KTU 1.18 iv 17-8, 20-21 etc.), as 'hawks'. See n. 151 *ad loc*. Here it is not the falcons who are smashed, but their wings. Lit. 'the pinions of them'. Since *diy*(*m*) is strictly parallel to the construct *knp*, it is appropriate to translate accordingly; the *hmt* is parallel to *nšrm*. The previous sense of *diy* was in any case strictly synechdoche. Cf. del Olmo (1981a: 384, 393), Margalit (1989a: 155, 161), Pardee (1997c: 349, 353).

237. Ug. *tḥ*<*t*>. Lit. 'beneath'.

I shall tear open [their stomachs[238]]
[and] I shall look (to see) whether there is any fat,
1.19 iii 5 whether there [are] any bones.

I shall weep and I shall bury him,
I shall place (him) in a hole for chthonian gods[239].'

From his mouth the word had scarcely gone forth,
from his lips [his] word;

(when) the wings of the falcons Baal smashed,
Baal smashed their pinions.

1.19 iii 10 They fell at[240] his feet.

He tore open their stomachs,
and [he looked].

There was no fat[241],
there were no bones.

He lifted up his voice and cried:

'The wings of the falcons may <Baal> restore;
may Baal restore their pinions!
Let the falcons flee and fly away!'

In lifting up his eyes he s<a>w,
1.19 iii 15 he caught sight of Hargab the father of the falcons.

He lifted up his voice and cried:

'The wings of Hargab may Baal sma<sh>;
may Baal smash his pinions!
And may he fall at my feet!

I shall tear open [his] stomach
and I shall look (to see) whether there is any fat,
whether there are [any bones].

1.19 iii 20 I shall weep and I shall bury him,
I shall place him in a hole for [chthonian] gods.'

238. Text [*kbdthm*], restored on basis of parallel at l. 10. Lit. 'their liver(s!)', but hardly to be translated thus. If not the stomach, then the crop. Cf. *UT*, 417 §19.1187.

239. Pardee (1997c: 353 n. 109) identifies these with the dead and deified kings of KTU 1.113. Ug. *ilm art*. For second word read *arṣ*!.

240. Ug. *ṯḥt*. Lit. 'beneath'.

241. Ug. *šmt*. Cf. *šmn*, 'oil' (*UT*, 491 §19.2439, 492 §19.2444).

[From his mouth the word had scarcely gone forth],
[from] his [lip]s his speech,

(when) the wings of Hargab Baal smashed,
Baal smashed his pinions,
and he fell at his feet.

He tore open his stomach
and he looked.

1.19 iii 25 There was no fat;
there were no bones.

He lifted up his voice and cried:

'The wings of Hargab may Baal restore;
may Baal restore his pinions:
Let Hargab flee and fly away!'

In lifting up his eyes he saw,
he caught sight of Sumul, mother of the falcons.

1.19 iii 30 He lifted up his voice and cried:

'The wings of Sumul may Baal smash;
may Baal smash her pinions!

Let her fall at my feet.

I shall tear open her stomach,
and I shall look (to see) whether there is any fat,
<whether> there are any bones.

I shall weep and I shall bury him;
1.19 iii 35 I shall place him in a hole for chthonian gods!'

From his mouth the word had scarcely gone forth,
from his lips his speech,

(when) the wings of Sumul Baa[l] <smashed>;
Baal smashed her pinions.

She [fell] at his feet.

He tore open her stomach and he looked:

there was some fat,
there were some bones.

1.19 iii 40 Then he took out the flesh[242] of Aqhat,

242. Ug. *bhm*. I accept Margalit's (1979–80: 93) proposal to see an Ug. cognate

the remains[243] he took away[244].[245]

He wept and he buried (him),
he buried him in a tomb[246] in a cemetery[?247].
And he lifted up his voice and cried

'The wings of the falcons may Baal smash,
may Baal smash their pinions,

if they fly over the grave of my son,

of Heb. *b^{e}hēmâ* here. See also at KTU 1.114.11. 'From them' (sc. the gut of Sumul) is unconvincing.

243. Ug. *llqẓ*. Dijkstra and de Moor (1975: 208): reading *yb*[.]*l lqẓ* (misplaced word-divider [cf. the one at KTU 1.19 iv 8]: read *ybl.*) and considering *lqẓ* a pseudo-correction for *lqṭ*, 'gleanings, remains', cf. Ar. *laqaṭa*, Heb. *lāqaṭ*; therefore 'carried off the remains'. De Moor (1987: 258): '(he yelled, [but]) he did not wake', in Rom. as tentative). Margalit (1989a: 163, 232-33): 'he thrashed'. Pardee (1997c: 353 and n. 113): 'slept not a wink', with n. '...i.e. "observe a wake"'. The simplest solution here, though later rejected by de Moor, is the first one, involving the least manipulation of the text.

244. Text *yb*, *CTA*, with p. 90 n. 2 suggesting 'perhaps *yb'l*'. This is a tempting reading ('he brought [him]'), but previous ayins, as in ll. 37-38, are larger than the sign here. *KTU*^{2} suggests *yb<ky>*, 'he wept (for him)'. Cf. Margalit (1989a: 163, 232-33), Pardee (1997a: 353 n. 112). Cf. next note.

245. Note the folk-tale construction, in which at the third attempt Danel finds human remains, which he immediately identifies as belonging to Aqhat! Sumul's only crime is carrion-eating. I assume that she was not healed like the other falcons.

246. Ug. *mdgt*. See next note.

247. Text not certain, but *knrt* as likely as *knkt* (*knknt?*), and now adopted by *KTU*^{2}. For an exhaustive analysis of the reading of the line see Pitard (1994b), who concludes that *knrt* is certain. This is the basis for the 'Kinneret hypothesis' of Margalit (1976: 173-75; 1989a: 233-34). In terms of broad geography this is unexceptional, as there are several features of the region which are familiar to Ugaritic tradition. However, Margalit's translation of the preceding *mdgt* as 'fishpond' makes nonsense of the 'hole of chthonian gods' which Danel has repeatedly said he will use for Aqhat's burial (KTU 1.19 iii 6, 20-21, 35). It is accordingly better to understand it as a 'tomb' (cf. Dijkstra and de Moor 1975: 208; del Olmo 1981a: 395, 575; Ar. *dajā*, *dujjatu*). The old sense of 'libation-pipe' for *knkt* (*knkn*, *knk<n>t*) maintained by Dijkstra and de Moor should be rejected in the light of Pitard (1994a). Del Olmo (1981a: 566) explains the last by reference to Akk. *kankannu*, *kanāku*, *kaniktu*, *maknāku*, Ar. *kanna*, *kinnu*, *kinnatu*, and translates 'tomb'. Thus *bmdgt bknkt* would be a hendiadys. But with the reading now resolved this is superseded. The meaning of *knrt*, unless interpreted as a TN, as by Margalit, remains unresolved. Note Pitard's (1994b) conclusions. My translation is conjectural.

if they wake him from his sleep!'[248]

Qar-Mayim[249] did the king[250] curse:

'Woe to you, Qar-Mayim,
because nea[r you] was smitten Aqhat the hero!

Be ever a supplicant in the temple,
now and forever a fugitive,
now and for all generations!'

Afterwards he took his staff in his hand;
he came to Mararat-Tagulalu-Baniri.

He lifted up his voice and cried:

'Woe to you, Mararat-Tagulalu-Baniri,
because near you was smitten Aqhat the hero!

May your root not grow out of the soil;
may your head come away in the hand of your harvester,[251]

now and forever a fugitive,
now and for all generations!'

Afterwards he took his staff in his hand;

he came to the town of Abilim,
Abilim the town of Prince Yarih.

He lifted up his voice and cried:

'Woe to you, town of Abilim,
because near you was smitten Aqhat the hero!

May Baal make your wells dry,
henceforth and forever,
now and for all generations!'[252]

248. On the motif of the dead sleeping, and the invocation of a curse if they are woken up, see the sarcophagi of Tabnit and Eshmunazar (*ANET*, 662).

249. Or: 'Waterswell': Ug. *qr mym*. Pardee (1997c: 354) translates as a neutral geographical term: 'spring of water'.

250. Ug. *mlk*. 'What pertains to you': Pardee (1997c: 354 and n. 115). See however n. 5 to KTU 1.17 i [2], n. 42 to 1.17 i 34, n. 55 to 1.17 ii 11 and n. 73 to 1.17 v 8 for circumstantial evidence in favour of understanding Danel to be a king. Margalit (1989a: 410) argues against a royal understanding.

251. See discussion in Watson (1976c: 374-75).

252. The town of Abilim is cursed last in a climactic series (note the typical

Afterwards he took his staff in his hand.

Danel came to his house,
Danel arrived at his palace.

Wailing women had come[253] into his palace
1.19 iv 10 mourning women into his dwelling.[254]

Those who lacerate[255] the flesh wept for Aqhat the hero;
they sobbed for the child of Danel the man of healing.

From days to months,
from months to years,
1.19 iv 15 until the seventh year,
they wept for Aqhat the hero,
they sobbed for the child of Danel the man of healing.

Then[256] in the seventh year
[Danel the m]an of healing spoke,
the hero, the ma[n of *Hrnm*], responded.

1.19 iv 20 He lifted up his voice and cried:

'De[part from] my [house], wailing women,
from my pala[ce], mourning women,[257]

---

three-fold series) because it is the place where the murder is carried out. See at KTU 1.18 i 30-31 and iv 8. Perhaps the legal tradition outlined in Deut. 21.1-9 lies in the background to Danel's action. Gaster (1961: 368 n. m) is undoubtedly right in pointing out the word-play between the geographical term (cf. Heb. *'ābēl*, √*'bl* II, 'meadow') which underlines this TN and √*'bl* I, 'mourn'.

253. Cf. KTU 1.17 ii 26 and n. 61 on the pluperfect sense.

254. The bicolon is an ironic echo of the arrival of the skilful goddesses (*ktrt*) at KTU 1.17 ii 26-27.

255. The form is m. Thus men as well as women act as 'professional' mourners. Cf. the prohibition on self-laceration in Lev. 19.28, Deut. 14.1, and Jer. 16.6, an indication that it was traditional practice in Israel-Judah. Cf. the ritual actions of the 'prophets of Baal' in 1 Kgs 18.28, and of El and Anat at KTU 1.5 vi 17-22 and 1.6 i 2-5.

256. I have transferred the copula *w* from the following phrase (*wy'n* [*dnil*...]).

257. A rather erratic line is scored across the column after l. 21, first noted in editions of the text by *KTU*[2]. Since it bisects a tricolon it is difficult to discern any purpose, except that it separates female from male mourners. Perhaps the line is to warn the reader to note the instruction on the lower edge 'and the recitation of this he is to repeat' (following KTU 1.19 iv 62). But this does not explain its precise location. Cf. Margalit (1984c: 178-79) and de Moor (1987: 265 n. 262).

from my dwelling, you who lacerate the flesh!'

Then he offered a sacrifice to the gods,
he offered up their[258] incense among the heavenly ones,
1.19 iv 25 incense of *Hrnm*[259] among the stars[260].

[ ] on it the hand of [ ],
[ ] cymbals,
ivory castanets [ ][261]

Then Pughat who carries water on her shoulder replied:

'Having offered, father, a sacrifice to the gods,
1.19 iv 30 having offered up <their>[262] incense among the heavenly ones,
incense of *Hrnm* among the stars,

bless[263] me, that I may go forth blessed;
give me a blessing, that I may go forth given a blessing;

that I may smite my brother's smiter,
1.19 iv 35 that I may kill my sibling's killer!'

Then Danel, the man of healing, replied:

'Let your spirit flourish, Pughat,
you who carry water on your shoulder,
who wring dew from the fleece,
who know the course of the stars,

May it go well with (you)![264]

You will smite [your brother's] smiter;

258. Possibly 'their' (*dġthm* read by *KTU*[2]). The break in the tablet leaves what may be the horizontal stroke of a *m*. 'His': de Moor (1987: 260) and Pardee (1997c: 355).

259. Parker (1972: 101).

260. Note Ug. *kbkbm* here a designation of the gods. Cf. KTU 1.10 i 4 and n. 50 to KTU 1.23.54. See also Pughat's epithet *yd't hlk kbkbm* at KTU 1.19 ii 2-3 (with n. 209).

261. On musical instruments used at Ugarit see Caubet (1996).

262. Text *dġth*. 'His' cannot be right when Pughat is speaking directly to Danel, since she is not addressing him in the third person. Cf. n. 258.

263. 'Father... bless me'. I have taken *ab* in l. 29 to be voc. and the vb *tbrkn* to be 2 m. sg. with Danel as subj. Similarly del Olmo (1981a: 398); de Moor (1987: 263). Cf. Pardee (1997c: 355).

264. Cf. KTU 1.17 i 38. Lit. 'may she go well!'

you will kill your sibling's killer!'
[ ] she went down to the sea[265].
She was[hed] herself
and she rouged herself[266] with shellfish from the sea,
whose source is a thousand acres in the sea.
Un[derneath] she donned warrior's equipment:
she put a da[gger] in her sheath;
a sword she placed in [her] scabbard.
And on top she donned women's clothes.[267]
At the going down of the luminary of the gods, Shapsh,
Pughat [reached] an encampment on the steppe[268].
At the setti[ng][269] of the luminary of the gods, Shapsh,

265. If Pughat goes to the sea, source of shellfish, it seems that the Kinneret geography is compromised.

266. Text not clear. Virolleaud (1936d: 176 and pl. IV): *wtadm te*(= *i*)(?)*dm*; *CTA* (*a*/*t*)*dm.tid*^{l}*m*; *KTU*^{1} w*.t*k*m.tium (tidm) (followed substantially by del Olmo [1981a: 399] and Margalit [1989a: 140]); *KTU*^{2} tad*m.tium* (read *tidm*). A slide offers no certainty. The older reading seems safer, though puzzling. The parallel passages (next n.) do not describe a *rouging* to the shoulder. Do we perhaps have *tadm* (corresponding to the vocalized forms at KTU 1.14 ii 9, iii 52) subsequently corrected to *tid*^{l}*m*, with the error not erased? The usage is of great symbolic significance. It combines the beautification associated with Anat in KTU 1.3 iii 1 (cf. also Hurriy's make-up at KTU 1.14 iii 43-44) with the rouging performed by Keret in KTU 1.14 ii 9, iii 52. See nn. 44, 106 *ad loc*. Pughat is as far as Yatipan will perceive making herself up as a seductive woman (whether or not pretending to be Anat); the vb *tadm* however gives the reader or listener a clue to her real intention, which is violence. She has murder in her heart.

267. On Pughat's clothing see Watson (1976c: 375-76). 'Equipment...clothes': the same Ug. term *npṣ* is used in both cases. Cf. KTU 1.17 i 33 and n. 39. Note the skilful way in which the bicolon on clothing, in the form of an envelope, frames the bicolon on weapons, to make a tetracolon. Thus are the weapons concealed within Pughat's garments. Dijkstra and de Moor (1975: 212) state that Pughat's intention was not to conceal her weapons, but to resemble Anat. The prosody implies a bit of both. They also note the word-pair *tḥt*...*'l*. The order enhances the element of disguise, because the earlier line (that which is on top) is *tḥt*, underneath, while the later (which is underneath), is *'l*, on top. All is not as it seems. (Gaster's [1961: 373] alteration of the line-order here to preserve a 'modern logic' misses the point, which is precisely the paradox.)

268. Hunting country. The crime was committed during a hunt: vengeance will be sweetest in similar circumstances.

269. 'At the going down.. of the setting...'. Ug. [*lm*] *ṣbi*...*lm'r*[*b*]. The two

1.19 iv 50 Pughat came to some tents.[270]
Word was brought[271] to Yati[pan]:
'Our employer has come to your tent,
[Anat][272] has come to the tents.'
And Yatipan, the mercenary war[rior], replied:
'Take this and give me to drink:
take[273] the cup from my hand,
the goblet from my right hand'.
1.19 iv 55 Pughat took (it) and gave him to drink.
She took[274] [the cup] from his hand,
the goblet from his right hand.
Then Yati[pa]n the mercenary [warri]or said:

terms are synonymous. Just as Anat had proposed a moonless night for the crime (KTU 1.18 iv 9-11), so Pughat chooses a sunless night for her revenge. Perhaps a moral opposition is intended: a criminal activity echoed by an act of judgment. The sun was widely taken as a symbol of justice in the ancient world, with sun-gods the guardians of law.

270. A second tetracolon, consisting of two interleaved bicola, almost evokes the folds of tent-fabric.

271. Note the way in which unnecessary characters in the story are kept out of the picture by the impersonal use of the vb.

272. An intriguing crux, which has a bearing on the psychology of the scene. *CTA*, *KTU*[1 and 2] restore [*pġt*], as does Pardee (1997c: 355 and n. 135), translating *agrtn* as 'our hireling'. This fits in well with the psychological position accepted by de Moor (1987: 264 n. 254). Thus Yatipan and his crew, no doubt already far gone in their cups, see a girl approaching, indeed take her to be Anat, but now consider her to be *their* employee rather than the other way round, and thus call her 'the girl' (*pġt*). Her main task now is to refill their glasses! The alternative is to restore ['*nt*], as various commentators have done (e.g. Gibson 1978: 121; del Olmo 1981a: 400; de Moor 1987: 264[!]; Margalit 1989a: 141, 165, 241). See Dijkstra and de Moor (1975: 212). On this approach it is only now that with typical male swagger they insolently treat her, the goddess of war and hunting, as a mere serving-girl. This will presumably be a serious misjudgment, though of course we do not know the outcome. The choice between the two approaches is finely balanced. But Yatipan's later form of address, 'lady' (*št*), perhaps spoken with irony in the context, tilts the balance in favour of the line taken here. Jirku (1962: 136), with 'our enemy(?)' and Xella (1982: 216), with 'Anat (?)' are in doubt. Aistleitner (1964: 82) leaves blank.

273. The vb, *t*[*q*]*ḫ*, 'take', would appear to require Pughat to remove the cup from (*b*) Yatipan's hand to fill it up. The emphasis is curious. Perhaps it is to emphasise the insolence of Yatipan, who supposes the girl to be Anat.

274. Reading *t*q*ḫ* instead of *t*p*ḫ* (*KTU*[2]).

'With wine, O Lady, I am strong[275]!
(I am) the god[276] [ ]
the god who owns (these) tents!
The hand[277] which smote Aq[hat] the hero
will smite thousands of the Lady's enemies,
1.19 iv 60 working spells on (their) tents[278]!'
[ ]...
her heart like a serpent [ ][279]
With wine [she] filled him[280],
edge a second time she gave him mixed wine to drink,
she gave him to drink [ ][281].
side And the recitation of this he is to repeat.[282]

275. Ug. *ila*. Taking it as √*liy*, 'be strong' (as occurring in Baal's epithet *aliyn*). For this approach see also de Moor (1987: 264). Thus *CTA*, *KTU*[2]. Others correct to *iln* (thus *KTU*[1]), reading either 'our god' (thus Gibson 1978: 121 [but with text uncorrected]) or 'our Ilu' (thus del Olmo 1981a: 400). Cf. Margalit (1989a: 166, 242); Pardee (1997c: 355): 'ILA', a DN. Gaster (1961: 375) and Gibson (1978: 121) have Yatipan propose a libation here, while for del Olmo (1981a: 400) it is part of an oath by Yatipan.

276. Dijkstra and de Moor (1975: 213) have Yatipan claim to be a god himself, he is so strong! This nicely parallels Pughat's disguise as Anat. I have adopted this position.

277. Sc. Yatipan's.

278. I take this colon to be part of Yatipan's boast. For de Moor (1987: 265) it is a spell cast by Pughat before she carries out her plan. The form *ḥršm* being narrative inf. abs. with enclitic, either is possible.

279. Text: p ×[×.]*ḥkm ybl.lbh.bṯn* (thus *KTU*[2]). Dijkstra and de Moor (1975: 213-14) followed by de Moor (1987: 265) take *bṯn* with the following clause ('a second time...') and read and construe the rest as p[tgm]*rm* [*y*]*bl.lbh*, 'she carried out the wish of her heart' (√*gmr*, 'to achieve, to accomplish'). Others take *lbh.km.bṯn* as I have: 'her heart was like a serpent'. Thus, e.g., Gibson (1978: 122); del Olmo (1981a: 401); Pardee (1997c: 356). Margalit (1989a: 141, 166, 242-46) takes an entirely different line.

280. The suffix *-h* can denote either Yatipan or the cup. I have chosen the option more in keeping with Pughat's intention.

281. The narrative breaks off *in medias res*. Dijkstra and de Moor (1975: 213-14) detect a final *s*[ ] in the extension of the line under the end of col. iii (see *CTA*, 92 n. 4). They restore *tšqy.s*[m hwt], '*she gave* him poison *to drink*'.

282. At this point the tablet breaks off. KTU 1.20–1.22, the so-called *Rpum*-texts, are sometimes regarded as the continuation of the narrative. Cf. Dijkstra and de Moor (1975: 171-72). I do not share this opinion. Cf. n. 257 to KTU 1.19 iv 21.

Select Bibliography
Virolleaud 1936c: 228-30, 1941a; Aistleitner 1964: 83-86; Caquot and Sznycer 1974: 471-80; Gordon 1977: 29-34; L'Heureux 1979: 129-59; del Olmo 1981a: 417-24; Spronk 1986: 161-77; de Moor 1987: 266-73; Pitard 1992, 1999b; Aboud 1994: 127-49; Lewis 1996a, *idem* in Parker 1997: 196-205.

These three fragments were at first identified as part of the Aqhat story (KTU 1.17–1.19), a view still maintained by de Moor (1987). They are evidently parts of considerably longer texts, and appear to be different versions of the same narrative sequence rather than complementary episodes. They deal with the journeying of the *Rpum*, deceased and deified kings, to a communion-ritual (probably the *kispum*) where it appears that their power was invoked on behalf of a new king. These texts perhaps supply the mythological background to the rites underlying KTU 1.161.

KTU 1.20
Small portions of two out of a possible six columns survive.

1.20 i 1 [The sav]iours[1] will feast[2]:
[seve]n times the divinities,
[eight times[3]] the dead[4].
[ ] as the assembly[5] draws near[6]
1.20 i 5 [ ] on a summer's day,
[the divinit]ies will eat,
[[7]] will drink[8].

1. Ug. *[rp]um*. Various translations: 'saviours' (de Moor), 'divine rulers' (Aistleitner), 'hale ones' (L'Heureux), 'shades' (Caquot; Lewis); untranslated (del Olmo). In view of the fact that they are apparently divinized dead kings, have a soteriological function in maintaining society, and appear, as here, in parallel with *ilnym*, 'divinities' ('minor gods'), 'saviours' seems an appropriate translation. The technical sense applied to 'heroes' in Greek cultic contexts may also be appropriate. See further discussion at KTU 1.161. These mythological texts may have a bearing on its cultic context.

2. Ug. *tdbḫn*. Taken as 3 pl. (juss.: de Moor 1987: 267; indic.: Lewis 1996a: 124, 133); or as 2 pl. (indic.: L'Heureux 1979: 130; del Olmo 1981a: 417). 'Feast', Lewis (1996a: 124); 'prepare food', L'Heureux (1979: 130); 'sacrifice', del Olmo (1981a: 417); 'take part in the sacrifice', de Moor (1987: 267). Cf. KTU 1.1 iv 28 (*il dbḫ*); 1.114.1.

3. Perhaps the numerical sequence 'seven...eight (times)' (*šb'...ṯmn*: here *šb'd...ṯmn[i]d*) was used here? Cf. l. 1 of col. ii and its putative antecedent. On the other hand the 'seven times' ([*š*]*b'd*) is hardly secure. Cf. L'Heureux (1979: 130).

4. Text [ ]*mtmtm*. The sign preceding this is read *w* by Pitard (1992: 40-42): tentatively, appealing to Virolleaud (1936c, pl. 17; Virolleaud 1941a: 2 reads as *k*), but *k* by Lewis (1996a: 124). The latter translates as 'like the ancient dead' (1996: 128). Caquot (1974: 477 and n. a): *k mt mtm*: 'when men have died'. Del Olmo (1981: 417): k*m tmtm*: 'so that when you (pl.) die'. Perhaps the cs. phrase *mt mtm*, lit. 'dead men'? Whatever the precise nuance, *ilnym* and *mtmtm* refer to the *rpum*. Cf. L'Heureux's argument (1979: 130-31) for reading *amtm*. He rejects the view that the *rpum* are *dead* persons.

5. Ug. *sd*. Or 'council' (cf. Heb. *sôd*: the only instance of this term in Ug.).

6. Reading *qrb*. L'Heureux's suggestion (1979: 130-31): *t'rb sd*: 'and you (they?) will enter the assembly' is equally plausible. If this reading were to be preferred, I would translate it as 3 p.

7. On the parallel of ll. 2-3, we should expect [*mtmt*]*m*. Virolleaud (1941a: 2) and *CTA* read [*rp*]*um*, *KTU*^{2} [ ]*ym*, (cf. Caquot and Sznycer 1974: 477); del Olmo (1981a: 417) [ ]*pm*; Pitard (1992: 46) [ ] *ṯm* (*r* tentative), followed by Lewis (1996a: 124: [ ]*rm*).

8. Ug. *tštyn*. This might be divided *tšt yn*, as by Aistleitner (1964: 84): 'drank wine'.

[ ] the gods of the nut-groves[9]
[ ] which[10] is over...
1.20 i 10 [ ] slaughter of sacrificial lambs[11].
...
(uncertain number of lines missing)
'...
[...seven...in my house]
1.20 ii 1 eight within my palace[12].'

The sav[iours] hurried [to his sanctuary[13]],
to his sanctuary hurried the divin[ities[14]].

[The chariots] they harnessed;
the horses they hitched,
[ ][15].

They mounted their chariots,
they ca[me on their mounts][16].

1.20 ii 5 They journeyed a day
and a second.

9. Cf. KTU 1.24.43. The species of plant is indeterminate.

10. Or: 'who' (f. rel.).

11. Reading *imr* ('sacrificial lamb') for *amr* as suggested by Caquot and Sznycer (1974: 478). Cf. KTU 1.14 iii 56 etc.

12. If El is speaking, as suggested by Lewis (1996a: 128), perhaps 'house...temple' for 'house...palace'. Perhaps however the words are spoken by the living king? Del Olmo (1981: 417) has Danel issue an invitation to the *Rpum*.

13. Ug. *aṯrh*. L'Heureux (1979: 133): 'in its place', referring back to 'my palace'.

14. Reading *il*n[*ym*] (thus *KTU*^{2}) rather than *ilm*[ ] of Pitard (1992: 42, 45) and Lewis (1996a: 124).

15. Text dg[ ]. Restored dg[*lm.tšu*] according to de Moor and Spronk (1987: 119), de Moor (1987: 268) and Lewis (1996a: 124): '[they raised the stan]dards'. The width of the column is not certain, so such a reconstruction is hazardous. Pitard (1992: 42): bg[ ], *KTU*^{2}: b gx[ ].

16. Restored after KTU 1.22 i 23-24. Ug. *'rhm* translated 'their cities' (*UT*, 460 §19.1910, *'r* I, *WUS*, 241 §2091, *'r* II): Caquot and Sznycer (1974: 473 and n. m), 'city': del Olmo (1981a: 421); 'their stallions' (but *UT*, 460 §19.1911, *'r* II, *WUS*, 240 §2090, *'r* I, 'male ass' cf. Akk. *ḫārū*); L'Heureux (1979: 133), 'donkeys'; 'stallions': de Moor (1987: 269) and Lewis (1996a: 128). Cf. also *UT*, 455 §19.1848, *'yr* (Heb. *'ayir*). However, the presence of *sswm*, 'horses' in l. 3 above, must control the force here: 'chariots' || 'horses', 'chariots' || 'mounts'. 'Donkeys' constitutes a *non-sequitur*.

After su[nrise[17] on the third]
the saviours arrived at the threshing-floors,
the di[vinities at] the plantations.

Then Danel [the man of healing[18]] answered,
the hero, the devotee of *Hrnm*, replied[19]:

'[The saviours are at] the threshing-floors,
the spirits[20] are at the pl[antations.][21]

1.20 ii 10 Let those who have come be fed,
feed [ ]
apples...'

(rest of column missing,
together with up to four further columns entirely missing)

KTU 1.21

Part of one column, and a few letters from another, survive from a tablet of six columns.

1.21 i (only a few letters)

1.21 ii 1 '[...] my banquet[22],

17. Ug. *špšm*. 'Sunrise': Caquot and Sznycer (1974: 478), L'Heureux (1979: 133), del Olmo (1981a: 418). 'Sunset': de Moor (1987: 269) and Lewis (1996a: 128). See Watson (1992a: 246). Cf. KTU 1.14 iii 3 and n. 78.

18. Ug. *mt.rpi*, as commonly in KTU 1.17–1.19. See discussion in n. 5 to KTU 1.17 i 1-2, especially reference to Annus 1999.

19. It is this reference to Danel that has provoked speculation that this narrative is linked to the Aqhat story. There may however have been various tales featuring the hero. This bicolon does indicate however that the text already presupposes other characters in dialogue with Danel, none of which survives. Del Olmo's suggestion would have Danel responding to himself(!) and thus require the verbs here to be more neutral ('said...declared' or the like).

20. Ug. *ilm*, but hardly intended (unless 1 Sam. 28.13 be adduced). Perhaps an error for *ilnym*, 'divinities'? It is a matter of rank. See n. 123 to KTU 1.6 vi 48. But cf. the use of *il* with names of dead kings in KTU 1.113 v. Caquot (1974: 478 n. g) takes *ilm* as superlative (but still translates 'the divine threshing-floors').

21. This prosody reflects the reconstruction of Lewis (1996a: 124, 128) over against del Olmo (1981a: 418).

22. Text [ ]*mrz'y*. Most have taken this to be the equivalent of *mrzḥy*, 'my *Marzihu*-feast', 'banquet'. I accept this with some diffidence. The speaker may be the same as Danel's interlocutor in KTU 1.20.

come to my house, [saviours[23]].

[To] my [house] I invite you,
I summon [you into the midst of] my [pa]lace.'

To his sanctuary, saviours, [hurry indeed].
[to his sanctuary] hurry indeed, divinities.

1.21 ii 5 [ ] my banquet[24]
Therefore...[25][ ]
[ ] as my shepherd[26].

Now I shall journey [a day and a second];
[after sunrise on] the third I shall arrive at [my] house,
[I shall come into the mid]st of my palace.'

Then El went on:
'[ ] my [banquet],
come to my house, saviours,

1.21 ii 10 [to my house I in]vite you,
I summon you [into the midst of] my [pala]ce'.[27]

To his sanctuary, saviours, [hurry indeed],
to his [sanctua]ry hurry indeed, di[vinities].

...

(text breaks off)
(further columns missing)

KTU 1.22

A tablet originally of four or six columns. Possibly written by Ilimilku. KTU 1.22 i, ii = CTA 22 B, A, reversing the order originally proposed by Virolleaud (1941a: 12). Virolleaud's order is retained here (supposing this to be the recto of the tablet). About half the width of col. ii is missing. Some restoration is possible on the apparent parallel of KTU 1.21 ii 6-12 (see arrangement of text in Lewis 1996a: 125, 129).

23. Thus Caquot (1974: 479), del Olmo (1981a: 418) and Lewis (1996a: 125, 129).

24. Text [ ]*mrz'y*, as l. 1.

25. Text *yrp*[ ]. Caquot and Sznycer (1974: 479), del Olmo (1981a: 419) and Lewis (1996a: 125, 129) read *y* (voc.) with *rp*[*um*]: 'O *Rpum*'.

26. If El is speaking (thus Lewis), perhaps this is a title of the king.

27. L'Heureux (1979: 139) includes *rpum*... *ilnym* in each colon respectively.

1.22 ii (indeterminate number of lines missing)

1.22 ii 1 '...
[into the mids]t of my palace'.

[Then El went on:]
'[my banquet] ,
come to my house, sa[viours],

[to my house I invite] you,
I sum[mon you into the midst of my palace'.]

1.22 ii 5 To his sanctuary, sa[viours, hurry indeed],
[to his sanctuary] hurry indeed, di[vinities].

[ ] the warrior[28] of Baal,
[the warrior of] Anat.

'Come to [my] hou[se, saviours,]

[to my house] I invite you,
1.22 ii 10 I [summon you into the midst of] my palace.'

To [his] sanctuary, [saviours, hurry indeed],
to his sanctuary hur[ry] indeed, [divinities].

Yahipan[29]...
[ ]

'Listen, you, [saviours],
[divini]ties!'

...[ ]
1.22 ii 15 oil...[ ]
[ ] made a vow:

'If...[ ]
...[30]

(If) he[31] ta[kes possession of the throne of his kingship,]

28. Text *mhr*. The term may be cs. pl. I have taken it as cs. sg. here and in following colon on basis of the context in KTU 1.22 i 8-9 below.

29. Ug. *yḥpn*: taken as a PN here and at KTU 1.22 i 9 by del Olmo (1981a: 421).

30. Text *'ṣ .amr. 'ṣ* ('tree', 'wood'?) left untranslated. 'Lambs' (sc. *amr* = *imr* at KTU 1.20 i 10), del Olmo (1981a: 421). Read *'l amr*: 'on the command': Caquot and Sznycer (1974: 472); 'over Amurru': de Moor (1987: 270: Aqhat's kingdom).

31. For de Moor (1987: 271) it is Danel making the vow on behalf of Aqhat.

the back-rest[32], the siege of [his] do[minion][33],

[to my house] I shall invite the saviours,

1.22 ii 20 [I shall summon the divinities] into the midst of [my] pa[lace].'

[To his sanctuary the saviours] hurried indeed,
to his sanctuary [hurried indeed the divinities].

They harnessed [the] cha[riots];
the horses they hitched.

They mounted [their] cha[riots],
[they came] on their mounts.

[They journeyed a day
and a second.]

1.22 ii 25 [After sunrise] on the third
[the saviours] arrived at [the threshing-floors,]
the di[vi]nitie[s at the plantations.]
...

(rest of column missing)

1.22 i (indeterminate number of lines missing)

1.22 i 1 ...
'Behold your son,
behold [ ]
[ ]
[behold] your grandson (at) your sanctuary.
Behold [ ] your hand.

The little one your lips will kiss[34].'

1.22 i 5 There, shoulder to shoulder,
(are) the brothers who attend[35] El with alacrity[36].

32. Text *nzt*. Correct to *nḫt*. On the translation see KTU 1.1 iv 24 n. 56.

33. According to L'Heureux (1979: 145) it is 'by my royal throne...' that the speaker swears.

34. Thus Caquot and Sznycer (1974: 474) and de Moor (1987: 271). Or the reverse: 'the small one will kiss your lips': Lewis (1996a: 130). The former is more likely, as it seems to be a quasi-ritual procedure, part of the blessing of subsequent generations.

35. Ug. *qym*. Thus del Olmo (1981a: 422, 617: qattal of √*qwm* or √*qwh*) and

There mortals...[37] the name of El,
heroes... the blessing of the name of El.

There (was) Thamaq[38] the saviour of Baal,
the warrior of Baal
and the warrior of Anat.

1.22 i 10 There was Yahipan the valorous[39],
the prince of eternal kingship[40].

Just as Anat hurries to the chase,
(and) sets the birds of heaven wheeling in flight,

(so) he slaughtered oxen and sheep,
he felled bulls
and the fattest of rams,
year-old calves,
skipping lambs,
kids[41].

Lewis (1996a: 130). 'Made stand up': de Moor (1987: 271).

36. Ug. *blsmt*. √*lsm*, 'run' (Akk. *lasāmu*): Caquot and Sznycer (1974: 474 n. r) and del Olmo (1981a: 573). Virolleaud (1941a: 19) toys with the idea that *blsmt* = 'balsam' (cf. Ar. *balsamat*, 'embalming').

37. Text apparently *ữtbš* in l. 6, and *y'bš* in l. 7. Del Olmo considers the second a possible error for the first (1981: 597; cf. *UT*, 453 §19.1808); Pitard corrects first to *y'bš* (1992: 56, 57 [detailed argument] and 64 fig. 27). √*ữtbš*: 'celebrate' (Ar. *šabaṯa* with metath.); √*'bš*: 'frown' (Ar. *'abasa*). No meanings offered in *WUS*, *UT* or *DLU* (no entry). Virolleaud (1941a: 19) cites Akk. *šabāšu*, 'turn aside, be angry' and Ar. *'abasa* respectively. De Moor (1987: 272): 'the name of Ilu gave substance to the dead | the blessing of the name of Ilu gave substance to the heroes'.

38. See Aistleitner (1964: 85) and Caquot and Sznycer (1974: 475 n. u) who note that there is a PN *ữmq*, found in KTU 4.93 iv 3 as *bn ữmq*, which may indicate that the *ữmq* element is the DN Shimegi, so that here it is hypocoristic: Watson has suggested to me orally that it is this DN occurring here: cf. also *ữrmg* at KTU 1.4 viii 3. However, Shimegi appears to have been transcribed as *ữmg* in the PN *ữmgn* and perhaps as Syll. ŠI-*ma-ka-ya* (= *šmgy*): Pardee (1989–90: 422, 429). Del Olmo takes it as a PN (1981a: 423). This lends support to the similar explanation of *yḥpn* at KTU 1.22 ii 12 and at i 9 below. Dijkstra (1988: 47) reads 'Yahupan, the Hayilite' at i 9.

39. Ug. *ữm.yḥpn.ḫyly*. Spronk (1986: 171) followed by de Moor (1987: 272): 'there rustled the host of the filth, the highness, the king, the unrelated (Spronk, de Moor: usurper)'. Cf. n. 16 to KTU 1.161.7.

40. Ug. *ẓbl.mlk.'llmy*. Cf. Lewis (1996a: 130, 139; 1989: 18): 'the eternal royal princes'. I take the line to refer only to Yahipan.

1.22 i 15 Like silver to vagabonds[42] were the olives,
(like) gold to vagabonds were the dates[43].
...[44] a table (set) with fruit of the vine[45],
with fruit of the vine of royal quality[46].
Lo,
throughout that day[47] he poured wine of Thamak[48],
the foaming wine[49] of rulers[50],

41. This formula betrays the style of Ilimilku. Cf. KTU 1.1 iv 30-32, 1.4 vi 40-43 and Lloyd (1990). Note how here the formula constitutes the climax to a Homeric simile. The subject is the host (El? the king? Danel?) rather than either of the *rpum* just mentioned.

42. Ug. *'brm*. 'Onlookers': Aistleitner (1964: 86; *WUS*, 226 §1991); 'invitees': del Olmo (1981a: 423), *DLU* (p. 71); 'travel(l)ers': L'Heureux (1979: 153) and Lewis (1996a: 131); 'those who came over' (sc. the dead): Spronk (1986: 275) and de Moor (1987: 272). I have linked the term to Heb. *'ibrî*, Akk. *Ḫabiru*, Eg. *'apiru*, heterogeneous groups who appear as mercenaries, raiders, herdsmen. The point of the simile is irresistibility. The other suggested translations make weak comparisons.

43. Ug. *kš*. 'Dates', del Olmo (1981a: 569, citing Ar. *kuššu*, *kasīs*). 'Cassia petals', Aistleitner (1964: 86, *WUS*, 157-58, 226 §§1392, 1991: cf. Ar. *kissatu*, Akk. *kašû*). 'Gourds', de Moor (1987: 272: Ug. *kṯ*; 1973: 95 n. 3). 'Rest', L'Heureux (1979: 153, 157, citing Akk. *kâšu*, Syr. *kāš*).

44. Ug. *dpr*. Meaning unknown. 'Smell': L'Heureux (1979: 153, 157) and del Olmo (1981a: 423, 538) taking up Virolleaud's suggestion (1941a: 25: Ar. *dfr*, *dfr*), but the term means 'stink' rather than 'perfume': Caquot and Sznycer (1974: 475 n. e) and Lewis (1996a: 139-40)! 'Hall', de Moor (1987: 272).

45. Ug. *q'l*. If wine (and especially new wine) is to be drunk, it can scarcely be 'flowers of the vine' (thus del Olmo 1981a: 619).

46. Ug. *mlkm*. Lewis (1996a: 131): 'fit for kings'. The term may have a technical rather than merely aesthetic sense. Cf. *bnš mlk*, 'royal personnel' (Heltzer 1982: 3-15).

47. Or 'all that day'? Cf. L'Heureux (1979: 153, 157): 'all day'; Lewis (1996a: 131): 'daylong'.

48. Following Aistleitner's suggestion (*WUS*, 337 §2884), followed by Caquot and Sznycer (1974: 476 n. g); cf. del Olmo (1981a: 424, 642) and de Moor (1987: 272) for the view that this is a toponym, a place renowned for its wine, though hardly Lake Hule. Cf. Aartun (1985: 42 §125). Was it a place in the Lebanon? Cf. l. 20 below. L'Heureux (1979: 153) divides: *ṯm*, 'there' and *k*, 'like'.

49. Ug. *mrṯ.yn*: lit. 'must of wine'. Cf. Aartun (1984: 35, 50: §§45, 64).

50. Ug. *srnm*. Cf. Heb. *seren* (Gk. *turannos*), used of the Philistine rulers. Or is this too a Lebanese toponym?

wine to delight the thirsty[51],
the wine of ecstasy[52],

1.22 i 20 (from) high up[53] in the Lebanon,
dew! transformed into foaming wine by El.

Lo,
a day and a second,
the saviours ate and drank,

a third, a fourth day,
a fifth, a sixth day,
the saviours ate and drank,

in the lofty banqueting-house,
1.22 i 25 on the peak[54], in the heart of the Lebanon.

See,
on the seventh [ ]
[ ] Valiant Baal,
...

1.22 i (indeterminate number of lines missing)

(if verso, as assumed above, no
following columns on this tablet)

51. Ug. *bld ǵll*. Thus Caquot (1974: 476 nn. j and k) and L'Heureux (1979: 153, 157-58). Cf. de Moor (1987: 272): 'wine with no after-thirst'. Based on Ar. *laḏ ḏa*, 'be sweet', and Ar. *ǵalîl*, 'thirsty'. Cf. Lewis (1992: 131, 140): 'wine, sweet and abundant'; he candidly admits of this and the following colon that 'everyone admits to guessing here'! But note Renfroe's strictures (1992: 107, 125). Aistleitner (*WUS*, 49 §519), Gibson (1978: 143) and del Olmo (1981a: 424, 527): 'land' (Ar. *baladu*). On this see Renfroe (1992: 90). *DLU* (p. 156), 'mythical region of wine-production'. There is no reason why this should not be a *real* region.

52. Ug. *išryt*. Cf. Heb. *'ešer*. Thus del Olmo (1981a: 424, 523): 'felicity' and de Moor (1987: 272): 'happiness'. Caquot (1974: 476 n. l): 'the first pressing': *šry*, 'begin'. Aartun (1985: 35-36 §115): 'first quality'. Cf. *DLU*. Virolleaud (1934c: 150: '[wine of] the Assyrian women') and Aistleitner (1964: 86; *WUS*, 39 §447) take it as a toponym (cf. *šryn*?).

53. Ug. *'nq.smd*. Cf. Aartun (1985: 5, 11-12 §§74, 80). Aistleitner (1964: 86; *WUS*, 220, 237 §§1922, 2062): 'highest pride'. Caquot (1974: 476 and nn. m and n): 'the choicest product of the plants' (metaphorical use of *'nq*, cf. Heb. *'ᵃnāq*, 'neck', and Akk. *asmidu*, plant-name). 'Necklace of the blooming vines': del Olmo (1981a: 424). 'Purple necklace': de Moor (1987: 272).

54. Lit. 'narrow place, strait'. (√*ṣwq*, Heb. *ṣwq*, Ar. *ḍāqa*). 'Poured' (√*yṣq*): del Olmo (1981a: 424). 'Crest': de Moor (1987: 273).

KTU 1.23: The Gracious Gods: A Sacred Marriage Liturgy

(KTU 1.23 = CTA 23 = UT 52 = SS = RS 2.002)

Select Bibliography

Virolleaud 1933; Ginsberg 1935; Gaster 1946, 1950: 225-56, 1961: 418-35; Largement 1949; Jirku 1962: 80-84; Aistleitner 1964: 58-62; de Moor 1972: II, 17-24, 1987: 117-28; Trujillo 1973; Tsumura 1973, 1978; Xella 1973; Caquot and Sznycer 1974: 353-79; Tsevat 1974a; Gordon 1977: 59-64; Wyatt 1977a, 1987a, 1992b, 1996b: 224-29; Pope 1979; del Olmo 1981a: 440-48; Cutler and Macdonald 1982; Lipiński 1986; Segert 1986; Foley 1987; Hettema 1989–90; Schloen 1993; Aboud 1994: 189-92; Watson 1994b; Pardee 1997c: 274-83; T.J. Lewis in Parker 1997: 205-14; Dijkstra 1998; Gulde 1998.

Characterized by some as a 'fertility cult' myth, by Cutler and Macdonald (1982) as a famine-relief liturgy, by Pardee (1997c) as a possible analogue or component of an autumnal vintage and new year festival (cf. KTU 1.41), and possibly (Wyatt 1996b) even having a connection with a royal marriage, this text narrates a 'sacred marriage' between El and his two wives (see further below), Athirat and Rahmay, who appear to be hypostases of Shapsh the sun-goddess. While falling broadly speaking into the category of 'narrative poetry' (Hettema 1989–90), the text is unusual in Ugarit in combining myth with ritual instructions and liturgical elements, which are interleaved with the introduction to the main narrative in ll. 1-29 (the whole of the recto), horizontal lines separating the different sub-sections. The myth itself (ll. 30-76) underlies the tradition behind a number of biblical texts (Porter 1978; Wyatt 1996b, 219-68), and Pardee's (1997c: 274) assessment that it deals with 'a pair of relatively minor deities' is probably a fair reflection of current opinion on the text, but in my view underestimates their considerable ideological importance as 'royal gods',[1] who reflect in their mythology certain important constants. This

1. Pardee's further note on the status of the female characters in the text as 'two women' (*aṯt*, alt. 'two wives') threatens to prejudge the matter of the significance of the twin gods born of the marriage, though he concedes their divine status. If the more neutral translation 'wives' is adopted, the similar status of the wives as goddesses, which I believe to be the case, at least remains an open question. The position of Shalem as the last god mentioned in the pantheon lists (KTU 1.47.34 = KTU 1.118.33 = RS 20.24.33) and sacrificial lists such as KTU 1.39.8 and 1.41.17

divergence of views is inevitable of course given the overall paucity of the evidence, but it is perhaps as well to reserve judgment on comprehensive assessments. There is a clear disparity between the relative importance of a mere handful of deities in the (so far recovered) mythology of Ugarit and that of a large number of others appearing, frequently with a surprising prominence, in the ritual texts. Each genre gives only a partial oversight of the reality, while the Akk. evidence further complicates matters. The text is defined by de Moor (1987: 117) as a sacred marriage text. This is reasonable in so far as it actually deals with a marriage, but we need to be clear what 'sacred marriage' (*hieros gamos*) means, and the use of the term sometimes implies that the same kind of significance is to be applied in all cases, as though it is just a tantric use of sex in the cult. It is here that I think the *royal* dimension is important. A mythic paradigm is established here which is used to convey basic notions about the concern of the chief deity for the created order, and the implicit identification of his offspring with kings becomes the means whereby royal duties are represented as actualizing the theological programme. This is parallel to many features of the historical cult in Judah (though the biblical texts muddy the waters, of course, by their removal from the original historical context and their persistent critique of tradition).

1.23 R 1 Let me invoke the gra[cious] gods,
[ ] and beautiful,
sons of Shap[sh?[2]]
Let them give a feast [to those] of high rank[3],

(= 1.87.18) need not simply be a reflection of rank, for he is a god who as the evening star, or dusk (opinion varies on this matter) would logically or symbolically conclude such lists: the last in line is not always the lowest in rank. At Edinburgh the Principal walks last in the graduation processions! Pardee concedes this point.

2. Text *bn.šp*[ ]: *bn.šp*[*š*] following ll. 25, 54. Caquot and Sznycer (1974: 369) and del Olmo (1981a: 440): 'dunes' (cf. *špm*, l. 4) (sc. the 'bare hills' of de Moor 1987: 118). Virolleaud (1933: 129, 132) reads *bn.š* [*rm*(?)], 'sons of a prince(?)'. For my interpretation cf. translation at l. 54.

3. Ug. *ytnm.qrt.l'ly*[ ]. The colon is open to reading in three senses: either as here, or 'who establish a city on high': thus Caquot and Sznycer (1974: 369), Gibson (1978: 123), de Moor (1987:118) and Pardee (1997c: 276); or 'may glory be given to the exalted ones': thus Xella (1973: 41-42), del Olmo (1981a: 440) and Hettema (1989–90: 82). √*qrt*: 'feast, banquet' (Akk. *qarītu*, *qirītu*): Trujillo (1973),

in the wilderness of the end[4] (of the world).

1.23 R 5 [ ] on their heads,
[ ]

Eat from any[5] of the food,
and drink from the vat[6] any wine!

Greetings, king, greetings, queen, priests[7] and temple-victuallers[8]![9]

The lord and master[10] sat enthroned,
in his hand the staff[11] of sterility,

cit. del Olmo (1981a: 440, 658); 'city', cf. Heb. *qiryat*: *WUS*, 283 §2462, *UT*, §481 19.2284 etc.; 'glory, honour', [*qrt* < *yqr*]: Ginsberg (1935: 47). The sequel (bicolon in l. 6) makes Trujillo's proposal the best. Are 'those of high rank' ('*ly*[*nm*]: restoration proposed by Gaster 1946: 51) men or gods, or both? (Cf. Heb. *'elyôn*, used of the king in Ps. 89.28.)

4. Ug. *špm*. I explain as cognate with Heb. *sôp*, 'end'. Cf. KTU 1.1 ii 11. The desert is at the edge of the world. Or 'dunes' (cf. n. 2). 'Barren hill-tops': Pardee (1997c: 276 and n. 8). De Moor (1987: 118) restores [*tdm*]*r* in l. 4, and locates the events at Tadmor-Palmyra.

5. Ug. *ay*: 'any' (Ar. *ayyu*): *UT*, 355 §19.142, Xella (1973: 45-46) and del Olmo (1981a: 512). Cf. Pardee (1997c: 276): 'Eat the food, yes do'.

6. Ug. *ḫmr*: 'vat' rather than 'new wine'. Cf. KTU 1.3 i 16 and n. 9.

7. Ug. *'rbm*. Cf. Akk. *erêb bîti*, a class of priest.

8. Ug. *ṯnnm*. For Cutler and Macdonald (1982: 39), these people supplied the meat for the temple (Akk. *šanannu*: cf. *CAD*, XVII [Š/2], 366 'archer[?]'). Others see them as military personnel ('temple guards': cf. Xella 1973: 151-56; cf. Eg. *snn* and KTU 1.14 ii 38 etc.: *ṯnn dbl ḥg*: 'archers beyond reckoning'). But a military sense is not entirely convincing here (unless they form a praetorian guard?), and I suspect two lexemes.

9. The lines drawn across the tablet at intervals appear to mark out separate stages in the ritual and distinct rubrics.

10. Ug. *mt wšr*: most take this to be Mot (e.g. Tsumura 1973). I take it to be El: see Wyatt (1977a, 1992b). Cf. *mt* below, ll. 40, 46, 'husband' (lit. 'man'). Cf. Pardee (1997c: 276-77 n. 13): he explains the name as 'warrior prince', seeing the staff as a weapon 'because warriors slay sons and husbands in battle'.

11. This staff (presumably the same one in both cola) will later (l. 37) function as El's penis. It is the 'staff' (phytological metaphor) which is about to be attended to in the following ritual action, which will transform it into a productive organ. See also nn. 36-38 below, and the use of the staff in KTU 1.169. See discussion by Pardee (1997c: 276-77 n. 13). This raises two problems. First the appropriateness of the themes of sterility and widowhood to the present interpretation, and secondly my identification of *mt wšr* with El himself (n. 10). In the first case the point is that

in his hand the staff of widowhood.

Those who prune the vine pruned him,
those who bind the vine bound him;
1.23 R 10 they let his tendril[12] fall like a vine.

Seven times shall it be recited on the throne-dais[13],
and the priests are to respond.

Now the steppe[14], the vast[15] steppe
is the steppe of Athirat and Rahma<y>[16].

Over a fire seven times the choristers of fine voice
(seethe) coriander[17] in milk,

until the marriage is consummated according to the proper ritual programme (starting with premarital circumcision, n. 12) it cannot be productive; the seated figure (the bridegroom) holds emblems which have a *double-entendre*: at present they represent his single state, which for purposes of fecundity is sterile. A husband who cannot service his wife effectively makes her a widow. After the due rites, the staff (which represents his penis) will become fertile and productive. Moreover, since the twin gods Shahar and Shalem, whom I identify with the gracious gods, are not born, indeed not even conceived yet (because the fecundating rite which will make this possible is only now being performed) they cannot be identified with *mt wšr*. It is their father who is so represented. Note the discussion on rhabdomancy in Moore 1990: 71-78.

12. On the meaning of *šdmt* see Wyatt (1992c) and Pardee (1997c: 277-78 n. 17). The ritual performed is one of pre-marital circumcision (Wyatt 1992b). Thus the 'tendril' is a metaphor for the foreskin. Cf. Wyatt (1990a), where I discuss the story of Shechem's circumcision and ritual killing, which belong to the same symbolic context as the present narrative. Cf. Allan 1999.

13. Ug. *'d*: || *ksi* in KTU 1. 16 vi 22. See also KTU 1.119.9. See Largement (1949: 55) and del Olmo (1981a: 598). Rather than 'lute' (Ar. *'ûdu*: Driver 1956: 121, Caquot 1974: 370).

14. Ug. *šd* (Akk. *šadu*, Heb. *śādê*, 'steppe'). Thus, e.g., Gaster (1946: 52), Gibson (1978: 123) and del Olmo (1981a: 447): 'field(s)'. Rather than 'breast' (Ug. *ṯd*, *zd* [l. 24], *ḏd* [ll. 59, 61], Heb. *šad*, *šōd*): thus for the third instance Ginsberg (1935: 65) and Driver (1956: 121): 'effluence' (sc. milk [from the breast]), and see Tsevat (1953: 62) (cit. '*śd*').

15. Ug. *ilm*: superlative sense.

16. Restored on basis of ll. 16 and 28 (the same formula). Ug. *rḥmy*, 'uterine', 'wombly', divine epithet. It does *not* refer to Anat, but to a companion of Athirat. The two are hypostases of Shapsh. See further Pardee (1997c: 278 n. 22).

17. Ug. *gd*. If correct reading, 'coriander' (cf. Heb. *gad*). Virolleaud (1933: 140), reads as equivalent of *gdy* (Heb. *gᵉdî*), 'kid'. So also Ginsberg (1935: 65, with reference to Exod. 23.19 and parallels). Cf. Loewenstamm (1975b: 106) on the

mint in butter,

1.23 R 15 and over the cauldron seven times
let incense be burned.

Rahmay went forth,
[and Athirat] set out[18].

[ ] they girded themselves.

May the gracious[19] chorister [ ]
and their name let the priest e[xalt.]

The dwellings[20] of the gods eight [ ]
1.23 R 20 seven times [ ][21]

Lapis lazuli, carnelian[22]
scarlet the singers[23]...[24]

interpretation of this passage. See also Ratner and Zuckerman (1986) for recent assessment of the reading and now Pardee (1997c: 278-79 n. 26).

18. Ug. *tṣd*. Perhaps 'set out to hunt'. Cf. KTU 1.92.2 (with Athtart) and 1.114.23 (with Anat and Athtart) as subjects.

19. Ug. *n'm*. The Heb. term *nā'îm* appears to mean 'minstrel' in 2 Sam. 23.1. Perhaps a similar nuance is to be detected here.

20. Ug. *mṯbt*. Pardee (1997c: 279 and n. 32) draws attention to cut-branch structures used in the cult in KTU 1.41.50-51, also called *mṯbt*. It may be the same structures again which are called *bt* ('hous[es]') in KTU 1.104.21, where as here they are said to be eight in number. He compares the Heb. *sukkôt*. The idea of shrines to the gods drawn up in rows also suggests a possible analogue of the Eg. Sed rites, which involved parallel ranks of the shrines of the deities of Upper and Lower Egypt, as in the mock-up in the enclosure of Djoser's step-pyramid at Saqqara.

21. A ritual involving the divine images. Are the 'dwellings' (*mṯbt*) the images? Hettema (1989–90: 83): 'stands'.

22. Ug. *iqnu.šmt*: Akk. *aqnu*, *uqnu*, and Akk. *šimtu*. Thus Caquot and Sznycer (1974: 372), Gibson (1978: 124) and de Moor (1987: 122). Cf. del Olmo (1981a: 442): 'Of blue and scarlet (wool) [ ]'; Hettema (1989–90: 83): 'blue and gold-coloured [ ]'. Preferable to alternative: 'I am jealous for the names [ ]' (√*qn'*): thus Virolleaud (1933: 133), Ginsberg (1935: 65), Gaster (1946: 52; 1961: 426), Driver (1956: 121) and Xella (1973: 36, 58). *iqnu* corrected to *iqra* by Aistleitner (1964: 59).

23. Ug. *ṯn.šrm*. [ ]. To *ṯn* cf. Heb. *šānî* (*UT*, 503 §19.2702); or 'the two'. *šrm*: 'singers' (√*šyr*) or 'princes' (cf. Akk. *šarru*). Virolleaud (1933: 130), reads [*b*]*n šrm*: 'sons of a prince' (cf. at l. 2 above).

Let me invoke the gracious gods,
[both gluttonous[25] from] birth[26],
who suck at the nipples of Athirat's breasts,
[from the paps of Rahmay,]

1.23 R 25 Shapsh counts[27] their tendrils,
[ ] and grapes.

Peace to you, priests and temple-victuallers,
as you proceed to the sacrifice of propitiation.

The vast steppe
is the steppe of Athirat and Rahmay,
[ ]...[28]

24. Though both cola are conventionally shown as having a following lacuna, there is probably no text missing.

25. Ug. *agzrym*: 'voracious, gluttonous', Xella (1973: 58-59), del Olmo (1981a: 510) and de Moor (1987: 122), construed as du. All cite √*gzr* in Isa. 9.19 (parallel *'kl*, with sense of devouring, though √*gzr* means 'cut, divide'). Virolleaud (1933: 142), reads as 'cleave the sea', citing Ps. 136.13 (√*gzr*, Heb. *gāzar*, as cited). Cf. *agzrt* at KTU 1.13 ii 29-30. Pardee (1997c: 279 and n. 35), taking up Gray's (1965: 98) suggestion, plausibly translates as 'who delimit the day'.

26. Line restored from ll. 58-59. Ug. [*bn*] *ym*: 'from birth', lit. 'sons of a day'. This expression may alternatively mean 'sons of (the same) day', thus alluding to their twinship.

27. Text uncertain. See Herdner (1963: I, 99 n. 4), Xella (1973: 60) and del Olmo (1981a: 442). Del Olmo translates 'Šapšu who takes care of their weakness', taken up by Hettema (1989–90: 83) and Pardee (1997c: 279 and n. 37). I read provisionally *msprt* (√*spr*). Otherwise *mṣprt*: *KTU*[2]: 'Shapsh cuts...': Watson (1994b: 4 n. 13, Akk. *ṣepēru*); 'Shapsh who nurses...': Hettema (1989–90: 83), √*ṣpr, Ar. *ḍāfara*); or *myprt* ('Shapsh makes fruitful...'): Ginsberg (1935: 66) and Gaster (1946: 52, 57; 1961: 426), √*ypr*: *UT*, 413 §19.1136, cf. Ar., Eth., ESA *wfr*, Heb. *pārâ*. Cf. Virolleaud (1933: 130), and translation (p. 133)! However translated, the text probably narrates some action by the goddess which is represented dramatically in the cultic performance. The 'tendrils' approach is circumstantially supported by the parallel 'grapes'. Is this an allusion to genitalia? Is Shapsh perhaps checking that they are male children?

28. Text *yṯb*. Being contextless, it is untranslatable. Hettema's suggestion, 'That it be repeated' (1989–90: 83), is attractive as an introduction to the ensuing narrative.

lower edge 30 [El went out] to the shore[29] of the sea,
and stepped out to the shore of the abyss[30].

El [set] the two inflamed ones[31],
the two inflamed ones on top of the cauldron[32].

Lo, one was lowered,
lo, the other was raised.

Lo, one cried: 'Father! father!'
and lo, the other cried: 'Mother! mother![33]

Let El's penis grow as long as the sea,
yea, El's penis as the ocean[34]!'

1.23 V 35 El's penis grew as long as the sea,
yea, El's penis as the ocean.

El took the two inflamed ones,

the two inflamed ones from on top of the cauldron;

29. For *gp ym* read rather *ḫ'p ym*. Cf. Whitaker (1972: 278). Cf. KTU 1.3 ii 7.

30. The use of *thm* locates the mythical events: this is the end of the world. Cf. Hettema (1989–90: 86).

31. Ug. *mšt'ltm*: (Št [= Hithp.] √*'ly*, cf. Heb. *'ālâ* Hiph., 'rouse') du. pt. Cf. Tropper (1990: 77-78): 'who offer themselves for sex'. 'Two coals': Ginsberg (1935: 66); 'two handfuls': Gaster (1946: 53) and Driver (1956: 123); 'two women bringing up (water)': Caquot (1974: 373); 'two women who moved up and down' (Št freq.): Gibson (1978: 125); 'two consecrated ones(?)': del Olmo (1981a: 443); 'scales': de Moor (1972: II, 20); 'girl-acrobats': de Moor (1987: 123); 'two female sacrificers': Hettema (1989–90: 83); cf. Pardee (1997c: 280 and n. 44). These cultic nuances are a plausible alternative to the line taken here. Untranslated: Virolleaud and Xella.

32. Pursuing his cultic interpretation (as in the previous colon), Pardee (1997c: 280) translates: '(two females) presenting (him with) an offering from the jar'. While this is attractive, the basis for it, that the sexual nuances detected by Tropper are not yet present, is belied by the fact that *double entendres*, if not overtly erotic language, begin immediately.

33. Like other primaeval gods, El is androgynous: he marries his own daughter(s). Cf. Jerusalem and Wisdom as daughters of Yahweh. Discussion in Wyatt (1996b: 255 n. 81, 265-68). Pardee (1997c: 280 n. 47) remains dubious that this is an address to El.

34. Ug. *mdb*. For my translation (rather than 'flood') cf. de Moor (1969a: 181) and KTU 1.101.2. The simile of a penis 'as *long* as the sea/ocean' reads oddly in English, but if it is remembered that the cosmic sea is serpentine by nature, the force is immediately apparent. Cf. Neiman's (1977) etymology of Gk. Ὠκεανος from √*gḥn*, 'a serpent's belly'. Cf. Gihon in Gen. 2.13 and Wyatt (1996b: 96-99).

he took them and se[t] them in his house.

El lowered[35] the staff[36] in his right hand,
El the rod[37] in his hand[38].

He raised it and threw it skyward[39],
casting a bird down from the sky.

He plucked it and set it on the coals.

El enticed the two wives;
lo, the two wives cried out:

1.23 V 40 'O husband, husband! Lowered is your staff,
drooping the rod in your hand![40]'

Lo, the bird grew hot[41] by the fire;
it was roasted on the coals.

The two wives are the wives of El,
the wives of El, and forever.[42]

And lo, the two wives cried out:

'O father, father! Lowered is your staff,
drooping the rod in your hand!'

Lo, the bird grew hot by the fire;
1.23 V 45 and was roasted on the coals.

35. Ug. *nḥt*. Thus e.g. del Olmo (1981a: 444). Pardee (1997c: 280) 'grasps'.

36. Ug. *ḫṭ*: this is the staff El held in ll. 8-9: now it is a symbol of, in effect transformed into, his penis. Cf. n. 11 and l. 40. 'When El had aimed his staff': Hettema (1989–90: 83).

37. The same staff. The term *mṭ* (Heb. *maṭṭê*) serves in both arboreal and social contexts. Note that *mṭ ydh* corresponds to *mṭ ydk* in ll. 40, 44 and 47.

38. The left hand (as distinct from the right). But *yd* also means 'penis', so a deliberate wordplay is no doubt intended. See also at ll. 37 (*-h*), 44, 47. (The left hand being the toilet hand, delicacy is preserved.) It is difficult to know whether to translate 'the rod *in* your (his) hand' or 'the rod *of* your (his) penis'. I have been guided by the colon of l. 37 (*ymn* parallel *yd*).

39. A play on associated ideas. The staff is now an arrow, now a penis. The bird (to be killed and roasted) will symbolise the passion of El's wives. See discussion in Pardee (1997c: 280-81 n. 51).

40. Ug. *mṭ ydk*, and at ll. 44, 47. Either 'the rod (in) your hand', or 'the rod of your penis'. See n. 38. No doubt the *double-entendre* is intended.

41. Cf. n. 39. As de Moor notes (e.g. 1987: 124), ornithological language is often used for women (especially in sexual contexts).

42. As the bird cooks, the marriage 'cooks', i.e., is consummated.

The two daughters are the daughters of El,
the daughters of El, and forever.[43]

And lo, the two wives cried out:
'O husband, husband! Lowered is your staff,
drooping the rod in your hand!'

Lo, the bird grew hot by the fire,
and was roasted on the coals.

The two wives are the wive[s of El],
the wives of El, and forever.

He stooped: their lips he kissed.

1.23 V 50 O, how sweet were their lips,
as sweet as pomegranate[s];

from kissing came conception,
from embracing, impregnation.[44]

<He sat and counted
five (months) for growth,
ten for the full completion.>[45]

<Both of them> crouched[46]
and gave birth to Shahar and Shalem[47].

Word was brought to El:

'The two wives of El have given birth!'

'What have they borne?'
'Shahar and Shalem have been born'.

43. Pardee (1997c: 281) interprets this as a set of conditions, in which the women become wives or daughters. But they are already both.

44. The delicacy of the imagery is surprising. Cf. the description from Deir el Bahri of the divine conception of Hatshepsut (pure Barbara Cartland!): Breasted (1906 [1988 reprint]: II, 80 §196).

45. Watson (1994b: 7), following Tsumura (1978: 388), proposes adding the tricolon from ll. 56-57 here, arguing it to be an unintentional omission. See further below. Ll. 49-52 and 55-58 contain identical wording except for the tricolon.

46. The vb *tqt*[*nṣn*] is du. In ll. 57-58 the expression is *klat tqtnṣn*, 'both of them crouched': is the *klat* to be restored here? I have done so on prosodic grounds: *klat tqtnṣn* || *wtldn* is a bicolon, the *klat* doing double duty.

47. Hypostases of Venus (Athtar), respectively the morning and evening stars.

'Raise up an offering[48] to Shapsh, the Great Lady[49],
and to the stars[50] who have been begotten[51]'.

1.23 V 55 He stooped; their lips he kissed.
Lo, their lips were swee[t],
[sweet as pomegranates].

From kissing came conception,
from embracing, impregnation.

He sat and counted
five (months) for growth,
ten for the full completion[52].

Both of them crouched
and gave birth.

48. Sc. a ritual of purification and thanksgiving following childbirth.

49. Ug. *rbt* (Akk. *rabitu*), the equivalent of Heb. *gᵉbîrâ*. Otherwise used only of Athirat, who here, with Rahmay, appears to be a hypostasis of Shapsh. The Akk. term *rabitu* is used of the queen mother of Amurru (RS 16.270.5 etc.). 'A large city': de Moor (1972: II, 22); 'great works': de Moor (1987: 126).

50. On *kbkbm* as a designation for gods, cf. KTU 1.10 i 4, where it appears, apparently, in parallel with *bn il*. See also Bordreuil (1995: 2) and Caquot (1995: 5). Perhaps the epithet of Pughat, *yd't hlk kbkbm*, appearing in KTU 1.19 ii 2-3 etc. (see n. 209 *ad loc.*), is as much a theological as an astronomical term.

51. Ug. *kbkbm.kn*[*m*]. On √*kn* (Heb. *kwn*) 'to beget' see Wyatt (1996b: 227 n. 29, 242; Ps. 8.4b, || *ma'asê 'uṣbᵉ'ōtêkā*, also with a sexual nuance). 'Fixed stars': Gibson (1978: 126), del Olmo (1981a: 445) and Hettema (1989–90: 84). If Shahar and Shalem are the deities of the planet Venus, they are scarcely 'fixed' stars. Other fixed stars (even as deities) do not seem germane to the present context. 'A stable one (sc. city)': de Moor (1972: II, 22). 'Lasting works for the stars': de Moor (1987: 126).

52. Following the interpretation of Tsumura (1978) (text: *yṯbn.yspr.lḥmš.lṣb* [*i.l'*]*šr.pḫr.klat*), Hettema (1989–90: 85) and Watson (1994b: 8). The period of pregnancy is described (ten lunar months). Cf. KTU 1.17 ii 43-44. These lines have conventionally been read quite differently, e.g. del Olmo (1981a: 446) (text: *yṯbn.yspr.lḥmš.lṣ*lmm[.]w*yšr.pḫr.klat*, as *KTU*^{2}) as

> This is to be recited five times to the sound of cymbals,
> and the assembly shall sing.

The verbs *yṯbn* and *yspr* are m. sg. (as Tsumura, referring to the father) or 3rd. f. du. (referring to the mothers), but not impersonal (as Hettema). Cf. Virolleaud (1933: xix): *yṯbn. yspr.lḥmš.lṣb*(?)[ ]*šr.pḫr.klat*; Xella (1973: 35): *yṯb*[*n*]. *yspr.lḥmš.lṣ*[----------]*šr.pḫr.klat*; *KTU*^{2}: *yṯb*n. *yspr.lḥmš.l*ṣmm[.]w *yšr.pḫr klat*.

They bore the gracious gods[53],
both gluttonous from birth,
sucking at the nipples (of the Lady's) breasts.

Word was brought to El:

1.23 V 60 'The two wives of El have given birth!'
'What have they borne?'

'The two gracious gods!
both gluttonous from birth,
sucking at the nipples of the Lady's breasts.

A lip to the underworld,
a lip to the heavens[54],

and there entered into their mouths
the birds of the air
and the fish from the sea.

And wandering abroad, piece by piece
they put (things) from both their right
and from their left into their mouths,
and were not satisfied.'

'O wives whom I have married,
1.23 V 65 O sons whom I have begotten,

raise up a dais in the midst of the holy desert[55]:
there you will make your dwelling[56] among the stones

53. The 'gracious gods' are Shahar and Shalem.

54. Cf. the description of Mot in KTU 1.5 ii 2-3. Their voracious appetites, described in the following lines, are to be compared both to Mot's and to those of the Devourers in KTU 1.12.

55. De Moor (1987: 127): 'Arise! Establish a sanctuary in the desert'. Wilfred Watson suggests (private communication) shifting the word-divider after *'db* to read thus: *šu.'d<.>btk.mdbr.qdš*: 'raise up a dais (or: throne) in the midst of the desert'. This makes better sense of the line, and fits in well with the following colon. Note the paradox of a sanctuary at the limen (cf. the burning bush motif in Exod. 3).

56. Ug. *tgrgr*. Redupl. (D? cf. Heb. pilpel) form of √*gwr*, 'dwell': Caquot and Sznycer (1974: 378), *UT*, 381 §19.618, *DLU*, 150). Or are the stones and trees also part of the diet of the voracious gods (cf. ll. 61-64), so that *tgrgr* means 'you will open your gullets' or 'swallow'? Cf. Heb. *garg^{e}rôt*, 'neck' and Fr. 'gorge', Eng. 'gargle'. Cf. *DLU*, 151: *grgr*. The vb would be denom. on this n. stem. Less probably, 'drag along' (sc. as building materials for the sanctuary): de Moor (1987: 127

and trees'.

For seven whole years,
for eight periods of time[57],
the gracious gods went to and fro on the steppe;
they roamed the edge of the desert.

And they met the guardian of the sown land.
And they cried out to the guardian of the sown land:

1.23 V 70 'O guardian, guardian! Open up!'

And he made an opening for them,
and they entered.

'If there is food for us,
give (some) that we may eat.

If there is wine for us,
give (some) that we may drink.'

And the guardian of the sown land answered them:

'[ ]
There *is* wine: whoever enters [ ]

1.23 V 75 [ ] let him come!
Here is his measure of wine [ ]
And his companions let him fill with wine [ ].'

n. 63), citing Syr. *gargar*, Syr. Ar. *ǧarǧar* (cf. also Heb. *gārar*).

57. Cf. the similar formula in KTU 1.12 ii 44-45 (n. 29). It no doubt denotes a ritual period. Cf. seven-year periods in Hebrew thought.

KTU 1.24: The Wedding of Nikkal and Ib

Marcus in Parker 1997: 215-18; Allan 1999.

While the deities in this text are familiar, their relationships appear to differ from those we meet elsewhere at Ugarit. They probably reflect Hurrian tradition, and perhaps the Hurrian pantheon (Ginsberg 1939). The moon-god referred to as Yarih (*yrḫ*) is probably therefore the Hurrian deity Kusuḫ. Nikkal is the Sumerian goddess NIN.GAL ('Great Lady'). The text consists of a myth of the wedding of Nikkal-and-Ib, and is followed by a hymn to the Kotharat, goddesses of pregnancy and childbirth. The myth and hymn were probably recited at weddings.[1]

1.24 R 1 Let me sing of Nikkal-and-Ib[2],
the daughter of Harhab[3] king of circumcision,
of Harhab king of weddings[4].

At the setting of the sun Yarih became inflamed;
1.24 R 5 he em[braced her] who was born of the <Ko>tharat[5].

1. Cf. the 'mythological' allusion to the marriage at Cana in Christian wedding services.

2. In Wyatt (1977a), I argued that these were the names of two deities, the bride and groom respectively. This proposal has not met with approval. The f. form *t'rbm* in l. 18 is the strongest argument against it. I therefore follow the usual view in this edition. 'Ib': Akk. *enbu*, 'fruit' and Akk. *ebbu*, 'bright' are equally plausible explanations. *DLU*, 2 (*ib* II).

3. Perhaps formed from *ḫrr* and *ḫrb*: 'Drier'. Is this an epithet of the Hurrian sun-god Shimegi?

4. De Moor (1987: 142 nn. 6, 7) interprets the titles of Harhab (*mlk qṣ*, *mlk aǵzt*) as 'counsellor for exchange-marriages' and 'counsellor for protection-marriages' respectively. Ug. *aǵzt*, 'wedding': Akk. *aḫuzzatu*. *qṣ* = 'circumcision': Allan 1999.

5. Note the mythological motif: Nikkal is daughter of the Kotharat. In caring for her parturition, they may be invoked for all births. The plot is apparently a pre-marital affair, perhaps the birth of a son (see translation at l. 7 and n. 9) followed by

He[ar, goddesses, Ko]tharat,
O daughters of Ellil[6], [the Bright Ones[7]]![8]

Lo,
the sacred bride[9] bore[10] a son [ ]
Her vulva yearned for his penis [ ],
her lips for his organ[11] were moist.

the lover's urgency to marry his beloved. Cf. Gen. 34 (on the Hurrian[!] and ritual background of which see Wyatt 1990a). On cognate myths see Astour (1967: 80-92). The main difference is that here there is also a birth (l. 7, if the verbal aspect represents a past tense). The outcome here is also a happy marriage, while in the biblical narrative it ends in tragedy. The element of premarital circumcision, found in Gen. 34, is absent from the present text, but appears in KTU 1.23.8-11 (see n. 12 *ad loc.*).

6. For the view that this is Enlil (also occurring as Ellil, identified in Ugarit with El), see Gallagher (1994). For an alternative view, that it represents the deity Helul, see Pardee (1995: cols. 916-17), following Arnaud (1986: 328; 1991: 38). The term *hll* has usually been explained here as the new moon (Ar. *hilāl*). Pardee's and Gallagher's explanations would explain the apparent disjunction between the crescent moon in l. 15 and the moon-god Yarih in l. 16. The reference to 'the lord of Gamlu' in l. 42 would appear to support Gallagher against Pardee. (I am sceptical of Gallagher's extension of his argument to Isa. 14.) A lunar link is also plausible for goddesses of pregnancy and childbirth.

7. Ug. *snnt*. Pardee (1995: col. 917), following van Selms (1954: 86 n. 24). Rather than 'swallows' (Akk. *sinuntu*, Heb. *sᶜnūnîṯ*), as others (already Virolleaud 1936: 213).

8. The allusion to the Kotharat, apparently as the collective mothers of Nikkal, causes the poet to invoke them directly at this point in this exclamatory manner, as well as at ll. 11, 15, perhaps in anticipation of the hymn addressing them directly in ll. 40-50. It suggests that the narrative itself is here given a hymnic context in the context of a wedding ceremony.

9. Ug. *ǵlmt*: to the line cf. Isa. 7.14. Rather than 'young woman'. The term is restricted to royal women and goddesses. See at KTU 1.2 i 13 and n. 99.

10. Ug. *tld*. Or 'begot'? Or 'will bear'. Thus Caquot and Sznycer (1974: 392) and del Olmo (1981a: 457) etc. Or 'would beget'? Cf. the formula at Isa. 7.14.

11. Ug. *bšr*. We appear to have at least six words serving the same function: *yd*, 'penis', *uṣb't*, 'phallus' (both in KTU 1.10 iii 7-8, partially restored, and n. 17 *ad loc.*, and cf. KTU 1.4 iv 38 and n. 130: note further the parallel word *ahbt* in l. 39), *ḫṭ*, perhaps by word-play and association rather than strict semantics, in KTU 1.23.8-9, 37 (also note nuance of || *mṭ ydh*) which some have also seen as the basic reference in KTU 1.169 (see n. 2 *ad loc.*), *ušr* in KTU 1.11.3, and here also *bšr* (lit. 'flesh'). De Moor (1987: 143 n. 16) notes that Heb. *bāsār* is used of the penis in Lev. 6.3; 15.2-3; Ezek. 16.26; 23.20. If Margalit's (1989a: 324, 328) proposal be accepted, we have a seventh term in *ṯir* at KTU 1.18 i 25.

1.24 R 10 Her father gave her life,[12]
as a betrothed one [ ]

'Hear, goddesses, Kotharat
<O daughters of Ellil, the Bright Ones!>'

Her <vu>lva[13] yearned for his penis.

To her father [ ]
Dagan of Tuttu[l[14]]

1.24 R 15 [Hear,] O Kotharat,

<daughters of> Ellil, [the Brigh]t Ones!
Yarih the luminary of the heavens sent a message
to Har[ha]b king of circumcision.

'Give Nikkal!
Yarih would pay the bride-price for Ib;
let her enter his household!

1.24 R 20 And I shall give her dowry[15] to her father,
a thousand (shekels) of silver
and ten thousand of gold!

I shall send gems of lapis lazuli!

I shall turn her steppelands into vineyards,
the steppeland of her love into orchards![16]'

But Harhab king of circumcision replied,

1.24 R 25 'O most gracious of the gods,
lower edge become son-in-law to Baal;
wed Pidray his daughter[17].

12. For a very different estimate of ll. 7-10 see Margalit (1979: 556 §6.2).

13. Text 11[ ]*mm*12*nh* 'her bowels'? Or read perhaps [ ]*mm*[.]<>*nh*: '...her vulva...' (so above) as in l. 8. De Moor (1987: 143), 'the waters of her "well"' (sc. vulva). The *n* at the beginning of l. 12 may be *'n*: the tablet surface is damaged.

14. The town of Tuttul on the Euphrates was an important cult-centre of Dagan. He is also invoked in KTU 1.100.15.

15. Ug. *mhrh*. The dowry is a financial settlement her father sets aside for the bride. In addition to paying the bride-price (*trḫ*), Yarih is so insistent that he offers to pay the dowry as well. Cf. Shechem's eagerness at Gen. 34.12.

16. An agricultural metaphor for the consummation and fruitful outcome of a marriage.

17. Text: *pdry b*[*th*]. Thus Goetze (1941: 369), Herdner (1968: 20). Many, e.g., Herrmann (1968: 19) read *b*[*t*] <*ar*>, 'daughter of light' or 'mist', Driver (1956:

I shall introduce you to her father Baal.
Athtar[18] will intercede[19].

V He will betroth to you Yabradmay[20],
1.24 V 30 His father's daughter Lion[21] will arouse!'[22]

But Yarih the luminary of the heavens replied,[23]
'With Nikkal will be my wedding!'

Afterwards Yarih pays the bride-price for Nikkal.

Her father set the beams of the scales,
1.24 V 35 her mother the trays of the scales.

Her brothers arranged the ingots,
her sisters the stones of the scales[24].

125), 'honey dew', de Moor (1987: 144), Pidray's epithet in KTU 1.3 i 23-24 etc. (See nn. 11, 12 at KTU 1.3 i 23.)

18. Text *ṯtr.ṯt* (*KTU*[2]). "Aštart', 'Astarte...': Virolleaud (1936a: 220) and Gordon (1937: 32: contrast 1977: 66) Verb *yġtr* is m. The two *t*s with *rḫ*, others. Otherwise *rḫlk*, 'your ewe' (sc. bride): Virolleaud (1936a: 220).

19. Ug. *yġtr*: Thus del Olmo (1981a: 608): Heb. *'ātar*, Ar. *'atara*, though the use of these verbs is exclusively cultic. 'Is jealous' (Gt of *ġr*, Ar. *ġara*): Caquot (1974: 394) and Gibson (1978: 129, 155). Reading *yġpr*: Virolleaud (1936a: 221); Driver (1956: 143): 'arranged' (Ar. *ġafara*). Astour (1969: 9): 'Athtar covers (her) with a veil'.

20. Margalit (1980: 149 n. 2) makes *ybrdmy* ('Water-dispenser') an epithet of Athtar himself (whom he interprets as a god of irrigation: Margalit 1996). He thus has him as a fellow-matchmaker. My interpretation makes *ybrdmy* a further candidate (along with Pidray) offered as a substitute for Nikkal. Thus others, e.g., Gibson (1978: 129). Astour (1969: 10) wonders whether *ybrdmy* is an epithet of Taliy (appearing with Pidray and Arsiy in KTU 1.3 i, ii). This is not implausible, though we might expect it to be f. (**ybrdtmy*), unless the *t* has been assimilated, a solution assumed above.

21. Sc. a title of Athtar. Cf. the iconography of Ishtar, in which the goddess regularly appears on a lion. Evidently it is a sister of Athtar's that he will supply. Perhaps Ishhara? For Driver (1956: 125 n. 16) the lion is Baal. Del Olmo (1981: 459), reads *lbu* as asseverative *l* with *bu* imper., 'come!' But the prosody is then skewed.

22. There is wide variation in interpretations of these four cola. The version above is provisional.

23. I have omitted {wn'n} from the text at this point. For notes on this see del Olmo (1981a: 460).

24. Once the romantic aspect is settled, it becomes a pecuniary transaction: a bride is bought as a commodity!

Nikkal-and-Ib (it is) of whom I sing.

Bright is Yarih,
and may Yarih shine on you[25]!

1.24 V 40 I sing of the goddess[es], the Kothar[at][26],
[daugh]ters of Ellil, the Bright Ones,
daughters of Ellil, lord of Gamlu[27],

who go down to the nut-groves
and among the olive-groves.[28]

...

1.24 V 45 to the Wise One, the perceptive god.

Lo,
in my mouth is their number,
on my lips is the sum[29] of them:

25. Thus the power of the myth is invoked for other marriages. The idea that moonlight is especially auspicious for lovers appears to have an ancient pedigree.

26. As their names indicate, these are goddesses involved in pregnancy and childbirth. Cf. their role in KTU 1.17 ii 24-47. For Ginsberg (1938) they are merely human. Rather are they a group of seven goddesses, corresponding to the Akk. *sa-sú-ra-tu*$_4$, (KTU 1.47.13 below) and to ^{d}NIN.MAḪ. See Pardee (1995), *šassūrātu*, *CAD*, XVII [Š/2], p. 145.

27. As Gallagher notes (1994: 136), the title used here *b'l gml*, usually construed as 'Lord of the Sickle' and supposed to refer to the lunar crescent, e.g. Caquot (1974: 396 n. b), may also mean 'Lord of Gamlu (= the constellation Auriga)', a title of Enlil-Ellil. See n. 6.

28. The translation of this bicolon is tentative.

29. Ug. *mnthn*. 'Their formula (of invocation)': Caquot and Sznycer (1974: 396 n. g), citing Akk. *minutu*. 'Her number...her counting': Watson (1976a: 438), who takes this to be a reference to the pregnant woman counting her months (cf. KTU 1.23.<52ab>, 56-57). If the translation is correct, it is a circumstantial argument against Watson's interesting approach outlined in n. 35, since we should not expect an enumeration of only two goddesses to evoke such a statement, while an enumeration of seven would justify it. The number seven is also perhaps intrinsically more likely if the goddesses also represent not merely midwives, but protective and benevolent spirits who communicate their personal traits to the new-born, thus transmitting its character. Cf. the spirits provided at Isa. 11.2, which are seven in number if the 'spirit of Yahweh' at the head of the v. is to be distinguished from the six following. Cf. also the seven Baals of KTU 1.47.5-11 and parallels, and the anointings (if correctly interpreted), at Ps. 19.8-10, though these are only five or at most six in number (Wyatt 1995b: 568-69, 588-91).

Trousseau and Dowry[30],
Cord-Cutter[31] and Womb-Opener[32],
Breather-of-Breath with Perubahsh[33]
24 V 50 (and) Goodness[34], the youngest of the Kotharat![35]

30. Ug. *tlḫhw, mlghy*. Seemingly subdivisions of the *mohar* ('dowry'), perhaps dating from an era of more archaic procedures. Cf. Heb. *šilluḥîm, mᵉlôg* (Akk. *mulūgu*).

31. Ug. *ttqt*. Following de Moor's suggestion (n. 33 below). Or is the name perhaps to be explained by reference to √*šqy*, as a suckling-goddess? The Gt form is hard to explain on this proposal, however. 'The One who gives suck'?

32. Ug. *bq't*. √*bq'*, 'cleave, split'.

33. *tq't* and *prbḫt*. √*tq'*, Heb. *tāqa'*, 'give a blast (on a horn)'. The second name is so far unexplained. Cf. the Hittite PN Peruwaḫšu, cit. Caquot (1974: 397 n. l), who construes these lines quite differently, and takes P. to be the recipient of the tablet). For these explanations of the names see de Moor (1987: 145). Watson (below) divides as *pr bḫt*.

34. Ug. *dmqt*. Or, 'Most Beautiful': Jirku (1962: 79); 'the Good One': de Moor (1987: 145).

35. The final lines perhaps comprise a list, to be learnt by heart as part of the ritualization of pregnancy and birth. I have followed the majority view here. Cf. Aistleitner (1964: 640), del Olmo (1981a: 461) and de Moor (1987: 145). An entirely different approach is taken by Watson (1976a: 438-9), whose interpretation and translation is attractive, and worth citing in full:

> See! In my mouth is her number,
> on my lips her counting.
> O you, established (?) as her dot and dowry
> From her, Wise women, do not cut off (?)
> From her the 'fruit' with care,
> O experts in babycraft, O Kathiratu!

He takes the Kotharat to be two in number, as mid-wives; cf. Exod. 1.15 and the birth-goddesses of Egyptian birth-scenes. What is being counted on this interpretation is the mother's months of pregnancy (to which cf. KTU 1.23.51< >, 56-57). However, the forms *sprhn, mnthn* cannot mean 'her number, her counting', referring back to the mother, but must mean 'their number...', referring to the months. The suff. *-hn* is not 3 f. sg., which is *-h* or *-n*, though Watson interprets it as 'perhaps energic 3 fem. sing.', but 3 f. pl. (*UT*, 36-37 §6.7, 8, 13). This would raise the problem, unless his explanation be accepted, that since months have not been mentioned, there is no antecedent to which the suffixes can refer. Cf. also at n. 29.

KTU 1.40: A Liturgy for a Rite of Atonement for the People of Ugarit

(KTU 1.40 = CTA 32 = UT 2 = RS 1.002+1.002A)

Select Bibliography

Aistleitner 1954, 1964: 105-107; Caquot 1962; Weippert 1969; van Selms 1971; Dietrich, Loretz and Sanmartín 1975d; Xella 1981: 256-67; de Tarragon 1989: 140-51; de Moor and Sanders 1991; Pardee 1991, 2000: 92-142, 2001a: 81-97; del Olmo 1992a: 99-109; de Tarragon 1998.

This ritual text is partially duplicated by KTU 1.84. An atonement liturgy, originally of five or more probably six (Pardee, de Moor and Sanders, del Olmo) similar sections, of which five survive (the first two in extremely fragmentary condition). The highly repetitive and formulaic nature of the text allows a considerable degree of restoration. The sections are addressed to men and women respectively, in order, perhaps offering three kinds of victim (I-II ox[?], III-IV sheep, V-VI donkey). This great 'Day of Atonement' liturgy seems to be an analogue of the rite of Lev. 16 (de Moor and Sanders 1991). It affords a precious glimpse into Ugaritic ethical mores.

[I]			(Entire first section missing)[1]	
(m.)				
1.40 R	1	[	] and atonement[2] [	]
[II]		[	and] atonement for U[garit	]
(f.)		[	] whether the [	]

1. See Pardee (1991: 1189) for formal arguments for a sixth section.

2. Ug. *npy*. Very diverse interpretations have been proposed, e.g 'exalt': (Caquot 1962: 206-207: Ar. *nāfa*); 'repudiated, disowned': Aistleitner (1964: 105; *WUS*, 209 §1816: Ar. *nafā*); 'fabric': van Selms (1971: 236: Ph. *npy*, 'weave'); 'banishment': Dietrich, Loretz and Sanmartín (1975d: 151); cf. 'censure': Xella (1981: 257); 'guarantee': de Tarragon (1989: 144 n. 29: Akk. *nepû*); 'be virtuous': de Moor and Sanders (1991: 290: √*ypy*, 'become beautiful'); 'well-being': Pardee (1991: 1191: √*wpy*, *ypy*); 'expiation': del Olmo (1992a: 99, 106: Akk. *nap*[*p*]*û* 'sieve, select', cf. Heb. *nûp*, *nāpâ* etc.). I have followed Pardee's argument here, and on his explanation ('being made...*whole*') the obvious technical equivalent in English is 'atonement'. (The Heb. technical term √*kpr*, does not appear in Ug.) It is not clear whether these four lines belong to section I or section II.

[ ] *ǵbr*[3] [ ]

1.40 R 5

(no further surviving text)

[III]
(m.) (ll. 9-17: only odd letters surviving)

[IV] [Now we present[4] a ram for purification[5],]
(f.) [for purification of the women of Ugarit,]
[and ato]nement for the foreigner [within the walls[6] of Ugarit,]
[and atone]ment [for Yaman[7],]
and atone[ment for *'rmt*[8],]
[and atonement for Ugarit].

Whenever y[ou] sin,
[whether by the accusation[9] of the Qa[tians,]

3. *DLU*, 155 leaves untranslated. Cf. n. 11.

4. Thus also de Moor and Sanders (1991: 284). Ug. *šqrb*. Lit. 'bring near': technical term, as in Exod. 29.3 etc. (√*qrb* hiph.). Presumably into the presence of the divine image. I have taken it as inf. abs. used finitely, as is common in the narrative poetry. It may alternatively be an imper. sg., addressed to the priest who brings the victim in. See also del Olmo (1995: 42).

5. Ug. *mšr*. 'Song': Dietrich, Loretz and Sanmartín (1975a: 150) and de Tarragon (1989: 146). 'Singer...song': Aistleitner (1964: 106; dividing *mšrm šr*). Cf. van Selms (1971: 236). 'Drag off': de Moor and Sanders (1991: 284, 290). I fail to see what this means. 'Rectitude': Pardee (1991: 1185, 1190; Akk. *mêšaru*). Cf. 'justification': del Olmo (1990; 1992a: 101).

6. Ug. *ḥmyt*. Thus most. Van Selms (1971: 236): 'fortresses'.

7. TN? Cf. KTU 1.4 i 43 and Astour (1967: 352).

8. Corrected by some to *ṯrmn*. See *CTA*, 114 n. 7. Caquot (1962: 206) sees this as a district of the kingdom of Ugarit.

9. Ug. *ulp*, preceding lists of peoples. Following Pardee (1991) I analyse as *u* + *l* + *p*: 'whether (or, and) from the mouth (of)'. Pardee translates as 'according to the statement of'. I take this to mean 'according to the accusation', within the liturgical context or generally. Does it mean, as my translation suggests, that representatives of these foreign nationals and classes of people participate in the rite, and state their peoples' grievances, for which communal forgiveness is sought? Or are the people listed sharing in the rite by confessing their own sins? 'According to the manner of...': Caquot (1962: 208); cf. 'like': Xella (1981: 258, 262-63); 'allied': Aistleitner (1964: 105; 22 *WUS*, §243); 'prince, chief': Gordon (*UT*, 359 §19.202),

1.40 R 20 or by the accusation of the Dadm]ians[10],
or by the accusation of [the Hurrians],
[or by] the accusation of the Hittites,
or by the accusation of [the Cypriots],
[or by the accusation of] the *ǵbr*[11],
or by the accusation of] your oppressed ones,
or by the accusation of yo[ur poo]r[12],
or by the accusation of *q*[*rzbl*[13]];

whenever you sin,
either through your anger,
or through your impat[ience],
[or through some evil] you have done;

whenever you sin
concerning the <sa>crifices and the offering,
[our] sacrifi[ce we of]fer:
this is the offering we make,

van Selms (1971: 237) and de Tarragon (1989: 146 etc.).

10. 'Qatians...Dadmians' (*qṭy, ddmy*): gentilics of uncertain reference. All the gentilics are sg., but collective in force. Cf. the same usage in the 'nation lists' such as Exod. 23.23 etc. Gordon (*UT*, 477 §19.2221; cf. Aistleitner 1964: 106 n. f) read the first term as *qṭš* in its only surviving instance (l. 36), and took it to be a dialectal form of *qdš* (perhaps 'Qadeshite'), but the *y* is the safer reading, and expected with a gentilic. Cf. Caquot (1962: 207), who reads [*qtš*]*y* at l. 19 (11 in *CTA* numbering). See also Weippert (1969), Eg. Qadi. Error for *qṭ<n>y*: 'Qatnians', sc. citizens of Qatna? The term *dadmum* is the Amorite equivalent of Akk. *mâtum*, 'country' (Durand 1993: 50). Were the 'Dadmians' perhaps no more than the rural population?

11. Read as *šbr*, 'Subarean', by Caquot (1962: 207, with '[?]'), Aistleitner (1964: 105). Cf. n. 3.

12. The two cola ending 'oppressed ones...poor' are translated thus by Caquot (1962: 209):

> either because of your culpability
> or because of your degradation.

The term *ḫbt* is translated 'plunderer' (Akk. *ḫabātu*) by Dietrich, Loretz and Sanmartín (1975a: 153).

13. Interpreted as a TN by Astour (1975: 327 §96): modern Karzbil. This would translate as 'Princeton'. But it seems out of place last in the list, unless we conjecture a military defeat, or some reason for a sense of injustice against Ugarit. Van Selms (1971: 239): 'the raging(?) prince' (*ulp qrzbl*).

this is the victim we immolate[14].

May it be borne aloft[15] [to the father of the gods[16]],
1.40 R 25 may it be borne aloft to the pantheon of the gods,
may it be borne aloft to the assembly of the go[ds],
[to Thukamun and Sha]nim:
here is the ram.

[V] Now we present a donkey[17] for purification,
(m.) for purification of the men of Ugarit,
and [atonement for <the foreigner within the walls of>]
Ugari<t>,
and atonement for Yaman,
and atonement for *'rmt*,
and atonement for [Ugarit],
and atonement for Niqmad[18].

Whenever your state of grace be changed[19],
whether by the accusation of the Qa[tians,
or by the accusation of the Dadm]ians,

14. In each of these formulae, the vb and n. use the same etymon (*dbḥn ndbḥn*, *ṯ' nṯ'y*, *nkt nkt*). For the last clause, I follow Xella (1981: 258) and del Olmo (1995: 40), who have exactly the right form of words. On the rank of the person performing *ṯ'*, see Freilich (1992). It is not three kinds of sacrifice, but two technical terms qualifying the generic 'sacrifice'.

15. Sc. as a holocaust, according to Caquot (1962: 210).

16. Ug. *ab bn il*. Or 'father of the sons of El', but such a translation would be tautologous. The form *bn il* occurs in the following two cola as well.

17. Ug. *'r*. Read as *tr* (= *ṯr*), 'bull', by Caquot (1962: 206) and Aistleitner (1964: 106). Eliezer Oren has drawn my attention to ritual donkey burials (following sacrifice?) at MBA Tell Ajjul and Tell Haror. The name of Shechem's father in Gen. 34, Hamor, suggests a treaty-sacrifice involving donkeys, which is attested at Mari (ARM 2.37) and has been discussed by Noth (1966). The only other text from Ugarit to mention donkeys used in sacrificial rites is KTU 1.119.16, and this, together with the present national day of atonement, suggests that they were reserved for special occasions, and consequently with all the greater significance attached to their use. The text at KTU 1.6 i 28 may refer to donkeys, but the term used, if not restored to *yḥmrm*, is *ḥmrm*, not *'r* as here. See n. 68 *ad loc*. See also n. 123 to KTU 1.4 iv 4.

18. The identity of the king is not certain, though Niqmad III is the likely candidate. See nn. 9 and 11 to KTU 1.113.12, 19 and n. 27 to KTU 1.161.13.

19. Ug. *šn*. Or: 'marred'. See del Olmo (1989a: 52) and de Moor and Sanders (1991: 292-93).

or by the accusation of the the Hurrians,
or by the accusation of the Hittites,
or by the accusation of the Cypriots,
or by the [accusation of the *ǵbr*,
1.40 R 30 or by the accusation of] your oppressed ones,
or by the accusation of your p[oo]r,
or by the accusation of *qrzbl*;

whenever your state of grace be changed,
either through your anger,
or through your impatience,
or through some evil you have done;

whenever your state of grace be changed
concerning the sacrifices and the offering,
our sacrifice we offer:
this is the offering we make,
this is the victim we immolate.

May it be borne aloft to the father of the gods,
may it be borne aloft to the pantheon of the gods,
<to the assembly of the gods,>
to Thukamun and Shanim:
here is the donkey.

[VI] 35 Now repeat[20] the liturgy for puri[fication],
(f.) for purification of the wo<me>n of Ugarit,
and atonement for the foreigner within the walls of Ugarit,
and [atone]ment for his wife[21].

Whenever your[22] state of grace be changed,
whether by the accusation of the Qa[tians,
or by the accusation of the Dadm]ians,

20. Or: 'return to'. Perhaps 'we repeat' as with *šqrb* above. On the expression cf. KTU 1.4 v 42; 1.19 iv 63.

21. Ug. *aṯt*. Or: 'the women'. Originally read *nṯt*, and taken to be 'Nesheti' or similar, the name of the queen of the Niqmad previously mentioned in l. 28. See Virolleaud (1936d: 43 n. 3), *CTA* (p. 115 n. 2), de Moor and Sanders (1991: 290). See now, however, Pardee (1991: 1186 n. 7). If *aṯt* is sg., it may refer not to the king's wife, but to the foreigner's (the immediate antecedent).

22. The suffix is f. pl., as are all suffixes in the section.

or by the [accusation of the the Hu]rrians,
or by the accusation of the Hittites,
or by the accusation of the Cypriots,
or by the accusation of the *ǵbr*,
or by the accusation of your op[pressed] ones,
or by the accusation of your p[oo]r,
or by the accusation of *qrzbl*;

whenever your state of grace be changed,
either through [your] anger,
[or through your impat]ience,
1.40 R 40 or through some evil you have done;

whenever [your state] of grace be changed
[concerning the sacrifices] and the offering,
our sacrifice we offer:
this is the offering we [make],
[this is the victim we] immolate.

May it be borne aloft to the father of the gods,
1.40 V 42 may it be borne aloft to the pan[theon of the gods],
[to] the assembly of the gods,
to Thukamun [and Shanim]:
here is the donkey.

KTU 1.41: Instructions for the Ritual Calendar of the Month of Vintage

(KTU 1.41 = CTA 35 = UT 3 = RS 1.003)

Select Bibliography

Herdner 1956; de Moor 1972: 13-17, 1987: 157-65; Xella 1981: 59-75; de Tarragon 1989: 152-60; del Olmo 1987b, 1992a: 50-51, 73-87; Levine and de Tarragon 1993, 1997a; Aboud 1994: 172-77; Pardee 2000: 143-213, 2001a: 55-65.

This text is duplicated by KTU 1.87, which allows a confident restoration of many lacunae. It is in prose, in the form of a calendar of cultic obligations during the month of Vintage ('First-of-the-Wine'). This was the period of the New Year, and some scholars (de Moor, del Olmo) have stressed this aspect of the contents. It is noteworthy that the king plays a key part in the rites of the vintage, whose economic importance would be considerable. It is uncertain which temple was the location of the rites.

1.41 R 1 In the month of [First-of-the-Wine[1], on the day of the new moon, a bunch of grapes] is to be cut[2] [for El as communion-offering.]

On the thir[teenth (day) the king is to wash himself thoroughly].[3]

1.41 R 5 On the four[teenth the first of the tribute,] and two rams

1. The *premier cru* was evidently as appreciated in Ugarit as in Bordeaux!

2. Ug. *šmtr*. *Hapax*, explained from Ar. *matara*, 'cut' (de Tarragon 1989: 153 n. 42). Imper.: Xella (1981: 64), de Moor (1987: 158) and Tropper (1990: 42). We may ask whether the harvesting of the grape-bunch in Num. 13.23 (now a pseudo-historical episode) does not have its roots in a similar ritual tradition. The subsequent typological use of this motif emphasizes its symbolic thrust. On the problem of how to translate the vbs in this text, descriptively or prescriptively, see Levine (1983: 469) who argues that where a volitive is required it is always indicated, and Levine and de Tarragon (1993: 78). I have chosen a form which can be taken either way.

3. Ug. *brr*. Lit. 'clean, purified' (Heb. *bārûr*): *UT*, 377 §19.528. Levine and de Tarragon (1993: 91) apply it as an epithet to the king: 'the purified king...'. See also KTU 1.119.5.

to [the Mistress of the Temples[4]; two birds to the divine [people[5]]; and a ram (and) a ja[r[6] to Ilsh[7]; a ram to the gods[8].]
[The king] shall sit[9], being purified[10], and [shall clap his hands[11] and shall proclaim] the day[12]. Subsequently[13] he is to en[ter[14] the temple]. A gift [[15], two ewes],

4. Ug. *b'lt bhtm*. I see no reason to identify this tutelary goddess with Anat, as does de Moor (1987: 159 n. 11). The form *bhtm* is pl.

5. Ug. *inš* (*ilm*). Some leave untranslated. De Moor (1987: 159: cf. *WUS*, 28 §319; *UT*, 362-63 §19.268; *DLU*, 41): 'the Most Amiable (of the gods)', which he takes to be an epithet of Baal; del Olmo (1992a: 74: cf. *WUS*, 28 §318; *UT*, 363 §19.269): '(the divine) retinue', cf. Levine and de Tarragon (1993: 91): 'the staff (of the gods)', sc. the temple personnel. Why do they receive sacrifices? The fact supports del Olmo's view that they are dead, divinized, kings.

6. Ug. *dd*. Thus Xella (1981: 61), de Moor (1987: 159) and del Olmo (1992a: 74). Cf. *DLU*, 129, *dd* II. De Tarragon (1989: 153): 'a ram for the well-beloved Ilš'. Levine and de Tarragon (1993: 91): 'Elš, the favored'. But an epithet would not normally precede its noun, except in a noun clause.

7. Minor god. De Moor identifies him as a raven-messenger (1987: 159 n. 13). See also Korpel (1990: 292) and Becking (1995a). He appears with his wife at KTU 1.16 iv 3-4.

8. Apparently an unusual use of *ilhm* (cf. Heb. *'ĕlōhîm*) for 'gods'. Usual pl. form is *ilm*. But cf. n. 20.

9. Ug. *ytb*. 'Sit': Xella (1981: 61), de Tarragon (1989: 154) and del Olmo (1992a: 74); 'is seated': Levine and de Tarragon (1993: 91). 'Return', de Moor (1987: 159).

10. Ug. *brr*, as at l. 3. On the language of royal purification as (temporary) divinization see Wyatt 1999; *idem* 2000.

11. Cf. l. 54, where the same sense should be understood. See Levine and de Tarragon (1993: 94-95). Cf. the sense commonly drawn: 'he shall wipe his face' (e.g., de Moor 1987: 159).

12. Ug. [*qra*] *ym*. For de Moor (1987: 159 n. 17) it is New Year's day (on the fourteenth of the month!); for del Olmo (1992a: 74) a festival day. The fourteenth would be a full moon. Cf. Lev. 23.21 (*qārā' yôm*). For de Tarragon (1989: 154 n. 47) *ym* could refer to a deity invoked (*qra*) by the king, 'Day' (thus de Moor 1981: 14; otherwise unattested at Ugarit? See Becking 1995d) or less probably Yam.

13. Ug. *'lm*. Thus Xella (1981: 61). 'Furthermore': de Tarragon (1989: 154), del Olmo (1992a: 74). 'On the following day' (sc. the fifteenth): de Moor (1982: 14; 1987: 160).

14. Ug. *y'*[*rb*]. Intrans.? Trans. (D stem passive) according to de Tarragon (1989: 154 n. 48), but intrans. in Levine and de Tarragon (1993: 91).

15. Text usually read as [ ]*k.'gml* [...]. Read as [*y*]*tk 'gml*, 'one pours (liquid) *'gml*': de Tarragon (1989: 154); as [ ]*tk* 'gm*l* by del Olmo (1992a: 74): '[ins]ide the

1.41 R 10 and a [fe]ral pige[on[16]] he shall of[fer[17] to Anat], and an o[x and a ram to] El. And by the win[dow][18] he shall pour (a libation)[19]. A heifer to the two gods[20], Thu-[kamun and Shanim]; a ewe to Reshef, <a ewe> as a holocaust. And (as) communion sacrifices[21]: two ewes to his god[22]; an ox and a ram to the gods, a heifer to the
1.41 R 15 gods; to Baal a ram; to Athirat [a ram; to Thuka]mun and [Shanim a ram;] to Anat a ram; to Reshef a ram; [to the pantheon of El[23] and the assembly of Baal] a heifer; to Shalem [a heifer].

[And at midday[24] in the retiring]-room[25] of the god[s]

'gm*l*' (note that transliteration and translation do not match). De Moor (1972: 14 and n. 40; 1987: 160 and n. 20), takes *'gml* to denote some hypothetical mythical monster. Xella (1981: 61, 65) wonders whether it is not an error for *'glm*, 'two calves'. Levine and de Tarragon (1993: 91, 95): '[with] a present of [a cu]p and a chal[ice]', reading *tgml* [*k*]*s wsp*[*l*], rejecting initial *k*.

16. Ug. *yn*[*t q*]*rt*. Lit. 'town-pigeon'. At any rate an ancient equivalent of the feral pigeon.

17. Cf. del Olmo (1995: 42) though he does not appear to have noticed this example.

18. Xella (1981: 61): 'and in the [sacrificial] ap[erture]'; del Olmo (1995: 46): 'and in the ni[che of his]': *b*[*urbth*$^{?}$], presumably referring to the niche where the cult-image of El was placed. De Moor (1987: 160): 'lattice'; de Tarragon (1989: 154): 'opening'. Cf. n. 1 to KTU 1.43.1.

19. Ug. *ytk*. √*ntk*, 'pour libations': del Olmo (1995: 46), also Levine and de Tarragon (1993: 91). Or is it an error for *ykt* (√*nkt*), 'immolate' (del Olmo 1995: 40), with the *gdlt* and all the subsequent animals as victims? The mention of a libation in the midst of a series of blood-sacrifices looks odd, unless it marks the beginning of the following sequence of sacrifices. But note the libations in l. 19.

20. Ug. *ilhm*. A du., as suggested by the context. The pl. is normally *ilm*, thought the form *ilhm* (twice) in l. 14 appears to be pl.

21. In terms of syntax, the phrase *wšlmm*, 'and a communion sacrifice', may go with the preceding mention of Reshef (Xella and del Olmo) or with the following *ilh* (de Moor and de Tarragon). The latter is preferable. *šrp*, 'holocaust' may then qualify the preceding offerings to the gods, Thukamun and Shanim and Reshef.

22. Ug. *ilh*. Hardly to be read as the equivalent of Heb. *'eloâ*, as proposed by de Moor (1987: 160 n. 28). I take it to be the king's personal deity, who might naturally take precedence when he was performing the rites. Others leave as an unspecific DN.

23. Ug. *dr il*. Or: 'the pantheon of the gods' (lit. 'the divine pantheon').

24. Ug. *burm*. De Tarragon (1989: 155, after Levine 1983: 472), Levine and de Tarragon (1993: 92, 95-96): 'at midday'. 'Into the fire': de Moor (1972: 14), Xella

(and) lords[26]]: thirty[27] [full[28] chalices[29] and] cups[30]. And
1.41 R 20 the gift[31] that he is to take to the royal chapel: an offering
of [myrrh-oil] (and one) of spiced oil[32], honey[33] (as) a

(1981: 61). 'As a sacrifice of combustion': del Olmo (1992a: 75; cf. 1995: 46); but it would scarcely take place in the retiring-room. De Moor (1987: 161): 'in the greenery', linking it to Sukkôt. Cf. Pardee (2000: 56-59).

25. Ug. [*lb*] *rmṣt*. Or: 'robing-room'. An adjacent part of the temple for ritual preparations. Rather than 'a roast heart' (cf. for instance de Moor [1987: 161] and del Olmo [1992a: 77]), since *lb rmṣt* cannot be so construed, for *lb* is m. (though *DLU* lists both m. and f.; f. in Heb. found only at Prov. 12.15). For explanation of the phrase (prep. *l* + *b* , 'inside'; *rmṣt* from √*rbṣ* with dissimilation of *b* to *m*) and critique of the earlier approach see Levine and de Tarragon (1993, 96). Lit. 'sitting-room'.

26. Ug. *ilhm* [*b'lm*]. At first glance the 'Baal-gods': cf. in the pantheon-list KTU 1.47.6-11 and parallels ('Adad II-VII' in the Akk. text). De Moor (1987: 161 n. 33) identifies the gods mentioned here with the double-category reference in l. 16. The new approach of Levine and de Tarragon (1993: 92, 95-96), reflected in the translation, is however much more convincing. The 'lords' are the king and his chief officials in attendance. Not so for Pardee (2000: 59-60).

27. One each day of the month, or thirty together?

28. The term *mlu*([*u*]) appears twice in most readings (e.g. *KTU*[2]). See Levine (1983: 470), Levine and de Tarragon (1993: 77) for the rationale for omitting the first reference (restored from KTU 1.87.20, an erroneous or variant copy of KTU 1.41.18).

29. Ug. *dṯt* (*dṯ ṯ* of *KTU*[2] typographic error). De Tarragon (1989: 137 n. 17), Levine and de Tarragon (1993: 96) construe this with Eg-Sem. *daši*, 'cup' (*CAD*, (D), 119: EA 14 i 48). Xella (1981: 61) and de Moor (1987: 161): 'fat ashes'. Cf. Heb. *dešen*. Del Olmo (1992: 75): 'fodder' (after Sanmartín 1980: 336-37). Cf. Heb. *deše'*, and *DLU*, 138, 'fodder and spring grass' (cit. Akk. *dīšu, dēšutu*).

30. Ug. *ksm*. For this approach see Levine and de Tarragon (1993: 92). Note the different approach of Dijkstra and de Moor (1975: 177), de Moor (1987: 161) and del Olmo (1992a: 75). They see this as 'emmer-corn' (cf. Heb. *kusemet*), and link it with *ksm*(*h*) in KTU 1.17 i 31—see n. 38 *ad loc.*—(an offering the son makes for his father) and with *kśm* (note the use of the different *s* sign) in KTU 1.39.9, where the same expression occurs. Whichever interpretation is followed, *dṯt wksm* is a hendiadys. See now Pardee (2000: 60-61).

31. Ug. *m'rb*. 'Offering': Xella (1981: 61); 'tribute-offering': del Olmo (1992a: 75); 'temple dues': de Moor (1987: 161 and n. 36; Akk. *irbu, eribtu*); 'present' (n.): de Tarragon (1989: 155; Akk. *irbu*); 'pledge': Levine and de Tarragon (1993: 92, 96; Akk. *irbu*, Heb. *ma'arāb*).

32. Ug. *šmn rqḥ*. Or: 'blended oil' (thus Levine and de Tarragon 1993: 92). Heb. √*rqḥ*. 'Perfumed oil': Xella (1981: 62) and del Olmo (1992a: 75).

33. On honey in the cult see n. 15 to KTU 1.ii [21], n. 50 to KTU 1.14 ii 19 and

gift, [and feral pigeons in two baskets[34]].

And into the hole[35], four[teen] pitchers of wine; a measure[36] of flour on the ste[ps of] the altar; for the sanctuary of the goddess, two bir[ds].

1.41 R 25 [To Saphon[37], a ram]; to the sacred bride[38] a ram and to [; to Yarih] a heifer; to Nikkal [a heifer; to the Mistress of the Temples two] birds; to the [divine] people [a heifer]; to the go[ds] a ewe; Sha[psh[39] a heifer; Resh]ef a holocaust and commun[ion sacrifice; ditto, two ewes.]

1.41 R 30 His [go]d a heifer; [the gods a heifer; El[40] a e]we;

lower edge Thukamun and Sha[nim a ewe;]

1.41 V [the goddess of] the temple[41] two ewes, at [the spring[42] a

n. 15 to KTU 1.148.22.

34. Ug. *ḫtm*. 'Basket, nest': Levine and de Tarragon (1993: 92, 96: Akk. *ḫīšû*). Others: 'loaves' (de Moor 1972: 15; Ar. *ḫuṯṯ*). I take *ynt qrt* to be pl. (conceivably du.) rather than sg. on account of the *two* containers, in which the birds are conveyed.

35. Ug. *ǵr*. Usually construed as √*ǵr*, 'mountain' (= Heb. *ṣûr*). Thus de Moor (1987: 162), explained as temple-mound as replica of Mt Saphon. Levine and de Tarragon (1993: 92, 97): 'ledge' ('a ledge in the courtyard'). It is a place of libation, evidently with some symbolic significance. Alternatively, it may be a depression, (*bǵr*: 'into the hole'?) a suitable place for libations. Cf. √*ǵr*, 'go down' (Rainey 1971: 172) and Xella's (1981: 67) and de Tarragon's (1989: 155 n. 55) remarks. I have chosen the latter alternative partly on the force of *b*, 'into' rather than 'onto'. To de Tarragon's remarks, cf. the holes in the rock under the Dome of the Rock, supposedly the locus of libations in the Jerusalem cult. See Patai (1947: 58).

36. Ug. *prs*. Levine and de Tarragon (1993: 92): '½ measure'. But any measure is already a division (√*prs*).

37. The mountain is deified and receives sacrifice.

38. Ug. *ǵlmt*. While etymologically neutral ('young woman') this term and its m. equivalent is used exclusively of royalty and deities, and therefore clearly carries an ideological burden. Cf. *'almâ* in Isa. 7.14, which denotes the queen. See KTU 1.2 i 13 and n. 99.

39. Note that the dative *l* is omitted between ll. 28 and 33.

40. Levine and de Tarragon (1993: 92) treat this as a dittograph for the preceding *ilhm*, 'gods'.

41. Ug. [*ilt*] *bt*. A goddess distinct from 'the mistress of the temples' (*b'lt bhtm*) of l. 26? Or is the latter 'the mistresses...', with 'the goddess' one of their number? Cf. also *b'lt* [*btm rmm*], l. 37 below.

42. Ug. *nbk*. The *mbk* in KTU 1.2 iii 4 etc. is the point of junction at the centre

holocaust and communion sacrifice;] ditto a heifer; to B[aal of Saphon] a l[am]b; to Saphon a heifer; to [Baal]
1.41 V 35 of U[ga]rit a ram; to the go[d] of the ancestor [ ].
[to Athirat], and two [b]irds to...[[43]] times, both in [the sanct]uary[44] of the Mistress of the [Great] Templ[es and on the al]tars.
On the fifth (day): (at) [the sanctuary[45] of El, a shekel
1.41 V 40 of sil]ver as *kubadu*-offering[46] and a sacrifice[47]; [ ] to Athirat; two birds [to the divine people].

[Re]turn[48] to the altar of Baal. A hei[fer to Baal]; a ewe to Saphon and a lamb [to Baal of Ugarit.]

Twenty-two times [ ] a ram, a jar of oil, (and) a heifer.

of the world of the two cosmic seas (Ug. *thmtm* [cf. Ps. 42.8 MT], Akk. *Apsû* and *Ti'amat*). The 'spring' here was probably a water-source in the temple-precinct, presumably a well or an artificial container (like the bronze sea in the Jerusalem temple—Kgs 7.23-6 = 2 Chron. 4.2-5), carrying this symbolic burden. Cf. the 'libation-hole' at l. 22 above. See also *nibkê-yām* in Job 38.16 and Levine and de Tarragon (1993: 97). (Interestingly, two local streams flowing to the west on the north and south sides of the city meet—a *mbk*!—just north-west of the tell. Is it possible that a cultic procession went out to this spot?)

43. Since *KTU*[1], all discussions and editions have read *tltm*, 'thirty', here. It is not found in either tablet. (Cf. *CTA* text, transcription and plate. Verso appears as pl. III in del Olmo 1992a). Is it to be inferred from the thirty vessels of l. 19? It is best taken as a conjecture.

44. As in l. 24, this *bt* must be a dwelling within one of the temples on the acropolis, where the tutelary guardian goddesses of the temples had their images, and therefore 'dwelt'. Hence 'sanctuary'. Levine and de Tarragon (1993: 92), who translate 'chapel', locate the ritual sequence in the Baal temple (see for instance l. 41). Note the following expression 'Mistress of the Great Temples'. These were undoubtedly the Baal and Dagan temples on the acropolis. (Here *btm* du.)

45. Cf. previous note, unless in this case a temple of El elsewhere in the city is meant. The only one known (and possibly dedicated to El) is the 'temple aux rhytons' in the city-centre. See n. 29 at KTU 1.3 ii 17.

46. That a specific ritual form is intended here by the term *kbd* (Akk. *kubādu*) has been convincingly argued by Levine and de Tarragon (1993: 98-102). See also Fleming (1992: 162-169) for the evidence from Emar.

47. Levine and de Tarragon (1993: 92, 101): 'sacred meal'.

48. Ug. [*t*] *tb*. I take it as š imper. 'They come back to...': de Tarragon (1989: 157). 'Repeat': Xella (1981: 62) and de Moor (1987: 164). Cf. del Olmo (1992a: 76). 'Pedestal': Levine and de Tarragon (1993: 93).

1.41 V 45 And [the king, being purified,] shall respond with a litany.

On the sixth (day) two [jars of oil] on top of it[49]; a heifer. [The king, being purified] shall res[pond] (with a litany).

On the se[ve]nth (day) as the sun declines the day is desacralized; at [s]un-s[e]t the king is desacralized[50]. And on the day of the new moon[51], two rams to [Athtar]t.

1.41 V 50 When the king [shall offer s]acrifice to Pirigal-*ṣqrn*[52] on the roof, on which stand four and four[53] dwellings[54] of cut branches[55], a ram as a holo[caust], an o[x] and a ram as communion-sacrifices. Seven times, with all his heart[56] the king shall s[peak]: As the sun declines the day

49. Sc. Baal's altar (l. 41).

50. As at l. 53. Presumably the first stage of desacralization takes some time in the late afternoon, culminating in the king's desacralization timed to be complete precisely as the sun touches the horizon. (Levine originally took an entirely different line: [1983: 471].) De Moor (1987: 164 and n. 55) interprets as 'the sun-set and the host of Maliku' (sc. deities invoked by the king). Cf. KTU 1.119.4 and n. 5 *ad loc*. Cf. n. 10 above.

51. Ug. *ym ḥdṯ*. This translation is apparently at odds with the preceding text, after the seven days of the feast have just ended. It could also mean '(on) the new day', sc. on the morrow. However, the text does recapitulate—e.g. l. 4, fourteenth day, l. 38, fifth day—so that a reversion to the first day is possible.

52. Ug. *prgl ṣqrn*. De Moor (1987: 165 n. 58) identifies this sequence as Sum. PIRIG.GAL NUN.GAL (a sage), the second part semitised as *ṣqrn*, explained by de Moor on basis of Ar. *ṣāqūrah*, 'third heaven'.

53. Sc. eight? Meaning 'two rows of four' according to Levine and de Tarragon (1993: 112).

54. Ug. *mṯbt*. 'Cabins': Xella (1981: 63); cf. de Moor (1987: 165) and de Tarragon (1989: 158). Preferable to 'stands': Levine and de Tarragon (1993: 112). We appear to have here an analogue of the Akk. *akîtu* and the Heb. *sukkôt*. The term also occurs at KTU 1.23.19. See n. 20 *ad loc*.

55. Ug. *azmr*. According to de Moor (1969a: 177 n. 68; followed by Xella 1981: 69; de Tarragon 1989: 158; del Olmo 1992a: 83), corresponds to Heb. *z^{e}mōrâ*, 'branch'. Levine and de Tarragon (1993: 113) relate it to Akk. (Neo-Ass.) *zamru*, 'a tree or shrub and its edible fruit'. De Moor (1971: 59) sees this as evidence for a Canaanite origin for the Israelite Feast of Tabernacles.

56. Ug. *klbh*. Thus Xella (1981: 63) and de Moor (1987: 165). Translated thus, it may mean 'in a clear voice', or 'sincerely', that is, reciting an appropriate litany or prayer. Alternatively read as 'all of it upon it' (*kl bh*): de Tarragon (1989: 158); 'each one on it (= the roof)': Levine and de Tarragon (1993: 112). Del Olmo (1992a: 83): '*ad libitum*'. Pardee (2000: 151): 'as his heart dictates'.

is desacralized; at sun-set the king is desacralized. And they shall ar[ray] him in fine clothes and shall wash his [face]. They shall r[et]urn him to his pa[lace], and when he is there, he shall r[aise his] hands to heaven.

KTU 1.43: Sacrifices and Votive Gifts in Palace Rituals

(KTU 1.43 = CTA 33 = UT 5 = RS 1.005)

Select Bibliography

Dietrich, Loretz and Sanmartín 1975–76; de Tarragon 1980: 98-107, 1989: 161-65; Xella 1981: 86-90; de Moor 1987: 168-71; del Olmo 1992a: 190-97; Pardee 1993a, 2000: 214-64, 2001a: 70-74.

A series of offerings, sacrificial and votive, to accompany various cultic processions within the palace precinct.

1.43 R 1 When Athtart-of-the-Window[1] enters the pit[2] in the royal palace, pour a libation[3] into the pit[4] of the

1. Ug. *ḫr*. Dietrich, Loretz and Sanmartín (1975f: 526) and de Tarragon (1989: 161): 'of the cavern'; cf. del Olmo (1992a: 191): 'of the tombs' (*ḫr*, Heb. *ḥôr*). 'Of the Hurrians': Nougayrol (1968a: 56) and Xella (1981: 87). Cf. Pardee (1993a: 302). Puech (1993) argues convincingly that this is the goddess encountered elsewhere, at Shuksi (RS 18.01.3, 6) and Baniyas, in Memphis and Seville, as 'Ashtart of the Window'. The iconographic motif of the goddess at the window is a frequent theme in IA Levantine ivories, and may lie behind the (ritual?) appearance of Jezebel at the window in 2 Kgs 9.30. Her act recalls the 'window of appearances' which is a feature of many Egyptian temples. See an example from Nimrud in Moscati (1988: 410).

2. Ug. *gb*. Cf. Heb. √*gbb*, *gēb*, *gōb*, Akk. *gubbu*. Many leave untranslated. Pardee (1993a: 302) translates 'the 'mound'(-room)'. Heb. *gab* has the sense of 'mound' as used in a cultic context in Ezek. 16.24, 31 and 39. Independently, Pardee (1996: 274) explains the ritual use of a large pit in the palace in royal funerals. Following my translation, is this perhaps the same pit? 'The goddess enters' means that the image is taken in. Puech (1993: 329): 'alcove'.

3. Ug. *'šr 'šr*. It is possible to take this as 'ten, ten' (thus de Tarragon 1989: 162). Does this mean 'two rows of ten'? Cf. 'four and four' in KTU 1.41.51. However, this leaves the sentence with no verb. It is therefore tempting to take it as verb and noun: 'serve a banquet', thus Xella (1981: 87), de Moor (1987: 169), del Olmo (1992a: 191) and Pardee (1993a: 302). Ditto, with 'libation': Dietrich, Loretz and Sanmartín (1975f: 526); Xella accepts this as an alternative. KTU 1.3 i 9 appears to fix the sense precisely. The expression recurs at KTU 1.109.5, 1.119.32-33. See *UT*, 462 §19.1932, (*'šr* II), *WUS*, 244 §2111 (*'šr* i) and *DLU*, 92 (first entry). In discussing KTU 1.48, de Moor (1970a: 310) explains *'šr 'šr* by the obscure signs following (now read by *KTU*^{2} as b gb [Rom.]) as 'DU NU (??)...which could stand for *alāk ṣalmi* (Ugaritic *hlk ṣlm*) "the coming of the statue" '; combining this with his reading of the preceding and following words he translates: 'give the tithe (*'šr*

chapel[5] of the star-gods.

1.43 R 5 Offerings[6]: a robe and a tunic, a *uškpġ*-garment; gold, three (shekels according to the) commercial (weight)[7]; a ram, an ox and three sheep[8] as communion-sacrifices, seven times to the gods, (and) seven times to Kothar.

1.43 R 10 Subsequently the two Gathru-gods[9] come into the royal chapel[10]. A shekel of gold[11] to Shapsh and Yarih; to Gathru a shekel of refined
silver; a muzzle and a lun[g] to Anat[12]; a shekel of gold

šr) of the Coming of the Statue in the House of the great gods (*bt ilm <rbm>*)'.

4. *KTU*[1] reads b*.(?) (Rasur:xx), *KTU*[2] bgb (Rom.). *CTA* [--]. Pardee (1993a: 301: [*b*.]--[.]).

5. I take it that this is in the palace, rather than a separate temple. The so-called 'Hurrian temple' is a palace chapel. Is this an allusion to it?

6. Damaged text: [[×]] *trmt KTU*[2]. Spronk (1986: 157) reads *z'tr mt*, 'marjoram of death'.

7. Ug. *tltt.mzn.drk*. I follow del Olmo (1992a: 191 and n. 98): *drkm* in KTU 4.688.8 are 'traffickers'; the √*drk* ('travel, journey') giving the extended sense of 'commerce'. Dietrich, Loretz and Sanmartín (1975f: 527) propose correcting to *dkr*, 'male animal' (see l. 19 and cf. Heb. *zākār*), and are followed by Xella (1981: 87, 89) and de Tarragon (1989: 162 and n. 72). De Moor (1987: 169): 'food for a three-day *journey*'. Pardee (1993a: 302): 'a traveler's scale'.

8. Usually ovine victims are distinguished according to sex: *š*, 'ram' or *dqt*, lit. 'small cattle', 'ewe'. The term *ṣin* is generic, as is clear from its two-gender nature in Heb. (*ṣō'n*). The *ṣin* here might be expected to be differentiated from the immediately preceding *š* (l. 9), but there were no doubt other factors (whether the sheep was weaned, the nature of its diet, whether it was horned, castrated, had borne lambs etc.) which determined its appropriateness for specific rituals.

9. Ug. *gtrm*. See Pardee (1993a: 317) for identification of this term. He suggests that it denotes Shapsh, Yarih and a god called Gathru ('Powerful') as a group of chthonian deities. This would accord with the use of a pit at the opening of the text.

10. Ug. *bt mlk*. Either 'palace' or more probably, in view of the cultic context, the chapel royal. The images of the gods are brought in procession. 'Temple of Milku': Levine and de Tarragon (1993: 99).

11. These shekels were presumably to a different standard from those identified as 'commercial' in ll. 5-6. Cf. also the term *ṭb*, 'good' applied to the silver below. A multiple system of weights and measures was no doubt open to abuse. Cf. Amos 8.5.

12. The grouping of the offerings with the appropriate deity is sometimes difficult to identify with precision. Xella (1981: 87) differs here. This problem is

1.43 R 15 to Shap[sh and Ya]rih; to Gathru two [shekels of] refined [silver]; a muzzle and a lung [to Anat]; [ ] temple, an ox and a ram[13].

[ ] to the Gathru-gods.

[ ] to the two (images of) Anat[14].

[Gath]ru-gods two males.

1.43 V 20 [ ] to the two (images of) Anat.

[ ] to *slm*[15].

[Ish]hara he clothes[16],

The king goes to fetch the gods[17].

Behind the gods he shall walk on foot[18]: the king shall walk on foot, seven times with all of them[19].

common to several ritual texts. 'A lung': cf. n. 25 to KTU 1.119.14.

13. Either the entire ritual sequence is duplicated (ll. 10b-13a = 13b-16a) or there is an extended dittography.

14. Text *l'ntm*. Lit. 'two Anats'. More likely two distinct cult-images of the goddess, perhaps from different quarters of the city. Pardee (1993a: 303): 'for 'Anatu also'.

15. De Moor (1987: 171): 'staircase' (cf. Heb. *sullām*). Cf. also Pardee (1993a: 305). Xella (1981: 89) and de Tarragon (1989: 163): 'for Salim' (Shalem: *s* for *š*).

16. Text [ ]*ḫry.ylbš*. Xella (1981: 22, 90, citing KTU 4.168.9-10) proposes [*uš*]*ḫry*. De Moor (1987: 171): 'a Hurrian garment'. De Tarragon (1989: 163) takes the king to be the subject of the verb.

17. Ug. *ilm*. 'Two gods': de Moor (1987: 171). We have seen that the pl. of *il*, *ilm* in the poetic texts, is often *ilhm* in prose. It is therefore possible that *ilm* in prose is du.

18. Ug. *p'nm*. 'Barefoot': de Moor (1987: 171). The king would normally appear in public on a litter, or in shoes designed to keep him from touching the ground when in a state of ritual purity.

19. Is this perhaps a 'beating of the bounds', a sevenfold circumambulation of the palace symbolising possession of the realm? Cf. the sevenfold march round the walls of Jericho.

KTU 1.47, 1.118 and RS 20.24: Pantheon Lists

(KTU 1. 47 = CTA 29 = UT 17 = RS 1.017)
(KTU 1. 118 = RS 24.264 + 24.280)
(RS 20.24)

Select Bibliography
KTU 1.47: Virolleaud 1929: Pl. LXX; de Tarragon 1980: 150-62; Xella 1981: 325-27; Pardee 2000: 291-319.
KTU 1.118: Herdner 1978: 1-3; de Tarragon 1980: 150-62; Xella 1981: 325-27; Pardee 2000: 659-60.
RS 20.24: Nougayrol 1968a; de Tarragon 1980: 150-62; Healey 1985.
All three texts: del Olmo 1992a: 35-65; Wyatt 1998b, 1999b; Pardee as above and 2001a: 9-12.

This appears to be a canonical list: apart from these three examples of the list, it forms the basis of KTU 1.148, a ritual text which reiterates sections of the pantheon list in a series of units. Cf. also the different names appearing in the pantheon lists KTU 1.102, 1.123 and the lists appearing in the ritual texts KTU 1.39, 41 (*qv*.), 87. See also RS 26.142 and 1992.2004. Some recent literature on individual deities listed below. On the pantheon in general see de Moor (1970a) and del Olmo (1992a: 35-65).

	KTU 1.47 Ugaritic	KTU 1.118 Ugaritic	RS 20.24 Akkadian	English
1	*il ṣpn*			The gods of Saphon[1]
	ilib	1 *ilib*	1 DINGIR *abi*	The god of the ancestor[2]

1. On the rationale of this translation (against 'the god Saphon'), see Healey (1985: 117). Saphon appears independently as a deity in l. [15] (parallels 14).

2. See most recently Margalit (1989a: 269), van der Toorn (1993; 1996: 155-60) and Healey (1995a). In the latter passage (1996: 156) van der Toorn notes that the *ilib* of the present pantheon-list may be distinct from that of the Aqhat story, being Ilaba (citing Nougayrol 1968a: 46 n. 2). Against this is the implausibility of a member of the pantheon (especially an otherwise unknown one) apparently taking precedence over El, a problem not faced in the present context if it is ancestral gods in general who have precedence over the organized pantheon. The Akk. of RS 20.24.1 is against the alternative view, though Margalit suspects that this otherwise unparalleled form is a clumsy translation of the Ugaritic.

	il		*il*	*ilum*^{lum}	El[3]

3. See Herrmann 1995a.
4. See Handy 1992a; Healey 1995b.
5. The Akk. (*šamu u erṣetum*) and Heb. (*šāmayim w*^{e}*ereṣ*) reverse this order. The expression could perhaps be translated 'the Cosmos', since heaven and earth constitute a merismic expression, containing all that lies between the extremities. The *arṣ* has overtones of the underworld, rather than simply 'earth' as the place on which people live. 'Heaven', or in this DN context, 'Sky'. I have preserved 'heavens' in all poetic contexts despite Davies' plea (1995: 123). No one is going to read Christian sentiments into a Canaanite heaven!
6. The form is pl.: Nougayrol (1968a: 63, transliterated as *sasuratum*) and Pardee (1995: col. 916). The form *šassuratu* also appears in Akk. (Becking 1995b: col. 1617). The form *šš̄rt* occurs at KTU 1.5 v 3, but seems to have no links with the DN.
7. See Pardee 1995.

17. See Wiggins 1996.

18. See Becking 1995c.

19. See J. Day 1992a, 1992b; Wyatt 1995d.

20. 'The gods who help Baal'. We would expect these to be Baal's assistants (cf. KTU 1.5 v 8-9).

21. See Nougayrol 1968a: 57. He links the Akk. form with Ninegal and Tešup. Lit. 'the gods who help Baal'. See also del Olmo 1992a: 57; M.S. Smith 1992; Rouillard 1995.

22. See Fulco 1976; Handy 1992b; Xella 1995a.

23. It is significant that the sea-god, usually construed as the principle of Chaos, is, as a god, presumably amenable to influence through the cult. Thus he receives a ram in KTU 1.46.6 and 1.148.9. Not so Mot, who is absent from all ritual texts. Yam is in some respects a Semitic Poseidon, though also cognate with Gk Typhoeus-Typhon (Wyatt 1995a).

24. See Nougayrol 1968a: 58.

25. See Wyatt 1995e. In RS 26.142.6 Nougayrol (1968a: 321) identified $^{il\,is}$ *zannaru* as 'Lyre'. The syllabic text is read as $^{d\,giš}$ZA.MUŠ by del Olmo (1992a: 52 n. 65) and corresponds in turn to Akk. *sammû*. See also Gurney (1968: 229-30, U.7/80 rh ll. [0], 13, 20). Does this perhaps lend some further circumstantial support to my explanation of *ṯtmnt* in n. 155 to KTU 1.15 iii 12?

26. See Puech 1995. See also at KTU 1.161.11 and n. 23.

27. See Huffmon 1995.

KTU 1.65: A Prayer for the Security of Ugarit

(KTU 1. 65 = CTA 30 = UT 53, 107 = RS 4.474)

Select Bibliography

Dhorme 1933; Obermann 1936; Virolleaud 1939; Aistleitner 1955; Dietrich, Loretz and Sanmartín 1975e; Dietrich and Loretz 1981; Xella 1981: 209-15; del Olmo 1992a: 228-29, 1992d; Aboud 1994: 186-88; Avishur 1994: 308-29; Holloway 1998; Wyatt 1998a: 858-59; Pardee 2000: 364-85, 2001a: 16-18.

A liturgical prayer addressed to the gods, but invoking in particular El (or, problematically, Baal), and seeking divine favour for the protection of the city. Cf. KTU 1.119. The invocation of the divine weapons is particularly interesting (see del Olmo 1992d) in view of the discovery of Mari text A 1968 and its implications for royal ideology and the Baal Cycle. (On this and other material see Durand 1993, Watson and Wyatt 1997 and Wyatt 1998a.)

1.65 R 1 'Gods of[1] the pantheon[2],
family of the gods,
assembly of the gods;

Thuk[!]amun[3] and Shanim,
1.65 R 5 El and Athirat!

Be gracious, El[4]!

1. The translation above takes this to denote a specific group among the gods, *il* being cs. pl. The whole tricolon is an invocation: 'O . . . '. Hence absence of definite article in translation. (Similarly in subsequent lines.) Cf. usage of ll. 2, 3 below, and Dietrich, Loretz and Sanmartín (1975a: 523: perhaps a determinative use of *il*?) on comparison with KTU 1.40.41, 1.40.42 and reconstructions elsewhere in text. Or possibly 'El, the sons of . . . ' (cf. Avishur 1995: 310). Xella's translation (1981: 210), 'the gods, sons of El', is less satisfactory.

2. Ug. *bn il* is best construed simply as 'the gods' outside mythological contexts. The context requires 'the pantheon' for stylistic reasons.

3. Text: *ṯrmn*. Correct to *ṯkmn*.

4. Ug. *ḫnn il*. Or: 'El is gracious', cf. Dietrich, Loretz and Sanmartín (1975a: 524) and Avishur (1995: 310, 313). Avishur treats all three qualities in this tricolon as epithets. My translation treats them as hypostases, invoked and functioning almost as imper. verbs. Cf. Obermann (1936: 44) and Aistleitner (1955: 3). 'Be gracious, God!' (addressed to another god, such as Baal) is equally possible, especially given ll. 10-15.

Help,[5] El!
Peace, El!

El, hasten!
El, succour![6]

1.65 R 10 lower edge For the sake of[7] of Saphon,
for the sake of[8] Ugarit!

1.65 V By the divine spear[9];
by the divine axe[10];
by the divine mace[11];

1.65 V 15 by the divine *dṯn*-weapon[12];

5. Ug. *nṣbt*. 'Help': del Olmo (1992a: 228).

6. Ug. *il ḫš il add*. Del Olmo's suggestion, 'the god of divine (Mount) *Ḫš*, *Adadu*' (1992d: 255) gratuitously introduces an otherwise unattested name for the divine mountain. Cf. del Olmo (1992d: 229): 'the god *Ḥaṣu*, the god *Adadu*'. Reading *add* as *hd*(*d*) (reflecting Akk. spelling or pronunciation?). Avishur (1995: 310): 'El, hasten! El, save!', taking *ḫš* as related to Heb. *ḥwš*, *ḥyš*, Akk. *ḫašu*, 'hasten', and *add* as related to Ar. √*'dy*, *'dw*, 'succour' (citing Dhorme 1933: 233). This seems to me to make a better overall sense of the text, though it raises interesting problems on the identity of the god addressed as *il*. Is it El, or Baal, who is credited with the weapons in ll. 12-14?

7. Following Avishur (1995: 310, 315). Text *b'd*. Many correct to *b'l* (e.g. *KTU*[2]). The question is whether the following *b'l* should also be read as *b'd* (as by Avishur, citing Obermann [1936] in support).

8. See previous note. Reading *b'd*, 'on behalf of Ugarit', as by Avishur (1995: 310). Or is this an apostrophe to Baal, 'O Baal of Ugarit', or even one to El, 'O lord of Ugarit'?

9. Ug. *mrḥ*. (Eg. *mrḥ*, Heb. *rōmaḥ*, *UT*, 437-38 §19.1547). Avishur (1995: 310, 316): 'excellence' (citing Ar. *mrḥ*, 'pride, conceit').

10. Ug. *nit*. Identified by Xella (1981: 214) with the bronze or copper weapon *ni-it*, weighing 1 me (100 shekels: the noting of its weight indicates its metallic nature) mentioned in RS 20.235.13 (Nougayrol 1968b: 178-79). The same term is written more fully in RS 19.23.1, 5 and 19.135.2 as *ni-'i-tu qâtê* ^{MES}. See also del Olmo (1992d: 256 n. 13). Avishur (1995: 310, 316): 'praise' (Heb. √*nwy*, *nyh*, Ar. *nwt*).

11. Ug. *ṣmd*. Cf. at KTU 1.2 iv 11 etc.. The √*ṣmd* means 'to bind', and so may mean either an axe or a mace, on which the head is *bound* to the haft. As separate from *nit* in l. 13, I take it to be a mace. Avishur (1995: 310, 316): 'eternity' (Ar. *ṣamada*).

12. Identified as 'a weapon(?)' by Dietrich, Loretz and Sanmartín (1975d: 524). Xella (1981: 214) notes the √*dṯ*, 'crush, trample' (*WUS*, 83-84 §803). On this basis this is the fourth weapon in a series. It is taken as a form of offering by del Olmo

by the divine burnt-offering;
by the divine perpetual offering[13];
by the divine *ǵdyn*-offering[14];
by the divine...[15]'

(1992a: 229), who considers the text to deal in groups of three. Cf. Heb. *dešen*. Avishur (1995: 310): 'force'.

13. Cf. Dietrich, Loretz and Sanmartín 1975a: 524; Xella 1981: 214; del Olmo 1992a: 229. Akk. *kinātu*, *kinūtu*.

14. *WUS*, 246 §2134: 'offering at dawn' (Ar. *ǵadāt*, 'early morning'). Occurs as a PN: *UT*, 463 §19.1948, *DLU*: KTU 4.63 i 4). Dietrich, Loretz and Sanmartín (1975a: 524): 'thing'. Cf. del Olmo (1992a: 229 n. 26).

15. Aistleitner (1955: 91 n. 2): [*i*]*l* [*nd*]*d*. *CTA*: [b]n - -. *KTU*^{2}: [b *ṣ*]d [i]l, now lost (p. 91 n. 2). This list of cultic items on the verso is invoked as evidence of divine concern for the city, functioning almost as minor hypostases.

KTU 1.78: An Astronomical Text

(KTU 1.78 = UT 143, 1162 = RS 12.061)

Select Bibliography

Virolleaud 1950: 25-27, 1957: 189-90; Sawyer and Stephenson 1970; Dietrich, Loretz and Sanmartín 1974; Xella 1981: 171-73; Jong and van Soldt 1989; Walker 1989; Seitter and Duerbeck 1990; del Olmo 1992a: 235; Pardee and Swerdlow 1993; Pardee 2000: 416-27, 2001a: 130-31.

This text appears to record a total eclipse of the sun at Ugarit. It has been identified as occurring on the following dates: 3 May 1375 (Sawyer and Stephenson; Dietrich, Loretz and Sanmartín), 5 March 1223 (de Jong and van Soldt). Not an eclipse: Pardee and Swerdlow. To some extent the theory has determined the translation, so alternatives are given.[1]

1. Here is a selection of published translations:

Virolleaud:	During the six days of the new moon of Ḫiyar, the Sun-goddess set, her porter being Reshef. Therefore the servants will kill (or: expel) the intendant (or: governor). (Reading in l. 5: *w'*$^{(?)}$*bdm tbqr*$^{(?)}$*n*.)
Sawyer and Stephenson:	The day of the new moon in the month of Ḫiyar was put to shame. The Sun went down (in the day-time) with Mars in attendance. (This means that) the overlord will be attacked by his vassals.
Dietrich, Loretz and Sanmartín:	The day of the new moon of the month Ḫiyar was disgraced. The sun went down, Reshef was her porter. The livers have been examined: danger! (Reading in l. 5: *kbdm tbqrn*.)
Xella:	The day of the new moon (of the month) of Ḫiyar was disastrous. The sun (or: Shapsh) set; its (or: her) porter was Reshef. Two livers were examined. Danger!
de Jong and van Soldt:	On the...day of the new moon in (the month of) Ḫiyaru the Sun went down, its gate-keeper was Reshef. Two livers were examined: danger!
Seitter and Duerbeck:	In the quiet (or: sixth hour, or: sixth day) of the day of the new moon of (the month) Hiyar the sun set; her porter was Reshef (Mars). So a liver (or: two livers) was (were) examined: there is danger(?).
Pardee and Swerdlow:	During the six days of the (rituals of) the new moon of (the month of) Ḫiyyāru, the sun set, her gatekeeper (being) Rashap. The men(?) shall seek out the prefect. (Reading for l. 5: [*wa*]*dm*[.]*tbqrn*.)

1.78 R 1-4 At the sixth (hour[2]) of the first day of Hiyyar[3] the sun set, her attendant being Mars[4].

V 5-6 Livers[5] were examined: beware[6]!

An alternative translation:

1.78 R 1-4 The first day of Hiyyar was put to shame[7]: the sun set, her attendant being Mars.

V 5-6 Livers were examined: beware!

2. If (*b*)*ṯṯ* means 'six' (it cannot mean 'sixth' in ordinal usage, which is *ṯdṯ*) rather than shame', it cannot refer to the sixth day if it is a matter of an eclipse. Hence 'hour' supplied as by Seitter and Duerbeck. We have no indication of the numbering of hours in Ug. (or Heb.), but may note that it is possible that the ordinal is not used, while it might be expected to be with days (cf. French: à six heures, au sixième jour).

3. The month Hiyyar (*ḫyr*) fell in April–May according to Olivier (1971, 1972), accepted by Cohen (1993: 378), but revised to February–March by de Jong and van Soldt (1993: 71).

4. Ug. *ršp*. Reshef, identified with Nergal, was the planet Mars. On the dating of Sawyer and Stephenson (1970: 471) the red star Aldebaran was misidentified as the red planet Mars, which would be cause for comment.

5. Various readings proposed: *kbdm* (as above, pl. rather than du. or sg.), 'livers': '*bdm*, 'servants', *adm*: 'men'. A certain reading is impossible.

6. Ug. *skn*. Lit. 'danger!'. As can be seen, this is variously translated. There are two lines of interpretation: (1) *skn*, a political figure (cf. Heb. √*skn* I: *sōkēn*, 'steward'; (2) (followed here) *skn*, √*skn* II: 'incur danger'. The verso (ll. 5-6) must somehow represent an adequate response to the event described in ll. 1-4. It seems that some crisis is involved, which does not seem to be adequately represented in Pardee and Swerdlow's approach. A heliacal setting of Mars hardly seems to constitute a particular crisis. An eclipse does.

7. This is to take *bṯṯ* to relate to √*bwṯ*, 'to shame'. Alternatively: 'was delayed' (as in Exod. 32.1 cited as *bwṯ* polel in BDB; Syr. *būṯ*, Akk. *bāšū*). This would mean that any putative eclipse took place at dawn.

KTU 1.83: A Goddess Confronts a Dragon

(KTU 1.83 = UT 1003 = RS 16.266)

Select Bibliography
Virolleaud 1957: 12; Oldenburg 1969: 198-99; J. Day 1985: 15-16; de Moor 1987: 181-82; de Tarragon 1989: 28-30; Parker 1997: 192-93; Pitard 1998a.

Fragment of text which was originally the right-hand column of a larger composition. Classified as mythological by Virolleaud, but as an incantation by de Moor. It is generally agreed to relate to Anat's confrontation with a dragon. Published translations vary widely, indicating the difficulty of the text. The following attempt is entirely provisional.

1.83 R 1 [ ]
[ ] god[1] [ ]
[It ca]me out[2] of the underworld.
With (its) talons[?3] it turned the sea to foam[4],

1. Or: 'El'.

2. Text [ ]*un*. Usually restored [*ṯṣ*]*un* (√*yṣa*). I take *tnn*, the dragon of l. 8, to be the subject, and accordingly read [*yṣ*]*un*.

3. A guess. Or: 'fangs'? Ug. *mḫnm*. Virolleaud (1957: 12) followed by Oldenburg, Day, de Moor, Gordon (*UT*, 432 §19.1455) and Aistleitner (*WUS*, 181 §1545) took this to be the biblical toponym Mahanaim. Rejected by Caquot (1989: 29 n. 41), who tentatively suggests a link with Ar. *maḫana*, 'draw water'. I have construed it as follows: It seems to me that it is part of the dragon's body (cf. the tongues and tail of the following cola); Heb. √*ḥnh* gives *ḥᵃnît*, 'spear head', used in Ps. 57.5 as a metaphor for the teeth of a lion. A possible link? Another approach is to note Ug. √*ḫnn*, which appears in KTU 2.15.9-10 in the expression *anḫnnn w iḫd*, 'I shall ...it/him and shall seize (it/him)'. This suggests an act of some kind of violence. Perhaps a D stem (*m-* pt. prefix). Cf. Heb. *ḥānan* II, 'be loathsome'? (But the Heb. pi. takes dat.: Job 19.17.)

4. Ug. *'rp*? Thus *KTU*[2]; n. 1: 'read *ṯrp*?'. Cf. l. 6. While the doubt cannot be entirely settled, I am inclined to read *'rp* and *t'rp* in ll. 4 and 6 respectively. Note J. Day (1985: 15 n. 36). See also Virolleaud (1957: 12 §3) for transcription. Day translates 'swirled (?)'; 'caused to spurt': Caquot (1989: 29), both taking the sense as I do from Heb. *'rp* II, 'to drip', from which the n. *'ārîp* 'cloud' is derived. Cf. also Ug. *'rpt*, perhaps Heb. *ʿᵃrābôt* 'clouds' in Ps. 68.5, though this is often corrected (see *BHS* app.). 'Break the neck': de Moor (1987: 182 reading *'rp*; *t'rp*, de Moor and Spronk 1987: 74). For this sense cf. Heb. √*'rp* I, denom. vb., 'break the neck'. But if the dragon is an aspect of the sea, the opposition between the dragon

1.83 R 5 with its tongues it licked the sky,
with its tails[5] it turned the sea to foam[6].
She set the dragon[7] up on high[8],
1.83 R 10 she bound it in the heights of Lebanon[9].
...[10]

and the sea implicit in this translation is unlikely.

5. All three terms, *mḫnm*, *lšnm*, *ḏnbtm* ('talons... tongues... tails') end with *m*. I have taken this to be the adv. *m* of instrumental use (X*m* = with an X). 'Tongues' I have taken as pl. with adv. *m*, since the dragon is conventionally represented as having seven heads (and therefore seven tongues). Whatever *mḫn*(*m*) means, it is presumably du. or pl. The tails could be du., and construed as the subj. of the preceding vb *ṯṯrp*.

6. It would be tempting to distinguish the vbs in the cola of ll. 4 and 6, but there is no compelling reason to do so.

7. Text *tnn*, not *tan*. Cf. *KTU*^{2}.

8. Ug. *lšbm*. Not 'muzzle' but 'set on high'. See n. 48 at KTU 1.3 iii 40.

9. Text *lbnn*, rather than *lbnt* of *KTU*^{2}. This would indicate a different recension altogether of the dragon-slaying, since in the Baal cycle the entire tradition is set on Mt Saphon (Wyatt 1995a; 1996b: 34-44). Is the dragon finally placed somewhere on Mt Lebanon itself? This would make an interesting comparison with the gist of my argument in Wyatt (1995a), in which I opined that Mt Saphon was itself the corpse of Yam. Another possibility is to see this as an intermediate stage in the proceedings (the narrative does not end at this point), and to conjecture that the goddess subsequently set the dragon among the stars, the final destination of so many assorted characters in Gk tradition, perhaps as the prototype of the constellation Draco. Perhaps it should be noted in favour of this proposal that the only other prepositional form with *mṛym* is *bmṛym* in KTU 1.3 iv 1, which suggests that the present *lmṛym* has some other sense, such as 'above the heights of...'.

10. No certain sense can be gleaned from the increasingly fragmentary ll. 11-13. Cf. de Moor (1987: 182) with Caquot (1989: 30). An important new study by Pitard completed after this volume went to press (1998a: my thanks to Wayne Pitard for sending me a copy and allowing me to cite this) offers some modifications to the understanding of the beginning of the text, and now achieves a reading for the last lines. This translation of these reads as follows:

> Toward the desert (or: Dried up) Shall you be Scattered, O Yamm!
> To the multitudes of Ḫt, O Nahar!
> You shall not see (or: Indeed you shall) see;
> lo! you shall be parched! (or: lo! you shall foam up!)

KTU 1.92: The Myth of Athtart the Huntress

(KTU 1.92 = UT 2001 = RS 19.039 + 174[12] + 174[51])

Select Bibliography
Virolleaud 1965: 3-5; Herrmann 1969; de Moor 1985a; Margalit 1989b; de Tarragon 1989: 31-36; Dijkstra 1994.

A mythological fragment. It seems that when Athtart returns from a hunting expedition, Baal attempts to seduce her. Dijkstra has identified further fragments to augment this text. The goddess Athtart remains elusive at Ugarit, appearing generally in association with Anat. This is the only mythological text so far discovered in which she appears independently. The Eg. myth of Astarte and the tribute of the sea (Ritner 1997) offers tantalizing parallels to the events associated with Anat in KTU 1.3 iii 38–iv 3 (especially iii 39-42), and if witnessing a West Semitic tradition suggests that the two goddesses are conceptualized in very similar ways. This may partly explain why the two goddesses appear to undergo a form of syncrasia, emerging in the latter part of the first millennium as Atargatis (the 'Dea Syria' of Lucian's work).

1.92 R 1 Belonging to Thabil[1].
Athtart [went out] to hunt[2],
she went out into the wilderness[3] [ ]

1. The owner, rather than the writer, of the tablet. Evidently a 'personal scripture'.

2. The hazards of restoring missing text are evident from the different suggestions for filling this lacuna: [*t ilm*], 'of the gods': Herrmann (1969: 7-8) and Caquot (1989: 32); [*t ṯṣdn bšdm*], 'scoured the fields': de Moor (1985: 225); *ṣwd* [*ṯṣd*], '[went a-]hunting': Margalit (1989b: 71, 75); [*ṯṣdn ayl*], 'went hunting for a deer': Dijkstra (1994: 116). There is room only for at most four signs. No allowance may be made for script on the edge (as on the reverse) since it is entirely missing, and therefore conjectural. Dijkstra's drawing (p. 114) overestimates the amount of available space to the right of the break. I follow Margalit's suggestion.

3. Ug. *mdbr*. Normally 'desert'. 'Steppe': Herrmann (1969: 8); Caquot (1989: 33); 'grazing-land': Margalit (1989b: 71). But this is rather *šd* (Heb. *sadê*), high grass and scrubland. 'Desert' of course is a relative term, the more arid zone of the steppe. Here it is evidently adjacent to an oasis. Cf. Margalit (1989a: 75), who notes the parallel *šd, mdbr* at KTU 1.14 ii 50–iii 1, iv 29-31. There is no need to follow him in identifying the marsh of the present text with Shamak (cf. Sema-

[[4]... were renewed[5]
and the cres[cent moon[6]]
1.92 R 5 And the [lower[?]] deep[7] poured out[8] upon [ ]
[ ] came out of its swamp[9] [ ]
She[10] desired[11] [ ];
her spear against the noble [beast[?]].
Athtart remained[12] in the swamp;
[on her right[?13]] she placed...
1.92 R 10 on her left...[14]

chonitis = Hule) of KTU 1.10 ii 9. Cf. however 'Thamaq' of KTU 1.22 i 8 (though this appears to be a PN), and the location of the raw materials for the bow in KTU 1.17 vi 23 and n. 106.

4. Dijkstra (1994: 116), suggests 'the stars' ([*kbkbm*]), but it would not fit.

5. 'She polished': Margalit (1989b: 70-71, 75-76), restoring [šbr mrḥh] before it: '[the tip of her spear] she polished'. Margalit's extensive reconstruction, based on prosodic and alliterative principles, is too confident.

6. Text: *hl* [*l*]. Or perhaps El[lil]? Cf. n. 6 to KTU 1.24.6. The moon would make a good parallel to the stars proposed in the previous colon (n. 4); Enlil-Ellil—the Mesopotamian storm-god—would make a good parallel to the idea of waters pouring down in the following colon. Certainty is impossible.

7. There were two deeps (*thmtm*): one beneath the earth, the other above the firmament. Cf. Gen. 1.7.

8. Ug. *tglṯ*, cf. Heb. *glš*, 'seethe' (Tuell 1993; Dijkstra 1994: 118). Cf. Herrmann (1969: 5). De Moor (1986): 'snow' (cf. del Olmo 1981a: 532 and refs.), of the upper deep. 'Boiled up': Margalit (1989b: 71), of the lower deep. Since the location for the events of the narrative is a marsh, I take it that the latter option is preferable: the marsh would be the result of ill-draining springs rather than heavy rainfall.

9. Or: 'its lair'? Ug. *ǵl*, cf. Ar. *ǵîl*, 'swamp, thicket'. On the construction see Dijkstra (1994: 118).

10. Or: '[Athtart] desired': Dijkstra (1994: 117)? Or: 'her spear' (*mḥrh*) as subject of the vb? The n. is f. Any reconstruction of the syntax is provisional.

11. Reading *tḥmd*. Margalit (1989b: 70), reads a word-divider: *tḥm* (.) *d*[ ], appealing to Virolleaud (1968, 3: *tḥm b*[ ]) and *KTU*[1]. Both leave a space. *KTU*[2] runs the letters together. Consequently Margalit renders 'the *swamp/zone* wherein [buffalo graze]' (*tḥm*(.) *d* [r'y.rumm]).

12. Or: 'sat' (Ug. *ṯṯb*), presumably to hide from her quarry.

13. Restoration suggested by de Moor (1985a: 9; also Dijkstra 1994: 117). *Ymn* || *šmal* is a standard word-pair (*RSP*, I 206 §ii 240).

14. The terms untranslated in these cola are *qrẓ* and *trbḫ*. De Moor suggests that these are the names of Athtart's hunting dogs ('Gnawer', Syr. *qrṭ*, and 'Barker', √*nbḫ* > *nbḥ*). Dijkstra proposes 'Mosquito', 'Locust', the smaller fauna of the

She lifted up her eyes and [looked]:
a hind she espied[15],
a bull she sa[w[16]] in the po[o]l.

Her spear she sei[zed in her hand],
her lance[17] in her right hand.

She threw [the spear] at the bull;
she brought down[18] the drinking animal[19].

[She return]ed to [her] house[?20].

1.92 R 15 The Bull her father, El, she gave to ea[t]

[and she] fe[d (him)][21];

she fed Yarih,
[his] gullet [ ].

region: (1994: 119). Margalit (1989b: 71) renders '*acacia*-shrubs...ARBḪ-bushes', citing Ar. *qaraẓ*, Syr. *qeraṭa*, 'acacia' (specifically *prosopis farcta*), and interpreting *arbḥ* (*sic*) by analogy. On this approach, Athtart appears to construct a hide.

15. See Dietrich and Loretz (1968: 309) and de Moor (1985a: 227). Contrast Margalit (1989b: 79). The apparent parallel 'hind', 'bull' constitutes a curious word-pair. See next note.

16. Ug. *ṯr.ʾn*[. De Moor reads 'the gaze of her eye [a gazelle...]', adducing a √*ṯwr* on the evidence of KTU 1.3 v 13 (!) and Heb. *šwr* II. While conjectural, this avoids the awkward word-pair 'hind || bull'. Margalit's reading (1989b: 79: with an appeal to *KTU*[1]) is frustrated by *KTU*[2].

17. Ug. *šbr*: 'lance': Margalit (1989b: 71, 75), citing Akk. *šibirru*, 'stick, staff'. Cf. Caquot (1989: 34 n. 62). De Moor (1985: 227), cites his earlier article (1979: 645).

18. Ug. *tšpl*: tentative reading. See de Moor (1985a: 227): √*špl* D or √*npl* Š.

19. Reading *bʿl ʿbb*[ ], 'the drinking one'. The final *b* could be *d* (Virolleaud, 1965: 3; *KTU*[1]). Margalit (1989b: 71, 80), reading *tšpl.bʿl.ʿbd* [il], 'she felled Baal, [El's] servant', interprets this in the manner in which KTU 1.96 was understood before del Olmo's study (1992c), as an act of omophagy. Thus Athtart kills Baal (in the form of a bull) and feeds him (raw!?) to the other gods. Cf. KTU 1.6 v 19-25, vi 10-11. But in view of the verso of the tablet (not treated by Margalit in his article), which appears to describe Baal's attempt to seduce Athtart, this is improbable.

20. The sequel in l. 14 of the tablet, [*tṯ*]*b.lbt*[*h*], Dijkstra (1994: 115), followed by *KTU*[2], corresponds to a further fragment, RS 19.174 [12], which Dijkstra tentatively suggests belongs at this point.

21. Dijkstra (1994: 117), *KTU*[2], add [*wt*]*šlḥ*[*m*], 'and she fed (him)', again based on RS 19.174 [12]. Cf. Jacob (*alias* Esau) feeding his father in Gen. 27, and Kothar's exhortation to Aqhat to offer sacrificial gifts from his hunt (KTU 1.17 v 37-39).

Ko[thar the cra]ftsman.
Hasis [ ]
...Athtart

(Ll. 19-22 missing)

1.92 V 23 [ ] the guardian of the vineyard
[ ] her father, the vineyard...
1.92 V 25 [ ] a shift[22] of linen,
[ ] an aegis[23] of cypress[24]...

magnificence like the stars[25].

When the Virgin[26] had changed,
Baal desired her;
1.92 V 30 the Mighty One[27] would possess her beauty.

Valiant Baal wished to go down to her[28],
he...[29] [ ] the...[30]

22. Cf. de Moor's suggestion (1985a: 229): 'veil'—√*ḥtr*, 'to make a hole'. Dijkstra (1994, 117): 'chemise'.

23. Ug. *ušpġt*: de Moor (1970b: 311; 1985a: 229), takes it to be 'a piece of mail'. The aegis was originally a protective garment. On its Near Eastern origins see West (1995: 139-42). His findings would lead us to expect a feathered garment.

24. Ug. *tišr* is cypress wood (de Moor 1985a: 229 and refs.).

25. Ug. *kbkbm...kbkbt*: lit. 'male stars...female stars'. Stars frequently represent gods and goddesses. Is the expression a periphrasis for 'divine splendour...divine magnificence'?

26. Ug. *btlt*. The form [ ]*tlt* appears on the new fragment RS 19.174 [51] (Dijkstra 1994: 114; *KTU*[2]). The epithet is given elsewhere most frequently to Anat, with whom Athtart has a close relationship. See n. 7 to KTU 1.3 i 15. See however the occurrence at KTU 1.15 ii 27 (and n. 149 *ad loc.*) where most scholars restore '*nt* in the gap, but I argue that it is *rḥmy*, *alter ego* of Athirat. Cf. the ideological dimensions of the terms *ġlmt* (n. 99 to KTU 1.2 i 13) and *mṯt* (n. 167 to KTU 1.15 iv [3]).

27. Ug. *dmrn*. Cf. n. 161 to KTU 1.4 vii 39.

28. Does this mean 'he would enter her'? Hardly de Moor's (1985a: 228) 'into the earth'.

29. Ug. *šmḫ*[: **šmḫ*['], 'he heard': de Moor (1985a: 228); **šm*[*ḥ*] [*sic*: read *ḫ*], 'joyful': Caquot (1989: 35); 'was pleased': Dijkstra (1994: 121).

30. Ug. [ ] *rgbt*. 'she was afraid', de Moor (1985a: 228); Dijkstra (1994: 121 [Ar. *raǧaba*]); 'Lumps of earth' (Heb. *regeb*), Caquot (1989: 35).

...
...
...[the gu]ardian [ans]wered him[?]:
'The city is guarded [against] your [fle]sh[?][31]
Do not give us [ ].'

1.92 V 35 ...
...[32]
[the Chariot]eer of the Clouds,
[wi]ne and portions of fish,
[ ]for Valiant Baal,
[ ]for the Charioteer of the Clouds.

31. Sc. Baal's penis: cf. KTU 1.24.9 and n. 11 *ad loc.* 'The city' is perhaps a metaphor for Athtart's chastity, as may be that of the vineyard, its guardian being her legal protector.

32. L. 36 reads: [ ]'*lthwyn* (no word-dividers). Read as [*b*]'*lth wyn*, 'his lady and wine', by Herrmann (1969: 9) and de Moor (1985a: 228); as [ ]'*lth wyn*..., 'at the time of his going up, and he...', by Caquot (1989: 35); as [*p npš npš*] *b'l thwyn*, '[if the desire] of Baal graves [*sic*: read craves] for [a living being]' by Dijkstra (1994: 118).

KTU 1.96: A Spell against the Evil Eye

(KTU 1.96 = RS 22.225)

Select Bibliography

Virolleaud 1960; Astour 1963, 1967: 180-81, 1988; Lipiński 1965; de Moor 1979: 647-48, 1987: 109-10; de Tarragon 1989: 40-44; Walls 1992: 210-15; del Olmo 1992a: 255-59, 1992c; Lloyd 1994: 288-300; Lewis 1996b; M.S. Smith in Parker 1997: 224-28; Ford 1998, 2000.

After adventurous but misdirected early interpretations, based on the supposition that the initial *'nn* is an error for *'nt*, 'Anat', the understanding of this text has been put on the right track by the studies of del Olmo. (See first note.) The verso of this tablet is in Akkadian (bibliography in *TEO*: 284, 455; *KTU*^{2}, 111). For a spell against eye-diseases see RS 20.06 (Nougayrol 1968a: 64-65). Marvin Pope had intended before his untimely death to champion the old reading *'nt*[!] in l. 1, with a consequent reappraisal of the new line taken here.

1.96 R 1 The Evil Eye[1] roves about,
and disfigures[2] the beauty of its brother[3]

1. Ug. *'nn*. All earlier interpreters corrected text to *'nt* (cf. *KTU*^{1}, contrast *KTU*^{2}), on the supposition that the text treated Anat's ritual consumption, gastronomic or sexual, of Baal. 'Evil eye': del Olmo (1992a: 9). Del Olmo's study rendered all previous discussion obsolete. Marvin Pope's new position (above) was that the two final strokes of the *n* are overwritten across the word-divider (that is subsequent to it), and therefore constitute a correction. He argued that we should accept the original text (sc. *'nt*) in preference to the correction (*'nn*). I would, assuming the premisses for the sake of argument, argue the reverse, that the corrected text is what the scribe considered to be the correct text. It seems that the controversy will continue. (My thanks to Marvin Pope for discussing this with me.)

2. Ug. *šnwt*: √*šny/w*, 'change', Heb. *šānâ* I. For the pejorative nuance see Lloyd (1994: 289 n. 106). Wilfred Watson draws my attention to Eg. *šnt*, 'spell, conjuration', *šni*, 'exorcise' (derived no doubt from *šni*, 'surround'). See Faulkner (1972: 268). But the sense of the present passage is negative.

3. This is the other eye of the pair: earlier interpreters took it to refer to Baal. It is odd that *'nn*, f., should have a 'brother', but perhaps this is in the nature of the complementarity of two eyes (sc. 'brother and sister'), rather than a weakness in del Olmo's approach, as suggested to me by Marvin Pope. Note that the vbs of which *'nn* is subj. are in f. (*hlkt*, *šnwt*, *tspi*, *tšt*), while the 'brother-eye's' vb is m. (*ysmsm*).

and the grace of its brother,

even though (the other eye be) in perfect health[4].

It eats (the other's) flesh without a knife,

1.96 R 5 it drinks (the other's) blood without a cup[5].

The eye of the wicked man[6],
the eye of the wicked woman,
they[7] approach[8].

They approach the eye of the tax collector[9],
the eye of the potter[10],
the eye of the gatekeeper.

May the eye of the gatekeeper return to[11] the gatekeeper;

4. Lit. 'be very beautiful'.

5. There is no warrant for ideas of omophagia here (e.g. Astour 1963; 1967: 180-81; 1988), nor for sexual nuances (Lipiński 1965). The point of the metaphor is rather that a lack of table manners is socially destructive (Lévi-Strauss!). The evil eye affects its healthy partner, and finally destroys it.

6. Del Olmo compares the expression *'n bṯy/t* with Sum. igi lù níg.ḫul dím.ma, Akk. *inu lemuttu*, 'eye of the evil man' (cf. Thomsen 1992).

7. 'They' in ll. 5, 7, du.: the evil eye (one each) of the wicked man and woman.

8. Ug. *tpnn*, D 3 du. In the Akk. spell cited by Thomsen (1993: 23) (TCL 16, 89: 3-12 [A] = BL 3, 3-9 [B]), the eye 'approached' (*ba-te*) various victims. Virolleaud (1960), followed by Caquot (1989: 43 and n. 95), construed as √*pny* (Heb. *pānâ*), 'to approach'. Alternatively, 'bring confusion'. For this approach cf. 'distort': del Olmo (1992a: 9, 11); 'corrupts': Lloyd (1994: 290, 291 n. 113). They cite Ar. *fanna*, 'deceive, confuse, *fannana*, 'diversify, confuse'. Cf. Heb. *pānâ* piel? Confusion represents chaos, as in the Babel story. Others cite Heb. *pānâ* qal (e.g. Caquot 1989: 43 n. 95).

9. Evidently taxation was already the bane of civilized life.

10. 'Tax collector...potter': Ug. *mḫr*, *pḫr*. Individual victims of the effect of the evil eye are required, rather than the collectives ('meeting...assembly') proposed by Lloyd (1994: 291). Del Olmo (1992c) explains the terms thus: Akk. *maḫaru*, 'tax collector', Akk. *paḫāru*, 'potter' (cf. de Moor 1979: 648). If the skilled eyes of these important representatives of society (fiscal, technological, military) are confused, a serious threat will arise for the city. Note the assonance *mḫr*, *pḫr*, and *ṯġr*.

11. 'Return to' (√*ṯwb*) on the understanding that the text constitutes a spell to undo the influence of the evil eye. Or perhaps, on the understanding that it is a spell to render the evil eye inefficacious in the first place, 'remain with' (√*yṯb*). Cf. Heb. *yāšab* with *l* (BDB, 442b), and so on throughout the tricolon. The translation 'return to' (√*ṯb*) would remain the first choice in the final bicolon, as it implies that the evil will redound on the wicked person.

1.96 R 10 may the eye of the potter return to the potter;
may the eye of the tax collector return to the tax collector.
May the eye of the wicked man return to the wicked man;
may the eye of [the wicked woman] ret[urn] to the wicked woman.
...[12]

12. Since the bottom of the recto is missing, we may suppose that there was more to the spell.

KTU 1.100: The Myth of Shapsh and the Mare: A Spell against Snakebite

(KTU 1.100 = RS 24.244)

Select Bibliography

Virolleaud 1968, 564-74; Astour 1968: 13-28; Caquot 1969: 241-54; de Tarragon 1989: 79-94; Lipiński 1974; Dietrich and Loretz 1980; Gaster 1975; Young 1977, 1979; Johnstone 1978: 113-15; Pardee 1978a, 1988a: 193-226; Tsevat 1979; Bowman and Coote 1980; Xella 1981: 224-40; Kottsieper 1984; de Moor 1987: 146-56, 1988; Levine and de Tarragon 1988; del Olmo 1992a: 241-49; Belmonte 1993; Greaves 1994; West 1995: 106-12; Parker 1997: 219-23; Pardee 1997c: 295-98, 2001a: 166-76.

This text, dealing with a rite to cure snakebite, is in the form of a myth of a mare whose foal has been bitten. She appeals in turn to eleven deities or pairs, only finally addressing a twelfth, Horon, the chthonian god who has the power to deal with the problem. Wilfred Watson has drawn my attention to the parallel between this general appeal, coming at last to the only one who can help, and the episode of Shataqat in KTU 1.16 v 10–vi 14, though there is no reason to think that Horon is created after the other deities' failure to act. There are further parallels: Marduk in *Enuma Elish* ii and Durgā in the Purāṇas (see O'Flaherty [1975: 238-49, 333-34] for texts and references). Cf. Enlil as son of twenty-one divine couples (Gallagher 1994: 142). Note the association of horse and snake in Gen. 49.17.

1.100 R 1 The mother of the stallion, Mare[1],
(A) daughter of spring,[2] daughter of stone,
daughter of heaven and the deep[3]

1. A mare-goddess? So Levine and de Tarragon (1988: 494) (but not Gaster [1975: 35], to whom they appeal). On the links between horse-goddesses and the sun see West (1995: 106-13).

2. Is the spring perhaps to be equated with *thm*, the cosmic deep, and the rock with the cosmic mountain, Saphon? Cf. Levine and de Tarragon (1988: 494).

3. A grandiloquent way ('this baroque assemblage of titles': Pardee 1988a: 204) of saying that the horse is wild. The horse featured in the iconography of Athtart (Leclant 1960) and of the sun (cf. 2 Kgs 23.11).

called to Shapsh her mother[4]:

[B I] 'Shapsh, (my) mother, carry my voice
to El at the source of the rivers[5],
at the confluence[6] of the two deeps.

A spell against the bite of a snake,
1.100 R 5 against the venom[7] of a snake that has sloughed[8].

From it[9], let the conjurer[10] destroy,
from it[11] let him cast out the poison.

4. Presumably Shapsh was regarded as the protectress of horses.

5. Ug. *nhrm*. Four rivers, as in Gen. 2.10-14, and not two, as in Dietrich and Loretz (1980a: 154), Xella (1981: 227), de Moor (1987: 147), Levine and de Tarragon (1988: 490) and del Olmo (1992a: 242).

6. Ug. *'dt*. The expression in the Baal Cycle is *qrb apq thmtm*, 'the midst of the springs of the two deeps' (KTU 1.4 iv 22 and restored parallels). The two formulae express the same idea.

7. Levine and de Tarragon (1988: 490), take this as an epithet in the previous colon.

8. De Moor (1987: 147), translates '(My incantation is:) a poisonous serpent has bitten, a serpent which has sloughed its skin'. This is to take *nṯk* and *'qšr* as verbs, and to group the words: *nṯk nḥš šmrr* || *nḥš 'qšr*. Others (e.g. Pardee [1988a: 203]) group thus: *nṯk nḥš* || *šmrr nḥš 'qšr* and take the words cited as nouns. Ug. *'qšr*: 'having sloughed (its skin)': thus Bordreuil (1983) and Caquot (1989: 83), with ref. to Ar. *'aqšar*, 'stripped of its skin', explaining the shift *'* > *'* on the basis of euphony caused by the proximity of an emphatic consonant (sc. the *q*). 'Scaly' (Ar. *qišrat*): Astour (1968: 17) and Pardee (1978a: *passim*). 'Twisting': Xella (1981: 227).

9. Ug. *lnh*. I.e. the snake (Astour [1968: 18]). Alternatively, the victim of snakebite. Similarly in the following colon.

10. Ug. *mlḫš*: (√*lḫš*, Heb. *m^{e}laḥēš*, Ps 58.6: perhaps 'whistle, hiss', copying the sound of a snake?; cf. Astour 1968: 17). Presumably each god invoked is presumed to act the role of conjurer (both 'magician' and 'one who invokes'). Note too the assonantal wordplay between *mlḫš* and *yšlḥm*, 'send away', in l. 6. The enclitic *m* of the latter is consistently used to emphasise the wordplay, an inherent feature of magical formulaic usage. I have taken the clause to be 3 p. sg. ('let the conjurer...'). A voc. sense is attractive (thus Pardee 1978a: 77; 1988a: 203, 209; Xella 1981: 227), but requires that the final tricolon (this has a quasi-poetic structure) be in the indic., where I have taken it to be juss. (with Dietrich and Loretz 1980a: 155, and de Moor 1987: 147; cf. del Olmo 1992a: 243).

11. Ug. *lnh*: Caquot (1989: 89): 'on him', he being the conjurer, victim of the poison.

Then let him bind[12] the snake,
let him dismiss[13] <the snake> that has sloughed,
let him draw up a chair and sit down.'[14]

[B II] She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
to Baal in the heights of Saphon.

1.100 R 10 A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloughed,
let him dr<aw> up a chair and sit down.'

[B III] She called to Shapsh her mo<ther>:

'Shapsh, (my) mother, carry my voice
1.100 R 15 to Dagan in[15] Tuttul.

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,

12. Taking the three verbs following to be jussives. Thus Dietrich and Loretz (1980a: 154), Caquot (1989: 84-85) and de Moor (1987: 147). They may alternatively be taken as indics.: thus Pardee 1978a: 75; 1988a: 203. Is the binding a metaphor for control with the spell (spellbinding), rather than a literal tying up? Thus Astour 1968: 18.

13. Following the view of Bowman and Coote (1980: 136), rather than 'give to eat' (Š of √*lḥm*) as proposed by most translators. See n. 10: feeding the snake would seem to serve no purpose (contrast Astour [1968: 19], who notes Virolleaud's suggestion [1968: 569] of 'give to drink'—**yšq* for *ytq*—in l. 6). Sending it packing, especially with a vb that echoes the 'conjurer's' role (n. 10), would perhaps also take away the effects of the poison.

14. Caquot (1989: 85) (and in subsequent strophes) understands the final line thus: '(But the deity) draws up a chair and sits down' sc. refusing to respond to the mare's plea. This is also an acceptable interpretation.

15. Locative sense of *-h*: Astour (1968: 19). Similarly in following strophes.

let him send away the snake that has sloughed,
let him draw up a chair and sit down.'

[B IV] She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
1.100 R 20 to Anat and Athtart in Inbub.

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloughed,
let him draw up a chair and sit down.'

1.100 R 25 She called to Shapsh her mother:

[B V] 'Shapsh, (my) [mother], carry my [voice]
to Yarih in Larugat[16].

A spell against the bite of a s[nak]e,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloughed,
let him draw up a chair and sit down.'

1.100 R 30 She called to Shapsh her mother:
[B VI]

'Shapsh, (my) mother, ca<rry> my voice
to Reshef in Bibati[17].

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

16. *DLU*, 248. Lambert (1984: 43) and de Moor (1987: 149 n. 11) suggest that this is a city mentioned in the Ebla tablets.

17. Ug. *bbth*. The residence of Reshef, perhaps a city called Bibati (Barré 1978: 467 n. 32; cit. de Moor 1987: 149 n. 12) rather than 'his temple'. Cf. Astour (1968: 20). Levine and de Tarragon (1988: 497) detect it as a TN in KTU 1.171.3 (= RIH 78.16.3).

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloug<hed>,
let him draw up a chair and sit down.'

1.100 R 34 [B VII] <She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
to Athtart in Mari[18].

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloughed,
34e let him draw up a chair and sit down.'>[19]

1.100 R 35 [B VIII] She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
to Zizzu and Kemosh[20] in Huriyat[21].

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloughed,
let him draw up a chair and sit down.'

1.100 R 40 She called to Shapsh her mother:

18. Ug. *'ttrt* here represents the goddess Ishtar. KTU 1.107.41 would lead us to expect Athtar (and Athtapar) here.

19. This section is omitted from the text, but a note on the edge reads: 'after Reshef: Athtart—"to Athtart in Mari, a spell against the bite of a snake"'. See at end of text, following l. 76.

20. See Astour 1966: 278; 1968: 20.

21. Cf. Astour 1968: 20.

[B IX] 'Shapsh, (my) mother, carry my voice
to Milk[22] in Athtarat[23].

A spell against the bite of a snake,
against the venom of a snake that has sloughed.
From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
1.100 V let him send away the snake that has sloughed,
let him draw up a chair and sit down.'

1.100 V 45 (B X) She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
to Kothar-and-Hasis in Crete.

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

Then let him bind the snake,
let him send away the snake that has sloughed,
1.100 V 50 let him draw up a chair and sit down.'

1.100 R 45 [B XI] She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
to Shahar and Shalem in heaven[24].

A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy,
from it let him cast out the poison.

1.100 V 55 Then let him bind the snake,
let him send away the snake that has sloughed,

22. The DN is also vocalized Malik(u), and is probably related to Molek and Milkom.

23. City in the Hauran (Bashan). See n. 8 to KTU 1.108.2.

24. Ug. *šmm*. We would expect a TN, but none corresponds to this. Shalem was patron deity of Jerusalem ('Salem' in Gen. 14) but this would require textual emendation.

let him draw up a chair and sit down.'

[B XII] She called to Shapsh her mother:

'Shapsh, (my) mother, carry my voice
to Horon[25] in the fortress[26].
A spell against the bite of a snake,
against the venom of a snake that has sloughed.

From it, let the conjurer destroy[27],
1.100 V 60 from it let him cast out the poison.

60a <Then let him bind the snake,
let him send away the snake that has sloughed,
let him draw up a chair and sit down.>'[28]

(C I) Towards Horon she turned[29] her face
for she was about to be deprived[30] of her offspring[31].

He went to[32] the eastern city[33].

25. Horon, a powerful god in the context of exorcism (here, in KTU 1.107, KTU 1.124.6 and KTU 1.169) is conspicuous by his absence from the pantheon list of KTU 1.47 and parallels. The apparent anomaly of an important omission from a canonical text warns us against drawing too-far-reaching conclusions from the partial evidence before us. Neither mythological texts, nor ritual texts, nor even pantheon lists are complete guides to the theology under discussion. (Cf. n. 1 to KTU 1.23.) Horon, who was evidently worshipped in the LBA-NK period throughout the Syro-Egyptian region, is also invoked in curses in KTU 1.2 i [7] and 1.16 vi 55. On the god see Xella (1972), Caquot (1979–80, 1982) and Rütersworden (1995).

26. Ug. *mṣdh*. Also a TN?

27. Caquot (1989: 89): 'because of its deed, the conjurer has died'.

28. Most commentators make no comment on the omission of this tricolon from the end of strophe XII. Its restoration is hypothetical (cf. the inadvertent omission of strophe VII above). Cf. Astour (1968: 15, 22): 'the final tristich is missing...this is hardly a case of scribal omission'!

29. Ug. *trġn*: √*rġn*, Ar. *raġana*, 'incline (the body)' Astour (1968: 22), followed by Caquot (1989: 89 n. 276). Cf. Pardee (1988a: 214). The subject is the mare.

30. Lit. 'bereaved (sc. of offspring)', which leads Caquot (1989: 90 n. 277) to propose an alternative for *bnwth* (here construed as 'her offspring'), deriving it from *nwt* (Heb. *nāvê*, 'pasturage, dwelling').

31. 'His virility': Astour (1968: 22).

32. Ug. *ykr*. This sense (cf. Ar. *karra*) accepted by Xella (1981: 236-37), Kottsieper (1984: 106) and Pardee (1988a: 215). Or 'left' (Syr. *'etnakrī*): Virolleaud (1968: 570, with hesitation), Astour (1968: 23), Lipiński (1974:) and Caquot (1989: 90). For other suggestions see ibid. n. 278.

Then
he set his face towards Aršḫ abounding in rain,
and well-watered Aršḫ[34].

He uprooted[35] from among the trees the tamarisk[36],
1.100 V 65 and from among the shrubs the tree of death[37].

With the tamarisk he shook it out[38];
with the fruit-cluster[39] he drove it away[40];
with the foliage[41] he dismissed it;

33. Or: 'primaeval': Caquot (1989: 90 n. 278, 'antique') cf. de Moor (1988a). On the nuances of *qdm* see Wyatt (1996a: 354-56).

34. On the ways of interpreting this urban formula see n. 80 at KTU 1.14 iii 4-5. Ug. *Aršḫ*: presumably a city-name. Astour (1968: 23), and Bowman and Coote (1980: 137), take it to refer to the Tigris (Hur. *Araššiḫ*, 'Tigris'). A watery interpretation of the formula fits the river well, and in my view clinches the choice of option. A water supply would also be essential for a city. Cf. *ṯr*, KTU 1.101.8.

35. Ug. *ydy*. Thus Astour 1968: 24. Others 'cast out'. (Heb. *yādâ*.) Cf. n. 1 to KTU 1.169.1.

36. Ug. *'r'r*. Thus most commentators, following Virolleaud (1968: 571). 'Juniper': Gray (1978: 83) and Johnstone (1978: 113). BDB (p. 792) gives 'juniper?' for Heb. *'arô'ēr* ('Ar. *'ar'ar*, juniper [or cypress?]'). See discussion and extensive refs. in Belmonte (1993: 114). In view of the uncertainty of identifying many ancient names for species with absolute precision, and the medicinal qualities and ritual associations of each, both candidates are possible.

37. For this syntax cf. Pardee (1988a: 215). De Moor (1988) suggests that the present text and KTU 1.107 preserve fragments of an Ugaritic version of the Eden story (Gen. 2–3). Perhaps a 'tree of death' is either the tree, or one of two trees, in a paradise.

38. Ug. *yn'rah* (corr. to *yn'rnh*), Heb. *nā'ar* II. In view of the final *-m* of *'r'rm*, perhaps instrumental, 'he performed a shaking action *with* the tamarisk', and similarly with the following cola. Thus Pardee 1988a: 216; Caquot 1989: 91-92.

39. Ug. *ssnm*. Usually translated 'date-cluster' or similarly: see rationale in Young (1977: 292-293); Belmonte (1993: 115). I take it as referring to tamarisk fruit, all the items used being parts of the *one* tree. The term may be generic for any bunched fruit or berry.

40. Ug. *ysynh*. Thus Astour (1968 p. 25) and Pardee (1988a: 216 n. 101; Ar. *nassa*). Cf. de Moor (1987: 154 and n. 29; Akk. *nesû*). 'Puts to the test': de Tarragon (1989: 92 n. 285: Heb. *nāsâ*).

41. Ug. *'dtnr*: lit. 'ornament'. Heb. √*'ādâ* II; cf. Bowman and Coote (1980: 136). 'Scab': de Moor (1987: 154; 1988a: 107). 'Reed bulb': Astour (1968: 22). 'Whirlpool': Dietrich and Loretz (1980a: 157), cf. del Olmo (1992a: 247). 'Heart of the reed': Pardee (1988a: 203). Cf. discussion in Belmonte (1993: 115). Cf Parker 1997: 222-23 and n. 7, and Pardee 2001b: 144.

with the roots[42] he carried it off[43].

Horon went to his house,
and came to his court.

The po<iso>n[44] became weak like a stream-bed,
it flowed away like a stream.

1.100 V 70 Behind her[45] the house[46] of incantation,
[C II] behind her the house she shut,
behind her the bronze (bolt)[47] she shot[48].

(Horon:)[49] 'Open the house, spell,
open the house that I may enter,

42. Ug. *yblt*. I take this and the preceding *'dtm* to be parts of the plant, hence taking Ug.-Heb. √*ybl* ('carry') as guide. Cf. *y^{e}bûl*, 'produce of soil'. 'Wart': de Moor (1987: 154; 1988a: 107). 'Twin-fruit': Greaves (1994: 166). Others in keeping with translations in previous note, or leaving untranslated.

43. There is an assonantal wordplay between each verb and its instrument in this tetracolon. The names have the character of the action. Cf. the names and functions of Baal's weapons. See Greaves (1994). Horon performs a magical, quasi-medical rite with the plant products, which drive the poison out, by 'dismissing' the snake. This is in reality the paradigm of the medical procedures effective against snakebite. A theological sanction is thus given to (presumably) effective folk-medicine.

44. Ug. *ḥ<nn>t*, *KTU*^{2}. Alternatively, correcting to *ḥ<w>t* (de Tarragon 1989: 92): 'life flowed like a torrent, it flowed (back) like a stream'. Ug. *nḥl* may mean the empty wadi or the torrent rushing through it. Levine and de Tarragon combine the two alternatives, Horon causing poison to flow like a river.

45. 'Her... she...'. Presumably this is Mare, the horse-goddess who invokes all the deities. Her spell having proved efficacious, she leaves the shrine where she had invoked the other deities.

46. The form *bhtm* is plural.

47. Ug. *tlt*: lit. 'three'. 'Three times': Dietrich and Loretz (1980a: 157). 'Bronze': Pardee (1988a: 203). Cf. Johnstone (1978: 118) who refers to the tradition of Num. 21.8-9 (see below, n. 49).

48. Lit. 'set, placed' (Ug. *'dbt*).

49. The rubrics are those of Levine and de Tarragon. Whether these are the characters who utter these words remains uncertain, however. But the idea of having as an apotropaic talisman a model of the very danger feared (in this mythological account the talisman consists of a live snake) is entirely plausible. Cf. the small bronze serpent found at Timna, though this is interpreted as votive and compared with Num. 21.8-9 (Rothenberg 1972: 183-84 and pl. XIX). This kind of ritual is alive and well in Tennessee.

the palace that I may come in'.

(Mare:) 'Give me the snake[50] as <my gift>,
give me the lizard as my dowry[51],
and the young serpent as my present'.

1.100 V 75 'I shall give the snake as your dowry,
(Horon:) the young serpent as your present'.[52]

edge After Reshef: Athtart—'to Athtart in Mari, a spell against the bite of a snake...'.

50. Ug. *nḥšm* perhaps pl., but the parallel *bṯn* suggests that it is sg. with enclitic *m*. De Moor (1987: 155): 'a serpent'.

51. An addition to an older bicolonic formula? Cf. the final bicolon. On the other hand, Wilfred Watson has proposed to me (oral communication) that the line may have been inadvertently omitted from the last bicolon (which would therefore be a tricolon). However, the introduction of a lizard is a poor parallel to a serpent, especially if it is the serpent who is the villain of the piece. Cf. *KTU*^{2} 's suggestion, reading *y ḥr<n>*: 'O Horon'. Ug. *yḥr* may mean 'lizard' (if to be defended here) on basis of Ar. *waḥarah*, 'lizard' (thus Johnstone 1978: 115).

52. Perhaps we are to suppose that the now harmless snake is returned as a wedding-gift to Mare. If so, the birth of the foal must be premarital (cf. Nikkal's premarital dalliance in KTU 1.24 and perhaps the plot of Gen. 34 [Wyatt 1990a]). I am grateful to Wilfred Watson for this suggestion.

KTU 1.101: A Hymn to Baal Enthroned

(KTU 1.101 = RS 24.245)

Select Bibliography

Virolleaud 1962, 1968: 557-59; Fisher and Knutson 1969; de Moor 1969a: 180-83, 1987: 1-2; Lipiński 1971b; Pope and Tigay 1971; Margulis (Margalit) 1974; Pardee 1988a: 119-52; Xella 1996: 396-98.

A hymn. Baal is imagined enthroned on Mt Saphon, attended by Anat, and is almost assimilated to the mountain itself, as the clouds and snows of the summit are described as attributes of the god's head. But the 'nature hymn' style is misleading. It is simile and metaphor, not literal description. This is a portrait of a transcendent deity. Lines are traced across the tablet and the text written between them. Perhaps a scribal exercise. De Moor regards it as the prologue to the 'Baal Cycle' of myths (KTU 1.1–1.6).

1.101 R 1 Baal sits like the base of a mountain[1];
Hadd se[ttles][2] as the ocean[3],

in the midst of his divine mountain, Saphon,
in [the midst of [4]] the mountain of victory.

Seven lightning-flashes [ ],
eight bundles[5] of thunder[6],

1. Virolleaud (1968: 558): 'Baal sits, (having) for a throne (his) mountain'. Lipiński (1971a: 82): 'Baal is seated, for [*k*] the mountain is a throne'. While Saphon is indeed Baal's throne, it is rather a comparison of the fixity of the throne: as firm as its mountain-base ('dwelling' or 'seat'); cf. Xella (1996: 396). But in any case hardly 'Baal sits as a mountain sits' (thus Margalit 1974: 2; taking *ṯbt* as G inf. construct). Margalit (1974: 2, 14) also takes *ǵr* to be 'mule' (*k mdb* of l. 2 construed as *km db*, 'like a bear')!

2. Ug. *r* [ ]. Virolleaud (1968: 558) restores *r* ['*y*]: 'Hadd the shepherd'. Cf. KTU 1.108.3 and rejection of this sense. Others have restored *r*[*bṣ*] (de Moor 1969a: 180; citing KTU 1.13.9), though the word-pair *yṯb* || *r bṣ* is otherwise unattested.

3. Cf. de Moor (1969a: 181) and KTU 1.23.35 above. The double simile speaks of fixity and ubiquity. As Fisher and Knutson (1969: 158 n. 7) observe, *mdb* denotes Yamm: Baal is enthroned on his cadaver. On this see Wyatt 1995a.

4. Fisher and Knutson (1969: 158 n. 8) plausibly restore *b*[*tk*].

5. Ug. *iṣr*. For the sense 'bundle' see Renfroe (1992: 84), followed by Xella

a tree-of-lightning [in his] ri[ght hand].[7]

1.101 R 5 His head is magnificent,
His brow is dew-drenched[8].
his feet are eloquent in (his) wrath[9].

[His] horn is [exal]ted[10];
his head is in the snows[11] in heaven,
[with] the god there is abounding water[12].

(1996: 397). Ar. *ṣr*, 'bundle'; Heb., Aram. √*ṣr*, 'gather, stack, pile'. Cf. also Heb. √*ṣrr* I. Cf. also Heb. *'ôṣār*, pl. *'ôṣārôt*, 'storehouse'. So Fensham (1971a: 24) and J. Day (1985: 59). But a storehouse can hardly be held in the hand, which is I suspect the point of the tricolon, so that the former sense is preferable. Cf. *DLU*, 56.

6. *r't*. Fisher and Knutson (1969: 159) correct *r't* to *r'm* , and construe as 'storehouses of thunder'. So also Fensham (1971a: 24) and J. Day (1985: 59). To **r'm*, cf. Heb. *ra'am*, 'thunder'.

7. Cf. the 'Baal au Foudre' stela in the Louvre (RS 4.427), though Baal holds the combined tree-spear-lightning stroke in his *left* hand! Margalit (1971: 481-82; 1974: 5, 14) reads *'ṣ.brqy*['].*rišh*: 'a tree with its head in the firma[ment]'. Note *ANET*, 249: 'Baal smites thee with the cedar tree that is in his hand'.

8. Ug. *tly.bn.'nh*. Lit. 'he is dewy between the eyes'. Cf. Fisher and Knutson (1969: 159). Preferable to 'Tallayu [Taliy] made his head wonderful between (his) eyes' (de Moor 1969a: 180; cf. 1987: 2).

9. Ug. *uz'rt.tmll.išdh*. Cf. Fisher and Knutson (1969: 159): for *uz'rt* cf. Akk. *zā'iru* ('enemy', 'be hostile') here taken as f. abstract. For *tmll* cf. Heb. √*mll* I: 'speak'. To *išd* cf. Heb.*'ešed*, 'foundation', 'base'. (But cf. Akk. *išdu*, 'phallus', and common use of *rglym* which occurs in Prov. 6.13, often cited. Pope and Tigay [1971: 128] even suggest a sexual nuance for *uz'rt*.) Others take the whole section to be a series of actions by Baal's consorts, who massage his body. See, e.g., de Moor (1987: 2: Taliy) and Pardee (1988a: 125, 139, 141: Taliy, Bittu Rabbi and Uz'aratu). The last two are otherwise unattested. Avishur (1980: 126) has Taliy delousing him! In a hymn?!

10. Text: *qrn*[ ] [ ]*t.'lh*. *KTU*[2] reads *qrn*[m] b*t*, and suggests d*t*. The *b* is inferred from the context as construed (see previous note), and only the top right wedge is partially visible. I read, conjecturally, *qrn*[*h*] [*rm*]*t.'lh*. There is certainly room for a *r* before the putative *b* (my *m*). For the expression 'exalt the horn' in Heb., see 1 Sam. 2.10 and Ps. 89.25, of the king. Elsewhere (6 times in Pss.) of people. Here qatil pass. pt. (cf. Andromeda < **'Anat*[*u*] *Ramit*[*u*]: Wyatt 1988a: 376 and n. 11).

11. Ug. *glṯ*. metathesis of Heb., Aram. *šlg*, *tlg*, Ar. *ṯalg*. Margalit (1974: 10), 'bald' (Syr., Aram. *glš*, 'to scrape, shave, make bald'): noting that Mt Saphon is Ar. *Jebel el-Aqra*, 'Bald Mountain'. Fisher and Knutson's suggestion (1969: 159: 'his head is descending from the heave[ns]', cf. Song 4.1, 6.5) is implausible.

12. Cf. Pardee (1988a: 124, 145), restoring *'m*, and seeing *ṯr* as relating to Ar. *ṯarra*, 'give plentiful water' (Pope and Tigay 1971: 129). Cf. *ṯrt* in KTU 1.4 v 7

His mouth is like two clouds[13] [ ],
[his lips] like wine from jars,
his heart [ ]

1.101 R 10 ...

(indeterminate number of lines missing)

1.101 V (2 lines too damaged to yield sense)

[ ] the Gracious one [ ]
[ ] oil of peace was poured into[14] a bowl.

1.101 V 15 Virgin Anat [washed] her hands,
her fingers [the Beloved of] the Powerful One[15].

She took her lyre in her hand,
[she clasped] the bull-shaped instrument[16] to her breast.

She sang of the loves of Valiant Baal,
of the affection of <Pidray daughter of Light,>
[the desire of Taliy daughter of Shower,]
[the love of Arsiy daughter of Snatcher-for-ever.][17]

(text breaks off)

(Driver 1956: 151), *ṯrrt* in KTU 1.14 iii 5 etc., 1.100.64. Xella (1996: 397): 'in the heaven of Bull El' (*bšm* *[m d]*t i*l ṯr*).

13. Ug. *iṯ.ph.kṯṯ*[1].*ǵbt* [ ]. Fisher and Knutson's suggestion (1969: 159) makes sense, though they read *ǵbm*. (Heb. *'āb* has plurals in *-ôt* and *-îm*: here we would expect du.). Cf. Pardee (1988a: 125), who restores [*ṭl*]: 'two clouds [of dew]'. De Moor (1969: 182), '...cream of milk'.

14. Or 'from'. Cf. KTU 1.3 ii 31; 1.16 iii 1.

15. Ug. *yd... uṣb'th*. 'Hers' or 'his'? Du. and pl. respectively, or sg.? On latter readings is this 'penis... phallus' as elsewhere (e.g. KTU 1.10 iii 7-8)?

16. For this translation of *rimt* see KTU 1.3 iii 4 n. 36.

17. The V may be an independent composition. Cf. KTU 1.3 ii 31-33, iii 4-8, where substantially the same text is found. Here it is apparently Anat who sings (*tšr*, l. 17) while at KTU 1.3 iii 5 it is the minstrel who sings (*mšr*). See nn. 36, 37 *ad loc*.

KTU 1.107: A Cautionary Tale: Širuġazuz Learns the Risks of Snake-Charming

(KTU 1.107 = UT 608 = RS 24.251 + 262 + 265A + 267 + 275 + 279 + 283 + 286)

Select Bibliography

Virolleaud 1968: 574-580; Astour 1968; Dietrich, Loretz and Sanmartín 1975c; Xella 1981: 241-50; Levine and de Tarragon 1988; de Moor 1988a; Pardee 1988a: 227-57; de Tarragon 1989: 95-100; del Olmo 1992a: 249-51; Pardee 2001a: 176-85.

The text has the appearance of a story about Širuġazuz, who has been careless in practising snake-charming or snake-handling, and has been bitten. Shapsh intervenes, presumably to save him. The latter part of the text is an incantation for the cure of snake-bite. This application of a mythic form to a ritual context may also be seen in KTU 1.23 (famine-relief according to Cutler and Macdonald 1982), KTU 1.24 (weddings) and KTU 1.114 (excessive consumption of alcohol). Recto and verso: reverse order in Astour, Xella and *KTU*[1]. Present order in Pardee, Levine and de Tarragon, del Olmo and *KTU*[2]. Neither is certain, though the latter is preferable.

1.107 R 1 [ ]...[ ]
[ ] the great[1] gods...[ ]
[ ] in his hand
...the man's temple sweated profusely[2],
[ ] it let fall[3],
it bit...

1. Thus Xella (1981: 244). Pardee (1988a: 241-42): 'numerous'; Dietrich and Loretz (1990: 215-16). Cf. KTU 1.124.2.

2. Ug. *ydrm*: following de Moor's (1988a: 108 n. 21) suggestion that it is √*drr* (Ug., Heb., Ar. *darra*), 'to flow copiously'. Astour (1968: 33), cites Ar. *darama*, 'to fall out (of teeth)'. Could the broken word]r*ṣ at the beginning of the line to be restored as *ḥrṣ* (Heb. √I, 'be sharp'): 'the [sh]arp [fangs] fell out in his hand'? Was he trying to de-fang the snake? De Moor (1988: 108) reads *'ṣ* ([*yqh*] *'ṣ bdh*: 'he took the tree in his hand'). Contrast Levine and de Tarragon (1988: 493): 'with his arms he *strikes* (?) the temples of humankind'.

3. Ug. *yšql*. De Moor (1988: 108): [*nḥš*] *it*[*l*] *yšql*: 'and the serpent let fall the spittle (= venom)'.

1.107 R 5 [ ] po[is]on[4]...

He wanted to escape from it[5].
The snake's mouth [ ]

[How to bi]nd the bite[6] he did[7] not know;
he did not understand how to remove the poison.

The poison [ ] him
and the venom[8] convulsed him[9].

Širuġazuz[10] [fell in a se]izure[11],
he wept like a child,
[and shed tears] like an infant.

Shapsh called from heaven:

1.107 R 10 '[Why] have you fallen, O...?[12]
why have you fallen in a seizure, Širuġazuz,
and (why do you) weep[13] like a child,

4. Reading *ḥ*[*m*]*t* after de Moor (1988a: 108 *ḥ*[*m*]*t*), rather than *ṯ*[*b*]*t* (Pardee 1988a: 230; *KTU*[2]). The bottom wedge of *ḥ* has been overwritten by a word-divider in the next line.

5. Ug. *pṣr pṣrn*, rather than *pṣr pṣr*[*r*] of Pardee (1988a: 230); *KTU*[2]. On the sense the best approach is de Moor's (1988a: 108 and n. 23): 'frantically he tried to loosen it', taking *pṣr* to represent √*pṭr*, (Heb., Ar.). Others separate *p* and *ṣr*: *p*, 'and' or 'mouth'; *ṣr*...*ṣrr*. Pardee (1988a: 241) links with Heb. *ṣōr*, 'flint', (√*ṣrr* III) the second form being the denominative verb ('flint...cutter').

6. Ug. *nṯk*. Astour (1968: 33) and Pardee (1988a: 241): 'bite/biter', sc. the snake. Thus also de Moor (1988a: 109). Astour supposes that someone is trying to extract the snake's venom. On this translation, he fails. On Xella's (below) he succeeds.

7. Or: 'does' and so also in the following colon.

8. Ug. *abdy*. Lit. 'destroyer'. De Moor (1988: 109): 'destructive venom'.

9. Ug. *t'btnh*. Lit. 'twisted him' (√'*bt* = Heb. '*bt*). So Pardee (1988a: 241). Alternatively, 'made him powerless' (Astour 1968: 34: Ar. *ta'iba* conj. iv; de Tarragon [1989: 97 n. 300]).

10. This appears to be a PN, perhaps 'Favourite Child' (Astour 1968: 34). The vocalization is hypothetical. This is no doubt the apprentice snake-charmer.

11. Ug. *šr*. Astour (1968: 33-34): 'seizure' (Ar. *sawrat*, *sawār*). Dietrich, Loretz and Sanmartín (1975b: 130) and Xella (1981: 244, 249): 'trance' (Heb. *šrr*). Del Olmo (1992: 250 n. 126): 'disgrace' (Ar. *šarr*). Reading *bšr* as one word: 'the flesh of Sharrughazizu fell': de Moor (1988a: 109).

12. Cf. Pardee (1988a: 245).

13. For *tpky* read *tbky*. Cf. l. 8.

shed tears like an infant?'

Weeping, [Širuġazuz] replied,

...

['...] O Sha[psh?]

...'

[ ] and so on with the entire story...

1.107 R 15 Shapsh called from heaven:

...

(Ll. 16-25 fragmentary, followed by gap of perhaps about 10 lines)

1.107 V (First 10 lines approximately missing, followed by 6 fragmentary lines)

1.107 V 32 [ ]

'[Gather, Shap]sh, from the mountains [the thick cloud], from the earth gather the power[14] of the poison.

[Gather, Sha]psh, from the mountain[s the thick c]loud, from the earth [gather the power of] the poison.

1.107 V 35 From the mouth of the biter the venom, from the mouth of the devourer [the toxin?[15]] gather.

The poison let [ ]
let [ ] [16] gather the poison.

[Gather, Sha]psh, from the mountain[s] the thick cl[oud], from the earth gather [the power of] the poison.

Let[17] E[l] and Horon gather the poison;
Let [Baal] and Dagan gather the poison;

14. Following Levine and de Tarragon (1988: 493). Ug. *lan*: 'potency'.

15. Ug. *tmdl*, restored from l. 45. Meaning uncertain. See Astour (1968: 31: 'poison'), Xella (1981: 246-47: 'abundance'), Pardee (1988a: 250-51: 'evil'), Levine and de Tarragon (1988: 504: 'a plant') and del Olmo (1992a: 250: 'destruction').

16. The subjects of both cola are missing. Most suggest El or the gods as subject.

17. Jussive: so Levine and de Tarragon (1988: 493), de Tarragon (1989: 100) and del Olmo (1992a: 251). Past indic., Astour (1968: 30). Future indic., Pardee (1988a: 242).

1.107 V 40 Let Anat and Athtart gather the poison;
Let Yarih and Reshef gather[18] the poison;
Let Athtar and Athtapar gather the poison;
Let Zizzu and Kemosh[19] gather the poison;
Let Milk in Athtarat gather the poison;
Let Kothar-and-Hasis[20] gather the poison;
Let Shahar and Shalem gather the poison.

Gather, [Shap]sh, from the mountains the thick cloud:
1.107 V 45 from the earth you have [gat]hered <the power of[21]> the poison.

From the mouth of the biter the venom,
from the mouth of the devourer the toxin? [you have gathered].'
...

18. Text *ḫisp*. Correct to *yisp*.
19. Text *ktṯ*. Correct to *kmṯ*.
20. The formula suggests that the two names are treated as independent gods. Levine and de Tarragon (1988: 493) treat each pair as a binomial 'E[l-and]-Horon' etc.
21. This is missing from the text.

KTU 1.108: An Intercessory Prayer to Rapiu and other Deities

(KTU 1. 108 = RS 24.252)

Select Bibliography

Virolleaud 1968: 551-57; de Moor 1969a: 175-79, 1987: 187-90; Margalit (Margulis) 1970a; Parker 1970; Dietrich, Loretz and Sanmartín 1975a; Caquot 1976; L'Heureux 1979: 169-87; Dietrich and Loretz 1980b; Spronk 1986: 177-89; Pardee 1988a: 75-118; de Tarragon 1989: 111-18; R.M. Good 1991; del Olmo 1992a: 125-30; Clemens 1993; Aboud 1994: 149-57; Avishur 1994: 277-307; Rouillard 1995.

A hymnic prayer accompanying libations (a 'psalm': Margalit). As with KTU 1.101, lines are drawn across the tablet and the text written between them, suggesting a scribal exercise. As for the text, most commentators see it as addressed to Rapiu, though some wish to identify him with El or Baal.

1.108 R 1 May[1] Rapiu[2], King of Eternity[3], drink [wi]ne[4],
yea, may he drink, the powerful and noble [god][5],
the god[6] enthroned in Athtarat,
the god who rules[7] in Edrei[8],

1. The verbs in the bicolon may be jussive (volitive) or indicative.

2. The identity of Rapiu ('healer') is much debated. A form of Baal: Dietrich and Loretz (1980b: 179); an independent deity: Parker (1970: 243-44); El: Avishur (1994). Is he perhaps the prototype of Gk Orpheus?

3. Cf. Cooper (1987). 'Eternal' as an epithet of Rapiu would rather be *'llmy*, as in KTU 1.22 i 10. See also n. 16 to KTU 1.161.7.

4. The text begins [ ]*n*. Borger (1969: 3) proposed reading [*y*]*n*, which has been widely accepted, as here. The noun would then be serving double duty, in both cola. Virolleaud (1968: 551): [*aph*]*n*. Pardee (1988a: 83): [*h*]*n*. This last is an acceptable alternative. Del Olmo (1992a: 127), reading [*hl*]*n*..., translates 'Rapau has been established'.

5. Epithets of Rapiu rather than further gods. See discussion in Avishur (1995: 283-86). Cf. del Olmo (1992a: 127), who translates: 'Ilu has established Gaṯaru Yaqaru'—the eponymous founder of the dynasty.

6. Ug. *il*. Hardly El, as supposed by Levine and de Tarragon (1984: 656).

7. 'Enthroned... rules' (Ug. *yṯb, ṯpṭ*): the verbs (both qatala in form) carry both royal and judicial nuances. The degree of political ideology in theological contexts in Ugaritic religious discourse (as in biblical language) is significant.

whom men hymn and honour with music[9]
on the lyre and the flute,
on drum and cymbals,
1.108 R 5 with castanets of ivory,
among the goodly companions of Kothar[10].

And may Anat the power<ful>[11] drink,

the mistress of kingship,
the mistress of dominion,

the mistress of the high heavens,
[the mistre]ss[12] of the earth[13].

8. 'Athtarat... Edrei': cf. Astour (1968: 21) and Margalit (1970a: 294). The other approach to this ('the god who sits with Athtart... the god who rules with Hadd the shepherd'—see de Moor 1976, and most recently Avishur 1995: 287-88, [69]) is less convincing. For apparent *hdr'* of text read *idr'* as proposed by Margalit (1970a: 294), the fourth stroke of the consonant being omitted. This *is* a school exercise! The two cities are in the Hauran (biblical Bashan), south of Damascus, showing the considerable geographical range of the Ugaritic religious world, along with Egypt and Crete, homes of Kothar, (KTU 1.3 vi 13-16 etc.).

9. Clemens (1993): active. Or impersonal: 'one sings...'. Del Olmo (1987: 51; 1992: 127). Good (1991): passive: 'who is hymned and celebrated'. This approach seems inherently more plausible than an active sense, with the god as subject, as for de Moor (1969a: 175: a shepherd god, Pan-like?; 1987: 188: no longer a shepherd) and Pardee (1988a: 81). This is cultic music played and sung in the god's honour, accompanying libations. Cf. the same verbs used of cult in Pss. 68.5; 105.2.

10. Good (1991: 158): 'with the beautiful chords of the cithar'. Rejected by Clemens (1993: 73-74).

11. Ug. *gṯr*. (Cf. the same form in l. 2.) 'The strong': Virolleaud (1968: 555), correcting to *gṯrt*; de Moor (1969a: 175-76) and Dietrich, Loretz and Sanmartín (1975a: 115). Heb. √*gšr*, Akk. *gašāru*. 'Of Gathru': de Moor (1987: 188, toponym? DN?). 'of Gathar' (sc. toponym?): de Tarragon (1989: 115). A drink: Margalit (Margulis) (1970a: 293). A DN: del Olmo (1992a: 127-28 and nn. 58, 61). 'Of power': Pardee (1988a: 82 [discussion p. 91 n. 55]). Del Olmo (1992a: 128) translates the line ' 'Anatu has also established Gaṯaru'.

12. Reading [*b'l*]*t* rather than ['*n*]*t* as proposed by Pardee (1988a: 82). (*KTU*^{2}: [b']l*t*, but only the *t* is visible.) The position of the colon in the overall prosody depends on the meaning of *kpṯ* (next note). I take it as a contrastive parallel with the preceding colon (heaven: earth).

13. Ug. *kpṯ*. 'Earth': Virolleaud (1968: 55 [Heb. *kebeš*, Akk. *kapašu*]). Perhaps even 'Mistress of trampling', on this etymology, with military overtones? Usually taken to mean 'turban' or some article of headdress (e.g. de Moor 1969a: 178;

And may Anat fly[14],
may the kite[15] soar [in] the hig<h> [heav]ens,
(who) ate the calf of E[l],[16]
1.108 R 10 drinking[17] [ ][18] from the horn.
And may the god [ ] drink,
the god who subdued[19] the calf of El[20].
[ ] the god Shad[?21].
May the King [of Eternity] hunt[22]...
[ ]...
[ ]...
1.108 R 15 [ ] Reshef

1972: II, 24; Gibson 1978: 149; 'diadem': L'Heureux 1979: 177). 'Firmament' (synonymous parallelism): del Olmo (1992a: 128 n. 62 [no etymology]). Anat's headdress is the Egyptian Atef crown.

14. Ug. *di<y>* (as following *di<y>t*). Defectively spelt G qatala f. sg. or inf. abs., either with volitive force? 'Flying': de Tarragon (1989: 116). 'Wings': de Moor (1969a: 175, 178) and Pardee (1988a: 82). 'Kite': de Moor (1987: 188). Perhaps a pupil's spelling error.

15. Anat flies among a flock of falcons in the Aqhat story (KTU 1.18 iv 21) and appears winged on a stela (thus Yon 1991: 291; RS 2.[038]). The Eg. goddesses Isis and Nephthys appear as kites. But *di<y>*, *di<y>t* are not to be taken as belonging to the same colon, as this results in an ugly tautology: 'the flying bird' (thus Dietrich, Loretz and Sanmartín 1975a: 115).

16. Or: 'divine calf' (thus del Olmo 1992a: 128). But hardly 'heifer' (*'glt*) as de Moor (1969a: 175). Text *ṯl*. Read *il*. See l. 11 below. On the character of this error see Pardee (1988a: 79).

17. Ug. *mšt*. 'At the feast': Pardee (1988a: 82).

18. Text [ ]*mr*. Del Olmo (1992: 128), restores to [*ḫ*]*mr*, which he takes to be 'wine'. It is rather a container (see KTU 1.3 i 16 [discussion at n. 9], 1.15 iv 23 and 1.23.6). Unless it be metonymy.

19. Ug. *ǵnṯ*. 'Subdued': de Moor (1969a: 175, 178) and Dietrich and Loretz (1980a: 177: causative D stem, cf. Akk. *ḫanāšu*, *ḫañašu*, by-forms of *kanāšu*, 'submit'). A further epithet of El, or another god (Virolleaud [1968: 555]: Ar. *ǵnṯ*, 'drink, breathing at each draught', followed by del Olmo [1992a: 128] but as a vb). The DN Ḫaniš (cf. Virolleaud): Pardee (1988a: 82, 109: see n. 174 on latter page).

20. Cf. n. 16 above.

21. Cf. Loretz (1980) and Caquot (1995) on this god as a possible antecedent of El Shaddai.

22. Text *šdyṣdmlk* [ ]. No word-divider, and continuous with *šd* (tentatively identified as a god: see preceding line. De Moor (1969: 176), restores [*'lm*]. Cf. l. 1.

(bottom of tablet missing)

1.108 V [ ]...
[ ]...
[[23]] intercede with Baal
1.108 V 20 [ ] your achievement[24], Rapiu King [of Eternity]
your [ ], your efficacy[25], your] intercession.
[With the [26]] of Rapiu, King of Eternity,
with the strength of [Rapiu] King of Eternity,
with his help, with [his] p[ower],
by his rule[27], by his splendour
among the Sa[viou]rs of the underworld.
1.108 V 25 May your strength, your help, your power,
your rule, your splendour,
be in the midst of Ugarit,
throughout the days and months,
and the gracious years of El.

23. Pardee (1988a: 82) plausibly understands Rapiu to be the subject of this sentence.

24. Ug. *mġk*. Lit. 'your arrival', 'your coming'.

25. Ug. *tštk*. 'Success', 'confidence': Dietrich and Loretz (1980a: 174, 178); 'success': Pardee (1988a: 112 n. 189). Others take this to be a verbal form (√*šyt*): thus de Moor (1969a: 176): 'will put you...'.

26. Whatever quality is missing here (l. 21) is not balanced in the otherwise identical list of qualities in the following strophe.

27. Ug. *ḥtkh*. 'Rule' (√ as Heb. *ḥātak*). Thus de Moor (1969a: 179). The homonym *ḥtk* means 'scion' in the expression *ḥtk dgn* in KTU 1.10 iii 34 (*pace* Wyatt 1992a: 415-16). The kinship aspect may persist in the sense of power, as de Moor notes ('[paternal] rulership...'). Cf. Margalit (1970a: 296-70) and de Moor (1987: 189-90: 'patronage'). Healey (1980) suggests 'care', as in KTU 1.6 vi 46-47. Cf. Renfroe 1992: 93.

KTU 1.113: A Royal Liturgy, and the Ugaritic King-List

(KTU 1.113 = RS. 24.257)

Select Bibliography

Virolleaud 1968: 561-62; Kitchen 1977; Dietrich and Loretz 1980b; Xella 1981: 288-91; del Olmo 1986, 1992a: 121-23; Pardee 1988a: 165-78; Lewis 1989: 47-52; Aboud 1994: 3-11; Schmidt 1994: 67-71, 1996; Younger 1997.

The recto of this little tablet appears to contain elements of a royal liturgy,[1] probably invoking ancestral kings,[2] among whom would be the *Rpum* (see KTU 1.20–1.22 and 1.161). (Pardee [1988a: 170] is at pains to stress its [para-]*mythological* character.) The verso contains a list of royal names in two columns, unfortunately very mutilated. Kitchen's article (1977) is a brilliant reconstruction of the list. Each king's name is preceded by *il*,[3] indicating that dead kings at least were divinized (cf. Wyatt 2000). Whether this list was used in conjunction with the putative liturgy on the recto remains unclear. A list of royal names going back over several centuries constitutes important evidence of an awareness of historical reality ('national memory') among the people of

1. Pardee (1988a: 170, 172) has drawn attention to the lack of appropriate terminology, but Schmidt (1994: 68) has noted that 'it is wrought with mythological vocabulary'.

2. *Pace* Schmidt (1994: 69).

3. It is possible that this designation is no more than a technical term meaning that the king is dead: it is used only of dead kings. But the balance of probability favours a specific theological content, particularly in view of the evidence for a form of divine kingship in Ugarit, as found in the Keret story. Perhaps in terms of reading the tablet it serves as a graphic marker, like the Akk. divine determinative. The following technical terms are used of the living king: in KTU 1.16 i 10 he is called *bnm il*, which makes him a member of the genre 'deity' (see n. 202 *ad loc.*); in KTU 1.14 i 37 etc. El is called *ab adm* with reference to him (n. 30 *ad loc.*), while in KTU 1.14 i 41 El is called *ṯr abh*, a term otherwise restricted to deities; and in KTU 1.14 i 40-41 etc. he is called *ǵlm il* (see n. 32 *ad loc.* and n. 99 at KTU 1.2 i 13). Later Heb. usage (as at 1 Sam. 28.13) has *ʾᵉlōhîm* denote the ghost of Samuel. But this usage is not attested at Ugarit. Schmidt (1994: 19, 69-70) takes up Liverani's (1974: 340-41) proposal that the *il* PN formula occurring here denoted not the deified dead king but rather the divine guardian of the king. He himself wonders whether the term *ilib* does not denote a collective of such personal deities, and rejects any link with a *kispum*-ritual.

Ugarit. (See n. 13.) A number of horizontal lines are scored across the tablet on the recto. Two vertical lines divide the two columns of the verso. These are shown below. The list is retrograde, with the earliest kings last. As Kitchen demonstrates, this is perfectly regular practice in the ancient world.[4]

1.113	R	1	[who has d]ied[5] and is to play[6] his tambourine, and the people [ ] to the Gracious One[7].
			[ ] and the flutes are to be played [ ] to the Gracious One.
1.113	R	5	[who] has died and is to play his tambourine, [ ]...to the Gracious One. [ ] he will come.

4. See Liverani (1962), Saadé (1979) and Klengel (1969, 1979, 1992). For a useful recent survey of later Ugaritic history see Kuhrt (1995: 300-14), Singer (1999).

5. For reading [d m]t see *KTU*[2]. Cf. l. 5.

6. Ug. *rm*. Lit. 'raise up'. Virolleaud (1968: 561): 'the strong sound or voice' (cf. Deut. 27.14). Similarly Xella (1981: 289).

7. Ug. *n'm*. The reference is unclear, here and in ll. 4, 6, 9 and 10. Is this a divine epithet? A title of the living king? (There are no parallels to this—for titles see colophon at KTU 1.6 vi 57-58 and KTU 7.63, discussed by del Olmo [1992a: 121]). 'Chorister'? 'Sweet sound'? Dietrich and Loretz (1980b: 179) go for the first option, Pardee (1988a: 169) appears to do so but with great caution, and suggests Rapiu as the god in question; Kitchen (1977: 140) and Xella (1981: 291) go for the second, Virolleaud (1968: 561) for the third, and del Olmo (1992a: 122) for the fourth. I am torn between Pardee's cautious view, and the idea that it may be a form of address for individual *dead* kings, who are evoked with music, to participate in a community celebration with the living (the *kispum*-ritual). Perhaps the list of kings at the end was used for a long litany, in which the liturgical text was applied to each royal ancestor in turn, throughout the list. What may seem to us the interminable length of such a procedure was perhaps perfectly normal for them. Cf. the length of Ps. 119! As some of the kings (though none listed: for these see KTU 1.161) are *rpum*, it is possible (following Pardee's suggestion) that Rapiu as their patron forms the link between the two realms. This would not formally constitute a cult of the dead, but rather the invocation of ancestors to share, as a communion of saints, in the rites of the living. Schmidt (1994: 68-69) discusses the usage of *n'm*, and concludes that in the present context it denotes a god, whom he is however hesitant to identify.

[ ]and the flutes are to be played,
[to the Gra]cious One.

1.113 R 10 [ ] the Gracious One[8].
...

1.113 V ...

[ ][9]	[ ]
[ ]	[divine Ammi]thtam[ru] (I),
[ ]	[divine Ni]qmepa (IV),
1.113 V 15 [ ]	divine Ammu<ra>pi![11] (II),
[ ]	divine Ibiranu (IV),
[ ]	divine Yaḏiradu,
[divine Ammithtam]ru? (III),	divine Niqmepa (III),
[divine Niqme]pa? (VI)[10],	divine Ibiranu (III),

8. Kitchen (1977: 140) proposes that the recto is a hymn to Rapiu. This is a reasonable hypothesis (though scarcely provable) in so far as he is likely to have been the patron deity of the *rpum*, deified dead kings. He further suggests that 'the Gracious One' is not a deity, but the reigning king.

9. Kitchen (1977: 133-34, 137) proposes the following names as missing at the beginning of the left column, on the assumption that the latest king on the list (dead and deified) was Niqmad III (> IV), father of the last king of all, Ammurapi: in retrograde order [Niqmad III(> IV), Ibiranu II (> VI), Ammiṯtamru II (> IV), Niqmepa VI, Arhalbu II, Niqmad II (> III), Ammiṯtamru I (> III), lost]. The revised numberings he gives are those in parenthesis. The four Niqmads he obtains are without reading this name in l. 20 left. Cf. n. 132 at KTU 1.6 vi 57, and 27 at KTU 1.161.12-13, and see also n. 11 below).

10. There is a problem of the reading in ll. 18-20 left:

Line	*KTU*[1] (1976)	Kitchen (1977)	Pardee (1988a)	*KTU*[2] (1996)	My Reading
18 left	[ ]×	trace	[ ]	[il 'mṯṯm]r	[il 'mṯṯm]r
19 left	[ ]×	trace	[ ]*p*?[	[il nqm]d	[il nqm]p'
20 left	[ ]b	Arḫal]bu	[ ]*d* [	[il arḫl]b[	[il arḫl]b

A colour slide only demonstrates the intractability of the problem. Line 18 could be the end of an *r*, or an *n*, l. 19 is certainly not a *d*, and is very plausibly interpreted as a *p*, with a possible trace of an ' following, while l. 20 shows what may be either a whole *b* or most of a *d*. (Thus it could be identified as either Arḫalbu [I] or as Niqmad [III].) Schmidt (1994: 67) reads a provisional *d*, thus supporting the latter option. It is interesting how a crucial historical problem can depend on such tiny

1.113 V 20	[divine Arhal]bu[?] (I),	[div]ine Ammurapi (I),
	[divine Niq]mepa (V),	[divine] Niqmepa (II),
	[divine Ammith]tamru (II),	divine Ibiranu (II),
	[divine Niqma]d (II),	divine Niqmepa (I),
upper edge	[ ]	divine Ibiranu (I),
1.113 V 25	[ ]	divine Niqmad (I),
	[ ]	divine Yaqaru[12].[13]

pieces of evidence. I read l. 19 as [il nqm]p', in Rom. in view of the uncertainty. However, this gives us the sequence, in reverse order, of Arḫalbu, Niqmepa, Ammiṯtamru, which is confirmed by other documentation. Arḫalbu (II) was the childless king who was succeeded by his brother Niqmepa (VI), and whose 'will' survives in the Akk. text RS 16.144 (Nougayrol 1955: 76; Tsevat 1958). Tsevat takes this to be a case of the levirate. I believe it to show on the contrary that legitimate tenure of the throne was dependent on marrying the *rabītu*, a matrilineal system which has also been claimed for Egypt. See Wyatt (1985b) for the proposal that a similar legal convention was observed in Judah. Note the differentiation of *two* kings Niqmad in KTU 1.161.12-13 by Bordreuil and Pardee (1992: 158). See n. 27 *ad loc*.

11. Correction. Text *'mph*. Read **'m<r>pi*? The *h* may simply be a defective *i* (see Pardee 1988a: 175 n. 39).

12. The list above consists of 28 names or appropriate gaps. Kitchen (1977: 135) estimates it as having had *at least* 28 names, with 30 the likely number. But if the tablet is to be dated before the time of Ammurapi at the end of the twelfth century, then the complete list would be longer (30 + any later ones down to Ammurapi) and he allows for this. Pardee (1988a: 173) estimates that the full list on the original tablet may have contained as many as 52 names. The list is in reverse order, Yaqaru being the dynastic founder to whom all later kings traced their ancestry. Is this to be construed as based upon an official genealogy (though not here serving as such)? Genealogies served a number of ideological and other social purposes, as they still do. See next note.

13. The retrograde order of the king-list (Kitchen 1977), in which the most remote in the past are the most remote in the list, as it is read from the beginning, is analogous to the perspective of ancient Ugaritic culture, as attested in its vocabulary, in looking into the past as part of their canonical orientation, outlined in Wyatt (1996a). This makes of the present text an important piece of evidence supporting my interpretation, and furthermore, it indicates that this is a historiographical document of the utmost importance. The text may be compared with that of the Abydos king-list (Kemp 1989: 22 and fig. 4; Hoffmeier 1997: 69-70), in which Seti I and his son Rameses (> II) are shown venerating a canonical list of their ancestors, tracing their past back to Menes (= Narmer?). The Eg. example is slightly different, in that while all the names of the past are in front of the king and prince, Menes begins the list (top left) and is therefore paradoxically nearer the present than his

successors. Fifty-six kings of the Old Kingdom are listed (dyns. 1-8), followed by nine kings of the Middle Kingdom (dyns. 11-12), nine of the 18th dynasty and finally Rameses I and Seti himself of the 19th. Kings of the intermediate periods and two 18th dynasty kings are omitted. The proximity of Menes may itself be a pointer to an appeal by the Egyptian kings to their prototypical ancestor, to whom was credited the unification of Egypt. They thus go back directly to their roots, only subsequently looking to the intermediate figures of the past who constitute the apostolic succession. The omission of those kings and even entire dynasties that were seen by later ages as discredited is itself an indication that this king-list too is strictly historiographical, in the sense that a process of deliberate selection, amounting to a historical judgment, has taken place before the acceptable text is committed to the walls. The kings of the Ug. list may also be selective. We shall see reason to believe this in the omission of Ibiranu from KTU 1.161 below. We have no means of knowing whether this is (in the original form of the text) a complete list of kings going back into the third millennium, to a putative 'founder' Yaqaru, son of a non-royal Niqmad, or whether it too is the product of ideological selection. In any event, a line of descent, quite probably fictitious (so far as genetic descent is concerned throughout the line) is traced back from the present for a period of some centuries, linking each king to his predecessor. Kitchen estimates a period of up to seven hundred years. Though 'sonship' is not attributed here, it is likely that a father-and-son relationship between each of them was imagined, for this was part of the legitimization which was undoubtedly the object of the exercise. I have added numbers in the present list simply to show how many of certain PNs occur on the list. These are the revised numbers given by Kitchen.

KTU 1.114: The Myth of El's Banquet: A Medical Text

(KTU 1.114 = RS. 24.258)

Select Bibliography

Virolleaud 1968: 545-51; Loewenstamm 1969; de Moor 1969a: 167-75, 1970c, 1984, 1987: 134-37; Margulis (Margalit) 1970a, 1979–80; Fensham 1971a: 22, 1972; Pope 1972; Jackson 1974; Rainey 1974: 184-87; Dietrich, Loretz and Sanmartín 1975h; Xella 1977; L'Heureux 1979: 159-69; Cathcart and Watson 1980; Dietrich and Loretz 1981: 88-98, 1993; Spronk 1986: 196-202; Pardee 1988a: 13-74, 1997c: 302-305; Caquot 1989: 71-78; Watson 1990; McLaughlin 1991: 270-74; Cathcart 1996; T.J. Lewis in Parker 1997: 193-96.

This small tablet, of which perhaps the bottom quarter is missing (which would amount to about 12 lines) is in the form of a myth, narrating a feast held by El in his temple, culminating in El falling down drunk and being carried off home in a state of collapse. The last 3 lines (29-31), separated from the main text by a faintly scored horizontal line, consist of medical instructions on how to cure a hangover. We tend to think of intoxication as a purely secular and disreputable matter. To the ancients the effects of alcohol were understood to be a form of divine possession, and the consumption of copious draughts of wine was an important feature of cultic as well as social activity. Here was a form of worship into which all could enter with a will! In Ugarit, as in other WS societies, there was a regular institution established for communal drinking, perhaps a mixture of social club and religious association, known as the *marziḥu*. Texts such as KTU 3.9[1] detail legal procedures in the organization of such 'clubs', which were usually dedicated to a particular patron deity. The so-called 'temple aux rhytons'[2] discovered in the centre of the tell at Ras Shamra, with a niche at the west end and benches round the walls, may have been the temple of El, mentioned as 'his house' in ll. 1 and 17, and perhaps the same building or an adjacent one to the *mrzḥ* mentioned in l. 15.[3] This however remains unproven. The interpretation of Margalit (1979–80: 117),

1. See Fenton (1977), Halpern (1979–80), Friedman (1979–80) and Dietrich and Loretz (1982).
2. See Mallet (1987) and Yon (1987b, 1996).
3. See also Mallet (1987), Yon (1996) and Pardee (1997c: 303).

who in the tradition of Pope (1955) and Oldenburg (1969) sees this as evidence for a 'slighting of El' in a history of rivalry between his cult and that of Baal, and the comparable view of de Moor (1987: 134-35), who estimates that 'his shameful conduct is indicative of his impending downfall...' are in my view equally without foundation. This is not only to import an alien ethic (indeed an absurdly moralistic posturing) into the interpretation of ancient texts, but to misconstrue the symbolic parameters of this kind of mythology. El's behaviour, like that of Thor, Soma, Zeus and other gods with gargantuan appetites for liquor, is regarded as heroic. The ethos is still alive in the Celtic societies in western Europe!

The notes below do not attempt a full survey of the huge range of meanings offered for most of the controversial words in this text. The text has been interpreted as a palimpsest in view of the number of words appearing in diminutive script between ll. 7 and 10 (see Dietrich and Loretz 1993, *KTU*^{2}, 129), but these may also be construed as interlinear glosses or corrections (thus Margalit). A horizontal line (in addition to the one noted above) appears half-way across the tablet between ll. 7 and 8.

1.114 R 1 In his house El[4] gave a feast[5] of game,
the produce of the hunt[6] in the midst of his palace[7].

4. Confirmation that *il* here is the DN El, rather than the generic term, is given by the expression *il abh*, 'El his father', occurring in l. 14.

5. Ug. *dbḥ*: lit. 'slaughter', with the contextual senses of 'feast' or 'sacrifice'. Here the former sense may apply, and includes the whole process from preparation to consumption. Cf. KTU 1.1 iv 28; 1.16 i 39-40; 1.20 i 1. The divine feast is the theological paradigm of the procedures of the cult, in which, with human personnel as the subjects, *dbḥ* has the specialized sense of 'perform a sacrifice'. Cf. Virolleaud's (1968: 549) remarks on the nuance of the vb in the present passage, and note Pardee's (1988a: 24-26) comments.

6. Ug. *mṣd*. See Loewenstamm (1971b). On the prosody, dividing *mṣd*, *ṣd* between the cola, already recognized by Virolleaud (1968: 546), see Margalit (1979-80: 73-77; he corrects *ṣd* to <*m*>*ṣd*), Pardee (1988a: 20, 23-24) and most recently Cathcart (1996: 2). Loewenstamm's (1969: 73) stichometry, dividing the cola at *bbth* | *mṣd ṣd*, followed by Dietrich, Loretz and Sanmartín (1975h: 109, 111) does a disservice to the prosody. The latter group, however, regard *mṣd*, *ṣd* as dittographic, and print {*mṣd*} *ṣd*. Both terms relate to hunting (√*ṣwd*), without specifying the quarry. Caquot (1989: 73) and others: 'venison' for *ṣd*. I see no problem with the hunting aspect here, so long as it is recognized that this is a feast in which the quarry has been brought back. Margalit's (1979–80: 79-80) anxiety (about

He cried:
'To the carving[8], gods[9]!
Eat, O gods, and drink!

Drink wi<ne> until satiety,
foaming wine[10] until intoxication!'[11]

hunting in a palace!), which leads him to propose an appeal to Akk. *ṣidītu*, Heb. *ṣēdâ*, 'travel provisions', is unnecessary. His further stricture (p. 94), that wild animals never feature in the cult, is answered on two grounds. Firstly that it is not true (the Eg. temple-lists enumerate wild animals in profusion, and Aqhat is exhorted to make an offering of his first hunting-quarry, *pr'm ṣdk*, in KTU 1.17 v 37 [and n. 87]), and secondly that this feast may as well be modelled on the royal hunt as on cultic practice. In addition, it may be that the gastronomic tradition on which the text draws is not the temple but the *marziḥu*. Cf. also Pardee's (1988a: 29-33) extensive discussion, in which he mentions boar and stag as victims offered to Adonis and Dionysos respectively, and as to royal menus mentions Solomon's in 1 Kgs 5.3, and those of various Assyrian kings. Anat and Athtart are also associated with the hunt respectively in KTU 1.17–1.19 and 1.92, which undoubtedly had a bearing on their sacrificial diet.

7. Or 'temple'. As commonly in the religious texts, the term *hkl* has both the nuances of temple and palace.

8. Ug. *qṣ*. Virolleaud (1968: 547, 549): 'to awaken' (Heb. *qyṣ*). Most 'the carving': e.g. de Moor (1969a: 168; 1987: 135) and Cathcart and Watson (1980: 37); √*qṣṣ*, 'to carve'. See Pope's (1972: 176-78) discussion of the term. 'To the banquet': Caquot (1989: 73). 'To the feast', n.: Pardee (1988a: 22); 'to partake', vb.: Pardee (1997c: 303).

9. Text *ṣḥ lqṣ ilm*. Anacrusis and first unit of a bicolon. Others treat as one narrative colon, with the direct speech beginning in the following colon, and referring to the gods in the 3rd p. Thus 'He called the gods to the banquet...'. But can the vb *yṣḥ* have the trans. sense of 'summon', with *ilm* as obj.? In all other Ug. instances, as far as I know, it is intrans. And the word order would be strange, even in verse, on this interpretation.

10. Ug. *trṯ*: cf. Heb. *tîrôš*: the first wine of the vintage, still fermenting and gaseous, and therefore having immediate effect on the consumer. This appears to locate the events in the autumn, as the new wine becomes available. However, *yn* || *trṯ* is perhaps a standard word-pair (if to be restored at KTU 1.5 iv 20 in addition to its occurrence here and at l. 16), and so not too much weight should be put on the usage. The present myth is concerned not so much to narrate some specific cultic situation (though this is not impossible, of course) as to represent a paradigm for intoxication and its cure.

11. Most other interpreters have these vbs in the 3 pl. indic. In accordance with above: Dietrich, Loretz and Sanmartín (1975h: 109) and Cathcart (1996: 2).

1.114 R 5 Yarih arched his back like a d[o]g[12];
he gathered up crumbs[13] beneath the tables[14].
(Any) god who recognized him
threw[15] him meat[16] from the joint.[17]

12. Ug. *y'db yrḥ gbh*. This has been construed in a variety of ways. The translation above follows that of Margalit (1979–80: 71). I take it that some gesture of Yarih, perhaps stretching, evokes the picture of a dog, and he easily slips into this role in view of the later significance of the dog's hair. What is usually construed as the possessive *-h* on *gbh* more convincingly relates back to the subj. *yrḥ*, than to an antecedent (*mṣd* || *ṣd*) six and five cola previously. Cf. Virolleaud (1968: 547): 'so he prepared its *yrḥ-gb*'; de Moor (1969a: 168, followed by Cathcart 1996: 2): 'Yariḫu prepared its back flesh'; Pope (1972: 172): 'he prepared and mixed his *tripe* (?)'; Cathcart and Watson (1980: 37): 'Yariḫ leaves his couch'; de Moor (1987: 135): 'Yarikhu put down its saddle-meat'; Pardee (1988a: 22; cf. 1997c: 303): 'Yariḫu prepares himself a cup'; and Caquot (1989: 74): 'Yarikh helped himself to a (piece of) spine'. The expression 'like a dog' goes better as a qualification of how Yarih stretches, and thus belongs in this colon; as a qualification of picking up crumbs or whatever (thus most) perhaps it performs a double duty. Pope (1972) cites some interesting iconographic evidence of the widespread dog-under-the-table motif, but they are generally in a funerary context, and therefore distinct from the *marziḥu* institution, which has no such intrinsic associations. Nor, incidentally, is there any hint in the present text of any sexual activity. All the excess is gastronomic. The interpretation according to which Yarih legitimately helps himself to the back of the roast runs counter to the indignation of the porter that he receives choice cuts from Anat and Athtart. His canine quality would seem to preclude him from any involvement *above* the table.

13. Ug. *yqṯqṯ*. Virolleaud (1968: 547, 549) translates 'hides (?)', but compares with Ar. *qaṯṯa*, 'to draw towards oneself'. De Moor (1969: 168): 'he tore it out', citing the same Ar. √, which he translates 'to drag, pull out'. Note Pope's (1972: 180) observations on this. He (p. 172) translates 'tapped', citing MHeb. and THeb. *qišqēš*, 'to knock, strike, strike'. Cathcart and Watson (1980: 37): 'moves about'; Caquot (1989: 74): 'he drags it (his joint)'. Pardee (1988a: 22): 'like a dog he fills it' (but how does a dog fill a cup?). Pardee (1997c: 303): 'like a dog he drags it (the cup)'. For the present sense, of gleaning, gathering up scraps, see n. 146 to KTU 1.2 iv 27. Cf. Heb. *qāšaš* I and II (hithpolel): 'glean', MHeb. *qašqēš*, 'move back and forth' (Loewenstamm 1969: 74; Margalit 1979–80: 82-83). We may alternatively translate 'he scavenged'.

14. Cf. Mk 7.28. But the apparent echo is probably fortuitous.

15. On the considerable range of nuances in the meaning for √*'db* see Pardee (1988a: 35-36) and *DLU*, 72-73. In l. 4 above ('arched') the underlying sense is 'to raise up', which has a technical cultic sense in KTU 1.23.54 (*'db*, n., 'offering'). The same sense as the present one occurs at ll. 10, 12, 13. See Cathcart and Watson (1980: 42).

But (any god) who did not recognize[18] him
hit him with a stick[19] beneath the table.[20]

At the call of[21] Athtart and Anat he approached.[22]

1.114 R 10 Athtart threw him a haunch[23],
and Anat a shoulder of meat[24].

16. *KTU*^{2} (p. 130 n. 1) points out that 'underneath *m* (of *lḥm*) parts of the original text are clearly visible: ×[[×]]*d mṣd*'. Cf. also n. 21.

17. The *d mṣd* of the previous n., construed as *m* + *ṣd*. If Yarih had his own joint, on some translations, further ones would be superfluous. See also at n. 12 (end). This supports the view that he was merely given scraps under the table. With El apparently as subj. de Moor (1969a: 168; cf. 1987: 135) takes *dyd'nn...<d mṣd>* of ll. 6-7 to mean 'under the tables he put down food for the god whom he knew'. Cf. Margalit (1979–80: 84-85).

18. 'Recognize' (√*yd'*) rather than 'know'. Presumably it was Yarih's canine form or behaviour which would fool some of the other gods. 'Favourable... unfavourable': Margalit (1979–80: 84). The fact that there were gods who did not recognize him precludes *il* in the preceding colon denoting El, since it is part of the contrast between two groups of gods. Cf. (Pardee 1988a: 44-45).

19. Ug. *ḫṭm*: the *-m* is adverbial (instrumental). Cf. Margalit (1979–80: 72 n. 13). Or perhaps 'on the nose' (rather: 'muzzle') according to Margalit (1979–80: 72 n. 13: text as above).

20. De Moor (1969: 168; 1987: 135) has Yarih, who prepares the meat (*gbh*), the subject of all the activity in ll. 4b-8. But the sequel, in which Athtart and Anat are rebuked for feeding a now unidentified dog, reads curiously.

21. The signs *bqr* appear in miniature beneath the *lm* of l. 8. Cf. *KTU*^{2}, n. 2. I accept Margalit's (1979-80: 86-90) view that the word should precede the following l. 9. He cites Ar. *qarqara*, 'bray (of camel)', and Heb. *qarqēr*, 'shout' in support. Reading *bqr'*, Spronk (1986: 199) treats it as a gloss on *ḫṭm*: 'with a rod'. See Pardee (1988a: 45-47).

22. Yarih, in the form of or behaving like a dog, must be the subj., because the vb is 3 m. sg. Discussion in Margalit (1979–80: 87). Virolleaud's (1968: 547) ' 'Aštart and Anat arrive' is impossible.

23. The precise sense of *nšb* is not yet clear, but its meaning as a butchery term is clear from KTU 4.247.18. See Cathcart (1987); Pardee (1988a: 50 and n. 216).

24. Ug. *bhm*. As a prep., 'at them' (supposedly 3 c. du.) the word-order is difficult even in verse, with all the contortions of Browning! I have accepted Margalit's (1979–80: 90) explanation of this as a n. Cf. Heb. *bᵉhēmâ*. He also cites KTU 1.19 ii 39 in support. The porter can now address the feasters at large, while still directing his ire specifically at the goddesses. Note Pardee's (1988a: 51) desire to do something useful with *bhm*. But he demurs at 'lamb' (from Margalit with earlier refs.) on syntactic and prosodic grounds. See also at l. 27 (and n. 45) below.

The porter of El's house[25] shouted:

'Look[26]!
Why have you[27] thrown a haunch to the dog[28],
(why) to the cur have you thrown a shoulder?'[29]

He shouted at El his father[30].

1.114 R 15 El summoned his drinking-companions;[31]

25. A priestly office in a temple. In the myth this character will be a minor god, who like the porter in *Macbeth* is officious in the exercise of his duties. How far the temple priesthood would see themselves as impersonating gods (as in Egypt, where they wore masks conforming to divine iconographic conventions for certain rituals) remains imponderable. Reshef is the 'porter' of Shapsh in KTU 1.78.

26. Ug. *pn*. Imper. of √*pny*, Virolleaud (1968: 550) and Margalit (1979–80: 97). This would require to be construed as a denom. on *pn*, 'face'. The normal Ug. for 'see' is √*ph*(*y*) (*UT*, 467 §19.2025). Pardee (1988a: 51, 53): 'lest...' with the porter's words a command to prevent the goddesses serving the dog. But it would be natural for goddesses of hunting to feed their dogs.

27. 'They...': Margalit (1979–80: 72).

28. Text *rlb*. Read *k*[!]*lb*. See discussion at Margalit (1979–80: 96-97).

29. Perhaps the rebuke is because choice cuts are being wasted on a dog? We have apparently advanced from the simile of Yarih behaving like a dog to a metaphor of him being one. At any rate, this dog is one of the gods. (Cf. *klbt ilm* at KTU 1.3 iii 45 and n. 52, and the problem of *klb ilnm* at KTU 1.19 i 10 and n. 183). The link with Yarih may not be fortuitous, since Gk Hekate, a lunar goddess, is also closely associated with dogs (West 1995: 201-10). Since she has oriental antecedents, we would expect similarities in the hinterland of Ugaritic belief, however tenuous the surviving evidence. See Pardee (1988a: 41-42).

30. Presumably the porter wants to complain that El should be so indulgent as to allow the goddesses to waste good food on dogs. As with the encounters between Anat and El, in which the goddess addresses him without inhibitions (KTU 1.3 v 20-31 and n. 72, 1.18 i 8-20 and nn. 129-30), this is not to be construed as weakness on El's part. He plays the indulgent *paterfamilias*, in the knowledge that his authority is ultimately beyond challenge. This is commonly represented as typical of a bankrupt (polytheistic) theology. On the contrary, it is the great strength of a polytheistic system (in so far as it is systematic), that it uses the realism associated with normal human discourse and social dynamics as the symbolic medium in which metaphysical problems, as well as social dissonances, are thrashed out and resolved.

31. The text is damaged. Virolleaud (1968: 547): *ữtb.il*[*b*(?)] *aṯrt* ('...Athirat'). Pope (1972: 171): *ữtb.il*[*b*(?)] (15) *aṯ*[*rh*] ('...[his pl]ace', parallel to *mr̄ẖh*). Similarly Margalit (1979–80: 98-101). Cathcart and Watson (1980: 36, 38): *ữtb.il*[*bn*] (15) *aṯ*[*rt*] ('...like a s[on of Athi]rat'). The form of the simile is odd, since El is presumably the father of 'the sons of Athirat'. Pardee (1988a: 14, 22, 54-55; 1997c:

El took his seat in his feasting house[32].

He drank wine to satiety,
new wine until intoxication.

El went off to his house;
he stumbled off[33] towards his dwelling[34];
Thukamun and Shanim[35] supported[36] him[37].

304 and n. 11): *yṯb.il.k*[*r*] (15) *aškr*[*h*], ('El sits down, he gathers [his] drinking [group]'). Cf. *KTU*^{2}. The putative *aškr* is related to √*škr*, 'become intoxicated' of ll. 4 and 16. My main objection to this (otherwise attractive) reconstruction is that it results in two main vbs in one colon. If it be read (with l. 15) as a tricolon (El sits down, | he gathers [his] drinking [group], | El sits in his feasting-house'), which solves this problem, it falls foul of the prosodic rules enunciated by Margalit (1979–80: 76), though these are not universally accepted. Note that Pardee's (1997c) translation has solved this problem: 'Ilu calls together (√*ṯb*) his drinking [group], | takes his seat (√*yṯb*) in his drinking club'. This reading, adopted here, is also accepted by Cathcart (1996: 3), though his translation needs revision. De Moor's (1984: 355-56) suggestion 'henbane', adopted by Spronk (1986: 199) is unnecessary. See Pardee's remark (1988a: 55). Margalit (1979–80: 98) reads both vbs as 'was presiding'.

32. Ug. *mrzḥ*. See Pope (1972: 190-94) for a general treatment of the institution. If in view of Pardee's (1988a: 56) comments we hesitate to identify the *marziḥu* as specifically El's, we might translate the final *-h* as directional, but this would in turn require a reappraisal of *yṯb*.

33. Ug. *yštql* surely invokes a falling motion. Št of √*ql*.

34. Ug. *ḥṯr* for *ḥẓr*. See de Moor 1969a: 172. Not *ḥẓr* on the tablet, as many transliterate it, including *KTU*^{2}.

35. Pardee (1988a: 59) hesitates to affirm the identification of this divine pair with the Kassite deities Shuqamuna and Shumaliya, on the grounds of the considerable distance between the latter two names. The problem is easily solved however if we accept Mironov's (1933: 143) etymology for *šumaliya*, as deriving from Skt. *su* + *mālya*, 'having a beautiful garland', an epithet of Uṣas the dawn-goddess. This has been paraphrased in the WS form *šanimu*, 'bright'. See Wyatt (1990a: 446-47). This may remain hypothetical, but it establishes a case. See also n. 39 at KTU 1.1 iii 24 for further discussion.

36. Note how the supporting action (√*'ms*) of his companions complements El's falling action (√*ql*) in the previous colon.

37. The image is rather unbecoming to a modern reader, but is an honourable one, given the presuppositions of the text. Thukamun and Shanim fulfil the duty incumbent on the righteous son (KTU 1.17 i 30-31 and parallels; see n. 37 *ad loc.*). While these deities do not even feature in the pantheon list of KTU 1.47 = 1.118 = RS 20.24, they appear, mentioned before El and Athirat, in KTU 1.65.4. Cf. also their mention in KTU 1.123.8: this text lists a number of deities in pairs. Their

A creeping monster[38] approached him[39],
1.114 R 20 with[40] horns and tail!
He floundered[41] in his (own[42]) faeces and urine:

position in KTU 1.40, 1.25, 1.34 and 1.43 (and putative position in missing parts of the text, involving a six-stage ritual, *qv.* above) as the immediate recipients of the sacrificial victim offered up in the atonement rites for the city is an indication of their considerable rank and theological importance. We do well not to reach too far-reaching conclusions on the importance of individual deities on the basis of one genre alone of texts.

38. Ug. *ḥby*. See Gordon (1985, 1986; seeing here a prototype of Satan); seen as a chthonian deity, but without a full endorsement of Gordon's view, by Xella (1995b). De Moor (1969: 169; 1987: 136), followed by Spronk (1986: 199 and n. 4), translates 'steward' (Eth. *ḥabi'*). He identifies the steward as 'a faun-like demon' (1987: 136 n. 10). See Cathcart and Watson (1980: 39-40) for the range of possible meanings of *ḥby*. Their suggestion that *ḥbl* be read is unconvincing, since the *y* is clear. But their alternative, *ḥb ḫḫ*, 'embracer of filth', is interesting (*y* and *ḫḫ* being identical in cuneiform). Pardee (1988a: 60-62), following on from suggestions by Liverani (1969: 339) and Xella (1977: 246 n. 33) wonders whether another candidate may be Eg. *ḥpy*, sc. Hapi, the deified Nile worshipped in the incarnation of the Apis bull. He would thus provide the necessary horns and the tail. He further suggests that we may have here an *alter ego* of Yarih, who in his canine form is similar to Anubis, the latter and Apis both being psychopomps. But while Mesopotamian moon-gods appear as bulls, the Eg. form does not, being an ibis or baboon as Thoth, and a child or even a falcon as Khons. Pardee concedes that we know little of the dissemination of the Apis-cult. The suggestion is intriguing but must at present remain conjectural. Cathcart (1996: 5) has a further interesting proposal, that *ḥby* is a scorpion.

39. Ug. *ngšnn*. Cathcart and Watson (1980: 36) translate as 'they met (*Ḥby*)' (which would have El, Thukamuna and Shanim as subj. of the vb.). Their alternative explanation (p. 41) of the √ would provide a viable translation as follows: 'A creeping monster oppressed him' (Heb., Aram. *nāgas*, instead of Heb. *nāgaš*, 'approach'). Cf. n. 79 at KTU 1.6 ii 21.

40. Ug. *b'l*, in its functional sense. Margalit's (1979–80: 72) introduction of Baal as an additional character, with his consequently different treatment of the sequel, is unnecessary.

41. Ug. *ylšn*. See Pope (1972: 196), followed by Cathcart and Watson (1980: 41). Or 'defiled himself'. The word is best taken, among a number of possibilities, to be a cognate of Ar. √*lšš*, occurring in the redupl. form *lašlaš*, 'to run to and fro in fear' (defaecating). De Moor (1969: 169; 1987: 136): 'blamed...scolded' (√*lšn*). 'Wallow': Xella (1977: 240). Further discussion in Pardee (1988a: 64). Cf. Cathcart's (1996: 3, 6) translation.

42. Many take it that the character who falls is El. But in whose faeces? His own, or the monster's? The obvious way to construe the syntax would be that it is

El fell down as though dead;
El was like those who go down into the underworld.[43]

Anat and Athtart went out hunting
[ ]
1.114 V 25 [ ][44]

Athtart and Anat [returned]
And they brought back meat[45] [ ]

When they had cured him, he awoke[46].

(This is) what needs to be put on his forehead[47]: dog-hair[48] and the knot of a vine[49] and its juice[50]. They should

El's, the suffix referring back to the subj. of the preceding vb. The further mention of El in the next colon (the next syntactic unit) would appear to confirm this. Xella (1995b) suggests that it is the latter's (though he is ambiguous). Pardee (1988a: 63-64) takes it that Hapi, the bull, strides through his (own) excreta. This may make more sense, and would also remove from El the stigma (which some are only too determined to place on him!) of being simply incontinent as well as drunk. But as Pardee concedes, 'there are two big "ifs"...' and he finally and reluctantly concludes that El has disgraced himself. For Cathcart (1996) it is the scorpion that 'defiles itself in its excrement and urine'.

43. De Moor (1969: 169; 1987: 136) takes these three cola to be a speech by 'the steward' (*ḫby*) who blames (*lšn*) El for his behaviour. (See n. 38.) There is no reason to interpret this reference to death as having any direct connection with funerary rites or a mortuary cult. If it is a wake (Cathcart and Watson 1980), it is one without a corpse, except in so far as when one is really drunk one feels like death. It sounds like a good description of too much alcohol! But it may give us some insight into the theological significance attributed to intoxication. It appears to have been interpreted as a mystical descent into the underworld, and the following ascent (on recovery) would perhaps be interpreted as a form of spiritual renewal. In the myth El himself establishes the paradigm.

44. An indeterminate number of lines is missing from the end of the recto and the beginning of the verso, perhaps about 12.

45. Ug. *bhm*, which I have translated as at l. 11 above. As 'with them' it is unconvincing.

46. Ug. *n'r*. See Margalit (1979–80: 113), who explains this as √*n'r*, 'shake up' or N stem from √'(w)r(r), 'awaken'. For the latter see Pardee (1988a: 67-68) and Cathcart (1996: 3).

47. Ug. *lṣb*, as at KTU 1.4 iv 28 etc. See Cathcart and Watson (1980: 40-41).

48. Lit. 'the hair of a dog'. This commonplace English expression has an ancient pedigree! Nowadays it means the further drink the alcoholic takes to reduce the hangover. It is probably not a reference to a real dog-hair, however, but to a plant of this name: Pope (1972: 199, citing Thompson 1949: 23) draws attention to

be applied together[51] with virgin[52] olive oil.[53]

Akk. *šêr kalbi* ('dog-hair'), a plant with medicinal properties, 'mixed with oil and taken internally for intestinal and urinary problems'. (Pardee [1988a: 68-71] cites numerous passages which deal with the ritual and medicinal use of real dogs' hairs.) No doubt some lateral thinking is afoot in this whole medical prescription, in which the effective word of the ritual, the preceding myth, alludes to a dog whose hair is now used metaphorically in the application of the herb. Thus also Pardee (1988a: 42, 69-70). The dog's further association with Yarih above may well have also had a bearing on the preparation of the medicine, which may have coincided with a particular phase of the moon. But the details of this can only remain conjectural.

49. Ug. *pqq*: Pope (1972: 199) excludes this from identification as Akk. *piqū*, *piqūtu*, 'colocynth', another medicinal herb, on philological grounds (the Akk. has a radical '). But some plant seems a likely candidate. Cathcart and Watson (1980: 43, 47): 'knot of a vine shoot' (perhaps related to MHeb. *peqeq*. cf. also Hos. 10.1, *gepen bôqēq*, 'luxuriant vine').

50. Ug. *šrh*. Pope (1972: 200) notes Sum. ŠE.RU.A (Akk. *šer'u*?), 'liquorice', but does not identify it with the present term. Cathcart and Watson (1980: 48) point to Num. 6.3, *mišrat ʿᵃnābîm*, 'juice of grapes'.

51. Ug. *aḥdh*. 'Together', sc. in an emulsion: cf. Pardee (1997c: 305 n. 26). 'At one gulp': Caquot (1989: 78 and n. 248). The term occurs in the application of medicines in the hippiatric texts (KTU 1.71.6, 8, 10, 25; 1.72.8, [10], [14], 20, 24, 35, 39; 1.85.6, 8, 11, [15], [22], [28], 32).

52. Ug. *ḫrpnt*. Following Loewenstamm (1969: 77) and Pope (1972: 201) rather than Margalit (1979–80: 116). Akk. *ḫarpiš*, 'early' (<*ḫarāpu*, 'be early'). Cf. Caquot 1989: 78 n. 247.

53. Xella (1977: 249) calls this a 'therapeutic and ritual appendix'. While it is clearly an independent composition, belonging to a genre of medical prescription, it is probably the *raison d'être* for the writing of the tablet, which is 'applied mythology', here in a medical setting, and may be compared with similar applications, such as KTU 1.23, famine, KTU 1.24, weddings, KTU 1.100, and probably KTU 1.107, snakebite, and KTU 1.124, an obscure ailment. The last three are also medical, and illustrate the way in which the boundaries of autonomous disciplines and skills have changed. Medicine, psychiatry, various aspects of law and order (particularly moral issues), all aspects of prognostication, oath-taking and many elements of political life involving ritual activity were all priestly functions. The final three lines were formerly interpreted quite differently. See, e.g., Virolleaud (1968: 551) and de Moor (1969a: 169). An older mode of interpretation is typified in Margalit's (1979–80: 72) translation of the final section: 'Let ḫš-leaves be placed on his mouth, massage the heart and head, (as well as) the navel-knot and its 'cord'; together with this let him drink pure olive-oil', and Cathcart and Watson's (1980: 38) version: 'What the troubled one should put on his forehead, settling heart and head: the knot of a vine shoot and its centre he should put, together with autumnal olive juice'. For some further translation suggestions see Watson (1990).

KTU 1.117: The Plea for a House for Baal

(KTU 1.117 = RS 24.263)

Select Bibliography
Herdner 1978, 64-67; Pardee 1988a: 257-60.

A small bottom right-hand-corner fragment of a scribal exercise tablet, less than half a tablet-width, with an excerpt from the formulaic language of KTU 1.3 v 33-41 (see nn. 73, 74 *ad loc.*), 1.4 i 4-16, iv 45-55 (see n. 131 *ad loc.*), and a further passage thus far unparalleled. Lines are scored unevenly across the tablet between each line of text as with KTU 1.101 and 1.108 above (representation here is schematic).

1.117 R 1 [ ]
We should all bring his chalice,

[we should all bring his cup.]

[Groaning he cries to Bull] El his father,

---

to El the ki[ng who begot him.]

[He cries to Athirat] and her sons,

---

to the goddess [and the band of her kinsmen:]

['There is no] house for Baal like the gods,

1.117 lower edge 5 [nor dwelling like the sons of Athirat.]

[E]l [has a home],

1.117 V 10	And Pidray replied:
	'[ ] your dwelling...'

KTU 1.119: The Ritual Calendar for the Month of Ibaalat and Another Month and a Prayer for Ugarit Under Siege

(KTU 1.119 = RS 24.266)

Select Bibliography

Herdner 1972, 1978: 31-39; Xella 1978b, 1981: 25-34; Saracino 1983a, 1983b; de Moor 1987: 171-74; Parker 1989: 70-72; de Tarragon 1989: 206-11; del Olmo 1989b, 1992a: 197-205; Pardee 1993b: 213-18, 1997c: 283-85, 2000: 661-85; Avishur 1994: 253-76; Watson 1996a.

This tablet, of which perhaps the bottom third is missing, consists of an offering-list on the recto and on the verso down to l. 25, concluding with a votive prayer to Baal used in time of siege. Herdner (1978: 31-33) shows a number of faint horizontal lines traced either wholly or partly across. These are hardly visible on the recto owing to the deterioration of the surface. Those on the verso are not marked here. Herdner (1972: 696) expresses some surprise at the nationalist sentiment of the prayer which closes the text in so cosmopolitan a community as Ugarit. But pride in citizenship undoubtedly generated a sense of corporate identity in proportion to Ugarit's sense of autonomy in the never-ending diplomatic game of playing off one rival superpower against the other. The prayer which concludes this text is thus far unparalleled in Ugaritic literature, but as a liturgical composition bears a resemblance to the Hebrew Psalms.

1.119 R 1 In the month of Ibaalat[1], on the seventh day, a ram to Baal of Ugarit[?2] [ ] and (in[3]) the temple of Baal of

1. Ug. *ib'lt*. This month-name was hitherto unattested in Ug. It appears in Akk. in RS 25.455A + B as *ib-a-la-ti*. Xella (1981: 27-28) identifies it with the Phoen. month of *p'lt*. De Moor (1987: 171 n. 1) opines that, meaning 'Where-is-the-Mistress?', it possibly denotes 'the month in which 'Anatu/'Athtartu's descent into the Nether world was commemorated'. De Jong and van Soldt (1987–88: 69-71) place the month as the sixth, in January–February, while Pardee (1997c: 283 n. 2) places it in December–January, the time of the winter solstice.

2. The text reads *b'l r'kt*, the second word a *hapax*, according to *KTU*^{2} (*KTU*^{1} corrected to *'rkt*). *KTU*^{2} (p. 134 n. 2) suggesting *ugrt* as an alternative reading, following the discussion by del Olmo (1992a: 199 and n. 10): it is provisional. Del Olmo explains it by haplography, and notes other misspellings on the tablet. He writes it here as *<ug>rt*. Cf. l. 3. Xella (1981: 26, 28): 'buildings (?)', reading *'rkt*,

Ugarit [ ] a ram [ ]. At sunset[4] the king is desacralized[5].

1.119 R 5 On the seventeenth the king shall wash himself thoroughly[6]. A heifer (to) the sanctuary of El[7]; a heifer to the Baals[8]; a heifer to the Divine Assistant[9]. Two ewes and

with the suggestion that it is related to the form *b'l 'rkm* of KTU 1.105.17-18 (in *KTU*[2]; *KTU*[1] ll. 3-4). Xella (1981: 36) translates this as 'Baal of the buildings', while del Olmo (1992a: 166 and n. 94) translates it as '(for) Baal, two *'rk-m*', explaining the term with reference to de Moor (1970a: 318) 'two loaves of layer-bread'. De Moor (1987: 172), reading (de Moor and Spronk 1987: 70) *r'kt.šl*[ ], begins a new sense-unit with the word, (tentatively) 'biscuits, a ram for [ ]'. De Tarragon (1989: 207): 'a ram for Baal in *'rkt*-offerings', which introduces an unknown category of offering. Pardee (1997c: 283 and n. 3) takes *r'kt* as an unexplained divine epithet, 'apparently a hypostasis of Baal'. The tablet surface is in such a state that no proposed reading remains above suspicion. The present translation, following del Olmo's suggestion, is provisional. All things being equal, however, since the text is concerned primarily with the patron deity of Ugarit, who certainly appears four more times in ll. 3, 9-10, 12, 21-22, and is evidently the subject of the prayer of ll. 26-36, the gratuitous introduction of an entirely different, and hitherto unattested, form of the deity in l. 2 is improbable.

3. Text *bt*. Perhaps haplography for *bbt*. In any case some prep. value is required.

4. Ug. *'rb špš*. Cf. *ṣbu špš* at KTU 1.41.42, 47, 1.87.51 (the last two also *'rb*) with the same sense.

5. Cf. Pardee (1993b: 214): 'is clear of further cultic obligations'. De Moor (1987: 172) construes this quite differently: '(Invoke) the sunset and the host of Maliku'.

6. The same phrase occurs at KTU 1.41.[3]; 1.46.10, etc. (*CPU*, I 1023).

7. Ug. *qdš il*. Cf. *bt il* at l. 14 and n. 24. De Tarragon (1989: 207): 'the sanctuary of the god'. De Moor (1987: 172) and Pardee (1997c: 284): 'the sanctuary of Ilu'. Schaeffer (1972: 697) observed that the tablet 'comes from the archive of a priest attached to the cult of El'. (Find spot South Acropolis, 'cella aux tablettes' p.t. 3751 at 3m0: Bordreuil and Pardee 1989: 301.) Contrast del Olmo (1992a: 205), who writes that 'the ritual turns out to be predominantly "baalish" in terms of its intended recipient...'.

8. The seven Baals of the pantheon-lists (KTU 1.47.5-12 and parallels) rather than sg. with encl. Thus de Tarragon (1989: 207 n. 190 '...or his statues'). Cf. Xella 1981: 29. Pardee (1997c: 284): 'the Ba'lu(-deities)'.

9. On Ug. *ǵlm* see n. 99 to KTU 1.2 i 13, n. 30 to KTU 1.169.10, and Xella (1981: 29-30). The present instance and that of *ǵlmtm* in l. 8 (next n.) raise problems of identification. I have given the translation 'Divine Assistant' here (capitals because it is a specific god, not a generic term) in accordance with my discussion above. I take it to be a god of the third rank, such as one of the messenger gods who

a h<ei>fer to the Sacred Brides[10], in the house of sacrifice[11] he[12] will slaughter[13]; and there shall be burnt[14] in
1.119 R 10 the altar-room[15] of Baal of U[!]garit[16] a lamb and a feral

appear in the myths (Yam's assistants, KTU 1.2 i 13-35, Baal's assistants [Gupan and Ugar], KTU 1.3 iii 8-32, iv 5-20; Athirat's [Qadesh-and-Amurr], KTU 1.3 vi 10-25), but hardly Baal himself as for de Moor (1987: 162 and n. 46, 172). But the specific identity of the deity remains unclear.

10. Ug. *ǵlmtm*. The term is du., but it is unnecessary to state this in translation, if my proposed identification is tenable. The sg. term denotes a bride in a sacred marriage tradition (as in KTU 1.24.7), or a royal bride who is mythologically represented in this form (as in KTU 1.15 ii 22). The term used of a goddess, receiving an offering, occurs in KTU 1.39.19, 1.41.25 (= 1.87.27), 1.123.19. 1.139.9 and 1.148.34. The vocabulary KTU 9.3 iii 15 (no text in *KTU*^{2}; see *CPU*, II 1647) may identify *ḫulmatum* with Arṣum (= Arsiy?). The du. usage suggests that avatars of Athirat and Rahmay, who appear as El's brides in KTU 1.23, may be the figures to whom the present term refers. A translation such as 'lad' and 'lasses' for the two terms here is scarcely adequate when they denote deities. Xella (1981: 26) construes the term with the following word *bt*: '...for the two *ǵlmt* of the temple'. Note discussion and further refs. on the two terms *ǵlm* and *ǵlmtm* in de Tarragon (1989: 207 n. 191). Herdner (1978: 32) wonders whether the terms denoted temple personnel. On this understanding we should read 'for...' rather than 'to...' in each case. Cf. *ǵlmt* as 'darkness' n. 171 at KTU 1.4 vii 54 (= 1.8.7). See also *ǵlmt* I and II, *DLU*, 157.

11. Ug. *ṯ'y*. See n. 131 to KTU 1.6 vi 57. Taken by Xella (1989: 26) as the subj. of the following vb: 'the celebrant will offer a sacrifice'. De Moor (1987: 172): 'the house of the officiant shall sacrifice' explained (with ref. to p. 99 n. 483) as the king (Niqmad II) represented by the high priest. Now rather Niqmad III–IV.

12. Presumably the king. Thus de Tarragon (1989: 207). 'The officiant': de Moor (1987: 172).

13. Or: 'will sacrifice'.

14. Ug. (*w*)*tnrr*. The form is *hapax*. Perhaps √*nyr* (cf. Heb. √*nwr*) in D form, 'burn (in fire)'. Thus Herdner (1978: 33), followed by Xella (1981: 26, 30-31): 'and the fire is lit' (3 f. sg.); de Moor (1987: 172): 'and roast' (3 f. sg. with 'the house of the officiant' as subj.); del Olmo (1992a: 200-201): 'and they will be burnt' (3 f. pl.). On the same √, Pardee (1997c: 284) translates: 'you shall illumine' (2 sg.).

15. Ug. *'d*. The term occurs in KTU 1.23.12, where I have translated it 'throne-dais' on the basis of its use at KTU 1.16 vi 22, where it is parallel to *ksi*. Del Olmo (1992: 200): 'in the "testimonial"'; Pardee (1997c: 284 and n. 10): 'the 'D-room'. Xella (1981: 26) and de Moor (1987: 172): 'behind', which is the sense of *b'd* at KTU 1.16 vi 49 (*b'd kslk*: 'behind your back'). Is the *'d* perhaps the room in the temple where the cult-image resides? Its name suggests a raised platform of some kind. The main altar in the Baal temple was in the courtyard at the south end. As del Olmo suggests, the vb *tnrr* may allude to a holocaust.

pigeon as an oblation[17].
On the eighteenth (day) of Ibaalat an ox for the tower[?18] of Baal of Ugarit: both a flame-offering[19] and[20] a wave-offering[21] (are to be made)[22]. The king shall indeed[23] sacrifice in the temple of El[24] (offering) a lung[25] to

16. Text *lgrt*.

17. Ug. *ṯ'*. The precise nuance is elusive. See n. 11 above and n. 131 at KTU 1.6 vi 57 (*ṯ'y*: 'sacrificer'), n. 115 at 14 iv 37 (*ṯ'*: 'votary') and n. 10 at KTU 1.169.2 (*ṯ'y*: 'exorcist'). Following Xella (1981: 26): 'by way of offering' and de Moor (1987: 172): 'as an oblation'. De Tarragon (1989: 207): 'as a *ṯ'y*-offering'. Del Olmo (1992a: 200): 'in honour of the "hero"'. But it is difficult to envisage who this might be. The rough Ugaritic equivalent to the Gk hero was the *rpu*. See n. 9 at KTU 1.161.2. Perhaps an alternative is 'on behalf of the sacrificial personnel'.

18. Text *mdgl*, while 'tower' is *mgdl*. Pardee's (1997c: 284 n. 11) caution is admirable. Others treat as metathesis and translate as 'tower'. Wilfred Watson draws my attention to Akk. *dagālu*, 'look-out'; *madgaltu* 'watch-tower'. Is *mgdl* a metath. on *mdgl*? The idea of the tower of the temple as recipient of an offering seems curious, until we realize that temples were widely deified in the ancient world. The towers of the Baal and Dagan temples at Ugarit were of particular significance to sailors, since they formed a pair of beacons guiding ships between the shoals into the harbour at Minet el Beida. Such a cult would perhaps be associated in particular with the votive offering of anchors in the Baal temple. See discussion and references in Frost (1991). De Tarragon (1989: 208, n. 194) draws attention to the temple-tower which Keret ascends in KTU 1.14 ii 20.

19. Ug. *urm*. De Tarragon (1989: 208) : 'at daybreak'. The use of *u*...*u* (next note) makes this an awkward interpretation. At KTU 1.41.[17] the adv. expression *burm* appears to mean 'midday'. See n. 24 *ad loc*.

20. 'Both...and': Ug. *u*...*u*. It can also mean 'either...or', but the text, which is prescriptive, is hardly likely to be providing alternatives. See *UT*, 353 §19.108.

21. Ug. *šnpt*. This has been construed as etymologically identical to Heb. *tenûpâ* (the Hiph. stem used of the vb in Heb., the Š-stem here). 'Wave-offering', 'elevation-offering': Milgrom (1972), Xella (1981: 26, 31), de Moor (1987: 172) and del Olmo (1995: 45). Cf. Lev. 7.30, 8.29 etc. See however Watson (1995b: 544) for the suggestion that it is borrowed from Hitt. *šnpt*, 'community(?) offering', from Hitt. *šipand-*, 'to offer'. This may be preferable (though I have followed the first option here) because we would expect a pt. form **mšnpt*.

22. The syntax is uncertain, because some sections of the text appear to be complete sentences, while others are just lists of items.

23. Ug. *l*. 'Not': de Moor (1987: 172). It is unlikely however that the text would list activities *not* to be carried out.

24. Ug. *bt il*. El's temple according to de Moor (1987: 172) and Pardee (1997c: 284). This temple has not been identified, unless the 'temple aux rhytons' is it. Or:

1.119 R 15 Ish[hara[26] and], a lung to Baal [of Ugarit?]...
and a donkey[27] to [ ]
[ ]

(An uncertain number of lines missing)

1.119 V [ ]
1.119 V 20 On the previous day[28] [the king] is to hono[ur] On the fourth (day), (two?) birds[29]. On the fifth (day), (two?) birds[30] and a liver and a ram as a holocaust[31] to Baal of Ugarit in (his) temple. On the seventh (day) the purifiers[32] shall approach[33]. At sunset the king shall be

'the temple of the god' (sc. of Baal). Cf. n. 7. See also n. 29 to KTU 1.3 ii 17 and nn. 44, 45 to 1.41.[38].

25. Ug. *npš*. De Moor (1987: 172): 'throat'; Pardee (1997c: 284): 'neck'. Perhaps the whole respiratory system, lungs, bronchi and trachea, would be offered as a unit. 'Entrails': del Olmo (1992a: 201).

26. A Hurrian goddess, if the restoration is correct, appearing as *ušḫry* in KTU 1.47.24 = 1.118.23, vocalized ^{d}Išḫara in the Akk. text RS 20.24.23.

27. See n. 17 to KTU 1.40.26. A donkey-sacrifice appears to be a special occasion: there on a day of atonement, here in time of political crisis.

28. This section, with its subsequent references to the fourth and fifth days, has the appearance of dealing with a month other than Ibaalat.

29. Ug. *'ṣrmm*. The form is curious. Herdner (1978: 34), Xella (1981: 27), de Moor (1987: 173) and del Olmo (1992a: 202), 'two birds'. De Tarragon (1989: 208) and Pardee (1997c: 284) translate as pl., the latter (n. 18) discussing the form, which is usually *'ṣrm* in the du. (e.g. KTU 1.87.29, 39), with perhaps an emphatic pl. indicator in the final *-m*. We should certainly expect a pl. to be qualified with a specific number, as with '[th]ree birds' ([*t*]*lt 'ṣrm*), KTU 1.48.3, or 'four birds' (*arb' 'ṣrm*), KTU 1.48.18.

30. *KTU*^{2} *'ṣrmm*. Most read thus. De Moor (1987: 173) and del Olmo (1992a: 202): *š*l*nm*: 'as a peace-offering(?)'.

31. Herdner (1978: 34-35) reads *šš*r[*p*]; *KTU*^{2} reads *šš*rt. Neither is certain. In terms of context Herdner's reading, accepted by Pardee (1997c: 284), followed here, and taken to be two words, (*w*)*š* + *šr*p, is more plausible than Xella's (1981: 32) comparison with KTU 4.341.1-2, where *šš*rt *ḥrṣ ṯqlm kbd* means 'a chain of gold, two heavy shekels (in weight)'. This view has been adopted by de Moor (1987: 173) and del Olmo (1992a: 203). The idea of a gold votive offering is not impossible, but appears anomalous in a list of blood-sacrifices.

32. Ug. *mḫllm*. Thus de Moor (1987: 173) and Pardee (1997c: 284). Hardly 'the profane' (Xella 1981:27, 32-33), though de Tarragon's (1989: 209) and del Olmo's (1992a: 203) view is tenable: 'those who desacralize'. Another possibility would be

1.119 V 25 desacralized. Here is the oil of well-being (for)
Baal. A libation for the queen[34].

Here begins (the liturgy)[35]:

If[36] a strong one attacks your gates[37],
a warrior your walls,

raise your eyes to Baal (saying):

'O Baal[38]!
If you will drive the strong one from our gates,
the warrior from our walls[39],

1.119 V 30 a bull[40], O Baal, we shall dedicate[41],
a vow[42], Baal, we shall fulfil:

to see them as 'pipers' (cf. Heb. √*ḥll* II, Pi., 'play the pipe': the present stem is D). Music would have played an important part in the cult.

33. Ug. *tdn*. Thus Herdner (1978: 35); *DLU* 135, *dny* (Ar. *danā*); Pardee (1997c: 284): 'you shall bring near'. De Moor (1987: 119): 'shall judge'; del Olmo (1992a: 203): 'shall proclaim'.

34. Herdner (1978: 34) reads *mlkm*, and has been followed by most commentators (e.g. Pardee 1997c: 284). De Moor (1987: 173: 'the former kingship') and del Olmo (1992a: 203: 'primordial royalty') have in mind the dynastic god(s) Malik (see KTU 1.47.33 and parallels). Xella (1981: 26) reads *mlkt*, and a colour slide, showing that the end of the putative *-m* is missing (the horizontal stroke is followed by a section where the surface is entirely lost), supports this as a reasonable alternative meaning. Since other routine cultic lists do not involve past kings (contrast KTU 1.161), I think Xella's reading is to be preferred.

35. Ug. *rišyt*. Lit. 'beginning'. Cf. Xella (1981: 27): 'Beginning (of the recitation)'.

36. Ug. *k*. Or 'when', 'whenever'.

37. Ug. *ṯġrkm*. This may refer to one gate or more.

38. Ug. *yb'lm*. Avishur (1994: 259) explains the form as *b'l* with two voc. elements, the initial *y-* and the final *-m*. Anacrusis: Watson (1996b: 27). He calls the *-m* a focus-marker.

39. 'Our gates...our walls' (Ug. *ṯġrny...ḥmytny*). Herdner (1972: 695-96) draws attention to the 1 p. du. suffix *-ny*. We should expect a pl. form. She explains this as referring to the worshippers on the one hand, and Baal on the other. They share the ownership of the city.

40. Though *ibr* is sg., Dupont-Sommer (1972: 699) and Herdner (1978: 37) are perhaps right to understand this as collective, given the crisis.

41. Ug. *nšqdš*: lit. 'sanctify'.

42. *nḏr* (√*nḏr*) instead of the more common *ndr*. Cf. Dijkstra and de Moor (1975: 172-73). Pl.: de Moor (1987: 173).

a male animal[43], Baal, we shall dedicate,
a propitiation[44] we shall fulfil,
a feast, Baal, we shall prepare.

We shall go up to the sanctuary of Baal[45],
we shall walk in the paths of the temple of Baal[46].'

Then Baal will listen to your prayer[47]:
1.119 V 35 he will drive the strong one from your gates,
the warrior from your walls...[48]

43. A crux. Herdner (1972: 694, 696-97; 1978: 33, 35, 37) proposes [*b*]*kr* for the second word in l. 31, which would constitute, she argues, the first evidence from Ugarit of child-sacrifice in extreme circumstances. Cf. 2 Kgs. 3.27; 16.3; 17.17; 21.6; 23.10; Mic. 6.7; Jer. 7.31. She treats [*b*]*kr* as sg. in the first article, but pl. in the second. *KTU*[1] reads [ ]kr. Xella (1978b; 1981: 26) reads [*d*]*kr*, and this has been widely accepted since (cf. *KTU*[2]) *pace* Margalit, de Moor and Avishur. For a general (negative) assessment of the Ug. evidence see Heider (1985: 144-47). The tablet itself is of no help in determining the reading, because a plaque is missing from the surface where the putative **b* or **d* should be. Even *dkr*, 'male', leaves problems unresolved, for as Heider points out the normal Ug. form is *ḏkr* (cf. Heb. *zkr*, Ar. *ḏkr*). The following still maintain the 'first-born' interpretation. Margalit (1983c: 364 n. 20, also reading *ḥtk* for *ḥtp* in l. 32. De Moor (1987: 174) has 'the firstlings of Ba'lu', reading (de Moor and Spronk 1987: 70) *bkr* with Herdner. He cites KTU 1.43.19, where in de Moor and Spronk (1987: 69) the text is read *dkr*, but in de Moor (1987: 170) he reads '[first]lings'. Avishur (1994: 255, 260-61): 'a first-born'. The case for the first-born is unproven rather than impossible, and would gain plausibility with further supporting evidence from Ugarit.

44. Ug. *ḥtp*. This is the Eg. term for 'propitiation' rather than 'booty' as read by Herdner (1972: 695). De Moor (1987: 174 n. 21) draws attention to Spalinger (1978) and Boyd (1986). Avishur (1994: 261, with refs.) also notes Akk. *ḫitpu*, 'a type of sacrifice'. *DLU*, 184.

45. The formula is constr. and gen. (all obj. of the vb) or obj. of the vb followed by voc., as observed by Herdner (1972: 695).

46. Evidently a reference to a cultic procession up through the city to the temple. Avishur (1994: 266) notes that Baal is invoked by name seven times in the body of the 'psalm' (ll. 28-33). Is this perhaps intended to incorporate all seven hypostases of the pantheon list (KTU 1.47 and parallels)?

47. Ug. *ṣltkm*. √*ṣly*. Herdner (1972: 695) cites Akk. *ṣalû*, 'to pray', *ṣelîtu*, 'prayer'.

48. The final bicolon forms an *inclusio* with the similar structure beginning the psalm (ll. 26-27), though it is not part of the cited text: Watson (1996b: 27-28). Pardee (1997c: 285 n. 26) notes that this is the last line of the text, though with a corner missing there may have been a brief conclusion.

KTU 1.124: A Medical Text based on an Oracle Tradition

(KTU 1.124 = RS 24.272)

Select Bibliography

Virolleaud 1968: 563-64; de Moor 1970b: 303-305; Xella 1981: 174-77; Pardee 1983, 1988a: 179-92; Spronk 1986: 193-96; Caquot 1989: 119-23; Dietrich and Loretz 1988: 329-31, 1990: 205-40; Tropper 1989: 151-56; del Olmo, 1992a: 208-11, 1992b.

I have translated the narrative elements of this text as past, suggesting that it is a mythic account, serving as the paradigm for a healing ritual. Ditan(u), the eponymous ancestor of the Ugaritic royal dynasty (see KTU 1.161) here serves as a healing god, perhaps indicating something of the pastoral role of the *Rpum* ('saviours', 'healers'), and providing instruction on medical procedure. Other texts of this genre (KTU 1.100, 1.114) combine ritual and practical measures. The present text deals entirely in the use of votive offerings. Cf. KTU 1.107 and 1.169 which rely on invocation of the gods.

1.124 1 When the lord of the great gods[1] came to Ditan[2], he[3] asked concerning the diagnosis[4] of the child.

1. Ug. *adn ilm rbm*. Or: 'many gods'. Cf. n. 1 to KTU 1.107.2. Schmidt (1994: 79) draws attention to the problem involved in identifying *adn ilm rbm* with El or Baal, as it involves a greater god consulting a lesser. On the other hand such a narrative reflects and perpetuates the enormous prestige of the eponym of the royal line. De Moor (1970b: 304) wonders whether the god may be Yam, but reserves judgment.

2. Cf. the Ditan of KTU 1.15 iii 4 (and n. 153) and the Didan of KTU 1.161.[3], 10, and nn.12, 21. The present person is not necessarily the legendary figure (de Moor [1970b: 303] takes it to be an ordinary PN). But I have supposed this to be the case, given the nature of the dialogue between deity and Ditan. The form *ddn* also appears, perhaps as the recipient of an offering, in the sacrificial text KTU 1.171.2 (miscited as KTU 1.174.2 in *CPU*, I 599) and in the PN *bn ddn* at KTU 4.760.5.

3. 'He' appears at first glance to be Ditan, acting on behalf of a third person, who consults the gods by way of Ditan (the royal ancestor) as a medium. See discussion in Caquot (1989: 121 n. 373). However, I take it to be the 'lord of the great gods' (El?), because the syntax of the third line (n. 5 below) requires it, who consults Ditan (now long dead). On this person see KTU 1.15 iii 4. Cf. Pardee's

Ditan answered him[5]:
1.124 5 'Reply:
"Take a [bag of myrrh[6]] and place it [in Horon's[7] temple[7]].
Take a container of new my[rrh] and place it in Baal's temple.
Take a wooden figurine[8] and place it in the temple[9].
1.124 10 And her disease will go away.[10]"'
And your messenger came to Ditan:
he accepted the diagnosis.

---

translation, (1988: 183). Has Ditan become the physician of the gods? It is not that El requires assistance, but that he is apparently checking that Ditan is fulfilling his duty, delegated to him in this role. We should not expect a monolithic systematic theology here. In a medical context, the specialist (the priest-physician) would naturally accord his own patron deity, here apparently Ditan, a particularly prestigious status.

4. Ug. *mṯpẓ* (= *mṯpṭ* ; cf. Heb. *mišpāṭ*). The term is forensic ('judgment', 'decision'), but here presumably has a quasi-medical sense, reflected in my translation. 'Oracular decision': de Moor (1970b: 304).

5. This is certainly what the text says, as the obj. suff. indicates. Thus Pardee (1988a: 183) and Dietrich and Loretz (1990: 212).

6. The text (read now as *nad.mr*, contrast *KTU*[1] with *KTU*[2]), Pardee (1988a: 181 etc.) lies along the top of a gap and is uncertain. As a 'healer' or 'saviour' (*rpu*) Ditan (the eponym of the assembly in KTU 1.161) instructs El on how to proceed.

7. As previous note. Here Pardee's transcription and drawing are more reticent than his translation. Horon, if to be read, is evidently, as a chthonian god, concerned with necromantic practice. See n. 25 to KTU 1.100.58. *KTU*[2]: [b]t.ḥrn (all in Rom.). In (1983: 131), Pardee reads l. 6 as 'the house of 'Anat (or 'Aṯtart, or: 'Aṯirat)'.

8. Ug. *bnt*. 'Figurine': Xella (1981: 175). An object of tamarisk-wood according to Dietrich and Loretz (1990: 218). Cf. del Olmo (1992a: 210 n. 63). Cf. n. 15 to KTU 1.3 ii 2. Another term for tamarisk (*'r'r*), though this may mean 'juniper', is used in KTU 1.100.64-65 in a snake-bite ritual.

9. Or: 'palace' (thus Dietrich and Loretz 1990: 212; del Olmo 1992a: 210), thus distinguishing it from the temples already mentioned. Or perhaps simply 'house', if this ritual is democratically observed. Or has a DN been omitted, so that it should read, on the previous pattern, 'in <DN>'s temple'?

10. Text uncertain. Pardee (1988a: 180), Dietrich and Loretz (1990: 211) and *KTU*[2]: *pr'* (Ug., Heb. √) 'send away, loose'. *KTU*[1] and Xella (1981: 174, 176): *pk* (Syr. 'destroy'). Del Olmo (1992a: 210; 1992b: 190): *prt* (Ug., Heb.√*prr* I), 'disappear'. The first is to be preferred.

And Ditan answered him:

1.124 15 'Let the house[11] be cleaned: no more fish and no more dog[12]!

lower edge Then afterwards there will be no illness.'

11. Ug. *btn* (Heb. *bîtān*). Xella (1981: 174) corrects to *bnt*, 'figurine'.
12. It is not clear whether these are merely present, or on the menu.

KTU 1.133: A Mythological Fragment concerning Mot

(KTU 1.133 = RS 24.293)

Select Bibliography

Virolleaud 1968: 559-61; de Moor 1969a: 184-88; Dietrich, Loretz and Sanmartín; 1975a: 536-39, 1991; Pardee 1988a: 153-64; M.S. Smith in Parker 1997: 177-79.

A scribal exercise. Lines 1-11 are closely related to KTU 1.5 i 12-22, though they diverge from it in detail.

1.133 R 1 And divine Mot replied:

'My appetite is the appetite of the lion in the wasteland,
1.133 R 5 and the appetite of the shark in the sea[1].

It frequents pools like wild bulls,
or the spring as the hind longs for it[2].

1.133 R 10 ...[3] and Nahar has filled my cup,
if my seven portions are on the plate.

---

lower edge [ ] Seventy thousand[4] [ ] are the clan...
...gazelles, bull(s).

1.133 V 15 [ ] the son of El, Mot,...
and the Beloved of El, the hero,
against the stone was strong[7],

and the Prince[5] was afraid[6]...

1. See n. 11 to KTU 1.5 i 14-16. The text here would appear to preclude my proposal for an alternative reading of the bicolon, *if its reading is to be preferred.* However, as can be seen in Pardee's (1988a: 158) parallel presentation of the two texts, the differences are considerable, and so this is not necessarily to be taken as the norm to which the other version should be made to conform. The word *hm* appears five times in KTU 1.5 i 11-22, but only three times here, and with only two correspondances (KTU 1.133.9-11 a reversed form of KTU 1.5 i 20-22).

2. Or: 'as a herd of hinds' (*k* + *ḏd*)? I have rejected this solution above, at n. 15 to KTU 1.5 i 17. Cf. *kḏd ad loc.*, where many authorities read as the equivalent of *kšd*, (KTU 1.5 i 16). This is a school exercise.

3. Text reads *mt* here, but it is hard to see what sense it makes. Absent from KTU 1.5 i 21.

4. Ug. *šb' rbt.* Or: 'satisfy...great...'?

5. Baal?

6. Cf. n. 30 to KTU 1.92.31.

KTU 1.148: A Compendium of Ritual Lists

(KTU 1.148 = RS 24.643)

Select Bibliography
Virolleaud 1968: 579-84; de Moor 1970b: 306-12; Caquot 1989: 224-28; Xella 1981: 91-100; del Olmo 1992a: 88-94; Pardee 1992, 2000: 779-806, 2001a: 39-48.

This ritual text is of interest in that its order of the gods corresponds to the 'canonical' pantheon list of KTU 1.47 and parallels. This suggests that the lists are not merely arbitrary in order. Furthermore, the text falls into five distinct parts, and the same order is observed throughout. The text is written on the recto on the width of the tablet, continuing on the verso on its length (see photographs, Pardee 1992: 154).

1.148 R 1 Sacrifices of Saphon[1]: [the god of the ancestor an ox and a ram[2]];
[I] El an ox and a ram; [Dagan an ox and a ram; Baal of Saphon an ox and a ram];
Baal (II) an ox and a ram; [Baal (III) an ox and a ram, Baal (IV) an ox and a ram];
Baal (V) a ox and a ram; Baal (VI) an o[x and a ram; Baal (VII)[3] an ox and] a ram;
1.148 R 5 Earth and Heaven a ram; the Kothar[at] a ram; Yarih [a ram; Athtar a ram];
Saphon a ram; Kothar a ram; Pidray a ram; Mountains and Va[lleys] a ram;
Athirat a ram; Anat a ram; Shapsh a ram; Arsiy a ram; Athtart a ram;
Ishhara a ram; the gods who help Baal[4] <a ram>; Baal a ram; Reshef a ram; Dadmish a ram;

1. Sc. for the gods of Saphon.
2. The amount of space supports Pardee's (1992: 162) reconstruction (twelve signs including word-dividers) rather than *KTU*^{2}'s (nineteen), or Xella's (1981: 91) and del Olmo's (1992a: 89) (twenty-five!). The same argument apples to subsequent lines.
3. Baals numbered as guidance to reader. There are seven Baals, including Baal Saphon, in KTU 1.47 and parallels. See also ll. 11-12.
4. Cf. KTU 1.47.26 and parallels.

the assembly of the gods a ram; Yam a ram; Kinnar[5] a ram; two oxen, two birds, a cow.

1.148 R 10 [II] And as communion-sacrifices: the god of the ancestor a ram; El [a ram]; Dagan [an o]x; Baal[6] of Saphon an ox [and a ram];
Baal (II) the same; Baal (III) the same; Baal (IV) the same; Baal (V) the same; Baal (VI) the same; Baal (VII) the same.

[III] (ll. 13-17 are in Hurrian)[7]

[IV] When Athtart-of-the-Steppe[8] enters the king's palace
1.148 R 20 [ ] two garments of *sk*[9], seven garments of *mšlt*[10], four garments of *ḫpnt*[11] [ ], fifty-three..., three hundred...[ ], a log[12] of perfumed oil, two *šr'*[13], two *ušpġt*,[14] [two] *pl*[*d*], a pot of..., a jar of balsam, a jar of honey[15]...

1.148 V [V] The gods of Hiyyar[16]: the god of the ancestor a ram;
Earth and Heaven a ram;

5. Deified lyre.
6. Text *'bl*: read *b'l*.
7. Laroche (1968: 517-18), del Olmo (1992a: 92). A continuous translation is impossible.
8. That is, the cult-image is carried in. Note the hypostasis, and the different one, Athtart-of-the-Window, at KTU 1.43.1.
9. 'Coats of mail': de Moor (1970b: 308).
10. 'Accessory shirts': de Moor (1970b: 308).
11. 'Redingotes': de Moor (1970b: 308). The kinds of material are uncertain. These are ritual garments for clothing the image of the goddess. See de Tarragon (1980: 109).
12. A measure of oil (cf. Heb. *lōg*).
13. 'Laces': de Moor (1970b: 308).
14. Also occurs at KTU 1.43.4. 'Neck pieces of mail': de Moor (1970b: 308).
15. On honey in the cult see n. 15 to KTU 1.ii [21], n. 50 to KTU 1.14 ii 19 and n. 33 to KTU 1.41.21.
16. Sc. (sacrifices for) the gods (of the month) Hiyyar. Each month presumably had its patron-deities.

1.148 V 25 El a ram; the Kotharat a ram;
Dagan a ram; Baal of Aleppo an ox and a ram;
Baal of Saphon an ox and a ram;
Thirathiy[17] an ox and a ram;
Yarih a ram; Saphon a sheep;
1.148 V 30 Kothar a ram; Athtar a ram;
Athirat a ram; *šgr*-and-*ltm*[18] a ram;
[ ] a ram; Reshef-Idrap[19] a sheep;
[ ][20] a ram;
[ ] a ram;

(ll. 35-37 missing;
ll. 38-43 yield no clear sense.)[21]

[an o]x and a ram; Baal [ ]
1.148 V 45 ...

17. 'Winey'? Cf. *trt*, var. *trt*, the god of wine (Heb. *tîrôš*): see Xella (1981: 99) and Healey (1995a: cols. 1642-45).

18. A binomial deity or a pair? On the names cf. de Moor (1969a: 178), Xella (1981: 99): perhaps a herd-deity: 'Progeny-and-cattle-wealth'?

19. Idrap appears as a DN, so appears to be paired here with Reshef. See Xella (1981: 100).

20. Pardee (1992: 157), reads [ ]m*dr*; Xella (1981: 92) and Del Olmo (1992: 91) read [*il.t*]'*dr*: 'the gods who help <Baal>' (cf. l. 8 above). *KTU*^{2}: [ ]g*šr*.

21. Contrast Xella (1981: 92, 94), del Olmo (1992a: 91) and *KTU*^{2} with Pardee (1992: 157, 159, 169-70).

KTU 1.161: A Royal Funeral Liturgy

(KTU 1.161 = RS 34.126)

Select Bibliography

Caquot 1975; de Moor 1976, 1981–82: 116-17, 1987: 165-68; Pope 1977b: 177-81; Pitard 1978, 1987; L'Heureux 1979: 187-93; Xella 1981: 279-87; Bordreuil and Pardee 1982, 1991; Dietrich and Loretz 1983, 1991b; Levine and de Tarragon 1984, 1997b; Taylor 1985, 1988; Spronk 1986: 189-93; Pitard 1987; Lewis 1989: 5-46; Caquot 1989: 103-10; Tropper 1989: 144-50, 1993a; del Olmo 1992a: 130-34; Pardee 1993b: 208-10, 1996, 1997c: 357-58; Aboud 1994: 157-65; Schmidt 1994: 100-20; Pardee 2000: 816-25, 2001a: 100-105.

This tablet, well-preserved apart from the top right hand corner of the recto, has been characterized as a *kispum*-ritual (de Moor 1976: 333 n. 72; Pope 1977b: 177-82; Pitard 1978: 67), as the order of service for the funeral[1] of King Niqmad (IV?),[2] the penultimate king of Ugarit, father of the Ammurapi of l. 31, and perhaps involving a *kispum*-rite in the invocation of the late king's ancestors,[3] and as a part of a coronation

1. Pardee (1996: 274): the text is 'funerary in nature, rather than mortuary'.

2. His name would have appeared (theoretically, and depending of course on the date of the tablet) in the missing section of KTU 1.113.11-17. Three earlier kings of this name may appear at ll. 20 left ([*nqm*]*d*?—though not in my view: see above, n. 11 *ad loc.*), l. 23 left ([*nq*]*md*) and l. 25 right (*nqmd*). Mention of an earlier three would make him the fourth of the name. Indeed, in view of what I suppose to be an error in Kitchen's computation he would be the fifth, since Kitchen already lists four, but without including the penultimate king in the overall dynasty (the Niqmad of the present text). Healey (1978: 86) identifies him as III, as have subsequent commentators. Cf. discussion by Xella (1981: 285-86) and Levine and de Tarragon (1984: 653), and notes at KTU 1.113 above. Their observation on the omission of Ibiran(u) from the present text points to the canonical nature of king-lists, which edit out those who are subsequently in bad grace. The question of the identity of the king at KTU 1.113.20 remains problematic.

3. One intention of such a composite ritual would probably have been the desire to express solidarity between past and present, and in particular its legitimizing power on behalf of the new king. See discussion on KTU 1.113: a list of ancient kings, presented if only by default as a line of descent, each successor the 'son' of his predecessor, implicitly leads to the expectation that the next generation too is included in the line. Though the list of names may be selective, it is probably to be understood, as suggested by Pitard (1978: 69) to involve the entire dynastic

ritual, with elements of the previous two (Malamat 1989: 100; Levine 1993: 378, 473; Schmidt 1994).[4] The allusion to Ammurapi, last king of the city, dates the text to about the turn of the thirteenth–twelfth century BCE. In spite of uncertainties about the precise construction, it appears to be the text of a liturgy, apart from l. 1 and ll. 27-30. Levine and de Tarragon (1984: 649) state that 'the liturgy was declaimed by a priest who stood before a gathering in the royal palace...' at the accession of Ammurapi (III). They speak further (*loc. cit.*) of 'the royal cult of the dead'. This text, involving the summoning up of *rpum*, corresponding to the biblical *rᵉpā'îm*, provides a remarkable backdrop to Isa. 14.9-21. The whole of the text, apart from the first line which identifies the text, is to be read as the direct speech of one priest,[5] addressed to various deities, kings and other participants in the ritual.

1.161 R 1 Order of service[6] for the sacrifice(s) of the (divine) Winged Disc[7]:

line. Xella (1981: 285) speaks of the 'legendary ancestors', which draws attention to the ideological nature of such lists.

4. Note Schmidt's (1994: 100) question: '*KTU* 1.161: funerary liturgy or coronation liturgy?'. Against the tendency to opt for the former, he urges the case for the latter. But in the interest of political reality perhaps the two may be combined, for the smooth accession of the next king is as vital to the community as the future welfare of the dead king. This in fact is the gist of his subsequent discussion (pp. 104-106). This assessment is rejected by Pardee (1996: 275).

5. Thus Bordreuil and Pardee (1991: 155-56). Contrast the views expressed in next note. They have the priest pronounce words understood to be spoken by Shapsh in ll. 21-22. I have not followed this interpretation.

6. Not a *marziḥu*, as proposed by Margalit (1989: 273) and Dietrich and Loretz (1983: 23), but a funeral, perhaps including a *kispum*-rite. Healey (1978: 85) draws attention to the similar form in Heb.: *zōt tōrat zebaḥ*, Lev. 7.11. It is not intended to be read as a complete order of service, but rather as a set of instructions, with a number of liturgical texts from key points of the ritual. Cf. Pitard's remarks (1978: 66 §2). The first word is *spr*. 'Booklet': Caquot (1975: 427; 1989: 105) and Bordreuil and Pardee (1982: 122; 1991: 154); 'ritual': Healey (1978: 84); 'Book': Pitard (1978: 66); 'liturgy': Xella (1981: 282-83; n. 'libretto'). Xella explains the text as addressed to a group (ll. 2-3, 9-10) and to a single person ('the king?' ll. 4-8, 11-12). Levine and de Tarragon (1984: 649): 'the written record'. Spronk (1986: 189) and de Moor (1987: 166): 'report', which explains their treatment of ll. 2-12 as narrative.

7. Ug. *ẓlm*. See Caquot (1975: 428). The *ẓlm* are generally understood to be 'shades', but whether this is a designation of them as 'ghosts', or refers to their shading, and hence protecting, their descendants and the kingdom, remains uncer

'You are invoked[8], O saviours[9] of the under[world][10],
you are summoned[11], O assembly of Di[dan][12].

tain. 'Funerary' (lit. 'of a shade'): Bordreuil and Pardee (1982: 122; 1991: 154). First read as *qlm*. Taking it thus, de Moor (1976: 341): 'the Swift Ones' (√*qll*, 'be swift'); Pope (1977a: 177-78): 'intonation (sacrifices)' (√*qwl*); Clifford (unpublished work cited by Pitard 1978: 67): 'fallen ones' (√*qll*, 'fall'); Healey (1978: 84-85): 'laments/invocations'. Lipiński (1978: 98) took it to mean '(sacrifice of) a child', interpreting the text as a *molk*-sacrifice. Healey notes *ẓlm*, 'protectors' as a viable alternative. Pitard likes this, but considers it 'highly speculative'. Levine and de Tarragon (1984: 650-52): 'patrons', but endorsing the 'protectors' interpretation, which is in turn criticized by de Moor (1987: 166 n. 1). They cite Isa. 25.4 and Ps. 121.5-6 and a number of other examples of the figure. Pardee (1997c: 357 and n. 2) has now turned to this view. Xella: 'statue(?)' (1981: 282-84). This would also be attractive if pl., as it is for Dietrich and Loretz (1983: 23). See the useful discussion of this option in Schmidt (1994: 110-11). At Alalakh, ^{d}alam = *ṣalmu* 'would refer to the statue of a deceased king to which offerings were made prior to its deposit in the royal grave'. In this case we might envisage images of the late Niqmad or of several dead kings to be present. Lewis (1989: 10-12) makes a good case for understanding *ẓlm* as 'darkness', and cites Heb. *ṣalmût* (*ṣalmāwet*). Note also Ug. *ẓlmt*, appearing in KTU 1.4 ii 55 and 1.8 ii 8. He translates *dbḥ ẓlm* as 'nocturnal sacrifices'. Schmidt (1994: 109-12) himself modifies Xella's position, and understands *ẓlm* to denote Ẓalmu, a form of Shapsh, based on Dalley's (1986: 93, 97-98) recognition of Ṣalmu = Shamash. I am inclined to accept this view. The image of the winged disc connected with Ṣalmu is associated with the king in Ugaritic iconography, as attested on a number of terracotta ritual vessels (e.g. RS 75.247 and RS 78.41 + 81.3659; Yon 1991: 332 fig. 12 d, e) and on the small El stela RS 8.295 (Wyatt 1983b; Yon 1991: 336 fig. 16a). The idea of the winged disc used specifically in the royal cult is in no way surprising, for not only is it a feature of both the Eg. and the Assyrian royal cultus, but is consistent with the WS mythology, in which the royal gods Shahar and Shalem, mythic forms of the king (Wyatt 1996b: 224-29) are the sons of Shapsh (KTU 1.23.54), geminated as Athirat and Rahmay. The term *ẓlm* is cognate with Heb. *ṣelem* (cf. Livingstone 1995: col. 842) which has been generalized into any divine image.

8. Ug. *qritm*. Healey (1978: 85) calls this a 'prescriptive perfect', translating 'You (plural) (will) have invoked'. Del Olmo (1992a: 131) treats it and the following *qbitm* as interrogative: 'have you...?'. It is better explained as a pass., as by R.M. Good (1980: 41), Bordreuil and Pardee (1982: 123; 1991: 154), Taylor (1988: 152, 158 n. 18), Caquot (1989: 106) and Lewis (1989: 7, 12-14). This position is criticized by Levine and de Tarragon (1984: 652: but note Lewis's response [1989: 13], with clarification: 'you are hereby summoned') and by Schmidt (1994: 113, citing Verreet [1983: 234-36; 1984: 324-30] in support). Pardee (1997c: 357-58) has also modified his previous position. Accepting however the view that it is an internal pass., it is worth asking why the pass. mood should be consistently used in

Invoked is[13] Ulkan[14] the saviour;
1.161 R 5 invoked is Taruman the saviour.
invoked is Sidan-and[15]-Radan;

the invocation of the dead? I would explain it on the basis of the inherent danger of dealing with underworld beings. The ethos is established in the new understanding of KTU 1.17 i 27 and parallels proposed by Xella (1982: 194) and Husser (1995: 124). See n. 30 *ad loc*. There the whole point is to keep the souls of the dead below ground. Here it is to summon them up. We detect something of the danger with which such activity is fraught in the story of the 'witch' of Endor (1 Sam. 28). The pass. address is a means of summoning them, while being able to avoid responsibility for so doing. It is almost an impersonal use, in which a third party is held responsible, or even the hint that the dead are summoned by their own inherent nature as intercessors.

9. Lewis (1989: 7, 14): "heroes", which echoes something of the nature of Gk heroes, who are essentially dead figures, now divinized.

10. Ug. *a*[*rṣ*]. On the nuances of the term see KTU 1.1 ii 10, iii [14], and nn. 5, 31 *ad loc*. Not the land of the living, as in L'Heureux's (1979: 201-204, 219-21) understanding of *rpi arṣ* as a military élite.

11. Ug. *qbitm*. Caquot (1975: 428) relates it to Akk. *qabû*. Cf. *qbat* in a fragmentary passage at KTU 1.6 vi 40 (noted by Taylor [1984: 13] and Lewis [1989: 14 and n. 44], who notes that *qabû* can have funerary associations, and can have the sense of 'mourn'). 'I have called...summoned': Pitard (1978: 66, 68), explaining that he has found no examples of 2 pl. vbs in such contexts (p. 73 n. 11 cites KTU 1.40, but here 'probably the entire population of Ugarit' is addressed). Xella (1981: 284) rejects this and translates as 2 pl. 'You have been named': Caquot (1989: 106).

12. Ug. *ddn*, probably a variant on *dtn* of KTU 1.15 iii 4 and KTU 1.124. Kitchen (1977: 141-42) discusses comparative data. He presents a table showing how Ditan can have played a role in the different dynastic lines of the Near East, including Keret of Khabur and early Ugaritic kings. See Lipiński (1978) and Levine and de Tarragon (1984: 655) on the prehistory of Didan, and the latter's hesitation on this aspect of Kitchen's argument. Recent discussion also in Schmidt (1994: 72-82). Didan(u) appears as an ancestor of Hammurabi of Babylon (Finkelstein 1966: 95, 98, 101), and as one of the 'seventeen kings who lived in tents' who head the Assyrian king-list. See now Millard (1997: 463). Lewis (1989: 16) notes that the name may be related to Akk. *ditānu*, 'aurochs' (*CAD*, III [D], 164; *AHw*, I, 173) and in CT 18.7 is equated with *qar-ra*-[*du*], 'warrior'. A heroic and/or theriomorphic reference would do well for an eponymous ancestor. Note also the Heb. PN dātān, and the TN dōtān (Dathan, Dothan). See Annus (1999), Wyatt (1999: 864 n. 30), on possible links between *dtn*/*ddn* and the Greek Titans.

13. Ug. *qra*. 'He has called': Pitard (1978: 66). 'Invoke!': del Olmo (1992a: 131). 'Has been called': Pardee (1993b: 208).

14. This name is read in various manners. Caquot (1975: 427): *b.lkn*. Healey

invoked is the eternal one[?16], Thar[17].
They have been invoked[18], the ancient[19] saviours.

1.161 R 10 You are invoked, O saviours of the underworld,
you are summoned[20], assembly of Didan.[21]

(1978: 83): *b*{.}*lkn*. Pitard (1978: 65): *b'lkn*. Bordreuil and Pardee (1982: 122; 1991: 155), Dietrich and Loretz (1983: 23), Levine and de Tarragon (1984: 650), Pitard (1987: 79) and Caquot (1989: 106), *KTU*^{2}: *ulkn*. See Lewis (1989: 17) on the PN formation.

15. Reading *w*$^!$ for *k*.

16. Ug. *'llmn*. Obscure. Is it a n. formation, with *-n*, on *'lm* (cf. the use of this term at KTU 1.108.1)? Why King Thar ('Bull'?) should merit this epithet remains uncertain. De Moor's (1976: 17) explanation, 'child of whom', meaning 'usurper', is described by Healey (1978: 86 n. 17) as 'an etymology of desperation'. Healey wonders whether it means 'Child of Lim'. Pope (1977b: 178) translates *ṯr 'llmn* as 'the Bull Savant'. Spronk (1986: 190): 'the mighty, the unrelated', but we need a PN. Caquot (1989: 106-107 n. 323) notes the similar form *'llmy* at KTU 1.22 i 10, which I have translated 'eternal'. The present form also appears at KTU 1.1 iv 5.

17. Since they are not explicitly stated to be resident in the underworld, Schmidt (1994: 105) concludes that Sidan-and-Radan and Thar are alive and 'represent assembled warriors, nobles, and/or dignitaries'. But I think this is to draw the wrong conclusion. All the figures of ll. 4-8 are framed within the double reference in ll. 2-3 and 9-10 to *rpi arṣ* || *qbṣ ddn*, and are therefore qualified by it, and furthermore the latter two named *rpum* are qualified both at l. 8 and at l. 24 as *rpim qdmym*, unless this too qualifies all four figures. This precludes their being alive.

18. I have tried to preserve the word order here as far as is practicable. The vb comes conspicuously at the beginning of each statement throughout ll. 2-12. Although they are all to be read as indic., the word order conveys a sense of command. Bordreuil and Pardee (1982: 123; 1991: 155) make this act., which reads oddly after the series of pass. forms. I have interpreted it also as pass. (internal G pass.). It also makes better sense if the whole text is recited: the statement in l. 8 summarizes ll. 4-7 for the worshippers, before the priest resumes his direct address to the *rpum* in l. 9. Caquot (1989: 107), who takes the pass. line, translates *qru* here as act. Del Olmo (1992a: 132) does not distinguish it from the *qra* forms: 'invoke...!'.

19. Ug. *qdmym*. The term evokes primordiality, and thus authority and prestige. Presumably these members of the *rpum* are to be included among the list of legendary royal ancestors of the Ugaritic dynasty, though they were perhaps earlier than the kings whose names appear in KTU 1.113.

20. 'I have called...summoned': Pitard (1978: 66).

21. Levine and de Tarragon (1984: 655-56) are surely right in warning us against a too facile equating of myth and history. The *rpum* down to this point in the liturgy are sharply demarcated by the text itself from the historical kings who follow.

Invoked is Ammithtamru[22] the king[23]
(and) invoked as well[24] is Niqmad the king[25].
O throne[26] of Niqmad[27], may you be mourned!

22. I have generally omitted the *-u* ending of Ug. names. Occasionally I have retained them for ease of pronunciation in English.

23. Del Olmo (1992a: 132 n. 82) notes that the application of the term *mlk* to a dead king has a theological rather than a political significance. (Of course the 'political' term also carries powerful theological and ideological resonances.) He translates as 'king/*Milku* PN', leaving open the question of the identification of the king with a group of dead kings, the *mlkm*, perhaps divine but not yet having achieved the status of the *rpum*. See also del Olmo (1987a: 60-62). The class of gods *mlkm* = ^{d}MA.LIK.MEŠ at KTU 1.47.33 = 118.32 = RS 20.24.32 probably underlies the present usage.

24. Ug. *u*: see Levine and de Tarragon (1984: 652). Spronk (1986: 191) and de Moor (1987: 167): 'woe!'. See also Caquot (1989: 327) and Aboud (1994: 161). See also at l. 26. But in view of the differentiation of two king Niqmad's here (n. 27), the reference both here and at l. 26 is to the ancestor, not to the recently deceased. The cry would thus be inappropriate.

25. 'King...king'. Evidently Niqmad (the earlier) and Ammithtamru are not (yet) classed as *rpum*.

26. Ug. *ksi*, hardly the sg. nom. subj. of the act. vb (as for Healey 1978: 84), Levine and de Tarragon (1984: 649: the throne weeping, along with the footstool and table), Bordreuil and Pardee (1982: 123; sg. or pl. 1991: 154 sg. only). Pitard (1987: 79) draws attention to its difficulty, as does Lewis (1989: 19-20). The solution offered by Taylor (1985) seems the best: he takes it as voc. sg. But he still (1988: 153) has the throne and other furniture weeping. Caquot (1989: 107): 'I weep for the thrones of Niqmad'.

27. Bordreuil and Pardee (1991: 158) seem to have been the first to recognize the likelihood that the kings identified as Niqmad in ll. 12 and 13 are not the same person. The first is invoked with Ammithtamru as a past king attending the *kispum* on behalf of the royal ancestors. He may be tentatively identified with either the Niqmad at KTU 1.113.23 (left), or with the putative Niqmad (otherwise Arḫalbu) to be restored at l. 20 (left). The second, the penultimate king of Ugarit, is the subject of the present funeral rites. In view of a possibly considerable time lapse between the two kings of the present text, they further propose that ll. 1-12 constitute a fixed liturgy, to which further material would have been added *ad sensum* in a given funerary context. Their identification of the recently deceased king as Niqmad III seems to require modification in the light of discussion. If KTU 1.113.20 be read as a *d* instead of a *b*, he becomes IV. See KTU 1.6 vi 57 n. 132 and nn. 9, 11 at KTU 1.113. Bordreuil and Pardee state, perhaps with a ghost of a smile, that 'whatever trouble this repetition may cause us today, it is quite clear that for the officiant at the obsequies of Niqmad (III) there was no possibility of confusion'!

And[28] lamented be his[29] footstool[30].
1.161 R 15 Let the table of the king[31] be mourned in his presence.
But let their tears be swallowed[32],
and their dreadful lamentations[33].

28. Dietrich and Loretz (1983: 24) inset ll. 14-22 (...*'pr*) translating the initial *w* as 'Furthermore...'.

29. I take it that the priest addresses the royal throne directly (at the tomb-side for the occasion, the whole liturgy taking place in the throne room, or just as an apostrophe?), and then includes footstool and table parenthetically, so that they are dealt with in the 3 p. allusions. The throne is by far the most important item of furniture, as possession of it authenticates a king's power. Cf. the symbolism of the throne throughout KTU 1.1–1.6. This is in fact the same throne as the divine one in so far as the king ascends the latter in mystical fashion during the coronation rites (Wyatt 1986a). The footstool however also has a cosmic symbolism, perhaps representing the earth (cf. Isa. 66.1) and the king's enemies (cf. Ps. 110.1), while the table is probably a symbol of royal patronage and commensality (cf. 2 Sam. 9.7-13; 1 Kgs 2.7).

30. Note the chiasmus, marked by its abrupt departure from the previous pattern of word order. The reading *hdm* is in some doubt: see Pitard (cf. 1978: 65, 70; 1987: 78, 81-82), Lewis (1989: 21) and Bordreuil and Pardee (1982: 126; 1991: 153). *KTU*^{2} *hdm p'nh*. This pleonastic form is *hapax*. Elsewhere (KTU 1.4 i 34, iv 29; 1.5 vi 13; 1.6 i 60, iii 15, and 1.17 ii 11—all literary contexts) the simple form *hdm* is used.

31. *KTU*^{2} *mlk*. Reading *mla*: 'the table is full': Caquot (1975: 427), Healey (1978: 84) and Pitard (1978: 66).

32. Hardly the tears of the furniture (as for Levine and de Tarragon 1984: 650, and Taylor 1985: 317!). The idea of throne, stool and table swallowing back their own tears is scarcely a serious option. Rather the tears of those who mourn, who are now to take comfort from the potency of the invocatory ritual. If this be pass., the obvious question is the identity of the agent. Perhaps the underworld, which swallows all things? Cf. the earth 'swallowing' Dathan and Abiram and their families at Num. 16.31-32a. Caquot (1989: 108): 'let him (the king) swallow his tears'. This also makes sense. There is no question of a ritual banquet here, but Lewis, who has the furniture as subj. (1989: 8, 21-22 and n. 92) appears to think of a feast of tears, citing KTU 1.6 i 10, Pss. 42.4, 80.6 and *CAD*, III [D], 147b: *dīmtu maštītī...bikītu kurmatī*, and *CAD*, II [B], 224a: *kima akali ātakal maruštu bikītu*, 'for bread I ate bitter tears'. On this approach my translation may stand, but with the 'their' a generalized subj., being the participants in the ritual. It would thus constitute an anti-feast.

33. Ug. *'dmt w 'dmt 'dmt*. Caquot (1978: 427), reading *'dmt w 'dmt ṯdmt*, translates '(his tears) have ceased, disgust (?) has ceased'. Healey (1978: 84) with the same reading: '(his tears) have ceased, and his grief has disappeared'. Pitard (1978: 65-66, last word *ṯl'dmt*): '(his tears) are gone(?) and gone(?) are...' (Ar. *'adima*,

Go down[34], Shapsh,
yea, go down, Great Luminary!
May Shapsh shine[35] upon him[36].

'cease'). These scholars all include *udm'th* of l. 16 in the colon. Cf. de Moor (1987: 167). Bordreuil and Pardee (1982: 123; 1991: 155): 'woe! and thrice woe!'. Cf. Levine and de Tarragon (1984: 650, 652). They describe it as 'a rare triplication for dramatic effect'. The phrase *'dmt 'dmt* is to be construed as superlative, as they imply, as with *knr nrn* at KTU 1.19 i 8 (n. 188 *ad loc.*). Caquot (1989: 108 n. 331) notes the parallel with 'vanity of vanities' in Qoh. 1.2. Cf. *DLU*, 73: 'desolation of desolations!' (homonymous Ar. *'adima*). I have taken the expression to be a further subject of the double-duty vb *ybl'* in l. 16. Note the alliteration between *udm't*, 'tears' and *'dmt*, 'lamentations'. Following a suggestion of Pope (1977b: 180, Ar. *'aḍama*), but with altered stichometry, Schmidt (1994: 107, 117) translates the first occurrences, *'dmt w 'dmt*, as 'gnashing of teeth and more gnashing of teeth'. The third instance he construes with the sequel: 'with gnashing of teeth I bow down, O Shapash'. This is an attractive solution. Perhaps the expression involves a hendiadic pun, however: 'wailing and gnashing of teeth'!

34. Ug. *išḫn*. The *i* is a prothetic on the N stem (Taylor 1985: 315) rather than a 1 p. indicator. Many interpret as 'be burning' (e.g. Bordreuil and Pardee 1982: 123; 1991: 155) (√*šḫn*, 'grow hot'). Cf. the *i* on *ibky* in l. 13. On this understanding I take it that the goddess is invoked to provide warmth amidst the dankness and gloom of the open tomb. To be preferred is the approach of Lewis (1989: 8, 23), evoking the goddess's chthonian role: 'Go down, O Šapšu! | Go down, O Great Light!' (√*šḫḫ*, 'bow down' or *šw'ḫ*, 'sink down'). It looks as though for Lewis the following instructions in ll. 20-26 are also addressed to Shapsh, who thus acts out her role as psychopomp.

35. Ug. *tṣḥ*. Either 'cry' (√*ṣḥ*) or 'shine' (√*ṣḫḥ*): Caquot (1975: 429). He tentatively accepts the second. So also Healey (1978: 874): 'may you be dazzling...'. Pitard (1978: 66) opts for the first: 'let Šapšu call to us', as do Bordreuil and Pardee (1982: 123; 1991: 155), Dietrich and Loretz (1983: 24), Levine and de Tarragon (1984: 650) and del Olmo (1992a: 132): '*Šapšu* replies'. But the second makes better contextual sense in view of the preceding two cola. Bordreuil and Pardee (1991: 159), accepting the first sense, at the same time suggest that because the word is ambiguous, it may serve deliberately by way of a pun as transition from shining to calling. It may, furthermore, be either 3 f. or 2 f. sg., at least on consonantal structure, which leaves open the possibility that Shapsh is now being addressed in the second person.

36. Ug. *'ln*. Shapsh's involvement in the underworld is clear from the closing hymn of KTU 1.6 vi 54-58. Her presence there appears to raise a hope of some redemptive capacity among the dead ancestors. On the 'cry out' interpretation, is Shapsh supposed to declaim the following lines? For del Olmo (1992a: 132) *'ln* means 'over him', the (dead) king over whom Shapsh shines. The precise nuance may be 'above him'. I have adopted del Olmo's approach, though the sense could

1.161 R 20 After[37] your lords[38], from the throne[39],[40]
After your lords into the underworld go down:[41]

also be 'on us'. The colon would then be taken as free-standing, a kind of blessing uttered on the side at the point where the goddess is bidden to descend into the underworld. The sentiment on this approach is almost 'may Shapsh continue to shine upon us'. Schmidt (1994: 108, 117) treats it as a vb: 'lift me up (O Shapash, please shine!)'. I think the 3 p. approach is preferable, because even when a primary objective of funerary ritual is directed to the fears of the living, it is generally presented in terms of benefits for the dead.

37. Ug. *aṯr*. 'After': Caquot (1975: 427) and Healey (1978: 84). 'To the place of': Pitard (1978: 66).

38. These are the king's predecessors, summoned to attend on him at his descent.

39. Text *ksh*; *KTU*^{2} reads *ks<i >h*. Should we read *ksh*, 'his throne', seeing the same word *ks* as at KTU 1.1 iii 12? Or perhaps just *ksi*? (For Taylor [1988: 153] it is evidently another use of the voc., though he transliterates as *ksh*.) Or even 'his cup' (thus Caquot 1975: 427; Pitard 1978: 66), placed in the royal tomb? This is an attractive approach, notwithstanding Xella's (1981: 287) doubt. Discussion of the options in Lewis (1989: 24-25). While in strictly grammatical terms it would be 'his cup', it remains voc. in force, and so the 'his' is untranslated in English idiom. The *-h* refers back to the antecedent *b'lk* as a grammatical requirement rather than a word to be translated. It is more likely that a royal cup is placed in the tomb than a throne, which would be required for a successor. The tombs at Ugarit are not large enough to have housed the quantities of furniture found, for example, in Tutankhamun's tomb. Taylor (1988: 156-75), arguing that it is precisely the throne which goes down, cites Isa. 14.9 as an example of underworld thrones for the dead. Schmidt (1994: 105) also understands the throne to be lowered. The whole line is taken to mean 'after your lord, from the throne...' by Levine and de Tarragon (1984: 650). This could be construed with ll. 21-22 as staircase parallelism. See also Pardee (1993b: 209), who reads *lksi*, 'from the throne', and apparently has the king addressed (contrast the position cited in next n.). I have accepted this approach. On the shape of the throne, cf. perhaps that of Idrimi of Alalakh discussed by Mayer-Opificius (1983). The king's descent from his throne envisaged here echoes that of El at KTU 1.5 vi 11-14. The god's ritual act in turn is mimetic, echoing that of a dead king.

40. Caquot (1989: 108-109 and nn. 334-35) translates the whole unit 'Following your lord, from your throne...', and wonders whether we have here a ritual allusion to El's descent following Baal's descent into the underworld in KTU 1.5 vi 25 (miscited as 1.6 vi 24). See also the discussion of the problem by Bordreuil and Pardee (1982: 123; 1991: 160), who also make the allusion to El's action. But in the latter discussion, noting the possessive *-k* on *b'lk*, which technically precludes it from being the DN, they wonder instead whether it relates to the *rpum* ('your lords'). My translation relates the suff. rather to the lately deceased king.

into the underworld go down
and fall into the dust,

down to[42] Sidanu-and-Radanu,
down to the eternal one, Thar,
down to the anci<ent> saviours,

1.161 R 25 down to Ammithtamru the king
lower edge and also down to[43] Niqmad[44] the king.'

One[45]—and make an offering,
two—and make an offering,
1.161 V 28 three—and make an offering,
four—and make an offering,

41. These cola are addressed by Shapsh to the newly-deceased Niqmad, according to Pardee's (1993b: 209) translation. I take them to be spoken by the officiating priest.

42. Ug. *ṯḥt*. The prepositional use is at first glance curious and awkward. Healey (1978: 87) suggests that it may mean 'throne', as Ar. *taḥt*. Pitard (1978: 66): 'at the foot of...'. Perhaps it has the sense 'instead of' sometimes found with Heb. *taḥat*. This would make the buried cup (on that interpretation of *l.ksi/h*) a surrogate for the dead kings, who would remain present in the community. Cecchini (1981a) argues for a substantival use of *ṯḥt*, meaning 'subterranean chamber' or 'tomb', which he detects in KAI 2.3, the sarcophagus of Ahiram. Levine and de Tarragon (1984: 650) construe as 'Below is PN...', which is also attractive. Del Olmo (1992a: 133 and n. 88), has 'among', and cites KTU 1.17 v 6-7, where Danel sits *ṯḥt adrm*, which del Olmo translates as 'among the nobles'. Cf. Bordreuil and Pardee (1991: 161) and Aboud (1994: 164). This is however a static sense, and I prefer the sense proposed by Lewis (1989: 9, 25-26), 'down to', with sense of movement. Del Olmo (1983b: 171), followed by Schmidt (1994: 108, 119), took it as 2 sg. of √*nḥt*, 'to descend': 'go down to...', which has the same force as Lewis on a different basis.

43. Text *ṯḥm*. Read *ṯḥt*? Cf. ll. 24-25. Thus Pitard (1978: 72). But note Schmidt's (1994: 108, 119-20) proposal to see a form of √*ḥmm*, 'be warm': 'may you remain warm', expressing the hope that Shapsh will keep the recently deceased Niqmad warm as he goes into the underworld. He however identifies the PN following with this king. If however he is the ancestor (see next note), this proposal is weakened.

44. The ancestral king of l. 12, not the present subject at l. 13.

45. The numbers are cardinals. Pitard (1978: 66) translates as ordinals, continuing 'he has sacrificed'. Bordreuil and Pardee (1982: 123; 1991: 155) have '(times)' in parenthesis. I have excluded the sequence 'one...seven' from the direct speech, since it almost certainly points to a specific sevenfold rite which is placed at this point, and no doubt has its own liturgy. Caquot (1989: 109-10 and n. 337) translates as 'the first (day)...', noting the distinctive use of *ʿšty*. See also Cecchini (1981b).

five—and make an offering,
six—and make an offering,
1.161 V 30 seven[46]—and make an offering.
You shall present[47] a bird.[48]

'Peace!

Peace on Ammurapi[49],
and peace on his son(s)[50];

peace on his kinsmen[51],

46. Spronk (1986: 193) states that 'the seven sacrifices mentioned in ll. 27-30 coincide with the number of *rpum* called up according to ll. 4-8. But only four are named, on the consensus approach (*ulkn*, *trmn*, *sdn-w-rdn* and *ṯr 'llmn*). But Spronk's suggestion raises the question as to whether we should list them as follows: *ddn*, *ulkn*, *trmn*, *sdn*, *rdn*, *ṯr*, and *'llmn*, who then number seven. But *qbṣ ddn* would appear to be a collective term for the *rpum*, thus excluding *ddn* himself from the seven. He is invoked directly in KTU 1.124, however. If we retain the normal arrangement, four *rpum* are named, and perhaps are summoned up from the four cardinal points? Del Olmo (1992a: 131 n. 78) also appears to envisage seven kings, seven sacrifices and seven blessings. Bordreuil and Pardee (1992: 160), having distinguished the two Niqmad's, list seven as follows: *ddn*, *ulkn*, *trmn*, *sdn-w-rdn*, *ṯr 'llmn*, *'mṯtmr* and *nqmd* (the earlier of the two mentioned). Perhaps seven names were always retained in such liturgies, whatever fluidity might be observed over the actual names used. The absence of the PN Keret is noteworthy. There is nothing to justify the supposition that Keret was himself directly invoked as an Ugaritic royal ancestor, notwithstanding his own link with Ditan (KTU 1.15 iii 15). See n. 156 *ad loc.* and also at n. 17 above.

47. Reading *tqdm* (discussed Pitard 1987: 84-85). *KTU*[1] read tqd*š*(?), 'you shall consecrate'. *KTU*[2] *tqdm*.

48. Schmidt (1994: 108, 120 and n. 367) translates 'the sacred assembly is convened!', and cites Heb. *'āṣar*, 'to retain', *ṣārâ*, 'sacred assembly', EA Akk. *ḫaṣāru*.

49. 'The king is dead! Long live the king!' is the sentiment. Ironically, Ammurapi was the last king of Ugarit. The city was destroyed in the early years of the twelfth century BCE.

50. Read *bn*[!]*h* rather than *bah* of *KTU*[2] (proposed by Dietrich and Loretz 1983: 17). 'Household': Levine and de Tarragon (1984: 651), *bth*.

51. Ug. [*ar*]*y*[*h*], Caquot (1975: 428). *KTU*[1] reads [q]r*yt*[h]: '[his c]ity'; *KTU*[2] reads *ṯryl*, PN Tharielli. This was perhaps Ammurapi's queen. See Cunchillos (1989: 293-95 n. 9, 342 n. 1). She appears in KTU 2.14.8, 12, 17; 2.16.2; 2.34.2. The name also occurs in KTU 6.13.2 (one of the Dagan stelae) and 7.53.4. The syllabic form *Šarelli* appears in a number of Akk. tablets. Discussion in Pitard (1987: 85-86) and Caquot (1989: 110 n. 341, after Nougayrol 1968c: 261 n. 1 and Speiser [note to Nougayrol]) who wonders whether it was not a title, 'the king's sister'. Against this see Singer 1999: 690-91 (§15.6.1.2) with further references.

peace on his house;

peace on Ugarit,
peace[52] on her[53] gate(s)!'

52. Pitard (1978: 72) draws attention to the sevenfold repetition of *šlm*. Perhaps these blessings correspond to the sevenfold sacrifice just performed, and again, perhaps, with one blessing corresponding to each offering. Bordreuil and Pardee (1982: 123; 1991: 155) have the first *šlm* a qualification of l. 30b: 'you will present a bird as a saving sacrifice'. But this misses the point of the group of seven, unless we understand that seven birds are offered in succession. In Heb. the sacrificial sense of *šlm*(*m*) occurs only in the pl. Dietrich and Loretz (1983: 24) treat the initial sequence *šlm šlm* in l. 31 as though superlative (cf. *'dnt 'dnt* above); but the second word would require to be pl.: *šlmm*.

53. Levine and de Tarragon (1984: 651) are right to use the f. possessive. Cities are 'daughters', the daughter-wives of their patron deities (Wyatt 1996b: 266-68 with refs.).

KTU 1.169: An Incantation for the Exorcism of a Possessed Adolescent

(KTU 1.169 = RIH 78.20)

Select Bibliography
Xella 1978b; Caquot 1978–79, 1984, 1989: 53-60; Bordreuil and Caquot 1980: 346-50; Avishur 1981; de Moor 1980b, 1981–82: 114-15, 1986: 257, 1987: 183-86; Loretz and Xella 1981; Saracino 1982, 1984; Fleming 1991, 1997a; del Olmo 1992a: 259-60; Watson 1992c; Pardee 1993b: 211-13, 2000: 875-93, 2001a: 153-55.

The upper portion of a tablet, written only on the recto. The surviving text is in good order. This has not made detailed interpretation much easier, since many lexical items appear here for the first time. It deals with a rite of exorcism. Apart from that, scholars are in disagreement on most matters of interpretation. The following translation is also provisional, and makes no claim to have solved the outstanding issues. Avishur (1981: 16) suggests that ll. 2-7 are addressed to the patient, and from ll. 8 onward to the 'ghost'. In my view, a case can be made for the opposite, that the demon is addressed in ll. 1b-10 (l. 5 an aside to the exorcist's staff), and from *lk* in l. 10 onward the patient, with a resumption of the address to the demon in l. 17. I have placed rubrics at the right hand side of the text to indicate the addressee. Caquot (1984: 164) on the other hand sees the entire text addressed to the demon. It is the difficulty of resolving even so preliminary a matter as this which illustrates most graphically the intractability of the text.

1.169 1 Exorcising[1] the demons[2] of an adolescent[3]. [TITLE]

1. Ug. *ydy*. On √*ydy* (= Heb. *yādâ*), 'drive away' see Tropper and Verreet (1988: 340-43). It occurs in KTU 1.16 iv 18 (originally four times in the passage, || *grš*, with *ydt*, 'remover' in l. 27) and at 1.100.5 and parallels. I have taken it here as n. use of the inf. So also Caquot (1989: 54 and n. 1) who takes *ydy* by itself as the heading of the text, and del Olmo (1992a: 259). Cf. de Moor (1986: 255; 1987: 183) on the first three words as the title. Others take as 3 m. sg. of the G-stem, e.g. Bordreuil and Caquot (1980: 350), perhaps with Horon (cf. l. 9) as subj., Avishur (1981: 15, no identification of subj. offered), Fleming (1991: 142; 1997a: 301), perhaps with Baal (cf. l. 2) as subj.

2. Ug. *dbbm*. Bordreuil and Caquot (1980: 347, 350): 'calumniators...incanta-

May the sp[irit][4] of Baal[5] expel[6] you, [TO THE DEMON]

tors', explaining it by reference to Akk. *dabābum*, 'speak', *dabbibu*, 'calumniator', *bēl dabābi*, 'adversary', also noting Ar. *dabba*, 'crawl'. So also Fleming (1991: 142-44; 1997a: 301): 'accuser'. More neutrally, 'words': Caquot (1989: 54). 'Enemies': Avishur (1981: 17). 'Flying demons': de Moor (1981–82: 114; 1987: 183). At KTU 1.4 i 39 I have translated it as 'monsters', but the term there may denote something different, and may be a different word. 'Flies': Saracino (1982: 339), a suggestion that makes his first line read 'may he drive away the flies of the Hero', perhaps not the happiest translation in view of his understanding of this text (following Bordreuil and Caquot [1980: 348] and Loretz and Xella [1981]) as an incantation against impotence! Fleming (1991: 143-44) cites a number of Mesopotamian examples of witchcraft, drawing attention to the term *bēl dabābi*, 'witch' (sc. one who casts evil spells). 'Tormentors': Pardee (1993b: 211), who also espouses the 'male sexual dysfunction' interpretation, as does Fleming. This is dependent on seeing in *ḫṭ* the same kinds of nuance it carries in KTU 1.23.8-9, 37. See nn. 11, 36-38 *ad loc.* and n. 11 to KTU 1.24.9.

3. Ug. *ǵzr*. This term is usually rendered 'hero' in the poetic texts. Here a more neutral sense is perhaps intended. I have attempted to preserve the age factor. Or: 'young man' (de Moor 1987: 183). Bordreuil and Caquot (1980: 347, 350) wonder whether the 'hero' is an allusion to Mot (cf. KTU 1.4 vii 47 etc.), so that it is his familiars who possess the victim. Similarly Saracino (1982: 339). Caquot (1984: 165; 1989: 54-55 and n. 123) prefers to see 'the Hero' as Baal who is invoked. Del Olmo (1992: 259 and n. 169): 'vigour'.

4. Text *r* [ ]. A number of suggested restorations have been made. Bordreuil and Caquot (1980: 347, 350), de Moor (1986: 255): *r*[*ḫṭ*], 'hand'; (1986: 256; 1987: 183): *r*[*ḫ*], 'brea[th]'. De Moor (1980b: 429; 1981–82: 114): *r*['*y*], 'Sh[epherd]'. On this rendering de Moor reads a chiasmus: *m*!*ḫṭk r*['*y*] parallel *b'l m*!*ḫṭk*: 'He who wakes you up is the Sh[epherd] || Ba'lu is the one who wakes you up!'. This is in accordance with de Moor's understanding of *hdr'y* in KTU 1.108.3 (n. 8 *ad loc.*). Caquot (1989: 55 and n. 125): *r*[*gm*], 'speech'. Fleming (1991: 142; 1997a: 301): *r*[*pu*], 'R[āpi'u(??)]'. If the word is the subj. of the vb *tgḫṭk*, then *rḥ*, as f., is a better candidate than the alternatives. The word *tgḫṭk* is itself very problematic. See n. 6.

5. Cf. del Olmo (1992a: 259 n. 170): 'the great exorcizer'. Perhaps Baal is here 'the lord of demons' (*b'l dbbm*), a plausible antecedent for the biblical Beelzebub. This would make the assumed priority of the form Beelzebul (*b'l zbl*), as suggested by Dietrich and Loretz (1980f) and Herrmann (1995b) unnecessary, since the two could be genuine alternatives, already attested independently at Ugarit. This is not to make Beelzebub into a demon, as *r*[*ḫ*] *b'l* appears to be for Bordreuil and Caquot (1980: 347), but rather a god who is powerful against them. Note the observations of Saracino (1982: 340-41). The distinction between gods and demons in ancient Ugarit is probably much the same as in Israel and Judah: 'gods' (or God) are acceptable objects of worship and form a network of symbolic identities in the cult; 'demons' are the harmful powers your enemies invoke. But gods too can be

may it expel you[7]
so that you come out[8]
at[9] the voice of the exorcist[10],

like smoke through a chimney,
like a snake into a green tree[11],

harmful, as is clearly the case with deities such as Anat (war) and Reshef (plague).

6. Ug. *tgḫṭk*, recurring in l. 2. The √*gḫṭ* is unknown in the Semitic languages, as everyone has pointed out. 'Your torment': Bordreuil and Caquot (1980: 347, 350), taking it as a n. qualification of two classes of evil spirit (*dbbm, r*[*ḥ*] *b'l*). 'The spirit, thy ghost(?)': Avishur (1981: 15, 17), tentatively dividing into two n. forms (*tg* + *ḫṭ* + *k* suff.), *tg* perhaps related to Sum. UDUG, Akk. *utukku*, 'spirit' and *ḫṭ* to Sum. GIDIM, Akk. *eṭemmu*, 'ghost'. Saracino (1982: 339) also takes it as two nn.: 'the suffering of your rod', where *ḫṭ*, 'rod' supposedly means 'penis', as in KTU 1.23.37 etc. Similarly 'the affliction of your staff': Fleming (1991: 142, 144-45; 1997: 301); citing Heb. *tûgâ*, 'trouble, sorrow' to account for the first part, and Pardee (1993b: 211). Reading *m'ḫṭk*, 'who wakes you up': de Moor (1980b: 429-30; 1981–82: 114), an explanation criticized by Caquot (1984: 164-65). Caquot himself suggests √*gḫṭ* as a *hapax*, with the contextual sense 'cast out'. 'let it throw you out': de Moor (1986: 255-57; 1987: 183), citing Syr. *g'ṭ* (aphel, 'eject'), Ar. *ǧ'ẓ*, 'remove, chase away', LebAr. *ǧǧṭ*, 'draw away, drag', followed by del Olmo (1992a: 259). In view of the intractability of the problem I find de Moor's (1986) explanation the best of those offered so far. As an alternative suggestion, reading *m'ḫṭk* (though it is not the preferred option), perhaps we might see here a D-stem of √**a/yḫṭ* (cf. *aḫd, aḫḏ*), with the sense 'seize'? The element *ḫṭ* is deliberate, anticipating the power of the exorcist's staff ('wand') in l. 5.

7. These two cola are interpreted by Pardee (1993b: 211) as 'the pain of your rod he has banished | the producers of the pain of your rod'.

8. Ug. *tṣu*. Bordreuil and Caquot (1980: 347, 50), Pardee (1993b: 211): 3 pl. Avishur (1981: 15): 3 f. sg. De Moor (1980b: 429), Caquot (1984: 162): 2 f. sg.

9. Ug. *lpn*. On this usage see Caquot (1984: 164).

10. Ug. *ṯ'y*. This seems to be the function of the office in the present context. We have met it as 'sacrificer' in KTU 1.6 vi 57 (see n. 131 *ad loc.*), and I suggested 'votary' for *ṯ'* at KTU 1.14 iv 37 etc. (n. 115 *ad loc.*). See also nn. 11, 17 at KTU 1.119.8, 11. 'Him who is offering': de Moor (1980b: 429). This would be the exorcist.

11. Ug. *'mdm* (the *-m* adv.). Among the various possibilities, I prefer to see this as cognate with Akk. *emdu, endu*, 'evergreen cypress' (*AHw*, 211) (an option suggested by Wilfred Watson). Explained by Bordreuil and Caquot (1980: 347) with ref., to Akk. *imdu*, 'basement'. 'Column': de Moor (1980b: 429) and Saracino (1984: 79). 'Ceiling-beam': Avishur (1981: 15). Cf. Akk. *imdu* (*CAD*, VII [I/J], 109-10, *AHw*, 375), 'approaching person': de Moor (1987: 184 and n. 11). 'Foot of the wall': Caquot (1989: 55 and n. 129) and del Olmo (1992a: 259). Any of these is a possible hiding place for a snake.

like goats to a summit,
like lions to a lair[12].[13]

1.169 5 Wand[14], rouse yourself[15]! [TO THE STAFF]
And draw near, wand!

May you[16] be amiss as to your back, [TO THE DEMON]
and may you be ill[17] with regard to
your face[18]![19]

May you eat the bread of fasting[20];
may you drink mere drops[21] without

12. Ug. *skh* (*-h* directional). Cf. Heb. √*śwk*, *śwk* and Jer. 25.38, Ps. 10.9 (noted by Bordreuil and Caquot 1980: 347).

13. The image is of a dispersal in all directions, up, down, up and away. Cf. Saracino (1982: 341).

14. Ug. *ḫṭ*. Fleming (1991: 148-50) discusses the symbolic and ritual use of the staff. Cf. the staffs of Moses and Aaron, Exod. 4.2, 7.10 etc., of the king, Ps. 29, and numerous biblical allusions.

15. Ug. *nqh*. De Moor (1980b: 430) relates to Ar. *naqaha*, 'convalesce', and translates (1980b: 429; 1981–82: 114): 'recover', (1987: 184): 'get better!'. Del Olmo (1992a: 260) with same etymology: 'fast'. Caquot (1984: 167) suggests a cognate of Eth. *naqᵉha*, 'wake up'. Avishur (1981: 15): 'his sacrifice'. Cf. Akk. *naqû*.

16. After the aside to the wand in the bicolon of l. 5, the exorcist resumes his address to the demon. 'May it harm' (3 f. sg.): Fleming (1997a: 301).

17. Ug. *ṯḫṭa...trś*. Lit. 'go astray, fall short, sin...commit evil'. The choice of theological and moral words is significant, though see comments in Caquot (1984: 167-68). He notes the subjunctive value of the final *-a* in *ṯḫṭa*. The choice of the first is also determined by the wand, *ḫṭ*. On the other hand, a physical disorder is widely regarded in the ancient world as having a spiritual origin, a way of expressing the notion of psychosomatic disorder. Cf. the presuppositions behind Jn 9.2. Fleming (1997a: 301): 'and harm' (still in 3 f. sg.)

18. Ug. *tmnṯk*. Cf. Heb. *tᵉmûnâ*. De Moor (1980b: 429): 'pelvis'. He translates the bicolon: 'You are sinning against your own back | and are transgressing against your own pelvis'. Pardee (1993b: 212) has: 'Should you sin against your body | Should you commit evil against your bodily form?'.

19. 'back...face'. Something of the temporal nuances of these positions (see Wyatt 1996a) may be present here: the demon will have no future—which lies behind him, and he will have no past—which lies before him: it will be as though he never was. Is this just a verbal curse, or is the wand supposed to beat the possessed person (thus expelling the demon)?

20. Ug. *ṣm*. Cf. Heb. *ṣōm*.

21. Ug. *ḫlṣ*. Cf. Akk. *ḫalāṣu*, 'squeeze out'. 'Juice(?)': Bordreuil and Caquot (1980: 348, 350). Watson (1992c) suggests that as the previous colon refers to no

a cup[22],[23]
in the heights,
in the water-meadows[24],
in darkness,[25]
in the sanctuary.[26]
Thus[27],
O sorcerers[28], O demons,

food, this refers to no drink. I have tried to represent this while acknowledging the implications of *ḫlṣ*.

22. Ug. *ṣml*. See Watson (1992c) for the view that this represents Akk. *samālu*, var. *zamaltu*, 'cup'. On the whole idiom, Fleming's (1997a: 301) 'may you drink without a cup(?), squeezing(?) the waterskin' is elegant.

23. If taken to refer to the patient, this might imply abstinence from food and drink being part of the treatment, rather like a modern medicine-bottle instruction: 'to be taken on an empty stomach'. Ancient medicine is not merely ritualistic mumbo-jumbo, but a pragmatic mixture of ritual (psychological) and material (somatic) measures, and is based on long experience. Modern herbalism perpetuates the latter aspect. Or, as here, it may be taken as addressed to the demon, who then has no hiding place in any of the places mentioned afterwards. Thus Fleming (1997a: 301-302). While I have adopted a specific position here concerning addressees of various portions of the text, certainty is elusive. The reference to 'without a cup' also evokes the imagery of KTU 1.96.5.

24. That is, the lowlands, in contrast to the heights. The images may also implicitly contrast the centre (the cosmic mountain) and the periphery (the edge of the cosmic sea). Cf. the spatial oppositions in ll. 3-4 above. Or is *miyt* here the equivalent of *thm*, the 'abyss'?

25. Ug. *ẓlm*. Cf. Ar. *ẓalima*, 'be dark': (Bordreuil and Caquot 1980: 348). I follow them and de Moor (1980b: 429) who distinguish the darkness and the sanctuary, both qualified by *b*. Rather than 'the darkness of the sanctuary', as for del Olmo (1992a: 260). The point is another pair of oppositions, as in the previous cola. The sanctuary is presumably a place of light (as divine splendour?). Cf. remarks by Caquot (1984: 170). Cf. also next note.

26. Margalit (1989a: 271) translates the four locations here as follows: 'heavens... seas... netherworld... QDŠ'. This would give a nice spatial quaternity, the three extremes contrasting with the sanctuary, symbol of the centre.

27. Ug. *aphm*. I take this to have adv. force (cf. *DLU*, 44). Hardly 'his fury' or 'their fury' (de Moor 1980b: 429; 1987: 184).

28. Ug. *kšpm*. Cf. Akk. *kaššapu*, Heb. *kaššāp*. I take the sorcerers (perhaps 'products of sorcery'?) here to be identical with the demons with whom they are associated. Or perhaps what is being exorcized is both the power of the malevolent sorcerers responsible for this possession and the maleficent spirits they have conjured up. Del Olmo (1992a: 260) appears to regard the sorcerers ('conjurors') and Horon and his companions as identical.

1.169 10 may Horon expel (your) familiars[29],
and the Divine Assistant[30] (your) acquaintances.[31]
Depart[32]! [TO THE PATIENT]
Let no words of scorn[33] bring (you)[34] down;[35]
let not your tongue stammer;[36]

29. Ug. *ḥbrm*. 'Friends': Caquot (1989: 57). Cf. de Moor (1987: 185), though his overall understanding is quite different. 'Binders': Avishur (1981: 16). See also Jeffers (1996: 32-35). Sperling (1993) has drawn attention to *kšp* || *ḥbr* (as here) in Isa. 47.9, 11, and points to its Akk. equivalent *kuššupu*, 'to bewitch, cast an evil spell', used in association with *ubburu*, 'to bind magically'. I have attempted to combine the legitimate claims of both these approaches in 'familiars', which has a rather nice demonic nuance in English, and also adequately anticipates the 'acquaintances' (√*yd'*) following in the next colon.

30. Ug. *ġlm*. See n. 9 to KTU 1.119.7. Is he here paired or identical with Horon? This is the result of the prosodic analysis of Bordreuil and Caquot (1980: 348) with regard to ll. 8b-9: a:b:c::c1:c2. They consider *ġlm* to be an epithet of Horon himself, an indication of his youth, as does de Moor (1980b: 432).

31. The syntax of these lines is very obscure. Cf. the following different analyses: Bordreuil and Caquot (1980: 350): 'even here (*aphm*) the sorcerers perform incantations. Horon will chase off (these) companions, the Youth (will chase off these) associates in your favour'; de Moor (1980b: 429): 'his fury (*aphm*), (his) sorcerers | (his) flying demons may he (Ba'lu) drive away! Horonu be a friend | and Ghalami an intimate'. This latter phrase, as Caquot (1984: 171) notes, is similar to KTU 1.6 vi 48-49.

32. Addressed to the patient? Avishur (1981: 16) still has the demon(s) addressed and in the sequel. Similarly Fleming (1991: 151). Published translations depend on the assumed addressee.

33. Ug. *ẓtm*. De Moor (1980b: 429, 432): 'scoffing words', identified as those of the demon. Rather, let the now healed patient be not depressed by the thoughtless remarks of those around him.

34. From *lk* in l. 10 the patient is addressed, as a rite of healing follows the formal exorcism. The vb is either 3 m. pl. with *ẓtm* as subj. or 2 m. sg. internal pass., with the patient as subj.

35. Ug. *lẓtm al tmr*. Or, with de Moor (1980b: 429; cf. 1987: 185): 'Do not speak scoffing words'. These words are addressed to the patient (sg., from the imper. *lk*). The sick man, not in control of his speech, tongue and lips, will have been ranting, stammering and dribbling. More generally, del Olmo (1992a: 260): 'do not let yourself be brought down by difficulties'.

36. I take the tongue (f.) to be subj. of the vb. Or: 'do not stammer with your tongue' (acc. of instrument). This too is addressed to the patient. Apparently muttering and twittering is the usual sign of the presence of spirits: cf. Isa. 8.19. The restoration of coherent speech will be an indication that the healing is complete.

let no dribbling affect you[37]![38]
May the god[39] clothe you
May the god put a garment on you[40],
(turning) into a man[41] and one who has breath[42] on earth,
1.169 15 the madman[43] into a son of man.[44]

37. Ug. √*apq*. De Moor (1980b: 432) suggests a D-stem vb on *apq*, 'stream-bed': 'let flow freely'. In (1987: 185) he translates 'do not dribble so much'. Less fluent saliva may mean more fluent speech! Del Olmo (1992a: 260): 'do not run off!'.

38. The three instances of *al* are here taken to be negatives. If this be addressed to the demon, they would be asseveratives, as for Caquot (1989: 58).

39. Here and in the following colon, the god (*il*) is hardly El, but likely to be Baal or Horon.

40. Ug. *lbš il...'rm il*. De Moor (1980b: 432) suggests that an image of the deity is brought into contact with the patient at this juncture. On such an interpretation it would be Horon or Baal rather than El, however. The latter term (*'rm*) is widely interpreted as a reference to nakedness. I take it, on this approach, that the fourfold oppositions addressed to the demon above are now echoed in a binary expression of normal human activity, being clothed and naked, perhaps meaning in public and in private. 'In all you do' may be the sense. Saracino (1982: 341) makes a useful reference to the symbolism of (re)clothing, as in Gen. 3.21, but fails to account for the 'naked' element here. He like de Moor connects the investment with El. Another approach is that of Loretz and Xella (1981), followed by del Olmo (1992a: 260) and *DLU*, seeing in *'rm* a reference to a cloak or some garment. Cf. Akk. *ermu*. This makes much better sense if addressed to the patient, and is the position I have taken. As a madman he had presumably run about naked. His healing is accompanied and symbolized by his resumption of normal dress behaviour. Cf. 1 Sam. 19.24!

41. I.e., full humanity is to be restored to the demoniac.

42. Ug. *ḫṭm*. De Moor (1980b: 430): 'is awake'. Note the continuing wordplay on *ḫṭ*, 'wand'. The sense, given the structure of the bicolon, may be '*compos mentis*'.

43. Ug. *ẓrm*. De Moor (1987: 185): 'the strange one'. The word could plausibly be explained from either of two Heb. forms: √*ẓwr* I, 'be a stranger'; √*ẓwr* II, 'be loathsome'. 'O flow': Pardee (1993b: 212), interpreted as a penile discharge.

44. Cf. n. 30 to KTU 1.14 i 37. Here the ideological sense is missing. Fleming (1991: 153) translates as follows, on a different syntax:

> O man, the one with the staff(s) is indeed gone to the underworld;
> O human, in weakness he is removed.

This is to understand the staff as belonging to the demon. I prefer to see it as the staff of office of the exorcist.

From delirium restored,[45]
lo, by the breath[46] of Athirat the Great Lady
in the h[eart] may you be moulded[47].
I shall recognize you[48] [ ]

[To the] house (to which) I come, [TO THE DEMON]
you shall not come,
[in the dwelling in which I dwell] you shall not dwell![49]

[ ] do not turn your head[50],
[ ]...
...

45. Ug. *banšt npẓl*. Saracino (1982: 339, 341): 'from the infirmity is peeled', drawing attention to Heb. √*pṣl*, Pi. 'peel', in Gen. 30.37-38. However, it looks as though *bn adm* is parallel to the preceding *adm*, and the expression following must be construed with it, and take account of the *l*. Saracino translates *adm banšt npẓl* in isolation, and thus fails to take the context into account. Surveying various options, Caquot (1989: 59 n. 154) explains *npẓl* by ref. to Ar. *faṣala*, 'separate'.

46. Cf. Gen. 2.7. The *npš* is not strictly the breath, but it is, by metonymy, what the breath represents. Just as in Heb. thought there is divine breath in Adam, constituting his 'soul', so here Athirat's breath becomes the restored soul of the patient.

47. Ug. *ltṯm*. De Moor (1980b: 432) √*lṯṯ*, 'mould'. This is apparently an allusion to the widespread motif (El [KTU 1.16 v 28-30], Khnum, Yahweh, Aruru etc.) of the deity making a figure out of clay.

48. Ug. *itbnnk*. Following Pardee (1993b: 212). Caquot (1984: 175): 'I discern you'. De Moor (1987: 185): 'let me observe you intently'.

49. Taking this to be addressed to the demon, Avishur (1981: 25) has:

> To the house to (which) I go, thou shalt not go
> [and in the place I dwell] thou shalt not dwell.

He cites KAI 27.5-8 as a parallel:

> To a house I come to—thou shalt not come
> and (to) a yard I walk in—thou shalt not walk in.

and the following Akk. example:

> In a place I stand, thou shalt not stand;
> In a place I sit, thou shalt not sit;
> To a place I go, thou shalt not go;
> To a place I come thou shalt not come.

These examples provide a convincing background for understanding the present as a formula addressed to the demon.

50. Also addressed to the demon, which is commanded to depart without looking back (to avoid eye contact?). Fear of the evil eye is evident from KTU 1.96.

RELIGIOUS TEXTS FROM UGARIT

As well as being intrinsically fascinating, the Ugaritic texts have long been recognized as basic background material for Old Testament study. Ugaritic deities, myths, religious terminology, poetic techniques and general vocabulary are widely encountered by the attentive reader of the Hebrew Bible. The present edition offers an up-to-date translation and commentary based on scrutiny of the original tablets and the most recent academic discussion. While addressing the needs of accurate translation it also attempts to take seriously demands for a readable English version.

Nicolas Wyatt is Professor of Ancient Near Eastern Religions, Faculty of Divinity, University of Edinburgh.

For Liz

To the nut grove I went down,

To see the fruit of the vale,

To see if the vines had blossomed,

If the pomegranates had bloomed.

Song of Songs 6:11

This book was produced largely thanks to a fellowship at the Center for Judaic Studies of the University of Pennsylvania in 1997–98. During the year, which was dedicated to the topic of Israelite religion, I took up the fundamental question of what divinity is. My earlier book *The Early History of God* discusses many different deities, but it does not define the more basic issue of what divinity is. Nor does that book address the categories, structures, or characteristics of deities. For quite some time I had given thought to this area of inquiry so that when I was given the opportunity to spend a year at the Center for Judaic Studies, I selected it as my topic. This book is the basic result of my year's research at the Center. So before I offer any other acknowledgments, I am happy to thank the director of the Center, Professor David Ruderman, the Associate Director, Dr. David Goldenberg, and all the staff and fellows at the Center for Judaic Studies for contributing to an enjoyable and stimulating year. They helped me in so many ways with the work represented by this book. My thanks go in particular to a co-fellow, Professor Ted Lewis, for reading the entire manuscript and offering detailed comments. His remarks greatly improved this study.

Part I (chapters 1–4) represents a developed version of my paper delivered at the Center's symposium at the conclusion of the year. Part II (chapters 5–6) benefitted from a variety of family and colleagues. Comments contributed by Professors Tikva Frymer-Kensky, Saul Olyan, Benjamin Sommer, and Irene Winter were especially helpful. In September

1997, the Antiquity Colloquium at Saint Joseph's University survived a presentation of an early draft of chapter 5. I am grateful for participants' many helpful comments. My departmental colleague Professor David Carpenter was particularly gracious in providing me with written comments on the paper; these are reflected in additions and reformulations at the end of the chapter. For chapter 5, I am grateful also to my daughter, Shulamit, who discussed with me several questions relevant to the characteristics of divinity; her contribution is reflected in the final section of chapter 5. The research for chapter 6 was presented before the Center for Judaic Studies, to the Department of Bible of the Hebrew University, and at the Old Testament Colloquium (Conception Abbey). I wish to express my thanks for the suggestions that members of these three bodies generously offered. For the research on this chapter, I especially grateful to my co-researcher, co-fellow (at the Center for Judaic Studies in 1997–98), and wife, Dr. Elizabeth (Liz) Bloch-Smith, and to Professors Ron Hendel, Ted Lewis and Philip Schmitz for commenting on an earlier draft of this essay. I am indebted in particular to Professor Schmitz for checking the discussion of the Phoenician and Punic evidence. My thinking on the Mesopotamian material benefitted from discussions with Dean Karel van Toorn during my visit to Leiden in December 1998. I am grateful to the *Scandinavian Journal for the Old Testament* for publishing an earlier version of this study. I also wish to reserve a special word of thanks for Professor Tryggve Mettinger regarding the subject of chapter 6. I have deeply appreciated the great interest he has taken in my research, both on this subject and other projects.

Part III (chapters 7–10) benefitted from help from many quarters. Chapter 7 originated as a summary piece on the god El for the *Eerdmans' Dictionary of the Bible*. I have revised the piece to highlight the questions of El as the original god of Israel and as the original divine patron of the Exodus from Egypt. This presentation of this material was enhanced by my discussions with Ted Lewis, who traded his draft of research on El for mine; mine benefitted especially from his reminder about the importance of Numbers 23–24 for the issue of El as the god of the Exodus. Chapters 8 and 10 originated as a lecture delivered at the Department of Near Eastern Studies of the University of California, Berkeley, in February 1998. I thank Professors Carol Redmount, Anne Kilmer, and Robert Alter for hosting my visit. I was especially grateful for the helpful comments offered in reaction to the presentation, in particular thoughtful questions raised by Professor

Erich Gruen. I recall this visit with a particular fondness afforded by the tremendous interest shown in my work, by the many engaging students and faculty there, and by the sheer beauty of the place (cf. Proverbs 3:17). Some of the points made in chapter 8 were presented in a lecture before the International Organization for the Study of the Old Testament in Oslo in August 1998. I am deeply grateful for the invitation from Professor Hans Barstad to offer thoughts on the Ugaritic texts and the Bible. In particular, I wish to thank Professor Phyllis Bird for her reactions to some of my suggestions offered in chapter 8; I have modified and clarified points accordingly. Chapter 10 draws on current research on pertinent Mesopotamian textual and iconographic material, especially the "mouth-opening" (*pit pî*) and "mouth-washing" (*mīs pî*) rituals. I am hardly a specialist in Mesopotamian religion and texts, and here I have been particularly guided by the research of Michael Dick and Victor Hurowitz. Professor Dick placed some of his unpublished work on the subject at my disposal; this work has fortunately appeared in print. All of these chapters in this book represent an effort at synthesis; accordingly, it is deeply indebted to the work of many scholars.

I also wish to expression my deep appreciation to the institutions in Jerusalem that supported my research. I am grateful to the Hebrew University of Jerusalem. Much of the groundwork for this study was laid in the summer of 1997 when I served as a Lady Davis Visiting Professor there. I thank the university and its many faculty who took an interest in my work, especially Professors Avi Hurvitz and Shalom Paul for their sponsorship. The staffs at the William Foxwell Albright Institute and the École Biblique were gracious to me, and I benefitted many times over for their generosity. The library staffs at these two institutions deserve special note. At home, Saint Joseph's University was exceptionally supportive in all of my presentations. I am especially grateful for the support given me by the chair of the Department of Theology, Professor Paul Aspan, and by the Dean of the College of Arts and Sciences, Professor Judi Chapman. The interlibrary loan staff at Drexel Library of Saint Joseph's University has worked overtime to acquire all of the exotic items I have requested; I am happy to thank all of the library staff for their generosity and good humor, in particular Mary Martinson, Patrick Connelly, Rebecca Reilly, and Naomi Cohen. I am very much indebted to the many students who worked with me on the course on Israelite religion. Over the past five years, this course has

increasingly taken up the themes of this book. Saint Joe's students often served as the first sounding boards for my material. They asked questions that helped me to keep clarifying the evidence and the analysis. In 1994–95 and 1998–99 I taught Ugaritic at the University of Pennsylvania. My thinking benefitted from my reading of some of the Ugaritic texts treated in this book. I thank two scholars who sent me copies of their dissertations, Dr. Terje Stordalen of the Lutheran School of Theology in Oslo, and Dr. Lourik Karkajian of the University of Montreal. I am also pleased to acknowledge the support and warm reception by new colleagues at New York University, especially Dan Fleming and Larry Schiffman. Finally, I am grateful to Oxford University Press for publishing this book, and to its staff, especially Cynthia Read and Robert Milks, for shepherding it through the publication process.

I close this list with mention of two people who have been instrumental to my happiness. The topic of divinity was Marvin Pope's lifelong passion, and in retrospect his spirit very much permeated my days working on this book. Many readers will recognize Marvin's guidance both in his writing and teaching, and I am happy to acknowledge my debt to him (still, always). Finally, I dedicate this book to my wonderful wife, Liz. As my "fellow fellow" at the Center for Judaic Studies in 1997–98, she accompanied me along the way through this book, and her presence through our years together is a rare and irreplaceable companionship, at once personal and intellectual. "Our secret garden" (as our daughter Rachel calls it) winds down the side of our house and into our small, secluded backyard; it is hardly the only echo of our life that I hear in Song of Songs 6:11.

Contents

Abbreviations, Terms, and Sigla

Introduction
- 1. The Scope of This Study
- 2. Issues in Discussing Monotheism and Polytheism
- 3. Problems with the Term “Canaanite”
- 4. More Cautionary Notes: Literature, History, Theology, Myth

PART I THE STRUCTURES OF DIVINITY

1 Anthropomorphic Deities and Divine Monsters
- 1. Place: Near, Foreign, and Far
- 2. Blessing at Home and Abroad versus Destruction
- 3. Animals: Domesticated versus Monsters
- 4. The Head God and His Beloved Monsters
- 5. Israelite Cosmic Enemies Tamed and Denied

2 The Divine Council
- 1. The Language of Council
- 2. The Assemblies of El and Baal
- 3. The Divine Council and Its Four Tiers
- 4. Israel and the Tiers of the Pantheon

3 The Divine Family
- 1. The Four Tiers of the Divine Household
- 2. The Royal Patriarchal Household as Model for the Pantheon
- 3. The Astral Background of El’s Family in Ugaritic and Israelite Literatures and Baal’s Outsider Status

4 Pluralities, Pairings, and Other Divine Relations

1. Baal, Resheph, Yahweh, and Their Retinues
2. Dead Rephaim and Kings, and the Power of Death in Life
3. Pairings: Making Associations
4. Divine Possession and the Problem of Yahweh and His Consort
5. Re-presentation of Divinity: Athtart as the “Name of Baal”
6. Divinized Qualities of Deities
7. Extension of Divinity: Cultic Places and Things
8. Afterword: The Conceptual Unity of Ugaritic Polytheism

PART II CHARACTERISTICS OF DIVINITY

5 The Traits of Deities
1. Strength and Size
2. Body and Gender
3. Holiness
4. Immortality
5. Postscript: Divine and Human Life (Or, My Breakfast with Shulamit)

6 The Life and Death of Baal
1. Frazer’s Hypothesis about “Dying and Rising Gods”
2. Problems with the Category
3. The So-Called Dying and Rising Gods
4. Foundations for a Theory of Baal’s Death and Return to Life
5. The Conceptual Ideology in Baal’s Life and Death
6. The Mythology of Death and the God of Israel

PART III THE ORIGINS OF MONOTHEISM IN THE BIBLE

7 El, Yahweh, and the Original God of IsraEL and the Exodus
1. El in the Bronze Age
2. El in Iron Age Phoenicia
3. El in Iron Age Aram and Transjordan
4. El in Iron Age Israel
5. Was El Israel’s Original God?
6. The Question of Yahweh’s Original Character

7. Was El the Original God of the Exodus?

8 The Emergence of Monotheistic Rhetoric in Ancient Judah
1. Defining Monotheism
2. The Relative Infrequency and Rhetorical Purpose of Monotheistic Statements
3. The Prior Context of Judean Discourse about Divinity
4. The National God and Royal Ideology
5. The Social and Historical Context of Monotheism

9 The Formation of Monotheistic Theologies in Biblical Literature
1. Creation, Paradise, and the Priesthood
2. Wisdom and the Levites
3. Apocalyptic Literature: The Case of Daniel 7
4. From “Canaanite Myth” to Biblical Monotheism?

10 Monotheism in Isaiah 40–55
1. The Polemical Context of Isaiah 40–55
2. The Outsider Context (Polemic)
3. Insider Referentiality and Isaiah 44
4. Reading for Monotheism

The Origins of Biblical Monotheism

Introduction

All this was a long time ago, I remember,
And I would do it again, but set down
This set down
This: were we led all that way for
Birth or Death?

T. S. Eliot, “Journey of the Magi”

Now, at the turn of the millennium, God remains a central question in Western culture. Through the Middle Ages, the Renaissance, and the Reformation, the notion of God could be assumed. People may have seriously questioned the justice or nature of God, but the “existence” of God was a given. In the wake of massive religious wars and the Enlightenment came more critical analysis of religion, specifically religion as human artifact. Feuerbach, Marx, Nietzsche, Durkheim, Freud, Geertz: their powerful analyses cumulatively put belief in God first in jeopardy and then in flight before an increasingly secular Western culture. The crisis-point in many intellectual circles has long passed.[1] Numerous studies of God treat the divine largely as a social construct, psychological projection, or literary figure. Now in religious studies departments, theological discussions question the intelligibility of either God or the act, concept, and structure of faith (“what does it mean to believe in God?”). Yet the “flight of God” from American universities is hardly a uniform phenomenon. Although discourse about God and the notion of belief has become increasingly problematic in departments of religion and divinity schools, theists elsewhere in the university are scarcely in full retreat. For example, a survey of American scientists on one campus, the University of Georgia, conducted by the Pulitzer Prize–winning historian of science Edward Larson,[2] hardly indicates complete lack of belief; if anything, the opposite

is the case. Moreover, the topic of God has enjoyed a remarkable resurgence in contemporary Western culture by way of the field of physics. Recent works exploring the divine and physics include Mark Worthing's *God, Creation and Contemporary Physics*.[3] So, at the start of the new millennium, faith is increasingly questioned in religion and divinity faculties even as it is affirmed in other quarters of American universities.

This range is evident as well in recent studies of God in the Bible. Within the fields of theological and biblical studies, traditional theological studies of God remain a standard feature of the landscape. The field also continues to witness interest in the historical study of God and monotheism, for example in the recent popular book *Aspects of Monotheism: How God Is One*.[4] From the religious side, Robert K. Gnuse's *No Other Gods: Emergent Monotheism in Israel* attempts to mediate between traditional historical study of biblical monotheism and scientific study.[5] Following its fine survey of current scholarship, the book describes the contribution of monotheism to Western civilization, in particular the evolution of humanity and the cosmos. Other recent books have departed from traditional theological expositions about God or from analysis of the religious history of Israel's national deity. Jack Miles has offered *God: A Biography*, an engaging "literary study" of God as a character over the course of the biblical books.[6] Despite its purported purpose as a literary study, the book makes many historical assumptions. As a result, the book demonstrates the need for historical context for the study of texts. The same point applies to the divinities mentioned in the Bible as well. Regina Schwartz's book *The Curse of Cain: The Violent Legacy of Monotheism* offers a secular sermon on the dangers of the post-biblical careeer of biblical monotheism and consequently calls for a rejection of the Bible: "The old 'monotheistic' Book must be closed so that the new books may be fruitful and multiply."[7] The book is likely to convince primarily a congregation that has already heeded its message about the "old Bible." Perhaps as an effort to combat secular attacks on one side and conservative theological discourse on the other, some have recently emphasized the virtues of biblical monotheism.[8]

In the face of contemporary attitudes toward God and biblical monotheism, interest in these topics clearly shows no signs of abating. All of the works mentioned thus far point to a broadly felt need for an exploration of divinity in the Bible. "God-talk" retains an interest for

people, whether for their faith, their quest for spirituality (whether traditional or nontraditional), or their desire to understand Western culture. All interested parties deserve access to the increasingly richer harvests from the ancient texts to which modern communities of scholarship and faith lay claim. The picture of biblical monotheism is complex. The Bible provides a basic narrative account of human knowledge of the monotheistic God. According to the story of the Bible, monotheism was not the original condition of the world. Instead, it stepped onto the world stage with the appearance of Israel. For when Israel's god, Yahweh, was revealed first to the patriarchs and then definitively to Moses and the Israelite people on Mount Sinai, the central moment in world history occurred: the revelation of the one God known by the one name of the Tetragrammaton. Thanks to the biblical picture, the monotheism of ancient Israel has been regarded as a revolution against the religious thought of its neighbors. Such a view can be found today not only in the general culture but also in scholarly circles as well.[9]

However, over the last half-century numerous scholarly studies have sought to locate the biblical foundational story of monotheism within its larger cultural context. In part, this endeavor has occurred through scrutiny of the biblical sources themselves. Various passages in the Bible suggest a more complicated picture lying behind the more dominant narrative of Israelite monotheism. Signs of polytheism are apparent. For example, Moses and the people ask: "Who is like You among the gods, O Yahweh?" (Exodus 15:11); the question rather neutrally implies the existence of other deities. Other biblical passages contain vestiges of Israelite polytheism. The complex relations between Israelite monotheism and polytheism were not always an issue of conflict, as the bulk of biblical narratives have strongly led readers to believe. Instead, it has become clear that Israel knew some sort of polytheism; how to reconcile signs of such a religious situation within the larger framework of monotheism in the Bible has been a major topic of scholarly discussion for some time. Extra-biblical sources have also affected the discussion of biblical monotheism. Discovery of ancient inscriptions has added greatly to the scholarly knowledge of deities mentioned in the Bible. Moreover, archaeological research has accumulated a massive amount of information pertinent to the understanding of ancient religion. In recent years pictorial art has come to the fore as a major source for studying ancient deities. In short, only in the twentieth century did the

scholarly community come to know these deities on their own terms, namely from the vantage point of their own adherents, rather than from biblical polemics directed against them. These discoveries have inspired a renewed investigation into biblical religion, in particular biblical monotheism and its relations to polytheism in ancient Israel and neighboring cultures.

This book represents a synthesis that focuses not so much on specific deities as on the concepts that the ancients used to understand them. In other words, I am interested not only in describing Israelite monotheism but also in examining the conceptual unity and coherence of its religious congener, Israelite polytheism, as well as the religious unity expressed in the polytheism revealed in the largest cache of relevant extra-biblical texts, namely the myths and rituals from the ancient city of Ugarit (modern Ras Shamra). Located on the Mediterranean coast of modern Syria about a hundred miles north of Beirut, this city flourished during the late Bronze Age. Since 1928, this site has yielded scores of texts and artifacts detailing its religious practices and notions, including a full-blown polytheism with narratives and rituals involving many of the deities known from the Bible (except Yahweh). Thanks especially to the Ugaritic myths, there is material to probe the indigenous understanding of the deities and their interrelations. Of all the ancients texts found in the Levant containing this kind of information, the Ugaritic texts are also most proximate in time and place to ancient Israel.[10] This situation stands in contrast to the many texts from the now famous sites of Ebla, Mari, and Emar. The vast number of texts discovered at Ebla provide considerably less background information about the Israelities' conceptualization of deities and divinity,[11] as they lie at a greater geographical and temporal distance from the Bible. Mari[12] and Emar[13] have also provided important information about the Levant during the Bronze Age. They also illuminate aspects of ancient Israel, and they are, roughly speaking, as proximate to Israel as Ugarit. However, for the study of divinity in the Hebrew Bible, these two sites have yielded less information than Ugarit.

Thanks to the Ugaritic and Israelite texts, the polytheisms attested in these cultures, as well as Israelite monotheism, can be described with deeper understanding. Such an approach to divinity in the Bible has been slow to emerge in biblical studies. Such issues have been raised about the conceptual coherence of other polytheisms but not for Israel and relatively

little for Ugarit. Researchers in Egyptology[14] and Assyriology[15] have broached these issues. So have scholars working on Hinduism and Greek religion. For example, a 1989 volume entitled *Polytheistic Systems* offers some interesting studies on conceptual structures in Hinduism and Greek religion. However, the essay on ancient Israel treats only the issue of monotheism in the Bible, and the author of the essay, a well-known expert on Ugaritic, ignores polytheism.[16] Perhaps owing to the special position of the Bible and its pictures of monotheism, no overall investigation[17] has been undertaken for the conceptual unity of West Semitic polytheisms; this book aims to redress this lack. In addition to investigating these aspects of Ugaritic and Israeite polytheism, I will also ask questions about the ancient circumstances of biblical monotheism. What religious issues did it address? How did it answer them? Why did biblical monotheism make sense at the time of its emergence within the context of Israelite polytheism and against the larger backdrop of West Semitic polytheism from which Israelite polytheism emerged and of which Ugaritic polytheism was another, yet more articulated "relative"?

1. The Scope of This Study

Some years ago my friend and professorial colleague Victor Hurowitz posed a question that provided part of the impetus for this book. When he read a draft of my earlier book *The Early History of God*,[18] he scribbled in the margin of one page, "what is an *ilu*?" (This is the Akkadian word for "god.") Professor Hurowitz was quite right; this question is absolutely central.[19] *The Early History of God* discusses many different deities, but it does not address the more basic issue of what divinity is. To answer Victor's question might seem a relatively simple task. A basic approach to this question would be to take an inventory of figures called "divine" (Akkadian *ilu*, Ugaritic *'il*, BH *'ēl*).[20] Such a list in different Semitic languages would turn up not only major deities but also a wide variety of other phenomena: monstrous cosmic enemies[21]; demons[22]; some living kings[23]; dead kings[24] or the dead more generally[25]; deities' images[26] and standards[27] as well as standing stones[28]; and other cultic items and places.[29] In addition to words

for “divine,” Akkadian uses a special sign (called a “determinative”) to mark divinity.[30] The special sign for divinity applies not only to deities but also to many other phenomena such as demons, stars,[31] the images of monstrous creatures,[32] the determined order (*šimtu*),[33] and legendary human heroes of old, such as Gilgamesh and Enkidu.[34] On the whole, such an inventory suggests that divinity was attributed not only to major and minor deities but to a whole host of associated phenomena. It is further evident that distinctions were recognized among the figures and phenomena called “divine.”

In this inventory one feature stands out: apart from cult objects and places, divinity seemed to betoken status or being significantly greater than that of human beings. In general, to be divine is not to be human. So the Mesopotamian god Erra is accused of behavior inappriopriate to his assigned status: “You changed your divine nature and made yourself like a mortal.”[35] Yahweh reminds Hosea’s audience (Hosea 11:9): “For I am a god and not a man” (*kî ’ēl ’ānōkî wĕlō’-’îš* cf. 1 Samuel 15:29; Isaiah 31:3, Ezekiel 28:2, 9, Job 9:32). Deities and people generally constitute two different divisions within reality (Akkadian *ilū/ilāni u amelūtu*[36]; Ugaritic *’ilm wnšm*, CAT 1.4 VII 51; BH *’ĕlōhîm wa’ănāšîm*, Judges 9:9, 13; Qumran Hebrew *’lym w’nšym*, The War Scroll, 1QM 1:11). That humanity and divinity fall in two generally incommensurate categories[37] represents only a beginning point for understanding either one. In one sense we are never too far from this point in discussing divinity in the ancient Middle East. We often see how divinity and humanity are distinguished and yet treated as analogous. In itself, this approach will take us, however, only a certain distance in the discussion of divinity.[38]

The question of divinity may be approached also etymologically. This time-honored method yields controversial results for the word “god” (Akkadian *ilu*, Ugaritic *’il*, BH *’ēl*). A common scholarly view holds that the term derives from **’y/wl*, “to be pre-eminent, strong.”[39] It is not uncommon to relate the Hebrew word, *’ayil*, “leader” or “chief,” to this word (this word is sometimes taken to be related to BH *’ayil*, “ram,” but then again this word too is at times thought to be related to **’y/wl*). This word (root) in Hebrew may also underlie **’eyāl*, “strength” (for example, in Psalms 22:20, 88:5).[40] This root has also been thought to underlie the BH idiom, *yeš/’ên lĕ’ēl*, “it is/is not in the power (of X to do Y),” attested in

Genesis 31:29 and Deuteronomy 28:32 (cf. Ben Sira 14:11 A).[41] However, W. G. E. Watson has criticized this interpretation of this expression.[42] Seeing the West Semitic word **l'*, "power" here, Watson reparses the consonants of the expression to **'yn l' lyd-*, "there is no power to the hand of …", thus removing **'ēl* from the expression altogether. Watson's reinterpretation of this idiom may be doubted, since **l'y* is hardly a productive root with this meaning in BH; in fact, the opposite meaning is found in BH. Even so, the interpretation of **'ēl* in the expression *yeš/'ên lĕ'ēl* clearly remains debatable.[43] Similarly, to find an example of the Ugaritic noun in the meaning of "strength" or the like, one might appeal to Ugaritic *'ul* in CAT 1.14 II 35 (see also 1.14 IV 15) or *'awl* in 1.12 II 57. The former may mean "army" instead (though possibly based on an older sense, "strength"), while the latter word has been read alternatively as *l'akl* by S. B. Parker.[44] Even if these possible attestations of the word Ugaritic *'il*/BH *'ēl* were admissible as evidence, it would be clear that **'y/wl*, "to be strong," was not a productive root in either Ugaritic or Hebrew.[45] This fact hardly resolves the issue against this etymology, but it may suggest that the meaning "strength" was not a particular connotation of the nominal forms for "god" (Akkadian *ilu*/Ugaritic *'il*/BH 'ēl). It is true that such a meaning would very well suit the point made earlier that deities were considered greater than humans in a number of respects, but without other examples of the word in this meaning it is hard to insist on this conclusion. Moreover, the etymology itself is hardly a matter of general acceptance. So M. H. Pope comments: "There is little point in entering into further discussion of these and other proposals. None of them carries conviction or appears to have any considerable degree of probability."[46] Finally, D. Pardee has noted some counterindications to this theory.[47] In sum, we should exercise great caution before accepting and using this etymology.

A third approach to divinity is to list and study individual deities from Ugarit and perhaps to coordinate this information further with data derived from other West Semitic inscriptions, the Bible, and other corpora from sites in Syro-Mesopotamia. The covert, or not so covert, purpose of these operations is to recover information that advances the understanding of Israel's chief deity. (This is the overall thrust, for example, in *The Early History of God*.[48]) Although this approach emphasizes paying great attention to both philological and historical details, it tends to lack a larger

coherent strategy for approaching the more general picture of divinity in any given ancient culture.

This atomistic approach may be contrasted with a fourth approach, namely a large-scale comparative approach that ventures a typology of divinity. In one of his contributions to *The Encyclopedia of Religion*, the historian of religion T. M. Ludwig discusses two types of typologies, the first a cosmic typology based on geography or realms (deities of sky, meteorology, earth, and underworld), and the second a social typology based on functions of vital interest to humanity (creation and guardians of society and order; protection and war; fertility and prosperity; home and community; healing, sickness and death; and esoteric knowledge and magic).[49] This approach runs the risk of categorization without sufficient attention to the specific cultures under examination.

This book attempts to combine the advantages of these approaches in examining the major indigenous conceptual structures that ancient Ugaritic and Israelite societies used to construct their religious reality. Part I approaches the issue of divinity by examining different groupings of divinity in the Ugaritic texts from the largest collectivities down to the smallest units. Chapter 1 diagrams the basic contrast between anthropomorphic deities and monstrous divine creatures. Here F. A. M. Wiggermann has provided a very helpful typology,[50] which, modified for Ugaritic literature, helps us to sketch the religious mapping of the cosmos. Chapter 2 examines the basic concept used to refer to the polity of deities, namely the divine assembly, studied in particular by E. T. Mullen and L. K. Handy.[51] This organization was ancient already by the time of the Late Bronze Age texts of Ugarit. Ugaritic literature develops a further conceptual coherence of divinity through the notion of the divine family. Working with the study of Ugaritic society offered by J. D. Schloen,[52] chapter 3 lays out the correspondence between the four tiers of the pantheon examined in chapter 2 and the four levels of the family household in Ugaritic society. This correspondence, and the widespread attestation of familial terminology for the pantheon, would point to the patrimonial household as the fundamental image that provided a conceptual unity for the wide variety of divinities and their multiple relations. Chapter 4 discusses different sorts of divine intersections or interrelations, including pluralities and pairings of deities. Part I attempts to show the multiple levels and types of interrelationality within divinity, or what moderns might call the “godhead.”

This interrelationality gave divinity its integrity or "oneness." The notion of the family household perhaps provided polytheism with the sort of "oneness" that monotheists associate with monotheism. Indeed, in a society where the highest level of social association and identification was the family and not the individual, the polytheism of a divine family would have been far more intelligible than any notion of monotheism. Stated differently, the divine family was for polytheism a sort of "mono-theism." Only through exploring all the different divine relations can polytheism be approached on its own terms. In contrast, biblical Israel has been shorn of such a divine family, leaving divinity to be imaged largely in terms of a royal organization headed by an absolute monarch.

Part II treats divine characteristics of deities by looking at their general characteristics of strength and size, body and gender, holiness and life (or deathlessness). Chapter 5 asks what characteristics deities generally share. Or, put differently, what terms do the texts use to express what deities are? Chapter 6 addresses a particularly unusual case of divine death. This exception is the god Baal, considered a classic example of Sir James George Frazer's category of "dying and rising gods." Chapter 6 addresses the methodology and viability of Frazer's claim as it has been applied to Baal of Ugarit. Here I have been influenced by Jonathan Z. Smith's massive critique of Frazer's category of dying and rising gods[53] as well as recent studies on ritual and myth. Chapter 6 also ventures a constructive step in the interpretation of Baal's death. In other words, if Baal is not to be regarded as a dying and rising god, what is the significance of his death and return to life?

Part III treats one of the most important topics in the modern study of Israelite religion, its monotheism. Chapter 7 begins the discussion by noting the deep impact on Yahweh of the god El. The formative traditions of Israel, now largely lost in the mists of time, camouflage a complex relationship between El and Yahweh. Chapter 7 in particular turns to a seminal question in the religion of ancient Israel: who was the original chief god of Israel? Thanks to the pioneering work of B. A. Levine on El traditions in Iron Age Transjordan,[54] it is possible to explore further old traditions about El in early Israel. Because the name of the god El appears as the divine element in the name of Israel, it has been supposed that El was the original god of Israel. Some evidence may point to El as the god associated with the Exodus from Egypt in some early biblical tradition. The implications for the

religious origins of ancient Israel are profound, and they raise basic questions for anyone, scholar and nonscholar alike, who takes seriously the complexity of the biblical witnesses to the god of Israel. This chapter also addresses the origins of Yahweh and the problems surrounding reconstructing them.

Chapter 8 addresses monotheism in the context of the polytheisms of ancient Ugarit and early Israel. Within the Bible, monotheism is not a separate "stage" of religion in ancient Israel, as it is customarily regarded. It was in fact a kind of ancient rhetoric reinforcing Israel's exclusive relationship with its deity. Monotheism is a kind of inner community discourse[55] using the language of Yahweh's exceptional divine status over and in all reality ("there are no other deities but me") in order to absolutize Yahweh's claim on Israel and to express Israel's ultimate fidelity to Yahweh in the face of a world where political boundaries or institutions no longer offered sufficiently intelligible lines of religious identity. In its political and social reduction in the world (first because of the rise of foreign empires in the seventh century followed by its exile in 587–538), Israel elevated the terms of its understanding of its deity's mastery of the world. (All dates in this book are BC [BCE], unless otherwise noted.) Put summarily: Israel was now no nation, but the gods of other nations, including the greatest powers, were not really gods; and Yahweh was the sole force over both. Chapter 9 examines the monotheistic theologies in the priestly work of Genesis 1, the wisdom of Proverbs 1–9, and the apocalyptic of Daniel 7. Chapter 10 offers a study of the monotheistic rhetoric in what is considered the most prominent evidence of this language, namely Isaiah 40–55. The language of monotheism in this section of the Bible particularly illustrates that monotheism is hardly a "religious stage" at this point but rather a rhetorical strategy designed to persuade its audience of the reality of Yahweh's absolute power in a world where a foreign empire holds sway over Judah.

Throughout this work I emphasize the Ugaritic material. I beg readers' indulgence for the number of citations of primary and second literature, but the view expressed almost a half century ago by the greatest scholar of Ugaritic ever, H. L. Ginsberg, still applies today: "The specialist can not yet dispense with conscientious sifting of all the better writers on Ugaritica since the birth of this discipline."[56] In part, I have presented a good deal of Ugaritic material in order to present Ugaritic divinity on its own terms and in part to use the Ugaritic material as a backdrop or *Gestalt* for viewing the

biblical material. Most chapters therefore contain some discussion of comparable biblical texts and ideas. One of the major roadblocks in comparing Ugaritic and biblical material involves modern presuppositions about monotheism and polytheism.

2. Issues in Discussing Monotheism and Polytheism

Modern students of ancient Middle Eastern societies and religions stand on one side of an incalculable divide, while the subject they study stands on the other. Standing between the two is the Bible and the three "religions of the Book" that it influenced. Almost all, if not all, students of the Bible have been long exposed directly or indirectly to either Judaism, Christianity, or Islam, traditions that have anchored their identity in the belief in only a single deity, however differently these three religions may define this deity. This belief, labeled "monotheism" in the modern era, separates modern scholars from the "polytheistic" religions of the ancient Middle East that they study.[57] Monotheism appears clearly in biblical texts dating to the sixth century, and it is possible to push back this date by a century depending on how the point is argued; in either case, monotheism seems to represent an inner-Israelite development over hundreds of years, not a feature known from Israel's inception.[58] Polytheism, in contrast, is represented by many different bodies of texts from ancient Mesopotamian cities such as Assur and Babylon; many sites in Syria including the Bronze Age cities of Ebla, Ugarit, Mari, and Emar; and finally, early Israel itself as well as its Iron Age neighbors. The timing of the emergence of Israelite monotheism in the late Iron Age fits what has been called the "Axial Age" by the philosopher Karl Jaspers and his followers, a period in world history (ca. 800–200) that "witnessed the emergence of revolutionary new understandings of human understanding," including the awareness of "the separation between transcendant and mundane spheres of reality."[59] This periodization of intellectual and spiritual horizons represents a broad generalization, but it illustrates how the religious worldview of early, pre-monotheistic Israel (ca. 1200–800) may share as much, if not more, with the religious outlook expressed in the texts from Ugarit (ca. 1350–1150) than with later Israel (ca. 800–200) and the monotheistic faith it eventually produced. Moreover,

chapters 8 and 9 demonstrate just how central "the separation between the transcendant and mundane spheres" was to the development of the monotheistic outlook in a number of biblical texts.

Because of this great historical divide, it is difficult to remember that comparing ancient polytheistic religions with a monotheistic one is anachronistic, as the term "polytheism" only has any meaning or sense because it is contrasted with monotheism.[60] Accordingly, monotheism and polytheism in themselves hold little meaning for the ancients apart from the identity of the deities whom they revered and served. No polytheist thought of his belief-system as polytheistic per se. If you asked ancient Mesopotamians if they were polytheists, the question would make no sense. If you asked them if they or other people they knew acknowledge a variety of deities, that's a different question, because for them the deities in question mattered, not the theoretical position of polytheism. This point applies to monotheism as well. If you asked ancient Israelites around the Exilic period (587–538) if they were monotheists, they would not have understood the question. If you asked them if there is any deity apart from Yahweh, then that's also another question, because for them what mattered was the exclusive claim and relationship of the Israelite people and their deity.

The concept of monotheism reflects our modern situation as much as the circumstances of ancient Israel or the Bible, for monotheism is largely a modern concern. Monotheism's importance perhaps derived in part from contact between modern Europeans and non-Westerners, as a way of defining the Western religious traditions in contrast to non-European cultures.[61] There is a further aspect to monotheism's prominence in Western religious discourse. In the wake of the great religious conflicts since the Reformation, Western culture has learned to live with religious plurality as well as nonreligious sensibilities. Even if Christianity plays a decreasing role in people's beliefs or practice, its monotheism has continued to play a crucial role. On one hand, it has served an apparently positive social role in binding members of different Western religions and increasingly secularized people formerly of Christian backgrounds to a common "civil religion." Monotheism has served as the "sublime idea" in Western civilization in contrast to (or to avoid?) the contentious differences in actual beliefs and practices. For an increasingly secularized culture, monotheism could serve as a substitute for religious beliefs and rituals, some of which

might be seen as primitive for some highly "cultured" Westerners. In the important works of the biblical scholars T. Frymer-Kensky, E. Gerstenberger, and R. Gnuse,[62] monotheism in part serves an essentially liberal point of view (theologically and politically speaking), with little connection to explicit religious tradition or praxis.

On the other hand, perhaps as part of the effects of secularity, monotheism in itself has come to be blamed for the religious problems in the West. In the twentieth centuiry, monotheism has been criticized as a totalizing discourse that tends toward an exclusivity of others and consequently a potential for inducing violence.[63] These viewpoints, no matter where they stand on the merits and deficiencies of monotheism, assume that monotheism is a cultural or religious phenomenon in itself. These discussions have reified the idea of monotheism and disconnected it from its larger religious context. As a result, monotheism has apparently achieved a status in modern discourse that it never held in ancient Israel, where it functioned as a rhetoric expressing and advancing the cause of Israelite monolatrous practice.[64] The specifics of the practice and the accompanying dimensions of belief were considered every bit as important, if not more so, as the monotheistic rhetoric. The theoretical terms polytheism and monotheism then represent a way to pose some of the theoretical issues, and we should remain aware of this point. In this study I use the terms monotheism and polytheism as an entry point. We can then begin to ask questions about specific religions in particular times and places that involve multiplicity of deities and singularity of godhead. Accordingly, these terms serve only as a beginning for describing divinity.

During the twentieth century, it was common practice for biblical scholars to elevate ancient Israel's monotheism at the expense of the polytheism of its neighbors (especially expressed in the Late Bronze Age texts from Ugarit). Differences noted between biblical and extra-biblical literatures seem to exalt Israelite monotheism and to denigrate non-Israelite polytheism and to ignore or at least minimize, Israelite polytheism as well.[65] For example, Scholars have portrayed Israelite monotheism as a historical religion and polytheism as a nature or fertility religion,[66] or claimed Israel an ethical religion and polytheism as a pagan "deification of power and process of material production."[67] The myth of Canaan (putatively exemplified by the Ugaritic texts) contrasts with the narrative of

Israel.[68] A more sophisticated analysis saddles polytheism with an order to which the gods themselves are subject, in contrast to the monotheistic deity's control over all.[69] But there is little, if any, evidence for an independent order having mastery over deities in either Ugaritic or Mesopotamian mythologies.[70] Moreover, no idea of such an independent order of "fate" exists in ancient Middle Eastern mythologies. Ugaritic lacks a word even approximating this notion, and Akkadian *šimtu*, usually taken to mean "fate," refers to a "determined course" that can be changed.[71] No hard evidence supports the further claim that polytheism involves "a vast, dark and uncomfortable world."[72] In sum, earlier generations of biblical scholars championed—as historical judgments—the very religious views to which they largely subscribed personally.[73] The religious posture of interpreters is in itself no argument against their views. However, there is little or no basis for these contrasts distinguishing monotheism from polytheism, nor is there a firm basis for the theological weight attached to biblical monotheism itself, a weight that the Bible itself hardly reflects (as discussed in chapter 8). Some of the more recent approaches to polytheism also raise questions. In a recent treatment, the polytheism that preceded monotheism of the Bible becomes immoral and impotent, reflecting a "pessimism" and even a religious crisis questioning polytheism itself, "a pantheon of disillusion."[74]

In all of these presentations polytheism stands not only as the backdrop to biblical monotheism; it serves further as a negative foil to the biblical monotheism championed by these authors. This is apologetics, not history (or history of religion). Fortunately, things have improved in recent decades. Many scholars now recognize their religious suppositions and try to set aside their own views. Accordingly, they attempt to study polytheism on its own terms. In part as a result of the more positive definitions of myth, the dichotomies drawn between myth, on the one hand, and theology and history, on the other, have been eroding. Some biblical scholars have used the label "Israelite 'myth'" for Israelite material paralleled by the Ugaritic myths,[75] and virtually equate "Israel's religious «myth»" with its "theology."[76] "Theology," a label often restricted to texts sacred to modern religious tradition, has been applied more recently to ancient Near Eastern texts besides the Bible. The Ugaritic Baal Cycle has been said to reflect a "theology,"[77] and the authors of the great conflict-myth, Enuma Elish, have

been called “Babylonian theologians.”[78] Similarly, biblical studies for at least two decades have recognized that history and myth do not constitute two separate categories in either biblical or extra-biblical texts. In the words of J. D. Levenson, the two “reinforce each other: history concretizes cosmology, and cosmology lifts history above the level of the mundane.”[79]

Yet I have wondered if we now regard polytheism appropriately. Views of ancient polytheism seem to labor still under simplistic notions, such as the idea that polytheism was a system of division of powers corresponding to different deities.[80] In this view, each deity has a prime characteristic or profile (e.g., Baal as a storm-god) and these characteristics, or at least the positives ones, cumulatively equal the total that monotheism claims for its single deity. In other words, polytheism is simply monotheism multiplied by number of divinities and their functions. Monotheism apparently continues to affect the way we think about polytheism. This book is my initial attempt to appreciate the particular polytheism known from ancient Ugarit and the coherent understanding of reality it provided. As a product of, and adherent to, one of the three religions of the book, I too am susceptible to errors in describing polytheism in the biblical world (specifically in the Ugaritic texts); indeed, scholars will need to correct any false assumptions they detect here.

In general, my concerns in this book are twofold. I am interested in describing the indigenous notions of divinity presented by the texts discovered at Ugarit. What ideas of divinity lie behind different presentation of the pantheon? What sense of reality inheres in the descriptions of the pantheon? Only after a sympathetic reading of the Ugaritic texts will I try to use them as a backdrop to highlight comparable biblical texts. Ancient texts, both biblical and nonbiblical, provide pictures of reality[81] in narrative and other forms. We might think of the narratives or myths as communicating a picture of reality through moving pictures, of ritual and prayer as expressing a picture of reality through performative interaction, and of letters manifesting a picture through written monologue. All of these ancient texts presume and, to some extent, express an understanding of reality often couched in terms of gods and goddesses as its main figures. In short, such pictures are expressions of the “theology” of the ancient writers, the theology which they inherited and in some cases expanded to capture the nuances of their understanding of reality. From this point of view, the descriptions of divinities reflect various mappings of

reality. Such descriptions afford modern scholars an opportunity to understand how reality worked for the ancients, but only if polytheistic texts can be given as much "credence" as the monotheistic texts of Israel.

I also use the Ugaritic texts to help identify and rectify stereotypes about monotheism in ancient Israel. In other words, this study uses a sympathetic reading of polytheism in the Ugaritic texts to bolster the discussion of Israelite monotheism with better theoretical foundations. I would like spell out this point. This study focuses attention on the common assumptions about divinity made by different West Semitic peoples, including Israelites and their contemporary neighbors (such as the Phoenicians, Moabites, and Edomites) as well as their predecessors to the north, especially the now well-documented people of the city-state of Ugarit. All of these peoples in the Levant, despite distances in time and space, shared many views of what deities were in general expected to be and do, although these peoples may have developed perceptions of deities specific to their cultures. As a consequence of this approach to studying deities, this book situates the religious culture of Israel within the larger setting of West Semitic religion (or what some scholars would call "Canaanite" religion). For some time now, scholars have challenged the claims made in the Bible, and often championed by its modern adherents, that Israel was originally separate from its Canaanite neighbors and that Israel's religion, so centered around the one god Yahweh, was completely different from its neighbors' religious practices and deities. Research summarized in *The Early History of God* indicates that, while early Israel recorded some traditions not shared by its neighbors, these distinctive features are relatively rare and hardly indicate a wholly different culture or religion. Indeed, the prophets seem to have been quite right in observing that Israel maintained religious practices quite like the ones conducted by its neighbors. But while the prophets thought this trend to be of secondary influence, it would seem that in fact these practices were old ones in Israel. Israel's perception of itself as a separate culture and religion destined to a covenantal life only with Yahweh grew over a long period of time. It did not leap into being on Mount Sinai at the beginning of Israel's existence as a people as recorded in the book of Exodus. Indeed, the pristine picture of Israel's relationship with Yahweh at Sinai was itself part of a later effort to clarify a distinctive religious identity for Israel, one no earlier than the ninth century as far as we know, and in the view of many scholars, hardly even

this early. The Sinai narratives, largely a product of the monarchy and later periods,[82] reflect Israel's long historical struggle to understand itself as a priestly people and a people set apart for the service of a single deity, in short, a monotheistic one. With this understanding of Israel's so-called "Canaanite" heritage, in language, literature, and religion, this book works with a model of Israelite religion that developed in many diverse ways from a larger West Semitic background, or a "Canaanite" background. This term has engendered a great debate; I will therefore discuss it in the next section.

3. Problems with the Term "Canaanite"

Despite the widespread scholarly use of the term "Canaanite," I want to warn readers that I have largely avoided it in this study. It is a misleading term that often clouds analysis. In the current scholarly environment, it is impossible to escape the debate over the relations between "Canaanite," "Ugaritic," and "Israelite," as well as "Amorite." The labels "Ugaritic" and "Canaanite" have been a matter of discussion since the discovery of the Ugaritic texts. In the 1960s, A. Rainey argued that Ugaritic is not Canaanite, because one Ugaritic text refers to a Canaanite with other foreigners, specifically an Egyptian and someone from Ashdod (CAT 4.967).[83] Rainey also cites an Akkadian text from the site of Ugarit that refers to "the sons of Ugarit" and "the sons of Canaan." Following Rainey's lead, D. R. Hillers[84] has suggested that the Ugaritic texts cannot be used to establish a Canaanite culture with which to compare developments in Israel. The denial of the equation of Ugaritic and Canaanite is correct, strictly speaking, but on the basis of linguistic criteria it is possible to defend a strong relationship betwen the two.[85] I will return to this issue later.

Preferring the term "West Semitic" to "Canaanite," N. P. Lemche goes farther than Rainey or Hillers.[86] He disputes Rainey's arguments that Ugarit was not part of Canaan. According to Lemche, one letter from the king of Tyre (EA 151) includes Ugarit in the land of Canaan; yet Rainey has seriously questioned this interpretation.[87] There is the further issue of the historical significance of the term "Canaanite." Lemche argues that "Canaanite" never appears in records used by "Canaanites" themselves: "to

the scribe of ancient Western Asia ‘Canaanite’ always designated a person who did not belong to the scribe’s own society or state, while Canaan was considered to be a country different from his own.”[88] Lemche sees the biblical use “Canaanite” as an artificial construct largely deriving from the post-exilic period. Lemche takes the conflicting descriptions of Canaanites in biblical and other Near Eastern texts as evidence that no such people or culture existed. In effect, Lemche relies on an argument from silence. Moreover, Lemche claims: “The Canaanites of the ancient Near East did not know that they were themselves Canaanites.”[89] However, it seems odd to suppose that foreign courts from Egypt to Hatti to Mesopotamia used the term “Canaanite,” but the people whom others designated with this term never knew themselves by it. Perhaps this term did not function as the primary self-designation of people from “Canaan” (perhaps their individual clan units, cities, towns, or sub-regions were the primary self-designations).[90] However, the evidence does not establish Lemche’s claim.[91] Moreover, “Canaanite” has a certain utility as a geographical term essentially designating the coastal areas south of Ugarit and Alalakh as opposed to inland Syria. However, the problem is difficult, and perhaps the question of what constitutes an ancient culture deserves a re-examination in light of Lemche’s study. In the meantime, because too little is known of a clearly identifiable and coherent Canaanite culture (at least from a textual perspective), perhaps it is preferable to use the broader term “West Semitic.”

A similar problem of definition applies to the terms “Ugaritic” and “Amorite.” This question has a long lineage, going back at least to A. Goetze in 1941,[92] and continued later by his student J. C. Greenfield[93] and most recently by R. Zadok.[94] Zadok defines Ugaritic in relation to Amorite: “Amorite is understood here as a dialect cluster extending from Mesopotamia to northern Syria. Ugaritic, which has intensive lexical correspondences with Canaanite, is not a straightforward Canaanite dialect and may therefore be regarded the westernmost dialect of ‘Amorite’ type.”[95] In the “‘Amorite’ type” Zadok includes material from Babylonia, Mari, Emar, and Munbaqa, as well as Ugarit. Zadok’s “Amorite” is the West Semitic material from Syro-Mesopotamian cuneiform sources in the second millennium. From the modern perspective, Amorite language and culture are particularly difficult to evaluate as grouping. The evidence varies

tremendously, from the rich textual evidence of Ugarit and Emar to the Mari texts wherein the Amorite shines through the veneer of the standard East Semitic language (standard Akkadian) to the more occasional item in the record from Babylonia proper. However, Ugaritic literature shows cultural contacts with the West Semitic Amorite traditions known in Akkadian sources. In the words of A. Caubet, "Ugarit had maintained close ethnic, cultural and economic ties with the Middle Euphrates and Babylonia, particularly well documented at Mari for the early second millennium."[96] To cite one known example, both the Kirta narrative and the genealogy of the Hammurabi (Hammurapi) dynasty mention a common ancestral background.[97] The apparently shared tradition then links the Ugaritic material with those whom the urban elites of Syro-Mesopotamia knew as Amurru. Such a picture also helps to explain better the influence of West Semitic motifs that have made their way into Mesopotamian literature; witness T. Jacobsen's brilliant insight that the West Semitic conflict myth influenced the presentation of Marduk and Tiamat in Enuma Elish.[98] (This view has not been wholly welcomed by the Assyriological community, a reaction due less to scholarly arguments than to reasons involving the modern history of Assyriology and its famous Bibel/Babel controversy.[99] Yet to anticipate a point made later, if Assyriology has at times shunned biblical studies, Ugaritic studies has perhaps suffered from the opposite tendency.) Indeed, it is not clear linguistically why Ugaritic or Amorite should be clearly delineated from the West Semitic evidence of "Canaan" known from the Amarna letters. A handful of isoglosses might be invoked, such as the classic "Canaanite shift,"[100] but even such a criterion has been a matter of debate. While one can argue that this feature does not exist in Ugaritic,[101] it may also be lacking in what might be called "north Canaanite." W. F. Albright, for example, called this feature the "south Caananite shift." Thus, at this point the field can probably do little better than categorize Ugaritic, Amorite, and Canaanite material all under the rubric of West Semitic. There are linguistic and cultural advantages to keeping these terms separate, and this approach avoids the historical problems of identifying Ugaritic, Canaanite, and Amorite. In the end, perhaps we should drop the term "Canaanite" as a modern category of analysis and just pay attention to its ancient uses.

Recently, many have remarked that Ugaritic religion should not be included in discussions of "Canaanite" or Israelite religion, since it is not "Canaanite" or because it stands at such a temporal and geographical distance from Iron Age Israel and Judah. For example, O. Keel and C. Uehlinger correctly assert that the Ugaritic texts "are not primary sources for the religious history of Canaan and Israel,"[102] but such a view hardly precludes seeing the Ugaritic texts as providing some of the larger background behind the development of Israelite religion. The two societies that produced these literatures show many cultural differences: ancient Ugarit's literature was generally far more ancient (ca. 1350–1150), its kingdom far more urban, cosmopolitan, and centralized. In contrast, ancient Israel was far more rural, was far more diverse topographically and territorially, and had a lengthier history of extant literature (ca. 1150–160). This area lacked a centralized monarchy in the Iron I period and remained far less centralized even when the monarchies manage to imprint themselves on their agrarian, clan-based cultures. No matter how this cultural relationship is resolved, the diversity of later reflexes of material in the Ugaritic texts shows that mythic narratives were transmitted in the areas known in the Bible as Canaan and Israel.[103] These later sources include some Phoenician inscriptions and classical sources on Phoenician culture; biblical and rabbinic texts describing different versions of the West Semitic conflict myth; Aramaic monumental and bowl inscriptions; and late classical sources.[104] On the basis of parallels between the Baal Cycle and other second millennium texts on one hand, and the Hebrew Bible, Philo of Byblos, and other later sources on the other hand, a number of scholars have argued that the Levant, including ancient Israel, enjoyed a wide body of creation and battle myths.[105] As J. Day has recently demonstrated,[106] specific proper names and terms common to both the Ugaritic and biblical texts indicate that the Ugaritic texts remain germane to the study of ancient Israel, even if Ugarit is neither proximate to Israel nor equivalent to "Canaanite." Such specifics include references not only to deities in general terms but also to the names of their abodes (such as Baal's home, Mount Sapan, mentioned in Psalm 48:3) or enemies (such as Baal's enemies, including Leviathan and Tannin).[107]

In this connection, Ugaritic mythic material does more than refer to "Canaanite" sites (such as Tyre, Sidon,[108] and *šmk*, that is, Lake Huleh[109]).

The Ugaritic corpus also contains traditions associated with “Canaan,” such as the mention of Ashtaroth and Edrei, two Transjordanian sites (CAT 1.108.2–3). Vocabulary found in Israel’s oldest poems and the Ugaritic texts suggest continuity in the literary tradition between these corpora.[110] In sum, the broader literary tradition between the Late Bronze Age Levant and biblical material includes the Ugaritic texts as well as material in the Amarna letters from “Canaan.”[111] It is evident that ancient Ugaritic and early Israelite literatures were not completely different, especially in the general parameters of language, social structure, religious terminology, and religious practices (prayer, sacrifice, and religious experience), and even conceptualizations of divinity.[112] None of these points of contact between Ugaritic literature and “Canaanite” culture should be construed as suggesting a simple equation between them. Even so, their complex literary traditions can hardly be separated. Analysis of specifics will include similarities as well as differences but perhaps more important at this stage of research are the differences within the parallels.[113] It is precisely the differences within their larger similarities that sharpen our understanding of Israelite religion, particularly its differentiation from the larger West Semitic culture for which the Ugaritic texts constitute the single greatest extra-biblical textual witness. These distinctions do not diminish the significance of the parallels; rather, they more precisely define them. The same point applies to religion. These specific points of contact between Ugaritic and Israelite religion need not be understood as pointing to a single or “same” religion, but they do point to a larger religious tradition shared broadly by West Semitic peoples, including the Israelites.[114] Many people like to contrast the polytheism of a site like Ugarit with Israel’s monotheism, but this monotheism emerged only midway through Israel’s history. It was heir and reaction to a long tradition of Israelite polytheism.[115] In sum, the Ugaritic texts remain pertinent despite significant differences. Although the Ugaritic texts are not to be labeled Canaanite, late reflexes of material attested in the Ugaritic texts show that mythic narratives were transmitted in the areas known in the Bible as Canaan and Israel during the Iron Age.[116] The biblical texts also show the imprint of this mythic material and show its existence among the people of the coast in what was regarded as Canaan by the biblical authors.

4. More Cautionary Notes: Literature, History, Theology, Myth

The issue of the literary and cultural relations between the Ugaritic texts and the Bible is not the only methodological problem involved in this study. This section addresses further assumptions sometimes made by students of the Bible and the ancient Near East. An investigation into biblical and Ugaritic statements about deities assumes their validity as historical generalizations for the cultures involved, on some level. Such statements are taken to represent perceptions prevalent among those segments of society that produced them. In turn, one might infer further that the scribal groups that produced these texts were sharing viewpoints held by nonwriters, either by virtue of a shared wider worldview or by scribal groups' influence upon nonwriters, or vice versa.[117] In any event, any analysis stands at a great remove from the actual religious situations, for so little is known of them. Scholars of the Bble and ancient Middle East largely investigate vestiges of ancient religious situations behind texts, many of which remain largely impervious to confident historical reconstruction. Many critics of an earlier book of mine, *The Early History of God*, persuasively argued that the book should have grounded the religious information in it in more concrete historical or social circumstances. I have attempted to address this weakness here, but I also remain deeply suspicious of further reconstructions. It is for this reason that this work, to some extent like *The Early History of God*, stands at a greater threshhold of generalization in positing historical backgrounds to texts. There is nothing wrong with admitting the possible impossibility of a "thick description," to use Clifford Geertz's term[118]; perhaps even a thin description may be impossible. And there is nothing wrong with such a lesser enterprise; it is all that we have. And even so, it is difficult to be too careful. (So T. S. Eliot's helpful reminder from "Gerontion": "History has many cunning passages, contrived corridors / And issues, deceives with whispering ambitions, / Guides us by vanities.")

In this study, I offer a central cautionary note about highly specific historical statements correlating what deities were and did and what ancient peoples believed and acted on.[119] A glance through a journal such as

Historical Methods: A Journal of Quantitative History and Interdisciplinary History should stop biblical scholars from offering historical conclusions marked as little more than educated guesses or working hypotheses. Even the more thematically and less quantitatively oriented journal *Comparative Studies in Society and History* should arrest our impulse to generalize.[120] Similarly, a perusal of work in historical sociology will reveal the dearth and jagged contours of the religious data available to us.[121] (Or, to twist the train of Eliot's words from his *Four Quartets*, "These are only hints and guesses / Hints followed by guesses; and the rest is prayer, observance, discipline, thought and action."). Our limited data force a sense of historical fragility: even as I nurture interpretation, I continually run the risk of creating it in my own image.[122] General considerations about deities are like dots that I am pinpointing and connecting. Deities are worthy subjects of traditional scholarship (*Wissenschaft*), yet all scholars face the same historical problem when we attempt to interpret a dataset.

For the historian or historian of religion trying to understand a wider historical context such as Israel and the ancient Near East, for the theologian attempting to understand who God was and is within a wider theological landscape such as the Bible, the methodological issue is the same. In short, my own historical interests as well as religious and theological concerns—and our guild's as well—drive this study and others like it. Because of Western historical consciousness since the Enlightenment, one cannot pose such an issue without historical context. As the Bible itself suggests, the historical context for understanding the biblical God includes other gods and goddesses. This book reflects this fundamental problem for students of divinity in the world of ancient Israel as reflected in the Bible. As a result, this study straddles the line between theology and the academic study of religion.[123] Theology generally asks normative questions of what should be believed and, correspondingly, who God was and therefore is. Theology usually works on the assumption that the identification or study of the deity is championed in some sense by the investigator. In contrast, the study of religion asks descriptive questions about what people believed, and further about what goddesses and gods including Yahweh were or were considered to do and be. Religious research may presuppose that the investigator at least sets aside her or his belief in the object of inquiry. Lately there has been a great deal of crossover between theology and religion. Perhaps they now share greater common

ground after an initial history of conflict between the two fields. Moreover, theology can benefit from historical study of ancient religion that precisely profiles the biblical text, viewed as the abiding theological witness to the divine choice of Israel. The religious struggles underlying the development of the Bible are better understood as a result of historical study. The study of religion in this book should hold potential value for theology, as it explores some of the choices that Israel's eventually normative traditions rejected and selected over time.

Finally, I noted earlier that the capacity to link general statements (including those about deities) to historical *contexts* is a well-known and often rehearsed problem,[124] but doing so without wading into the current (or "post-modern") debate about theory[125] perhaps betrays a failure to engage the philosophical issues and presuppositions of our discipline. (My own work, *The Early History of God*, is a fine example.) However, this debate deserves its own separate, complete treatment. For now, suffice it to say that I attempt to describe religious reality expressed in the Ugaritic *and* biblical texts. I try to render the two without giving an implicit or explicit higher value judgment to biblical monotheism, even though I am a product of a tradition that champions it. I try to understand the perceptions and visions of reality in both sets of texts. (And I do not assume uniformity within either set of texts; there is variation in conceptualization and historical setting and development.) I know that such studies are driven by contemporary needs and traditional questions of theology. I realize that such study then is not without valuation (what study is?), yet I have tried not to "choose sides" in the descriptive and analytical task.

Given the issue of situating my own intellectual point of standing, it would be appropriate to return to the modern intellectual critics of God and belief. These figures have provided students of religion with a wide array of weapons. Their analyses are powerful, *necessary* tools in the intellectual arsenal of anyone interested in the study of religion, believer and nonbeliever alike.

> What a Marx or a Nietzsche or a Freud offers the believing community is a panoply of iconoclastic devices for smashing the idols of belief naively unaware of its origins in certain systemic distortions —be those distortions economic, philosophical, or pyschodynamic. But "to smash the idols is to let the symbols speak."… The burden of

> faith is to evoke a refined passion for the possible by way of an excavation of the distortions at the base of its origins.[126]

The tools offered by these modern icons (or idols?) pierce deeply to the human dimension in religion, and it is the task of scholars, whether they are believers or not, to offer an "excavation of … origins" that clarifies the ancient context of religion and ultimately the modern religious situation as well.

Believers may worry that with these tools one could claim that religion can be "explained" as human projection. However, this view represents only that, a claim or a hypothesis, validated by no more or less evidence than the conviction that religious expression reflects more than a human monologue only masquerading as a human-divine dialogue. For example, J. S. Preus's book *Explaining Religion*[127] admirably surveys the modern history of discussion about religion but finally concludes that religion can be "explained" (really in the sense of being "explained away"). Preus combines Freud's psychological views on religion with sociobologists' more societally oriented understandings of human beings. For Preus, the two add up to individual and social explanations for religion qua projection. All this is in the spirit of our age, but even a detour through Gordon Allport's critique of Freud[128] on religion is sufficient to warn students about making claims about religion as a matter of purely human projection.[129] It is unclear from any modern critique of religion that anyone is in a position to disprove the reality of religious mystery expressed in the ancients' texts, even if we probe that mystery. Modern affirmations of such faith as well as denials of it are acts of faith. Yet these critiques of religion bring us closer to understanding the human side of divine-human relations. And this is what believers and nonbelievers, believing and unbelieving theologians and historians of religion share: a desire to understand the human side of the equation in religious traditions.

Moreover, modern believers perhaps have a critical contribution to make in the study of ancient texts. Even if the structure of belief or notion of belief or divinity is radically removed from the ancient texts to which believers lay claim, they are more prepared to accept ancient religious experience, concepts of divinity, and religious tradition as valid; sometimes nonbelievers do not take seriously ancient claims made about divinity or the experience of it. I may be wrong in this view, but much of the study of

Israelite religion or West Semitic religion in graduate schools hardly broaches the subject of religious experience. Yet out of experience comes literature, and out of religious experience comes religious literature. Some appreciation of religious experience perhaps then is a helpful aid in the quest to understand both biblical and extra-biblical texts. These religious texts are replete with language for the divine. Deconstruction, in S. McFague's words,[130] means that discourse is nothing but metaphor, and in religious discourse, there is nothing but metaphor.[131] Yet Ugaritic and biblical texts hardly constituted language or metaphor devoid of context. Ancient religious metaphor and experience mediated one another and both partook at once of mystery[132] and the personal.[133] The visions of religious reality reflected in the ancient texts were expressions of hope informed and focused by tradition, experience, and imagination.[134] In this experience ancients and moderns have identified "God," thanks in part to the biblical tradition. Ancient and modern religious experience has involved climbing the mountain of biblical metaphors that in turn have given shape to that experience.[135] Religious faith and practice are generated by and generate mystery, which conceals even as it continues to reveal.

Finally, I must address the potentially misleading term "myth," for the Ugaritic narratives are regarded as myth whereas biblical narratives about the Israelite god are considered historical. Many, if not most, people today think of myth as untrue and history as true. Furthermore, past attempts to identify or list myths in the Bible according to a theoretical definition, such as that found in B. Otzen, H. Gottlieb, and K. Jeppesen's *Myths in the Old Testament*,[136] are problematic because of the divergent use of the term "myth" in biblical studies since the last quarter of the eighteenth century.[137] Before discussing myths in Ugaritic and Israelite literatures, I would like to examine, at least in a cursory manner, the definitions of myth as well as their limits. My purpose is not to discuss the theoretical issues in their entirety, an impossible goal in any single essay, but to establish a minimal starting point from which to discuss the social and political uses of myth in Israelite society and the so-called demise of myth in Israel.

Today myths represent untrue stories for many people. For a modern audience, myth conjures up the world of Greek, Roman, or Norse deities, and this mythology is often considered a quaint, but untrue area of antiquarian interest. Some scholars, such as R. A. Oden, argue that the

modern attitude, which is so critical of myth, derives from negative stereotypes of myth partially inherited from Christian tradition.[138] The modern academic fields of theology and philosophy, based on traditional antipathy toward myth and the post-Enlightenment exaltation of history, have at times diminished the value or truth of myth.[139] Older critical definitions of myth in the work of biblical scholars such as H. Ewald and H. Gunkel reflected this negative assessment in their formal definition of myth as stories about deities but not the Deity of Israel.[140] This view represents a Christian modification of the Grimm brothers' definition of myth as stories about deities, a definition echoed in the work of modern folklorists such as Stith Thompson.[141]

Although myth still carries a decidedly negative connotation in general culture, some modern philosophers and theologians,[142] psychoanalysts,[143] and anthropologists and historians of religion[144] have re-examined myths in a more positive manner. For anthropologists, for example, myths reveal important values about the societies that produce them. Accordingly, anthropological approaches toward myth tend to address their functions in societies rather than their formal characteristics. Unlike formal definitions, functional definitions assert what myths "do," such as "explain things." Or, for some anthropologists, myths reflect social structure or resolve social conflict.[145] Based on work in history of religions, M. Eliade[146] combines formal and functionalist criteria in his definition of myths as stories about supernatural beings; these stories are considered true because they refer to realities and sacred because they involve supernatural beings. For Eliade, myths describe origins of realities manifest in the world, and people who "live" the myths are able to affect these realities through knowledge of myths. Oden offers a similar definition of myths containing four elements:[147] (1) myths are narratives; (2) they are traditional, that is, transmitted almost always orally within a communal setting and for a long time; (3) they contain characters who are more than human in some way; and (4) they relate events from remote antiquity.[148] According to Oden's definition, virtually any biblical narrative with a long history of transmission placing Yahweh or other divine beings in the distant past is a myth.[149] Thus, on the Ugaritic side, the Baal Cycle, Keret and Aqhat, and many other texts are myths, and on the biblical side, virtually all of the Pentateuch, the Deuteronomistic History, the books of Chronicles, stories in

the prophetical books, and many other texts would fall under the rubric of myth.[150] For Oden, any story mentioning Yahweh, the heavenly council, or an angel constitutes a myth. These approaches to myth are consonant with the recent erosion of dichotomies drawn between myth on the one hand, and theology and history on the other (mentioned earlier). Indeed, as I mentioned, it has been recognized for at least two decades that history and myth do not constitute two separate categories in either biblical or extra-biblical texts.[151]

Nonetheless, there are difficulties with Oden's definition. This definition does not differentiate myth from folktales, legends, and sagas, although this distinction proposed by the Grimm brothers has been maintained in biblical studies at least since J. P. Gabler in the late eighteenth century.[152] Like myths, folktales, legends, and sagas are also narratives thought to hail from remote antiquity and containing characters who are in some way more than human.[153] Ugaritic texts such as Keret and Aqhat are sometimes considered myths, but the label of myth is controverted in these cases, and O. Eissfeldt and others have regarded them instead as saga.[154] Some scholars categorize narratives focusing on human deeds of remote antiquity as legend even though deities appear in them, whereas narratives focusing on deities are considered myths.[155] With Oden, one might widen the definition of myth to include narratives involving Yahweh or divine beings and not just ones centering on divine beings, especially since, as Thompson notes, many cultures do not draw such a fine distinction.[156] And when one needs to make such a fine distinction, the validity of the definition might be questioned. Both older and newer definitions appear dictated by the discipline or intellectual traditions to which the definer belongs.[157] This state of affairs might lead to jettisoning use of myth as a literary category.

Nonetheless, a narrow, formal definition retains a certain utility on three fronts. First, Thompson and folklorists begin with a definition of myth as narrative centering on divine beings before defining the functions of these myths or including other works such as folktales with divine beings under the rubric of myth. In such a narrower, formal definition rather than a functional one, myths can be identified first and then classified by functions according to different approaches, whether form-critical, myth and ritual, anthropological, structuralist, or something else. The insights to be gained

from these disciplines are by no means minimal, but for ancient societies accessible chiefly through literary and archaeological remains, a definition for the literary category of myth is a helpful starting point prior to larger claims about different myths in relation to their wider cultural contexts. Second, the narrower definition accords with the minimum view traditionally accepted in ancient Middle Eastern studies, although this situation is changing. Third, rather than regarding all depictions of Yahweh as myth, this approach does not obscure an important difference between myths, that is, narratives, and "mythic imagery," which is more prevalent in biblical texts than myth. A minimum view may begin therefore with the circumscribed definition of myth as narratives about divine beings, but without excluding narratives with only one deity such as Yahweh. For Ugaritic and biblical studies, the Baal Cycle (CAT 1.1–1.6) may serve as a useful standard for myth.[158] If there is one text that all scholars can agree is a myth, it is the Baal Cycle.[159] And if the Baal Cycle is a myth, then biblical narratives about the storm-god Yahweh are mythic.[160] As a working definition, biblical narrative considered to relate events of remote antiquity and centering on the action of at least one divine figure comparable to narrative in the Ugaritic Baal Cycle is "myth," and biblical material using divine imagery comparable to divine imagery known from the Baal Cycle may be characterized as "mythic imagery."[161] As a further distinction, I will use the term "mythic material" in this study for both "myth" and "mythic imagery."

Using the Baal Cycle as a standard, one may apply the term myth to a limited number of biblical passages including the following texts: Genesis 1–2; Genesis 6: 1–4; Exodus 15;[162] Deuteronomy 32:8–27, 33:2–5 (cf. Judges 5:4–5; Ps 68:7–8); Joshua 2:2–5 (cf. Judges 6:11–18); Job 1:6–12 and 2:1–6 (cf. Job 38–42:6); Psalms 74:12–17 (cf. 29: 3–8; 89:9–10; 104:5–9), 78:21–72; 82:1–7; 105:12–45 (cf. 106: 6–46; 107; Lamentations 2:1–8); 135:5–12 (cf. 136); Isaiah 14:12–15; Ezekiel 28:11–19 (cf. 28:1–10); Habakkuk 3:3–15; and Daniel 7–12. Some scholars might balk at such an idea of biblical myth in the context of prayers and other biblical texts, but few scholars would deny the historical dimensions of the recitation of Israel's foundational events in Psalms 78, 105, and 106. If these psalms can be seen as containing "narrated history" in liturgical form, then so too the passages listed in this paragraph can be regarded as "myth." Like the Baal

Cycle, many biblical texts reuse or reformulate older narratives about the divine warrior (e.g., Judges 5:4–5; Deuteronomy 33:2–5; Psalms 29 and 68:7–8; Habakkuk 3:3–15). While old myths were commonly readapted in ancient Israel, new myths are rarely attested. Stith Thompson remarked of new myths: "It is always easier to borrow a myth or tale than it is to construct one."[163] Israel generated relatively few new myths, and the majority of them drew on older mythic material, including the Garden of Eden and the personifications of wisdom; these are addressed in chapter 9. According to M. Himmelfarb, the tour of heaven provided by an angelic guide was an Israelite innovation.[164] In short, it may be preferable simply to regard both Ugaritic "myths" and biblical material as different ways of presenting the divine. If there is any contrast to be drawn, we might say that the Ugaritic myths offer a continuous narrative, like a modern film, whereas the biblical sources provide a series of glimpses, a handul of snapshots or frames; both derived from the same tradition of continuous narrative. Furthermore, Ugaritic myths and biblical texts present largely differing perspectives: the myths tend to focus on a divine world with little representation of humanity's participation in witnessing this divinity; in contrast, the biblical prayers and other texts with mythic imagery view divinity from the human perspective. Of course, this contrast is a matter of genre: Ugaritic prayers (such as CAT 1.119) also offer a human viewpoint on divinity.

All this by way of introduction to the many, complex methodological difficulties entailed in exploring divinity in the Bible and the Ugaritic texts.

PART I
THE STRUCTURES OF DIVINITY

1
Anthropomorphic Deities and Divine Monsters

> There's no place like home.
>
> *The Wizard of Oz*

What do Ugaritic texts and iconography tell us about the representation of divinity? This inquiry begins with the groupings of divinity in the Ugaritic texts. This initial chapter focuses on the most basic structural division in divinity in the Ugaritic texts, namely, the main distinction between anthropomorphic deities and monstrous divine creatures. Following a long line of discussion by anthropology and ancient Middle Eastern studies, especially in the 1970s and 1980s,[1] the Assyriologist F. A. M. Wiggermann has applied to the Mesopotamian organization of the cosmos an important and basic spatial distinction well-known in anthropological research: the "periphery" as opposed to the "center" (or "home").[2] This general division informs a series of correlations in urban elites' conceptual organization of time and space, between their perception of culture and the cultivated on the one hand, and uncultured and the uncultivated on the other. J. D. Schloen describes the relationship between center and periphery in Ugaritic literature in these terms:

> [T]he social "center" is thus "the center of the order of symbols, of values and beliefs, which govern the society"; thus the terms "center" and "periphery" do not necessarily imply spatial separation. For Ugarit, however, it can be argued that the social center was focused in the physical center of the kingdom at Ras Shamra, which appears to have been the main locus of administration, or ritual, and of literary

activity. In this case, then, “urban-rural” is more-or-less synonymous with “center-periphery.”[3]

At the heart of the center lies the household, which connotes safety and protection as well as familial patrimony and land,[4] the site denoting not only family safety but also domestic conflict. The periphery stands as a transitional zone between the center and the distant realms of the cosmos lying beyond human experience and control. Accordingly, one might prefer to propose three zones: center, periphery, and beyond the periphery (beyond the organized cosmos).

Although these general categories have been well delineated for ancient societies, scholars—with the exception of Wiggermann and Schloen—have not extended these categories to the presentation of the cosmos (or universe) in ancient mythological material. Allowing for some flexibility, I attempt in the following section to apply these categories to divinity and the cosmos in the Ugaritic texts.[5] These categories may be applied to deities as well as divine geography and topography based on indigenous terminology and distinctions. Within the center, we may note a further distinction between home and foreign. And within the periphery, what is in the periphery and experienced by humans is different from what is beyond the periphery and beyond human experience. These subdivisions are primarily expressed in terms of space and place.

1. Place: Near, Foreign, and Far

In accordance with this scheme, deities inhabit “near” places whereas “monsters” or “demonic forces” do not. The division of divinity between deities and demons, so to speak, corresponds to the mapping of divine space. CAT 1.23.65–69 expresses a contrast between the center versus the periphery in agrarian terms, the “sown” (*mdr*ʿ) versus the “outback, steppe” (*mdbr*).[6] According to this text, the sown contains plenty of food and wine (1.23.70–76). This use of “sown” appears also in administrative lists, twice for royal workers (4.141 III 16 and 4.618.6), and once for a record of wine (4.149.16). This last reference (4.149.14–16) is of further interest, as it

shows cultic devotion in the "sown": "five (jars of) wine for the sacrifice of the queen in the sown" (*ḫmš yn bdbḥ mlkt bmdr'*).[7] Failing vegetation is the object of Danil's verbal expression (ritual "prayer"?) in 1.18 II 12–25. Fields (*šd*) are subject to both human cultivation (e.g., CAT 4.39.1–7, 4.72.2–20) and divine ownership (1.23.28).[8]

Within the center or area of human cultivation and civilization, deities are accorded sacred mountains or cult sites,[9] but cosmic enemies are not. One of the Ugaritic snake-bite incantations lists the following divinities with their mountains or cult-sites: El on mount *ks*, Baal on *ṣpn* (1.100.9), Anat and Athtart on *ʻinbb* (1.100.20); and Dagan at *ttl* (Tuttul, 1.100.15), Resheph at *bbt* (1.100.31), Athtart at *mr* (Mari, 1.100.78)[10] and perhaps Mlk at *ʻṯtrt* (Ashtarot, 1.100.41), Yarih at *Irgt* (1.100.26), and ZZ and KMT at *ḫryth* (1.100.36).[11] The Ugaritic texts recognize a distinction between home and foreign divinities and home and foreign cult-sites. Although Kothar wa-Hasis's activities of weapon making (1.2 IV) and palace building (1.4 V–VII) clearly take place in the center, he has no mountain as his abode. Instead, he is said to dwell in Memphis and Caphtor (1.100.46), perhaps a reflection of the center of foreign culture and system of trade that brought artisans at Ugarit the materials necessary for their craft. Indeed, given Ugarit's location as a crossroad for land and sea trade across the eastern Mediterranean, the Levant, and Syro-Mesopotamia, it is hardly surprising to see such locales reflected in the mythological presentation of the outer reaches of the zone of civilization tied to the home. Ugarit's trade may constitute the basis for the mythological rendering of the connections between home and foreign within the center, with its agricultural life, its "sown," at the heart of its basic sense of home. In short, the mythlogical center manifests a subdivision between home and foreign space.

Within this general home of human and divine order is a center point, Baal's mountain, Mount Sapan.[12] This conceptualization is evident from the description of Baal's palace on the mountain in the Baal Cycle and from the heading of one list of deities as "the gods of Sapan" (*ʻil ṣpn* in 1.47.1), as well as the superscription of a ritual text, "the feast of Sapan" (*dbḥ ṣpn* in 1.148.1; 1.91.3).[13] Baal's mountain is also called "pleasant place" (*n'm*), perhaps garden language that, in biblical texts, is a recurring motif for the center point of the cosmos.[14] Later West Semitic cosmology, for example in the Bible (Genesis 2–3 and Ezekiel 28), represents this sown as a garden,[15]

a reflection of the divine fructification of the center. For this reason the mountain of the gods is also regarded as a garden. However, this notion of garden is scarcely developed in the Ugaritic texts.[16] In sum, the sown is the region of human habitation and cultivation; within it lies the realm of cultic activity devoted to beneficial deities. These distinctions for center may be schematized in the following manner:

PLACE HORIZONTAL SPACE	
HOME	FOREIGN
'ugrtym (2.81.27, 28)	Egypt/Crete
local cultivation (e.g., Baal)	foreign culture and trade (e.g., Kothar)

SUPERNATURAL	
Home Deities	Foreign deities
Cult/blessing	No cult/with blessing

Just as the center bears a subdivision, the periphery likewise shows a distinction between what humans experience in the periphery and what lies beyond this periphery. This distinction is also expressed spatially:

Periphery	Beyond the Periphery
Unpopulated zones (outback)	Underworld (*'arṣ*)
mdbr, "outback"	Netherworld (e.g., Mot[17]),
Near surface waters	Waters beyond (*thmtm*; e.g., Yamm)

In contrast to home, the periphery, or "outback," is characterized as a terrain of "rocks and brush" (*l'abnm wl'ṣm*, 1.23.66).[18] The outback marks a marginal or transitional zone and the site of human activities such as grazing and hunting (for the latter, see 1.12 I 34–35, 1.92.3); here begins the area of dangerous forces. Accordingly, in the cosmic geography of the Baal Cycle, *dbr*, "outback," is part of the designation for the locale where Baal meets Mot, the god of "Death" (1.6 II 20; cf. 1.5 VI 6, 29); this place appears to be the edge of the underworld (1.6 I 8–14). The *mdbr* is also the site where Baal's foes are to confront him in 1.12 I 19–22.[19]

Unlike the beneficent gods, Yamm, Mot, *tnn*, and the other cosmic enemies do not have holy mountains. Furthermore, the departures from this divine topography are perhaps as interesting as the general pattern itself. For example, one divine enemy, Mot, is associated with a mountain called *knkny* (1.5 V 13). However, Mot does not live on top of his mountain. Instead, the mountain is the entrance to the underworld. The homes of the astral deities, Shahar and Shalim, understandably are in the heavens (*šmmh*, 1.100.52). Athirat has no divine mountain, although one might argue that she shares her divine husband's home (at least on a part-time basis.[20]) El's home is also of further interest. The mythological texts present it in terrestrial terms as a mountain located at "the channels of the Double-Deeps" (*'apq thmtm*, 1.4 IV 21–22; cf. 1.3 V 6–7, 1.17 VI 47–48), but one of the snake-bite incantations (1.100.3) mentions the same abode in terms of the same waters, this time identified in cosmic terms, at "the meeting-place of the Double-Deeps" (*b'dt thmtm*). As the expression in the snake-bite text indicates, El's home apparently lies at the edge between "near" and "far." Therefore, none of the locations listed in 1.100 lies beyond the orbit of what would have been considered culturally "far." Yet even with the exceptions, the pantheon as a whole is marked by the topography of the sacred mountain, for it meets on Mount ll, a peak named only in one passage of the Baal Cycle (1.2 I 20).[21] Hence, the family of the gods is located within the "near" space of a holy mountain.

A further divine mapping involves realms, a feature confined to the second tier of competing male gods and their enemies.[22] The Baal Cycle includes and builds on this divine topography of mountains and cult sites by organizing divine space additionally according to realms ruled by the second tier of the pantheon held by Baal, Yamm, and Mot. More specifically, realms are attributed only to Baal (sky), Yamm (sea), Mot (underworld), and possibly Athtar (earth?).[23] Space therefore is used in two different ways: mountains to mark proximity of deities enjoying cult and bestowing blessing of various sorts, and realms to mark cosmic competition.

2. Blessing at Home and Abroad versus Destruction

Divisions apply not only to cosmic space but also to divine powers. The first and fundamental division marks deities who meet human need and functions versus divinities who pose a human threat or destruction. This point applies across a number of genres. This distinction operates in the myths where deities largely aid humans or the natural world on which they depend. Many letters include opening greetings that invoke the gods (*ʿilm*) to provide well-being (**šlm*) and to protect (**nṣr*) the addressee.[24] One letter also asks the gods to strengthen the addressee (*ʿzz, CAT 2.4.4–6; see also the blessing in 1.108.19–27). Another letter specifically asks for "the gods of Ugarit" (*ʾily ʾugrt*, 2.176.4–6) to bestow blessing. Although the language in these letters is stereotypical, 1.15 II provides a glimpse into one way that the divinities' blessing was thought to transpire. In this scene, Baal asks El to confer his blessing upon King Kirta,[25] with the other deities in attendance. Divine blessing apparently includes the deceased royal ancestors. CAT 1.161 invokes blessing in a ritual context involving the deceased heroes and kings, also called "god" or "divine" (*ʾil*) in 1.113.14–26.[26] Finally, personal names show divine benevolence. According to A. Caquot, Ugaritic personal names express a desire for health and blessing, protection and favor from deities, even though the names of the deities vary widely.[27] Some deities, especially in their capacity as patrons of one group, may undertake the destruction of others. So, for example, Anat defeats human enemies in 1.3 II, El supports Kirta's campaign against King Pabil in 1.14–1.15, and Horon is invoked by Kirta to smash his rebellious son's head in 1.16 VI. These cases, too, may be understood as expressions of blessing for humans, because they aid some people at the expense of others. Some cases, such as the mythic rendering of Anat's murder of Aqhat in 1.18, might seem to counter the notion of the deities as generally benevolent, yet this case represents human disobedience and divine punishment. It is also one of the relatively rare exceptions to the rule in Ugaritic mythic narratives. In sum, well-being, including fertility at various levels,[28] was to derive from a number of deities.

In contrast, monstrous divine powers were thought to provide no benefit but only a threat to human well-being from the periphery. Yamm, for example, is connected with the demise of Kirta's household (CAT 1.14 I 19–20). Mot is known for his destruction as well (1.127.30–32:[29])

If the city is (has been) taken,	*hm qrt t'uhd*
(or) if Mot should attack man,	*hm mt y'l bnš*
the house of the son(s) of mankind will (should) take a goat	*bt bn bnš yqḥ ʻz*
and will (should) look to the future (lit. afar).	*wyḥdy mrḥqm*

Here monstrous forces can enter the sown from beyond the periphery to threaten human life, a view expressed in equal conviction in Israelite sources. Pestilence is once interpreted as death personified entering human habitations (Jeremiah 9:20).[30] One Ugaritic myth, CAT 1.23, narrates how so-called beautiful (but actually monstrous) divinities (*'ilmm nʻmm*) roam the steppe until they come upon the sown realm, which provides them with plenty. Unfortunately, the precise import of this text has not yet been determined: does it parallel a similar pattern of threatening divinities reflecting a situation such as drought or famine? In any case, threatening demonic forces may impinge upon the center from the periphery, but they are not "at home" in the center. As a general indicator of this distinction, unlike benevolent deities, monstrous divine forces generally do not receive cult.[31]

The Ugaritic texts show a further division between the home deities who provide blessing and foreign deities who also bless. Ugaritic letters distinguish between home gods and foreign gods: "the gods of Ugarit" (*'ily 'ugrt*) in 2.16.4–6 versus "the gods of Egypt" (*'il mṣrm*) in 2.23.22 and "the gods of Alashiya" (*'il alṭy*) in 2.42.8. In 2.42, the gods of Alashiya follow a list of Ugaritic deities invoked in lines 6–8. Opening greetings in these letters invoke both home gods and foreign gods to bestow blessing on the addressee. The home deities may be reflected also in the heading given to the list of deities in 1.47.1 (absent from 1.118), namely, *'il ṣpn*. This expression evidently refers to the "gods of Sapanu,"[32] the home deities of the kingdom of Ugarit, perhaps identified by the mountain of Baal, the divine patron of the Ugaritic dynasty. The ritual texts further reflect the dichotomy between home and foreign gods in the title of a ritual, "sacrifice of the gods of the country (*dbḥ 'il bldn*) in 1.162.1, a heading evidently reflected in 1.91.6, "[the one] of the gods of the country" (*'il bldn*).[33] Foreign deities could stand parallel to home deities through scribal texts listing them in parallel columns, as in 1.47 (and its ritual counterpart, 1.118)

and RS 20.24.[34] Or a home god and a foreign deity may have a mythical relationship. The concept of the divine family (the topic of chapter 3) could be used to represent the relationship of foreign deities. CAT 1.24 not only attests to deities with foreign names, but the relationship of a foreign deity to an indigenous one is expressed through the family metaphor of marriage. The Mesopotamian moon-goddess Nikkal (Sumerian nin-gal, "great lady") is to be wed to her West Semitic male counterpart, Yarih (CAT 1.24). Implicit in this marriage is an identification of the two as moon-deities. The text makes a point of mentioning Nikkal's family, referring to her father, mothers, brothers, and sisters (1.24.33–37). In this case, the divine family provides conceptual coherence in the face of an outsider deity through the family metaphor of marriage, the one ritual that extends family relations.

3. Animals: Domesticated versus Monsters

Benevolent deities are often rendered anthropomorphically, whereas destructive divinities appear as monstrous in character. Moreover, theriomorphic representations reflect the dichotomy between deities and cosmic enemies. Whereas cosmic enemies are monstrous or undomesticated, the animals associated with benevolent deities ("attribute animals")[35] lie within the orbit of cultural domestication.[36] This fundamental set of distinctions may be schematized in the following manner:

Benevolent Deities	*Destructive Divinities*
Anthromorphism	Animal gods, monsters
Domesticated species	Undomesticated species
emblematic of deities:	emblematic of monsters:
bull, calf, bird, cow	snake, serpent

El often bears the title, "Bull" (CAT 1.1 III 26, IV 12, V 22; 1.2 I 16, 33, 36, III 16, 17, 19, 21; 1.3 IV 54, V 10, 35; 1.4 I 4, II 10, III 31, IV 39, 47; 1.6 IV 10, VI 26, 26; cf. 1.128.7). In this connection, the personal name *ʿilṯr*, "El is Bull," may be noted (4.607.32).[37] Baal is presented as a bull-calf (1.5

V 17–21; 1.10 II–III, esp. III 33–37; cf. 1.11; see more later), and here we may note P. Amiet's characterization of the bull as the storm-god's "attribute animal" in Syrian glyptic.[38] In this connection, the bull or bull-calf mentioned in the Bible may reflect the iconography associated with El and Baal. El's iconographic representation may underlie the image of the divine as having horns "like the horns of the wild ox" in Numbers 24:8, for this passage shows other marks of language associated with El. Many scholars are inclined to see El's rather than Baal's iconography behind the famous "golden calf" of Exodus 32 and the bull images erected by Jeroboam I at Bethel and Dan (1 Kings 12),[39] but this iconography has been traced back to Baal as well.[40] Here we might include not only the depiction of Baal in the Ugaritic texts but also the "fierce young bull" (symbol) of the storm-god, Adad.[41] Nonetheless, the tradition in ancient Israel favors Bethel originally as an old cult-site of the god El (secondarily overlaid—if not identified—with the cult of Yahweh), perhaps as the place-name Bethel (literally, "house of El") would suggest (Genesis 28:10–22).[42]

The case of Anat as a bird is particularly interesting as the evidence is both textual and iconographic.[43] In CAT 1.108.8, the goddess bears the title of "flyer of flyers, she who soars" (*d'i d'it rḫpt*).[44] And 1.18 IV presents Anat hovering (*rḫb) among a flock of birds over her prey, the hero Aqhat. As he sits down to eat, she releases her air-to-ground missile in the form of her hired warrior, YTPN. In these two instances, the textual evidence is explicit. Thanks to iconographic evidence, we know that Anat's form of a bird underlies also the description of her travel to El's watery home in 1.4 IV III–IV. This text does not mention her theriomorphic form, but a drinking mug excavated from Ugarit depicts this scene at El's abode: Athirat stands before the seated El; behind his throne is a fish, signaling the water, and behind Athirat is a bird, Anat.[45] The reason for Anat's presentation as a bird may not be obvious but may be related to her depiction as a winged warrior goddess. B. Tessier remarks on the iconography of Baal and Anat depicting them together on seals: "On Syrian seals the weather god is very often associated with a winged and armed goddess, and a similar association of the weather god and a warlike goddess, Anat, is found in the mythological literature from Ugarit."[46] These scenes sometimes contain either a bull, Baal's attribute animal,[47] or Anat's, a bird.[48]

In contrast to these deities' animal forms, a number of the cosmic enemies are snake-dragons.[49] The language of dragons, known from Ugaritic and biblical texts, denotes their monstrous form. The Bible contains literary references to the multi-headed dragon of ancient Israel (Psalm 74:13, 14; cf. Job 26:13; Revelation 12:3, 13:1). CAT 1.3 III 40–42 describes Tunnanu (or less likely an unnamed cosmic enemy) as a snake-dragon:

> Surely I bound Tunnanu and destroyed (?) him.
> I fought the Twisty Serpent,
> The Potentate with seven Heads.

The god Mot reminds Baal of his defeat of Leviathan in similar terms (CAT 1.5 I 1–3):

> … [Y]ou killed Litan, the Fleeing Serpent,
> Annihilated the Twisty Serpent,
> The Potentate with seven heads …

Glyptic from Ugarit attests to the anthropomorphic warrior-god with a snake in either hand.[50] Such divine opponents are manifest in incantations as enemies of humans (as in CAT 1.82.1),[51] whereas mythological contexts describe divine opponents in the same forms yet on a cosmic scale.

4. The Head God and His Beloved Monsters

The biblical hymn of Psalm 148:7 calls on the cosmic sea creature Tannin to join in praising Yahweh. Mesopotamian culture, too, regarded monstrous creatures as subservient to deities,[52] so the kindly attitude toward cosmic monsters may not be an Israelite innovation. Indeed, this view of the monstrous enemies recalls El's special relationship with these foes, expressed through various "terms of endearment" and other nomenclature. The Ugaritic material is especially rich in terms of endearment between El and the cosmic enemies. The *locus classicus* for this phenomenon is Anat's speech to Gpn w-Ugr in CAT 1.3 III 36–1.3 IV 1:

Why have Gapn and Ugar come?
What enemy rises against Baal,
What foe against the Cloud-Rider?
Surely I fought Yamm, the Beloved of El (*mdd ’il*),
Surely I finished off River, the Great God (*’il rbm*),
Surely I bound Tunnanu and destroyed (?) him,
I fought the Twisty Serpent, the Seven-headed Potentate.
I fought Desi[re] (*’arš*), the Beloved of El (*mdd ilm*),
I destroyed Rebel (*ẗk*), the Calf of El (*‘gl ‘il*).
I finished off Fire (*’išt*), the Dog of El (*klbt ’ilm*),
I annihilated Flame (*ḏbb*), the Daughter of El (*bt ’il*)
That I might fight for silver and inherit gold.

Different images are used for the monstrous cosmic forces’ relationship to El. Here Yamm and Arsh are called his “beloved” (*ydd ‘il/mdd ‘il*). Like these cosmic monsters, Mot is cast with the same title elsewhere.[53] This title bears a particular cultural freight and association. Commonly taken as an expression of El’s preferred feeling for Yamm, the word may more precisely denote El’s legal selection of Yamm over the other gods in his family. H. Z. Szubin has insightfully commented on the legal force of the term in biblical literature:[54]

> This status invested the chosen “beloved” designee with power, authority and title and bestowed upon him special rights and privileges. In the areas of adoption, matrimony, inheritance and succession, such designations were of paramount importance for they not only determined the validity of transfer of valuable property such as ancestral estates, but also the legitimacy of transmission of office, rank and title.

> In controversial and disputable cases the designation of a “beloved” functioned to silence also claims and potential jactations which challenged the legitimacy of the lawfully chosen “righteous” son, king, disciple or teacher in a manner similar to the intended purpose in Solomon’s appellation Jedidiah—“beloved of the Lord.”

The name of this royal heir signifies Solomon's publicly taken action that legally defines this son as his heir. The titles of Yamm and Mot, *ydd 'il* and *mdd 'il*, have been compared to the name of Jedidiah,[55] but their possible legal force has gone unnoticed. These epithets mark not only El's preference for them over the other gods but also their status as his publicly designated successors. They hold a claim to divine kingship from the perspective of divine patrimony. In the context of the narrative, this preference comes at the expense of Baal, whose paternity marks him as an outsider to the divine family.[56]

Two of the other figures mentioned in Anat's speech quoted previously have animal terms associated with them. Fire[57] and Rebel are El's "pets," specifically "calf" (*'gl*) and "dog" (*klb*), while Flame is called his "daughter." The two phrases, *'gl 'il* and *klbt 'ilm*, are terms of endearment, like the expression "beloved of El" and the family term "daughter."[58] The animal nouns are very clearly understood as *'gl*, "calf"[59] and *klbt*, a female dog ("bitch"),[60] but the further significance of these two terms has received very little attention.[61] Texts proximate in time and space to CAT 1.3 III 44–45 use "dog" and "calf" to denote subservient status. The El-Amarna correspondence standardly uses *kalbu*, "dog," to express vassalage to Pharaoh.[62] The juxtaposition of this title with "servant" (*ardu*) especially indicates of this understanding of "dog": "What is Abdi-Ashirta, servant and dog, that he takes the land of the king for himself?" (EA 71:16–19; cf. 60:1–9; 88:9–11). The question implicitly compares Abdi-Ashirta to a dog that is supposed to be obedient to its owner. The same usage appears in the Lachish letters (KAI 192:3–4; cf. 195:3–4, 196:3) and 2 Kings 8:13. Certainly, "dog" was used as a term of derision for a disobedient servant as well; the point of both usages is servitude.[63] Proper names also attest to this usage for both dog and calf. Ugaritic, Hebrew, and Phoenician names containing the element **klb*, "dog," are understood in the similar sense of "servant, slave."[64] An analogous usage may underlie Ugaritic *'gl 'il* in the same context. Akkadian proper names include *A-ga-al-^{d}Marduk*, "calf of Marduk."[65] As further evidence for this notion of "calf" as a term of subservience, one may point also to personal names that use Akkadian *būru*, "calf," plus divine name.[66]

If this approach to *'gl* and *klbt* is correct, Anat's foes, *'tk* and *'išt*, are said to stand in a subservient relationship to El. Apart from support for this

interpretation of *ʿgl* and *klbt*, this view also lends coherence to the list of enemies in 1.3 III 38–46, who would seem generally to bear a special relationship to El. For example, lines 38–39 apply to Yamm the epithet, *mdd ʾil*, "darling of El." This relationship is given some context in CAT 1.1 IV, where El seems to select Yamm as the champion of the gods; this deputation takes place clearly at Baal's expense. Although no such context is provided for *ʿtk* and *ʾišt*, a comparable understanding may be involved: these cosmic enemies opposing Anat and Baal are considered the beloved servants of El. The words *ʿgl* and *klbt* then may connote not only animal form but also subservience, service, perhaps even endearment. Even though dogs could be a potential problem (Exodus 11:7; Psalms 22:17, 59:6, 14), the use of dog as well as calf derived from their domestication; under normal conditions, they are safe and pliable servants. Dogs helped humans care for their flocks (Job 30:1) and accompanied them on journeys (see Tobit 6:1).[67] Humans were also served by calves as beasts of burden (1 Samuel 28:24).[68]

Finally, some of the Ugaritic cosmic enemies are associated with Yamm, others with El. Within the narrative of the Baal Cycle, Yamm and El share a common trait: both are opponents of Baal up through CAT 1.2 I. Perhaps this division of cosmic characters highlights El's relationship with Yamm. Yamm, at least in the Baal Cycle, is the premier figure of El's favor. The situation is quite different in the Bible. Yamm has little mythology left in the extant biblical corpus. The other monstrous enemies survive as symbols of worldly powers in Jewish apocalyptic.[69]

5. Israelite Cosmic Enemies Tamed and Denied

At this juncture, we may take stock of the Mesopotamian and Ugaritic traditions and the comparable material in the Bible pertaining to the cosmic enemies. First of all, ancient Israel inherited the names of some of the cosmic enemies from West Semitic culture (which it shares with Ugarit). Baal confronts four foes with basically the same names in the Ugaritic material and Yahweh in the Bible: Sea (Hebrew *yām*, Ugaritic *ym*);[70] biblical Leviathan (*liwyātān*) and Ugaritic *ltn;*[71] biblical *tannīn*, Ugaritic

tnn (*tunnanu* in the Ugaritic polyglot,[72] spelled Tunnanu in the English translation later); and biblical Mawet and Ugaritic Mot, both literally meaning "Death."[73] For Baal, most are enemies of old, but Sea (Yamm) and Death (Mot) are ongoing threats, a notion entirely missing from most biblical or Mesopotamian conflict stories, though not from biblical apocalyptic and other genres.

Second, just as these cosmic enemies are mentioned as Baal's or Anat's old enemies, they are known in Israelite tradition as enemies of Yahweh, the warrior god. Three of these enemies appear in Psalm 74:12–17:

> Yet, O God, my king from of old,
> Maker of deliverance throughout the world,
> You are the one who smashed *Sea* with your Might,
> Cracked the heads of the *Tannin* in the waters;
> You are the one who crushed the heads of *Leviathan*,
> Left him as food …[74]
> You are the one who broke open springs and *streams*,
> You are the one who dried up the Mighty Rivers.
> To You belongs the day, Yours too the night,
> You are the one who established the Light of the Sun.
> You are the one who fixed all the boundaries of the world,
> Summer and winter—it was You who fashioned them.

Here the cosmic enemies' defeat serves as prelude to creation. In contrast, Isaiah 27:1 presents Leviathan's defeat as a sign of the end-times. Isaiah 25:8 likewise proclaims a reversal of the power of the cosmic enemy, Death. The image of God there swallowing up Death reverses the comparable image of Death's demanding to swallow Baal in Ugaritic (CAT 1.5 I 6–8, II 2–6).

Third, biblical texts attest to the cosmic forces as the chief-god's domesticated beasts. The book of Job knows these cosmic enemies both as human foes and divine playthings. So Job himself expresses the understanding of these figures as hostile powers, when he complains against God: "Am I Sea or Tannin that You set a watch over me?" (Job 7:12; see the reference to Leviathan in Job 3:8 and the mention of the Sea and the serpent in 26:13). Yet the book of Job later declaws these enemies by rendering

them not as Yahweh's enemies but as objects of divine domestication. So God responds to Job that he treated Sea at creation not as an enemy but as a new-born babe (Job 38:8–11). Leviathan is the sea creature caught by God's "fishhook" (40:25, NJPS), drawn by a rope and nose-ring. God asks Job: "Will you play with him like a bird …?" (40:29). Psalm 104:26 similarily identifies this figure as a creature made for play: "Leviathan whom you formed to sport with." This view of Leviathan as a tamed pet may counter the expectation of an Israelite audience, which knows Leviathan primarily as a monstrous enemy,[75] as in the Ugaritic texts that pit Baal or Anat against such figures. However, the biblical texts treating the monstrous figures instead as pets may echo their "beloved" relationship with El. Just as the biblical material coalesced the differing imagery involving El and Baal with the national god of Yahweh,[76] so too the differing roles of the cosmic forces as foes and beloved of the divine perhaps coalesced, issuing a different configuration than what appears in the Ugaritic texts.

The Ugaritic material, however, differs from some biblical passages in a number of respects involving the cosmic enemies and the gods connected with them. First, there is the matter of whether these forces are considered divine or not. In Ugaritic, these figures are at a minimum treated as equal in power to the deities who fight them. Note the stalemate between Baal and Mot in 1.6 VI 16–22, as well as the depiction of Baal apparently slumped beneath Yamm's throne in 1.2 IV 6–7. Moreover, some of the texts mentioned before treat the cosmic enemies explicitly as divinities. For example, River (a title of Yamm) apparently bears the further epithet, "Great God" (*'il rbm*) in 1.3 III 39.[77] Included in the same list (1.3 III 38–47) as Yamm are El's beloved or pets, the other cosmic enemies; in this context it would appear that they are comparable in rank or status to Yamm. In 1.14 I 18–20 Yamm's destruction is paralleled with the havoc caused by another god, Resheph. In 1.4 VIII 45–46, Mot receives the title *bn 'ilm* (either "son of El" or "son of the gods"), the same title used elsewhere for members of the pantheon (for example, in 1.4 III 14). I mention again the destructive "beautiful gods" (*'ilm n'mm*) of 1.23. Finally, the personal name *ym'il*, "Yamm is god" (CAT 4.75 V 14, 4.183 II 2; cf. 4.588.2), likewise points to the divine character of Yamm.[78] Thus, the Ugaritic texts present these figures at least as divine in rank and power, if not in formal designation.

In contrast, many biblical passages do not accord them a status comparable to a god. Yet at one time in Israel, such cosmic foes may have been regarded as divine, and only in the attested corpus do they appear in their reduced state. For example, the personal name Yemuel (Genesis 46:10; Exodus 6:15) may well be the biblical Hebrew equivalent of Ugaritic *ym'il*, "Yamm is god."[79] However, such evidence is scant at best, and the biblical corpus shows a marked remove from the divine status that such cosmic foes could well have held in early Israel. Some examples will help to illustrate the contrast. In Psalm 74, when the enemies fight against Yahweh, they hardly compare in power with Yahweh.[80] (Contrast Baal's initial setback in his conflict with Yamm in CAT 1.2 IV, followed by victory, thanks only to magical weapons made by Kothar, the craftsman-god.) Psalm 104 mentions the cosmic waters, but they are akin to the other raw material of creation. Psalm 104 omits an account of cosmic conflict before creation, instead making the divine rebuke of the waters (a battle motif) in verse 7 part of the process of creation. No longer here are the waters the opposing monster before creation; instead, another element needs to be put in its proper location in order to play its proper part in the order of creation. The waters now in their place play a beneficial role in the divine plan. They supply drink for the beasts in verses 10–13 and presumably for the world's crops in verses 14–18. According to verses 25–26, the waters, too, provide ships with a "sea-road" (to echo a kenning in Beowulf) as well as a home for all the creatures of the sea, including Leviathan, mentioned in passing in verse 26, now as a divine plaything.

Genesis 1 likewise minimizes the cosmic waters as a divine enemy. The audience of the creation story of Genesis 1 is prepared for a cosmic conflict by the opening references to enemies in verse 2. In this passage the lack of any conflict, or even any personification of the cosmic oceans or waters, heightens the picture of a powerful God who but speaks and the divine will is accomplished. So too the passing generic reference to the *tannînīm*, contained in the created order in Genesis 1:21, conveys the notion that this God is beyond opposition, beyond any other power. Such a presentation carries an especially powerful conviction for an audience that knows and presumes the traditional stories of its warrior-god's victories over the ancient cosmic enemies.[81] Indeed, such a presentation assumes that the audience knows how such stories convey its deity's mastery over the

universe.[82] Genesis 1 plays on this knowledge and thereby extends the theme of divine mastery.

Yet there is more to this passage. Not only is the conflict role eliminated in Genesis 1; even the old role of cosmic forces as domesticated has been downplayed, even depersonalized. These cosmic monsters are no longer primordial forces opposed to the Israelite God at the beginning of creation. Instead, they are creatures like other creatures rendered in this story. The narrative encloses the order of the divine creation around these monstrous enemies and, by omission, transforms them into another part of creation. This transformation in the character of the divine foe involves an alteration of theme as well as literary order. Accordingly, in placing the *tannînīm* within the narration of the created order in verse 21 instead of at the beginning of the account, the literary order of Genesis 1 contributes to a monotheistic vision. The text manifests a "monotheistic poetics,"[83] which alters the perception of reality with its created order. This reading applies not only to these sea creatures; it also works for the sun and the moon, called only "the greater light" and "the lesser light" (Genesis 1:16), titles not necessarily polemical as such but quite traditional (cf. "great light," *nyr rbt*, for the Ugaritic sun-goddess in CAT 1.161.19,[84] and "light of the heavens," *nrt šmm*, for the Ugaritic moon-god in 1.24.16, 31). In Genesis 1 these figures are no longer divinities.[85] Instead, like the sea creatures, they appear within the created order. Here, ambiguity between Creator and creatures is resolved; there is no middle ground left in Genesis 1's "monotheistic poetics."

As this discussion indicates, Genesis 1 shows some displacement from the traditional picture of both the chief god and the monstrous forces. The book of Job, too, shows some important differences. The book does not simply echo the earlier roles in the Ugaritic texts, at least for the chief god. For Job modifies the portrait of God compared to that of either El or Baal. In Job 38:1 this god appears not in westerly storm-cloud, a traditional locus of Baal's theophany (or in human dreams, El's usual medium of communication with humans). Instead, God appears in the storm of the dust-cloud, the "whirlwind" (*haśśĕʿārâ*, Job 38:1), the dessicating wind of the eastern desert, a natural force (associated mythologically, if anything, with Mot, the god of death). This motif in Job signals that God rules not only the domesticated human sphere but also realms undomesticated, even unknown by humans; therefore, the divine cannot be controlled or tamed by

human assumptions.[86] For humans, the divine is accessible and therefore to that extent domesticated, yet this God moves about in the unknown reaches of the universe. This God knows the known and unknown; this God belongs not only to the center but also to the periphery and well beyond. And so God is the God Job knew not only from of old but also met for the first time (Job 42:5). "Home is where one starts from," we are told by T. S. Eliot (*Four Quartets*), and the point applies to human perception of the divine. To know the God of Job starts at home but requires visiting realms beyond the home, as Job shows in his discovery of the divine in the whirlwind.

I would like to end this chapter with a comment on a remark made by G. E. Mendenhall: "Dualistic mythology is always essentially political."[87] Mendenhall meant polytheistic mythologies of power, but if such a comment applies to a polytheistic mythology such as the Baal Cycle or Enuma Elish, it may apply as well to biblical presentations of such conflict. Such mythological conflicts may involve either divine strength or power, or its lack. For example, in Enuma Elish, Marduk's defeat of Tiamat, a foe at the outset presented in majestic terms, is definitive, and his mastery over the cosmos is complete. As I noted before, Yahweh's dominion in Genesis 1 is so great that conflict is assumed and transcended. We might be content to say that deities' mastery over their enemies expresses the well-being of those who composed such a plot. Most of these texts are political expressions about deities rendered through mythological narrative and paralleled by the human experience that inspires such narrative.

However, "dualistic mythology," to use Mendenhall's expression, expresses not only political power; it clearly has the flexibility to express political or communal weakness, even desperation. Psalm 74 presents a recollection of divine victory of the past at a time of human powerlessness. Psalm 74:12–17 in particular appeals to divine strength at a moment of perceived divine weakness or indifference. In this case, Yahweh's mastery is not fully realized; for ancient Israelites, this divine dominion is in fact a debatable matter. So, too, in passages such as Isaiah 27:1, where the prospect of divine victory is held out for a future time. Yahweh here has not yet exercised complete mastery over the cosmos. Isaiah 51:9–11 likewise can proclaim the power of Yahweh over the cosmic enemy as an expression of hope and herald to human weakness at the time of exile. If Genesis 1 is to be situated against the backdrop of foreign empires' imposing their power upon Judah,[88] then again divine mastery stands in inverse relation to

the political status of the text's author(s). Such a lack of divine mastery is also apparent in Baal's need for help from other deities and his lack of definitive victory over Sea and Death.[89] In these cases, we might reverse Mendenhall's comment. Here "dualistic mythology" stands contrary to the political condition of the author's community. Divine power can encode human power as well as human powerlessness. This, too, is a political statement that a community retains a sort of control over its identity despite its political powerlessness. The conflict between the divine hero and the divine enemy may encode the condition of the human community against a terrestrial threat that may be overwhelming. Finally, these mythologies, monotheistic and polytheistic, are ultimately not "dualistic." Instead, various lines subtly connect the deities and their blessing and the divine monsters. No hero is great without a great enemy to defeat, and few cosmic enemies exist without a hero to vanquish them. Accordingly, pure political power is not the essence of dualistic mythology. Instead, narratives of divine conflict composed at moments of political power or powerlessness are expressions of vision or hope. Some conflict narratives present either an existing political order (hence Mendenhall's sentiment) or an emerging order or even a nonexistent order that is hoped for. This order, real or unrealized, is a source of blessing, or at least it expresses hope for blessing as of yet unknown, of things unseen. Hope then seems to be the key trope in these texts.[90]

2
The Divine Council

> Well ye have judged, well ended long debate,
> Synod of gods, and, like to that ye are,
> Great things resolved
>
> John Milton, *Paradise Lost*,
> Book II, 390–92

1. The Language of Council

It is not uncommon for Bronze Age texts from Mesopotamia and Syria to refer to the general collectivity of deities as a "council" or "assembly." Indeed, this divine social structure seems to be the dominant way to refer to the gods and goddesses as a group.[1] Mesopotamian literature attests to "the assembly of the gods" (*puḫruilāni*) in a number of different contexts.[2] The Ugaritic texts also use this language extensively to refer to the deities.[3] Apart from the expression "meeting of the gods" (*ʻdt ʾilm*), which is confined to one section of Kirta (1.15 II 7, 11), the terminology for the general assembly involves the root, **pḫr*. The usages with this term might be divided into three categories:

- "the assembly of the gods," *pḫr ʾilm* (1.47.29, 1.118.28, 1.148.9)
- "the assembly of the divine sons," *pḫr bn ʾilm* (1.4 III 14)
- "the assembly of the council," *pḫr mʻd* (1.2 I 14, 15, 20, 31)

The meaning of Ugaritic *pḫr* is suggested not only by the ample attestation of its cognate term *puḫru* in Akkadian[4] but also by its use in the Ugaritic texts. In 1.23.57 the word refers to a group: “and the assembly sings” (*wyšr pḫr*). In 1.96.9, 10, the word is apparently parallel to “gate” (*tġr*). These passages illustrate the sensibility of what Ugaritic *pḫr* designated, namely, a group (1.23.57) and perhaps the location where that group meets (1.96.9–10?). The contexts of the other non-divine attestations are unclear (1.84.41; 4.17.2). In the cases listed, the word might denote the pantheon as a generic whole without reference to any particular deity. The word *’ilm* in this first category may mean either “gods” or the name “El” with final *-m*. In favor of the first option,[5] we might contrast the expression, “the assembly of the sons of El,” *mpḫrt bn ’il*, where the lack of *-m* on the final word marks it as a singular noun and hence the god’s name. Accordingly, one might not be inclined to view these expressions of assembly as El’s assembly as such. To put the point differently, the mythological texts may present El as the head of the divine assembly, but the terminology embedded in the expressions for assembly here might not refer specifically to him.[6]

Accordingly, the word “assembly” (*pḫr*) may refer to more restricted groupings of deities centered around particular gods. In contrast to the more inclusive expressions noted thus far, these expressions clearly name a specific god:

El

“the assembly of the sons of El,” *mpḫrt bn ’il* (1.65.3; cf. 1.40.25, 42; cf. 34); cf. *bn ’il* (1.40.33, 41, and its reconstruction in parallel lines in the same text, lines 7, 16, 24; 1.62.7; 1.65.1; 1.123.15).

“the circle of El,” *dr ’il* (1.15 III 19)

“the circle of El and the assembly of Baal” *dr ’il wpḫr b’l* (1.39.7; 1.62.16; 1.87.18)

“the circle of the sons of El,” *dr bn ’il* (1.40.25, 33–34)

“the assembly of the stars,” *pḫr kbbm* (1.10 I 4), possibly parallel to “sons of El,” *bn ’il* and “the circle of those of heaven,” *dr dt šmm* (1.10 I 3, 5)

Baal

"the assembly of Baal," *pḫr b'l* (1.162.17); cf. *dr 'il wpḫr b'l* (1.39.7; 1.62.16; 1.87.18).

Ditanu

"the assembly of the collectivity of Ditanu," *pḫr qbs dtn* (1.15 III 15; cf. line 4; 1.161.3, 10).

These expressions suggest a more particular organization than the pantheon as a whole, namely, various groupings centered around a specific divine figure. These may represent the families of these patriarchal figures. This paradigm is evident in the case of 1.40.33 where "the circle of the sons of El" (*dr bn 'il*) is preceded by "the sons of El" (*bn 'il*).[7] These examples also show the terms, "circle" (*dr*) and "collectivity" (*qbṣ*).[8] The term *dr* might be rendered either "council" or "circle," or perhaps better "collectivity," based on "the collectivity of priests" (*dr khnm*) in 4.357.24.[9] In sum, the terminology of *pḫr* + divine name reflects different divine "assemblies," one belonging to El, a second to Baal, a third to Ditanu. As the next section claims at greater length, none of these represents the pantheon as a whole.[10] Of the expressions I listed, "the circle of El and the assembly of Baal" (*dr 'il wpḫr b'l*) in 1.39.7 and 1.41.16//1.87.17–18, seem to refer to the pantheon as a whole as the sum of two parties named according to the two chief gods; if correct, it would imply that *dr 'il* does not constitute the pantheon as a whole.[11]

The general Ugaritic pantheon may lie behind the enigmatic expression in 1.47.1, *'il ṣpn*, "the gods of Sapan," given the rather inclusive listing of deities that follows (note also the collective *pḫr 'ilm* in line 29 of this text); if correct, subsuming the deities under the rubric of Baal's mountain would reflect the divine leadership of Baal over the pantheon. F. M. Cross offers a wider definition of the pantheon as a whole (1.3 V; 1.4 IV–V; 1.17 VI): wherever two or more deities with El are present, there the general divine assembly meets, even if the terminology of council is absent from the passage.[12] However, there is no reason to assume that the mythological scenes describing El at his abode involve (even as *pars pro toto*) the general pantheon, perhaps only El's more immediate assembly. Indeed, the language of assembly is missing from these scenes, and their

rendering of El's abode differs markedly from the description of the divine council.[13] The issues are admittedly complex and the data debatable, but given these differences in the rendering of El's abode and the site of the divine council, caution in identifying them is in order; the same point may apply to the language of El's council and the pantheon more generally.

2. The Assemblies of El and Baal

In the case of the "circle of El" (*dr ʾil*) and "circle of the sons of El" (*dr bn ʾil*), there is apparently not much, if any, real difference in the referents of these two expressions: both refer to a group centered around El. In the case of the parallelism of *ʾilm//dr ʾil* in 1.15 III 18–19, the latter phrase seems to specify the former word, as is common for the parallel "B-term" in Ugaritic poetry. El's assembly seems to be denoted further by "the assembly of the stars," *pḫr kbbm* (1.10 I 4), since this phrase seems to parallel "sons of El," *bn ʾil* and "the circle of those of heaven," *dr dt šmm* (1.10 I 3, 5). To anticipate the next chapter, this text, if correctly understood, adds to the information supporting the view that El's family may be astral in character.

Perhaps the most interesting text involving El and his assembly is 1.65. This text seems to provide a restricted listing of those associated with El's council and family as opposed to the more general divine council:[14]

1 El,[15] the sons of El,	*ʾil bn ʾil*
2 The circle of the sons of El	*dr bn ʾil*
3 The assembly of the sons of El,	*mpḫrt bn ʾil*
4 ṮKMN and SHNM[16]	*ṯkmn w šnm*
5 El and Athirat	*ʾil w ʾaṯrt*
6 The Mercy of El,[17]	*ḥnn ʾil*
7 The Constancy of El,	*nṣbt ʾil*
8 The Well-being of El,	*šlm ʾil*
9 The god *ḥš* (?),[18]	*ʾil ḥš*
The god Adad,[19]	*ʾil ʾadd*

10	Baal Sapan,	*b‘l*[20] *ṯpn*
10–11	Baal of Ugarit,	*b’l ’ugrt*
12	By the spear of El,[21]	*bmrḥ ’il*
13	By the axe of El,[22]	*bn’it ’il*
14	By the weapon of El,[23]	*bṯmd ’il*
15	By the strength (?) of El,[24]	*bdṯn ’il*
16	By the incandescence (?) of El,[25]	*bšrp ’il*
17	By the firmness of El,[26]	*bknt ’il*
18	By the vigor (?)[27] of El:	*bṯdyn ’il*
19	The sons of El (?).[28]	*bn ’il*

This cast of characters in lines 1–5 belongs to El’s own household, not the company of the pantheon in general.[29] The same limited group, without Athirat, is the object of devotion in the ritual text, 1.40.[30] Athirat is El’s spouse, and ṮKMN and SHNM play the role of the pious sons (as presented in 1.17 I 30–31, II 5–6, 19–20), who hold the hand of the drunken El in 1.114.[31] Despite the many difficulties involved in the interpretation of CAT 1.65, this text provides some further information about the assembly centered on El. CAT 1.65 twice lists “the sons of El” (*bn ’il*), in contrast to *bn ’ilm* known in other Ugaritic texts. Instead, this latter phrase may be understood as “the divine sons.” Similarly, *mpḫrt bn ’il* and *pḫr ’ilm* are not necessarily the same; *pḫr ’ilm* denotes the “assembly of the gods” (1.47.29 = 1.118.28), as indicated by the Akkadian equivalent *puḫur ilāni* in RS 20.24.[32]

Finally, CAT 1.65—if correctly interpreted—may suggest the secondary incorporation of Baal into El’s family, perhaps reflecting Baal’s important place in the pantheon for the Ugaritic dynasty. This text perhaps provides further “mythological information” about El, namely, that within his cult he was considered a warrior (lines 12–14) and that it is his power that shows care for the city of Ugarit. Following G. del Olmo Lete, N. Wyatt compares the weapons in this text with the ritual use of weapons attested at Emar and Mari.[33] Perhaps such an allusion to weaponry in 1.65 suggests the ongoing martial role of El in Ugaritic thought, despite the ascendant position of Baal. Indeed, it has often been claimed that El is a

warrior in the Ugaritic texts,[34] but the evidence marshaled to date is so poor that the view has been characterized as "unfounded."[35] However, most, if not all, treatments of this question overlook the possible relevance of 1.65.12–14, but caution is in order here as well, for *'il* in these lines may simply denote each weapon as "divine," in which case they could signify Baal's weapons. In any case, if El ever had any martial role in Ugaritic tradition, Baal's status in the pantheon may have displaced it.[36]

The mythological picture of Baal's dependents would include perhaps his "sister" Anat, his three "daughters" (Pidray, Arsay, and Tallay),[37] his messengers (Gpn w'Ugr), and his meteorological vanguard described in CAT 1.5. V 7–9.[38] Ritual texts (1.47.26, 1.84.8, 1.109.21, 1.118. 25, 1.148.8; cf. 1.84.7, 1.139.6, 1.162.12) refer to *'il t'ṯr b'l*, "Baal's divine helpers" (cf. the personal name, "Baal is help," *b'lm'ṯr* in 4.172.3, 4.266.3, and 6.16.1),[39] and these figures might be identified with Baal's meteorological retinue of 1.5 V 7–9. Glyptic supplements the textual evidence. In one scene the storm-god standing astride a quadraped is accompanied by a figure holding weapons; perhaps this figure is a member of Baal's retinue.[40] It is unknown how these collectives may relate to *mhr b'l wmhr 'nt* in 1.22 I 8–9 (cf. 1.22 II 7). Even so, it would seem that somehow these groups serve Baal and Anat. The mythological texts take no interest in identifying either Baal's spouse or the precise terms of his brother-sister relationship to Anat (half-sister?).[41] Then again, the consorts of gods within the pantheon's second tier (described in the next section) are rarely a matter of mythological speculation. As noted in chapter 1, the exception of Nikkal wa-Ib (CAT 1.24) involves marriage of a goddess outside the Ugaritic pantheon to an insider god, Yarih. The ritual texts do not clarify the identity of Baal's spouse.

3. The Divine Council and Its Four Tiers

Clearly one of the main activities of the general assembly is feasting. This activity forms the backdrop to narrative action, (e.g., the assembly's surrender of Baal to Yamm in 1.2 I, the insult suffered by Baal in 1.4 III, and the blessing of Kirta by the assembly in 1.15 II). These scenes confirm

deities from four levels in the pantheon.[42] The highest rank is held by El, who shows his status in presiding over the pantheon and in issuing decrees. Both F. M. Cross and E. T. Mullen emphasize El's roles in the general assembly, especially for establishing corporate decisions and actions. With El is his consort, Athirat, who may influence his decisions, as in her petition to El to give permission for the building of Baal's palace in 1.4 IV–V. She may even participate in the decision-making process, perhaps in the selection on a successor to Baal in 1.6 I. It has often been suggested that Athirat in these instances reflects the role of the royal wife (though not the royal mother), who intercedes with her husband in political matters that affect the well-being of her sons.[43] This view is consistent with Athirat's standard title "Lady," *rbt* (e.g., 1.4 I 13, 21, 28, II 28, 31, III 25, 27, 28, 34, IV 31, 40, 53, 1.6 I 44, 45, 47, 53) and with the use of the epithet *rabītu* for royal wives in the Akkadian texts from Ugarit.[44]

The second level of the pantheon includes the royal children, called the seventy sons of Athirat (1.4 VI 46).[45] It is possible that this tier also receives the general designation *'ilm rbm*, "the great gods," which Mullen compares with Akkadian *ilū rabûtum*.[46] According to Mullen, "the Lord of the great gods" (*'adn 'ilm rbm*) refers to El in 1.124.1–2, but this interpretation is open to question.[47] The usage of *'ilm rbm* is quite limited (1.107.2); an interesting detail, 4.149.1–2 refers to *bt ilm rbm*. The deities belonging to the second tier include major figures of the pantheon: Anat, Athtart, Athtar, YDʻ-YLHN, Shapshu, Yarih, Shahar, and Shalim. Here Baal is an outsider, but despite his status as an outsider, he can claim some sort of familial relation to El; like the other deities (1.3 IV 54; 1.92.15), Baal can refer to "Bull El" as his father (1.3 V 35; 1.4 IV 47; cf. 1.4 I 5).

Combat and conflict generally involve this level of the divine family. References to conflict against cosmic enemies are confined largely to Baal and Anat (cf. 1.83). Similar rank along lines of military prowess is implied for other figures of this rank. Athtar's nomination to Baal's throne suggests a martial view of him, though he hardly measures up to Baal (or at least his throne). Given her military character in Egypt,[48] Athtart would appear also to reflect this martial dimension of the second tier of the pantheon. A further distinctive point about the second tier involves nature. Many deities of the second rank are associated with nature or natural phenomena in the Ugaritic texts. This point extends to Baal, Yamm, Mot, and Athtar, but also to

Shapshu, Yarih, Shahar, and Shalim. (Parenthetically, the next chapter explores the astral character of the divine family of El and Athirat more generally, but the astral nature of these two divine parents remains in the background of the Ugaritic texts.)

The issue of natural fertility is also a matter for the second tier. Deities are sometimes thought to have control over (or even "be"!) forces of nature, but in fact such an association in the Ugaritic texts appears to be confined to the second tier. An important caveat: the language of identification of natural "forces" with deities is reductionistic and potentially misleading; perhaps one may say that the terrestrial manifestation of deities in this tier occurs in specific natural realms or phenomena. Indeed, it is important to be careful because nature, though seemingly emphasized in a text like the Baal Cycle, is rarely stressed in either proper names, prayers, or incantations. In iconography, too, Baal's weaponry comes to the fore, although the so-called Louvre stele depicts the storm-god's spear with features of a plant.[49] Without the Baal Cycle, scholarly assessments of Baal would emphasize far more his warrior role than his role as storm-god. The two roles certainly cohere, but across genres and in the iconography the martial role is more prominent.[50]

The third level of the pantheon is poorly represented in the Ugaritic texts, but the figure who comes to mind is Kothar wa-Hasis. He serves the upper two tiers of the royal family; they need his services. He is ordered by El to build a palace for Yamm (1.1 III; 1.2 III). Kothar also makes a weapon for Baal (1.2 IV), and later he builds a palace for him (1.4 V–VII). M. S. Smith suggests that:

> Kothar occupies a "middle" position between the great deities El, Baal, Athirat and Anat, and the lesser deities in the Baal cycle. He performs numerous services for them. His wisdom is superior to that of at least one of his divine superiors, Baal. The god serves him in CTA 4.5.107–110 [= KTU/CAT 1.4 V 45–8], but all the while he acts in the role of divine servant. He is the "general factotum" of the great gods and goddesses of the pantheon, as his services extend beyond craftsmanship into spells, advice, and wisdom.[51]

Like figures in the top two tiers, Kothar may be regarded as royalty, reflected in the personal name, *krmlk*.[52] By the same token, his homes in

Egypt and Crete signal his place outside the immediate orbit of the upper two tiers and their homes in Syro-Mesopotamia. Perhaps this tier represents a particular development at Ugarit reflecting not only foreign trade, as reflected by Kothar's homes, but also the important place of craftsmen in Ugaritic society. Moreover, as a foreigner, Kothar would be marked as outside the indigenous pantheon.

The fourth level of the pantheon includes minor deities who serve other deities, such as the messenger-gods (discussed in the next chapter). Other minor gods serving in the retinue of major deities might also be placed at this level, such as those collectivities that serve as the military retinue of a major deity. (This question is addressed further in chapter 4, section 1.) Finally, other minor divinities may be placed at this level. The "divine workers [or staff]" (*'inš 'lm*, literally, "men of the gods") are included as recipients of sacrifices (e.g., 1.41.27).[53] A final observation: according to Mullen, the Mesopotamian council would not have included the lower tiers of the pantheon, such as workers or servants: "[T]he gods who constituted the membership of the council were specifically the major gods of the pantheon."[54] Mullen's comment may seem to overgeneralize for ancient Mesopotamia, but it suggests that the Mesopotamian notion of assembly covers fewer levels of divinity than what we find in West Semitic texts.

4. Israel and the Tiers of the Pantheon

One can subject ancient Israelite texts to the same sort of analysis of divine tiers, as the Bible manifests the language of the divine assembly. A number of scholars have discussed the language of assembly, especially in the Psalms and other poetic books.[55] Moreover, the presentation of Yahweh as a king enthroned and surrounded by his heavenly hosts can be found in many biblical passages, such as 1 Kings 22, Isaiah 6, and Daniel 7. L. K. Handy provides a helpful description of the fourtiered pantheon of the Ugaritic texts and the Judean kingdom prior to its fall.[56] At the top of the Judean pantheon stands the divine couple, Yahweh and Asherah. Many scholars believe that the asherah in the Jerusalem temple was none other than the symbol of the goddess (2 Kings 17:16), either a tree or wooden pole, and

that the image (*pesel*) was hers ("the image of the asherah/Asherah," 2 Kings 21: 7); this evidence would suggests that Asherah was a goddess venerated in the Jerusalem temple devoted to Yahweh and was therefore regarded as his consort. To this evidence, scholars would add the eighth-century inscriptions from Kuntillet 'Ajrud and Khirbet el-Qom that mention "Yahweh and his asherah."[57] Some commentators simply regard "asherah" here as the name of the goddess, whereas others see it as her symbol, since divine names generally do not take a pronominal suffix. In either case, most scholars who comment on these inscriptions' references to asherah use them to support the idea that Yahweh and Asherah were a divine couple in ancient Israel and Judah. Although such putative "ditheism" was criticized by prophetic critics from the eighth century onward and transmuted into more acceptable forms (such as personified Wisdom rendered also as a tree in Proverbs 3), some argue that this form of worship of Yahweh was well known. Indeed, prophetic condemnations are often taken precisely as evidence for such worship; after all, so goes the reasoning, why condemn something unless it is a problem?[58]

What is clear from biblical criticisms of the asherah is a paradigmatic shift away from the model of the divine couple in charge of the four-tiered pantheon to a single figure surrounded by minor powers, who are only expressions of that divinity's power. This is evident from the information marshaled for the second and third tiers of the pantheon. According to Handy, Yahweh was the king of the heavenly host of deities, with only scattered references to these midlevel deities having survived; more such divinities are now lost due to the editing of later monotheists. In other words, the paradigm of the pantheon went through a process of collapse and telescoping (aspects of a larger process of convergence in Israelite religion). There is no full-scale second tier represented in the extant biblical texts. Instead, there are few references to deities whose names might be recognized from the Ugaritic texts as figures belonging to this tier; and there is little evidence that in ancient Israel they held the roles assigned to them at Ugarit. For example, the names of Resheph, Deber and Astarte are at times little more than generic nouns in the Bible.[59] In other instances, the names of such deities reflect considerably more. For example, the divinities Resheph and Deber appear in Habakkuk 3:5 as part of Yahweh's theophanic retinue.[60] Such a text would seem to reflect already the reduction of other members of the second tier to Yahweh's servants similar to Baal's

theophanic retinue described in CAT 1.5 V 6–9. In general, the evidence that Yahweh headed a pantheon consisting of other figures known from the second tier of the Ugaritic texts is unfortunately vestigial.

One biblical text that presents Yahweh in an explicit divine council scene does not cast him as its head (who is left decidedly mute or undescribed, probably the reason why it survived the later collapsing of the different tiers). This text is Psalm 82,[61] which begins in verse 1:

> God (*’ĕlōhîm*) stands in the divine assembly/assembly of El (*‘ădat ’ēl*),
> Among the divinities (*’ĕlōhîm*) He pronounces judgment.

Here the figure of God, understood as Yahweh,[62] takes his stand in the assembly. The name El was understood in the tradition—and perhaps at the time of the text’s original composition as well—to be none other than Yahweh and not a separate god called El. In any case, the assembly consists of all the gods of the world, for all these other gods are condemned to death in verse 6:

> I myself presumed that You are gods,
> Sons of the Most High (Elyon),
> Yet like humans you will die,
> And fall like any prince.

A prophetic voice emerges in verse 8, calling for God (now called *’ĕlōhîm*) to assume the role of judge of all the earth:

> Arise, O God, judge the world;
> For You inherit all the nations.

Here Yahweh in effect is asked to assume the job of all gods to rule their nations in addition to Israel.[63] Verse 6 addresses the gods as “the sons of Elyon,” probably a title of El at an early point in biblical tradition (cf. El Elyon mentioned three times in Genesis 14:18–20). If this supposition is correct, Psalm 82 preserves a tradition that casts the god of Israel in the role not of the presiding god of the pantheon but as one of his sons. Each of these sons has a different nation as his ancient patrimony (or family inheritance) and therefore serves as its ruler. Yet verse 6 calls on Yahweh to

arrogate to himself the traditional inheritance of all the other gods, thereby making Israel and all the world the inheritance of Israel's God.

This family view of the divine arrangement of the world appears also in the versions of Deuteronomy 32:8–9 preserved in Greek (Septuagint) and the Dead Sea Scrolls:

> When the Most High (Elyon) alloted peoples for inheritance,
> When He divided up humanity,
> He fixed the boundaries for peoples,
> According to the number of the divine sons:
> For Yahweh's portion is his people,
> Jacob His own inheritance.

The traditional Hebrew text (Masoretic text, or MT) perhaps reflects a discomfort with this polytheistic theology of Israel, for it shows not "divine sons" (*bĕnê ʾĕlōhîm*), as in the Greek and the Dead Sea Scrolls,[64] but "sons of Israel" (*bĕnê yiśrāʾēl*):[65] E. Tov labels the MT text here an "anti-polytheistic alteration."[66] The texts of the Septuagint and the Dead Sea Scrolls show Israelite polytheism which that focuses on the central importance of Yahweh for Israel within the larger scheme of the world; yet this larger scheme provides a place for the other gods of the other nations in the world. Moreover, even if this text is mute about the god who presides over the divine assembly, it does maintain a place for such a god who is not Yahweh. Of course, later tradition could identify the figure of Elyon with Yahweh, just as many scholars have done.[67] However, the title of Elyon ("Most High") seems to denote the figure of El, presider par excellence not only at Ugarit but also in Psalm 82.

The author of Psalm 82 deposes the older theology, as Israel's deity is called to assume a new role as judge of all the world. Yet at the same time, Psalm 82, like Deuteronomy 32:8–9, preserves the outlines of the older theology it is rejecting. From the perspective of this older theology, Yahweh did not belong to the top tier of the pantheon. Instead, in early Israel the god of Israel apparently belonged to the second tier of the pantheon; he was not the presider god, but one of his sons. Accordingly, what is at work is not a loss of the second tier of a pantheon headed by Yahweh. Instead, the collapse of the first and second tiers in the early Israelite pantheon likely was caused by an identification of El, the head of this pantheon, with

Yahweh, a member of its second tier. This development of convergence will be explored further in chapter 7.

This development would have taken place by the eighth century, since Asherah, having been the consort of El, would have become Yahweh's consort (mentioned before) only if these two gods were identified by this time. Indeed, it is evident from texts such as Isaiah's vision of Yahweh surrounded by the Seraphim (Isaiah 6), and especially the prophetic vision of the divine council scene in 1 Kings 22:19 that Yahweh assumed the position of presider by this time. Indeed, prior to the eighth century such a "world theology" suited the historical circumstances in Israel very well. In the world order there were many nations, and each had its own patron god. This worldview was cast as the divine patrimonial household in Deuteronomy 32: each god held his own inheritance, and the whole was headed by the patriarchal god. Other gods in their nations represented no threat to Israel and its patron god as long as they were not imported into Israel. As long as other gods did not affect worship of Yahweh in Israel, they could be tolerated as the gods of other peoples and nations. This state of affairs perhaps began to change in the eighth century when the neo-Assyrian empire presented a new world order. Only after this alteration of the world scene did Israel require a different "world theology" that not only advanced Yahweh to the top but eventually eliminated the second tier altogether insofar as it treated all other gods as either nonentities or expressions of Yahweh's power.[68]

The lowest tier of the Israelite pantheon also went through alterations. As the Ugaritic texts show, the lowest tier involved a number of deities who served in menial capacities. A common task for such gods was to act as messenger, the literal meaning of the English word "angel."[69] Like the middle tiers, this tier went through a change in perspective. Certainly angels are not regarded in later tradition as gods. Instead, they are powers that act only in the name of their patron god and only thanks to the power of that deity. The Dead Sea Scrolls frequently refer to angelic powers as *'lym*, literally, "gods,"[70] but in the wake of the earlier telescoping of the pantheon and the collapse of its middle tiers, this word probably conveyed the sense of heavenly powers (under the One Power) rather than full-fledged deities. So when one of the prayers from the Dead Sea Scrolls (the Hodayot, 1QH 7:28) asks in the same words as Exodus 15:11, "who is like You among the gods?" the question does not carry the same freight; the question in the

Hodayot is devoid of its earlier polytheistic context. In sum, in the pre-exilic period (and perhaps as early as the eighth century) Israel enjoyed perhaps a lesser pantheon than that in the Ugaritic texts, but certainly it was considerably more extensive than what the biblical record reports.

Identifying four tiers as levels in a single system of divine polity is a heuristically helpful approach to the pantheon in Mesopotamia and Syria-Palestine. P. D. Miller comments regarding the divine assembly:

> The divine assembly is an image for speaking of a system for divine governance and order that is intimately involved with the world but not coterminous with it. The cosmological structure of the universe is operative in the universe but transcends it. The pious ones of Mesopotamia and Syria-Palestine were convinced that all they could see and comprehend and investigate of the universe about them was not all there was to the world.[71]

Miller proceeds to characterize the divine assembly in Israelite culture:

> In all of the manifestations of the divine council imagery we encounter Israel's way of dealing in a theological and foundational way with the problem of the one and the many and how they they are held together within a single reality that is the cosmos. While in some sense it would seem that that issue was resolved or disappeared with the monotheistic thrust, to assume that is to forget that what took place was a radical centralization of divine power and reality in one deity in whom the complexity and plurality of the universe was not lost but ruled. The plurality and diversity of the experiences and phenomena that make up the creation point to a complex cosmos that is allowed both its complexity and its ordered direction by a fully integrated divine world order whose rule by one is as clear as its social character. The divine assembly of ancient Israel thus holds as one reality a monistic impulse in a pluralistic cosmic structure. That such a dialectic was intentional and at the heart of Old Testament theology and cosmology is nowhere clearer than in the ancient name by which the God of the Old Testament was known and is stilled praised, "the Lord of hosts."[72]

These two statements offer some helpful points for our understanding of divinity in the Bible. Miller's first statement shows an effort to appreciate the theological importance of the divine assembly in texts outside of Israel. According to Miller, the divine assembly expresses at once the relatedness of the divine assembly to the world as well as its transcendance; the relatedness and transcendance belong to an order in the cosmos ruled by divinity. It is the order itself that expresses a certain one-ness of divinity.

Miller's second statement focuses on Israel, first by suggesting—rightly in my view—that the divine assembly in biblical thought provides one means of dealing with the issue of the one and the many. However, I believe this point applies equally well to the divine assembly in the Ugaritic texts. The divine council mediates the problem of the one and the many in Ugaritic and Israelite language alike. Miller discusses the effect of Israel's "monotheistic thrust" on the imagery and language of divine assembly. At first glance, Israelite monotheism would seem theoretically to stand at odds with the imagery of Israelite assembly with its multiplicity of divinities, even if they are minor or subservient to Yahweh as their absolute king. In fact, the divine assembly is not oppositional to monotheistic statements in biblical literature. For example, it is commonly held by biblical scholars (including Miller) that the opening of "Second Isaiah" (Isaiah 40) involves a divine council scene, yet this chapter is part of a larger work that contains the greatest number of monotheistic statements in the Bible (addressed in chapter 10). Divine council language and scenes also appear in the "priestly work" of the Pentateuch and post-exilic books (Zechariah and Daniel), which assumedly are monotheistic. In other words, monotheism requires that one divine assembly headed by one divine ruler, but it makes little or no impact on the language of assembly in itself. Moreover, as noted, it probably reduced and modified the sense of divinity attached to "angels."

The Israelite presentation of the divine council differs little structurally from the Babylonian presentation of Marduk in Enuma Elish. Both Enuma Elish and the Hebrew Bible present a divine ruler surrounded by subservient divinities. Radical divine rulership manifest in these texts polarizes the divine polity into the ruler and his ruled. Viewed in these terms, the "monotheistic thrust" in itself does not alter this general structure of the divine polity. (In contrast, the Ugaritic Baal Cycle manifests more complexity at the top and middle of the pantheon and thus differs from both Enuma Elish and the Bible.) Therefore, one might see a "monistic impulse"

at work in both Babylonian polytheism and so-called Israelite monotheism. The definition of monotheism might then apply the Babylonian constructions of the world.[73] However, this conclusion flies in the face of Enuma Elish's own reference to divinities other than Marduk as gods. This approach also seems to reflect an attempt to locate the idea of monotheism in the structure of the pantheon and the basic relationship between one ruler and his subjects, even if they too are divinities. Yet this approach stretches the definition of monotheism beyond recognition. Many (though hardly all) Israelite texts differ from Enuma Elish in neither the notion of assembly nor the radical polarization between Ruler and ruled. Instead, further changes are evident. All but the highest tier of divinities are reduced in status, no longer regarded as deities in any manner analogous to the head of the council; their power is entirely derivative and expresses the dominion of the Divine Head.

There is another basic contrast between Babylon and Israel of the exilic period (587–538). Chapter 9 suggests that with Enuma Elish, Babylon stands at the height of its political power, and its older deities pay homage to its newly exalted divine ruler. In contrast, Israel stands at the bottom of its political power and it exalts its deity inversely as ruler of the whole universe, with little regard for the status of the older deities known from the pre-exilic literary record. In sum, the imagery of the divine assembly represents for both monotheism and polytheism a pliable theological strategy for presenting order with the one and the many of divinity; this divine order may either mirror the conditions of the human world or it may oppose it. Assembly provides one avenue for expressing order and one-ness in the conceptualization of divinity.

Before proceeding to the next chapter, it is necessary to note a further development in the study of the assembly. In a book-length study, L. K. Handy follows a line of scholarly research suggesting that the pantheon should be understood as a bureaucratic system of operation.[74] First, Handy defines the social context in Ugaritic society:

> The monarchs and the scribal schools came together precisely in the area of bureaucratic government; it was necessary for the royal family to place competent members of its own relatives in key positions, as well as to find capable persons for myriads of other scribal posts required by the culture. Some positions in royal court

> offices were held by people outside the kinship circle of the royal family, by reason of knowing family members or inherited privilege.[75]

Handy then applies Max Weber's category of bureaucracy to the pantheon. In contrast, J. D. Schloen claims that the monarchy did not represent a system of bureacracy in Weber's terms but itself functioned as a patrimonial household, with household workers. Schloen instead asserts that the Ugaritic pantheon reflects the larger patriarchal paradigm or patrimonial society Weber outlined. In other words, Schloen would interpret Handy's a bureaucratic model primarily as a form of patriarchal structure at the royal level. Apart from the theoretical issues in Weber's thought,[76] it is true that the Ugaritic presentation of the pantheon shows few major deities standing outside of kinship groups. One possible example of a major god from Ugaritic literature is Kothar wa-Hasis, the craftsman god. Interestingly, he is also the only deity assigned to the third tier, and he may be regarded as an outsider of sorts because his abodes are not located in the Syro-Mesopotamian heartland, like the homes of the main deities, but in Egypt and Caphtor (probably Crete). Furthermore, there is no typically bureaucratic divine figure such as a scribe in the Ugaritic pantheon nor any other figure apart from a divine craftsman who worked in the royal divine bureaucracy.

The biblical material offers only slightly more evidence of a divine bureaucracy. Handy places considerable weight on the figure entitled "the satan," traditionally called Satan, later identified as the Devil. In the book of Job, he is one of "the divine beings" (*bĕnê hā'ĕlōhîm*, Job 1:6) who appears as a prosecuting attorney in the heavenly court of God in chapters 1 and 2. Biblical material shows some individuation of divine beings (often regarded as "angels"), which might be added as evidence for a bureaucratic model.[77] However, these are relatively few and the biblical material barely supports a general structure of bureaucracy. In short, the number of such divinities of bureaucracy in either Ugaritic or Israelite literature is minimal, whereas the number of family members in the pantheon in Ugaritic literature is high. Of course, there was a multitude of deities in Israelite polytheism. With the sun, moon, and the hosts of heaven in attendance, the divine assembly of Yahweh is quite full (1 Kings 22:19; cf. Exodus 15:11). In general, the apparent organizational language in Mesopotamian mythology and society does not seem to apply with full force to the Ugaritic presentation of

divinity,[78] and the relative absence of the language of the divine family from the Bible may also divert attention from familial terms for divinity in Ugaritic mythology. Accordingly, whatever the functions of "bureaucracy" might be, they may be situated within the divine royal household in Ugaritic myth. These observations point to key differences between Ugaritic and Israelite literatures as presently known. Whereas the Ugaritic texts display a wide variety of relational concepts, the Israelite material manifest in the Bible shows far fewer, and what is largely left in the biblical material is the council of a single god. Although other gods are in this assembly, it is headed by a single ruler: this is one well-attested form of Israelite polytheism, and its conceptual unity lies in the image of Ruler and the ruled of this single assembly.

Divinity involves more than either the economic "cost-benefit" of blessing and protection that deities can provide against threat or political power or subjugation. Divinity also involves one-ness through relatedness, expressed not only in terms of power but also of care and love as in the concept of the family. The case for the family model and its meanings in Ugaritic literature as well as some biblical texts are addressed in the next chapter.

3
The Divine Family

> In my Father's house
> there are many dwelling places.
>
> John 14:2; RNAB

> Beloved, we are God's children now.
>
> 1 John 3:2; RNAB

As the end of chapter 2 suggests, the divine council is coterminous in the Ugaritic texts with the divine household, the divine family its main members. The family concept also contains a built-in flexibility to integrate deities not originally "at home" in the main divine household. This chapter explores the central role of the family in expression of interrelations among the Ugaritic deities and also shows how the divine family was deeply grounded in West Semitic societal concepts.

1. The Four Tiers of the Divine Household

One Ugaritic passage (CAT 1.65) uses the terminologies of council and family together, first in the phrase, "the council of the sons of El" (*mpḫrt bn ’il*) in line 2, and then in line 3, "the circle of the sons of El" (*dr bn ’il*). These juxtapositions are not isolated examples, as they appear also in CAT 1.40.25 (and apparently in lines 8, 17, 34, 42 as well, although the broken

condition of these lines must be noted). Likewise, 1.162.16–17 names "the circle of El and the council of Baal" (*dr ʾil wpḫr bʿl*) as the recipients of a single sacrifice.[1] Finally, the terminology for "clan" seems also to underlie the Ugaritic word, *hmlt*, used in parallelism with *ʾilm*, "the gods" (1.2 I 18, 35). In general, the notion of the family serves as a further feature (beyond the language of divine council) in a cohesive vision of religious reality. Or, in N. Wyatt's apt formulation: "The image of the one family is a classic instance of systematic theology at work."[2]

J. D. Schloen underscores the immense importance of the patrimonial household in both human and divine society in the Ugaritic texts in his lengthy treatment of the patrimonial household in Ugarit. Schloen finally turns to the question of its mythology:

> Although little mention has so far been made of the well-known mythological texts from Ugarit, it is worth considering here briefly the structure of authority that is revealed in them. Of course, myths are often murky refractions rather than direct reflections of mundane social realities, but it is striking that a concern for the preservation of the patrilineage is prominent in the Epics of Keret and Aqhat. Furthermore, the household of the gods themselves has the appearance of a typical Near Eastern joint family, complete with rivalries among adult sons and daughters. In the Baal Cycle, a major theme is Baal's desire for a house of his own—as the eldest son and heir he is restless and unhappy under the direct supervision of the aging patriarch, El. The acquisition of his own house does not mean, however, that Baal is totally independent of El or wants to be his rival; indeed, his true rivals are members of his own generation—favorites of El such as Yamm and Mot who want to displace him as heir.[3]

Here Schloen lays out the basic social paradigm for the Ugaritic pantheon as a whole. The pantheon is a large multi-family or joint household headed by a patriarch with several competing sons. Although older studies of Ugaritic religion and literature have recognized the language of the family in Ugaritic myths, its social background perhaps has not been equally appreciated. Since Schloen barely applies his own insight to the divine family (apart from CAT 1.12 and 1.23,),[4] this chapter extends his approach by detailing the applicability of the patrimonial household to the

presentation of divinity in Ugaritic texts.[5] At the end of the next chapter, I reflect on this language as a key in the coherence and intelligibility of Ugaritic polytheism.

We may begin here where the last chapter leaves off. The four tiers of the pantheon are analogous with different tiers of the divine household. In the top two tiers of the pantheon are the divine parents and their children; the bottom two tiers of the pantheon consist of deities working in the divine household. El is the father of deities and humanity. Accordingly, El's capacity as ruler of the pantheon expresses his function as patriarch of the family. His wife Athirat (biblical Asherah) is the mother of deities and humanity. El and Athirat are the divine royal parents of the pantheon, and the dominant deities are generally regarded as their royal children. (As R. M. Good quips, "What great god wasn't a king?")[6] These divine children are called in generic terms "the seventy sons of Athirat" (KTU 1.4 VI 46). The narrative of Elkunirsa, a West Semitic myth written in Hittite, gives the number of Ashertu's children as the variant "seventy-seven" (followed in parallelism by "eighty-eight").[7] Seventy is a well-known conventional number for a generally large family group (see Judges 9:5; 2 Kings 10:1; cf. Exodus 1:5).[8] The case of Jerubbaal and his seventy sons (Judges 9:5) is a prime example. Hence, the seventy sons designate not the divine council as a whole, but its leading members. Further, the leading members of Emar are called "the seventy sons of Emar" (Emar 373.37–38). One of the two Tel Dan inscriptions refers to the "seventy kings" faced by the Aramean king.[9] The number of gods perhaps survives in the later Jewish notion of the seventy angels, one for each of the world's putatively seventy peoples (1 Enoch 89:59, 90:22–25; Targum Pseudo-Jonathan to Deut 32: 8;[10] bT. Shabbat 88b; Sukkah 55b).[11] The myths provide descriptions of "domestic scenes" in the household of El. In CAT 1.114 El's three children, Anat, Athtart, and Yarih, help in the preparation of the food for El's feast in his house, and later two of his sons, ṮKMN-wa-ŠNM, carry El when he arrives home "dead-drunk."[12] CAT 1.23 describes how El sires two children, Dawn (Shahar) and Dusk (Shalim). Athirat is clearly the divine mother of the main divine family in the myths. The term "mother" applies also to the divine mother of the outsider goddess, Nikkal (1.24.34).

The second tier of gods can have their own households as well. Athirat's sons are said to have their own houses, according to Baal's

complaint (CAT 1.3 IV 48, etc.). El may well be patriarch of the clan, but the family-heads have houses of their own. Within these households are families with a "baal" at their head. Accordingly, every male family authority ideally might have his own house. Baal's house is known not only from the Baal Cycle (1.4 V–VII), but also from 1.119.3, *bt b'l 'ugrt*, "the house of Baal, in Ugarit." The sacrificial offering in the temple of Baal in 1.109.11–15 lists the recipients as Ilib, El, Baal, and Anat of Sapan and Pidray.[13] This list reflects a partial listing of Baal's household after the official deference to Ilib and El. In the mythological material, Baal has his military retinue and also three "daughters" (*bt*) (Pidray, 'Arsay, and Tallay), evidently reflecting his meteorological and chthonic aspects. The designation *bt* may not be merely a term for "woman," as 1.24.26–27 refers to Baal as the father of Pidray. This set of divine relationships may be reflected further in royal cult. Pidray is also the object of a sacrificial ritual, according to the list of 1.91.7.[14] More intriguing yet, 1.132.1–3 seems to include Pidray as part of what has been regarded as a ritual for the enthronement of the new king: "On the nineteenth (day), the bed of Pidray is laid out for the installation of the king" (*btš' 'šrh trbd 'rš pdry bšt mlk*).[15] This text may communicate the understanding that the king becomes related to the divine patron of the dynasty, Baal, through marriage to his daughter, Pidray (perhaps analogous with the marriage mentioned in 1.23.26–27). We may note one further familial construct involving Baal: Mot refers to his own brothers as well as Baal's (1.5 I 22–25, II 21–24; 1.6 V 19–22, VI 10–16); the god's comments apparently point to the households with these two gods as their most prominent members.[16] Finally, the collectivity under Baal's authority may correspond to the designation *pḫr b'l* in the ritual texts (e.g., CAT 1.39.7: *p[ḫ]r b'l*), although this is uncertain.

One member of the pantheon's second tier generally regarded as El's child does not fit into this family without complication: Anat. She is, at least in general terms, the daughter of El (cf. 1.3 V 25; 1.18 I 16), but the identity of her mother is not clear. Nothing in the texts suggests that she is Athirat's daughter. Anat's status is complicated further by her character. She is a young female, unattached to any male; therefore, her social position is unresolved.[17] She is not fully under the control of patriarchal authority, as she may defy El and she is not beholden to a husband. Moreover, her passion and intensity cannot be controlled. In this respect, Anat presents a

demeanor similar to that of Sumerian Inanna (perhaps under the influence of Akkadian Ishtar with whom she was identified), who manifests, in the words of T. Frymer-Kensky, “sheer force, rage, and might, with a physical power, that exists in a somewhat uneasy relationship to the orderly world of the hierarchical pantheon.”[18] Finally, there is the question of whether Baal is not only her brother but also her husband, a point made explicitly in the texts. J. C. de Moor follows a long line of scholarship in asserting that Anat is Baal’s spouse and he is therefore El’s son-in-law.[19] As discussed in n.41 to chapter 2, this scenario has been challenged by N. H. Walls, Jr., and P. L. Day.[20] Moreover, Egyptian culture imported West Semitic deities, and Egyptian texts attest to Anat as the wife of Seth, commonly understood to be the local Egyptian substitution for Baal. For example, the Egyptian story, “The Contest of Horus and Seth for the Rule,” presents Anat and Astarte together as the daughters of Re and the wives of Seth, who was identified with Baal in the Late Bronze Age.[21] Walls (as well as Day) follows Te Velde in challenging the value of this particular text.[22] As his chief argument, Te Velde notes that in this one text Anat is otherwise not called the consort of Seth. The uniqueness of this rendering of Anat as the wife of Seth might favor its authenticity as a witness to the West Semitic tradition. However, Te Velde also retranslates the passage in question, with the result that “the Seed” is said to be Seth’s spouse and Anat only intercedes on behalf of Seth before her father Re. A sixth or fifth century Aramaic funerary stele from Egypt perhaps calls Baal “the husband of Anat.”[23] The little weight afforded by the Egyptian evidence may yet favor the older view that Anat and Baal were indeed lovers. In general, Ugaritic myth seems considerably more concerned with the status and relations among competing males than among females, so it leaves some relations largely unexplored. This point applies to both Anat and Athtart: their relations to males of the second tier remain unclear.

As noted, the bottom two tiers of divinities are exemplified by Kothar and messengers. Kothar himself is the craftsman hired by different divine royals for their various needs. Analogously, human craftsmen were employed by the Ugaritic dynasty. At the very bottom of the divine society are household workers of the following sorts (textual listings following each term reflect attestations of these words for human workers mostly outside of mythological contexts):

“female servant,” *’amt* (cf. 1.14 II 3, II 10, III 25, 37, VI 22; 2.70.19)
tlš ’amt yrḫ (1.12 I 14–15)
dmgy ’amt ’aṯrt (1.12 I 16–17)

“messenger,” *ml’ak* (cf. 2.17.7, 1.23.5, 2.33.35, 2.36.11, 2.76.3)
ml’ak ym (1.2 I 22, 26, 28, 30, 41, 42, 44)
ml’ak šmm (1.13.25–26)
[m]l’akm (1.62.6)
ml’akk ‘m dtn (1.124.11)

“servant,” ‘nn[24] (2.8.4 [?]; cf. 7.125.3 [?])
Gpn w-’Ugr (1.3 IV 32; 1.4 VIII 15)

“gate-keeper,” *ṯġr* (cf. 4.103.39, 40, 4.224.8, 9, 7.63.6)
Resheph as gate-keeper to the underworld (1.78.1–3; cited later).
Yarih (?) as gate-keeper of El’s house (1.114.11)

The terms *ṯġr* and *ml’ak* involve specific tasks apparently assigned only to males. Ugaritic glyptic may supplement the evidence for divine guardians or gate-keepers, as noted by P. Amiet.[25] The word *’amt* is a generic term for a female worker at this rank.[26] The word *‘nn* seems to be a general term for servant, either male or female. Employees of divine family members are apparently delineated at least in part according to gender: divine gate-keepers and messengers are evidently male and the domestic servants are apparently female. El’s question to Athirat reflects this assumption (1.4 IV 59–62):

“So am I a servant, Athirat a slave?	*p‘bd ’an ‘nn ’aṯrt*
So am I servant who wields an *’uṯ*-tool,	*p‘bd ’ank ’aḫd ’uṯ*
Or is Athirat a maid-servant who makes bricks?”	*hm ’amt ’aṯrt tlbn lbnt*

The question makes one assumption about gender roles and another about status. Roles are distinguished at the lowest rank, and rank is also clearly demarcated. More specific roles are hardly generic: *dgy* is specific to

Athirat's workman Qdš w-'Amrr (1.4 II 31, IV 2–4). Yet this instance would seem to convey his master's specific relationship to the sea.[27] One comment about the social background of these roles: *'bd*, *'nn*, and *'amt* all derive from the language of the family household. The word *ml'ak* in the Ugaritic material is less clear, but biblical material shows family messengers (e.g., Genesis 32:4–7) not only messengers of the royal household (e.g., 1 Kings 19:2).[28] In sum, the divine household exhibits numerous structural and linguistics hallmarks of the patriarchal household. This outline of the divine household calls for further reflection on households in West Semitic society.

2. The Royal Patriarchal Household as Model for the Pantheon

It is evident from the language of family relations that the model of the patriarchal household is central to the Ugaritic texts' presentation of divinity.[29] As the basic unit of society, the family household delineated in West Semitic texts could include the patriarch, multiple nuclear families headed by his sons, and other relations as well as workers and slaves.[30] Similarly, El and Baal, as well as other gods of the second tier, may have their own households. The oldest male serves at the top of the social pyramid within the household, mediating relations within the household and mediating between the household and other households or social segments. The patriarch mediates internal, domestic conflict and protects against external threat. The ultimate goals of the patriarchal unit are to preserve the family line, its prosperity, land, and honor (reputation). This patriarchal unit is to be situated within its larger agrarian context. The unit maintained both animals and crops. By physical proximity to the elements and the need to cultivate both herds and crops, family units were highly attuned to the nuances of the seasons and the weather.

This family structure also underlies the relations between El, Baal, and their heavenly subjects. The larger divine household of sons and daughters at the second level is headed by El. Similarly, the joint household may consist of *bn*, "the sons of X," with multiple heads called *b'lm*. Over them

may have been a head, the *’adn*. To illustrate social structure as it applies to the divine family, we may turn to an administrative text, CAT 4.360, which lists a number of families (with each section divided by a scribal line, here indicated by a line between units):

The sons of B‘LN of BIRY:	*bn b‘ln b’iry*
Three heads[31]	*ṯlṯ b‘lm*
And their master[32] Bull,	*w ’adnhm ṯr*
and his four daughters.	*w ’arb‘ bnth*
YRḪM (together) with his two sons, two heads,[33]	*yrḥm yd ṯn bnh b‘lm*
and three retainers[34] and one daughter.	*w ṯlṯ n‘rm w bt ’aḥt*
The sons of LWN: six heads.	*bn lwn ṯlṯtm b‘lm*
The sons of B‘LY: six heads	*bn b‘ly ṯlṯtm b‘lm*
And one free-man[35]	*w ’aḥd ḥbṯ*
And four women.	*w ’arb‘ ’aṯt*
The sons of LG, his two sons,	*bn lg ṯn bnh*
two heads, and his sister(s)	*b‘lm w ’aḥth*
In ŠRT.	*b sřt*
ŠTY and his son (s).	*šty w bnh*

This text follows a standard in its listing of family members: patriarchs (once called *’adn*), sons called heads (*b‘lm*),[36] male servants (either *n‘rm* or *ḥpṯ*), followed by daughters and women. (The texts do not refer to the wives of the men as such.) The large patrimonial units (“sons of X”) mentioned in this text have several households, each with a head (*b‘l*) with various family and nonfamily dependents below him. Both *’adn* and *b‘l* here belong to the terminology of the family. In the first family presented in lines 1–3, the word *’adn* refers to the patriarch of the family, which includes his three married sons and his four daughters.

The mythological evidence exhibits an analogous use of social terminology. El is called *’adn* (1.1IV 17), and it is clear from parallelism with “mother” (*’um*) in 1.24.33–34 that *’adn* may connote “father.” Accordingly, this word may be viewed as a familial term both in its application to El and in the listing of various kingship relations in 4.360. Like the god Baal, *b‘l* is a family head, and the name of one household

patriarch, “Bull.” It is also one of El’s titles,[37] perhaps a marker of his premier status.[38] In his own “family,” perhaps Dagan is also regarded as “bull” (1.127.22) and father of Baal.[39] The Ugaritic attestation of Baal as *bn dgn* (1.2 I 19, 35, 37, 1.5 VI 24, 1.6 I 6, 52, 1.10 III 12, 14, 1.12 I 39; 1.4 II 25, I 7) and *ḫtk*[40] dgn (1.10 III 34) could sustain this understanding of Dagan. The same usage of *ṯr* may lie behind the designation of the “head *rp’u*” as *ṯr ‘llmn* in 1.161.7, 23–24.[41] The households enumerated in CAT 4.360 also list three classes of females: sisters (*’aḫt*), daughters (*’aḫt*) and women (*’aṯt*). Similarly, the mythological construction of the divine family lists Anat as one of Baal’s sisters (1.4 IV 39, 1.10 II 16, 20) and as El’s daughter (1.3 IV 27). Pidray, ‘Arsay, and Tallay are mentioned both as Baal’s women (1.3 IV 40) and his daughters (1.3 I 24; cf. 1.24.27); all three are also called “brides” (1.3 VI 15, 1.4 IV 54, etc.). CAT 4.360 does not mention female servants (*’amht*), but other nonmythological texts do (2.70.19; cf. 4.659.7); this category is known in narrative about deities (1.12 I 14–15, 16–17; 1.14 II 3, II 10, III 25, 37, VI 22; cf. 1.4 III 21). Finally, despite the presence of many divine servants in the mythological narratives, *ḫpṯ* and *n‘r* are not attested in the divine household (cf. 13 I 19).

Equally fundamental to the family unit is the language of parentage, and here divinities strongly show these roles. El’s role as father and Athirat’s as mother are often emphasized. Yet divine children are themselves fathers and mothers in the divine household. Proper names attribute fatherhood not only to El but also to Athtar, Baal, Ea, Kothar, Rapiu, and Resheph.[42] Similarly, proper names regard not only Athirat as mother but also Anat, Hebat, and even apparently the god, Athtar![43] Furthermore, if proper names reflect a fund of information for popular piety, as D. Pardee has cogently argued,[44] then family roles apply to more deities in popular religious sensibility than in royal prayers, rituals, or other sanctioned Ugaritic texts (such as Baal, Kirta, or Aqhat). Indeed, in proper names after *’il*, words for “father” and “mother” seem to apply to more deities than any other divine roles.

The divine family is modeled on the royal household in particular.[45] The monarchy represents a royal version of the patriarchal household. CAT 4.360 exhibits much of the same social terminology seen in the royal correspondence and the myths.[46] In royal letters *b‘l* refers to a social superior and *’adn* to the father of the writer.[47] The royal titulary of 7.63.4

calls the king “upright lord” (*b‘l ṣdq*). These titles locate the king at the head of the royal household. As the preceding section shows, even the typical language of monarchy, *’adn* and *‘bd*, obtains in nonroyal households. As an aside, the titulary (7.63.6–7) includes a title “gatekeeper of the kingdom” (*ṭṭr mlk*). The latter reflects the patriarchal role of protecting the “royal household,” namely, the society, against external threats of enemies and mediating domestic conflict. Therefore, in ideological terms, the king is at once the patriarchal provider and protector; he is judge and father to the society, as well as the warrior who battles on its behalf. Moreover, the Ugaritic king showed a concern for maintaining family patrimony.[48]

The concepts of the divine household as well as particular divine roles are founded on the fundamental patriarchal-royal model. The social metaphors for chief deities overwhelmingly reflected the patriarchal experience in households, nonroyal and royal alike. Accordingly, hierarchy is a basic feature of the pantheon in the Ugaritic texts. At times it may take on a specifically royal cast. For example, El’s commitment to Sea’s (Yamm’s) messengers that the gods will render him tribute (CAT 1.2 I 37–38) underscores political hierarchy in the divine realm. The structure of divine society with its multiple households coheres with the sociopolitical structure of Ugarit itself, with the royal household and the temples it patronized reigning over the other “households” of their domestic cults.[49] The royal household is the “family of families,” the top of the social pyramid expressed through the royal palace, which at Ugarit enjoyed a particularly prominent size and position. The royal palace at Late Bronze Age Ugarit was an elaborate architectural achievement covering almost 7,000 square meters including living quarters, archives, courtyards, a throne room, a paved court, a pool, and other spaces; the palace was also situated just inside the western fortified gate.[50] Commenting on the widespread distribution of figurines throughout the city, M. Yon notes:

> The existence of these places of worship found throughout the city is evidence of the presence of religious activities among all the inhabited areas, and not just the areas which were reserved for it. One cannot exclude either the existence of domestic cults, a manifestation of popular religion side by side with frequentation of the great temples, to judge by the number and dispersion in all areas of the site of small

figurines, whether it be pendants in precious metal or the effigy of the goddess (Astarte?) or more humble figurines modeled in terracota.[51]

The royal "family ideology" is reflected also in a number of later West Semitic inscriptions. The notion that the king serves as the head of the societal household continues in first-millennium West Semitic texts. Accordingly, King Azitawadda can claim: "Ba'l made me a father and a mother to the Danunites."[52] King Kilamuwa of Y'dy claims that "to one person I was a father, to another I was a mother, to another I was a brother. The person who had never seen the face of a sheep I have given him a flock. . . ."[53] With the model of the royal family as background, one may ask whether the divine family in the Ugaritic texts was understood as having any other general features.

3. The Astral Background of El's Family in Ugaritic and Israelite Literatures and Baal's Outsider Status

The Ugaritic texts hint that El's family was understood as astral in character,[54] although the texts rarely stress this feature.[55] To begin, a category of divinities called "star-gods" is attested to in 1.43.2–3 evidently with their own "house" (*bt 'ilm kbkbm*). In general, these deities are not specified.[56] A possible exception is 1.10 I 3–5:[57]

which the sons of El do not know (?)	*[ ]h dlyd' bn 'il*
the assembly of the stars	*[ ]pḫr kbbm*
the circle of those of heaven	*[ ]dr dt šmm*

On the face of it, the three expressions seem parallel.[58] The first may identify the group involved as El's family, but one could render *bn 'il* as "divine sons" and not literally as "sons of El." The other two phrases, "the assembly of the stars" (*pḫr kbbm*) and "the circle of those of heaven" (*[ ]dr dt šmm*), clearly involve astral language (cf. *'ilm kbkbm* in 1.43.2–3). However, the context of 1.10 I 3–5 is broken and not well understood. Given the many difficulties involved in interpreting 1.10.13–15, the

hypothesis that El's family is astral requires support from texts that mention El and astral deities. Many astral figures are worthy of consideration: Shahar and Shalim; Yarih; Shapshu, Athtar, and Athtart; and Resheph.

1. Shahar, "Dawn," and Shalim, "Dusk,"[59] are El's two sons, according to CAT 1.23.
2. The moon-god Yarih[60] is evidently identified as *n'mn ['i]lm*, "the favorite of El," in CAT 1.24.25. In 1.92.14–16 Athtart's hunt provides meat for El and Yarih, presumably as a member of the head god's household.[61] Yarih participates in the cooking of a meal in El's house in 1.114; it is unclear whether or not it is he who serves as El's doorkeeper (*tġr*) and rebukes "El, his father" (*b'il 'abh*) in lines 11–14.
3. The sun-goddess Shapshu serves as El's special messenger according to CAT 1.6 VI. Further, the stars (*kbkbm knm*) are generally grouped after her in 1.23.54 (cf. *bt 'ilm kbkbm* in 1.43.2–3).[62] See also the blessing in 1.102.26–27 paralleling the sun and moon with El: *lymt špš wyrḫ wn'mt šnt 'il*. From these texts thus far, one might presume that the sun, moon, and stars belong to El's family.[63] According to M. Dijkstra, CAT 1.128.13 identifies El with a Hurrian moon-god, Kusuhu; he comments that "the reason for this identification is obscure."[64] The text is indeed difficult and such an identification may be obscure, but if it were correct, one may then ask whether it reflects the astral character of El's family.
4. Athtar and Athtart seem also to belong to El's family, though in different texts. The Baal Cycle indicates that Athtar, unlike Baal, belongs to the family of El and Athirat (1.6 I). Athtart likewise seems to belong to El's family (see 1.92.14–16, noted before). At Emar Athtar is once called ^{d}*Aš-tar* MUL, "Ashtar of the stars,"[65] and Aramaic texts from the ninth century onward attest to *'tršmn*, "Athtar of heaven,"[66] apparently a reference to the god's astral character. References to the astral character of Ishtar in Mesopotamian sources are also commonly used to bolster a case for Athtart as an astral god.[67] Taken together, such textual references lend credence to the old view that Athtar and Athtart represent the morning and evening "star" (Venus).[68] Accordingly, the basis for

their relationship to El and Athirat may lie in the astral character of this family unit. Unfortunately, the evidence is meager. Athtart herself is not labeled in an astral manner in Levantine sources.

5. Resheph may be an astral figure. M. J. Dahood and W. J. Fulco have argued for the astralization of Resheph at Ugarit, based on the astronomical omen text, CAT 1.78: *bṯ̱ym ḥdṯ ḫyr ʿrbt špš ṯ̱ġrhršp*, "on day six (?) of the new moon (on the month) of Hyr, the Sun went down, with Resheph (= Mars?) as her/its gate-keeeper."[69] If the identification of Resheph with Mars is correct, then the text provides evidence for the astral character of the god. However, this identification is not assured. Perhaps in support of Resheph's astral character, one may note that 1.107.40 pairs him with Yarih. However, it is also unclear if Resheph belongs specifically to El's family.

It may only be coincidental, but this roster of deities adds up to seven, and seven is the number in the expression "seven stars" (*šbʿ kbkbm*) in 1.164.15 (if one were to assume that the two words construed together refer to divinities). Beyond the textual evidence, we might appeal further to the iconographic record. O. Keel and C. Uehlinger have argued for a lunar presentation of El on a cylinder seal from Beth-Shean.[70] A. J. Brody has drawn attention to the astral features of Athirat's iconography.[71] By the same token, the textual evidence for the astral character of El[72] and Athirat[73] is admittedly minimal. This paucity of information may reflect the displacement of the family of El and Athirat by the Ugaritic cult of Baal, who does not belong to that family.[74] In sum, one might cautiously suggest that the sun, moon, and the stars were especially associated early with El in West Semitic religion.

The later religion of Israel may have known a cult of El that included a minimum number of these astral deities.[75] Job 38:6–7 may reflect a witness to this notion:

> Who set its cornerstone
> when the morning stars sang together
> And all the divine beings (*bĕnê ʾĕlōhîm*) shouted for joy?

In the verse Yahweh the creator-god (like old El?) asks Job if he was present when Yahweh set the cornerstone of the world's foundations, an ancient event celebrated by the divine beings, here specified as stars. In this passage, the morning stars are clearly parallel to *bĕnê ʻĕlōhm*, and on the basis of this verse, U. Oldenburg connects the astral bodies with El.[76] The god's astral association apparently lies behind the polemic against the king of Babylon in Isaiah 14:13 who attempts to ascend into heaven and exalt his throne "above the stars of El" (*mimmaʻal lĕkôkĕbê-ʾēl*).[77] The astral dimension of such a polemic against a foreign king perhaps lived on in the polemics directed against Antiochus IV Epiphanes in Daniel 8:9–11. The "little horn" grew "even to the host of heaven" and cast some of them down. Although not explicitly connected with El or Yahweh in Israelite religion, Shahar and Shalim seem to continue into Israelite religion. Shahar is known from biblical literature through an allusion to the myth of Shahar ben Helal, the fallen star (Isaiah 14:12).[78] Shahar also appears as an element in Hebrew proper names.[79] Shalem is attested to sporadically in biblical literature, including in the form of proper names such as *ʾăbîšālōm*.[80] Proper names with *šlm* as the theophoric element appear also on inscriptions from Arad, Ein Gedi, and Lachish.[81] Given their earlier and later attestation as deities, the sun and moon likely continued as deities at this stage as well.

Furthermore, as part of his identification with El,[82] Yahweh continued to be associated with astral deities in the form of the "host of heaven," as noted by J. G. Taylor[83] and B. Halpern.[84] Taylor points to passages such as 1 Kings 22:19 and Zephaniah 1:5 as evidence for the association of the host of heaven with the cult of Yahweh.[85] And 2 Kings 21:5 mentions Manasseh's construction of "altars for all the host of heaven in the two courts in the house of Yahweh." Perhaps as the last phase in the "career" of astral divinities in Israelite religion, biblical texts criticize astral deities within the cult of Yahweh under the rubric of the "sun, moon and the stars." It is possible that the criticism represented by these prohibitions derived from a perceived threat of the neo-Assyrian astral cult during the Iron II period,[86] but this fact does not diminish the indigenous character of the cultic devotion paid to the sun, moon, and stars.[87] Another possible text associating the sun and moon as part of Yahweh's military host is Joshua 10:12.[88] Some biblical scholars judge El as indigenous and Israelite

whereas others view the host of heaven and astral deities as foreign and non-Israelite. Yet given the biblical acceptance of El (under the guise of his identification with Yahweh) and the condemnations of astral deities, one might argue that biblical historiography has influenced the differing scholarly assessments of El and astral deities.

The astral background of El's family versus Baal's background as a storm-god may lie at the root of Baal's status as an outsider to this family. Baal's outsider status is expressed through the family metaphor in CAT 1.24.25–26 where the moon-god Yarih is called the "brother-in-law of Baal." The family metaphor can be extended to include outsider figures through a divine marriage betwen an insider deity and outsider deity. (Unfortunately, the texts do not name the female in El's family Baal is married to, if not to Anat, long thought to be his wife.)[89] Baal's own title, *bn dgn*, "son of Dagan" (1.2 I 19; 1.5 V 23–24) apparently points to his separate paternity from the rest of the divine family.[90] Yet Baal can also stereotypically refer to El as his father, since El is generically regarded as the father of the pantheon. From this discrepancy H. L. Ginsberg deduced that this "may echo a stage of the tradition in which he was not a son of El."[91] Later Levantine tradition, attested in Philo of Byblos's *Phoenician History*, provided a narrative explanation for Baal's problematic paternity: "Thus, Kronos waged war against Ouranos, expelled him from his dominion, and took up his kingdom. Ouranos' favourite mistress, who was pregnant, was also captured in the battle and Kronos gave her in marriage to Dagon. While with the latter, she gave birth to the child conceived by Ouranos, whom she called Demarous."[92] According to this story, Demarous is regarded as a concubine's son sired by Ouranos; the concubine subsequently becomes the wife of Dagon. The old West Semitic divinities behind this account are mostly clear: Kronos is El, Dagon is Dagan, and Demarous is a title of Baal, as attested in the Baal Cycle.[93] Curiously, given the Ugaritic evidence, Dagan is not the "natural" father of Demarous but called his father by "adoption." Ouranos, "Heaven," is credited as the natural father.[94] Ouranos theoretically should be the father of El, a figure unknown from West Semitic mythology. The ritual texts (CAT 1.47.12 = 1.118.11; 1.148.5, 24) attest to the binomial pair "Heaven and Earth" (*šmm w'arṣ*), but the place of Ouranos in this episode may derive from Greek tradition, which witnesses to Ouranos as the father of Kronos and the

grandfather of Zeus.[95] What is clear from the Ugaritic texts and later sources is that Baal Haddu stands outside the immediate family of El.[96]

The model of family relations is at work in both the Ugaritic material and the story by Philo of Byblos. Both reflect Baal's status as an outsider to the family of El and Athirat. Philo of Byblos provides a narrative for this relationship, which reflects the common Levantine way to regard such an outsider. The son of a concubine has no legal rights, and the legal wife, as well as her children, may harrass or even expel the concubine or her son from the family. Perhaps Baal's situation as presented by Philo of Byblos is comparable to Jepthah's: he is the son of a prostitute sired by a man whose legal wife and sons drive him from the family; as a warrior he is eventually raised to leadership despite his status (Judges 11). No such familial particulars are spelled out for Baal in the Ugaritic texts apart from his epithets *bn dgn* (1.2 I 19, 35, 37, 1.5 VI 24, 1.6 I 6, 52, 1.10 III 12, 14, 1.12 I 39; 1.4 II 25, I 7) and *ḫtk dgn* (1.10 III 34) and his conventional appeals to El as his father (1.3 V 35; 1.4 IV 47; cf. 1.4 I 5). His mother is never named. However, Baal's family situation behind these pieces of information may parallel Philo of Byblos' comments on his status, for hostility between Baal and Athirat's sons surfaces in the Baal Cycle (see 1.4 II 24–26). This is the same household that Baal invites to his feast in 1.4 VI 46 (there called "the seventy sons of Athirat") and that he attacks in 1.6 V 1. The West Semitic myth of Elkunirsa preserved in Hittite also reflects the animosity between Baal and Athirat and her family. After Baal and Athirat engage in sexual relations, he says to her: "Of thy sons I slew seventy-seven, I slew eighty-eight. Ashertu heard this humiliating word of the Storm-god and her mind got incensed against him."[97] Clearly the initial status of Baal and Jephthah was lower than that of the sons sired by wives. Baal seems to be an outsider of the same generation as the children of El and Athirat. He is in a sense "adopted up" to a status ultimately exalted beyond the rest of the family. This change occurs not because of the circumstances of birth but because of his achievement in his conflict with the god Sea (Yamm). Jephthah, too, does not enjoy acceptance from the family of his father; his status changes also because of his martial prowess. Accordingly, we may note that within the family, whether divine or human, the children of concubines or adoption occupy a lower status. However, the status of these children produced from concubines or adoption can change, a possibility

that the wives may fear, as the story of Sarah and Hagar in Genesis 16 illustrates.

If Athtar is an astral figure and full-fledged son of El, his conflict with Baal in the Baal Cycle may provide some insight about Baal and the divine family. The Ugaritic texts and the most proximate comparative evidence from Emar suggests that Athtar was an astral deity who was considered a major warrior deity. The narratives of CAT 1.2 III and 1.6 I 63 stress that Athtar is not powerful enough to be king. Within the Ugaritic texts, Athtar is rendered as a weak god, perhaps a historical reflection of his cult's demise, as reflected in other sources from the Levantine coast. A. Caquot argues[98] that the Ugaritic texts may reflect the historical demise of Athtar's cult at the hands of Baal's cult. Both were warrior-gods, but Baal was the divine patron of the Ugaritic dynasty. The geographical distribution of the cults of Baal and Athtar may clarify the status of Athtar at Ugarit.[99] The historical cult of Athtar may have been generally restricted to inland areas. Apart from the Ugaritic texts, there is no clear evidence for the cult of Athtar on the coast. There is no mention of Athtar in the Amarna letters, Egyptian sources mentioning West Semitic deities, the Bible, or Philo of Byblos. The single Phoenician attestation is debatable. In contrast, the cult of Baal is at home on the coast. It is tempting to view the conflict between Baal and Athtar in terms of the Arabic use of these gods' names for land fed by water. W. Robertson Smith remarks that bt. Baba Batra 3:1 reflects the older use of *ba'l* as land wholly dependent on rain and claims that the original contrast lay between land wholly dependent on rain and irrigated land.[100] The coastal regions received heavy rainfall, which precluded the need for either dry farming or irrigation. At Ugarit, for example, the rains occur over seven or eight months and exceed 800 mm each year.[101] In contrast, many of the inland locales where Athtar is attested practiced either dry farming or natural irrigation. One might argue, then, that in the environment of Ugarit, the god of the coastal storm would naturally supplant the god of natural irrigation. Unfortunately, it is impossible to ground any further speculation regarding Baal and the family of El, but we are left with a contrast between the astral family of El and Baal's role as storm-god.

As this inquiry indicates, the language of family encompasses both divine insiders and outsiders, both the established family and the strong newcomer. The concept of family provides a conceptual unity for Ugaritic

divinity. It shows an elasticity that can give expression to a multitude of relations. Finally, the concepts of both council and family also allow a focus on the two main protagonists of the Ugaritic mythological texts, El and Baal. Council in effect points to the holders of power in council. El is the first figure of power in the council (1.2 I), and Baal's rise within the council, with El's consent (1.4 IV–V), highlights his new place in the Ugaritic conceptualization of divinity. The next chapter takes up some of these relations in more detail and in the final section explores further the presence of family language in Ugaritic myth.

4
Pluralities, Pairings, and Other Divine Relations

> This thou perceivest, which makes thy love more strong . . .
>
> Shakespeare, Sonnet 73

Chapter 3 examines familial language for divinity at Ugarit. As the discussion there indicates, the patrimonial household provides conceptual unity for describing divinity. Within the divine household are additional relationships centered on one or two figures. This chapter explores these relationships to illustrate further the root metaphor of the family for Ugaritic divinity. After this survey of relations among the Ugaritic deities, the final section of this chapter explores alterations of divine relations within the presentation of divinity in ancient Israel.

1. Baal, Resheph, Yahweh, and Their Retinues

As chapter 3 observes, the four tiers of the family include the household workers. Here we may note examples of another type of household "workers," the groups of retainers attached to two gods of the second tier. There is some evidence for a group of divine retainers who serve Baal. The best evidence may be the god's meteorological retinue in CAT 1.5 V 6–9. Possibly related, the phrase *'il t'dr b'l*, "Baal's divine helpers," occurs in 1.47.26 = 1.118.25.[1] We do not know how this collective may relate to *mhr b'l wmhr 'nt* in 1.22 I 8–9 (cf. 1.22 II 7). Common to all of them may be the military image underlying them: Baal is the leader of his military retinue.

There is also possible evidence for a military retinue revolving around Resheph. Ugaritic attests to both *ršpm* and to several *ršp* combined with a place name.[2] However, the plural *ršpm* in CAT 1.91.11, described as entering *bt mlk*, the royal palace or royal sanctuary/chapel, probably refers to the procession of cult statues of Resheph.[3] "The Reshephs" are known in Egyptian and Phoenician sources, perhaps warranting the hypothesis that second millennium Levantine religion generally knew this plural collective. A New Kingdom Egyptian text compares Ramses III's army to them: "the chariot-warriors are as mighty as Rashaps."[4] Sidonian inscriptions (KAI 15:2; RES 289:2, 290:3, 302 B:5) mention *'rṣ ršpm*, "the land of Reshephs" (cf. *'rqršp* in KAI 214:11). Following W. F. Albright, H. Donner and W. Röllig interpret *ršpm* as a general collectivity of deities like the Rephaim (see the next section).[5] W. J. Fulco renders *'rṣ ršpm* as "Land of the Warriors."[6] Phoenician *ršpm* may designate a martial vanguard. BH *rešep* appears as part of theophanic vanguard (Deuteronomy 32:23–24; Habakkuk 3:5; Ben Sira 43:17–18) and as a generic noun for sparks and fiery arrows (Psalm 76:3; Job 5:7; Song of Songs 8:6; cf. Aramaic *rišpā'*, "flame").[7] Hababkkuk 3:5 mentions Resheph as a member of Yahweh's theophanic retinue.[8] Given the warrior character of both Baal and Resheph, these pluralities would seem to be military retinues of the gods after whom they are named. As members of the second tier of the divine assembly and sons of the divine patriarch, these two gods were in a position to have retainers work for them. Accordingly, these retinues are well within the paradigm of the patrimonial household. The same paradigm of military retainers may underlie Philo of Byblos' comments (*PE* 1.10.20): "Now the allies of Elos, i.e. Kronos, were called 'eloim', as the ones named after Kronos would be 'Kronians'" (*hoi de summachoi Elou tou Kronou Elōeim epeklēthēsan hos an Kronioi houtoi ēsan hoi legomenoi epi Kronou*).[9]

2. Dead Rephaim and Kings, and the Power of Death in Life

The analysis thus far has focused largely on major deities and the organization of divinity as it pertains to the members of the divine assembly

or household. This schema does not account for lesser divinities outside the greater household of deities. In Ugaritic literature, dead kings (*mlkm*) and their putative tribal predecessors, the *rp'um* (henceforth Rephaim, after the spelling in English translations of the Bible), constitute two divine groupings possibly centered around a specific divinity. However, the issues are complex and the evidence is tricky. The *mlkm* appear in 1.22 I 17, 1.47.33 = 1.118.32, and they might be related to *mlk ʿṯtrt* in 4.790.17. The Rephaim occur in 1.6 VI 46, 1.20–1.22 and 1.161.8, 24, and they may be related to *rp'u* in 1.22 I 8, 1.108.1, 19.[10]

These cases of *mlkm* and *rp'um* may carry a comparable pattern of relationship, perhaps analogous seen with Baal and Resheph and their retinues, namely, a god with a retinue named after him. The two sets here may involve a single chthonic character, to be related perhaps in the following manner: *rp'u* : *mlk*:: *rp'um* : *mlkm*. The singular terms, *rp'u* and *mlk*, do not seem to be distinguished in 1.108.1–2, especially given the fact that the title of *rp'u* as *mlk ʿlm* in 1.108.1 is perhaps an allusion to his identification with *mlk* known from 4.790.17.[11] Indeed, many scholars have noted that *rp'u* bears the same address of *ʿṯtrt* (1.108.2) as *mlk* (1.107.42; 4.790.17), further suggesting their identification.[12] However, there are problems with relating the plural forms. A difference between two of the plural groups seems evident in CAT 1.161, which appears to delineate the *rp'um* as the older (perhaps tribal?) predecessors of royal ancestors, *mlkm*.[13] As with so many aspects of Ugaritic studies, the evidence supports little more than conjectures. In sum, 1.108.1–2 could reflect the amalgamation of the different singular terms in a single figure,[14] while 1.161 retains some distinction between the older *rp'um*, the older tribal ancestral heroes, and *mlkm*, the more recent deceased monarchs. Despite the nuanced difference, the two plural entities supposedly belonged to two parts of a single line of deceased ancestors of the royal line.

A final point regarding the royal cult of the dead at Ugarit: it might seem prima facie that the cult of the dead ancestors was generally maintained apart from the cult of the so-called "high deities." However, caution is warranted, as *rp'i yqr* appears in line 13 of the admittedly very difficult 1.166, a text that also mentions Dagan and Baal in line 9. Moreover, if *'il'ib* were to be understood as the "ancestral god" (literally, the father who has become god) as K. Van der Toorn has argued,[15] then his

place in Ugaritic pantheon lists (1.47.2 = 1.118.1 = ^{d}*abi* in RS 20.24 and probably to be reconstructed in 1.148.1) suggests how near and dear cultic devotion to deceased ancestors could be.[16] Finally, cultic devotion paid to *rp'u* was not entirely separate from the cult of the so-called high deities. Indeed, both "constituencies" or "assemblies" (*pḫr*; see chapter 2, section 1) were of central concern to the royal cult, as suggested by El's blessing (in the company of high deities) evoking *rp'um* (1.15 III 2–4, 13–15).

For about a half century scholars have contrasted the biblical attitude toward death with what was seen in the Ugaritic material as a "Canaanite embrace" of death.[17] In the last two decades biblical scholars have proposed that the biblical critique of "Canaanite" customs pertaining to the dead reflects a more popular Israelite devotion to the dead and some priestly and deuteronomic restrictions on such activity.[18] With the publication and integration of important archaeological studies, such as E. M. Bloch-Smith's groundbreaking 1992 study *Judahite Burials and Beliefs about the Dead*,[19] scholars have revised their understanding of the Rephaim in Ugaritic (*rp'um*) and biblical texts (*rĕpā'îm*). Recent studies view the Rephaim in both corpora as the heroic ancestors. However, there is more to this comparison. Both the Ugaritic and biblical views of the Rephaim are the products of their societies. For Ugarit, KTU 1.161 makes it clear that the Rephaim represent the ancient cultural tradition with which the monarchy identified; in short, the Rephaim mark cultural identification for the monarchy (and for other sectors of Ugaritic society). Given the Israelite devotion to the dead, a similar view may have obtained throughout much of Iron Age Israel. But in Israel we see a reaction against popular practice. For example, for deuteronomic texts, the Rephaim represent the ancient cultural tradition of Israel's putative predecessors in the land, the Canaanites; in short, in these texts Rephaim signal cultural distance or "disidentification." The Rephaim then are cultural markers of identity, insiders for the Ugaritic monarchy and society as well as Israelite popular religion, but outsiders for deuteronomic authors. Both the Ugaritic monarchy and authors of deuteronomic works use the putatively ancient cultural tradition of the Rephaim to claim political identity and authority.

Another plurality is the Kotharat (*ktrt*), evidently beneficial in conception (see CAT 1.17 II 24–46; 1.24).[20] and perhaps modeled on the collective of family females who traditionally conveyed a new bride to the

wedding-chamber. (These divine females are related only etymologically to the singular form *kṯr*, the name of the Ugaritic craftsman-god. The root denotes "skill.")[21] Although Ugaritic attests to a number of other pluralities in the ritual texts, they are poorly attested and little understood.[22] These pluralities and the gods related to them seem to be tied to essential elements of death and life: the Kotharat associated with the beginning of marriage and human conception, and the Rephaim and other related figures associated with human death. Although these deities seem to stand outside of the "mythic mainstream" of the divine household, they are nonetheless important. They appear in Ugarit's myth, not only in its royal ritual. Moreover, at Ugarit the dead were interred in tombs under the houses; clearly death "inhabited" the home. Household matters of both life and death penetrate and permeate the mythology. I contend in chapter 6 that the royal concern for the deceased kings and Rephaim has intensively influenced the longest piece of Ugaritic literature, the Baal Cycle. Baal is cast in the role of dead king and hero in the final two tablets of the cycle. Indeed, nowhere else in the ancient Middle Eastern literature is Death so prominent a divinity as in the Baal Cycle. Thus, death and the realm of death play an integral role in the Ugaritic presentation of the cosmos: death is a part of life and life a part of death.

3. Pairings: Making Associations

Ugaritic literature is conspicuous for its many pairings across genres. I offfer a sampling[23] from ritual and myths:

The Snake-Bite Incantation, CAT 1.100

a. *ʻnt wʻṯtrt ʼinbbh*, "Anat and Athtart at Inbb" (1.100.20); Anat and Athtart (1.107.39, 1.114.22–23, 26; parallel in lines 9–10). In 1.16 II 26–28 Athtart is now read instead of Athirat (parallel with Anat, with her name reconstructed but not her epithet *btlt*).[24] The twelfth-century Egyptian story, "The Contest of Horus and Seth for the Rule," presents Anat and Astarte together as the daughters of Re and the wives of Seth,[25] identified with Baal in the Late Bronze Age.[26]

b. *ẓẓ wkmṯ ḥryth*, “ZZ and KM*T* at Hryt” (CAT 1.100.36; see 1.82.42; 1.107.41).
c. *kṯr wḫss kptrh*, “Kothar wa-Hasis at Kaphtor” (CAT 1.100.46; see 1.1 III 17, 1.2 IV 7, etc.).
d. *šḥr wšlm šmmh*, “Shahar and Shalim in (the) heavens” (CAT 1.100.52; see 1.23.52, 1.107.43, 1.123.11).

Other Ritual Texts
e. *ṯkmn wšnm*, “Thakamuna and Shanuma” (CAT 1.39.3, 6; see also 1.65.4; 1.114.18–20; 1.123.8).
f. *’il w ’aṯrt*, “El and Athirat” (CAT 1.65.5).
g. *’arṣ wšmm*, “Earth and Heaven” (CAT 1.118.11 = 1.147.12, partially reconstructed; 1.148.24).
h. *ġrm w[‘mqt]*, “Mountains and [Valleys]” (CAT 1.118.18, entirely reconstructed in 1.47.19).
i. *‘ṯtr w’ṯtpr*, “Athtar and Athtapar” (CAT 1.107.41; cf. 1.123.10 without *w*-).
j. *dgn wb‘l*, “Dagan and Baal” (CAT 1.123.4; cf. 1.107.39).
k. *qdš w’amrr*, “Qudshu and Amrar” (CAT 1.123.26; see 1.4 IV 13; parallel terms in 1.4 IV 16–17; cf. 1.3 VI 11 without *w*-).

Mythological (Narrative) Texts
l. *mt wšr*, “Mot and Sr” (CAT 1.23.8).
m. *’aṯrt wrḫmy*, “Athirat and Rahmay” (CAT 1.23.13, 28).
n. *nkl w’ib*, “Nikkal and Ib” (CAT 1.24.1).
o. *ltpn wqdš*, “Beneficent and Holy” (CAT 1.16 I 11, 21–22, II 49 [reconstructed]).
p. *gpn w’ugr*, “Vine and Field” (CAT 1.3 III 36; 1.5 I 12; 1.8 II 7–8).

These pairings’ distribution is quite strong in 1.100 and other ritual texts.[27] Given this distribution, one might interpret many of them largely as associated pairings for offering sacrificial provisions.

Others associations relate various deities in different ways. Some associations reflect family relations, such as El and Athirat as divine couple, or Dagan and Baal as father and son. Other pairings are apparently “natural,” such as “Dawn and Dusk” (Shahar and Shalim), “Heaven and Earth,” “Mountains and Valleys,” or “Vine and Field.” The pairs of “olden

gods" (e.g., "Earth and Heaven") are a well-known feature of ancient Near Eastern theogonies, but the Ugaritic material lacks such pairings in any theogonic context.[28] Finally, the binomial pattern is so common that it is used also to denote single deities with two names, as in Kothar wa-Hasis and Nikkal wa-Ib. In these two cases, the second term characterizes the deity named with the first term. Accordingly, Kothar is Hasis, or "wise"; and the Mesopotamian moon-goddess mentioned in CAT 1.24, Nikkal (= nin.gal, "Great Lady," the wife of the moon-god Sin in Mesopotamia), is called Ib, probably related to her Akkadian epithet *ilat inbi*, "goddess of fruit."

For a number of these cases, J. C. de Moor argues for a gradual evolution from two separate deities into one entity.[29] In many cases, we do not possess enough information to confirm or preclude such a conclusion. Do we know that Anat and Athtart are, as de Moor proposes, the "two ʻAnatu-goddesses who were regarded as aspects of one divine being"? Is there really enough evidence to indicate that Kothar wa-Hasis was ever regarded as two divinities fused into a single one? Specific cases of "fusion" can be defended,[30] but it is unclear that such an evolution applies generally to double names. G. del Olmo Lete suggests that some double names reflect the syncretism of two pantheons, one "Amorite" and the other "Canaanite."[31] Such a view might work for *bʻl/hdd*, but *ʼil/dgn* and *ʻnt/ʻṯtrt*, the two other sets of names del Olmo Lete mentioned, seem to be distinguished at least in the mythological texts.

Despite such questions, the preponderance of binomial names remains an interesting feature of the Ugaritic texts, and perhaps it prompts further consideration of compound divine names in ancient Israel. Some of the Ugaritic compound names sometimes lack the coordinating conjunction "and" (*w*-). Kothar wa-Hasis is once called Kothar Hasis. It is this sort of compound that appears in biblical texts, for example: Yahweh Elohim in Genesis 2:7–9, 15, 18, 19–22; El Elyon in Genesis 14:18–20; and Adonay Yahweh in Ezekiel 2:4, 3:11, 27, 4:14. Most of these instances seem to represent a pattern of divine name followed by a divine title, except in the case of Adonay Yahweh ("Lord Yahweh"), in which the title precedes the name. These biblical titles further reflect high status, rather than function or characteristic (such as "wise," the meaning of the second name of Kothar wa-Hasis). Beyond these observations lies only sheer speculation. I will offer one. Much of the Ugaritic and biblical material containing such

binomials belongs to priestly scribal traditions. The cosmopolitan culture at Ugarit attesting to eight languages and a developed literary and religious tradition perhaps draws theological speculation about reality in largely expressed in religious terms. Exploring interrelations in religious reality (e.g., binomials) represents one means for such theological reflection. But Israel is not exactly like Ugarit. Binomials, at least the ones cited, suggest an exaltation of the dynastic and national god. Even El Elyon, possibly an older title of El passed down in ancient Israel, in its attested context in Genesis 14 elevates the national god of Israel. With the examples from Ezekiel, we may also see the sort of priestly combination attested at Ugarit pressed into the particular purpose of exalting Yahweh. Moreover, the examples of Genesis 2 may reflect a priestly redactional hand (the same as the priestly author/redactor of Genesis 1), which added the divine title God (*ʾĕlōhîm*) used in Genesis 1 to the divine name Yahweh attested in Genesis 2.[32] An aspect of Genesis 1's "monotheistic poetics" might then extend redactionally to Genesis 2.[33]

4. Divine Possession and the Problem of Yahweh and His Consort

CAT 1.43.13 presents a most intriguing formation in the prepositional phrase *lʿnth*. The context, 1.43.9–13, involves offerings made at the royal palace to a number of divinities:

When the Gatharuma enter the palace:	*ʿlm tʿrbn gṯrm bt mlk*
one shekel of gold for Shapshu-and-Yarih,	*ṯql ḫrṣ lšpš wyrḫ*
for Gathru a shekel of pure silver,	*lgṯr ṯql ksp ṯb*
a snout and neck for his (?) Anat.	*ʾap w npš (13) lʿnth*[34]

This phrase *lʿnth* has been interpreted by M. Dietrich and P. Xella as "for his Anat" (so also reconstructed in line 16).[35] The antecedent of the pronominal suffix is taken to be the god *gṯr* mentioned in line 11. If the *-h* suffix were pronominal, as suggested by this translation, then this usage might be regarded as elliptical for "for Anat, his lady" (**lʿnt ʾadth*) or the

like. In this case (and perhaps in the later well-known case of *l'šrth* at Kuntillet ʻAjrud, as Dietrich and Xella both argue), the usage refers to god and goddess as consorts. However, the final letter of *lʻnth* has been interpreted quite differently by D. Pardee. Given the exceptional character of *-h* on a divine name, he prefers to regard the *-h* "as a doubly marked adverbial form indicating the recipient of the sacrifice." He suggests: "Without an ancient vocalization, it is impossible to know whether what I have indicated as */-ha/* constitutes 'emphatic' *-h* or 'adverbial' *-h* (i.e. the so-called locative-directive morpheme), or even whether these constituted separate morphemes."[36] But is Pardee's marking any less exceptional than a pronominal suffix on a proper name? As Pardee's comments suggest, caution is in order for *-h* here: a pronominal suffix of possession is questionable, for Anat is not known as the consort of Gathru. There is a very enigmatic collocation of words *ʻnt gṯr* in 1.108.6, but their meaning is unclear in this context. There is no entirely satisfactory answer to the ending *-h* on *l'nth*. Accordingly, perhaps it is a pronominal suffix expressing a relationship to a god. We simply lack the evidence to exclude this interpretation altogether, despite its difficulties.

This discussion encroaches on a larger issue, one quite central to scholarship on Israelite religion in the last two decades: whether Yahweh had a consort named Asherah in ancient Israel. According to current scholarly discussions of Asherah, the simplest reading of 2 Kings 23:4 suggests that the cult of "Baal, Asherah and all the host of heaven" was supported within the Jerusalem temple in the late seventh century (see also 2 Kings 21:3).[37] This interpretation has been fueled largely (but not exclusively) by the Kuntillet ʻAjrud inscriptions (ca. 800) mentioning "Yahweh and his asherah (*lyhwh . . . wl'šrth*)."[38] Like the Ugaritic evidence just cited, this phrase seems to show a suffix on the name of the goddess Asherah, or at least her symbol denoting her. The inscriptions discovered at the site of the ancient Philistine city Ekron (Tel Miqne) may provide more evidence for the worship of Asherah. The excavations have yielded important evidence of a seventh-century Philistine or neo-Philistine culture,[39] that is, the regional Semitic language with some features that distinguish it from either Phoenician or Hebrew in this period.[40] Found in "an elite area" and sealed in the destruction level dated to 603 B.C.E., some fifteen inscriptions on shards include the prepositional phrases *I'šrt* and

lqdš.[41] The phrase *l'šrt* appears on a shard restored on the same vessel as a second shard that bears the inscription, *lqdš*. Are these phrases terms for "sanctuary" or cult "place," or do they stand for a goddess, "Asherat," and her putative epithet, *qdš*, "the Holy One"?[42] The excavator, S. Gitin, favors the second alternative and says that "the inhabitants worshiped the goddess Asherah."[43] Phoenician cognates would fit the first interpretation of *l'šrt* and *qdš* as terms for sanctuary, whereas Hebrew cognates suit the second view of these words as terms for the goddess. As Gitin notes,[44] it may be possible to exclude Hebrew as an option because the final *-t* is not the norm for Hebrew feminine singular nouns in the absolute state; rather, final/â/is the norm in this period.[45] The inscriptions from Tel Miqne are ambiguous. Given the nature of their grammar and script, they attest to a non-Israelite, non-Judean cult.[46] Tel Miqne has also yielded a seventh-century silver medallion with a figure praying to a goddess standing on a lion.[47] The divine figure may be Asherah, if the arguments regarding the association of Asherah and the lion are correct.[48] Finally, the wider polytheistic context of Tel Miqne has apparently been verified by the recent discovery of an inscription reading "for Baal and for Padi."[49] The latter figure is known as a ruler of Iron II Ekron. The inscription was written on a storage jar found in a side room of Temple Complex 650. Thus, the evidence from Tel Miqne may be highly pertinent for the reconstruction of Asherah as a goddess in the region.

The biblical field has generally embraced the view that the inscriptions from Kuntillet ʻAjrud, Khirbet el-Qom, and Tel Miqne and some biblical passages attest to a goddess,[50] regardless of problems attendant with this reconstruction.[51] Those Judeans who opposed the symbol in the Jerusalem Temple in 2 Kings 23:4 and elsewhere seemed to have regarded it as a symbol for the goddess, but it is not clear whether those Judeans who supported it viewed in it similarly. Complicating matters, the deuteronomistic detractors of the symbol may have engaged in guilt by association, with the god Baal who, as S. M. Olyan has argued,[52] had no primary relationship to Asherah. The symbol as it appeared in the Jerusalem Temple may not have represented a goddess as such. Yet the matter is hardly so simple, for 2 Kings 21:7 also refers to an image of the asherah (*pesel hā'ăšēră*), and normally an image would point to a deity.[53] If one suspects that the *pesel* is a representation of the symbol of the asherah, one

might agree that no goddess is involved. In the past I adopted this view.[54] Other scholars have also since expressed doubt about Asherah as a goddess in the Kuntillet Ajrud inscriptions.[55] Currently, however, most scholars believe that Asherah was a goddess in ancient Israel, possibly even Yahweh's consort. In short, the jury seems still to be out on the issues, which are undeniably complex.

5. Re-presentation of Divinity: Athtart as the "Name of Baal"

The warrior goddess Astarte bears the title "name of Baal," *šm b'l* (CAT 1.16 VI 56; KAI 14:18).[56] The precise religious significance of this title is unclear from the Ugaritic corpus, especially as Baal and Astarte neither act together nor appear as consorts in the mythological texts.[57] Scholars recognize that they are both warriors,[58] but the relationship appears to involve more than a common martial role. Later evidence suggests a relationship between Baal and Astarte. F. M. Cross,[59] E. T. Mullen,[60] P. K. McCarter,[61] and S. M. Olyan[62] interpret the goddess as the name-hypostasis of the god.[63] Philo of Byblos perhaps reflects accurate Phoenician tradition in reporting that Astarte and Baal (*Zeus Dēmarous kai Adōdos*), "king of the gods" (*basileus theōn*), ruled the land together under the consent of El (*kronou*) (*PE* 1.10.31).[64] Based on this passage, Olyan asserts: "This suggests clearly that she is queen alongside Baal who is king, though the word 'queen' does not occur in the text."[65] Olyan concludes that Astarte was the queen, consort, and ally of Baal. The evidence from Philo of Byblos and Astarte's title *šm b'l* represents the strongest support for Olyan's reconstruction, although the Ugaritic texts do not apply the language of queen or consort to Astarte. As noted in chapter 2, the Ugaritic mythological texts only exceptionally refer to the second tier of the pantheon as married. It may be that the literary descriptions of Baal and Astarte assume this relationship.

The possibility that this Ugaritic usage of *šm* marks a form of cultic presence may be supported by later Israelite attestations to *šēm*[66] in connection with theophany. It has often been noted that the divine "name"

šēm in biblical sources serves as a sign of divine presence (Exodus 23:20–21). The divine name is also an element in the divine procession of Exodus 23:20–21. According to this text, Yahweh will send his "messenger" (*mal'āk*) with the Israelites, and "my name is within him" (*šĕmî bĕqirbô*). The proclamation of Yahweh's name in the divine appearance to Moses in Exodus 33:19 may be a reflex of this old notion. The divine name acts also as a warrior (Isaiah 30:27.[67]) Similarly, Psalm 29:1–2 alludes to the name as a divine quality with martial qualities, including "radiance" (*kābôd*) and "strength" (*'ōz*), expressed further as "the glory of his name" (*kĕbôd šĕmô*). Most interpreters assume that the *bĕnê 'ēlîm* of Psalm 29:1 are invoked to acknowledge these various divine characteristics. Citing Deuteronomy 32:3 and Psalm 68: 33, C. Kloos comments on the opening of Psalm 29: "The context of these passages indicates, that 'to give greatness' or 'strength' means 'to praise', indubitably by exclaiming that the god is great c. q. strong."[68] In other words, the *bĕnê 'ēlîm* are called to acknowledge the *kābôd* and *'ōz* of Yahweh and the *kĕbôd šĕmô*. The theophany that follows the invocation[69] suggests that the qualities involved are not general abstractions but belong to the divine appearance in the storm. BH *kābôd* "radiance, effulgence," is no abstraction but comparable to Akkadian *melammu*, the theophanous power accompanying the procession of the deity.[70] Similarly, *kĕbôd šĕmô* in Psalm 29:2 may be no abstraction but the theophanous radiance manifested by the appearance of the name.[71] In short, the name is the focus of Yahweh's martial manifestation. Yet this name-warriorship belonging to a storm theophany proceeds to a sanctuary where it is sighted. The last line of Psalm 29: 9 is often rendered: "and all in his temple say 'Glory!'" (Because glory is seen and not said,[72] and because BH *kullô* is often a postpositive attached to places,[73] it may be more accurate to translate "and in His temple—all of it—radiance appears.") The point is the cultic setting of this glory of the divine name.

As this brief survey indicates, biblical and other West Semitic texts mentioning the divine name share terminological and thematic features. The name designation of Astarte and her martial character and special relationship to the warrior god Baal approximate the martial character of the name and its special relationship to Yahweh the warrior god. The extra-biblical evidence for the name may suggest the background for the name in ancient Israel, otherwise lacking in textual support: the name may have

been associated at one time with a goddess in early Israelite religion. In turn, the biblical evidence also provides a possible insight into the West Semitic evidence for the name. The liturgical setting of the name in Israelite sources may support P. K. McCarter's suggestion that hypostases represented the "cultically available presence in the temple" of the god.[74] McCarter makes this point specifically about *'šmbt'l* and *'ntbt'l* as the hypostases of Yahweh at Elephantine, but the point may apply more widely within Phoenician or Ugaritic religion. The biblical evidence suggests an older liturgical setting for West Semitic goddess qua name.

Finally, a further suggestion about Astarte as the *šm b'l* may be offered. The expression *šm b'l* formally approximates a proper name, as in the Ugaritic names *šmb'l*, "name of Baal," and *šm'nt*, "Name of Anat," and in Akkadian names from Ugarit *šu-um-*^{d}*addu*, *šùm-a-di*, "name of Haddu," and *šu-um-a-na-ti*, "name of Anat."[75] Amarna personal names include the similar name, *šu-um-ad-da*, spelled also *šum-ad-da* and *šu-mu-ha-di*, "name of Haddu."[76] Accordingly, Athtart's designation as *šm b'l* marks her in a manner similar to a person with the name "name of Baal." This name perhaps then denotes her relationship to the god in a manner analogous to the human person who would bear such a name. One might presume that a worshipper with such a name is dedicated to or associated with the deity named; an analogous sentiment may lie behind Athtart's title and thus her relationship to Baal in the Ugaritic texts.

6. Divinized Qualities of Deities

Apart from Ugaritic *šm*, other divinized nouns may have operated in connection to a deity. In this context we may mention again the binomial name of the Ugaritic craftsman-god, Kothar wa-Hasis, denoting "Skill and Wisdom," two qualities befitting him. This name may then represent both the divinization and personification of craftsmanship. CAT 1.65 presents qualities after a list of deities, perhaps suggesting divinized qualities in connection with El (lines 5–8):

El and Athirat, *'il w 'aṯrt*

The Mercy of El,	*ḥnn ’il*
The Constancy of El,	*nṣbt ’il*
The Well-being of El	*šlm ’il*

Here the qualities of El are invoked after El and Athirat.[77] CAT 1.65 is not the only text with qualities appearing with a list of deities. CAT 1.123 includes a standard group of deities and then lists the following figures in lines 12–16:

Light and Firmness (?),	*ngh wsrr*
Eternity and Rule (?),	*‘d w šr*
Right (and) Justice,	*ṣdq mšr*
Compassion of the sons of El, (?) . . .,	*ḥn bn ’il dn[*

The words *ḥn* and *ṣdq mšr* reflect divine qualities; the latter combination is well-known from Philo of Byblos' *Phoenician History* as Misor and Sydyk/Sedek.[78] Three of the other divine terms in 1.123 relate to theophany in biblical contexts: BH *nōgāh, kābôd* and *nûr* in 2 Samuel 22:13 = Psalm 18:13; Ezekiel 10:4; and Habakkuk 3:4. As noted in the previous section, Ugaritic *kbd* could reflect in some cases a divine entity or quality,[79] and the Israelite *kābôd* used in various theophanic contexts evidently echoes this older usage.[80] What is striking about a number of these qualities in their biblical contexts (e.g, *kābôd, nōgāh* and *nûr*) is the theophanic or liturgical settings attested for them. Similar usage appears with other divine qualities in biblical texts, such as the divine "light" (**'ôr*) and "truth" (**'ĕmet*) in Psalm 43:3. This listing is binomial, a structural feature favored in 1.123.12–14, as well as the arrangement of divine names in rituals and other contexts noted in section 3. When the divine qualities appear in any larger context in the Bible, whether narrative or prayer, they sometimes assume work associated with divine laborers, specifically, accompaniment. In some instances the accompaniment entails the theophanic retinue of the chief god whom they serve. In Psalm 43:3, they are to accompany the human worshipper of the chief god: "'Light' and 'Truth' are personified as two of Yahweh's attendants, sent from the divine council as 'guardian angels' to guide the psalmist to the Temple."[81] Many divinized qualities could attach to any number of benevolent deities to express various qualities of those deities to worshippers, especially in liturgical contexts.

7. Extension of Divinity: Cultic Places and Things

By virtue of association with particular deities or their cult sites, particular locales could be regarded as divine. Accordingly, it is well-known that Baal's mountain, Sapan, is labeled "divine" in the Baal Cycle (1.3 III 29, IV 19). This mountain also appears in a list of deities (1.47.32 = 1.118.14) and as the recipient of offerings with other divinities (e.g., 1.41.34 = 1.87.37). Other places divinized or at least sacralized as part of the ritual "center" are the sacred garden and the sacred spring. The sacred garden is expressed in

the “mythology” of Genesis 2–3 and Ezekiel 28.[82] The term *bnbk* stands in the syntactical slot expected of a deity in 1.87.35 (reconstructed in 1.41.32), but the syntax seems to militate against such a view:[83] the syntagm literally means “in the spring.” This difficulty has not prevented some recent authors from relating this term in the ritual to both the cosmic waters at the site of El’s abode (called *mbk nhrm*) and the representations of the cosmic sea in temple courtyards in both Mesopotamia and Israel.[84] From the position in the text, this site might be divinized in some manner. More generic divinized topographical features in Ugaritic are *’arṣ wšmm* (CAT 1.118.11 = 1.147.12, partially reconstructed; 1.148.24) and *ṯrm w[‘mqt]* (CAT 1.118.18, entirely reconstructed in 1.47.19). Cross explains the former binominal pair as “olden gods” belonging to ancient theogony.[85] The latter may follow suit. If so, these sorts of “divine places” derive their divinity in part from their perceived antiquity in the divine unfolding of the creation.

Objects, perhaps by their association with cult, are likewise labeled or regarded as divine: the “lyre,” *knr* (1.47.32 1.118.31, a deity-list; see also ^{d} ^{giš}*zannaru* in *Ugaritica* V i 170:6′; cf. 1.148.9, 38).[86] Here note T. Jacobsen’s comment: “Prayer appealed to divine compassion by vivid descriptions of suffering, music soothed distress or anger in the gods, and so their bull harps were seen as calming counsellors. Intercession was almost always by gods—even the harps were considered deities.”[87] Consumables of cult also appear seemingly in divine terms (*dqt* in 1.102.8; *tṛṯ* in 1.102.9). Based on the extension of the rubric of divinity to cult places and objects, one may suggest that divinity was considered to adhere to cult. In other words, as a center for the experience of divinity, cult itself participated in the divinity of the deities to which it was addressed. Cult then becomes for its human maintainers the manifestation of divinity, or at least the context of divine manifestation for the deities whom they worship. By extension cult becomes imbued with divinity. I will address this question again in connection with holiness in the next chapter (section 3).

8. Afterword: The Conceptual Unity of Ugaritic Polytheism

In closing the first part of this study, I would like to make "a plea for polytheism," or, more precisely, a plea for considerably greater understanding and appreciation of how polytheism functioned for its adherents in both Ugaritic and Israelite texts. The divine council and divine family household are the chief concepts for expressing relationality within divinity. Within this generalization, we can see some differences in Mesopotamia, Ugarit, and Israel. On the whole, Mesopotamia does not use the divine household as a means of achieving conceptual unity to the same extent as Ugaritic myth. I do not intend to overlook the many examples of familial relationships among deities in Mesopotamian literature, only to note the relative importance given to the divine family as a means of characterizing deities. In general, it is my impression that the root metaphor of the family, although well attested for specific relationships between deities, does not extend as strongly to the collectivity of divinities in Mesopotamia. Instead, the language of council and hierarchical relations within this grouping predominates there.[88] In contrast, the divine family is more prevalent in the Ugaritic texts. It may be that the divine assembly was the more established language, at least in Mesopotamia, but it is heavily complemented by familial discourse in Ugaritic myths.

The picture of divinity qua family in the Ugaritic texts may be contrasted in a different manner with the extant Israelite texts. Whereas the language of council continues strongly in ancient Israel, the root metaphor of the divine family has been eclipsed; it also appears in the language of the deity's relations with human devotees (e.g., God as "father").[89] What generally remained is a system headed by the chief god, possibly his consort, lesser or subordinate deities (some as members of his retinue), astral bodies, and servant-messengers. In short, a single assembly with Yahweh as its head is the conceptual unity of Israelite polytheism. Because of the reduction of polytheism in this paradigm as well as its structure, scholars have called this conceptualization of Israelite divinity "henotheism." In this form of Israelite polytheism, there are no other competing major deities or assemblies, and the language of the divine family is at best only vestigial, for example, in a text such as Deuteronomy 32:8–9. The Israelite God is still regarded as father, not to divine family members but to Israel (Deuteronomy 32:6). In further reducing the members in the divine council, later Israelite tradition regarded this structure as a sort of monotheism. In other words, biblical Israel has been

shorn of such a divine family, leaving divinity to be imaged largely in terms of a streamlined bureaucracy headed by an absolute monarch. This later monotheism assumes that divinity is tantamount to an individual figure. The loss of middle tiers of the pantheon or of older generations of deities renders Yahweh's status utterly exceptional compared to the descriptions of Marduk or Ashur; these deities are understood as utterly powerful like Yahweh but hardly to the utter exclusion of other deities. With no divine family or middle tiers in the pantheon, the nature of Yahweh's power is without analogy. Even when Marduk's power is absolute, it is patterned on the prior model of Ea's power over Apsu, and Baal's own limited power is analogous to that of other figures such as Athtar whose power is less than his yet nonetheless comparable. Yahweh not only lacks peers within the pantheon; with his genealogy largely erased from the biblical record, he becomes a god not only without peer but also without precedent.

In conceptualization of divinity, the Ugaritic texts express a sense of divine singleness or unity through a series of family relationships. For ancient Ugarit, conceptual religious unity was expressed most strongly in the identification of the divine council as a divine family.[90] This family has inner connectedness not by virtue of a single deity but thanks to a single family of deities whose connectedness is marked by their familial relations. The strongest form of social identity at Ugarit was the family, which was marked by personal names with the form of *bn/bt* + PN (e.g., CAT 4.354). D. Pardee comments: "Generally speaking, the Ugaritians seem to have considered the patronym the most important element to be stated when identifying a person, for it is usually given and may indeed function as the only identifier (CTA 105), both masculine (*bn* PN "son of PN") and feminine (*bt* X "daughter of X"). Long lists, such as CTA 102, rarely omit the patronym."[91]

In the legal documents (such as 4.7, 4.356, and 4.357), land transfers from "the sons of X" to the "sons of Y." Therefore, we may offer a working hypothesis for the application of family language for the deities in the Ugaritic texts: given the prominent familial terminology in the Ugaritic administrative texts, the polytheistic family may have provided what would have been in Ugaritic culture the most "natural" means to express singleness and coherence in "divine society."

In early Israel, a similar family structure long obtained, probably through the period of the monarchy.[92] Throughout this period Israelite texts

attest to *naḥălâ* for family patrimony and other indicators of lineage maintenance. However, by the seventh century the lineage system had perhaps eroded, thanks to a variety of factors, including the deleterious effects of royal power on traditional patriarchal authority, the acquisition of traditional family lands by an emergent landed class and the devastating effects of warfare on the countryside.[93] The post-exilic structure called the *bêt ʾăbôt* ("fathers' house")—as opposed to the older and more traditional form known as the *bêt ʾāb* ("father's house")—has been thought to be a further witness to the decline of the traditional family structure.[94] Israelite texts dating to roughly the same period as the earliest clear expressions of monotheism (seventh and sixth centuries) proclaim that the righteousness of parents cannot save their children (Ezekiel 14:12–23). This change in perspective might be reflected also in the claims of sixth-century prophets (Jeremiah 31:29–30; Ezekiel 18, cf. 33:12–20) and deuteronomic literature (Deuteronomy 24:16)[95] that children would no longer be punished for the sins of the fathers.[96] We may therefore propose a working hypothesis for Judah: a culture with a diminished lineage system, one less embedded in traditional family patrimonies due to societal changes in the eighth through sixth centuries, might be more predisposed both to hold to individual human accountability for behavior and to see an individual deity accountable for the cosmos.[97] (This individual accountability at the human and divine levels may be viewed as concomitant developments.) Accordingly, later Israelite monotheism was denuded of the divine family, a development perhaps intelligible in light of Israel's weakening family lineages and patrimonies. This is only one dimension of Israelite monotheism, a complex matter that the last chapter of this book addresses in detail.

To end this chapter with Ugarit's polytheism, I might argue that the presentation of divinity provides a map of religious reality. If true, relational polytheism maps a reality marked by diversity linked by relationships at multiple levels of a hierarchy. The Ugaritic texts provide a massive strategy for articulating cohesion and unity in religious reality. For most Ugaritians there is little evidence for a "crisis of polytheism" (to cite J. C. de Moor's phrase);[98] rather, Ugaritic polytheism probably offered its adherents a far more integrated vision of reality than its modern students have ever imagined.[99] It may have been ultimately beyond human comprehension to

understand the ways of deities, but this religious sensibility did not simply lead to pessimism. Instead, the texts point to a conclusion that the ways of deities were mysterious and wondrous to behold. That very mystery is conveyed, yet not fully revealed, by the god Baal in his message to his sister Anat (CAT 1.3 III 14–31):

Place in the earth war,	*qryy b’arṣ mlḥmt*
Set in the dust love;	*št b‘prm ddym*
Pour peace amid the earth,	*sk šlm lkbd ’arṣ*
Tranquility amid the fields.	*’arbdd lkbd šdm*
You hasten!	*ḥšk*
You hurry!	*‘ṣk*
You rush!	*‘bṣk*
To me let your feet run,	*‘my p‘nk tlsmn*
To me let your legs race.	*‘my twtḥ ’išdk*
For I have a message I will tell you,	*dm rgm ’iṯ ly w’argmk*
A word, I will recount to you:	*hwt w ’aṯnyk*
Word of tree and whisper of stone,	*rgm ‘ṣ w lḫšt ’abn*
The converse of Heaven to Hell,	*t’ant šmm ‘m ’arṣ*
Of Deeps to the Stars.	*thmt ‘mn kbkbm*
I understand lightning the Heavens do not know,	*‘abn brq dl td’ šmm*
The word people do not know,	*rgm ltd‘ nšm*
And earth’s clans do not understand.	*wltbn hmlt ’arṣ*
Come and I will reveal it,	*’atm w’ank ’ibġyh*
In the midst of my mountain, Divine Sapan,	*btk ġry ’il ṣpn*
On the holy mount of my heritage,	*bqdš bġr nḥlty*
On the beautiful hill of my might.	*bn‘m bgb‘ tl’iyt*

The mystery, though not directly accessible to humans, is conveyed to them indirectly through the descriptions of how deities tell of such mysteries.

This poetic description provides a beauty of imagery and heralds the wondrous prospect of blessing that Baal is poised to bestow upon the cosmos, which by definition embraces human life. This vision, as well as the deities involved, is presented in highly personal terms. To appreciate this polytheistic vision of deities as persons, one must examine the personal features of divinity at Ugarit, the subject of the next major section of this book.

PART II
CHARACTERISTICS OF DIVINITY

5
The Traits of Deities

The previous chapters examine different groupings of divinity in Ugaritic literature, with a glance at the related motifs attested in biblical texts. This chapter collects and analyzes labels and statements about deities to answer the fundamental question of what a deity was considered to be. Ancient Middle Eastern literatures generalize about deities' characteristics and actions abstracted from religious tradition and experience ("second-order discourse"). We have already seen in chapter 3 how the Ugaritic texts stress the idea of the deities as a divine royal family bound by social hierarchy and family ties. This chapter examines four other common features of deities: (1) strength and size, (2) body and gender, (3) holiness, and (4) immorality.[1] I address each of these traits[2] in turn, first in Ugaritic literature and then in Israelite texts.

1. Strength and Size

> Note My might …
>
> Isaiah 33:13

The hand of a god denotes divine power, whether for good or for ill. The divine hand may offer blessing, such as the upraised hand of the seated figure of the Eltype god.[3] A figurine excavated from Ugarit also shows a female standing with an upraised hand; she is presumed to be a goddess, perhaps Athirat.[4] Alternatively, the divine hand may denote power exerted against enemies,[5] as with the hand of the goddess Anat against Aqhat (CAT

1.18 I 14; cf. 1.19 IV 58). The power (*yd*) of a god such as Mot (1.4 VIII 23, 1.6 II 25) also suggests a destructive sensibility, in keeping with his character. With a sense of doom, a letter from Ewari-sharri reports dire conditions to Pilsiyu (CAT: 2.10.11–13): "The 'hand of the gods' is here, for Death (here) is very strong" (*wyd 'ilm p kmtm 'z m'id*).[6] As D. Pardee observes, the phrase could refer generically to a god or the gods or to a specific god. Pardee suggests that this is a generic expression for "the hand of a god," "a divine hand" serving as an idiomatic expression for pestilence. Whether singular or plural, the generic interpretation of the phrase suggests that the image of the divine hand expressed divine strength. Even if the expression here refers to a particular deity, the expression is so widespread in ancient Middle Eastern literature that it seems applicable to many deities. Pardee's examples involve Nergal, Ishtar, Marduk, and Yahweh. So Numbers 11:23 asks about the power of Yahweh: "Is the hand of Yahweh too short?" Job 40:9 poses the issue of divine strength not in terms of Yahweh's hand, but the divine arm: "Do you have an arm like God's?" The "hand" applies to a number of deities and therefore can be viewed more broadly as a divine characteristic of strength.

Just as deities have superhuman strength, they also have superhuman scale.[7] Ugaritic deities are of superhuman size when they travel on foot. At times divinities travel across "a thousand fields, ten thousands hectares" or bow down in obeisance from such distances (CAT 1.3 VI 17–19; 1.4 V 24; 1.4 VIII 24–26). These descriptions evoke deities superhuman in size, striding across massive areas of earth. One case of El's supersize is sexual. The description of his penis, literally "hand,"[8] in CAT 1.23.33–35 implies his super-scale more generally:

> El's penis extends like the sea, *t'irkm yd 'il kym*
> Indeed, El's penis, like the flood. *wyd 'il kmdb*
> El's penis extends like the sea, *'ark yd 'il kym*
> Indeed, El's penis, like the flood. *wyd 'il kmdb*

The superhuman size of the god's body in general is not the point of the text. Instead, it is his love interest. Similarly, 1.4 IV 38–39 uses *yd* in a sexual manner. After Athirat's journey to El, he offers her food and drink and then more:

Or, does the love (*yd*) of El the King excite you,
The affection (*'ahbt*) of the Bull arouse you?

In these passages, clearly it is the god's penis and not the rest of his body emphasized as superhuman in scale. However, the god with the supersize penis was generally accordingly reckoned to be supersize as well.

Baal is also described as superhuman in size. CAT 1.101.1–3 describes Baal as large as his own mountain, Sapan. It has been suggested that this text "describes Baal's sitting on his throne in such a way so as to highlight his enormous size."[9] On the whole, the text seems to identify features of the god with those of his mountain, again implying the god's superhuman size.[10] In the Ugaritic Baal Cycle, Baal is the focus of expressions of strength and size. By implication, Baal's throne and footstool are of superhuman size, so large that not even the divine warrior Athtar can measure up: "his feet do not reach the footstool, his head does not reach the head-rest" (1.6 I 59–61). Baal has a palace that is superhuman in scale (1.4 VI 56–57). Like the distance traveled by deities, the palace covers "a thousand fields, ten thousands hectares." This concept of the divine palace as housing a superhuman-size god is replicated in Syrian temple architecture in the early first millennium. The meter-long footsteps carved into the portal and thresholds leading into the cult niche of the temple at 'Ain Dara suggest a huge deity.[11]

Superhuman divine size was also a part of Israel's cultural heritage. Early Israel understood its deity and cultic appurtenances devoted to the deity in superhuman terms.[12] According to 1 Kings 6:23–28 the throne built for Yahweh in the Temple's "Holy of Holies" or "backroom" (*dĕbîr*) was 10 cubits high and 10 cubits wide (ca. 5.3 meters square). Only a deity superhuman in scale could take a seat in such a throne. The Temple's courtyard items were also of unusually great size and, in the case of the tank and stands, significantly larger than the adduced ancient Middle Eastern parallels. The pillars, *yākîn* and *bō'az*, rose a total of 23 cubits (ca. 12.2 meters), consisting of a 5-cubit high capital atop an 18 cubit high stem. The immense tank, 10 cubits in diameter (ca. 5.3 meters), held nearly 38,000 liters. Including the height of the wheels and the band that supported the basin, each stand/"laver" measured 4 cubits square (ca. 2.1 meters) and 7 cubits high (ca. 3.7 meters). The basin supported by each of the 10 stands had a capacity of 40 baths (ca. 920 liters). Accordingly, the exaggerated size

of the structures in the Solomonic Temple courtyard suggests that they were intended not for human use but for the realm of the divine. The courtyard symbols perhaps conveyed Yahweh's triumphant enthronement. Upon defeating the chaotic forces of nature, as represented by "the Molten Sea," the god of the Israelites accepted the sacrificial offerings (perhaps of constituent groups or tribes represented by the stands) and entered the Temple bestowing blessings on the king and the people, as recorded on the pillars flanking the Temple entrance. Like Baal on his throne in his heavenly palace on Mount Sapan, Yahweh was perceived as assuming his superhuman throne in his palace in the "Holy of Holies," on his mountain, Jerusalem.

Several prophetic and Pentateuchal passages reflect on Yahweh's superhuman size. The vision of the prophet Isaiah draws on the notion of Yahweh's enthronement in the Jerusalem Temple (Isaiah 6:1) and assumes a deity superhuman in scale. The skirt of the divine robe is said to fill the Temple, again evoking the deity's massive scale.[13] Ezekiel 1 seems to build on the prophetic tradition of "seeing God," yet modifies it in substantial ways, by prescinding from identifying the figure as human in form and by minimizing the anthropomorphism of Isaiah 6:1. Ezekiel describes the "likeness" (*dĕmût*) of God as being "like (*kĕ*-) the appearance of a human." Here the anthropomorphism is presented as problematic (the text is heavily qualified), but it is recognized nonetheless. More pertinent here, the passage also locates the vision not in the Temple but on the firmament, the heavenly temple or palace, denoting super-earthly or cosmic size. Cosmic size and location suggest a spatial extension of the deity,[14] which may constitute the root of the notion of divine omnipresence, as observed by V. Hurowitz.[15] Such descriptions suggest not only the spatial extension of the god and hence his omnipresence; they sometimes include a description of the deity's four eyes, which, according to D. Schmandt-Besserat, denote divine omniscience.[16] She refers to the description of Marduk's four eyes and ears in Enuma Elish (I:95–98):

> Four were his eyes, four were his ears;
> When he moved his lips, fire blazed forth.
> Large were all four hearing organs,
> And the eyes, in like number, scanned all things.[17]

We might compare the vision of the transcendent in Ezekiel 1, which includes the four creatures, each with four faces. Here the number four denotes movement in four directions at the same time. These cosmic creatures respresent the power and character of the “divine presence” (verse 28), and we might conclude that their features denote both spatial extension and knowledge. In other Israelite texts, divine eyes can indicate watchfulness and knowledge of human activity (Psalms 5:6, 11:4; cf. 9:14, 10:14). The biblical writers and authors of other ancient Near Eastern texts described the divine person in anthropomorphic terms; later tradition defined specific divine traits (omnipresence, omniscience).

Like Isaiah 6 and Ezekiel 1, the Pentateuch reflects on “seeing God.” Exodus 24:9–11 straightforwardly informs readers that Moses and others saw God on Mount Sinai. Later transmitters of this tradition evidently thought this simple statement needed some delineation or clarification that would preclude potential simple-minded readings. Such an answer is provided in Exodus 33:18–23.[18] As the culmination of a dialogue between Yahweh and Moses, this passage shows marked theological reflection on Yahweh’s size and its implicit anthropomorphism. The leader of Israel asks his deity to let him see the divine face, as a mark of divine presence, protection, and approval. Although Moses has the stamp of divine approval, human experience of the divine is limited. Yahweh offers Moses the experience of seeing the divine “back,” which at once serves to express Yahweh’s support of Moses and to delimit human experience of the divine. Yahweh instructs Moses in 33:21–23: “See, there is a place near Me. Station yourself on the rock and, as My Presence passes by, I will put you in a cleft of the rock and shield you with My hand until I have passed by. Then I will take My hand away and you will see My back; but My face must not be seen.” The divine hand suggests a superhuman appendage that can cover a human being, further pointing to a superhuman sized deity. To judge from these biblical passages, this idea of divine scale may have been quite widespread. The description of the divine throne in the Temple especially implies a general view, for the throne was a public symbol of Yahweh. Isaiah’s vision evidently reflects the widespread perception that Yahweh looked human but was superhuman in size. Even as the theological reflection of Exodus 33 limits what humans can experience of the divine, the motif of the divine hand in this passage recalls the older Levantine

tradition of describing divinities of superhuman scale. All of these visionary descriptions imply not only great size but also body and gender.

2. Body and Gender

God is love.

1 John 4:8

In general, the deities engage in human activities that presuppose human form; these include ritualized behaviors (lamentation, music, intercession), social activity (feasts, hunting, duties of the faithful son, sex), and other human experience (dreams). As in the ancient Middle East,[19] deities in Ugaritic sources typically are marked for sex or gender. Ugaritic iconography is central here, presenting deities mainly in human form. Most textual presentations of deities assume a human form; deities walk, talk, eat, drink, sit on thrones in manners that presuppose human form. It is not always clear whether human or theriomorphic form is involved in sexual relations. On the one hand, as noted in the previous section, old El is considered to have tremendous sexual capacity; his "hand" (*yd*), a well-known euphemism for penis, is said to be as long as the cosmic sea (CAT 1.23.34–35). On the other hand, in one of the more prodigious sexual feats attested from the ancient Middle East, Baal is said to make love with a heifer (*prt*), mounting and having intercourse with her "sixty-six, seventy-seven times" (CAT 1.5 V 18–21). Accordingly, the scene seems to assume that Baal manifests his theriomorphic presentation as bull-calf.[20] He also engages in similar sexual relations in 1.11.[21] Another major exception involves the presentation of Anat in the form of a bird, her theriomorphic presentation or "attribute animal."[22] Finally, as noted in chapter 1, Bull El is a standard title for the divine patriarch in the Ugaritic literary texts, and his

iconography adorns him with horns, perhaps reflecting this theriomorphic identification.

Anthropomorphism is quite the norm for descriptions of Ugaritic deities, so much so that J. C. de Moor suggests that "the gods of Ugarit had become too human."[23] De Moor deduces an apparent "crisis" in Ugaritic polytheism from the apparent lack of respect shown to El by Anat (CAT 1.18 I 6–14): "Thus even the head of the pantheon is reduced to the size of man."[24] There are two claims embedded in this view: (1) Anat's disrespect of El in this scene is emblematic of a general situation within the pantheon; and (2) one might interpret such a putative disrespect as indicative of an attitude or view held by the text's author and audience about Ugaritic polytheism. The first point is certainly problematic. Indeed, Anat is the exception to the divine model of respect shown to El.[25] The second point is equally problematic. It represents a psychological reading of the text's audience. Without more explicit evidence, this approach cannot support a claim about a crisis in polytheism, in which the gods had become "too human."[26]

It is commonly thought that anthropomorphism is a general ancient Middle Eastern trait that Israel eventually discarded, unlike the rest of the region. This characterization is inaccurate for both Israel and the rest of the ancient Middle East. Anthropomorphism was subject to various sorts of theological reflection in Mesopotamia and Ugarit. Some texts interpret other deities in terms of features of Marduk, the great Babylonian god. (The phenomenon is not confined to this god.) A few first millennium Mesopotamian texts equate the parts of the bodies of particular deities (Marduk, Ninurta, Ishtar) with other deities, indicating that these individual deities literally "embody" the others.[27] For example, one hymn to Ninurta construes him in the following terms:

> O lord, your face is the sun god, your hair, Aya,
> Your eyes, o lord, are Enlil and Ninlil… [28]

Another text identifies different deities as qualities of Marduk; for example, "Shamash is the justice of Marduk."[29] Somewhat similarly, various deities are described as different aspects of Marduk:

Urash (is)	Marduk of planting.
Lugalidda (is)	Marduk of the abyss.
Ninurta (is)	Marduk of the pickaxe.
Nergal (is)	Marduk of battle.
Zababa (is)	Marduk of warfare.
Enlil (is)	Marduk of lordship and consultations.
Nabû (is)	Marduk of accounting.
Sîn (is)	Marduk who lights up the night.
Shamash (is)	Marduk of justice.
Adad (is)	Marduk of rain.
Tishpak (is)	Marduk of troops.
Great Anu (is)	Marduk of …
Shuqamuna (is)	Marduk of the container.
[ ] (is)	Marduk of everything.[30]

Finally, the end of Enuma Elish attributes to Marduk fifty names, many belonging to other deities. In these cases Mesopotamian descriptions of the divine do not avoid anthropomorphic language. Instead, they heighten the anthropomorphism to make the deity transcend the basic analogy between humans and deities which the traditional anthropomorphism. In this way anthropomorphism is both affirmed and relativized. Such texts create a new form of anthropomorphism, what R. S. Hendel insightfully calls "transcendent anthropomorphism."[31] Ugarit does not provide much material in this vein, but CAT 1.101, noted in the previous section, is pertinent. This text describes Baal's body in terms drawn from nature and the topography of his mountain,[32] extending the god's size to cosmic proportions. The effect is to relativize the usual sort of anthropomorphism.

Like the Mesopotamian and Ugaritic material, Israelite texts show complex usage of anthropomorphism. To be sure, the Bible often avoids or modifies anthropomorphism.[33] Yet a tremendous amount of biblical literature. Passages assigned in traditional source-criticism to the so-called "Jahwist source," for example, contain a number of highly anthropomorphic statements about Yahweh. Genesis 3:8–9 presents Yahweh walking in the garden of Eden and then asking the man where he is, which on a plain

reading implies that Yahweh does not know everything. Genesis 6:6 represents Yahweh as a regretful figure whose heart is saddened by the moral downturn of humans (cf. 1 Samuel 15:29). Genesis 8:21 describes Yahweh smelling the sacrifice that Noah offered to him. It may be that in the time of this so-called Jahwist "source" (dated by scholars variously from the tenth to the sixth centuries B.C.),[34] Yahweh was generally regarded in anthropomorphic terms. Quite striking as well is the anthropomorphism of the weeping Yahweh in Jeremiah 12:7–13.[35] As noted in the preceding section, Isaiah 6 clearly represents the vision of an enthroned anthropomorphic god. Recently scholars have suggested that this portrait includes the stronger anthropomorphism of referring to divine sexual parts. According to Isaiah 6:1, the prophet "saw Yahweh sitting [enthroned] on a throne high and exalted, with 'his train' (*šûlāyw*) filling the Temple." Instead of seeing here the "train" of the divine garment, L. Eslinger takes the word **šûl* in the first verse of Isaiah 6 as the divine genitalia.[36] Despite problems with this interpretation, it is not out of the realm of the possible.[37] M. H. Pope has offered an equally graphic interpretation of Ezekiel 16. He suggests that Ezekiel 16:8–14 recounts Yahweh's courtship, marriage, and sexual relations with Jerusalem, personified as a young woman.[38] God recounts their relationship in first person speech: "Now when I passed you …, your time was the time of love, I spread my cloak over you and covered your nakedness … and entered into a covenant with you … Then I washed you with water, indeed cleaned your blood from you…." Pope interprets the covering of the woman in her time of love as sexual relations, the covenant as marriage, and the blood as the traditional signal for the loss of female virginity. Accordingly, Pope reads this divine speech as a description of sexual relations and marriage on the part of Yahweh and Jerusalem. These explicit interpretations of Yahweh's sexual genitalia and behavior remain highly controversial. Equally significant is the rarity of biblical passages that lend themselves to such possibilities. Even if one were to accept the interpretations of Eslinger and Pope, still only two passages are involved.

Israelite anthropomorphism hardly ends with the monarchy. Post-exilic literature, where anthropomorphism might be less expected, is in fact replete with it. Later works belonging even to the priestly tradition continued to transmit anthropomorphic imagery. Post-exilic priestly texts, such as Zechariah 3, attest to the divine council. Zechariah 3:7 includes the

high priest in the ranks of the celestial courts (cf. Zechariah 12:8). Post-exilic apocalyptic circles (Daniel 7) also continued anthropomorphic renderings of Yahweh and the divine council (Daniel 7; cf. Zechariah 14:4; 1 Enoch 14). Indeed, the apocalyptic genre provided fertile ground for mythic material. This genre more than any other expressed mythic content in dramatic form. All of these biblical passages as well as many others (such as Isaiah 27:1) reflect the continuation of old mythic material in post-exilic Israelite tradition. Furthermore, nonbiblical Jewish literature from the fourth to the second centuries, including 1 Enoch and the Book of Jubilees, represents an additional source of anthropomorphic speculation. The anthropomorphic language of Yahweh, other divine beings, and their heavenly realms never disappeared from Israel. Accordingly, it may be regarded as quite traditional in ancient Israel.

By the same token, the archaeological and textual record may point to an anti-anthropomorphic reaction in ancient Israel as well. Because of the relative lack of divine iconography in Israel, some scholars have claimed that Israel was essentially aniconic.[39] Theological reflections of various sorts demonstrate a concomitant move away from traditional anthropomorphism. Psalm 50:8–15 criticizes the idea that Yahweh actually consumes the offered sacrifices and evidently reflects the more popular conception. The priestly avoidance of anthropomorphism indicates that divine corporeality was a general expectation of what a deity was. The priestly texts of Numbers show some tension between the older anthropomorphism of Israel and its own sensibilities about divine "body language." For example, the priestly blessing of Numbers 6:24–26 twice refers to the "face" of God and once to the lighting of the divine face, yet God appears to Moses in a disembodied form in Numbers 7:89 as a voice having itself speak (*haqqôl middābbēr*). The anthropomorphic language can be retained in the priestly tradition; in these contexts it is perhaps regarded as expressions of blessing and presence and not a matter of some experience of the divine face.

Another priestly strategy about such anthropomorphism may be seen at work in the description of the human person's creation in Genesis 1. As I noted in the previous section, the prophetic vision of the divine assembly of Isaiah 6:1 renders Yahweh after the fashion of an enthroned human king, and Ezekiel 1:26 modifies this vision. Like Isaiah 6 and Ezekiel 1, Genesis 1:26–28 utilizes the traditional language of the divine council, as manifest

for example in the use of the first common plural for divine speech in Genesis 1:26, a feature found also in Genesis 3:22, 11:7, and Isaiah 6:8. The use of *dĕmût*, "likeness," and *selem*, "image,"[40] in Genesis 1:26–28 presupposes the vision of the anthropomorphic god yet reduces the anthropomorphism radically compared to Ezekiel 1:26. In fact, Genesis 1 achieves the opposite effect of Ezekiel 1:26. Whereas Ezekiel 1:26 conveys the prophet's vision of Yahweh in the likeness of the human person, Genesis 1 presents a vision of the human person in the likeness of the Divine. Rather than reducing Yahweh to human terms through an anthropomorphic portrait, Genesis 1:26–28 magnifies the human person in divine terms. What is possibly an old poetic piece embedded in 1:27 has been understood as implying an androgynous God, as the human person in the divine image is male and female.[41] Unfortunately, the examples claimed for divine androgyny in Ugaritic and other ancient Middle Eastern texts are unconvincing; it would be more persuasive to view this language at most as vestigial from an older form of Yahwistic cult that acknowledged Asherah as Yahweh's consort, hence male and female.[42] However, such a sensibility about the divine image could only be imputed to the pre-priestly poetic piece thought to underlie Genesis 1:27, for the so-called priestly tradition represented in Genesis 1 did not understand its God in such ditheistic terms.[43] In its present context in Genesis 1:26–28, any anthropomorphic background is at most muted. Indeed, Genesis 1 draws on the older visionary tradition of the anthropomorphic deity but ultimately transcends it, as it omits any description of the divine. In context, the priestly understanding of the divine image would appear to pose an analogy between God as creator and the first human couple as creators, as the following verse 28 commands them to procreate. Anthropomorphism was evidently quite popular in ancient Israel. Theological expressions in the biblical texts occasionally construed the anthropomorphism in terms differing from the traditional discourse of analogy between deities and humans.

Divine anthropomorphism and the analogy it implies with human nature involve complex historical issues when they involve divine gender roles. Biblical texts show a variety of strategies in handling divine gender.[44] In Deuteronomy 32: 18, Psalm 22:9–10, and Isaiah 46:3, 66:9, and 13, Yahweh was not considered female, either separately or in conjunction with

male language for Yahweh. Rather, these passages treat Yahweh as a male deity to whom female imagery was occasionally attributed on a metaphorical level. We can also see the continued use of paternal language applied to Yahweh directly, although it is not very frequent (Deuteronomy 32:6; Jeremiah 3:4, 19; 31:9; Isaiah 63:16, 64:7 [E 8]; Malachi 1:6, 2:10; Wisdom of Solomon 14:3; Ben Sira 23:1, 4; cf. Exodus 4:22; Hosea 11:1). Other images of king, redeemer, warrior, and so on, are considerably more widespread in the Bible and deuterocanonical works. If Yahweh was considered essentially a male deity, then biblical passages with female imagery for Yahweh may have represented an expansion of the Israelite understanding of Yahweh. Such innovation may best explain not only the female images for the Divine in Second Isaiah (Isaiah 42:14; 46:3; 49:14–15; cf. 45:10–11; 66:9, 13)[45] but also the divine lamentation in Jeremiah 12:7–13 and other verses, an anthropomorphic portrait best compared in Mesopotamian literature with the goddess mourning the destroyed city.[46] "Monotheism" in "Second Isaiah" (Isaiah 40–55)[47] in no way precludes male or female language for Yahweh. Accordingly, Yahweh both encompasses the characteristics and values expressed through gendered metaphors and transcends the categories of sexuality (cf. Job 38:28–29): monotheism is beyond sexuality yet nonetheless expressed through it.

Attribution of female roles to gods was by no means an Israelite innovation.[48] Indeed, even specifically female roles for gods (and vice versa?) were posited in proper names, such as Ugaritic *ʻṯtr'um*, "Athtar is mother" (cf. *ʻṯtr'ab*, "Athtar is father"); *'il'nt*, "Anat is (a) god;" Akkadian *ummi-šamaš*, "Shamash is my mother," and *a-da-nu-um-mu*, "lord is mother." Deities in ancient Middle Eastern prayers likewise convey the combination of gender roles. Two examples suffice. In his prayer to Gatumdug, the city-goddess of Lagash, Gudea says:

> I have no mother—you are my mother,
> I have no father—you are my father,
> You implanted in the womb the germ of me,
> gave birth to me from out of the vulva (too),
> Sweet, O Gatumdug, is your holy name!

The poem combines parental imagery of mother and father. The same juxtaposition appears to underlie Psalm 27:10. Compared to Gudea's

prayer, this biblical verse suggests that Yahweh assumes the role of father and mother, thereby affirming divine care. A second millennium Hittite prayer likewise attributes both parental roles to Istanu, a sun god: “Thou, Istanu, art father and mother of the oppressed, the lonely (and the) bereaved person.” These examples illustrate the larger ancient Middle Eastern background to the combination of parental roles for Yahweh. They also show that such a combination was already ancient in Middle Eastern literature. Ancient Middle Eastern texts indicate that female metaphors do not imply a female status for a male god. Rather, according to ancient Middle Eastern categories, a male god could be accorded female imagery without implying that he was considered both male and female. The inverse is true as well: male metaphors could be attributed to a goddess without meaning that the goddess was thought to be both female and male. Female imagery could have been attributed to Yahweh without any influence from any goddess. Ancient Middle Eastern literature, including the Bible, did not maintain a strict correlation between gods and putatively male imagery and roles or between goddesses and putatively female imagery and roles. Divine discourse is more elastic, in part perhaps because deities are not human beings.

Monotheistic Yahwism resembled neither a Greek philosophical notion of Deity as nonsexual Being nor some type of divine bisexuality. Instead, Israelite society perceived Yahweh primarily as a god, embodying traits or values expressed by gendered metaphors yet transcending such particular renderings. It is unnecessary and it is not supported by any biblical text to argue that monotheistic Yahweh involved either androgyny[49] or homoeroticism.[50] Such views appear eisegetical and seem based on a wooden reading of ancient gender roles as applied to divinities (for theological reasons regarded by B. S. Childs as “the worse kind of literalism”[51]). Many, if not most, of the Israelite gendered presentations of Yahweh are not so concerned with divine sexuality. So T. Frymer-Kensky comments on the sexuality of the monotheistic Yahweh: “God is not a sexual male, and therefore even the erotic metaphor of passion reveals a lack of physicality. God is not imaged in erotic terms and sexuality was simply not part of the divine order.”[52] Instead, the issue is divine-human interpersonal relations, as rightly noted by R. S. Hendel.[53]

One may rightly ask about further nuances in the maleness of the divine body. Isaiah sees God at the outset of divine revelation made to the prophet (Isaiah 6). Ezekiel 1's complex, perhaps even seemingly bizarre, rendering of the divine is aimed at prophetic revelation of a god beyond human comprehension. Moses and others see God in Exodus 24:9–11 in order to describe community with the divine, and Exodus 33–34 shows a visionary experience that at once reveals and conceals God to Moses. There is no hint here of sexuality. Indeed, divine sexual relations or some other explicit marker of sexuality is absent from all of these passages, in contrast to the Ugaritic texts on divine sexuality. The biblical texts concern revelation, authority, and a divine capacity and desire to help by revealing the divine will. Revelation is in part a matter of divine authority,[54] which divine maleness serves to convey (as divine authority is expressed by the leading male of the divine social unit, the divine family). As chapter 3 illustrates, the model of divinity is patriarchal, and we may then identify in divine maleness a sensibility of authority and a capacity and will to help.

Given the evidence that Yahweh's maleness does not convey sexuality per se, but personal divine communication, authority, concern, and dedication (perhaps we might say even accessibility to human emotion), it is then hardly surprising that the Bible rarely, if ever, describes divine sexual relations or genitalia. A brief survey of divine body parts in the Bible may help to explain the point further. Different body parts serve commonly as parts for the whole (*pars pro toto*) in order to denote divine attitudes (human body parts show analogous uses of *pars pro toto* to denote various attitudes). Divine eyes denote watchfulness and knowledge of human activity (Psalms 5:6, 11:4; cf. 9:14, 10:14); the divine hand and arm power and strength (Psalm 10:12); the divine nose anger (Psalms 2:11, 18:9); the divine hands and fingers creation (Psalm 8:4, 7) or trapping (Psalm 9:17), the divine ears a capacity to receive human prayer (see Psalm 10:17; cf. 5:2), and the divine face access or presence (Psalms 17:15, 42:3) and blessing (Psalm 4:7), as well as absence (Psalm 10:11). Some divine actions also presuppose a familiarity with divine body language: divine sitting denotes enthronement (Psalm 2:4; cf. 9:5, 8), and divine standing a lack of action or movement toward (i.e., on behalf of) the speaker (Psalm 10:1). We might think that, in contrast, divine genitalia denote no divine action or attitude toward human beings. Divine fatherhood can be expressed to denote patronage or support (see Psalm 2:7), but the body language of

genitalia rarely, if ever, comes into play. In sum, the monotheistic picture of Yahweh, the male god without a consort, dominated biblical discourse for the divine, as far as the sources indicate (assuming that these sources correspond reasonably accurately with historical reality). At the same time, male language for Yahweh accompanied less anthropomorphic descriptions for the deity and metaphors occasionally including female imagery or combining it with male imagery.

The value of anthropomorphism deserves fuller consideration. In some contexts it could convey the personal aspects of divinity and its accessibility[55] in the face of a general notion of divine transcendence. If divinity is analogous to humanity, then divinity is perceptible as personal, as the paramount paradigm of personal relations remains human-human interaction. To regard anthropomorphism as little more than a figurative ornament expressing divine-human communication and interaction diminishes the religious expression and experience of the Israelites and other West Semitic peoples. These ancients did not develop abstract metaphysical systems involving philosophical logic. Instead, they represented their theology, their religious reality, through pictures of divinity in narratives and poetry. Even the priestly and deuteronomic works do not entirely dismiss anthropomorphic language. Instead, these sources offer a minimal anthropomorphism designed to modify people's understanding of God. Accordingly, if adherents of biblical tradition wish to appropriate their "God-talk" from the Bible, then they must acknowledge the biblical tension between "maximal" and minimal anthropomorphism, and ultimately its subordination to the transcendent reality represented by Israelite monotheism. Biblical monotheism is expressed through anthropomorphism, through gendered language, yet it relativizes anthropomorphism, perhaps even subordinates it to the divine one known only by the name of Yahweh. However, this view of anthropomorphism and divine sexuality in the Bible may have resulted at least in part from a de facto omission of older, more sexually explicit descriptions of the divine, as suggested in the following discussion of holiness.

3. Holiness

God is light.

1 John 1:5

Deities were generally marked for holiness (*qdš*), as can be inferred from the general designation of deities as "holy ones."[56] The Ugaritic texts refer to the deities collectively as "sons of *qdš*" (CAT 1.2 I 20–21, 38; 1.17 I 3, 8, 10–11, 13, 22; cf. 1.2 III 19–20), literally "sons of holiness" or "sons of the holy one."[57] A Phoenician inscription (KAI 4:4–5) refers to the deities in general as the "holy ones" (*qdšm*). Holiness was also regarded as a special attribute of a particular deity. Ugaritic texts refer to *lṯpn wqdš*. The first is the god El's title, "Beneficent," but the second title has been imputed either to El or his wife Athirat.[58] However, one might expect the feminine ending (**qdšt*) if the title belonged to the goddess in Ugaritic literature (see note 42 on page 237). In any case, the title "holy one," belongs to one deity or the other. Athirat's servant bears the compound name, Qdš w-'Amrr. Here again the first part of this double-name means "Holy One."

In the West Semitic world, holiness was a general characteristic adhering to material realia and social processes in shrines,[59] including the appearance of divinity (theophany). By definition, divinity is observable in some sense in these places. They are marked and demarcated for holiness, and divinity is perceived to partake fully of holiness. In turn, the presence of divinity imparts holiness to those places. From a cultic perspective holiness of deities is a matter of liturgical experience and expression: deities are known in holy places and both are considered holy. By extension, deities' sanctuaries as well as their dwellings on mountains partake of holiness. So Baal's mountain, Mount Sapan, is called "holy" (CAT 1.3 III 30; 1.16 I 7) as well as "divine" (1.3 III 29). Accordingly, temples, as well as their mythic expressions as sacred garden, participate in the deity's holiness.[60]

In a sense, to call deities "holy ones" may seem to constitute a sort of tautology, but further study of the words for "holy" and "holiness" reveals the root metaphor underlying the idea of divine holiness. One of the main

Akkadian terms for "holy," *ellu*, denotes not only holiness but also cleanliness[61] in its profane sense as not simply the absence of dirt but also brilliance and luminosity (cf. English "sparkling clean"). So the Ugaritic word, *ṯhr* refers to brilliance and luminosity (cf. *ṭāhōr* in Exodus 24:10).[62] The idea of cultic holiness (purity) then is based analogically on the profane notion of cleanliness, both in its negative connotation as free of dirt and in its positive connotation of brilliance.[63] Both connotations are germane to the experience of deities: theophanies characteristically transpire in places regarded as clean from a cultic perspective, spaces ideally uncontaminated by human sin or impurity; theophanies are often marked by the brilliance of the deity's presence.

Descriptions of the experience of the divine holiness yield further information. Divine holiness in cult (theophany, literally "divine appearance") is experienced and expressed as shaking (Isaiah 6:4) and other physical effects that induce awe and fear in humans. As CAT 1.4 VII indicates, the presence of a major deity induces the same reaction of dread and fear. Commonly students of ancient religion Rave understood this experience of the holy in terms of awe and fear. In the modern Western discussion of religion, this idea dates to the theologian Rudolf Otto, who characterized this confrontation with the divine as *mysterium tremendum et fascinosum*. The opening page of *Treasures of Darkness*, a seminal study of Mesopotamian religion by the great Sumerologist Thorkild Jacobsen, follows Otto explicitly:

> Basic to all religion—and so also to ancient Mesopotamian religion—is, we believe, a unique experience with power not of this world. Rudolph Otto called this confrontation "Numinous" and analyzed it as the experience of *mysterium tremendum et fascinosum*, a confrontation with a "Wholly Other" outside of normal experience and indescribable in its terms: terrifying, ranging from sheer demonic dread through awe to sublime majesty; and fascinating, with its irresistable attraction, demanding unconditional allegiance. It is the positive human response to this experience in thought (myth and theology) and action (cult and worship) that constitutes religion.[64]

A similar view of the divinity as numinous has been forwarded recently by R. de Vito:

> [W]e must reckon with the possibility of another use of *ilum* in the onomasticon, one articulating the human response to the numinous qualities of a temple (e.g., Meslam), certain localities (e.g., Apih), or a deceased loved one (e.g., *abum*, *aḫum*). The numinous aspect of these phenomena is expressed in the word *ilum* "god": "Meslam-is-(indeed)-God," "(The)-City-is-(indeed)-God," "Apiḫ-is-(indeed)-God," "(The-deceased)-Father/Brother-is-(indeed)-God." But what does "god" mean in this usage?
>
> While *Ersatznamen* [replacement names] of this type do not predate the Early Sargonic period, Fara period names show that the use of *ilum* in this sense is a possibility present from the beginning. Expressing an "earlier," more fundamental level of meaning, in these names *ilum* points beyond particular divine beings, such as Šamaš, to a realm of power incommensurate with the human and to which the gods, together as a class, belong. The very use of the determinative *dinger*, a lexical classifier, shows that the scribes of Mesopotamia engaged in a systematic effort to classify the phenomena of their world at a quite early date. Yet this should not obscure the fact that the recognition of the existence of a whole category of beings as distinct "gods" is a logical advance dependent upon a prior awareness of the underlying reality of the category, a dimension or realm of divine power, which is "more" than the particular gods who substantiate it.[65]

This notion of the divine holiness and its associated numinous characteristic are well attested in the Bible and other Middle Eastern texts.[66] The "holy voice" of the deity, whether belonging to Yahweh or Baal, signals a theophany that may wreak destruction (Psalm 29) or revelation (as in Numbers 7:89) and induces flight and fear on the part of the god's enemies (CAT 1.4 VII 29). Similarly, sanctuaries can be regarded as awe-inspiring, like the deities who own and inhabit them.[67]

Jacobsen and others make the experience of Otto's *mysterium* the cornerstone for understanding religion or the divine. However, qualification is warranted. Because such experience is mediated by a human experience and language, it is not by definition entirely "Wholly Other." It may be recognizable in the natural effects of the rain-storm or dream experience at night. In these experiences the completely "other" partakes of the here and now. Moreover, as the opening parts of this section indicate, divinity

throughout the ancient Middle East is also experienced personally and not as entirely other. Indeed, anthropomorphism is a hallmark of the classic deities of the pantheon as opposed to divine monsters in many Mesopotamian myths of primordial conflict.[68] The view of ancient Middle Eastern religion (and consequently divinity) fostered by Otto's notion of *mysterium* captures one side of the perception of the divine. The *mysterium* makes its appearance in the terrestrial realm, in nature, dreams, and other purely "this worldly" locales. K. van der Toorn comments:

> One would be wrong, however, to suppose that the dichotomy between the material and the spiritual world was as natural to them as it seems to us. Occasional doubts could not rob them of the conviction that the gods dwelled in the same universe as they did and were to a large extent subject to the same forces and moved by the same reasonings.
>
> Our uneasiness stems partly from the opposition of the reality as directly perceived by the senses and a spiritual reality only reached by faith or some sort of mystical experience. This was not how the Mesopotamians conceived of their gods. To them they were the personifications of various aspects of nature and culture, very much present in daily experience.[69]

The *mysterium* was simultaneously "other" and not "other," and this combination helps make it, to repeat Otto's expression, *tremendum et fascinosum*.[70]

The "this-worldly" quality of holiness is not merely a theoretical matter. Deities and their holiness are not only served by their servants, priests, and kings; deities also serve priests and kings, and, by definition, the public sacred spaces serve both as well. The holiness of both deities and the public places where they were celebrated is not only a vague, ill-defined experience of the numinous (although it may have seemed to be that as well). As S. Guthrie has emphasized, holiness delimits and expresses the power of those who maintain such spaces.[71] Guthrie stresses that in Israel holiness attaches to the elite and the monarch; the point may apply as well to Ugarit. He notes how the radiance of the deity became associated with the power of the king: "Holiness here is ideology, and designed to serve a particular social system."[72] In his discussion of sacred order, W. E. Paden

comments in a related vein: “Power and order are intertwined and mutually conditioning elements of religious world-building. Each is a premise of the other. The gods presuppose the very system which invests them with their status as gods, even though the world-order may itself be perceived as a creation of the gods.”[73] Thus, the holiness of a place expressed altogether this worldly relationship of power and status.

Israelite texts also mention the holy beings collectively as a divine body or assembly led by Yahweh, their king. Psalm 89:6–8 praises Yahweh:

> So the heavens praise Your wonders, O Yahweh
> Your fidelity also in the assembly of the Holy Ones.
> For who in the heavens can be compared to Yahweh,
> Who among the sons of god can be likened to Yahweh
> A god dreaded in the great council of the Holy Ones,
> And feared of all them that are round him?

The initial sentence characterizes the heavenly beings as Holy Ones assembled in a congregation (**qāhāl*), similar to a human congregation. The first part of the question identifies the heavenly hosts as “sons of god,” an expression for divine beings. The second part of the question describes this body as an assembly or council of holy ones collected around Yahweh. Zechariah 14:5 assumes a similar view of Yahweh’s military hosts: “And Yahweh my god will come, with all holy ones with You.”

Holiness in ancient Israel developed “apartness,” a further nuance.[74] The origins of this particular connotation are unclear, but they might be assigned to the development of priestly notions about separation of the holy from the profane, represented systematically, for example, in Genesis 1. The Israelite priesthood apparently came to define divine holiness in even more specific terms as a separation from death and sex. The different priestly lines during this period found their own primary images of Yahweh (whether older or newer ones) incompatible with some of the older images, so they chose not to preserve them and thereby functionally censored them. Indeed, the presentation of Yahweh generally as sexless and unrelated to the realm of death would appear to have been produced precisely by a priesthood whose central notion of Yahweh as holy would view this deity as fully removed from realms of impurity, specifically, sex and death.[75] Several prohibitions govern the impurity of sexuality[76] and death (Numbers

19:11, 14–19; 31:19). Priests were restricted in their selection of a spouse specifically because of the issue of holiness (Leviticus 21:7). Priests were specially restricted also in their contact with the dead.[77] Unlike the other priests, the chief priest is even more restricted, not being permitted contact with any dead (Leviticus 21:11–12) and permitted to choose as a wife only a woman who has not yet had children (*bĕtûlâ*, Leviticus 21:13–14). The chief priest is identified with the holiness of the divine sanctuary.[78] Holier than the holy of holies, the deity of the priesthood would have epitomized the fullest possibilities of sacredness and separation in terms of sexuality and death. It may be that older mythologies involving divine death and sex did not survive, not only because the priesthood would have actively censored such views (although such a situation is theoretically possible) but also because such mythologies did not cohere with the priestly tradition's normative understanding of the divine (nor the deuteronomic view of the divine), and so they fell into disuse in these traditions.[79]

4. Immortality

> For once I myself saw with my own eyes
> the Sibyl at Cumae hanging in a cage,
> and when the boys said to her,
> "Sibyl what do you want?"
> she replied, "I want to die."
>
> T. S. Eliot, *The Waste Land*

With these words from Petronius's *Satyricon* T. S. Eliot prefaced his now famous poem *The Waste Land*. From the perspective of humanity, death may seem a great personal destruction to be avoided; from the immortal Sibyl's viewpoint, nondeath was an inescapable fate, an undeniable fact. Some ancient Middle Eastern statements contrast divine timelessness with humal mortality, for humanity cannot avoid death, except in the most

exceptional of cases. One fundamental property of deities is their continuity in the cosmos, whether in the form of eternal life or divine death.

If we glance briefly at some Mesopotamian texts, we see expressions of the view that deities are free from death. A classic expression derives from a well-known passage from Gilgamesh (OB version):

> When the gods created humanity,
> They assigned death to humanity,
> But life they kept in their own hands.[80]

And some lines later:

> Who, my friend can scale heaven?
> Only the gods [live] forever under the sun.
> As for humanity, their days are numbered,
> Whatever they do is wind.[81]

According to M. G. Kovacs,[82] here Gilgamesh recites proverbs to his dear friend Enkidu about human mortality. (We may be reminded of the motifs of "under the sun" and human pursuits as "wind" in Ecclesiastes.) In contrast, the gods enjoy nondeath, that is, uninterrupted life.[83] As a later section of the Gilgamesh reminds readers, death is indeed the fate of humanity.[84] Even for Gilgamesh, regarded as two-thirds divine and one-third human,[85] death is the ultimate end. Or, to cite a Hittite writer: "Life is bound up with death, and death is bound up with life. Mortal man doesn't live forever. The days of his life are numbered."[86] In sum, death separates humanity from divinity.

The Ugaritic texts generally assume the same concept of divine deathlessness. Individual deities may be called *ʿlm*, "eternal." Shapshu simply bears the title "eternal" (*ʿlm*, 2.42.7), Rapiu is called "eternal king" (*mlk ʿlm*,[87] 1.108.1, 21, 22), and El's wisdom is labeled "for eternity" (*ʿd ʿlm*, 1.3 V 31; 1.4 IV 42). Keret's son also expresses the viewpoint that gods are not expected to die (1.16 I 14–23. II 36–44).[88] Anat's promise to Aqhat to make him eternal like the gods (1.17 V 28–29) is rejected by him as implausible:[89]

I'll have you count years with Baal, *'ašsprk 'm b'l šnt*
Count months with El's offspring. *'m bn 'il*[90] *tspr yṯhm*

Finally, deities are timeless because they do not age in these texts. They are, in a sense, frozen in time, whether they are presented as younger, like Baal and Anat, or older, like El and Athirat.

Divine death then is not a norm in ancient literatures. However, J. Z. Smith provides a helpful qualification to modern presuppositions about the eternal life of deities:

> Despite the shock this fact may deal to modern Western religious sensibilities, it is commonplace within the history of religions that immortality is not a prime characteristic of divinity: gods die. Nor is the concomitant of omnipresence a widespread requisite; gods disappear. The putative category of dying and rising deities thus takes its place within the larger category of dying gods and the even larger category of disappearing deities. Some of these divine figures simply disappear; some disappear only to return in the near or distant future; some disappear and reappear with monotonous frequency.[91]

The force of Smith's critique cannot be denied; indeed, to be dead means to be defunct. Smith's generalization here might divert attention from the differences regarding divine death in various regions.

In Ugarit, even deities who are said to be dead are not permanently so. Apparently decimated by Anat in 1.6 II Mot re-appears on the scene in 1.6 VI and resumes his conflict with Baal. Yamm, too, is said to be dead (1.2 IV 32, 34) after his defeat and apparent dismemberment at Baal's hands, yet he seems to re-appear, possibly for renewed conflict with his nemesis, in the broken opening of 1.4 VII.[92] The parade example of a divine death in the Ugaritic texts is Baal himself. Of course, like Mot and perhaps Yamm, Baal does not remain permanently dead, for never in the Ugaritic texts is divine death a permanent condition.

The larger fund of Mesopotamian literary texts shows more exceptions in the deaths of gods than Ugaritic or Israelite literatures. In W. G. Lambert's words, "the gods could not die in Sumero-Babylonian thought in the sense of getting old and eventually dying of natural causes. But they could die a violent death."[93] There are three types of divine death in

Mesopotamian literature: (1) older gods killed in stories of divine succession, (2) divine rebels; and (3) divine monsters.[94] (The exception to these three categories is Tammuz; as Lambert notes, he is neither old nor decrepit nor rebellious.) Deities in these three categories do not generally receive cult, and one may infer that a dead god lacks a separate cult. In other words, these figures are defunct.[95]

Moreover, these ancient deaths may serve a further function: to describe the cosmos in the (Mesopotamian) present. The deaths of these gods show how the world and humanity are connected to the divine realm, even though not divine. Hence, it is the blood of the dead rebel Qingu (sometimes spelled Kingu) that provides the blood of humanity (Enuma Elish 6:32–33),[96] and it is the carcass of the slain divine monster Tiamat that provides the substance of the cosmos (Enuma Elish 4:137–138, 5:45–65).[97] The deaths of Yamm (Sea) and Mot (Death) in the Ugaritic Baal Cycle likewise signal the relation of cosmic waters and death to the created order and experience of human beings. These deaths transpire in the context of narratives, as ways of describing the likenesses and differences of humanity and the world to divinity. (I avoid the word "explain" because I do not want to imply that myths are mainly explanations or that their authors and transmitters thought of them primarily in such terms; myths instead are descriptive of their reality, their experience of the world.) Instead of undermining the notion that death delimits divinity from humanity, these deaths describe by analogy the partial divinity of humanity and the world as well as their separateness.[98] The deaths of these gods make their divine matter usable, and they connect the created order to the gods. So even in the cases of deities, death still delimits the divine from the created order, which includes humanity. These dead gods then are fully consistent with the broader conceptualization that death distinguishes deities from humanity.

The case of Dumuzi/Tammuz is not exceptional for Mesopotamia, as Lambert's comment might suggest. Dumuzi is only one of a number of early disappearing "fertility" divinities (for example, Damu and Ninazu).[99] These other's were not regarded as ancient figures but as part of the present order of nature.[100] The same point has been claimed for the Ugaritic god Baal, because the Baal Cycle describes his descent to the underworld and presumes later his return to life. The surviving narrative describes Baal's

divine death at considerable length, and it is clear that the deaths of Yamm and Mot do not present the same problem for the audience: Baal's death is a threat to the audience, whereas the deaths of Yamm and Mot mark the victory of life for the audience. For a long time scholars have claimed that both Tammuz and Baal belong to the category of "dying and rising gods." J. Z. Smith has extensively criticized this category;[101] the following chapter of this study discusses the highly diverse characters of the figures imputed to this category, as well as the different cultural contexts underlying the presentation of their deaths in narratives and rituals.[102] For Baal, only a narrative rendering survives; the seventy or so ritual texts from Ugarit are silent about any ritual background to the narrative presentation of Baal's death. To anticipate the next chapter, note here that the only ritual text pertinent to the presentation of Baal is not one mourning his death but the death of the human king in CAT 1.161. Hence, the narrative incorporates the presentation of the human king's demise into the picture of the divine king's death. The narrative encodes the information from the ritual in direct contrast to the older claim that the myth is a libretto or text for the ritual. Baal's death needs to be seen in the context of a narrative that presents his kingship as the basis of a cosmic political order.

The kingship of this warrior storm-god operates simultaneously on the three levels of nature, humanity, and divinity. On the natural level, Baal's death is associated with drought in the late summer and returning rains in the early fall. On the human and divine levels, the death signifies a loss of bounty and concomitant well-being, and his life heralds the restoration of life (so CAT 1.4 VII 49–52). Baal's death also reinforces his weakness in evidence elsewhere in the Baal Cycle; he is a weak monarch who needs the other deities. Kingship itself on all levels is precarious. Baal's rule, with its moments of strength and weakness, may parallel the Ugaritic dynasty's vulnerability to foreign powers (Egypt and Hatti) as well as to internal threats to dynastic continuity by heirs, succession, or rebellion, as the narrative of Kirta presents the problems of kingship. Accordingly, Baal's kingship gives expression to death and life on many levels; even in the narrative of his death, Baal's return to life reinforces the generalization that deities are deathless. Even his death lacks the permanence of human death. In the Ugaritic material deities, even Baal, are by definition living for the human communities that maintain their cult. Their deaths lack the finality of

human death, and as Gilgamesh and Petronius remind their audiences, deities differ from humans in matters of life and death.

As in Ugaritic literature, in Israelite texts divine death is the exception rather than the rule. The notion of "dead gods" is absent from the extant corpus of Israelite texts, with the exception of Psalm 82,[103] which describes a divine council scene where Yahweh denounces the other gods as failing in their divine duties. Accordingly, Yahweh declares them to be "dead."[104] The psalm closes with a (prophetic?) call for Yahweh to demonstrate his power over the earth. In this text, the concept of "dead gods" serves a polemical purpose against the older traditional notion that other gods were the divine patrons of other nations while Israel was Yahweh's portion in this division of the cosmos (cf. Deuteronomy 32:8–9, reading "sons of God" with LXX and Dead Sea Scrolls[105]). Within the context of Psalm 82, the gods traditionally believed to represent the divine patrons of the other nations are declared now to be dead. In this case, "dead" means defunct. Yet what separates this Israelite composition about dead gods from their treatment in Ugaritic or Mesopotamian literature is the polemical purpose to which the concept is put. Stated differently, the Israelite usage involves an inner-cultural polemic aimed at nonindigenous deities (or ones perceived to be so). This insider/outsider dimension inherent in Psalm 82's polemic plays no apparent role in either the Ugaritic or Mesopotamian material.

Ezekiel 28 may be mined for this idea that deities do not die. Death is the way in which the denounced prince of Tyre will be shown to be human and not a god (New Jewish Publication Society version):

> Will you still say, "I am a god"
> Before your slayers,
> When you are proved a man, not a god,
> At the hands of those who strike you down?

Habakkuk 1:12 also seems to make this assumption about divinity: "You, O Lord, are from everlasting; My holy God, You never die."[106] Eternal life is commonly attributed to God. Psalm 90:2 reflects on the eternity of God versus noneternity of human beings. Another reflection of divine eternity involves the idea of God as the lord of human life and death (1 Samuel 2:6). Prayers requesting long life are addressed to and answered by the gods, precisely because they themselves have life in abundance.[107] Thus, it is the

job of the gods to provide continued life. As the Idrimi inscription prays, "May (the gods) keep him alive and preserve him" (*li-bal-li-ṭu-ú-šu lin-na-ṣa-ru-šu*).[108]

An extended reflection on time involves "eternity" (*ʿôlām*) in Ecclesiastes (Qohelet) 3:11. The verse may be translated literally (and quite woodenly):

> Everything he [God] made beautiful in its time; also *ʿôlām* He gave in their heart, without humanity ever reaching the work which God made, from first to last.

The word *ʿôlām* has been taken generally in four ways:[109]

1. "Eternity," based on the common BH usage, including Ecclesiastes 1: 4, 10, 2:16, 3:14, 9:6, and 12:5 (so LXX; ibn Ezra);
2. "That which is hidden, concealed," based on the BH usage of this root[110] (cf. possibly Ugaritic *ʿlmt*, "darkness" [?])[111] and supported by the Targum;
3. "Knowledge," based on Arabic **ʿlm*; and
4. "World," based on the later Hebrew meaning of this word."[112]

The first meaning "eternity" has the virtue of contextual support[113] in addition to clear etymological support. The initial clause characterizes divine creation in terms of time. This creation includes humanity. Yet, according to this reading of the second clause, humanity has eternity built into it. Hence, the contradiction of human life: humanity partakes both of the time-conditioned creation and the timelessness of divinity. This paradoxical nature of humanity means that we can intuit the divine plan yet cannot grasp it entirely. The second meaning likewise has some etymological and contextual support. The second half of the verse notes humanity's inability to comprehend the divine plan; hence, this plan and the deity remain "concealed" or "hidden" from human perception. The third and fourth solutions, lack etymological or contextual support. Other efforts based on emendation[114] or elastic semantic reach[115] seem poorly supported by either etymology or context.

It may be plausible to propose a double-reading of the word based on the first two meanings, the ones best supported etymologically,

contextually, and text-critically. At work may be a sort of wordplay involving the different meanings of the same word or "root" in Hebrew derived from the coalescence of two originally different roots. This approach to originally different roots requires further explanation, because most Semitic scholars detect the meaning of one original root or the other in any given context, but not both. The original stock of consonants in the Semitic languages was approximately thirty letters (the exact number is a matter of debate). Ugaritic shows a coalescence of a very few original consonants, including primary *w-/y-*. (In contrast, Hebrew, Aramaic, and Phoenician show the "loss" of six or seven letters coalesced into some of the remaining twenty-two or twenty-three letters.) As a result, two originally different roots appeared to ancient speakers of these languages as a single word. The multiple meanings of two originally different roots that came to resemble one another through historical changes likely represented the meanings and connotation of a single word.[116] It may be argued that the original roots of **ʿlm* and **ǵlm* have coalesced in Hebrew, and the meanings of the two were used as related Hebrew words. Drawing on these two sets of meanings in Hebrew, the author perhaps plays on them: God has set an eternity in humanity that is also hidden (a note that the book sounds in its final verse, also with the root **ʿlm*). Ecclesiastes 3:11 presents this irony to humanity, namely, that the source for human realization of human limits lies within humanity's very own constitution. We can only intuit that which we cannot experience: eternity.

5. Postscript: Divine and Human Life (Or, My Breakfast with Shulamit)

In closing this chapter, I hazard some general observations about the traits of West Semitic deities. One morning (Oct. 15,1996) my (then) four-year-old daughter Shulamit and I were sitting at the kitchen table. As she slurped down her Lucky Charms (just as I had some thirty years earlier), she told me that parents are strong. I asked her what else parents are. She told me that parents have big noses, they know a lot, they love each other, and they love their kids. Shulamit is aware that parents are stronger and bigger than she is, that parents are gendered and relational, that parents have knowledge

she does not possess (only a matter of time). And Shulamit is aware that parents will die. She told me (yes, on another breakfast occasion) that when she has children and her children grow up, I will die. She has a relative chronology in her mind as to how long her parents will live. (Whether she perceives that parents are holy in any sense will depend on time). It doesn't take a genius to realize that even in a modern Western society images of divinity derive in large measure from the family unit, and most of the images for deities reflect this unit and its living conditions.

My conversations with Shulamit help to place the preceding discussion into some perspective, although I offer these comments only tentatively. Many characteristics of divinity correspond to the great problems of human existence, with their attendant contradictions. For example, concerning to divine strength and power, D. Pardee comments: "[E]ach deity was more powerful than any human and capable, therefore, of affecting the life of any human being."[118] Characteristics of deities ultimately relate to human characteristics, actions, capacities and incapicities. For now I will only sketch out preliminarily how four characteristics of divinity[119] correspond to problems of human existence as well as its contradictions:

human problems	*human contradictions*	*divine characteristics*
powerlessness	human power, but experience of strength, size suffering and evil people	strength, size
lack of prosperity/ infertility	experience, intuition of divine presence, but common experience of divine absence	sexuality/love
unholiness	knowledge and experience of self as both wrong (sinning) and whole (holy)	holiness
mortality	limited time, but intuiting eternity	eternity

These characteristics suggest at once a great divide looming between humanity and divinity and an intimate bond linking them. For the ancients at Ugarit, to understand divinity is to extrapolate from the human condition to express reality that cannot be entirely described; and to understand humanity is in turn to make some sense of divinity that can be sensed only in part.

The modern critique of religion as a human artifact is in part confirmed and undermined by the preceding survey. On one hand, the deities are rendered in the image and likeness of their adherents. On the other hand, the treatment of the deities clearly shows an awareness that divinity is not the same as humanity. Moreover, the discussion of anthropomorphism in section 2 indicates that divinity is not simply humanity writ large. Instead, although anthropomorphism remains the norm, reflection on it shows a recognition that more than mere "wish-fulfillment" was involved. This countertrend, though, is hardly confined to Israel; it is evident in Mesopotamia and Ugarit. The ancients struggled with the limits of their understanding of divinity, not simply assuming that it was a distorting mirror of themselves on a larger scale. It was a mystery of something beyond themselves as well, to which they had a limited access through their experience.

This description of divine mystery applies as well to Israelite material. The extant Bible exhibits no "unique" feature in descriptions of the divine. I will turn to Israelite monotheism at the end of this book, and I elaborate other features or combination of features specific to ancient Israel. Yet this is an issue of religious particularity, not an objective measure of Israelite uniqueness; by this token we could look for features of Babylonian, Assyrian, Ugaritic, or Egyptian uniqueness.[120] Clearly such quests for Israelite uniqueness, evidently driven by post-biblical concerns, are quixotic. Accordingly, the quest for specific unique traits for Yahweh appears to be theology dressed up as history or history of religions. However, this is hardly the end of the issue. The point of a theological tradition, whether in the Bible or later, is to come to understand and to know the deity to which it is dedicated. Therefore, historians of religion and theologians alike may be interested in posing the issue in terms of Yahweh's particular profile. As the survey in this chapter indicates, this issue does not involve a question of distinctive characteristics for Yahweh as much as a unique combination of characteristics and a reduction in divine

characteristics, in short a convergence of the valued divine roles in the figure of Yahweh. Despite the vestiges of more divine characteristics in early Israelite polytheism, Yahweh of Israelite monotheism has no divine peers, fewer divine subordinates, no sex (probably), no death, no family, but this deity maintained all the expected roles of divine protection and blessing. As a result, monotheistic Yahwism perhaps then resulted in a deity more concealed in character, more revealed in function.

6
The Life and Death of Baal

> While smooth Adonis from his native rock
> Ran purple to the sea, supposed with blood
> Of Thammuz yearly wounded.
>
> John Milton, *Paradise Lost*,
> Book I, 450–52

Chapter 5 describes the characteristics expected of deities in the biblical world. One of these traits is immortality, or inability to die. However, the "dying and rising gods" in West Semitic religion are an exception to this rule. This category of divinity received great currency after the work of Sir James George Frazer (1854–1941), but more recently J. Z. Smith, H. Barstad, and other scholars have seriously questioned it. Despite their trenchant critiques, the category continues both in scholarly literature and in nonscholarly work.[1] For historians of religion, the death of "the dying and rising god" may have passed,[2] but the category has enjoyed a certain afterlife in biblical studies. Some highly respected scholars have used the category in their research on Israelite religion. For example, T. N. D. Mettinger understands Baal of Ugarit, Adonis, and Melqart as "dying and rising gods."[3] Mettinger also takes Yahweh's title, "the living god" (*'ĕlōhîm ḥayyîm*), as an anti-Baal epithet in the latter's capacity as a "dying and rising" god.[4] According to J. Day, "Baal's death and resurrection" lies behind the re-use of "the imagery of a dying and rising fertility god" in Hosea 5:12–6:3.[5] Day also reads the imagery of national death and resurrection in Hosea 13–14 against this same background, as Hosea 13:1 mentions Baal.[6] Mettinger and Day assume the validity of the category of "dying and rising gods," yet neither discusses its origins or limits.[7]

Because highly reputable scholars continue to use the category of "dying and rising gods," I would like to address its viability with six main aims: (1) to review Frazer's category of "dying and rising gods," (2) to point out the main defects in the category, (3) to investigate the differences among the different figures subsumed under the category, (4) to suggest an alternative interpretation to one crucial example of "dying and rising" gods, (Baal of Ugarit), (5) to offer further reflections about the presentation of Baal, and (6) to address the lack of conflict mythology involving Death and Israel's national deity. To anticipate the discussion that follows, this investigation casts serious doubt on the category Frazer proposed. Many of the figures assigned to this category are related to natural fertility, but otherwise they differ significantly. Furthermore, there is no hard evidence for a ritual background behind the "rising" of these figures. Because the category is fraught with difficulty, its origins deserve further examination. W. Robertson Smith and W. Mannhardt provided Frazer with the initial impetus for the category; Frazer's classical background perhaps contributed to its further systematization. In comments on ancient Near Eastern religions, classical authors sometimes equated different deities. This category of "dying and rising gods" was not well grounded in the primary evidence. As a result, interpreting either biblical passages or the Baal Cycle against the background of this putative category becomes a dubious procedure. It would seem more productive to interpret the various gods in the context of the cultures to which they belong before constructing a comparative category. The test case here is Baal of Ugarit. To the credit of Mettinger and Day, their comments connect funerary motifs with some of the figures involved, thereby pointing, in my mind, in the direction that the analysis of Baal's death and return to life in the Baal Cycle should take. Finally, the discussion focuses on the literary production of this mythology and its absence in biblical literature.

1. Frazer's Hypothesis about "Dying and Rising Gods"

In the wake of Frazer's work, it has been commonplace to characterize Baal as "a dying and rising god." Frazer's view can be traced back to the first edition of *The Golden Bough* (1890) and then in *Adonis Attis Osiris* (1906),

which was incorporated as part 4 of the third edition of *The Golden Bough* (1911–1915).[8] In its time this work was immensely popular, its influence spreading beyond scholarly circles, into the wider culture, as reflected in such works as T. S. Eliot's famous poem *The Waste Land*.[9] The work was considered a beautifully written text, a powerful synthesis that offered massive explanatory power to an age seeking general evolutionary explanations for the origins and development of human civilizations.[10] Based on wide-ranging comparisons and assumptions, Frazer connected the cycle of vegetation with the mythologies of Egyptian Osiris, Sumerian Dumuzi/Akkadian Tammuz (his name given in Ezekiel 8:14), late Anatolian Attis and the late classical Adonis.[11] Writing of Tammuz (Dumuzi), Frazer asserts:

> In the religious literature of Babylonia Tammuz appears as the youthful spouse or lover of Ishtar, the great mother goddess, the embodiment of the reproductive energies of nature. The references to their connexion with each other in myth and ritual are both fragmentary and obscure, but we gather from them that each year Tammuz was believed to die, passing away from the cheerful earth to the gloomy subterranean world, and that every year his divine mistress journeyed in quest of him…. The stern mother of the infernal regions … reluctantly allowed Ishtar … to depart, in company probably with her lover Tammuz, that the two might return together to the upper world, and that with their return all nature might revive.[12]

Similarly, in his remarks about Adonis, Frazer suggests that: "the ceremony of the death and resurrection of Adonis must have been a dramatic representation of the decay and revival of plant life."[13]

Frazer generalizes about the "dying and rising gods" in the following way:

> Nowhere, apparently, have these rites been more widely and solemnly celebrated than in the lands which border the Eastern Mediterranean. Under the names of Osiris, Tammuz, Adonis, and Attis, the peoples of Egypt and Western Asia represented the yearly decay and revival of life, especially vegetable life, which they personified as a god who annually died and rose again from the dead. In name and

> detail the rites varied from place to place: in substance they were the same. The supposed death and resurrection of this oriental deity, a god of so many names but of essentially one nature, is now to be examined.[14]

The deities were thought to be the incarnations of the spirit of fertility or, more specifically, the spirit of particular crops such as corn. Referring specifically to Adonis, Frazer writes:

> [T]he annual death and revival of vegetation is a conception which readily presents itself to men in every stage of savagery and civilisation; and the vastness of the scale on which this ever-recurring decay and regeneration takes place, together with man's intimate dependence on it for subsistence, combine to render it the most impressive annual occurrence in nature, at least within the temperate zones. It is no wonder that a phenomenon so important, so striking and so universal, should, by suggesting similar ideas, have given rise to similar rites in many lands. We may, therefore, accept as probable an explanation of the Adonis worship which accords so well with the facts of nature and with the analogy of similar rites in other lands. Moreover, the explanation is countenanced by a considerable body of opinion among the ancients themselves, who again and again interpreted the dying and reviving god as the reaped and sprouting grain.[15]

Accordingly, these gods' narratives and rituals epitomized the cycle of natural fertility, which moved from life to death and then from death to life. Rituals connected with vegetation celebrated the drama of the gods' death and resurrection. This theory has four key elements: the divine status of the figures, their death and their return to life, a correspondence of this thematic cycle to the seasonal cycle, and a series of rituals that provide a cultic context for the recitation and performance of this thematic material.

The preface to the first edition of *The Golden Bough* credits the notion of the "slain god" to W. Robertson Smith, Frazer's friend and mentor in anthropology as well as the person to whom he dedicated the volume: "Indeed the central idea of my essay—the conception of the slain god—is derived directly, I believe from my friend. But it is due to him to add that he

is in no way responsible for the general explanation which I have offered of the custom of slaying the god."[16] Frazer speaks quite correctly, as Robertson Smith's influence is evident in his work. In the first edition of *Lectures on the Religion of the Semites* (1889), Robertson Smith speaks of Baal in these terms in a section labeled the "annual death of the god": "The interpretation of the death of the god as corresponding to the annual withering up of nature … was naturally suggested by Baal-worship…. [I]n Baal-worship, when the death of the god becomes a mere cosmical process, and the most solemn rites that ancient religions knew sank to the level of scenic representation of the yearly revolutions of the seasons …"[17] Robertson Smith also speaks of Adonis (= Tammuz for Smith) as the incarnation of the spirit of vegetative fertility. Robertson Smith therefore seems to be Frazer's original source for seeing Adonis, Tammuz, and Baal as parts of the vegetative cycle.

Robertson Smith apparently influenced another feature of Frazer's thought on this subject. The comparison between the annual cycle of life and death represented by Baal and Jesus' death and resurrection was made by Robertson Smith in the first edition of his *Lectures* in 1889, a year before the first edition of *The Golden Bough*. The comparison was deleted from subsequent editions. In contrast, Frazer avoided such a comparison in the first edition of *The Golden Bough*, but beginning with the second edition, he explicitly compares Jesus and "dying and rising gods."[18] Frazer extended Robertson Smith's thought on the subject. The creation of the category of "dying and rising gods," as well as the greater range of gods brought under this rubric, seems to reflect Frazer's own systematization of Robertson Smith's more nuanced differentiation of these gods. Although Robertson Smith himself cites Frazer at times on such matters,[19] his discussions depart markedly from what Frazer offers. For example, Osiris does not appear in these terms in Robertson Smith's volume. Furthermore, Frazer included non-Semitic deities such as Dionysius in the category.

Frazer's approach was superimposed on Baal of Ugarit shortly after the early publication of Ugaritic texts. Scholars such as F. F. Hvidberg, T. H. Gaster, and G. Widengren characterized Baal as "a dying and reviving god."[20] In this category Gaster included the figures of Tammuz, Osiris, Telepinu, Attis, Adonis, and Persephone.[21] Hvidberg was clearly influenced by Frazer, and Gaster sympathized with Frazer's magnum opus enough to

deem it worthy of an abridgment, brought out in 1959 under the title *The New Golden Bough*.[22] Like Frazer, Gaster posited a seasonal background to the mythology of these figures. Furthermore, rituals celebrated the deaths and reviving of these figures according to the seasons.[23] This view of Baal as a "dying and rising god" has enjoyed some currency in more recent scholarship.[24]

The final two tablets of the Baal Cycle (CAT 1.5–1.6) certainly seem to provide evidence for Baal as a "dying and rising god." Although the myth does not preserve an account of Baal's death or return to life, there is little doubt that these events transpire in some portion of the lost narrative, for El's messengers report how they discovered the god dead (1.5 VI 8–10) and Anat gives his corpse a proper burial (1.6 I). Later in the narrative Baal re-appears (1.6 V). This reappearance is anticipated by El's dream-vision, which calls the god *ḥy*, "alive," in the expression, *ḥy ʾal'iyn bʿl* ("Mighty Baal lives") in CAT 1.6 III 2, 8, 20; this expression has been taken as a reference to Baal's resurrection.[25] The description of Baal's death and the allusions to his return to life as well as his reappearance in the narrative provided *prima facie* evidence for Baal as "a dying and rising god."[26] I examine this claim in section 2. Two subsidiary arguments for Baal as a "dying and rising god" derive from other Ugaritic sources. Ritual evidence for Baal as a "dying and rising god" could theoretically be founded on CAT 1.17 VI 28–33. In this passage, Anat offers the hero Aqhat "non-death" (*bl mt*) in exchange for his bow. In describing the offer, Anat compares her offer of life to Baal when *b'l* is "brought to life" or "brings to life" (*yḥwy*). If the verb were passive, then it could be taken as an allusion to Baal's resurrection.[27] Furthermore, the figure of Arsay, one of Baal's three "daughters" or "women," seems to provide ancillary evidence for Baal as a "dying and rising god." Arsay's name literally means "Earthy," but it could plausibly be understood as "Netherworldly."[28] The latter interpretation would make good sense in view of the equation of this goddess with Allatum,[29] an underworld figure in Mesopotamian myth.[30] Baal's other two "women" bear either a meteorological name or title: Tallay means "Dewy" and she has the epithet "daughter of showers" (*bt rb*); and some commentators take Pidray's appelation, *bt ʾar*, as "daughter of moisture."[31] Accordingly, these two females seem to be connected with Baal's

meteorological functions, whereas Arsay's characteristics might be taken to point to some chthonic aspect of Baal.

2. Problems with the Category

In his own lifetime Frazer's work was called into question for several reasons. Over the course of the quarter century when the three editions of *The Golden Bough* appeared (1890, 1900, and 1911–1915), the work met with increasing opposition from anthropologists. First of all, commentators criticized what Frazer called his "comparative method."[32] Although the response to the first edition was relatively respectful, the second and third editions' increase in suspect comparisons outraged a number of anthropologists,[33] and explicit comparisons of "primitive" rituals with Jewish and Christian practices introduced into these later editions sparked further controversy.[34] Frazer's work was controversial in wider intellectual circles as well. Following the appearance of the second edition, William James met Frazer in Rome and noted what he regarded as his overly rationalist interpretation. In a letter of Christmas 1900, James wrote that Frazer "thinks that trances, etc., of savage soothsayers, oracles and the like are all *feigned*! Verily science is amusing!"[35] In 1930, about a decade before Frazer's death, the philosopher Ludwig Wittgenstein (1889–1951) took an interest in Frazer's work, and beginning in 1931 he began to make notes on *The Golden Bough*.[36] Wittgenstein's observations are replete with acute criticisms of the work's presuppositions and methodological difficulties. Commenting on Frazer's comparisons of rituals across cultures, Wittgenstein wrote:

> The most noticeable thing seems to me not merely the similarities but also the differences throughout all these rites. It is a wide variety of faces with common features that keep showing in one place and in another. And one would like to draw lines joining the parts that various faces have in common. But then a part of our contemplation would still be lacking, namely what connects this picture with our own feelings and thoughts. This part gives the contemplation its depth.[37]

Frazer's procedure of noting similarities across cultures, Wittgenstein rightly suspected, reveals more of Frazer's own assumptions and perhaps less of the cultures'. Specialists outside of anthropology were critical of Frazer's derivative understanding in their fields. Writing later on Frazer's influence on ancient Near Eastern scholars (including T. H. Gaster), Cyrus Gordon remarked: "[T]he great mass of scholarly writing on Baal, who is supposed to die for the rainless summer and return to life for the rainy winter, misses the point of ancient Near Eastern religion as a reflection of Near Eastern climate."[38]

Within Frazer's lifetime, many anthropologists generally eschewed his comparative enterprise in favor of studying religion within its cultural setting. The anthropological approach developed by Frazer's protégé B. Malinowski and Frazer's acquaintance E. E. Evans-Pritchard concentrated on fieldwork within current cultures and tended to work methodologically toward interpreting features of religion within specific societies.[39] The comparative approach of *The Golden Bough* unavoidably suffered. In abstracting features of specific motifs from their cultural and historical contexts (sometimes misinterpreted or poorly attested), Frazer produced categories that otherwise never existed. This approach might be called "patternism," an approach to texts that reigned in ancient Near Eastern studies during the middle of this century. Since 1970, such an approach entered a period of decline in the face of more sophisticated analyses informed by anthropology, the history of religions, and folklore studies. Whatever the similarities between Baal and other ancient Near Eastern figures (and here I am thinking of the concern for death and agricultural fertility, kingship, and perhaps the role of the female familial relation in regenerating life), they require examination within their specific cultural contexts. Indeed, the survey in the following section suggests that cultural attitudes and ritual activity involving death in Mesopotamia and Egypt influenced the formulation of mythic motifs involving Dumuzi and Osiris; similar results might be expected for Baal.

Within the field of anthropology, Frazer's comparative approach never recovered, and the comparative agenda was left to historians of religion to pursue. However, comparative study of religion has followed anthropology in avoiding comparisons of religious features apart from their cultural settings. Moreover, historians of religion learned many negative lessons from Frazer and others; one was the need to be far more aware of modern

suppositions.[40] Frazer's work was deeply affected by his concern for two later cultures, Christianity and the classical world. As noted the category of "dying and rising gods" represented Frazer's attempt to explain the death and resurrection of Jesus Christ, a connection Frazer himself made. Frazer's further inspiration for the category of "dying and rising gods" apparently was classical literature, his point of departure for *The Golden Bough* and "his first love," according to Frazer's devoted, uncritical biographer, R. Angus Downie.[41] *The Golden Bough* notes many equations made by classical writers between Greek and Middle Eastern deities. Frazer cites classical identifications of various "dying and rising gods," sometimes without reference to a particular writer, sometimes by name.[42] For example, Frazer cites *De Dea Syria* 7's well-known correlation between Adonis of Byblos and Osiris.[43] In classifying these figures, Frazer perhaps followed the lead of the classical authors whom he read. Many classical authors interpreted Middle Eastern deities in part through identifications between gods of different regions. Indeed, many identifications of deities were made by classical authors who, like Frazer, were outsiders to the religions they discuss. These equations in the classical period reflected the observations of learned people who sought to define foreign practices and beliefs they themselves did not share, much less understand from experience. Moreover, Frazer engaged in the negative psychological interpretations of the classical authors he quotes.[44] At one point Frazer sounds the very negative notes that his citation of Plutarch makes about Osiris. In short, Frazer's impulse to abstract and compare deities from different cultures seems to replicate classical tendencies to classify ancient Near Eastern deities and to provide them with a negative psychological interpretation.[45] This sort of comparative approach, whether in its ancient classical form or Frazer's modern tomes, generated asbtract generalizations and assumed their validity.

3. The So-Called Dying and Rising Gods

In his survey of "dying and rising gods," J. Z. Smith finds a bewildering number of differences among them.[46] In this section, I briefly repeat

Smith's survey and supplement it with further information now available. The following survey focuses on the putative similarities of Baal and Dumuzi, Osiris, Melqart, and Adonis. Other figures sometimes invoked in this discussion, such as Attis and Marduk, are not discussed here. Readers may consult J. Z. Smith's general discussion as well as P. Lambrechts's work on Attis[47] and T. Frymer-Kensky's treatment of material thought to support Marduk's death and resurrection in the "Marduk Ordeal Text."[48] I would stress that the rituals and mythologies that mention these deities are complex, and my goal is to summarize the evidence to address Frazer's basic claims. Frazer's ritualist assumptions and his profiles of the figures involved often cannot be sustained, but the wider themes of kingship and its mortuary custom, as well as natural fertility, do obtain in the corpora associated with most of these figures.

Osiris

The mythology of Osiris[49] is known at considerable length thanks to Plutarch's *De Iside et Osiride* (ca 100 C.E.).[50] According to M. Lichtheim,[51] the fullest indigenous account appears in the "great Hymn to Osiris" on the stela of Amenmose (eighteenth dynasty). This mythology revolves around Osiris's struggle with, and death at the hands of, his brother Seth, followed by the recovery and rememberment of Osiris's body parts by his sister, Isis. Osiris revives in the underworld when his son Horus avenges his death. That this turn of events corresponds to natural fertility has been inferred from texts and iconography associating Osiris with the sprouting of grain. Iconography likewise shows grain sprouting from the coffin of Osiris, as he is to awaken to new life thanks to the rays of the sun above.[52] It has been often claimed that the story of the struggle between Osiris and Seth identifies the former with the fertility of the Nile and the valley that the river regularly inundated.[53] Osiris apparently dies and revives (if only in the underworld), and these mythological events were thought to correspond to the revival of nature. Here are conspicuous similarities between Osiris and Baal. Both are associated with natural fertility. Furthermore, both suffer a violent death at the hands of another god, and the aftermaths of their deaths involve the intervention of their sisters.

However, problems attend comparisons of Osiris and other figures. In an important study of Osiris, J. G. Griffiths is highly critical of Frazer's category.[54] Griffiths accepts the older criticism, made by A. H. Gardiner and H. Kees, that Osiris, unlike Baal, does not undergo any return to life. Instead, Osiris journeys to the netherworld where he becomes king. With no resurrection or rising for Osiris, a major cornerstone of Frazer's theory fails in the face of primary evidence. The comparison of Osiris and Baal likewise meets problems. Osiris' defeat, in the form of a violent dismemberment, comes at the hands of Seth, who was identified with Baal in the New Kingdom period. Indeed, Osiris seems quite the opposite of Baal in that the former was considered the dead king of the netherworld. Accordingly, J. C. de Moor compares Osiris not with Baal but with Mot, the Ugaritic god of Death.[55] Indeed, Osiris has been understood fundamentally as a funerary deity.[56] Frazer[57] and many Egyptologists observed that the "mythology" of Osiris was influenced by Egyptian mortuary cult. At many points Griffiths notes the conceptual relations between the presentation of Osiris and royal funerary practices and beliefs.[58] He argues that it "is in the royal funerary rites that the cult of Osiris achieves an early ascendancy."[59] Of particular interest is Griffiths's view that the "Osiris myth … grew out of the royal funerary ceremonial."[60] For example, the Pyramid texts present Osiris as the prototype of burial and mummification for the king.[61] Moreover, Osiris stands for the deceased king while Horus, Osiris's son, stands for the living king. In his relationship to royal funerary practice, Osiris is hardly alone among the figures Frazer discussed; several in this section show the impact of royal mortuary cult on their mythology.

Dumuzi/Tammuz

A good deal of Sumerian pastoral poetry and love songs celebrates the marriage of the shepherd Dumuzi to the goddess Inanna while mythological texts and laments mourn his death.[62] The narratives about Dumuzi describe his death—for example, how the *galla*-demons come and haul him off to the underworld. In *Inanna's Descent to the Netherworld*, the goddess is furious with Dumuzi's lack of deference when she returns accompanied by the *galla*, so she allows them to take him to the netherworld. Dumuzi's

"resurrection" had been long denied,[63] but a fragment at the end of *Inanna's Descent of the Underworld* has given new life to this view of Dumuzi. The crucial line reads: "You (Dumuzi), half the year! Your sister (Geshtinanna), half the year!"[64] Despite the line's fragmentary context, S. N. Kramer conceded the point in 1966: "[O]n realizing that as a shepherd-god, his presence is needed on earth in order to insure the fecundity of the flocks, she [Inanna] decreed that he stay in the Netherworld only half the year, and that his doting sister Geshtinanna take his place the other half."[65]

Dumuzi seems to conform to Frazer's category of "dying and rising gods." Dumuzi's character and his relationship to Inanna are tied to natural fecundity. With Dumuzi dead, nature clearly stops producing. Dumuzi is also regarded as a divinity of some sort. Yet what kind? Dumuzi's quasi-divine status is evident from his complaint that he has the misfortune of "walking among men,"[66] but his life of shepherding and his prayers to deities[67] also suggest his human status. B. Alster, preceded by Kramer, claimed that Dumuzi was a deified king.[68] This view has been supported by the Sumerian king list, which mentions two rulers named Dumuzi. In a review of the evidence, Alster suggested that "Dumuzi as the husband of Inanna exemplifies the pattern of a mortal who becomes the husband of a goddess, like Enmerkar and Inanna, Lugalbanda and Ninsun."[69] Alster also denied the older view that Dumuzi was originally a vegetation god. Instead, Alster attributed the correlation of Dumuzi's disappearance to the hot season (coinciding with the seasonal termination of milk production by flocks) to his secondary association with Damu, "originally an independent deity and a true vegetation deity."[70]

Problems also are inherent in the ritual underpinnings supporting Frazer's approach to Dumuzi. Although his death is mourned, no known ritual text celebrates his return to the land of the living. The closest evidence for the figure's manifestation appears embodied in his form as the "astral Dumuzi," to use D. A. Foxvog's expression.[71] In the Akkadian myth of Adapa,[72] Tammuz is said to be located with Anu in heaven. For the mortal Adapa, who in heaven chances upon Dumuzi incognito, Dumuzi is absent:

> Tammuz and Gizzida were standing at Anu's door.
> When they saw Adapa, they cried "(Heaven) help (us)!

“Fellow, for whom are you like this?
“Adapa, why are you dressed in mourning?”
“Two gods have disappeared from the land,
“So I am dressed in mourning.”
“Who are the two gods who have disappeared from the land?”
“Tammuz and Gizzida.”[73]

Both associated with the underworld, the two gods could be mourned. A number of other texts refer to the “astral Dumuzi,” including an OB hymn to Inanna.[74] According to Foxvog, these references support the notion that Dumuzi appears in astral form, monthly not annually. Furthermore, this astral form does not represent a return to the world. Indeed, Adapa presents himself as mourning for a disappeared Dumuzi, and it may be telling that Adapa does not recognize Tammuz. However, the astralization of the deceased Dumuzi may reflect an alternative notion of “resurrection,” of becoming one “like the stars.” Such a concept perhaps derived from the royal cult.[75]

Finally, it may be assumed that Dumuzi was regarded as returning from the realm of death, but the form that Dumuzi’s resurrection from the underworld takes is unknown. At the end of *Ishtar’s Descent to the Netherworld*, Ishtar refers to the day when Dumuzi (Tammuz) “comes up to me” (*ellānî*).[76] The verb points not to Dumuzi’s “resurrection” but to his participation in a ritual in which the dead were invoked and then temporarily manifest. Indeed, the context at the end of *Ishtar’s Descent to the Underworld* explicitly connects the day of Dumuzi’s ascent with the ascent of the dead. Akkadian *elû* also corresponds to the title of necromancers, *mušēlû eṭemmi/ṣilli*, “one who makes the ghost/shade ascend.” In summary, the nature of Dumuzi’s “resurrection” is unknown, and, perhaps equally important, it appears to go uncelebrated in any ritual manner. Even if “resurrection” were the proper term to characterize Dumuzi’s half-year on earth every year, it appears to be a concept without ritual context. This seems to be a “theology” designed to make sense out of Dumuzi’s annual death: if he “dies” every year, then he must return to life every year as well.

Perhaps to understand better the background of Dumuzi’s death, we should return to the correspondence between the use of the verb *elû* in *Ishtar’s Descent to the Underworld* and the religious necromancy. Behind

the picture of Dumuzi's death may lie the influence of royal funerary cult. The evidence from festivals points to the intertwining of funerary practices for human kings and the presentation of Dumuzi as the disappearing god. The composition known as "In the Desert by the Early Grass" explicitly links the death of Dumuzi with the funerary cult of the Ur III dynasty.[77] The link between divine and human kings goes further. In both the Old Babylonian and Ur III periods, Ur attests rituals for the disappearing god, Ninazu, in conjunction with rituals for the deceased kings.[78] M. E. Cohen writes:

> A second type of festival involving the netherworld was also observed throughout many cities of Mesopotamia. This festival was based upon the cult of the disappearing god, occasionally becoming intertwined with observances for deceased kings—rulers identified with those disappearing deities. In most cities it was Dumuzi … who had gone to the netherworld, while at Ur it was Ninazu.[79]

Beyond these festival observances, we may also note the "astral Dumuzi," which may be informed by royal mortuary cult as well. Foxvog suggests the possibility that Shulgi may have been the tacit subject lying behind the description of Dumuzi in the OB hymnal already noted.[80] If correct, it would point to the influence of royal mortuary concepts on the presentation of the astral Dumuzi. The literary presentation of Dumuzi may then reflect the imprint of royal mortuary custom.

Finally, it is important to note differences between Dumuzi and Baal. Dumuzi is no great god like Baal, nor is he a storm-god, nor does he engage in mortal combat as part of the description of the struggle between life and death. Even Dumuzi's relations to nature involve the flock and not nature more generally. In discussion of the two figures,[81] Cohen cites M. Astour's view[82] that Mot is identified with the ripe grain that was cut and winnowed. This view is overstated, but if any Ugaritic deity is presented as suffering the sort of death associated (if only on the level of imagery) with grain, it is not Baal but Mot, the god of Death. Both Ugaritologists and Mesopotamian specialists have observed the correspondence here with Mot. Gaster, the most creative proponent of Frazer's approach, recognized this problem. For although he assumes Baal to be a "dying and rising" figure, he notes that Mot, not Baal, is "dismembered and reassembled."[83] Similarly, A.

Livingstone has discussed the dismemberment of Mot in connection with the death of Dumuzi.[84] Given this comparison, it is difficult then to identify Baal with the grain in any meaningful sense according to Frazer's analysis.

To summarize, Dumuzi/Tammuz "dies" in a manner that correlates in general terms with the seasonal cycle. Moreover, Dumuzi is only one of a number of disappearing "fertility" divinities (for example, Damu and Ninazu).[85] So one may argue that early Mesopotamian religion attests to divinities who disappear in accordance with the seasons. However, major pieces in Frazer's category are missing for Dumuzi/Tammuz. The manner of Dumuzi's return from the underworld is unknown, and he would appear to be a divinized human. Finally, comparison with Baal is highly problematic. In a constructive vein, the Mesopotamian material points to a relationship between rituals devoted to disappearing gods and royal ancestors. A comparable impact is proposed for Baal in section 4.

Melqart

Since the time of Frazer, Melqart has been drawn into the discussion of "dying and rising gods."[86] A long line of scholars, including M. Clermont-Ganneau,[87] R. de Vaux, E. Lipínski,[88] J. Teixidor,[89] C. Bonnet,[90] J. C. Greenfield,[91] and S. Ribichini,[92] have noted mostly Hellenistic period (or later) Phoenician and Punic inscriptions (CIS i 227, 260–262, 377, 3351, 3352, 3788, 4863–4872, 5903, 5950 [= KAI 93], 5953 [= KAI 90], 5979, 5980, 6000,[93] as well as KAI 44, 70 and 161), which refer to persons (cultic personnel)[94] as "the raiser of the god" (*mqm/mqym 'lm*).[95] The question of the god's identity in these expressions seems to have been established by the fourth-century Phoenician inscriptions from Larnax tes Lapethou in north-central Cyprus (henceforth LL).[96] According to Greenfield, "a survey of the *mqm 'lm* material demonstrates a clear relationship with Melqart, as can be seen by a survey of the names of dedicants of the inscriptions."[97] In the LL inscriptions alone, Melqart appears by name (II:2,[98] 3, 7). The proponents of *mqm/mqym 'lm* as a reviver of the god allow for the possibility that the god is viewed as asleep, not dead, a view that would parallel Elijah's taunt of Baal's prophets in 1 Kings 18:27b: "Call with a

loud (lit., great) voice if he is a god … [p]erhaps he is asleep and will awake." Certainly, such sleep (if correct) may denote death.[99]

A number of questions have been raised about the meaning of the title *mqm/mqym ʾlm* to support the idea of divine resurrection.[100] In his original publication of LL III, A. M. Honeyman reckoned that the title *mqm ʾlm* refers literally to "the cult-supervisor" (literally, "establisher of the gods").[101] Honeyman appeals to other Phoenician uses of *ʾlm* for this generic sense (e.g., *ksp ʾlm*, "temple treasury").[102] H. P. Müller has recently argued for *mqm/mqym ʿlm* as a cultic officiant who induces a ritual theophany, not a ritual return from death.[103] Further the speaker of this inscription refers in line 5 to Osiris as "my lord" (*ʾdny*). This title might seem incompatible with devotion to Melqart, if both Osiris and Melqart are to be reckoned in the putative list of "dying and rising gods." Even if the claim that *mqm ʿlm* were to refer to a cultic role such as "raiser of the god," no information establishes the ritual and conceptualization for this cultic role. Moreover, no text provides information about the putative death of the god. For both claims the texts are silent. There is simply insufficient evidence to prove the case or to dismiss it entirely.

Herakles

Scholars commonly identify Melqart with Herakles based on ancient equations.[104] KAI 47, a second-century Greek-Phoenician inscription from Malta, supports the identification between Herakles and "Melqart, lord of Tyre" (*mlqrt bʿl ṣr*). Philo of Byblos is said to make this identification (*PE* 1.10.27).[105] *De Dea Syria 3* likewise mentions the "Herakles at Tyre" who "is not the Heracles whom the Greeks celebrate in song. The one I mean is much older and is a Tyrian hero."[106] Some texts have been used to support the idea of the Tyrian Herakles as a "dying and rising god." Josephus twice records the same account derived from Menander of Ephesus. In book VIII of the *Antiquities of the Jews*, Josephus refers to *egersis* in connection with Heracles.[107] The passage in question describes the activities of Hiram of Tyre (*Antiquities* VIII, 5, 3, para. 146). The context is provided from paragraph 144 through the pertinent line in paragraph 146 from R. Marcus's translation:

> These two kings are also mentioned by Menander, who translated the Tyrian records from the Phoenician language into Greek speech, in these words: “And on the death of Abibalos, his son Eiromos [Hiram] succeeded to his kingdom, who lived to the age of fifty-three and reigned thirty-four years. He it was who made the Eurychoros (Broad Place) embankment and set up the golden column in the temple of Zeus. Moreover, he went off and cut timber from the mountain called Libanos for the roofs of the temples, and pulled down the ancient temples and erected new ones to Heracles and Astarte; and he was the first to celebrate the awakening of Heracles in the month of Peritius (*prōtos te tou Herakleous egersin epoiēsato en tō Peritiō mēni*)”[108]

Josephus provides no context for the phenomenon of “the awakening of Herakles,” and scholars are quite divided over its significance. Furthermore, some commentators take the passage as a reference to the erection of a temple.[109] This interpretation, for example, is the thrust of H. St. J. Thackeray’s view in his translation of Josephus, *Against Apion* I.119, which uses the same language about Herakles:

> I will, however, cite yet a further witness Menander of Ephesus. This author has recorded the events of each reign, in Hellenic and non-Hellenic countries alike, and has taken the trouble to obtain his information in each case from the the national records. Writing on the kings of Tyre, when he comes to Hirom he expresses himself thus: “On the death of Abibalus the kingdom passed to his son Hirom, who lived fifty-three years and reigned thirty-four. He laid the embankment of the Broad place, dedicated the golden pillar in the temple of Zeus, went and cut down cedar wood on the mount called Libanus for timber for the roofs of temples, demolished the ancient temples, and built new shrines dedicated to Heracles and Astarte. That of Heracles he erected first, in the month of Peritius (*prōton te tou Herakleous egersin epoiēsato en tō Peritiō mēni*).”[110]

The authenticity of Josephus’s information has been long supported by a Roman period Greek inscription from Philadelphia (Amman). The inscription is partially broken: a man named Maphtan calls himself, in F. Abel’s term, “excitateur d’Hercule” (*egerse[iten tou] Herakleou[s]*).[111] But

egersis need not involve death as such. Moreover, even if "awakening" of the god were the correct interpretation of *egersis*, no context is provided for this "awakening." And equally important for any argument for a "dying and rising god," the tradition is silent on the putative death of the god. The evidence came secondhand to Josephus, and it is hard to know what to make of these texts' context as a source for understanding the cult of Herakles.

Information hailing from the western end of the Mediterranean at Gades (modern Cadiz) on the southwestern coast of Spain suggests a tradition of the god's death. Sallust mentions a source attesting to the god's sepulchre in the Gades temple.[112] J. B. Tsirkin points further to the description of the iconography of the Herakleion gates at Gades known from Silius Italicus, which include the burning of the hero, with "the great soul soaring up in flames to the stars."[113] Tsirkin understands this scene as a representation of the god's death and resurrection. It is by no means assured that Tsirkin is correct either in his interpretation of his Latin source or in his assumption that the interpretation of this source represents the indigenous Punic understanding rather than a Roman interpretation of the iconography. Yet, even if Tsirkin were correct on both counts, we do not know whether the traditions at the opposite ends of the Mediterranean basin were uniform. We do not know about the basic eastern tradition of the god's death. However, I am inclined to accept the possibility of a Phoenician tradition of the god's death because it is rendered in terms that may recall the Phoenician practice of cremation.[114] Even if one assumes there was a god's "death," one cannot assume that any "resurrection" was involved. Furthermore, the ritual context is inadequately known.

Adonis

Adonis has long been cited as the paradigm case of a "dying and rising god."[115] Given the Semitic character of the name Adonis (cf. Ugaritic *'adn*, Phoenician *'dn*, BH *'adôn*, "lord"), it is usually thought that Adonis was originally a Phoenician god from Byblos.[116] There are, however, no extant indigenous descriptions of Adonis. One of the fuller classical witnesses is *De Dea Syria* 6, a second-century C. E. text that recounts how Adonis's death is celebrated at the sanctuary in Byblos:

> As a memorial of his suffering [i.e., his death because of a boar] each year they beat their breasts, mourn and celebrate, and celebrate their rites. Throughout the land they perform solemn lamentations. When they cease their breast-beating and weeping, they first sacrifice to Adonis as if to a dead person, but then, on the next day, they proclaim that he lives and send him into the air.[117]

This account is perhaps the closest one resembling a death and resurrection, but even here the passage is hardly clear.[118] Other sources provide further information about Adonis, especially his relationship with the goddess Aphrodite (thought by many to refer to Astarte), as well as the various local traditions and rituals associated with him. However, no descriptions present a death and resurrection. Unlike rituals for Osiris, Dumuzi, and Baal, some rituals devoted to Adonis center on the demise of vegetation in the form of special gardens devoted to the cultivation of cereals and vegetables in earthen pots, which wilted under the heat of the summer sun shortly after being planted. These rituals accentuate Adonis's death; there is no hint of rebirth.[119] J. Z. Smith too rejects Adonis as a rising god. He claims that the classical accounts of Adonis neither mention nor describe his rising from death and that only accounts fashioned by Christian writers introduce the theme of Adonis's resurrection.[120]

Finally, Frazer's survey of Adonis was highly selective, addressing only those aspects of the tradition that comport with the features he abstracted from other "dying and rising gods." Hence, M. Detienne is extremely critical of Frazer's silence on some of the most important material about Adonis:

> [Y]et we have only to read the myth of Adonis in the version given by Panyassis of Halicarnassus (who was related to Herodotus), to see at once that Adonis—like so many others dealt with in this way—has been surreptitiously taken out of his true context and distorted by scholars applying an unchecked comparative method in which they are so carried away by the resemblances they believe they have discovered that they ignore the differences which might have set them on the right path.[121]

The “right path” for Detienne involves examining all the cultural information encoded in the different versions of Adonis myth. And this inquiry shows the highly selective character of Frazer’s treatment. The structuralist strategies of interpreting mythology in Detienne’s hands have the effect of showing a great deal of information Frazer ignored. If this deficit of Frazer’s work may be regarded in a more positive light, it would suggest that the themes he highlighted are major notes to be observed.

Adonis’s Semitic background has been the subject of major discussion. Despite the considerable differences between Baal and Adonis, valiant efforts have been made to reconstruct the West Semitic background of the Adonis traditions based on the textual evidence about Baal attested at Ugarit.[122] In the most substantive modern effort, N. Robertson interprets the Baal Cycle as the outgrowth of rituals he detected in the Adonis traditions.[123] Robertson reconstructs an ancient ritual background by using the classical explanations (*aitia*) given for the traditions associated with Adonis. Robertson extends this approach to the Baal Cycle. For him, the Baal Cycle contains reflexes of Baal/Adonis rituals: the winnowing of Mot in CAT 1.6 II corresponds to a threshing rite of the gardens of Adonis, which flourished, only to expire in the summer.[124] Although some Adonis traditions may be related to the Late Bronze Age Ugaritic traditions of Baal, it is not the Baal Cycle, but other narratives about Baal (notably CAT 1.12) that—if actually related—represent the clearer Ugaritic antecedent to the classical narrative about the boar goring Adonis.[125] Although the Adonis traditions reflect some earlier material, these traditions have amalgamated material from a variety of sources deriving from different time periods and may not represent a direct reflection of the Baal Cycle.

Even more problematic, Adonis shares relatively few traits with Baal. After all, Baal is a storm god, warrior, and major figure of the pantheon. Unlike Osiris and Baal, but perhaps like Dumuzi, Adonis is a mortal. J. Z. Smith characterizes Adonis as good-looking and young, “inefficient as a hunter,” but “deemed a paragon of anti-heroic behaviour.” If any of the figures I have thus far discussed share any family resemblance with Adonis, it is Dumuzi. Dumuzi and Adonis stand out as humans or perhaps deified humans, young figures (both possibly associated with a major goddess) who are not warriors. In contrast to these figures, Baal and Osiris are major gods. The ritual lamentation devoted to Dumuzi and Adonis and specific links with vegetation distinguish them further from Baal and Osiris. With

the similarities between Dumuzi and Adonis, one might ask whether the cults of Dumuzi and Adonis (and Melqart?) were historically related, a view Frazer himself suggested.[126] It is evident that the cult of Dumuzi spread from Mesopotamia to Syria-Palestine during the first millennium, as reflected in Ezekiel 8:14.[127] Isaiah 17:9–11 also seems to reflect a Judean cult of Tammuz or Adonis.[128] Or one might ask if the disappearing fertility god behind the Adonis traditions was instead Damu, because one of the El-Amarna letters from Byblos (EA 84:31) refers to AN.DA.MU-*ia*, which has been usually taken as ^{d}*da-mu-ia*, literally "my Damu."[129] Finally, despite the possibility of a historical relationship between Adonis and Dumuzi, Detienne warns that the further trajectories of the Adonis traditions in Greek material remove this figure far beyond recognition with any particular Middle Eastern god.[130]

An Unknown Phoenician God

The argument for a Phoenician "dying and rising god" has been built further on a Phoenician inscription from the Etruscan site of Pyrgi (KAI 277) dating to around 500. The dating formulary gives the year, month, and day. Line 8 provides the dating formula, "the day of the burial of the god" (*bym qbr 'lm*).[131] Although this inscription suggests the death of some god, no one knows which god was involved. (The only deity mentioned by name in the inscription is the sun-god in line 5, and there is no need to connect him with the referent found in the dating formula.)[132] It is evident that *qbr 'lm* is a frozen expression with no particular relationship to the content of the rest of the inscription.[133]

Gibson proposes to identify the unnamed god with either Adonis or Melqart.[134] If Melqart could be sustained, this inscription might then be linked to the title *mqm 'lm*. However, in his treatment of the Pyrgi inscription, J. A. Fitzmyer expresses doubts: "We see no need to understand *qbr 'lm* in terms of the burial of *Adonis*, which some commentators have suggested (at least as a possibility)."[135] Fitzmyer's reservations about this evidence are appropriate. G. A. Knoppers has recently offered a very strong challenge to the theory of "a dying and rising god" in this inscription. Following a proposal of W. F. Albright, Knoppers suggests that *'lm* in the

Pyrgi inscription refers to “a recently deceased person for whom Thebariye Velinas [the king named in the inscription] built this shrine.”[136] Knoppers points to evidence of Etruscan divination of the deceased, which would comport with his view of *’lm*. He summarizes his overall interpretation of the inscription:

> The much-debated phrase, “the day of the burial of the deity,” thus refers to the day on which the deceased was buried. His *bt* becomes both tomb and temple, mausoleum and shrine. On his death the person would become deified, hence clarifying the intent of the closing phrase, “as to his years during which the god (resides) in his temple, (may they be as many) years as these stars.” In accordance with Etruscan burial beliefs and customs, the spirit of the dead is to be in his house forever. Recognizing the funerary character of the Pyrgi lamina therefore not only resolves ambiguities, but also reveals a hitherto undisclosed unity of purpose and design in the text.[137]

Beause of the uncertainty of the referent of *’lm*, it is impossible to substantiate a Phoenician cult devoted to “a dying god” in this inscription, as some scholars inspired by Frazer proposed. Moreover, even if a Frazerian view of “the god” did prove to be one of the “dying and rising gods,” the text provides no context for a ritual about the death. And the text is certainly silent on any issue of resurrection.

To conclude this survey, the figures identified as “dying and rising gods” share limited commonality. It is evident that several of the figures are regarded as dying or disappearing in a manner related to seasonal phenomena. To a limited degree, it is possible to regard at least Dumuzi and a number of other minor Mesopotamian figures as disappearing or dying “fertility” divinities (even though Dumuzi’s divinization was secondary and his association with fertility was due to amalgamation with some of these figures). I think Frazer was quite right to draw attention to the concern for natural fecundity, even if its character varied (crops versus animals; clearly seasonal or not); and he was correct to note the divinity of most of the figures involved, even if the character of that divinity varies significantly. Finally, the kingship of many of the characters is no minor point. The mythic dramas involve the different divine or divinized members of the

royal, cosmic family. In these dramas, the action revolves around males, whereas females play a largely subsidiary role (here the traditions concerning Dumuzi and Inanna are an exception). Kingship, at least of Osiris and Baal, however different, denotes power, and here a king is paradigmatic; in the ancient Near Eastern texts goddesses do not die.[138]

Frazer's survey also manifests major problems in method and data. Four major difficulties stand out for my purposes here. First, Frazer's method assumes a category applicable across thousands of miles and years as well as a multitude of cultures. The data are spread not only all over the ancient Near East and classical world; they also range widely in date, from the third millennium[139] through the late classical period. Second, the figures in Frazer's theory vary widely in character. Although many of these figures are associated with natural fertility, they otherwise differ tremendously: some (Osiris) do not "rise" (it is unclear if any do), some are storm-gods (Baal, Hadad-Rimmon, Melqart [?]) whereas others are not (Osiris), and still others may not even be gods (Dumuzi, Adonis [?]). Many of them are poorly documented for the purposes of this category. Third, the ritual background posited for these figures is absent from indigenous Levantine evidence. Some ritual background is evident in the Egyptian and Mesopotamian records, but the ancient West Semitic cultures are virtually mute about ritual information pertaining to these figures.

Fourth, and finally, some of the best evidence pertaining to "dying and rising" derives from late classical authors, who often received their information secondhand. The Phoenician texts cited in support of this category are relatively late and poorly understood. Without a clearer knowledge of these texts' background, they hardly qualify as compelling evidence. The use of evidence from the first millennium to assess data from the second is potentially anachronistic and misleading. Although to dismiss out of hand possible support from Phoenician-Punic or Greek evidence, as meager as it may be, would be unwise, caution about comparing this late material with the second-millennium evidence about Baal. In short, evidence about these gods can offer no positive conclusion about the cult of gods in earlier periods. Even if all of this evidence referred to a single Phoenician god who "dies and rises," the indigenous understanding of the phenomenon may have been quite different from what the account of *De Dea Syria* suggests. The late classical authors were not credible witnesses to

contemporary religions foreign to them; the same point applies all the more to foreign religions that preceded them.

Finally, the problem with this entire survey is that it meets Frazer's category largely on its own terms. Frazer may be credited for drawing attention to certain themes that recur at least in part in a number of the different figures' mythologies, but the question equally important for understanding these gods is the social or political encoding specific to each culture. Frazer's category takes insufficient account of the figures within their own cultures, which have their own complex histories. Indeed, the label "dying and rising gods" presupposes that the deities are the focal point of the category. Instead, what truly drives the similarities Frazer observed, as far as the present evidence reasonably shows, is the continuity of life in the face of death in the natural, human, and divine spheres, as well as the royal funerary cult as the cultural context for the experience and expression of this theme. A significant feature of some of these deities is the apparent incorporation of information drawn from nature and funerary practice. I have noted the impact of mortuary practice and belief on the descriptions of Dumuzi and Osiris. The descriptions of Melgart's death by fire may have drawn on the Phoenician practice of cremation.[140] A similar cultural dynamic may be involved in the case of Ugaritic Baal.

4. Foundations for a Theory of Baal's Death and Return to Life

To begin, it is important to note the limits of the Baal Cycle's information about Baal's death and return to life. The extant Baal Cycle never recounts Baal's return to life. Therefore, any attempt to render a reconstruction of Baal's death and return to life should make no assumption about the nature of the latter.[141] Furthermore, this narrative presentation of the god may not derive from a specific ritualistic understanding of Baal as a "dying and rising god." Indeed, given the ritual underpinnings of Frazer's work (and the work of his intellectual heir in the ancient Near Eastern field, T. H. Gaster), the absence of the god's death or his revivification from any of the seventy or so[142] ritual texts is significant. As S. Ackerman rightly notes, "[W] do not know how (or if) this Ugaritic mythology which describes

Baal's death and the associated mourning was commemorated in the Late Bronze Age Canaanite cult."[143] Baal's death and return to life may not themselves reflect ritual involving Baal. Instead, the narrative is a literary statement incorporating ritual notions; it is difficult to situate the text in a ritual context. To my mind, this lack of evidence does not prove absence, but the burden of demonstration for Baal as a "dying and rising god," with its attendant ritual background, falls on those who argue for it.

If Baal is not a "dying and rising god" (and perhaps no god is), then another approach is required. Criticizing the long-reigning paradigm of "dying and rising gods" hardly lays to rest the evidence in the Baal Cycle. More recent scholarship tends toward a revised label of "disappearing gods" associated with fertility. The category of "disappearing gods" is common now in ancient Near Eastern scholarship[144] and among historians of religion.[145] J. Z. Smith's comment is pertinent: "The putative category of dying and rising deities thus takes its place within the larger category of dying gods and the even larger category of disappearing deities. Some of these divine figures simply disappear; some disappear only to return in the near or distant future; some disappear and reappear with monotonous frequency."[146] Compared to the category Frazer created, this one seems more descriptive and makes fewer assumptions. Smith's attempt to provide a better grounded category of "disappearing gods" finds support in a comparison with the closest second-millennium analogues to Baal, the Anatolian disappearing deities. One might argue that Baal shares less with Dumuzi, Tammuz, and Adonis than with the Hittite disappearing gods, the Storm-god and his son, Telepinus.[147] About a dozen different Hittite divinities, mostly not storm-gods, appear as "disappearing deities."[148] Only some versions concern the procession of seasons, and none involves death. In the versions of the Telepinus myth,[149] the storm-god departs in anger from the realm of human culture and agriculture and goes to the steppe and sleeps. As a result, vegetation and animals no longer produce. Desperate, Telepinus's father the Storm-god sends out divine search parties to find the god, including the sun-god. Finally, the Bee finds him and wakes him from his sleep with a sting. A discussion ensues, and after a break in the text, the ritual prayer to the god attempts to assuage his anger. After the ritual, the narrative resumes with the return of Telepinus, which issues in his care for the king and queen and the fertility of crops and animals.

Six basic similarities obtain between this version and the Baal Cycle. First, the two deities are similar in type: Baal is a major storm-god like Telepinus and his father. Second, both gods are also responsible for nature as well as both humanity and divinities. CAT 1.4 VII 50b–51 presents Baal's claim that applies to both "gods and men." Similarly, the absence of Telepinus from the land brings hunger of both humans and gods: "The pasture and the springs dried up, so that famine broke out in the land. Humans and gods are dying of hunger."[150] Accordingly, the disappearance of these storm-gods correlates with the withering of vegetation. Telepinus's absence due to his journey and sleep causes the destruction of vegetation, and his return restores fertility.[151] Baal's absence causes in El's lament for the peoples (1.6 I), and his return is presaged by El's oracular dream that shows the impending return of the land's fertility (1.6 III). General well-being of the society is also a concern of this text. The Hittite material mentions the king and queen. A similar concern for royalty may be implicit in the Baal Cycle.[152]

Third, the narratives describe the god's absence, which issues in a divine search for him (1.6 IV). The Ugaritic texts likewise attest to the search for the disappearing god. In an important study, S. B. Parker demonstrates that 1.16 III contains a command to go about (*sb*; cf. *sbn* in 1.5 VI 3) the heavens and earth to search for Baal, since the god's meteorological effects are lacking (lines 3–5).[153] The search for Baal in lines 3–5 matches 1.5 VI 3–5 quite closely and suggests a shared theme of the disappearing god and the search for him. Fourth, both searches involve the sun-deity (1.5 V–VI). Fifth, the searches take place in the steppe, including the mountains (see 1.5 VI).

Sixth, and finally, Baal's disappearance in the form of a descent to the underworld may seem unusual for a disappearing storm-god, but even on this point the Hittite material affords some help, as the disappearance of the Storm-god of Nerik includes his descent to the underworld:

> The Storm God of Nerik became angry and went down into the pit. He [went] into the dark [four corners] and […] to(?) the bloody, bloodstained,…[…]mortals.
>
> "Let them summon [him …]. Let him turn himself […] to the Dark Earth. Let him come […]. Let him open the gates of the Dark

Earth […]. Before him/it [let …]. Let them [bring(?)] the Storm God of Nerik up from the Dark Earth.[154]

This particular presentation seems to be related to the offerings made to the pit[155] in the Hittite text.

By the same token, the differences between the Baal Cycle and the Hittite material are to be recognized as well. In contrast to the Hittite disappearing gods, Baal's disappearance assumes the form of human death, complete with burial and funerary offerings, carried out by Anat and El (CAT 1.5 VI–1.6 I). The Hittite disappearing gods may sleep, but they do not seem to undergo death. Furthermore, the Hittite material does not seem to be preoccupied with the god's kingship as such; it is driven by the ritual concerns of appeasing the absent god. In contrast, central to the Baal Cycle as a whole is the kingship of the god (and, I suggest, the kingship of the Ugaritic dynasty whom Baal served as royal patron). Finally, the Baal Cycle encodes the Ugaritic dynasty's fragility in the figure of Baal and his death. In contrast, the Hittite dynasty never suffered from the sort of political vassalage or domination which it imposed on Ugarit.

What strongly stands out in the Baal Cycle, to restate the obvious, is the place of dying as a subcategory of disappearance in the Baal Cycle. J. Z. Smith, I think, flattens the significance of this point: "Despite the shock this fact may deal to modern Western religious sensibilities, it is commonplace within the history of religions that immortality is not a prime characteristic of divinity: gods die."[156] Smith believes that his point might be shocking to modern readers of ancient myths; it would have been problematic to many of ancient Ugarit as well (so T. J. Lewis, personal communication). The son of Kirta asks whether gods can die (CAT 1.16 I 14–15, 17–18, 20–23; cf. virtually the same speech in II 36–38, 40, 43–44):[157]

"In your life, O father, I rejoice,	*bḥyk ’abn ’ašmḥ*
In your non-death, we exult …	*blmtk ngln*
So, father, shall you die like mortals? …	*’ap ’ab kmtm tmtn*
How can it be said that Kirta is a son of El,	*’ikm yrgm bn ’il krt*

	Progeny of the Beneficent and Holy One?	*špḫ ltpn wqdš*
	So can gods die,	*’u’ilm tmtn*
	The Beneficent’s progeny not live?”	*špḫ ltpn lyḫ*

In West Semitic cultures deities with active cultic devotion die rarely, if ever (unlike cosmic divine enemies such as Yamm and Mot, whose deaths would be welcome to a human audience). Baal’s demise is therefore all the more striking. E. Hornung reports only rare occurrences of divine death in the vast wealth of Egyptian texts, and even these make no explicit statements that a god died.[158] In Mesopotamia, not only Dumuzi suffers death; the gods of old die as well. Yet these cases represent a major exception in the ancient Near East rather than a “commonplace,” to use J. Z. Smith’s characterization.

As a result, it is necessary to take account of the motif of dying in the Baal Cycle and to provide some means of locating it within the society of ancient Ugarit. When scholars look for similar language for Baal’s death and funerary conditions, they turn to the royal funerary text, CAT 1.161, which shows important links with the Baal-Mot section of the Baal Cycle (CAT 1.5–1.6). From these connections one may posit that the royal cult of the dead made a profound impact on the literary presentation of Baal. A helpful parallel to the Baal-Mot section is provided by CAT 1.161:[159]

30	Seven and an offering:	*šb‘.w.ṯ‘y.*
31	You shall present a bird.	*tqdm ‘ṣr*
32	Peace, peace to Ammur[api], and peace to his house,	*šlm šlm*[167]*.‘mr[p’i]/w.šlm.bth*[168]*.*
33	Peace to [Tha]ryelli, peace to her house,	*šlm.[ṯ]ryl*[169]*/šlm.bth.*
34	Peace to U[ga]rit, peace to her gates!	*šlm.’u[g]rt/šlm.tġrh*

Line 1 is an extra-textual rubric or superscription introducing the sacrificial text. This title shows that the text is a record or document indicating sacrifice, perhaps for the dead if *ẓlm* means “shades.”[170] Whether *dbḥ* is singular or plural cannot be determined only on the basis of form. Superscriptions of ritual texts (1.148.1, 1.162.1[171]) perhaps use the singular form even when the ritual involves multiple offerings, as in 1.161.27–31.

Section 1, consisting of lines 2–12, invokes the names of two groups: the dead ancient tribal heroes (lines 4–7) framed by the designations Rapi’uma of the Underworld (cf. biblical Rephaim) and the Council of Didanu (lines 2–3, 8–10) and two more recent deceased monarchs,

Ammithtamru and Niqmaddu (lines 11–12). The Rephaim here appears to be a general designation for the line of deceased ancestors. The parallel designation, the "Council of Didanu," refers to the same group, but they are identified with the figure of Didanu. Didanu is known from Old Babylonian records, specifically the Genealogy of the Hammurapi Dynasty, as one of the ancient heroes of the West Semitic royal line of Hammurapi. The royal line of Ugarit evidently derived from the same line. The Ugaritic and Babylonian dynasties evidently traced their lineages back to an ancient hero, Didanu. In addition to the ancient tribal heroes named in lines 4–7, the historical kings, Ammithtamru and Niqmaddu, are invoked to summon their presence in the ritual. From the perspective of the ritual participants, these figures dwell in the netherworld, as suggested by the phrase "Rapi'uma of the Underworld." The singular verbal forms in lines 4–7 and 11–12 morphologically could be imperatives or suffix indicatives, but the second-person plural forms in lines 2–3 and 8–10 appear to preclude the first option.[172] The forms could be either active[173] or passive suffix indicative forms.[174] On the theory that all four sections address participants in the ritual, the forms seem to be passive "performative perfects," despite the claim sometimes made that the G-passive is poorly attested and therefore suspect here.[175] In fact, the G-passive is a regular form for Ugaritic.[176] The alternation between singular and plural verbal forms, if passives, would correspond to the number of the nouns in the same lines.

Section II, lines 13–17, contains a number of debated items. The subjects of the verbs are perhaps the biggest problem. T. J. Lewis, J. G. Taylor, and M. Dietrich and O. Loretz take the furniture as the second-person subjects of the verbs in lines 13–16. For Pardee, the subject is impersonal. According to either view, the royal furniture pieces are invoked to weep for their deceased lord, Niqmaddu III, the last named figure in the first section and predecessor of the living king, Ammurapi, mentioned in the final section of the ritual. The point of the commands is mourning for the king to whom the furniture belongs. In other words, King Ammurapi is to lament for his predecessor on the royal furniture.[177] Accordingly, Ammurapi the subject of the verbs in lines 14–16. Line 17's threefold mention of *ʿdmt*, "misery," is here divided, as suggested by *w*-. A superlative is involved here, akin to BH *melek mĕlākîm*, "king of kings" (e.g., Ezekiel 26:7), and *šîr haššîrîm*, "the song of songs" (Song of Songs 1:1). It is possible, however, that a threefold use is intended (cf. *qādôš* in

Isaiah 6:3, possibly signifying superlative degree),[178] but this tack is complicated, in view of the placement of the *w*-preceding the third occurrence of *ʻdmt*.

Section III, lines 18–26, begins by invoking the sun-goddess either to burn (according to Pardee) or "to bow down" (as adopted by Lewis). In lines 19b–26, Shapshu calls either the recently deceased King Niqmaddu[179] or the living king, Ammurapi,[180] to descend to the underworld to be with his deceased predecessors. The narrative rubric here precisely matches 1.6 II 22–23. At this point the sungoddess appears as a participant in this ritual. She is commanded by and in turn addresses the main ritual participant, King Ammurapi.

Section IV, lines 27–34, begins with a series of offerings. The listing of seven offerings in lines 2 7–30a is formulaic; no verb may be involved in these lines, only a series of nouns.[181] Elsewhere such series function as temporal modifiers to verbs (CAT 1.4 VI 24–32; 1.14 III 2–4, 10–12, etc.),[182] and it is assumed here that the number + ṯʻy essentially means that "x-times as an offering." ṯʻy could be an incense-offering,[183] but the context in CAT 1.40 suggests a more generic sense.[184] If so, then the bird might be the animal for the sacrifice, ṯʻ*y* is a general word for offering, and *šlm* is the name of the sacrifice. In this case, only in lines 30b–31a is the command completed: these offerings are to be given as a peace offering in the form of a bird. The goal of the intended ritual is peace for the royal household and Ugarit. Considering the royal background of the names listed in the third section, one may suppose that the royal family is involved. Furthermore, because the final section is devoted to a blessing of peace for Ammurapi, his household, and Ugarit more generally, King Ammurapi is possibly the ritual participant summoned to make the offering.

B. A. Levine and J. M. de Tarragon have noted in some detail four major features that this funerary text shares with the Baal-Mot (Death) section of the Baal Cycle (1.5–1.6), especially 1.5 VI–1.6 I.[185]

1. In the Baal Cycle, El and Anat both mourn the fallen Baal. To lament him properly, El descends from his throne to his footstool and then from his footstool to the dust and then utters words of lamentation (1.5 VI 11–25a). After Anat's similar lamentation (1.5 VI 31, 1.6 2–10), Anat conducts the proper burial practice of Baal's

corpse (1.6 I 10–18a). CAT 1.161 reflects a similar complex of funerary practices. The family of the deceased king engages in the funerary liturgy in order to lament him. Moreover, lines 14–15 call on the royal table and footstool to engage in lamentation by weeping, a superlative means of signaling the sorrow expressed by the royal participants who customarily use these pieces of furniture. As Levine and de Tarragon note, the "appurtances *swallow* their tears [CAT 1.161.15–16], just as Anath *drinks* her tears [CAT 1.6 I 9–10]."[186]

2. In the ritual the king, whether the deceased Niqmaddu[187] or the living Ammurapi[188] (the latter more favored by the parallel), is to locate his ancestors in the netherworld. In the myth Anat, Baal's sister, locates him in the underworld.[189] Levine and de Tarragon note the precise wording shared by the two texts, as well as that of Jacob's words spoken in mourning the loss of Joseph:

Liturgy: *'aṯr b'lk 'arṣ rd*,
"After your lord(s) (*b'l*) to the underworld descend." (1.161.20–21)

Myth (1): *'aṯr b'l 'ard b'arṣ*
"After Baal (*b'l*) I will descend into the underworld." (1.5 VI 24b–25)

Myth (2): *'aṯr b'l nrd b'arṣ//'mh trd nrt 'ilm špš*,
"After Baal (*b'l*) we will descend into the underworld."
To him descends[190] the Divine Light, Shapshu.[191] (1.6 I 7b–9a)

Family Legend: *kî-'ērēd 'el-bĕnî 'ābēl šĕ'ōlâ*,
"For I will descend to my son in mourning to Sheol." (Genesis 37:35)

The liturgy calls on the family member, the king, to make the ritual descent, where as in the myth Anat, the sister of the deceased, declares her intention to make the descent to the underworld (on the basis of this similarity, I am inclined to see the living king as the addressee, although this king, Ammurapi, is not mentioned explicitly until line 31). The point of the relationship between family funerary ritual and

the literary setting of the Baal Cycle is expressed in the designation of the deceased king: the ritual calls the human king *b'l*, where as myth focuses on *b'l*, the divine king.[192]

3. As indicated by Anat's words to Shapshu in 1.6 I 7b–9a (quoted in myth 2), the sun-goddess is to accompany the mourning family member in the ritual descent. Levine and de Tarragon comment:[193] "In the myth, the descent into the netherworld is accomplished by a goddess. In the ritual, it is acted through recitation." As myth 2 shows, 1.6 I 7 incorporates the plural *nrd*,[194] indicating that Anat intends to be joined by Shapshu, and the following line explicitly mentions the sungoddess's role of accompaniment in the ritual descent. In the myth it is Shapshu and Anat who descend together and haul off Baal's corpse from the underworld to render it a proper burial (1.6 I 10b–18a). In the ritual Shapshu is seen as participating in the ritual directions to make the ritual descent into the underworld (1.161.18–19). The directions may even direct her to "burn bright" (*'išḫn*) in order to provide illumination into the underworld. Or, if this verb is to be taken in the sense of descent, then it would cohere with the sun-goddess's wellknown night journey through the underworld (see 1.6 VI 45a–53). Accordingly, she plays the role of intermediary between the realms of life and death. It may not be amiss to note the same formula introducing her speeches in the myth and the ritual: *'ln špš tṣḫ*, "On high Shapshu cries out" (1.6 VI 22b–23a; 1.161.19).
4. Less noticed, both the funerary liturgy (CAT 1.161.27, 30) and the mythological presentation (1.6 I 18b–29 [or 31?]) end the funerary customs with a series of offerings.

From these comparisons,[195] one may conclude that information drawn from the royal funeral has influenced the presentation of Baal's death and return to life. The impact of royal funerary custom on the Baal-Mot narrative is not a matter only of general funerary practice; it is also encoded in specific wordings and motifs. Baal is modeled on the perceived fate of Ugaritic kings who die and descend to the Underworld; in their case, they may temporarily come to life. This picture is based on analogy with human existence, much as other mythological presentations of deities are modeled on human experience. For example, El has an oracular dream in 1.6 III; this,

too, is modeled on the human experience (cf. Kirta's dream in 1.14 I). The liturgy that made its impact on the Baal Cycle's presentation of Baal's death and return to life was not a ritual devoted to mourning the god's death but a ritual describing the lamentation for deceased human royalty.[196] The most thematically proximate text, one of the Panammu inscriptions (KAI 214.21), suggests that the person(s) returned to "life" is a deceased king who may eat and drink with the great West Semitic storm-god;[197] it is not the god who returns to life.

In Ugarit's cultural context, Baal's fate may reflect his affinity to the condition of Ugarit's dynasty, both the deceased king and his living successor. The members of the dynasty were known to die, and they supposedly had a continued existence in the afterlife.[198] Moreover, their successors continued the dynasty and its role in Ugarit. CAT 1.161 witnesses to these aspects of royal life. The text, at once mourning the deceased king and identifying his living successor, ultimately celebrates the link between the two; indeed, the text's list of ancestors highlights the dynastic continuity between the deceased and living kings. Baal's death and return to life may represent a theological reflection on reality that incorporates the known conceptualization of Ugarit's monarchy.[199] Baal's death reflects the demise of Ugaritic kings, but his return to life heralds the role of the living king to provide peace for the world. Death is the form that the disappearance of Baal takes. The storm-gods of Hatti disappear, sleep, and return as they wish; the process was viewed as their choice, and ritual propitiation was thought to be required to ensure their return. In contrast, Baal does not choose to disappear. And as a divine king, his inexorable disappearance takes the form of royal death. In contrasting the narratives concerning Telepinus's sleep and Baal's death, there are two ways to indicate the absence or disappearance of the god; one indicates divine will in the matter, where as the second suggests the absence of divine choice.[200] The special form of disappearance Baal's death takes coheres on the literary level with the weakness the god manifests throughout the cycle.[201] This divine death likewise coheres on the natural and human levels with the weakness or annual failing of agricultural fertility and the potential threats faced by human society and by the maintainer of societal order, the Ugaritic monarch.

5. The Conceptual Ideology in Baal's Life and Death

In this approach to the Baal-Mot section of the Baal Cycle (1.5–1.6), it may be possible to offer a brief synthesis of the picture of reality the Baal Cycle offered for ancient Ugaritic. The central unifying thematic of the cycle is Baal's kingship, which affects the natural, human, and divine levels of reality.[202] The text plays out the action on the divine level, yet behind this stage are the concerns for humanity and nature. Hence, Baal's kingship, ostensibly related in a story about the divine struggle for kingship, plays out on all three levels simultaneously. Baal's rule manifests the weather to produce the rains for crops and animals and therefore satisfy humanity's needs for food and deities' needs for human offerings. Baal's rule lies at the heart of the great chain of relations between nature, humanity, and divinity. This kingship is precarious, subject to threat, and apparent on all three levels; it may be schematized in the following manner:[203]

	KINGSHIP
divine level	order and conflict
human level	life and death
nature level	abundance and dessication

All three levels of reality are intertwined and affect one another. Baal's kingship provides a defining intelligibility to all of reality as understood in ancient Ugaritic society. The royal funerary ritual encoded in the Baal Cycle may signal the historical threats to dynasty from external strains posed by the empires of Egypt and Hatti or from the internal difficulties a monarchy faces. (Dynastic woe is the central problematic of the entire text of Kirta in 1.14–1.16.) Accordingly, Baal is representative of kingship, both in its strength and its weaknesses, including the moment of weakness of royal succession when the old king has died and the new king is about to begin his reign. In a sense, Baal displays the "baal-ship" of the old and new kings, of the dynastic line in life as well as death. Thus, kingship is fragile, in need of help and nurturing from many major deities. The presentation of Baal as a relatively weaker figure needing extensive divine assistance is consistent with his presentation throughout the cycle. Indeed, Baal is no super-

conquering god like Marduk in Enuma Elish or Yahweh in so much Israelite poetry. The evocative picture of reality in the Baal Cycle encoded cultural information known to the society of ancient Ugarit; this chapter has stressed only the funerary aspects of this information. Yet many other sorts of information were incorporated in this text and synthesized a whole, well-ordered narrative that provides a place for ancient human experience known to ancient Ugarit.

The preceding discussion indicates the contributions and drawbacks of Frazer's theory. Frazer highlighed the major themes in a wide array of ancient literatures, yet his agenda was costly. Although Frazer highlighted the crucial themes of natural fertility and the divinity of some of the figures involved, he wound the themes into a new mythology of "dying and rising gods." The source for much of this new creation was the classical literature that provided him with a model as he linked different figures and attributed a negative psychological mindset to their ancient worshippers. Frazer's new mythology was cast in the new idiom of the nascent anthropology and assumed the mantel of its authority. Part of the intellectual baggage of this field was a relationship between myth and ritual that has recently come under attack. For decades the dominant paradigm for reading the Baal Cycle was to see it as the libretto for a cultic or ritual drama. There is, in fact, no evidence for such a ritual background for the Baal Cycle. Instead, this text was a literary achievement that incorporated motifs known from ritual, but it is itself not located against a ritual setting.[204] The relationship between myth and ritual that Frazer and his intellectual heirs assumed has been probed thoughtfully in the work of A. Livingstone. For example, Livingstone has questioned the ritual background to the Dumuzi myths: "[I]t is absolutely certain that the myths did not originally belong to the rituals, and the rituals did not originally mean the myths."[205] Furthermore, a cultic drama replaying the myth also seems unlikely for the Dumuzi traditions; Livingstone asserts that "religious or cult drama in the sense of a conscious enactment of myth is not involved."[206]

More constructively, the survey of figures points to the influence of natural phenomena and mortuary cult on their mythological presentation. In discussing Adonis, Frazer touches on the question of these very influences: "Thus their views of the death and resurrection of nature would be coloured by their views of the death and resurrection of man, by their personal sorrows and hopes and fears."[207] In the case of Baal, these words might be

modified. Although the Ugaritic view of nature affected the presentation of Baal as a storm-god, a further influence on the presentation of Baal's death and return to life was royal funerary ritual. The same has been suggested for Osiris and Melqart-Herakles. Livingstone offers a formulation about Dumuzi and nature that applies equally to Baal: "It is possible that the idea of the death of Dumuzi … [was] a mythical metaphor for the death of vegetation."[208] The deaths of Dumuzi, Osiris, and Baal indeed made sense as "mythical metaphors" that encoded natural and human processes. These processes informed the mythic metaphor, and they lent intelligibility and meaning to the different visions of reality incorporated in the religious narratives modern scholars call myths. Frazer and his intellectual successor, T. H. Gaster, generalized about ritual as the bridge connecting nature and myth. Ritual is only one of many social phenomena encoded in literature. And in the case of Baal, the ritual standing between nature and myth was not a complex procedure celebrating the death and resurrection of the god but royal funerary ritual.

6. The Mythology of Death and the God of Israel

This discussion of Baal holds considerable import for understanding biblical evidence about death and the underworld. The argument that the mythological presentation of Baal and the god of Death in the Baal Cycle is largely a literary one deriving some of its imagery from royal mortuary ritual should be consistent with biblical presentations of the chief deity of Israel and Death personified. Let me spell out this working hypothesis. Iron Age Israel shows clear evidence of the storm-battle imagery of Baal's mythology.[209] Indeed, biblical tradition shows a reliance on the particulars of Baal's mythology. In this category may be placed biblical references to the cosmic enemies such as Leviathan, Sea, and Tannin (discussed in chapter 1). Moreover, Psalm 48:3 identifies Mount Sapan, Baal's home in the Ugaritic texts, with Zion. Scholars generally accept the view that these details point to the continuity and modification of older traditions about Baal.[210] In view of such shared specifics, one may ask why the Bible lacks a comparable mythology of the chief-god with respect to the underworld and the god of Death. Like the Baal Cycle, the Bible is replete with

speculations about the nature of the underworld and the god of Death; perhaps the best-known biblical texts are Isaiah 28:15, 18; Jeremiah 9:20; Habakkuk 2:5; and Psalm 49.[211] Unlike the Baal Cycle, the Bible contains few references to, much less any substantial mythology about, the conflict between the chief deity of Israel and the god of Death.[212] Although the Bible does mention a divine victory over Death—though barely (Isaiah 25:8; cf. Revelation 21:4)—there is no mythological presentation of this conflict.[213] The absence of this conflict is all the more striking because of the Bible's massive complex of storm-battle imagery shared with the Ugaritic texts. The disparity might be attributed to the idea that the god of Israel has nothing to do with the realm of Death.[214] Yet this is only partially correct. Certainly Yahweh is said to defeat death (Isaiah 25:8). There may be a deeper cause, one that involves the nature of this mythology as well as its social context in Ugarit and Israel. In the West Semitic world, the mythology of death may not have involved the chief deity in a conflict. However, in the Baal Cycle the presentation of Baal and Mot may have been a literary production that modified an older mythology lacking such conflict. Indeed, the many structural similarities and verbal resonances between the Baal-Mot and Baal-Mot sections of the cycle (1.1–1.2 and 1.4 VIII–1.6, respectively) lend themselves to a theory that the latter section, using the traditional mythology of the underworld and the god of Death,[215] was modeled on the former one under the further influence of a royal mortuary cult. If the theory is correct, the Ugaritic monarchy influenced the development of this particular form of the mythology of death at Ugarit. As far as the record presently indicates, Late Bronze Age West Semitic did not generally develop this sort of mythology except at Ugarit.

Accordingly, the chief god's conflict with Death may be absent in ancient Israel because West Semitic tradition perhaps did not generally contain and therefore transmit a broad mythology of death into the Iron Age. In other words, the dynasties of Israel and Judah may never have developed a mythology of Death as the Ugaritic monarchy did. The dominant priestly and deuteronomic theologies in the Iron II period in Judah may have inherited some dissociation between Israel's chief deity and the realm of death.[216] Perhaps then death and the underworld in the Bible, insofar as they appear in Israelite material without a mythology of conflict, offer limited corroboration for the argument that the Ugaritic

presentation of Baal's death and re-appearance in the cosmos was fundamentally a literary production. In any case, the evidence does not support a ritual approach to the complex of material grouped under the category of "dying and rising gods," at least for Ugarit and Israel. An attempt to resuscitate Frazer's category must drastically modify its basic criteria, perhaps so much so that Frazer would barely recognize it.

PART III
THE ORIGINS OF MONOTHEISM IN THE BIBLE

7
El, Yahweh, and the Original God of IsraEL and the Exodus

> Who is This King of Glory?
>
> Psalm 24:8

1. El in the Bronze Age

The name of the god El[1] is the same as the word for "god" in many West Semitic languages. This fact might be taken as evidence that as head of the West Semitic pantheon, El was regarded as the pre-eminent god (or, perhaps, divinity "incarnate"). The best guess for the etymology of both the word "god" and the name of El has been **'y/wl*, "to be strong,"[2] but other proposals have been made. The noun may be a "primitive" biradical form meaning "chief" or "god."[3] The name of El occurs clearly first in personal names attested at Ebla, and then Mari and Amarna.[4] In contrast, the evidence in other Mesopotamian personal names is contested. These cases may involve the generic term "god," not the proper name of El. Because of the lack of evidence for El's cult in Mesopotamia, the second view may be preferable.[5]

The most extensive Bronze Age source about El comes from Ugarit. The texts there attest to the word *'il* over five hundred times, in its generic use, in the name of the god, or in proper names. In the Ugaritic mythological narratives, El appears as the divine patriarch par excellence.

His role as *’ab*, “father,” applies to the pantheon that is his royal family. The deities are generically referred to as *dr ’il*, literally “the circle of El,” but perhaps better translated, “El’s family” (CAT 1.15 III 19). Athirat is El’s elderly wife with whom he has produced the pantheon, generically (but not all inclusively) referred to as “Athirat’s seventy sons.” As divine progenitor, El is sometimes called *’il yknnh*, “El who created him/her.” As the divine patriarchal authority, El oversees the actions of the pantheon, presented as a royal assembly in 1.2 I. He issues decisions and exercises authority over the other deities, including Athirat, Baal, and Anat. His authority is expressed in his title, “king” (*mlk*). The same notion seems to underlie his epithet, “bull” (*ṯr*): like the chief and most powerful of animals, El is the chief of the deities. His fatherly disposition toward his family is captured in his larger appellation, “Kind El, the Compassionate” (*ltpn ’il dp’id*).[6]

Both texts and iconography present El as an elderly bearded figure, enthroned sometimes before individual deities (CAT 1.3 V; 1.4 IV–V), sometimes before the divine council (CAT 1.2 I). In 1.10 III 6 he is called *drd<r>*, “ageless one.” His advanced age is apparently expressed also in his title, *’ab šnm*, “father of years,” although the meaning of the second word is debated. In 1.4 V 3–4 Athirat addresses El: “You are great, O El, and indeed, wise; your hoary beard instructs you” (*rbt ’ilm lḫkmt šbt dqnk ltsrk*). In 1.3 V and 1.4 V, Anat and Athirat both affirm the eternity of El’s wisdom. Anat’s threats in 1.3 V 24–25 and 1.18 I 11–12 likewise mention El’s gray beard. El’s great age is suggested by the royal blessing at the end of 1.108.27, asking that the king’s rule last “in the midst of Ugarit, for the days of the sun and moon, and the pleasant years of El.”

As the divine patriarch, El enjoys a range of social activities. According to CAT 1.114, he is the head of his own male social association or club (*mrzḥ*), on analogy with well-to-do men of Ugarit (3.9). Like human patriarchs, El sustains a drunken bout in 1.114; this one is so severe that it results in hallucinations. El’s *mrz‘* (thought by many scholars to be a biform of *mrzḥ*) appears in 1.21 II 1, 9, evidently in connection with the dead. The broken condition of the text’s larger cycle (?) of 1.20–1.22 makes it difficult to understand El’s role, but perhaps he served as the host of the dead at the *mrz‘* held at his home, modeled on the human cult of the dead. And 1.23 presents El’s sexual activity with two women (whose identities are unknown). It has been debated whether this text describes his virility or his impotence, overcome by the coaxing of the two females.[7] In either case, the

text graphically describes his “hand,” a euphemism for penis, as becoming “as long as the Sea” (discussed in chapter 5, section 1). El also expresses interest in sexual relations with Athirat when she meets him in 1.4 IV.

El’s home is conceptualized in both terrestrial and cosmic terms. According to the Baal Cycle (CAT 1.3 V 8–12, 1.4 IV 21–24), it is located in the waters of the “double-deeps,” at a mountain (whether the home lies at the mountain’s base or top is unclear). His residence is described by a series of terms that suggest a tent; this view is confirmed by a description of Elkunirsa’s residence as a “tent.” A ritual text, an incantation against the bite of a snake, places El’s abode at a point where the upper and lower cosmic oceans meet (1.100.3). The further association of El’s activity at the edge of the sea in 1.23 may be related to the location of El’s abode. It is unknown if this point applies also to Athirat’s title, “Lady Athirat of the Sea” (*rbt ’aṯrt ym*) or to her domestic chores at the water’s edge described in 1.4 II 6.[8]

El’s status vis-à-vis Baal has been a matter of debate. Some scholars have argued that Baal’s promotion to the head of the pantheon took place at El’s expense.[9] This view has been severely contested, yet El and Baal’s relationship is fraught with tension and intrigue. El backs the god Sea (Yamm) for divine kingship against his rival Baal (CAT 1.1). This act seems to reflect El’s animosity toward Baal, who may have been regarded as an outsider to El’s family, as suggested by the Storm-god’s title, “son of Dagan.” In the Baal Cycle, El supports the god Athtar for divine kingship. Athtar is evidently one of El’s sons and he shows a number of astral features.[10] The motif of El’s patronage of other divine creatures hostile to Baal assumes a different form in 1.12. Common to all of these texts is a a generational conflict that possibly reflects two (competing?) forms of divinity, one an astral conceptualization (El and his children) and the other a sky conceptualization (Baal).

El attends not only to his divine family but also to the human family. In the story of Kirta, El shows solicitous care for this king, appearing to him in an incubation-dream and granting his request for the blessing of progeny. Just as El engendered the divine family, so too El produced the human family. El bears two titles exemplifying his relationship to humanity: *’ab ’adm*, “father of humanity,” and *bny bnwt*, usually translated “creator of creatures”. A West Semitic text written in Hurrian-Hittite was discovered in Anatolia. This text presents the figure of El under the name Elkunirsa,

which is to be understood as *’il qny ’arṣ*, “El creator of the earth,” a title that survives in Genesis 14:19 and KAI 26 A III:18. El’s role as creator is never portrayed in the mythological texts; and from their perspective, this activity of his seems to belonged to the distant past. He is depicted as creating a special creature to cure the sickness of King Kirta (CAT 1.16 V).

2. El in Iron Age Phoenicia

When we turn to the issue of El’s cult in the Iron Age Levant outside of Israel, we enter highly disputed territory. The demise of El among Israel’s neighbors has been espoused, most recently by K. van der Toorn: “El is a common Northwest Semitic god to whom the devotion is largely rhethoric in the first-millennium B.C.E. Having turned into a *deus otiosus*, his place was gradually taken by Baalshamem or Baal-shamayin.”[11] B. A. Levine, however, has defended the position that El’s cult perdured into the first millennium West Semitic religion.[12] Some Phoenician data may support the later view, but the evidence is quite sparse and far-flung. I mentioned already the Phoenician title *’l qn ’rṣ* from Karatepe (KAI 26A III:18). The same title appears in a neo-Punic inscription (KAI 129:1). A Hellenistic period inscription from Umm el-‘Awamid also contains the name El. Philo of Byblos[13] attests to Phoenician El. According to Philo of Byblos, Ouranos’s children included Elos (West Semitic El), Baetylos, Dagon, and Atlas. Tyrian El is evidently described in Ezekiel 28.[14] This chapter describes the home of Tyrian El in terms similar to descriptions of El’s abode found in the Ugaritic texts. The wisdom ascribed to Tyrian El also recalls El in the Ugaritic texts.

Furthermore, M. L. Barré suggests that Phoenician Bethel is to be understood as a hypostasis of El, which would represent further Phoenician evidence for the cult of El in the Iron II period.[15] But Vander Toorn[16] has challenged this notion that Bethel is a Phoenician hypostasis of El. He argues that Bethel is an Aramean and not a Phoenician deity; this view requires further confirmation. Indeed, second-millennium proper names from Ugarit containing the element “house of god/El”[17] apparently favor Bethel as a god indigenous to the coast. Furthermore, Philo of Byblos (*PE*

1.10.15–17)[18] provides evidence for a cult of Bethel in Phoenicia. Barre suggests that Baetylos appears as Elos's brother because he is a hypostasis of El.

The Phoenician and Punic inscriptions attesting to Baal Hamon may represent data for the continued cult of El in Phoenician cities, assuming that Baal Hamon is to be identified with El, as B. Landsberger, F. M. Cross, and S. M. Olyan argue.[19] Cross sees the name of El's mountain behind the epithet *b'l ḥmn*, "lord of the Amanus," and follows Landsberger in viewing it as a title of El in the Phoenician-Punic world. According to Cross, the title *b'l ḥmn* would fit El, as his home is located in the Amanus. Moreover, the iconography of Baal Hamon comports with that of El. Although Olyan regards the identification as "secure,"[20] the bases for the identification have met severe criticism. E. Lipiński asserts: "Now, this assumption is not supported by the slightest evidence and must be rejected as sheer fantasy."[21] Some problems with the evidence for the identification have been voiced. According to J. Day, the equation of Kronos with Baal Hammon does not prove that Baal Hamon was El, for Kronos was equated with both El and Baal.[22] Furthermore, the iconography of Baal Hamon may comport with that of El as known at Ugarit, but this is no guarantee of the identification. Finally, the attestation of both *'amn* and *ḥmn* in Ugaritic (the latter in proper names and in a Hurrian text discovered at Ugarit) seems to represent a difficulty for identifying *ḥmn* with the Amanus. M. Cogan and P. Xella prefer to take *'amn* as Mount Amanus, but not *ḥmn*.[23] Cross attempts to reconcile this problem by claiming that *ḥmn* specifically refers to Mount Amanus whereas *'amn* in CAT 2.33.16 is a different mountain though "in the same general region."[24]

Roman evidence recently marshaled by L. E. Stager in support of the equation of El and *b'l ḥmn* is equally subject to difficulties. Accepting the equation of *b'l ḥmn* with El, Stager takes the throne-name of the Roman emperor, Elegabalus (203–222 C.E.), as a Latinized form of the West Semitic *'El Jebel*, "El of the mountain."[25] Elegabalus, a Syrian, brought a statue of Tannit to Rome. He took a vestal virgin for a wife and identified her with the goddess Tannit and himself with the god Elagabal. Stager suggests: "Their marriage, then, replicated that of the heavenly couple, Ba'al Hamon (alias Elagabal) and Tanit. Thus these Phoenician deities became part of the imperial cult in Rome."[26] The name Elegabalus does not give the specific

name of El's mountain. Furthermore, the name Elegabalus may be translated as "the god of the mountain" and could be identified with a god besides El, thus vitiating Stager's reconstruction.

Whereas Cross's argument might appear prima facie to be a case of special pleading, and Stager's interpretation viable but not necessary, one fact favors the claim that Ugaritic *ḫmn* is Mount Amanus. The place-name *p'rḫmn* appears in a Phoenician seal dating to the eighth century. According to P. Bordreuil,[27] *p'rḫmn* is to be understood as the town Pagras of the Amanus region, corresponding to the modern village of Bagras located in the Amanus. In view of this evidence, the sources from Ugarit that give the spelling *ḫmn* and *'amn* should be reconsidered. As I noted, *ḫmn* appears in a Hurrian text and some proper names from Ugarit, whereas *'amn* is attested in a single Ugaritic text. The disparate character of these sources may suggest that *ḫmn* and *'amn* represent two spellings for the same mountain, a phenomenon not without parallel among geographical names in the texts from Ugarit.[28] In short, the interpretation of titles may be just as problematic as the interpretation of proper names, and using them in the name of historical reconstruction is likewise a hazardous task.[29] However, the identification of Baal Hamon with El remains possible and may be joined to the evidence from Ezekiel 28 and Philo of Byblos for the cult of El in the Phoenician world.

3. El in Iron Age Aram and Tranjordan

Aramaic evidence for the god El from the eight century is less equivocal but more sparse. Panammu, king of Samal, mentions El in a list of deities (KAI 214:1, 2, 11, 18). The so-called Sefire inscription is a treaty text with a list of divine witnesses; these include El (KAI 222A:11). Like the Phoenician evidence, the Transjordanian material for the cult of El has been debated vigorously. Ammonite personal names attest to the element *'l*, but it is unclear whether El is the referent. That El continued to have cult in the first millennium might be suggested by the Deir 'Alla inscriptions (and by their possible connections with those biblical books, such as Job, which show a similar use of divine titles).[30] B. A. Levine argues that the Deir 'Alla inscriptions show an El cult separate from the cult of Yahweh in the Iron

Age.[31] Two questions surrounding this interpretation involve genre and date. Do the Deir ʻAlla texts and the book of Job reflect literary usage that predates the Iron II period and therefore does not constitute evidence for El's cult in this period and region? Or do these texts reflect traditional cultic titles of El Shadday that were at home at one or more cultic sites in Transjordan? If the Deir ʻAlla inscription represents a later copy of an older text, as a number of scholars suppose,[32] then its date cannot be determined. In this case, the text could not be used as evidence for the cult of El in Iron Age Transjordan.[33]

Finally, two other pieces of evidence pertain. Although van der Toorn denies that cult was devoted to El in the first millennium, he notes the appearance of El in the papyrus Amherst 63, and he concludes that "El and Baal-Shamayin were at least known to the colonists of Syene."[34] The context of El in papyrus Amherst 63 is a prayer, which implies a cult, and the parallel of the prayer with Psalm 22 suggests a cult that is near or perhaps even in Israel. Therefore, this text might constitute not only a literary attestation to El but a cultic one. Finally, Cross and Tigay have noted that the divine element *ʾl* dominates the theophoric elements in the Edomite onomasticon, which suggests El's cult; W. E. Aufrecht has noted the same feature in the Ammonite onomasticon.[35] Although state cults of the first-millennium Levant had patron deities other than El, this situation did not issue in the immediate loss of El's cult. After all, Baal was the dynastic god of Ugarit, but this fact did not result in the loss of El's cult at Ugarit. The evidence for El's cult in the first millennium is ambiguous, as van der Toorn observes, but this difficulty of evidence hardly settles the issue. Indeed, the apparent evidence for El in epigraphic South Arabian texts[36] might also warrant caution against dismissing first-millennium Levantine evidence for the cult of El.

4. El in Iron Age Israel

Outside of proper names, the word *ʾēl* occurs about 230 times in the Hebrew Bible. It usually occurs as an appelative designating a foreign deity (Ezekiel 28:2) as well as Israel's chief deity. Most commonly, the word is

used with other elements (such as the definite article or a suffix). It appears as a proper name of the deity in some poetic books, such as Psalms (5:5, 7:12; 18 [= 2 Sam 22]:3, 31, 33, 48; 102:25), Job, and Second Isaiah (Isaiah 40:18; 43:12; 45:14, 22; 46:9; cf. 42:5). A common assumption is that El's cult did not exist in Israel except as part of an identification with Yahweh. For ancient Israel, this question depends on whether Yahweh was a title of El[37] or secondarily identified with El. Besides the grammatical objections sometimes raised against this view, the oldest biblical traditions place Yahweh originally as a god in southern Edom (possibly in northwestern Saudi Arabia), known by the biblical names of Edom, Midian, Teman, Paran, and Sinai.[38] This general area for old Yahwistic cult is attested in the Bible (Deuteronomy 33:2; Judges 5:4–5; Psalm 68:9, 18; Habakkuk 3:3)[39] as well as in inscriptional sources. Evidence from Kuntillet 'Ajrud, a southern shrine preserving inscriptions written by visiting northerners, also attests to "Yahweh of Teman."[40] These facts argue against designation identification of Yahweh as originally a title of El. How were Yahweh and El related? Biblical evidence necessarily occupies a central place in this discussion. In at least one instance, biblical material points to the cult of El in the Iron I period in Israel. C. L. Seow notes El language and characteristics reflected in aspects of the cult of Shiloh.[41] The tent tradition associated with Shiloh (Psalm 78:60; Joshua 18:1; 1 Samuel 2:22) conforms to the Ugaritic descriptions of El's abode as a tent. The narrative elements of the divine appearance to Samuel in incubation-dreams, the divine gift of a child to Hannah, and the El name of Elqanah (suggesting an El worshipper?),[42] also cohere with the view that El was the original god of the *bêt 'elōhîm* there (Judges 18:31; cf. 17:5). It is probably no accident that Psalm 78 repeatedly uses El names and epithets in describing the rise and fall of the sanctuary at Shiloh.[43]

Traditions concerning the cultic site of Shechem may also illustrate the cultural process behind the Yahwistic inclusion of old cultic sites of El. In the city of Shechem the local god was *'ēl bĕrît*, "El of the covenant" (Judges 9:46; cf. 8:33; 9: 4).[44] According to many scholars, this word *'ilbrt* apparently appears as a Late Bronze Age title for El (CAT 1.128.14–15).[45] In the patriarchal narratives, the god of Shechem, *'ēl*, is called *'elōhê yiśrā'ēl*, "the god of Israel," and is presumed to be Yahweh. In this case, a process of reinterpretation may be at work. In the early history of Israel,

when the cult of Shechem became Yahwistic, it continued the El traditions of that site. As a result, Yahweh received the title *ʾēl bĕrît*, the old title of El.[46] Finally, Jerusalem may have been a cult place of El, assuming the connection of El Elyon and El "creator of the earth" in Genesis 14:8–22 to this site.[47] This record illustrates the old transmission of West Semitic/Israelite traditions. Israelite knowledge of the religious traditions about other deities did not only reflect contact between Israel and her Phoenician neighbors in the Iron Age. In addition, as a function of the identification of Yahweh-El at cultic sites of El, such as Shiloh, Shechem, and Jerusalem, the old religious lore of El was inherited by the priesthood in Israel. At a variety of sites, Yahweh was incorporated into the older figure of El, who belonged to Israel's original West Semitic religious heritage.

Other biblical evidence for El might be taken to suggest that the cult of El perdured into the Iron II period. Whatever one is to make of *ʾēlōhîm* in the "E source" or various "El epithets" in the "priestly source," these materials might be interpreted as evidence for the cult of El in the Iron II period within Israel.[48] The usage in the book of Job and Psalm 18 (= 2 Samuel 22), may point in this direction as well. The distinction between El and Yahweh in Israel may include not only biblical texts but also Iron II epigraphic evidence. It is not necessary to interpret *ʾl* in the Kuntillet ʻAjrud inscriptions as "God" and assume the identification with Yahweh, as M. Weinfeld has done.[49] Weinfeld translates one inscription where *bʻl* and *ʾl* occur in the following manner: "[W]hen God shines forth (= appears) the mountains melt … Baal on the day of w[ar] … for the name of God on the day of w[ar]."[50] It is unclear whether *ʾl* here should be translated as El. Similarly, Hebrew proper names with the element *ʾl* should not therefore always be attributed to Yahweh, as W. D. Whitt has recently argued.[51] J. Tigay's important study of inscriptional onomastica is compatible with the historical reconstruction that early Israelite tradition identified El with Yahweh. Israelite inscriptions include 557 names with Yahweh as the divine element, 77 names with **ʾl*, a handful of names with the divine component **bʻl*, and no names referring to the goddesses Anat or Asherah. Tigay argues that the element **ʾl* in proper names represented a title for Yahweh. Just as no cult is attested for Anat or Asherah in Israelite religion, no distinct cult is

attested for El except in his identity as Yahweh. It is unclear whether *'l* in all these instances is to be understood as a generic reference to Yahweh.

At some point, a number of Israelite traditions identified El with Yahweh or presupposed this equation. The Hebrew Bible rarely distinguishes between El and Yahweh or offers polemics against El. West Semitic El lies behind the god of the patriarchs in Genesis 33:20 and 46:3 (and possibly elsewhere). Later tradition clearly intended that this god be identified as Yahweh. For example, the priestly theological treatment of Israel's early religious history in Exodus 6:2–3 identifies the old god El Shadday with Yahweh:

> And God said to Moses, "I am Yahweh. I appeared to Abraham, to Isaac, and to Jacob, as El Shadday, but by my name Yahweh I did not make myself known to them."

This passage shows that Yahweh was unknown to the patriarchs. Rather, they are depicted as worshippers of El. In Israel El's characteristics and epithets became part of the repertoire of descriptions of Yahweh. Like El in the Ugaritic texts, Yahweh is described as an aged, patriarchal god (Psalm 102:28; Job 36:26; Isaiah 40:28; cf. Psalm 90:10; Isaiah 57:15; Habakkuk 3:6; Daniel 6:26; 2 Esdras 8:20; Tobit 13:6, 10; Ben Sira 18:30), enthroned amidst the assembly of divine beings (1 Kings 22: 19; Isaiah 6:1–8; cf. Psalms 29:1–2, 82:1, 89:5–8; Isaiah 14:13; Jeremiah 23:18, 22; Zechariah 3; Daniel 3:25). Later biblical texts continued the notion of aged Yahweh enthroned before the heavenly hosts. Daniel 7:9–14, 22 describes Yahweh as the "ancient of days," and "the Most High." He is enthroned amid the assembly of heavenly hosts, called in verse 18 "the holy ones of the Most High," *qaddîšê ʻelyônîn* (cf. 2 Esdras 2:42–48; Revelation 7). This description for the angelic hosts derives from the older usage of Hebrew *qĕdōšîm*, "holy ones," used for the divine council (Psalm 89:6; Hosea 12:1; Zechariah 14:5; cf. KAI 4:5, 7; 14:9, 22; 27:12; see chapter 5, section 3).

The tradition of the enthroned bearded god appears also in a Persian period coin marked *yhd*, "Yehud." The iconography belongs to a god, possibly Yahweh. D. V. Edelman has studied the depictions of deities and symbols on coins from the Persian period through the Hasmonean period.[52] She concludes that the late Persian period coins are the first to show any avoidance of depiction of gods other than Yahweh in noncultic contexts; as

this single example indicates, Yahweh is evidently represented. Based on this part of Edelman's study and the reference in Judges 17 to an image, apparently of Yahweh, one might be inclined to suggest that ancient Israel tolerated some images of Yahweh outside of the national shrines and condemned images of other deities. In short, the prohibition of images of other deities seems to reflect a general worship of Yahweh that discouraged worship of other deities.

El and Yahweh are rendered with a similar compassionate disposition toward humanity. Like El, Yahweh is a father (Deuteronomy 32:6; Isaiah 63:16, 64:7; Jeremiah 3:4, 19; 31:9; Malachi 1:6, 2:10; cf. Exodus 4:22; Hosea 11:1) with a compassionate disposition, many times expressed as "merciful and gracious god," *'ēl-rāḥûm wĕḥannûn* (Exodus 34:6; Jonah 4:2; Joel 2:13; Psalms 86:15; 103:8; 145: 8; Nehemiah 9:17). Both El and Yahweh appear to humans in dream-visions and function as their divine patron. Like El (CAT 1.16 V–VI), Yahweh is a healing god (Genesis 20:17; Numbers 12:13; 2 Kings 20:5, 8; Psalm 107:20; cf. the personal name, *rĕpā'ēl*, in 1 Chronicles 26:7). Moreover, the description of Yahweh's dwelling-place as a "tent" (*'ōhel*) (e.g., Psalms 15:1; 27:6; 91:10; 132:3), called in the Pentateuchal traditions the "tent of meeting" (*'ohel mô'ēd*) (Exodus 33:7–11; Numbers 12:5, 10; Deuteronomy 31:14, 15), recalls the tent of El. The tabernacle of Yahweh has *qĕrāšîm*, usually understood as "boards" (Exodus 26–40); Numbers 3:36; 4:31), whereas the dwelling of El is called *qrš*, perhaps "tabernacle" or "pavilion" (CAT 1.2 III 5; 1.3 V 8; 1.4 IV 24; 1.17 V 49). Furthermore, the dwelling of El is set amid the cosmic waters (CAT 1.2 III 4; 1.3 V 6; 1.4 IV 20–22; 1.17 V 47–48), a theme evoked in descriptions of Yahweh's abode in Jerusalem (Psalms 47:5; 87; Isaiah 33:20–22; Ezekiel 47:1–12; Joel 4:18; Zechariah 14:8). Other passages include motifs that can be traced to traditional descriptions of El (Deuteronomy 32:6–7). The eventual identification of Yahweh and El within Israel perhaps held ramifications for the continuation of other deities as well. It has been argued that Asherah became the consort of Yahweh as a result of his identification with El.[53] The history of astral deities in ancient Israel may have been affected by the identification of El and Yahweh, a point discussed in detail in chapter 3. Perhaps originally associated with El, they became part of the divine assembly subordinate to Yahweh.

5. Was El Israel's Original God?

The information in the preceding section makes this question reasonable, despite the apparent complications that this reconstruction may pose for later theology. Moreover, it is a reasonable hypothesis because of one basic piece of information: the name of Israel contains not the divine element of Yahweh but El's name, with the element **'ēl*. If Yahweh had been the original god of Israel, then its name might have been **yiśrâ-yahweh*, or perhaps better **yiśrâ-yāh* in accordance with other Hebrew proper names containing the divine name. This fact would suggest that El not Yahweh was the original chief god of the group named Israel. The distribution of El and Yahweh in personal names in many so-called early poems likewise points in this direction.[54] Proper names do pose difficulties when used to reconstruct religious history,[55] yet when used in conjunction with other evidence, proper names offer admissible evidence. Israel is a very old name, apparently known both at Ebla and Ugarit.[56] When the name began to refer to the historical phenomenon of a people in the Iron I highlands, perhaps it no longer referred to the god to whom it was devoted.

Biblical texts do attest to Yahweh and El as different gods sanctioned by early Israel. For example, Genesis 49:24–25 presents a series of El epithets separate from the mention of Yahweh in verse 18. This passage does not show the relative status of the two gods in early Israel, only that they could be named separately in the same poem.[57] More helpful is the text of the Septuagint and one of the Dead Sea Scrolls (4QDeut^{j}) for Deuteronomy 32:8–9, which cast Yahweh in the role of one of the divine sons,[58] understood as fathered by El, called Elyon in the first line:[59]

> When the Most High (Elyon) allotted peoples for inheritance,
> When He divided up humanity,
> He fixed the boundaries for peoples,
> According to the number of the divine sons:
> For Yahweh's portion is his people,
> Jacob His own inheritance.

The traditional Hebrew text (MT) perhaps reflects a discomfort with this polytheistic theology of Israel, for it shows in the fourth line not "sons of El" but "sons of Israel." This passage, with the Septuagint and Dead Sea Scroll reading, presents a cosmic order in which each deity received its own nation. Israel was the nation which Yahweh received, yet El was the head of this pantheon and Yahweh only one of its members. This reading points to an old phase of Israel's religion when El held a pre-eminent position apart from the status of Yahweh. Apparently, originally El was Israel's chief god, as suggested by the personal name, Israel. Then when the cult of Yahweh became more important in the land of early Israel, the view reflected in Deuteronomy 32:8–9 served as a mode to accommodate this religious development.

If El was the original god of Israel, then how did Yahweh come to be the chief god of Israel and identified with El? We may posit three hypothetical stages (not necessarily discrete in time or geography) to account for the information presented so far:

1. El was the original god of early Israel. As noted, the name Israel points to the first stage. So do references to El as a separate figure (Genesis 49, Psalm 82).[60]
2. El was the head of an early Israelite pantheon, with Yahweh as its warrior-god.[61] Texts that mention both El and Yahweh but not as the same figure (Genesis 49; Numbers 23–24, discussed in the next section; Psalm 82) suggest an early accommodation of the two in some early form of Israelite polytheism. If Psalm 82 reflects an early model of an Israelite polytheistic assembly, then El would have been its head, with the warrior Yahweh as a member of the second tier (see chapter 2, section 2). Yet the same psalm also uses familial language: the other gods are said to be the "sons of the Most High." Accordingly, Yahweh might have been earlier understood as one of these sons.
3. El and Yahweh were identified as a single god. If El was the original god of Israel, then his merger with Yahweh, the southern divine warrior, predates the Song of Deborah in Judges 5, at least for the area of Israel where this composition was created. In this text Yahweh, the divine warrior from the south, is attributed a victory in the central highlands. The merger probably took place at different

> rates in different parts of Israel, in which case it was relatively early in the area where Judges 5 was composed, but possibly later elsewhere. Many scholars place the poem in the pre-monarchic period,[62] and perhaps the cult of Yahweh spread further into the highlands of Israel in the pre-monarchic period infiltrating cult sites of El and accommodating to their El theologies (perhaps best reflected by the later version of Deuteronomy 32:8–9). The references to El in Numbers 23–24 (discussed in the following section) and perhaps Job appear to be further indications of the survival of El's cult in Transjordan. Beyond this rather vaguely defined pattern of distribution, it is difficult to be more specific.

El as a separate god disappeared, perhaps at different rates in different regions. This process may appear to involve Yahweh incorporating El's characteristics, for Yahweh is the eventual historical "winner." Yet in the pre-monarchic period, the process may be envisioned—at least initially—in the opposite terms: Israelite highland cult sites of El assimilated the outsider, southerner Yahweh. In comparison, Yahweh in ancient Israel and Baal at Ugarit were both outsider warrior gods who stood second in rank to El, but they eventually overshadowed him in power. Yet Yahweh's development went further. He was identified with El:[63] here the son replaced and became the father whose name only serves as a title for the son.[64]

This paradigm of convergence of divine identities succeeded the older paradigm of divine succession in the ancient Middle East (for example, Ea's replacement by his son Marduk in Enuma Elish). Indeed, the erasure of the father, with his tranformation into the son, was a requisite condition for the monotheistic identity of the son. Many, if not all, features of the father and son could be incorporated into the one divine leader of the pantheon, or some features could be displaced in some contexts to divine features of the "Name" (discussed in chapter 4, section 5) or the guardian angel of Israel, who represents and stands under the power and authority of the One. With a distinct father-god erased, the son's identity as son was also erased. And then there was only One. This point has further ramifications. Chapter 1 of this study notes the relationship of the cosmic forces as enemies to the warrior-gods Baal in the Ugaritic texts and Yahweh in the Bible and also as the beloved of El or the pets of Yahweh. When El and Yahweh were no

longer distinguished, there was no longer a triangle of relations, pitting the head god and his beloved monstrous enemies against the young warriorgod. In biblical terms, this triangle is part of an order swept aside, leaving only Yahweh with such enemies. Like El, the enemies are reduced. El becomes Yahweh (or vice versa), and what stands at the end of the biblical convergence of divinity is one head god. In effect, the head god has become tantamount to godhead.

6. The Question of Yahweh's Original Character

A closer look at Yahweh's origins is warranted. According to many scholars, Yahweh originated at the southern sites of Seir/Edom/Teman/Sinai (known from biblical passages cited earlier), located by many scholars today in the northwestern Arabian penisula east of the Red Sea.[65] The cult of Yahweh then found a home in highland sites such as Shiloh. According to an incisive study by J. D. Schloen,[66] some vestiges of the historical process may be found in Judges 5. Some form of direct cultural contact may account for the adoption of Yahweh in Judah,[67] but it is not clear that the worship of Yahweh spread then from the south to the central and northern highlands. Perhaps a further form of contact such as trade was the impetus behind the establishment of the cult of Edomite Yahweh in the central highlands. Judges 5:6 mentions trade as part of the problem leading to the conflict described, and the preface to the hymn in verses 4–5 provides the traditional litany of places where Yahweh marches from, namely, Seir, Edom, and Sinai. Furthermore, we may note the enigmatic line in verse 14: "From Ephraim came they whose roots are in Amalek" (NJPS: *minnî ʾeprayim šoršām baʿămālēq*). This verse shows not simply a neutral mention of Amalek but a positive indication of kinship between the tribe of Ephraim and Amalek, known as a southern group in biblical tradition (e.g., associated with Edom in Genesis 36:16 and the Negeb in Numbers 13:29). In the time of Saul, the Amalekites are mentioned as enemies of Israel according to 1 Samuel 15:2–3, and the later tradition transmitted a negative view of Amalek (Exodus 17:8–16; Deuteronomy 25:27–28).[68] Such a neutral reference to Amelekites in Judges 5:14 has a ring of authenticity and suggests cultural contact between the indigenous inhabitants of the central

hill-country associated with Ephraim and the southern group of Amalek. Judges 12:15 mentions a place-name, “Pirathon, in the territory of Ephraim, on the hill of the Amalekites” (NJPS).[69] Were the Amalekites some of the traders mentioned in verse 6, who then settled in the central hill-country? Finally, Judges 5:24 mentions Jael, “wife of Heber the Kenite.” Like a number of other groups, such as the Midianites and the Amalekites, the Kenites (Judges 1:16, 4:11; 1 Samuel 27:10, 30:29) are placed by biblical tradition to the south of Judah, precisely the area of ancient Yahwistic cult. This datum in verse 24 lends credence to possible “Kenite” influence in the central highlands, not just in the south.[70] In short, biblical data suggest a series of relationships between the central highlanders and southern caravaneers in the Iron I period. Perhaps trade, enhanced by some kingship ties, provided the mechanism by which a far southern tradition of the deity in Se‘ir/Edom/Sinai/Teman/Midian came to be celebrated originally at northern sites such as Shiloh and Bethel.[71] This tradition came to be transmitted during the Iron II period in royal theology, evidenced by Habakkuk 3.[72]

What was Yahweh’s original character? Many scholars, including W. F. Albright, F. M. Cross, D. N. Freedman, and more recently J. C. de Moor, M. Dijkstra, and N. Wyatt,[73] identify Yahweh as a title of El. Other scholars, such as T. N. D. Mettinger, note how this view contradicts the early biblical evidence for Yahweh as a storm-and warrior-god from the southern region of Edom.[74] What was the precise nature of this storm? The presumed original location of Yahwistic cult in the far southern region (in southern Edom or the Hegaz), if correct, does not seem propitious as a home for a storm-god such as Baal, because this region has relatively low annual rainfall in contrast to the high rainfall for the Levantine coast. Judges 5:4–5 reflects a god that provide rains, but does this rain necessarily reflect the standard repertoire of a coastal storm-god, or does the passage reflect the storm and flash floods of desert areas? And if the rain does reflect the natural rains associated with a coastal storm-god, then might the depiction in Judges 5 reflect a secondary adaptation of the god’s presentation to the coastal-highland religion? Battle and precipitation may have been features original to Yahweh’s profile, but perhaps Yahweh’s original character approximated the profile of Athtar, a warrior-and precipitation-producing god associated with mostly inland desert sites with less rainfall. Perhaps

this profile was rendered secondarily in the highlands in the local language and imagery associated with the coastal storm-god.[75] Such a deity would have characteristics of both power and fertility, but with a different set of associations from Baal. The momentous evidence provided by the Ugaritic texts may have steered research toward El and Baal to seek Yahweh's original profile; this direction may be partially misleading. In fact, part of the original profile of Yahweh may be permanently lost, especially if the earliest biblical sources reflect secondary developments in the history of this deity's profile.

7. Was El the Original God of the Exodus?

The preceding two sections show some of the difficulties in understanding Israel's chief gods in the Iron I perod. It has been assumed that Yahweh was the original god of Israel, but this assumption has perhaps been created by the biblical presentation of early Israel. For later generations of Israelites, there was no difference between El and Yahweh, and for them there was no reason to see their earliest religious history in any other terms. However, the review of the evidence here suggests a more complex history of God in early Israel. In the traditional view, the people in the land who may have been called Israel could have had El as their god, but Yahweh was still the original chief god of the Israelite people who came out of Egypt.[76] But some evidence presents problems for this traditional view. Indeed, C. F. A. Schaeffer has written, followed by N. Wyatt[77] and me,[78] that El may have been the original god connected with the Exodus from Egypt and that this event was secondarily associated with Yahweh when the two gods coalesced. Numbers 23:22 and 24:8 (cf. 23:8) associate the Exodus not with Yahweh but with the name of El: "El who freed them from Egypt has horns like a wild ox." (This description also evokes El's attribute animal at Ugarit, the ox, reflected in his title "Bull El."[79]) The poems in Numbers 23–24 contain the name of Yahweh (23:8, 21; 24:6), but it is considerably rarer than the name of El (23:8, 19, 22, 23; 24:4, 8, 16, 23). Indeed, El is attested almost three times as often as Yahweh. Accordingly, B. A. Levine seems correct in suggesting that these poems preserve an old repertoire of El tradition, now synthesized with references to Yahweh.[80] If so, these texts

contain a valuable witness to El as the god of the Exodus, at least in one of the Israelite traditions.

This reconstruction may be supported by older information concerning the Exodus. The various Egyptian names in Shilohite lineage (Moses, Phinehas, Hopni, and Merari) may point to the Egyptian background of the Levitical Shilohite priesthood.[81] As J. M. Powis Smith asserted in 1918: "The name of 'Phinehas,' the son of Eli, priest at Shiloh, is Egyptian and points to some Egyptian connections with the Levitical priesthood of Yahweh at Shiloh, the northern shrine."[82] The later parallel etiologies in Exodus 2 and Judges 17 apparently echo the Egyptian background of the Shilohite priestly line. Moses names his son *gēršōm* because Moses was a *gēr* in the land of Egpyt. The original Levitical setting for the name echoes Judges 17:7. The Levite is described as a *gār-šām*. The son's naming makes sense if Moses was a *gēr-šām*, "in the land of Egypt" being a secondary specification. The older context of the etiology perhaps was the notion of the Levite as a *gēr* attached to sanctuaries. Levites were recognized as landless and thus retained the status of dependent sojourner.[83] Because of Seow's study and the Egyptian names, one could claim that the god of the putative figure Moses and the Levitical priesthood in Shiloh was El. Indeed, Exodus 6:2–3 reflects the notion that Israel's original god was El Shadday, who was later identified with Yahweh.[84] This passage could represent an attempt to reconcile the discrepancy by appealing to their identification. If the general line of interpretation is correct, El, not Yahweh, was the original god of the Israelites who came out of the land of Egypt. Only later, under the impetus of contact with the southern tradition of Edom, does Yahweh come to be associated, and then assimilated, with El.

If this approach is correct, then early biblical tradition preserves an association of the Exodus primarily with El and not Yahweh. T. J. Lewis, in his comprehensive review of the evidence, asks hypothetically:

> If, for the sake of argument, one assumes that El was the original god of the exodus, one then wonders how Yahweh was welcomed into the fold. What function would Yahweh have provided if worshippers look to El to fight their battles? Maybe two gods were thought to be better than one (although biblical tradition says that El and Yahweh are one and the same, not separate deities). Or, perhaps El's strength was waning (although there is no evidence of such) and a successor to the

> throne was needed…. Perhaps just as [in the Ugaritic texts] Baal comes to the fore and El recedes when it comes to a dynastic deity who fights for the nation, so the traditions of Yahweh as divine warrior come to the fore over those of El as the needs of the society changed from those of a small family group to those of a nation.[85]

As these remarks suggest, the divine profile manifest in the Exodus may have looked originally more like the presence of the deity in the patriarchal narratives, the family god or "god of the fathers" who accompanies the family on its journeys. Indeed, it is perhaps no accident that El names and titles proliferate in the older patriarchal narratives.[86] Accordingly, the divine warrior profile in the Exodus narrative may reflect not an original description of the god involved but a secondary application (albeit an early one) of Yahweh's identity as a divine warrior. Like so many other religious features, such a distinction was perhaps lost in the early stages of Israel's religious development. Instead, the old profile of the god of the Exodus may have been then the family god, a characterization that fits El eminently well. In contrast, Yahweh's original profile as deity may be, at least in part, irretrievably lost.

8
The Emergence of Monotheistic Rhetoric in Ancient Judah

Who knows one?
A Passover Song

This chapter turns to the question of biblical monotheism. Many scholars claim great antiquity for biblical monotheism. W. F. Albright, Y. Kaufman, C. H. Gordon, H. Orlinsky, J. C. de Moor, W. H. C. Propp, and others have viewed monotheism as an original feature of Israel, at least from Sinai onward.[1] Other scholars more recently have sought to identify monotheism as a feature of Israelite religion throughout the period of the monarchy and often suggest the possibility of an earlier dating.[2] These scholars claim Yahweh as the sole ruler of his assembly, arguing that monotheism is implied. This argument appears weak not simply because one might sense possible Christian or Jewish apologetics behind such claims; indeed, this in itself is no objection. Instead, the claim associates monotheism with the form of Israelite polytheism that knew only the Supreme Ruler and various "minor" divine figures who serve the One. For example, Exodus 15 asks if the God of Israel has a counterpart among the deities. Habakkuk 3:5 presents Resheph and Deber as part of Yahweh's theophanic retinue; both are well-known West Semitic gods. Psalm 29 calls the divine beings to join in praise of Yahweh. Similarly, Job 1–2 presents divine beings coming before God, including "the satan."[3] The "astral religion" of later monarchic Judah likewise maintains the Judean national god at the head of a pantheon of lesser astral divinities.[4] Some scholars may regard the religious outlook of such passages as "*de facto* monotheism,"[5] leaving room for deities who serve the Supreme Power. Moreover, such biblical texts do not deny the

power of other deities outside this "local" framework. This approach also tends to ignore biblical criticisms against polytheism and the claims of most scholars that Israel knew the cult of "Yahweh and his asherah."[6] Thus, claims of "practical monotheism,"[7] "*de facto* monotheism," "virtual monotheism," or even "monolatry" overlook the biblical evidence to the contrary, retrojecting onto "biblical Israel" a singularity of divinity that the Bible itself does not claim for ancient Israel. Indeed, claims for this sort of monotheism not only beg the question by such qualifications as "de facto" or "virtual"; they also rely on argument by omission, assuming that biblical texts lacking mention of other deities may be used to reconstruct such putative forms of worship. Accordingly, to use biblical texts to ground monotheism, or even monolatry, historically before the seventh century is difficult.

A second group of scholars, including T. J. Meek,[8] date the emergence of monotheism around the time of the "Exile" (587–538). Faced with the prospect of overwhelming earthly powers, Judeans exalted their deity in absolute terms. There is no doubt that this camp has an easier task in criticizing those who hold an early date for monotheism. In *Hebrew Origins*[9] (1936), Meek attacked Albright's view, both for its lack of early evidence for monotheism and because of the clear, later attestation of monotheistic declarations in the sixth-century prophets. In 1938 Meek put his objections about definition to Albright in a letter:

> Since returning home I looked up the dictionary definitions of henotheism, monolatry, and monotheism, and I feel more convinced than ever that you are using monotheism in a sense not supported by the dictionaries. By monotheism in my book [*Hebrew Origins*] I mean exclusive belief in and worship of one god and the denial of even the existence of other gods, which when believed in are merely figments of the imagination, with no reality at all. Our difference seems to be largely one of definition, but it is unfortunate when people define words in different ways.[10]

Meek had a good point. Much of Albright's definition had little to do with the meaning of monotheism per se. In 1940 he presented monotheists in his well-received volume *From the Stone Age to Christianity* in these terms:

> If … the term "monotheist" means one who teaches the existence of only one God, the creator of everything, the source of justice, who is equally powerful in Egypt, in the desert, and in Palestine, who has no sexuality and no mythology, who is human in form but cannot be seen by human eye and cannot be represented in any form—then the founder of Yahwism was certainly a monotheist.[11]

This definition is interesting, as it partially focuses on some features of Yahweh noted in preceding chapters, such as anthropomorphism and the general lack of sexuality. However, this definition was problematic. As this quotation suggests, Albright's sum representation of monotheism was drawn from many different documents of the Bible to create into a single original picture. Even more problematic for Albright's position, the Bible as a whole simply does not teach the existence of only one God. Other aspects of the Israelite deity that Albright took to be signs of old monotheism, such as multiple divine abodes, power in a multitude of locales, and the god's role as a creator god, were paralleled in fully polytheistic religions. Finally, it was evident to Albright that the biblical sources even for what he regarded as monotheism dated to the monarchic period, much later than the putative time of Mosaic monotheism.[12]

Despite these drawbacks, Albright firmly believed in the historical reality of Sinai monotheism. In 1943 he wrote to his former student G. Ernest Wright that the first edition of his book *From the Stone Age to Christianity* conceded too much to his critics.[13] For example, he thought that he could base Mosaic monotheism on the first of the Ten Commandments (in Exodus 20:3 and Deuteronomy 5:7), that the Israelites "shall have no other gods besides me" (*ʿal pānay*). Albright thought he could defend this translation based on the Punic use of *ʿl*(*t*) *pn-*, "besides," in the Marseilles tariff (KAI 69:3),[14] and that such a meaning could be used to establish monotheism. In the second edition of his book, Albright added this point.[15] On the first question, Albright had a point; the use is attested in Punic, but whether it demonstrated monotheism was in fact problematic. In retrospect, the question is why Albright took such great historical and textual leaps. He had tremendous faith in the ultimate antiquity of the tradition lying behind the biblical texts. For Albright, the biblical narrative was essentially historical, even though he conceded the lateness of the biblical texts involved.[16] Did Albright's religious sensibilities affect his

judgment on this issue? Did Albright the believer perhaps subconsciously convince Albright the historian despite the lack of historical evidence?[17]

The debate between Albright and Meek solved nothing for a number of reasons. As long as the debate over definition went unresolved, so scholarly discussion of the historical issues went unresolved. However, there was a deeper problem. Scholars on both sides of the divide seemed hardly interested in addressing their opponents' more constructive points. Albright, for example, did not address the fundamental question concerning later monotheistic formulations. Assuming for a moment that Israel was basically monotheistic from an early time, as Albright claimed, then why did its monotheistic faith appear in clearer, less ambiguous forms in the seventh and sixth centuries? And Meek, for all his well placed concerns over definition, did not truly turn to the question raised by the particularly distinctive forms of Israelite polytheism in the biblical record, considerably less ample than the pantheons in the record of other ancient Near Eastern literatures.[18] Finally, neither camp attempted to situate the issues in terms of Judah's larger social structure and situation in the seventh and sixth centuries. Meek's basic point remains valid, yet the relatively late emergence of the rhetoric of monotheism may become clear set against the background of discourse about divinity during the late Judean monarchy. This chapter begins an exploration of these issues with a survey of the clear and explicit monotheistic declarations in the Bible.

1. Defining Monotheism

To begin, we need to define the terms of discussion.[19] Most interpreters include two kinds of expressions in clearly monistic claims. The first involves a claim of exclusivity that proclaims Yahweh "alone" (**lĕbadd-*) or no god "apart from, besides" Yahweh (**zûlat-*). Monotheistic exclusivity is not simply a matter of cultic observance, as in the First Commandment's prohibition against "no other gods before me" in Exodus 20:3 and Deuteronomy 5:7. It extends further to an understanding of deities in the cosmos (no other gods, period).[20] The second involves statements claiming that all other deities are "not" (*'ên*), "nothings" (*'ĕlîlîm*), or "dead" (*mētîm*).

The first category includes the following passages as examples of monotheism, with the expression, “alone” (**lěbadd-*):[21]

Deuteronomy 4:35: “Yahweh alone is God, there is none beside Him.”

2 Kings 19:15, 19 = Isaiah 37:16, 20: “You alone are God of all the kingdoms of the earth, … You alone (O Yahweh) are God.”

Nehemiah 9:6: “You alone are Yahweh.”

Psalm 86:10: “You are God alone.”

All but the first of these statements belong to prayers. Monotheism here belongs to the rhetoric of praise. Deuteronomy 4:35 is part of a speech of Moses to the Israelites. Accordingly, it is a “sermon” or the like, which belongs to the rhetoric of persuasion. A similar rhetorical approach obtains in the monotheistic formulation with **zûlat-*:

2 Samuel 7:22 = 1 Chronicles 17:20: “there is no god except You according to all that we have heard with our ears.”

In this instance we again see the rhetoric of praise. One must be careful, for terms of exclusivity need not always represent the existence of only one [e.g., **zûl-* in 1 Samuel 21:10]). However, I accept the generally accepted view that these terms of divine exclusion represent monotheism.

The second category essentially denies the reality of other deities. One way to express monotheistic exclusivity in this manner involves the sentence predicate, *’ên*, “(there is) not”:

Deuteronomy 4:39: “Yahweh is god in heaven above and on earth below; there is no other” (*’ên ‘ôd*).

1 Samuel 2:2: “There is none beside You” (*’ên biltěkā*).[22]

Jeremiah 16:19, 20: “To You the nations shall come,/From the ends of the earth … Shall a man make gods for himself/And they are no gods?”[23]

The first case is part of a larger speech including the monotheistic claim of Deuteronomy 4:35.

For the criterion of other gods regarded as “nothings” or “dead,” the following passages conform:

Psalm 96:5 = 1 Chronicles 16:26: “For all the gods of the nations are nothings” (*’ělîlîm*).

Psalm 82:7: “Therefore like a mortal you shall die (**mwt*),/like one of the princes you shall fall.”

The first passage shows a clever pun made between the other *’ĕlōhîm* (gods) and *’ĕlîlîm* (nothings). Again, the effect is rhetorical, designed as much to persuade and reinforce as it is to assert. The language of divine death, as we saw in chapter 6, belongs to a slightly different rhetoric. It depicts the old order of Israelite polytheism passing to the new order of monotheism.

With other statements, it is important to be careful. Some scholars would accept as monotheistic passages that condemn the veneration of other deities, without commenting on their existence. One might then include the First Commandment (Exodus 20:3 and Deuteronomy 5:7) or Deuteronomy 32:12, 15b–21, and 37–39.[24] Or one might be tempted to add the Shema of Deuteronomy 6:4 to the list of monotheistic claims:

> *šĕma‘ yiśrā’ēl yhwh ’ĕlōhênû yhwh ’ĕḥād*
>
> Hear, O Israel! The Lord is our God, the Lord alone. (New Jewish Publication Society version, New Revised Standard Version.)
>
> Hear, O Israel! The Lord is our God, the Lord alone! (New American Bible)

The possible interpretation of monotheism here hinges especially on the semantics of *’ĕḥād*, literally “one.” The question is the significance of this “one-ness.” It might be interpreted as a statement of exclusivity (“the only one”). All three translations cited render the term “alone,” perhaps suggesting to readers a monotheistic interpretation, and such a view might seem plausible given a comparison with Zechriah 14:9 (which NJPS in fact cites in its note to Deuteronomy 6:4):

> And Yahweh shall be king over all the earth;
> on that day Yahweh will be one and His name shall be one.

Zechariah 14:9 envisions only one deity ruling the world, and it would seem also to envision worship of Yahweh only.[25] Yet does this (Hellenistic period?) passage apply to the Shema? Indeed, it is difficult to gauge to what degree the monotheistic interpretation of the Shema is due to later readings of the verse.[26] G. von Rad regarded the translation “alone” in Deuteronomy 6:4, as an expression aimed at excluding the cult of another god, such as Baal.[27] J. H. Tigay has a similar view: “For all its familiarity, the precise

meaning of the Shema is uncertain and it permits several possible meanings. The present translation indicates that the verse is a description of the proper relationship between YHVH and Israel: He alone is Israel's God. This is not a declaration of monotheism, meaning that there is only one God."[28] Therefore, in discussing monotheism, one must exclude the reality of other gods. Other biblical statements might be admissible in a discussion of monotheism, but it is preferable to restrict the discussion to examples that clearly articulate monotheism, not those that simply exclude veneration of other deities.[29]

Most of the references to monotheism, derive from the exilic period or later.[30] Jeremiah 16:19, 20, if original and not secondary, point to the late pre-exilic period.[31] Perhaps exceptional are 1 Samuel 2:2 and Psalm 82, as their dates are unknown; a date in the late monarchy for these compositions remains a possibility. Some scholars claim that some references in the Deuteronomistic History predate the exile, but other scholars have dated the sections containing the monotheistic sentiments to the exile or later. Of course, it is difficult to know which dating is correct, but on the whole the late monarchy and exile seem to represent the general period for the emergence of monotheistic rhetoric. B. Halpern rightly suggests that it is unlikely that Second Isaiah was an innovator of monotheistic discourse: "Had Second Isaiah, Cyrus' Judahite spin-doctor, not had Jeremiah's (and Deuteronomy's) voice crying on his own arrival from the steppe, his explicit monotheistic claims would have fallen on deaf ears, and probably set them ringing to boot."[32] Monotheistic rhetoric probably emerged shortly before the exile.

2. The Relative Infrequency and Rhetorical Purpose of Monotheistic Statements

Because of the post-biblical importance of monotheism, the relative rarity of its expression in the Bible is quite striking (even if more controversial examples were to be included). Indeed, the relatively few instances are spread over the whole of the so-called Deuteronomistic History (Joshua through 2 Kings), the post-exilic historical works of Ezra-Nehemiah, the

two books of Chronicles, and a few other biblical books. The outstanding exception is "Second Isaiah," dated to the removal of members of the Judean elite to Babylon in 587–538.[33] This part consists of Isaiah 40–55 (in scholarly circles called "Second Isaiah"). The section's author(s) wants to sublimate his own identity, which is why no author is presented in it. Many scholars today believe that a "Second Isaiah" meant to circulate separate from the "First Isaiah" never existed. And, indeed, I use quotation marks around "Second Isaiah." Textually there is only one book of Isaiah.[34]

The distribution of monotheistic declarations in the Hebrew Bible prompts some observations. Because of the concentration of monotheistic declarations in "Second Isaiah," this work demands its own examination, a task undertaken in in chapter 10. To understand the monotheistic statements in "Second Isaiah," one must recognize them as part of the work's rhetoric. Indeed, biblical claims of monotheism are generally rhetorical. Israelites continued to worship deities other than Yahweh both before and possibly after the exile. We may assume on the basis of available evidence that the ruling priestly groups of the post-exilic theocracy maintained a Yahwistic monolatry expressed in its rhetoric of monotheism, but such a historical conclusion does not justify claims for an entirely "monotheistic culture."[35] Because of the relative rarity of monotheistic claims and the ongoing presence of polytheism in ancient Israel, no one can confirm a clear evolution from monarchic monolatry (the worship of only one god, e.g., Exodus 22:19) to a new stage of religion called monotheism (belief in and worship of only one deity).[36]

Monotheistic statements do not herald a new age of religion but explain Yahwistic monolatry in absolute terms. As rhetoric, monotheism reinforced Israel's exclusive relationship with its deity. Monotheism is a kind of inner community discourse[37] establishing a distance from outsiders; it uses the language of Yahweh's exceptional divine status beyond and in all reality ("there are no other deities but the Lord") to absolutize Yahweh's claim on Israel and to express Israel's ultimate fidelity to Yahweh. Monotheism is therefore not a new cultural step but expresses Israel's relationship with Yahweh. C. Seitz insightfully asserts:

> This is not a sublime monotheism capable of differentation from a more concrete henotheism—rather it is henotheism of a particularly potent stripe. The other elohim that continue to claim allegiance from

> humanity have detachable names and detachable existences—to the degree that YHWH insists that they do not exist at all and envisions a time when representatives of the nations will make the confession once enjoined of Israel only.[38]

Monotheistic statement attempted to persuade Judeans still unconvinced of this perspective. Perhaps these declarations represent the efforts of a minority of "monotheists" to persuade a majority of Judeans who held Yahweh as the head of a larger group of divinities or divine powers. Perhaps the main point of such statements was not simply to move the later into the "monotheistic camp" but to convince them of the reality of Yahweh's power in the world.

3. The Prior Context of Judean Discourse about Divinity

To situate monotheistic language in seventh-and sixth-century Judah, one must ask about the context for this discourse. What forms did Judean discourse for divinity assume? The period of the monarchy sustained various forms of Israelite polytheism, noted in part 1 in this book. Unless we assume that prophets did not know what they were talking about, their criticisms of polytheism suggest that Judean society in the late monarchy enjoyed a range of polytheistic options. One end of the spectrum reflected cultic devotion to a variety of deities. The other end of the spectrum focused its devotion on Yahweh with his few servant-gods. What is apparently evident from biblical criticisms of the asherah[39] is a middle "ditheistic" model of the divine couple in charge of the four-tiered pantheon evolving to a single figure surrounded only by minor powers, which are wholly subordinate to that divinity's power.[40] In all of these models, Yahweh was the king of the heavenly host of deities. As a result of the editing of later monotheists, only scattered references to a number of other deities who belong to the middle levels of the pantheon have survived.[41] Indeed, the Bible hardly provides an objective or complete picture of Israel's religion, because of significant editorial selection. Fortunately, biblical criticisms of polytheism preserve some vestiges of information about polytheism into the late monarchic period.[42] Furthermore, most scholars believe that

inscriptional evidence of “Yahweh and his asherah” and Baal at Kuntillet ‘Ajrud has provided extra-biblical evidence for polytheism. Iconographic representation of what may be an Iron Age Judean goddess and archaeological evidence of female pillar figurines dating to the same period have been added to this reconstruction.[43] Even if we did not know of the biblical references to other deities, this extra-biblical evidence alone suggests a polytheistic situation. In fact, the biblical critiques of polytheism suffice to show that various forms of polytheism represented the range of religious devotion to the cult of the national god. In other words, the later dominant paradigm of a single national god with divine workers was only one version of devotion available in Iron Age Israel. Only later was the process of telescoping divinity into a single divine king with his servants completed.

The few remaining biblical monotheistic references remain because they could be easily interpreted in conformity with later stricter monotheism of the post-exilic period. For example the form of older Israelite (reduced) polytheism known from Psalm 82 casts Yahweh in an explicit divine council scene not as its head, who is instead left decidedly mute or left undescribed (which is probably the reason it survived the later collapsing of the different tiers). Psalm 82[44] begins:

> God (*’ĕlōhîm*) stands in the assembly of El/divine assembly (*‘ădat ’ēl*),
> Among the divinities (*’ĕlōhîm*) He pronounces judgment.

Here the figure of God takes his stand in the assembly. The name God was understood in the tradition, and perhaps at the time of the text’s original composition as well, to be none other than Yahweh; the name of El seems to be involved with the expression “assembly of El” (preferable to “divine assembly,” given El’s title, Elyon, in verse 6). In any case, the assembly consists of all the gods of the world, for all these other gods are condemned to death in verse 6:

> I myself presumed that You are gods,
> Sons of the Most High (Elyon),
> Yet like humans you will die,
> And fall like any prince.

A prophetic voice emerges in verse 8, calling for God (*'ĕlōhîm*) to assume the role of judge of all the earth:

> Arise, O God, judge the world;
> For You inherit all the nations.

Here Yahweh in effect assumes the task of all gods to rule their own nations. Verse 6 calls all the gods "sons of Elyon," probably a title of El at an early point in biblical tradition (Genesis 14:18–20). If this supposition is correct, Psalm 82 preserves a tradition that casts the god of Israel not in the role of the presiding god of the pantheon but as one of his sons. Each of these sons has a different nation as his ancient patrimony (or family inheritance) and therefore serves as its ruler. Then verse 6 calls on Yahweh to arrogate to himself the traditional inheritance of all the other gods: all the nations.

This family view of the divine arrangement of the world is preserved also by the version of Deuteronomy 32:8–9 in the Greek texts of the Septuagint and the Dead Sea Scrolls:[45]

> When the Most High (Elyon) allotted peoples for inheritance,
> When He divided up humanity,
> He fixed the boundaries for peoples,
> According to the number of the divine sons:
> For Yahweh's portion is his people,
> Jacob His own inheritance.

The traditional Hebrew text (MT) perhaps reflects a discomfort with this polytheistic theology of Israel, for it shows not "divine sons," but "sons of Israel."[46] Yet the texts of the Septuagint and the Dead Sea Scrolls show an Israelite polytheism that clearly focuses on the central importance of Yahweh for Israel within the larger scheme of the world, yet this larger scheme provides a place for all the other gods in the world. Moreover, even if this text is quite mute about the god who presides over the whole arrangement, it does maintain a place for such a god who is not Yahweh. The title of Elyon ("Most High") seems to denote the figure of El (called El Elyon in Genesis 14:18–22); he is presider par excellence not only at Ugarit but also in Psalm 82.

The author of Psalm 82 wishes to depose this older theology, as the Israelite God is called to assume a new role as judge of all the world. Yet at the same time, Psalm 82, like Deuteronomy 32:8–9, preserves the outlines of the older Israelite theology it is rejecting. From the perspective of this older theology, Yahweh did not belong to the top tier of the pantheon. Instead, in early Israel the god of Israel apparently belonged to the second tier of the pantheon; he was not the presider god but one of his sons. This older picture, assumed in Deuteronomy 32:8–9 and criticized in Psalm 82, presupposes the model of roughly equal national gods for all of the seventy nations of the world, a notion reflected also in the Ugaritic motif of the seventy sons of El and Athirat (CAT 1.4 VI 46).[47] It is true that these expressions of older national theology survive only because they could be conformed to the later monotheistic paradigm: the figure of "the Most High" (*ʿelyôn*) in Psalm 82 could be read as a reference to Yahweh, and the Masoretic change in Deuteronomy 32:8–9 marks a shift to a monotheistic reading. However, analyzed not in terms of the later monotheism but in terms of the earlier national situation, these two passages offer an important witness to the old monarchic period theology of the national god. In these two cases the Bible preserves only a limited number of "snapshots" of pre-exilic religion, not a complete "tape." Accordingly, given the later textual editing "out" (and "down") of Israelite polytheism, the minimal evidence the Bible does provide should be viewed probably as only the tip of the iceberg. What little evidence we do have, implies that a number of different possibilities existed in the larger context of the national religion. As long as the nations continued and stood in roughly comparable status in Judah's eyes, the religious view of the world represented in the national theology was feasible. The next section explores this royal ideology in greater detail.

4. The National God and Royal Ideology

The royal theology and religious practice served as a basic matrix to support the national god.[48] Royal psalms present this support in a contrast between two sets of powers. On one side are Yahweh and his "anointed," the Judean king, who rule together from Jerusalem (Psalm 2), viewed ideologically as the center of the world (cf. Psalms 46, 48, and 87). In

contrast, all the other kings and their nations, ideally, are to submit to the authority of Yahweh and his human regent on earth. The parallel of the cosmic and earthly levels in the royal worldview then consists of the divine and human kings centered at Zion against the divine and human enemies in the world. Yahweh the divine warrior-king parallels the human king ruling in Jerusalem, and the cosmic enemies hostile to Yahweh parallel the human enemies opposed to the Judean monarch. Both are to be defeated and submissive to the royal rule imposed by the Supreme King and carried out by his human counterpart.

This fundamental paradigm of cosmic and human royal power drew on a wider fund of West Semitic myth tradition represented in Ugaritic texts.[49] Three overlapping types of royal theology contain "mythic imagery"[50] (much of it known from the Baal Cycle): (a) action parallel between the divine king, Yahweh, and the human king; (b) the metaphorical granting of divine power to the human king in the language of the West Semitic conflict myth of Baal and Yamm, as well as the attribution of divine titles to the human king; and (c) possibly the king as "divine," *'ĕlōhîm*. Because these types differ in some ways, perhaps we should speak of royal theologies[51] and examine the background of each one separately.[52] The identification of human and divine kings in battle together represents a theme running through a good deal of biblical texts surviving from the monarchy. According to 1 Samuel 25:28, the king is said to fight Yahweh's wars. The parallelism between divine and human kings is explicit in the royal psalms (Psalms 2; 89:5–18//19–37; cf. 72:8). It is commonplace to observe that Psalm 18 = 2 Samuel 22, verses 8–19 describe Yahweh in terms associated with Baal's battle (CAT 1.2 IV; cf. 1.4 VII 8–9, 38–39), fighting for the king and saving him from destruction while verses 29–45 depict Yahweh's enabling the monarch to conquer his enemies in battle.[53] Habakkuk 3 employs the conflict-myth in defense of the king. The poem tells how Yahweh has come in his storm-theophany (verses 4–11) to trample the enemy-nations (verse 12) and to save the people and his "anointed" (verse 13), the king. The divine force is arrayed against Yamm and River (verse 8), and his theophanic vanguard includes not only the theophanic light with the Sun and Moon (verse 11) but also destructive divine forces including Resheph (verse 5). Accordingly, this text provides an instance of Yahweh's action in battle with the attendant divine astral bodies and accompanying

destructive divinities.[54] This poem bears a further importance, as it illustrates divine powers subservient to Yahweh, the warrior-king, in a context supportive of the monarchy.[55] As the warrior-god battles the cosmic enemies, his earthly counterpart, the human king, may fight enemies on the terrestrial level. Often the stress falls on Yahweh fighting on behalf of the king, but sometimes the text accents the king's own action aided by his divine patron. The royal theology of parallels between the heavenly and earthly realms extended also to identifying historical enemies with cosmic enemies known from the Ugaritic texts as Baal's or Anat's enemies.[56] It is well-known that Sea and River in Isaiah 11:15 appear in conflated form with the seven-headed dragon in a description of Egypt. Rahab stands for Egypt (Isaiah 30:7; Psalm 87: 4), the River for Assyria (Isaiah 8:5–8; cf. 17:12–14), Tannin for Babylon (Jeremiah 51:34). It is no wonder that apocalyptic literature used this imagery so extensively, as mythical enemies had long served as emblems of historical enemies.

Another action parallel between Yahweh and the king may be seen in Psalm 89. This psalm parallels the victorious power of Yahweh in verses 5–18 with the divine favor that Yahweh bestows upon the Davidic monarch in verses 19–37. The parallelism between Yahweh and the king changes, however, in verse 26, and a different sort of notion appears: Yahweh extends his power to the monarch in language associated in Ugaritic with the god, Baal: "I will set his hand on Sea and his right hand on Rivers."[57] The power of the Judean king given to him by Yahweh, the divine warrior-king, is so great that some of Yahweh's own power over the cosmic enemies extends to the human king. As many commentators[58] have observed, Sea and River are titles of Baal's enemy in the Baal Cycle. The Baal Cycle describes a circumscribed or limited exaltation of the storm-god.[59] This limited exaltation of Baal may correspond in some manner to Ugarit's limited political circumstances, as F. Stolz suggests.[60] The cycle was developed under the royal aegis of the dynasty of Niqmaddu at Ugarit,[61] ruling in the shadow of the larger powers of Egypt and Hatti.[62] Descriptions of the king couched in the language of the West Semitic storm-god hail from the Levantine littoral, Egypt and Mari. These passages indicate that political entities as varied as Egypt, the Levantine coast, and Mari utilized the imagery of the West Semitic storm-god to dramatize royal power and legitimacy. It appears reasonable to suppose that, like other sites in the

heartland of cult devoted to Baal, such as Mari and the Levantine littoral, as well as the periphery in Egypt, Ugarit also knew the political use of the language of Baal for its king.

The use of the West Semitic conflict myth to reinforce human kingship appears in a variety of texts hailing from Mari to Egypt. A letter from Nur-Sin of Aleppo to Zimri-Lim of Mari informs the king, quoting Adad (Baal), that "when you ascended the throne of your father, I gave you the weapon with which I slew Sea."[63] In some of the Amarna letters, the pharaoh is compared with "Baal in the heavens" (EA 108:9; 147:14; 149:7; 159:7; 207:16). Some Egyptian texts, such as the poetical stele of Tutmoses III,[64] dress the king in the storm imagery of Baal. The imagery in these cases does not construct parallelism between the divine and human kings. In perhaps the most dramatic biblical instance, according to Psalm 89:26, the human king's power is to extend to Sea, the cosmic enemy of Baal in the Ugaritic texts and the sometimes hostile, sometimes compliant cosmic force in the Bible:[65] "And I [Yahweh] shall set his hand [the Judean's king's] on Yam(m), and on River(s) his right hand."[66] Rather, it crosses the boundaries of this parallelism by making the king into a figure of his patron storm-god.[67] It is possible that the language was not merely a figurative ornament.[68] Rather, to use older metaphysical language, the human king was perhaps thought to "participate in" the power of the divine king. The image of the Davidic monarch receiving martial power from Yahweh also underlies the second metaphor in a post-exilic verse, Zechariah 12:8: "On that day the Lord will put a shield about the inhabitants of Jerusalem so that the feeblest among them on that day shall be like David, and the house of David shall be like God, like the angel of the Lord at their head."[69]

The idea of divine power being granted to the human king may lie behind two titles applied to the "messianic" figure in Isaiah 9:5.[70] This person is called both *'ēl gibbôr*, "warrior-god," and *'ăbî'ad*, "eternal father." Both of these titles draw on the tradition of Yahweh's titles as *'ēl gibbôr* (Isa 10:21)[71] and *'āb* (Deuteronomy 32:6; Jeremiah 3:19, 31:7–9). Finally, *'ēl gibbôr* may be viewed as the heightening of the royal title of *gibbôr* (Psalm 45:5).[72] W. L. Holladay objects to the view that the titles in Isaiah 9:5 indicate that the king is receiving divine titles.[73] Like other commentators,[74] he argues that the titles are throne names[75] given to the king as part of a coronation ode upon his accession. More specifically, the

titles supposedly represent sentence names, which reflect no more a divine attribution to the monarch than any theophoric names given to anyone in ancient Israel. The content of the names therefore would refer only to God and not to the king. A. Laato refers to Holladay's view:

> So how could Isaiah use a divine name for a king? After all, he made a clear distinction between God and man (see e.g. 2:22, 31:3). HOLLADAY solves the problem by claiming that the second (as well as the third) title is theophoric, that is, it refers to a quality of Yahweh, not a man (cf. ישעיהו for example). Naturally the king's authority entirely depended on Yahweh's power. Nevertheless, in the Yahweh doctrine the idea that a person may have divine power in relation to other people was not impossible. According to Ex 7:1, Moses was made into a god for the Pharaoh. In a similar way Yahweh wants to give the new-born prince divine rule over Assyria.[76]

Furthermore, these names are not theophoric as any other Israelite names are. Although the element **gibbôr* is productive in West Semitic names in Neo-Assyrian as well as Neo-Babylonian and Late Babylonian texts, it does not appear in Israelite proper names.[77] Consequently, it is preferable to understand *'ēl gibbôr* not as a common proper name, as Holladay proposes, but as a title like other divine titles.[78] Similarly, *'ăbî'ad*, though susceptible to interpretation as a sentence name, is equally intelligible as "eternal father." Furthermore, the heightened language applied to the king suits the setting Holladay posits for this passage, a coronation ode, as well as Psalm 45, which likewise exhibits exceptionally heightened language for the king (see later). Indeed, the setting Holladay proposed distinguishes these titles from any other names with theophoric elements. If these names are throne-names in the manner Holladay suggested, the names may nonetheless mark the special character of their recipient.[79] There is no impediment to the view that these two phrases were titles with heightened mythic content applied to the monarch. The background of these titles may be neither Egyptian nor Akkadian throne-names,[80] but West Semitic tradition.[81] Isaiah 9:5 does not bear directly on the long-standing question of whether or not the Israelite king was considered "a divine being" like the Ugaritic figure, Keret. Rather, these titles reflect a transfer of titles to the human king from his patron god, Yahweh. The first title has been traced further to the god El,[82] although the

record of this god as a warrior is otherwise poor.[83] In this case, the word *’ēl*, “god,” may not derive rom the proper name of El but would represent the generic noun “god.” The title would better suit a god such as Baal. The second title, *’ăbî‘ad*, “eternal father,” is more apt to El, however. It is El who is the divine father par excellence, and this title may have stemmed ultimately from this god. Characteristics associated with two different gods in Ugaritic literature are attributed to Yahweh elsewhere in the Bible.[84] Attribution of divine titles in Isaiah 9:5, especially *’ēl gibbôr*, may be reflected in the metaphorical usage in Zechariah 12:8.[85]

The heightened usage of Isaiah 9:5 perhaps raises the old scholarly issue over the status of the king, a question that hinges on the exegesis of a few biblical passages and some Ugaritic parallels.[86] Many scholars have take Psalm 45:7 as evidence for the royal theology of the king as “divine” (*’ĕlōhîm*):[87] *kis’ăkā ’ĕlōhîm ‘ôlām wā‘ed*, “your throne, O divine one, (is) forever and ever.”[88] The versions generally render the syntax in this manner.[89] Such ambiguity may be as old as the text, and the interpretation of *’ĕlōhîm* as God perhaps contributed to the survival of such an otherwise bald biblical reference to the king’s divinity. Criticism of this view has been voiced. The lack of clear parallels to the king as *’ĕlōhîm* has represented a major impediment according to J. A. Emerton[90] and P. Mosca.[91] The “muted reflex”[92] of the notion in Zechariah 12:8 may reflect, however, the background of a “high” royal theology, which applied *’ĕlōhîm* to the monarch.[93] The description of the king as *’ĕlōhîm* in Ezekiel 28:14 may represent a polemic against this notion of the monarchy.[94] H. J. Kraus also compares 2 Samuel 14:17, 20, where David’s ability to judge makes him *kĕmal’ak hā’ĕlōhîm*, “like the angel of God.”[95] C. F. Whitley offers a further argument for the king as *’ĕlōhîm* by noting points of contact between Psalms 89 and 45:7–8:

> Ps 89 … provides an instructive comparison with Ps 45, 7–8. Thus in Ps 89, 10.21 Yahweh has chosen David from amongst the people (בחור מעם) and anointed him (משחתיו) with holy oil. So in Ps 45, 8 we read >>*Elohim*… anointed thee—משחך—with the oil of gladness above thy companions—מחברך<<. Again in Ps 89 the Messiah’s throne (כסאו) and that of his seed shall endure as long as (עולם ועד) the sun and moon (v. 29, 37–38). Similarly in Ps 45, 7 we find >>thy throne<<(כסאך) *Elohim*

> is forever and ever (עולמועד…. Such comparisons indicate that the *Elohim* of Ps 45, 7 and the Davidic figure of Ps 89 are not only similar but identifiable.[96]

J. R. Porter bases his own argument for the king as *’ĕlōhîm* on a comparison of 2 Samuel 14 and Genesis 3:

> [A]t 2 Sam. xiv. 17, David is called the Angel of God because he is able *lišmōa‘ ha‡ôb wĕhārā‘*: this recalls Gen. iii. 22 *lāda‘at ‡ôb wārā‘*, and it was precisely this knowledge which placed Adam among the *’ĕlōhîm*. Thus it is hardly correct that an address to the king as God finds no close parallel elsewhere in the Old Testament.[97]

Emerton objects to this view, noting that the notion of the knowledge of good and evil appears in nonroyal contexts such as Deuteronomy 1:39 and 2 Samuel 19:36 and that comparison of David with an angel does not indicate identity with a divine being.[98] However, other elements reflecting royal influence may be discerned in Genesis 2–3, and the nonroyal examples of this type of knowledge may have derived from royal usage. Moreover, the lack of references to the monarch as *’ĕlōhîm* may not constitute a definitive criterion, especially if such “high” royal theology were considered inappropriate in later periods.

Furthermore, the use of *’ĕlōhîm* for the monarch may represent not an ontological claim but a description intended to heighten the power of the king by rhetorically raising him to divine status. K. W. Whitelam speaks to this point: “Widely expressed attempts to explain away such explicit language as due to textual corruption, ellipsism or grammatical niceties have not proved wholly convincing. It needs to be asked to what extent the audience or audiences of royal rituals would have drawn such careful distinctions in the use of language.”[99] In conclusion, interpreting *’ĕlōhîm* for the king in Psalm 45:7 is certainly debatable but plausible on the bases of the versional support; the basic intelligiblity of the syntax; the sense of the idea within ancient Israel, perhaps as a reflex of its West Semitic/Israelite heritage; and its support among many modern commentators. However, the lack of scholarly consensus on this interpretation precludes it as an independent witness to the notion of the king as *’ĕlōhîm*, but it comports with information otherwise known of royal

theology and seems to constitute one of the several mythic ideas applied to the king.

The battles associated with the West Semitic conflict myth are not the only mythological background for royal warfare in Israel. The bloody battle, represented in Ugaritic tradition by the goddess Anat, may provide an insight into the mythos behind the biblical ban (BH *ḥerem*; Ugaritic **ḥrm*) utilized by Iron Age Levantine monarchies (Israel, Judah, and Moab). The same root applies to Anat's warfare in CAT 1.13:[100]

> Destroy under the ban (*ḥrm*) for two days,
> Sh[ed blood (?)] for three days,
> go, kill for fo[ur] days … !

The 1.13 text has verbal connections with Anat's battle in 1.3 II, and it may be that her battling not only in 1.13 but also in 1.3 II may have been considered an example of the ban. Anat's battles, at least in 1.3 II, suggest how the deity was seen to conduct **ḥrm* warfare: first, she slays her enemies in battle; then, she takes captives back to her house/temple; and finally, she devours them. Moreover, 1.3 II may be the most sustained depiction of the ban rendered from the divine perspective. The idea of **ḥrm* as divine battle underlies not only Anat's warfare but also the ban language in the Moabite stele (KAI 181), as well as Israelite battles described as *ḥerem*. In both Moab and Israel this language was used for warfare against royal enemies. The Mesha stele is explicit in the royal use of *ḥerem*. In 1 Kings 20:42, following Ahab's defeat of Ben-hadad, Ahab spares his life. An unnamed prophet meets the king of Israel and announces to him: "Thus said the Lord: 'Because you have set free the man whom I doomed [literally, the man of my *ḥerem*], your life shall be forfeit for his life and your people for his people.'"[101] J. Lust notes of this verse, "The reader is supposed to know that the king of Israel had to consider his defeated antagonist, the king of Damascus, as *ḥrm* to the Lord."[102] Similarly, Samuel, after anointing Saul, commands him to "utterly destroy" (RSV)—that is **ḥrm*—the Amalekites (1 Samuel 15:3). One may assume that the king had not finished the job. Later literature, especially Isaiah 34, applies the bloody language to Yahweh. Isaiah 34 has been connected with "Second Isaiah," and if dated concurrently, the *ḥerem* mythos as represented in verses 2 and 5 of this chapter outlasted the monarchy in Israel. Not surprisingly, given the royal

background of the *ḥerem* language in Deuteronomic account of royal battle, this language is applied in this chapter to Edom, a traditional enemy, in verse 5. To judge from Anat's "herem," it is possible that behind Yahweh's *ḥerem* warfare lies the mythos that when the king defeats and slaughter his enemies, Yahweh is understood as fighting for the king and destroying his enemies in battle, and then slaughtering the enemy captives following battle. As the major deployers of warfare, Iron Age monarchs were well-served by the mythos of *ḥerem*-warfare. Like other mythological concepts that they used to characterize and legitimize their imperial goals, descriptions of *ḥerem*-warfare impute the desire for warfare to the deity whom the king serves.

All of these forms of royal theology focus on the power of the national god; all other deities pale in comparison.[103] This traditional royal theology exalted Yahweh as the national god who sponsored the rule of the monarch. One result was a tolerance of foreign gods regarded as the divine kings of other nations. Moreover, as long as such gods remained in the foreign domain, the national theology was adequate for those monarchic period figures opposed to the cult of what they may have regarded as foreign deities on native soil. Hence, Elijah, a great prophetic figure of the ninth century, looks like a monotheist for the later biblical tradition. So too the eighth-century prophets, Amos and Hosea, oppose the cult of other deities in Israel, but they do not speak about foreign gods in their own territory. These prophetic voices might be regarded as monolatrous, but because of their polemic against others in ancient Israel, they may not have spoken for most people in ancient Israel. In other words, it is not clear that most ancient Israelites during the monarchy either were monolatrous or regarded all other deities as foreign. Indeed, the prophetic polemics point in the opposite direction.

In short, the developments issuing in clear expressions of biblical monotheism involved many changes spanning centuries. With the heightened importance of the national god and the centrality of the national shrine in Jerusalem, eventually both human and divine power coalesced into one central authority, serving both human monarch and divine king. Furthermore, clashes between the cults of Israel's national deity and other deities (whether indigenous or foreign) from the eighth century onward would legitimate innovation over traditional conservatism of regional cult, which probably tolerated variety in worship of other deities as long as the

top tier remained occupied by the national god. The further and possibly corresponding monarchic period tendency to coalesce the imagery of various deities into the figure of the national deity[104] (what I call "convergence"[105]) perhaps reflects the wider tendency of national authority to concentrate divinity in a central cosmic figure, one that reinforces the terrestrial focus point of worship in Jerusalem, the home of both temple and monarchy. The so-called reform movements of Hezekiah and Josiah involved massive social and political strategies that implemented innovations in the name of reform.[106] All these developments within Israelite society and religion contributed to the form of Yahwistic worship that emerges in monotheistic formulations, which seem to emerge distinctly only in the late monarchy and exile. Indeed, it is in the seventh and sixth centuries, reflected especially in "Second Isaiah," when such universal divine claims are unambiguous. In this period the older national theology I have described no longer appeared tenable.

5. The Social and Historical Context of Monotheism

Why did monotheistic statements emerge in the seventh and sixth centuries? What about the situation of these centuries engendered this type of discourse? Why did Judeans so express this vision of divinity during the late monarchy and the exile? What were the changing circumstances of Israel's existence, either within itself or vis-à-vis other nations? I wish to propose and explore a number of aspects of Judean culture in this time period as possible historical corollaries to the development of monotheistic discourse. Because of the dauntingly scanty evidence for ancient Israelite religion, it is impossible to prove "causes" for such discourse, but some aspects of Judah's social structure and historical circumstances correspond in time-frame to the emergence of monotheistic statements and suggest some working hypotheses.

The first involves an aspect of changing social dynamics in this period. The theological intelligibility of a single deity correlates well with the perspective of Judean social structure at the end of the seventh century and afterward. Although the language of council continues strongly in biblical texts after the exile, the root metaphor of the divine family has been

eclipsed. What generally remained is a system headed by the chief god, his consort, lesser or subordinate deities (some as members of his retinue), astral bodies, and servant-messengers, which later Israelite tradition reduced further and then regarded as a sort of monotheism. This later monotheism assumes that divinity is tantamount to an individual figure. In contrast, Ugaritic and early Israelite polytheism involves both a series of individuals and a series of relations among the various deities. As noted at the end of chapter 4, polytheism at Ugarit expressed divine singleness or cohesion through a series of family relationships. Accordingly, I proposed the following working hypothesis in chapter 4 for ancient Ugarit: conceptual religious unity was expressed most strongly in the identification of the divine council as a divine family, a single family of deities whose connectedness is marked by their familial relations. A corollary hypothesis for Judah may be offered: the strongest form of social identity at Ugarit was the family.[107] Therefore, it stands to reason that the polytheistic family may have provided the most "natural" expression of the singleness or coherence of divinity. In early Israel, a similar family structure long obtained, probably through the period of the monarchy. Throughout this period Israelite texts attest to *naḥălâ* for family patrimony and other indicators of lineage maintenance. However, by the seventh century the lineage system of the family had perhaps eroded, thanks to a variety of factors, including the deleterious effects of royal power on traditional patriarchal authority the purchase of family lands by a growing upper class, and the devastating effects of warfare on the countryside.[108] This process culminated in the exilic period, with the loss of land that would diminish the traditional strength of family and inheritance. The post-exilic structure called the *bêt ʾābôt* ("fathers' house")—as opposed to the older and more traditional form known as the *bêt ʾāb* ("father's house")—has been thought to be a further witness to the decline of the traditional family structure.[109] Israelite texts dating to roughly the same period as the earliest clear expressions of monotheism (seventh and sixth centuries) proclaim that the righteousness of parents cannot save their children (Ezekiel 14:12–23). This change in perspective might be reflected also in the claims of sixth-century prophets (Jeremiah 31:29–30; Ezekiel 18, cf. 33:12–20) and deuteronomic literature (Deuteronomy 24:16)[110] that children would no longer be punished for the sins of the fathers.[111] A culture with a diminished lineage system, one less

embedded in traditional family patrimonies due to societal changes in the eighth through sixth centuries,[112] might be more predisposed both to hold to individual human accountability for behavior and to see an individual deity accountable for the cosmos. (I view this individual accountability at the human and divine levels as concomitant developments.) Accordingly, later Israelite monotheism was denuded of the divine family, perhaps reflecting Israel's weakening family lineages and patrimonies.[113]

The second major corollary to the emergence of monotheistic statements in the seventh and sixth centuries involves Judah's situation in the world that it faced for the first time in this period. This point has been made well by J. H. Tigay: "The need to emphasize the monotheistic idea in this period was probably due to the increased exposure of Israel to the triumphant Assyrian and Babylonian empires, which attributed their victories, including victories over Israel, to their gods."[114]

First in the face of the great empires and then in exile, Israel stands at the bottom of its political power, and it exalts its deity inversely as ruler of the whole universe, with little regard for the status of the older deities known from the pre-exilic literary record.

These two features constitute the larger landscape of monotheistic discourse and help to explain its intelligibility in this time period. Israel's political and social reduction in the world (first because of the rise of empires in the eighth and seventh centuries and then because of the "Exile" in 587–538) further altered its social structure in a manner that had a serious impact on its traditional theology. We have already seen the traditional theology in Deuteronomy 32:8–9 affirming that all the nations had their own patron-gods, with Yahweh as Israel's. Moreover, we have seen how this idea was expressed in conflictual terms in the royal world-view of the "royal psalms" (usually included are Psalms 2, 18, 20, 21, 45, 72, 89, and 110).

The reduction of Judean kingship, especially following Josiah and the subsequent loss of Judean kingship, changed the parallel or mirroring worldview known from the royal psalms. The rise of the Neo-Assyrian and Babylonian empires issued in a serious religious reflection on Yahweh's power over the nations. The loss of identity as a nation changed Israel's understanding of the national god. Looming empires made the model of a national god obsolete. Moreover, the rise of supranational empires suggested the model of the super-national god. As a result, the figures of

Assur and Marduk assumed such proportions, the super-gods whose patronage of empires matches their manifestation as the sum-total of all the other deities. As noted in chapter 5 (sections 1 and 2), Mesopotamian authors are exploring the nature of all divinity in relation to a single major god. The response from Israel followed suit in one respect. The events leading to the Judean exile of 587 extended Israel's understanding of its deity's mastery of the world even as the nation was being reduced. This shift involves a most crucial change in different Judean presentations of the relationship between the mundane and cosmic levels of reality (or, put differently, between the immanence and transcendance of divinity).[115] As Judah's situation on the mundane level deteriorated in history, the cosmic status of its deity soared in its literature. The timing of the emergence of Israelite monotheism in the late Iron Age and exilic period fits Karl Jaspers's the "Axial Age," a period in world history (ca. 800–200) that "witnessed the emergence of revolutionary new understandings of human understanding," including the awareness of "the separation between transcendant and mundane spheres of reality."[116]

Some scholars locate this shift to monotheism in the Persian period.[117] The date of "Second Isaiah" at the beginning of the Persian period might lend support in this direction, and the other biblical texts in question have likewise been dated to the Persian period by some scholars. Accordingly, the emphasis on a single divine power of good in Zoroastrianism has been thought to provide a model for the monotheism expressed in the Bible. I have reservations about this theory, apart from the dating of the biblical texts in question.[118] The first question involves the Persian model. Zoroaster (Zarathustra) preached a dualism pitting Ahura Mazda, the spirit of good, along with his six Amesha Spentas ("Bounteous Immortals"), against a spirit of evil named Angra Mainyu, later spelled Ahriman.[119] This dualism does not truly resemble biblical monotheism. Indeed, a principle of evil, for example in the form of Belial, Satan, or the devil, began to appear only in the latest biblical works and in the other Second Temple literature.[120] Furthermore, the language of biblical monotheism appears to represent, at least in its formulations, developments of older language exalting the national god. Proponents of the Persian period setting for biblical monotheism rarely, if ever, address these issues. On the other hand, this is not to say that Persian religious tradition did not reinforce

monotheistic rhetoric in this period or influence some biblical presentations of divinity. Some years ago A. L. Oppenheim claimed that the “eyes and ears” of the Persian king served as the model for “the satan” in the book of Job 1–2.[121] One might concede that the Zoroastrian notion of the good god reinforced the Judean notion of monotheism, as later developments would.[122] Yet it was not Judean monotheism’s main progenitor. In fact, internal and external changes in Judah’s situation in the seventh and sixth centuries correspond to the timing of monotheistic statements presented at the outset of this chapter. Thus far, what we have seen of monotheism, especially in section 1, appears in the form of declarations. The expression of monotheism also extended to monotheistic descriptions and narratives; these are explored in the next chapter.

9
The Formation of Monotheistic Theologies in Biblical Literature

> O Lord, our Lord,
> How majestic is Your Name throughout the earth!
>
> Psalm 8:2 = 10

The preceding chapter discusses royal theologies as a backdrop to the emergence of monotheistic rhetoric. This chapter addresses three monotheistic adaptations to the older model of the Israelite national god: (1) a priestly model, (2) the form of the figure of wisdom personified in female terms, and (3) apocalyptic imagery, with its clear reminiscences of old monarchic theology. All three involve old mythic material that spoke powerfully and was reused in new and varying circumstances. Mythic narratives and imagery were the chosen forms not only of educated classes such as the monarchy or priesthood. Rather, these groups likely drew upon these materials precisely because they were well known among the educated and uneducated, rich and poor.[1] After the treatment of these "monotheistic" presentations of the Israelite national deity, I will address the so-called demise of myth in Israel. Like the preceding chapters, this survey uses the Ugaritic mythological texts as a primary source.

1. Creation, Paradise, and the Priesthood

The preceding chapter illustrates how the monarchy used old mythic material known also in the Ugaritic texts. The monarchy was not alone in

this regard. A priestly text, Genesis 1 shows a modification of old mythic material known from Israel and the rest of the ancient Near East.[2] This creation story combines two different visions of the cosmos: the first and older view that a cosmos is the stage where divine wills engage in conflict; and the second and largely priestly notion that the cosmos is a holy place analogous to a sanctuary.[3] The discussion of the royal ideology in the preceding chapter demonstrates the fundamental notion of the cosmos as a stage of conflict between cosmic powers, usually with the chief warrior-deity and divine royal patron slated against cosmic powers. The ancient Near Eastern text perhaps cited most often as an example of the cosmos as a locale for conflict between divine wills is the Babylonian classic known from its first two words, Enuma Elish ("When on high …").[4] In the cosmic world of this text, deities face off in battle like the royalty who patronized the epic and their enemies; then in the wake of this divine conflict creation emerges. The cosmos of the epic corresponds to the human world in three ways: (1) the enemies of the divine king, Marduk, and their human counterparts can threaten the world; (2) both kings, divine and human, reign from Babylon at the center of the world; and (3) the temple of the god is the cosmic center linking both divine and human dominion.

A number of West Semitic texts likewise allude to the cosmic conflict between the storm-god and his enemies, as noted at length in section 3 of chapter 8. The use of the conflict story to reinforce human kingship appears in a variety of texts, hailing from the city of Mari on the Euphrates river all the way to Egypt. The political use of the conflict between storm-god and cosmic enemies passed into Israelite tradition. Yahweh is not only generally similar to Baal as a storm-god. Yahweh inherited the names of Baal's cosmic enemies such as Leviathan, Sea, Death, and Tannin, as well as the name of Baal's home on Mount Saphon, which is secondarily identified with Zion in Psalm 48:3. With this evidence, it would appear that Yahweh's titles, "Rider of the heavens" (Deuteronomy 33:26; Psalm 104:3) and "Rider of the Steppes" (Psalm 68:5), echo Baal's own title, "Rider of the Clouds."[5] The political use of this conflict language also passed into ancient Israel. The biblical parallel between Yahweh, the divine king, and the Davidic ruler, the human king, may be seen in Psalm 89. The parallelism between Yahweh and the king changes, however, in verse 26, and a different sort of notion appears: Yahweh promises to extend his power to the monarch in language associated in Ugaritic with the god Baal: "I will

set his hand on Sea and his right hand on Rivers."[6] In contrast, Genesis 1 depicts God as an omnipotent deity relative to comparable biblical passages treating creation of the cosmos.[7]

Moreover, the first creation story in Genesis 1:1–2:4a points beyond conflict to a vision of a holy universe, which adds to the older model of the universe as a site of conflict. This priestly narrative presents the cosmos as the divine holy place, even while it shows its debt to the old model of the cosmos as battlefield. Genesis 1 manifests the marks of the old royal model of the cosmos, but the story modifies this vision of the cosmos in three ways. First, as I noted, Enuma Elish and various biblical texts connect creation with divine conflict. Psalm 74:12–17 makes the divine conflict the basis for the establishment of the sun, moon and stars as well as the boundaries of the earth. In contrast, Genesis 1 shows only a hint of this old tradition. At the opening of Genesis 1, the audience expects the conflict, as the "mighty wind," or possibly "divine spirit" (*rûaḥ ʾĕlōhîm*), hovers over the face of the cosmic waters. Rather than conflict, Genesis 1 has God speak or make, and creation happens. With but a word, without conflict, God effects the opening of creation. In omitting the divine conflict, Genesis 1 marks a paradigm shift in the presentation of creation.[8]

Second, the old language of human rule, associated with royal model of creation as conflict, still appears in Genesis 1:[9] humanity is to "rule" (**rdh*) over the terrestrial creation (verse 28) as a human governor on earth corresponding to the King of Kings in heaven.[10] Genesis 1 alters this royal motif in that the king on earth is not the Israelite king but all humanity. The creation of the human person in Genesis 1:26, in the "image" and "likeness" of God, represents a major shift from the old royal model. The idea of "the image" of the gods was, in ancient Near East, applied to the king.[11] It was the king who was the image of the deity. The creation of humanity in the divine image represents an ancient Near Eastern idea that has been repackaged in its priestly context. More specifically, the ancient Near Eastern material compared to the biblical passage reflects the notion of the king as "the image" of the deity.[12] Like Genesis 1:26–28, Egyptian material shows the application of this royal idea to humanity more generally. W. H. Schmidt and M. Fishbane[13] note the instructions of King Meri-ka-re:[14] "They who have issued from his body are his images."[15] Genesis 1:26

changes this idea. For humanity, understood as the participant in the cosmic Sabbath, is to be the holy image of God on earth.

If these three features of Genesis 1 represent alterations to the royal model of creation involving divine conflict, then what is the new priestly vision of reality? Often noted in Genesis 1 are the correspondences between the first and second sets of three days culminating in the seventh day.[16] This order is more than an orderly construction; it is a religious order and has a moral character. It is imbued by the word of God and seen as good. This universe intimates a priestly blueprint for human existence in three ways long recognized by scholars. The divine resting (**šbt*) on the seventh day anticipates the priestly institution of the Sabbath in Exodus 20 and 31. Furthermore, Genesis 1:14 states that the lights in the firmament are to mark the times for feast-days, weeks, and years, a central feature for maintaining priestly cult. Finally, the division of the universe into heavens, earth, and seas and the assignment of the animals to these spheres foreshadow another priestly prescription, the system of dietary requirements (later called kashrut, or the practice of "keeping kosher").[17] These three themes point to the priestly service and holiness that are to characterize this new creation.

In Genesis 1, creation is no longer primarily a conflict; it is the result not of two wills in conflict but of One Will expressing the word issuing in the good creation. This One Will places humanity in this creation. The life of this creation is to be holy, moral, and good, and perhaps even priestly. One may suggest that the cosmos in Genesis 1 was to be understood as a holy place, such as a sanctuary.[18] The relation between Temple and creation was well-known. The Temple in Jerusalem, decorated with the motifs of the cosmos and the Garden of Eden, mirrored the cosmos. Biblical descriptions of creation and temple-building have influenced one another and constitute, in J. D. Levenson's view, a "homology."[19] Psalm 78:69 expresses this view metaphorically: "He built his sanctuary like the high heavens, like the earth which he has founded for ever."[20] In Psalm 78 temple-building is rendered in terms of creation.[21] Psalm 150:1 likewise expresses this idea in poetic parallelism:

> Praise God in His sanctuary;
> Praise Him in the sky, His stronghold.[22]

In this case the divine sanctuary and the sky are poetic parallel terms that explain one another, perhaps implying that the heavens constitute the divine sanctuary. The sense of cosmos as sanctuary may lie behind Genesis 1 or may be evoked by it. Furthermore, the implicit evocation of kashrut in Genesis 1, if correct, may also suggest the notion of cosmos as temple. W. Houston has argued that the practice of kashrut arose in ancient Israel in the priestly protection of temple purity and holiness.[23] If this is right, Genesis 1's delineation of realms in the universe according to animals may evoke temple practice and in turn a vision of the world as a kind of temple. In any case, creation is built as a moral, good, ordered holy place, and humanity is placed in this holy site to imitate the rest, order, and holiness of the Deity in whose image humanity is made.

Genesis 1 does not use conflict as the main element in its vision of the cosmos and the place of humanity in it. Instead, the priestly holiness of time and space overshadows the component of conflict.[24] This view made sense of a world in which monarchy no longer protected Israel. This outlook would serve Israel well in exile and beyond when responsibility for community order passed from the Davidic dynasty to the priesthood of Aaron. Indeed, Genesis 1 has often been dated to the exilic or post-exilic period.[25] Genesis 1 reflects this change: to the royal model has been added a priestly model. The politics of creation have changed. There is still a king in this world, but it is the King of Kings, the One Will who rules heavens and earth alike, with no serious competition, and this King in Heaven is to be followed by humanity ruling on earth. There is no single royal agent on earth whose human foes mirror the cosmic foes of the divine king. Moreover, this king is the Holy One enthroned over the cosmos.[26] Thus, the vision of humanity in Genesis 1 anticipates the divine election of Israel as the prototypical servant of Sabbath.

With these theological moves evident, Genesis 1 creates a "monotheistic poetics." As I noted in chapter 1, Genesis 1 minimizes the cosmic waters as divine enemy. In this passage the lack of any conflict, or even any personification of the cosmic oceans or waters, is designed to heighten the picture of a powerful God who but speaks and the divine will is accomplished. So too the passing generic reference to the *tannînīm* in Genesis 1:21 conveys the notion that this God's power is incomparable, beyond any other power, beyond opposition. Not only is the conflict role eliminated in Genesis 1; even the old role of cosmic forces as domesticated

has been muted by downplaying them, even depersonalizing them. These cosmic monsters are no longer primordial forces opposed to the Israelite God at the beginning of creation. Instead, they are creatures like other creatures rendered in this story. The narrative encloses the order of the divine creation around these monstrous enemies and by omission transforms them into another part of creation. In short, the change of these divine enemies into creatures involves a lexicon of creation. This reading also works for the sun and the moon, called only "the greater light" and "the lesser light" (Genesis 1:16), titles that were not necessarily polemical as such but quite traditional (cf. "great light," *nyr rbt*, for the Ugaritic sun-goddess in CAT 1.161.19,[27] and "light of the heavens," *nrt šmm*, for the Ugaritic moon-god in 1.24.16, 31). Genesis 1 does not present these figures as divinities. Instead, like the sea creatures, they are located within the created order. Here ambiguity between Creator and creatures is resolved; there is no middle ground left in Genesis 1's "monotheistic poetics." Such a depiction drains power from any old forces of opposition and leaves God as the only power in the universe.

The priestly context defines not only the character of humanity, but redefines traditional Israelite notions of the deity. Genesis 1:26 inverts Ezekiel 1:26, which itself represents a deliberate attempt to stress the transcendent character of Yahweh by reducing the anthropomorphic presentation of Yahweh in the heavenly divine council well-known from Ugaritic and biblical texts (especially Isaiah 6). Ezekiel 1:26 conveys the prophet's vision of the divine with the language of "image" of the human person ("an image like the appearance of a human," *dĕmût kĕmar' ēh 'ādām*), whereas Genesis 1:26–28 presents a vision of the human person in the likeness of the divine. Unlike Ezekiel 1:26, which reduces Yahweh to human terms in an anthropomorphic portrait (albeit a considerably more limited one than that in prior prophetic texts), Genesis 1:26–28 magnifies the human person in divine (or perhaps mythic) terms.[28] This application of prior royal theology to humanity represents a characteristic priestly notion[29] designed to reinterpret mythological notions about the monarchy in the face of its demise. Moreover, given the use of *dĕmût*, "likeness" and *ṣelem*, "image" for statues,[30] in Genesis 1:26–28 this vocabulary may represent an implicit polemic aimed against the making of images. Clearly humanity serves as the living image of the Israelite deity, and it is perhaps implicit then that images of of man-made objects constitute lifeless symbols of dead

gods. Such a polemic emerges explicitly in the monotheistic rhetoric of "Second Isaiah" (discussed in the next chapter).

The imprint of priestly concerns has been detected also in Ezekiel 28.[31] Whereas older West Semitic motifs may be perceived in biblical paradise traditions, Israelite innovations in the paradise traditions[32] perhaps included the identification of the garden with the temple [33] and the naming of paradise as Eden,[34] a term that echoes the feasting in the Temple in Psalm 36:9 (cf. Jeremiah 51:34; Nehemiah 9:25).[35] Other features of the Jerusalem temple likewise evoke elements in Genesis 2–3, including the cherubim, palm trees, the divine presence, and the waters below the Temple.[36] One of the rivers in paradise (Genesis 2:10) is known as Gihon, the same name as the main spring of Jerusalem; whatever the precise origin of the name in Genesis 2:10, such similarity suggests the paradisial connotation of Jerusalem and its temple.[37] Indeed, Isaiah 51:3 makes this connection on the metaphorical level: Yahweh will restore the "wilderness"//"desert" (NJPS) of Zion like the garden of Eden. These innovations in the Israelite notion of paradise suggest that the Temple served in part as a model for the name and description of Eden.

Ezekiel 28 may contain both royal and priestly "myth-making." J. van Seters claims that the figure in Ezekiel 28:12–19 is the monarch,[38] whereas R. R. Wilson sees in this passage priestly polemical redaction making this figure into a priest.[39] Following M. H. Pope and others, Wilson assumes that the priestly editor(s) of Ezekiel 28 inherited the motif of the fall,[40] implying that, like the expulsion motif in Genesis 3, the fall in Ezekiel 28 predated its priestly tradents. Wilson begins his analysis of the editorial history of Ezekiel 28 with the list of precious stones in verse 13 to be worn by a figure in the garden of God. The stones are especially suggestive of the high priest's breastplate. Although van Seters may be correct in observing the originally royal character of the figure, in the priestly redaction of the material, the figure seems to bear a priestly character.[41] Wilson assumes that the "garden of God" is synonymous with the temple and that the figure is one who wears the stones, specifically the high priest who exercised his authority in the temple. According to verse 14, the cherub was "with" (so LXX; cf. MTT *'att*) this figure; for Wilson, this is the high priest who entered the Holy of Holies and faced the cherubim throne of Yahweh. Yet MT *'att* in verse 14 suggests that the object of polemic is the cherub itself.

If Wilson's analysis of the chapter as reflecting an inner priestly polemic at the redactional level is correct, then the apparent object of polemic in the reading of MT *'att* might be the cherub iconography of the Jerusalem temple. If so, the passage may represent an inner priestly (northern?) polemic directed against the Jerusalem cult. Accordingly, Wilson views Ezekiel 28 as reusing the old fall from the divine mountain as an inner Israelite critique of the priesthood. Ezekiel 28 would then represent an example of priestly reuse of traditional mythic material.

Although many motifs known from Ugarit and Mesopotamia resonate in the biblical descriptions of paradise,[42] the biblical narratives reflect a number of innovations. The paradise traditions show evidence of various levels of myth-making in ancient Israel, including royal and priestly elements. The identification of temple and paradise implicitly provide a privileged place for the sacrificial cult maintained by the Aaronid priesthood in the temple. Indeed, one might hypothesize that the figure of the high priest superseded the monarch as the prototypical denizen of paradise. Concurrently, the monarch in conflict with other worldly powers and protected by the Divine King gives way to the One Power served in a cosmos-sanctuary by a priestly Israel with no other deities in view.

2. Wisdom and the Levites

Another examples of mythic material used by specific sectors of society for monotheistic purposes may involve the imagery of Wisdom personified. Proverbs 1–9 presents a divine invitation from the female personification of Wisdom. In the past, a number of scholars compared the figure of Wisdom to the Canaanite goddess Asherah.[43] The "tree of life," which recalls the tree of the asherah,[44] appears in Israelite tradition as a metaphorical expression for Wisdom (Proverbs 3:18; cf. 11: 30, 15:4; Genesis 3:22; Revelation 2:7). Like the symbol of the asherah, Wisdom is a female figure, providing life and nurturing. Proverbs 3:18 may be especially pertinent: "She is a tree of life to those who lay hold of her; those who hold her fast are made happy" (*'ēṣ-ḥayyîm hî' lammaḥăzîqîm bāh wētōmĕkêhā mĕ'ušŝār*). This verse closes a small unit consisting of verses 13–18 and forms a conspicuous chiasm with verse 13. This verse opens with "Happy the one

who finds wisdom" (*'ašrê ' ādām māṣā' ḥokmâ*). The unit begins and ends with same root, **'šr*, "to be happy," specifically with *'ašrê*, "happy," in verse 13 and *mĕ'uššār*, "made happy," in verse 18. The inside terms of the chiasm are *ḥokmâ*, "wisdom," and *'ēṣ-ḥayyîm*, "a tree of life." Finally, the terms *'ašrê* and *mê'uššār* perhaps allude to the asherah,[45] the tree symbolizing life and well-being. Here we may see a move to "monotheize" the imagery of the Asherah in a wisdom framework. B. Lang has suggested that the female figure of Wisdom functions as an image of "the divine patroness of the Israelite school system."[46] If so, Proverbs 1–9 uses the old mythic language associated with Asherah in the service of the particular social horizons of wisdom-scribes.[47] Accordingly, this use may represent a wisdom modification in the direction of monotheism. If Proverbs were a Levitical product, as perhaps suggested by verbal links with Deuteronomy,[48] then one might argue further that the female personification of Wisdom is the divine patron of the Levitical duties of teaching and writing, as these roles are attributed to the Levites.[49]

3. Apocalyptic Literature: The Case of Daniel 7

As we have seen, the monarchy was not the only segment of Israelite society that used the creation-conflict to describe divine power. Nonroyal texts also refer to the divine conflict between Yahweh and cosmic forces at the time of creation to illustrate Yahweh's ancient powers. Psalm 74:12–17 and Isaiah 51:9–10a are often cited as two classic biblical examples.[50] This conflict is set not only set in the primordial past but in the future as the definitive moment of Yahweh's salvation of Israel. Isaiah 27:1 may be the most poignant instance of this theme: "In that day the Lord with his hard and great and strong sword will punish Leviathan the fleeing serpent, and he will slay the dragon that is in the sea." The apocalyptic visions of Daniel 7 and Revelation 13 present the beasts of the Sea whom Yahweh, the divine warrior, will ultimately sweep away. The political link between these beasts and world empires was no late invention but echoed the mirroring of divine and human kings and the cosmic and human enemies known already in the second millennium.

Post-exilic apocalyptic preserved the conflictual nature of the forces in the cosmos but with the human king removed from the equation.[51] Daniel 7 expresses the conflict in largely cosmic terms, with the four beasts rising out of the cosmic sea. Whereas these beasts reflect the four empires on earth, the human counterpart to Yahweh is no human king but a persecuted community that can take solace only in divine help.[52] Here are the political vestiges of the old royal theology. Such a portrait, though less overtly political than Daniel 7 and the apocalyptic tradition, nonetheless covertly adapts to the new order on the earthly level and adjusts its religious vision accordingly. Like Daniel 7, Genesis 1 magnifies Judah's deity over the whole cosmos, despite what takes place in Judah's historical experience.

In summary, the monarchy and the descendent discourse of the apocalyptic, as well as the different priestly lines, used mythic concepts to advance their messages. These concepts specifically reflect the social location of their users. Both Ugaritic and Israelite royal and scribal-priestly groups constituted the primary literary preservers of mythic material,[53] and they were both in a position to use ancient mythic material to suit their own ends. Indeed, the extant texts of these groups grounded their claims of divine sanction by appealing to mythic imagery. For scribal-priestly groups, this reuse of mythic material assumed a monotheistic cast.

4. From "Canaanite Myth" to Biblical Monotheism?

It is often claimed that part of the development of biblical monotheism involved a rejection of myth. In addressing the "demise" of myth in ancient Israel, I should reiterate some basic points. It is true that myth as narrative centered on Yahweh or other divine beings is poorly attested, but mythic imagery is abundant in the Bible. And even if the number of myths included all narrative mentioning any divine being under the rubric of myth, that extant Israelite mythic material (and the key word is extant) still does not include lengthy narratives describing only the divine realm and its inhabitants, like Enuma Elish or the Baal Cycle. Moreover, many biblical passages involving mythic material show a temporal shift. Mythic imagery is used to describe the present in prayers and the future in apocalyptic.[54] This state of affairs points to a central question in the discussion of myth:

why is mythic imagery so prevalent in biblical literature whereas the amount of attested myth is, properly speaking, relatively minimal?

Since the discovery of the Ugaritic texts, this question has been framed in a number of ways. Some scholars have questioned whether Israelite literature included epic (with Yahweh as the central character).[55] Citing the Ugaritic texts as examples of the epic genre,[56] S. Talmon argues that the absence of the epic from Israelite literature reflects a conscious purging of this genre because of the polytheistic components associated with it.[57] Without providing a historical setting for his proposal, Talmon argues that the Pentateuch had a "normative character" bearing on the absence of "epic" elements in other parts of the Hebrew Bible.[58] It would not appear, however, that the epic genre had negative connotations; nor is it clear that the Pentateuch exercised a "normative character" on Israelite literature generally. Indeed, U. Cassuto identified several epic elements and compositional techniques specifically within the Pentateuch:[59] "These are indications of poetic versions that antedated the Biblical sections, and several elements of which were absorbed by the prose portrayals of the Torah."[60] Later texts deal with these "epic" elements as a problem of anthropomorphism, and the issue may have involved not the polytheistic content of epic, but polytheism[61] more generally. Indeed, Deuteronomy 4:15–16 links the issue of not seeing the "form" of Yahweh with the prohibition against the creation of "graven images."

Like Talmon, D. Damrosch sees an anti-Canaanite purpose behind biblical prose materials,[62] but he views the issue of genre in terms quite different from those Talmon advanced. According to Damrosch, the biblical prose narratives of the Pentateuch and the Deuteronomistic History were modeled on Mesopotamian models that combine and transform older, traditional genres.[63] For Damrosch, biblical narratives also drew heavily from models known from Mesopotamian literature, Gilgamesh and Genesis 2–11 as his key examples.[64] Although he speaks of "the early Yahwistic merging of prose chronicle and poetic epic,"[65] Damrosch's argument implies that older West Semitic poetic models were not adopted in ancient Israel to describe its national stories. It does indeed appear that the form of myth was not continued in the extant forms of national prose epic from the period of the monarchy and afterward. Rather, in the cases of extant prose

histories, other models tended to displace the old West Semitic model of poetic myth, according to Damrosch.

Talmon erroneously links the lack of myth in Israel to the prose form of the Pentateuch. In later periods polytheism apparently exercised for priestly groups one theological guideline or constraint not on the form of myth as Talmon argues, but rather, the content of myth-making may have been affected by priestly concern about polytheism (although "lesser" divine beings were not excised from later mythic images or narratives). Damrosch's approach implies that the lack of poetic myth in the biblical corpus may serve as the basis for a general judgment on the West Semitic form of myth in ancient Israel. However, extra-biblical literature indicates that myth survived as a literary phenomenon in ancient Israel, just not in the extant biblical canon. Therefore, the absence of myth from the extant national narratives of ancient Israel may indicate the purposes only of their authors or tradents. Furthermore, Damrosch does not address the fact that, even if only vestiges of the older models of myth survived in extant biblical literature, mythic imagery so suffuses Israelite culture that it survived in genres involving discourse about Israel's deity. A more complex diachronic model is required to address the general absence of myth from the biblical corpus.

First of all, two stages of avoiding and muting anthropomorphism (and thus mythic language)[66] are discernible, one at the outset of known Israelite texts and another perhaps in the eighth to sixth centuries.[67] In the first stage, early levels of biblical literature exhibit many points of contact with Ugaritic literature in describing the storm-god in his meteorological procession, but Yahweh is not as personified of in the oldest biblical poetry as Baal is in Ugaritic tradition. The depiction of Baal's conflict with Yamm (CAT 1.2 IV) is discernibly more anthropomorphic than any biblical descriptions of Yahweh's conflict against cosmic enemies. The Ugaritic texts describe gods locked in hand-to-hand combat. There is a corresponding tendency in the images of the heavenly armies belonging to the entourage of Yahweh in early texts (implied in Judges 5) as well as in the later texts such as Joel, 2 Baruch 8 and 22:6, and 2 Enoch 29:3. Whereas the entourage is explicitly connected with Baal in Ugaritic literature (CAT 1.5 V 6–8), the armies appear more independent of Yahweh in biblical and intertestamental literature. Yahweh does not appear personified in the battles waged by the heavenly armies led by the divine angelic warriors.

Similarly, the love of the various members of the Ugaritic pantheon is graphic by comparison to divine sex in the Bible. Indeed, it has been argued that the Hebrew Bible shows no example of sex or death in the case of Yahweh comparable to the sexual behavior and death in Ugaritic poetry.[68] This claim may be modified by reiterating the point (made in chapter 5, section 2) that one or two biblical passages may allude to divine sex or genitalia. Even if so, the biblical texts in question are nonetheless considerably less graphic or as direct as Baal's copulation with a heifer "seventy-seven times"// "eighty-eight times" (CAT 1.5 V 19–21). Parenthetically, given its priestly background, Ezekiel 16:9 may represent a "metaphorical construal" rather than a general notion of the deity (although if this image were generally known in earlier Israel, it may not have beeen considered "only" metaphorical). J. Barr distinguishes between less indicative anthropomorphisms in metaphors and more indicative divine descriptions in theophanies.[69] This approach likely applies to the sexual metaphor in Ezekiel 16:9. Even if one were to assume a "more literal" character for this verse, it is quite muted compared to divine sexual scenes attested in the Ugaritic text. In a similar vein, Ugaritic mythology describes or presumes theriomorphous deities in a manner largely absent from extant Israelite texts. Baal's mating with a heifer presupposes the view of him as a bull, and El himself is called "bull" (*tr*). Anat is described in flight, and iconography preserved from Ugarit depicts her as a bird.[70] Divine theriomorphous depictions in Israelite literature are rare and slight by comparison, surviving only in a handful of metaphors and titles (Numbers 24:8; cf. Genesis 49:24 [?]; Psalm 132:2, 4). The West Semitic literary tradition was quite anthropomorphic, and the Israelite literary tradition reduced this anthropomorphism to some extent.

The second stage occurred from the eighth to the sixth centuries. Earlier works such as the "Yahwist" show, in the words of H. Bloom, "uninhibited anthropomorphism,"[71] but later works further mute anthropomorphism. Two brief examples may illustrate the point. First, Yahweh had no "form" according to Deuteronomy 4:12, 15.[72] The language of divine "form" is found explicitly in Psalm 17:15, and it has been traced to the use of the divine "form" in the story of Baal's battle against Yamm (CAT 1.2 IV 26).[73] Second, the vision of the divine in Ezekiel 1 deliberate attempts to stress the transcendent character of Yahweh by reducing the

anthropomorphic presentation of Yahweh in the heavenly divine council. The second stage did not hold sway generally in Israelite culture, as many Second Temple and rabbinic texts, especially apocalyptic literature, indicate the popularity of myth throughout the history of ancient Israel.

What were the reasons for the reduction of myth in biblical works? Three suggestions may be offered. First, the inclusion of other divine images may have been influenced by concerns about monolatry, as commentators have long claimed. It is striking that one example of new mythic material, the personification of Wisdom, involves a female figure. Jerusalem, too, is presented as a mythic sort of female personification (Ezekiel 16 and 23).[74] What was the impetus for such mythic figures? In view of the divine language and imagery associated with both figures, perhaps both figures represent substitutions for divine female figures. G. von Rad once termed the figure of Wisdom in Proverbs 9:1–9 "as a contrast [*Kontrastbild*] and a defence against" customs associated with a goddess.[75] This view appears plausible, given the presence of at least Astarte in Israel during the period of the monarchy. The language of Jerusalem and Wisdom personified may have usurped imagery associated generally with goddesses, perhaps specifically with the asherah (with the possible concomitant demise of the goddess Asherah in ancient Israel) and applied it to the figure of Wisdom as a "counter-advertisement" to the cults of Astarte and the Queen of Heaven.[76] Hence, new myths may in part represent replacements in service to monotherstic representations of divinity.

Second, because later biblical literature shows fewer mythic characterizations of Yahweh than early biblical tradition,[77] it may be suspected that the absence of literary myth occurred primarily within those circles responsible for the production of the extant national narratives. Even the apparent discrepancy between West Semitic myth and the first stage of Israelite literature may reflect later influences rather than some original feature of Israel that distinguished it from its neighbors. The sources for the first stage are unfortunately inaccessible to modern students of Ugaritic and Israelite literature. It is not difficult to imagine, however, that the second stage may have influenced what survived from the first. Perhaps some of the possible, older images of Yahweh (for example, having a consort) did not have survive generally in the later Israelite cult. The different priestly lines during this period found their own primary images of Yahweh (whether older or newer ones) sufficiently incompatible with some of the

older images and chose not to preserve them, thereby functionally censoring them. Indeed, the presentation of Yahweh generally as sexless and unrelated to the realm of death was apparently produced by a priesthood who viewed this deity as fully removed from realms of impurity, especially sex and death.[78] Holier than the holy of holies, the deity of the priesthood would have epitomized the fullest possibilities of sacredness and separation. Older views perceived to be incompatible with this presentation of the deity may have been modified precisely by those priestly groups responsible for the redaction and transmission of so much of the extant biblical texts.

Finally, other sources for this de facto "censorship" should be considered. Perhaps other concerns or traditions of written transmission guided the absence of myth or muting of anthropomophism. What was omitted from the biblical corpus may have stemmed not only from general religious features of ancient Israel. Other factors—for example, the role of scribalism in the formation of Israel's religious tradition—likely contributed to the presentation of Yahweh as divine scribe (Exodus 31:18; 34:1; Deuteronomy 4:13; 5:22). Other sociological factors may have influenced divine images in the Bible.[79] The priestly lines that so heavily marked the composition, transmission, and redaction of the extant biblical materials may have diminished notions of the divine council and divine messengers not only out of a specific concern for monolatry or the national story of Israel as such but also because these notions did not cohere with their preferred notions about Yahweh.

In closing, old myths could be transformed in form or content or both, at times transferring roles of other gods to Yahweh or creating subordinate divine female figures possibly to replace goddesses. These changes constitute aspects of the newly emergent Judean monotheistic theologies. New Israelite mythic imagery and narrative evoked the present or the future, not so much the distant past.[80] These changes largely represent internal Israelite developments that also fostered a monotheistic outlook. As the royal and priestly uses of myth indicate, myths address problems within Israelite society and are not simply reflections of Israel's putative early "anti-Canaanite" and original monotheistic stance.[81] Some surviving myths appear filtered through the lenses of the priestly groups responsible for the transmission of the extant biblical corpus. Finally, given the wide disparity in the treatments of myth versus mythic imagery, mythic imagery was treated in as negative a way as many myths were in the biblical corpus.

Despite the critical attitude toward myth, Israel and its later religious successors in both Jewish and Christian traditions creatively transmitted and transformed mythic narrative as well as imagery to express a vision of the monotheistic God.[82]

The new monotheistic language and its rhetoric proved flexible in differing historical contexts and for different social segments of Judean society. As this chapter illustrates, the users of monotheistic rhetoric modified older mythic imagery into the discourse of a single deity. In short, biblical monotheism included transformations of Canaanite myth. Put differently, biblical monotheism constituted part of Israelite's own foundational myth comparable in some respects to Canaan's own myths. The last chapter is reserved for the portion of the Bible that contains the most and the boldest monotheistic statements and presentation of deity in order to convince its audience of Judean victory in the era of foreign empires; that portion is Isaiah 40–55, also called "Second Isaiah."

10
Monotheism in Isaiah 40–55

> We shall not cease from exploration
> And the end of all our exploring
> Will be to arrive where we started
> And know the place for the first time.
>
> T. S. Eliot, *Four Quartets*

This final chapter turns to the parade example of biblical monotheism, chapters 40–55 of the book of Isaiah. As chapter 8 notes, this portion of the Bible is attributed not to the prophet Isaiah but to an unnamed author speaking in the prophet's voice around the end of the exile of Judah in Babylon (dated to 587–539). Because this section has been viewed as a separate work, scholars have called it "Second Isaiah." Perhaps quotation marks around this term is a good idea, for it is unclear that the author or redactors of this section intended for it to be read or regarded separately from the prophet's own words. In a time when nothing seemed possibly good for the Judean elite held in captivity in Babylon, the rhetoric of "Second Isaiah" soars, evoking a god capable of all things. Before delving into the particulars of this work, we may note how this work, like Genesis 1 and Daniel 7 described in chapter 9, modifies the old royal theology in many respects. First, the Judean king vanishes from the picture, and in turn Yahweh freely uses the royal means available to exercise the divine will on behalf of Israel: Cyrus the Persian becomes Yahweh's "anointed" in the new divine plan of salvation for Israel and the nations (Isaiah 45:1). Second, Israel itself, instead of the Judean king, becomes the new servant who is to mediate blessing. Israel is the new bearer of the old royal "eternal covenant" (2 Samuel 23:5) now to the nations (Isaiah 55: 3).[1] Third, and

perhaps most important in “Second Isaiah,” Yahweh is not only politically exalted as Israel is politically demoted. Yahweh becomes more than the god above all other gods: the existence of other gods is denied and two images central to “Second Isaiah’s” presentation of Yahweh, the warrior-king and creator,[2] are melded and scored in the text to counter the perceived reality of other deities and therefore the putative stupidity of cultic devotion to their images. Interestingly, Yahweh as cosmic creator and warrior in “Second Isaiah” addresses the issue of loss of land and king. Yahweh is not just the god of Israel (both as land and people), but of all lands and nations. This persuasive section of the Bible is to move Judeans in exile from their current situation to a new outlook. One part of this outlook is a new vision of their god.

1. The Polemical Context of Isaiah 40–55

Chapter 8 emphasizes the rhetorical aspects of monotheistic statements. This point applies also to “Second Isaiah.” Monotheistic claims within this part of Isaiah are not isolated formulations like the Shema (Deuteronomy 6:4). Instead, they are embedded in a larger literary context focused on two or three themes; these themes drive the context, and the monotheistic claims are a piece of this context, not necessarily its highpoint or single purpose. The context may be both polemical and rhetorical, as L. Alonso Shökel notes it is “directed to and against” the audience.[3] Equally applicable is R. Alter’s discussion of “prophetic poetry”: “What are the principal modes of prophetic poetry? The overarching purpose is reproof (and not, I would contend, prediction), and this general aim is realized through three related poetic strategies: (1) direct accusation; (2) satire; (3) the monitory evocation of impending disaster.[4] As we will see, these three “poetic strategies” work on a double level as they work “to and against” an audience. Isaiah 40–48, unlike a Jeremiah and Ezekiel, is enacting the reversal of accusation and disaster; the audience is enabled to separate itself from the content of the accusation, the satire, and the impending disaster. On one hand, Isaiah 40–48 takes aim at outsider, that is non-Israelite, neo-Babylonian polytheism and one of its accompanying characteristics, the production of idols. On the other hand, the context is further rhetorical as it aims at persuading insiders,

namely Judeans, about reality—or more in the religious idiom of the passage, about the nature of God and Israel.

Monotheistic statements in Isaiah 40–55 are confined to what scholars have identified as the first of the two major sections of the work (Isaiah 40–48, 49–55): 43:10–11; 44:6, 8; 45:5–7, 14, 18, 21; 46:9. Each is addressed briefly.

1. Isaiah 43:10–11 situates its monotheistic claims within a context of divine aid:

Before Me no god was formed,
And after Me none shall exist—
None but me, the Lord;
Beside Me, none can grant triumph.

Here one point driving the monotheistic declaration that Yahweh is the only god is the claim that He is the only one who can help Israel. Yahweh is the one who returns the captives from Babylon (verse 14).

2. Isaiah 44:6 and 8 also uses monotheistic statement to declare the new event dawning upon Israel:

I am the first and I am the last,
And there is no god but Me …
Is there any god, then, but Me?
There is no other god; I know none.

This divine self-declaration stands in juxtaposition to a critique of image-making (verses 9–20). Accordingly, the implicit contrast involves Yahweh, who is a god full of power and vitality, and the images of the other nations that have no power and no life.

3. Isaiah 45:5–7, 14, 18, 21 presents the longest string of monotheistic statements:

I am the Lord and there is none else;
Beside me, there is no other god.
I engird you, though you have not known me,
So that they may know, from east to west,
That there is none but me.

I am the Lord and there is none else …
Surely God is in you, and there is none else,
There are no other gods …
I am Yahweh, and there is none else …
Am I not Yahweh?
And there are no other gods besides Me;
A just god and savior—
There is none besides Me.

These statements are preceded by the divine choice of Cyrus, itself a brand new event signaling a change in world history (verses 1–4). Following these monotheistic statements is a call to the heavens to yield its fertility, as Yahweh is the great creator of all, especially humanity (verses 8b-12).

4. The final monotheistic formulations appears in Isaiah 46:9:

For I am God, and there is none else,
I am God, and there is none like me.

This chapter begins with a satire on the processions carrying the images of the other gods, Bel and Nebo (Marduk and Nabu), contrasted with Yahweh carrying Israel (verses 1–4). Then Yahweh asks if any god is comparable, as the others are made by smiths (verses 5–7). These themes stand as the introduction to verse 9's claim of incomparability.

Looking back at the contexts of these statements, one perceives a number of connected themes, all designed to persuade Israel of the reality of Yahweh in the world. Monotheistic statements are embedded in thematic contexts involving three basic claims: (1) Yahweh as creator of the world and master of its present; (2) Yahweh chooses Israel now for good just as Yahweh chose Israel for good in the past and just as Yahweh chose to punish Israel in the past; and (3) Israel should recognize Yahweh as its god because there are no other gods, as their images are empty idols. Generally, "Second Isaiah" juxtaposes a number of passages about deities as lifeless idols made by human hands with other sections describing Yahweh as the cosmic creator (for example, Isaiah 40:18–20 with 12–14, 21–22; 45: 16 with 18) or Israel's creator (Isaiah 44:9–20 with 21, 25; or, Isaiah 46:1–2 with 3–4).

These juxtapositions seem to presume an underlying connection, with a polemical contrast at work: images are ultimately lifeless as they are made by human hands and their creation by humanity shows them to be truly dead deities. In contrast, humanity does not make Israel's deity; instead, Yahweh created the living world, including Israel. As a result, Yahweh the creator is shown to be the living god, unlike the putatively divine competitors who are created. To situate this rhetoric in its concrete setting, one must examine its context more precisely. I would like to to examine what I would call the outsider context—namely, the polemical conceptualization about images or what Israel calls idols—and then turn to the insider rhetoric—namely, the traditional texts that "Second Isaiah" used and adapted to articulate the new expression of Yahweh's exclusive claims on reality.

2. The Outsider Context (Polemic)

What was the object of the polemic? What was the outsider context? One way to approach these questions is to inquire into the appeal of images. Images were common throughout the ancient Near East.[5] Most images are small, standing 10–30 cm in height. For instance, the statuettes in *ANEP* 480–482, 484, and 494–497 range from 10.5 to 28 cm but *ANEP* 483 is 38 cm. The larger sort are rarer; there is, for example, the immense headless bronze statue of Queen Napirasu from Susa (thirteenth century), weighing 1800 kilograms. The front and back were cast separately and welded together over a bronze core. In general though, this one is exceptional, perhaps due to techonological constraints. According to G. Roeder and L. Aitchison,[6] metal workers did not have the furnaces or pots needed to melt and pour large quantities of fused metal for large casts.

Apart from the technological issues, what did the cult statues represent? What were they considered to be and do? How did they represent a threat and an object of biblical polemic? First and foremost, images denote presence. A. L. Oppenheim says: "Fundamentally, the deity was considered present in its image if it showed certain specific features and paraphernalia annd was cared for in the appropriate manner, both established and sanctified by the tradition of the sanctuary."[7] The image

stands as the divine recipient of sacrifice and as the god manifest in ceremony. The statue would receive two meals per day, the first in the morning and the other in the evening. In mythic representations, “the human race was created solely to serve the gods by providing food and drink.”[8]

Second, cult images served a function of substitution. Such an idea may be argued by analogy to the many cult statues known from Mesopotamia representing human devotees. A. Spycket and W. W. Hallo trace the human votive statue back to the end of the third millennium.[9] The widespread practice of human votive statuary may underlie vows made to deities to offer precious metal made in human form. The wife of the Hittite king, Hattusilis III, vowed a life-sized statue of him in order to protect him: “I will go (and) make for Lelwanis, my lady, a silver statue of Hattusilis—as tall as Hattusilis himself, with its head, its hand (and) its feet of gold—moreover I will hang it it (with ornaments).”[10] Similarly, in CAT 1.14 IV 40–43, King Kirta offers a vow to Asherah at her sanctuary at Tyre that:

> If I take Huraya into my palace,
> And have the girl enter my court,
> Her two parts I’ll make silver,
> Her third part I’ll make gold.”[11]

We might not place much importance on such vows for the purposes of understanding cult statues. The promise of donation is merely an inducement to get the deity in question to grant a request, a simple *quid pro quo*. Yet the form the donation takes is not simply a lump of precious metal; it assumes the form of the human to be devoted to the deity. The gift is designed first to please the deity with its wealth, but secondarily it is established in the deity’s temple to remind the deity of the devotion of the persons in question and to induce the deity to be positively disposed toward them. Human cult statues then suggest a cultic presence, a certain substitution of the human when the human is not present. Clearly human cult statues are not the same phenomenon as divine cult statues, for the divine cult statues represent the deity’s local and full manifestation, even identity, according to T. Jacobsen’s “ontological” formulation. Yet, like divine cult statues, human cult statues offer an anthropomorphic statement of cultic identity of those not fully presnt.

Third, images provide recognition. In other words, the cult statue created ritually the recognition of divine presence. The cult statue represents the devotees' devotion to the god, as it allows them to make themselves ritually present to the god and to manifest their own recognition of the god. Perhaps other cult items can lend insight into the setting and sensibility of cult statues. For example, Mesopotamian kudurru stones, which range in date from the fourteenth to seventh centuries; are ovoid stones often of black limestone, customarily labeled as "boundary stones" to mark land ownership. V. Hurowitz has argued recently that this designation is partially misleading. In a recent monograph devoted to the Hinke Kudurru,[12] Hurowitz defines a kudurru "as a durable monument placed in a temple before a god with the purpose of perpetually informing the god of the grant and invoking divine assistance in guarding the privileges against repeal or infringement." Like cult statues, kudurru stones are cultic representations made of natural materials. Whereas the kudurru and its claims are to be recognized by the deity, the cult statue inversely shows that the community recognizes the god and its claims. The cultic function in both cases is recognition in the form of presentation and presence.

Finally, images mark "identity with a difference." This aspect of cult images is more difficult to nail down, and the secondary literature shows many different formulations. H. Schützinger, for example, sees in the image and its god an "equality of essence."[13] K. van der Toorn suggests "an extension of the divine personality."[14] I. Winter proposes that the "material form was animated, the representation not standing for but actually manifesting the presence of the subject represented," while M. Dick compares the "real presence" of Jesus in the Eucharist.[15] A. Berlejung prefers "substantial connection," "since it implies the possibility of dissolving the connection."[16] She observes that the gods could leave the image and the temple. Many of these formulations refer to the work of T. Jacobsen on this subject. Jacobsen suggests that "the god *is* and at the same time time *is not* the cult statue."[17]

Jacobsen's formulation nicely expresses the difficulty. On one hand, the statues are referred to as gods or goddesses. Jacobsen points to two Babylonian royal inscriptions where the reference to Marduk is to the statue of the god (Agumkakrime of Babylon, 1602–1585, and Nebuchadnezzar I,

1124–1103). W. W. Hallo adds two letters of Hammurapi (ca. 1792–1750) describing the transport of goddesses of Emutbal to Babylon by boat. The "goddesses," first called *ištarātu* and then *ilāti*, were cult statues.[18] On the other hand, Jacobsen points to other features showing that the god is distinguished from the cult statue. For example, the deity is known to be manifest in astral bodies or other manners. To explain the apparent contradiction, Jacobsen applies the language of manifestation or theophany to the cult statue as an expression of presence:

> In saying that the cult statue is the form of the god filling with specific divine content we do not wish to suggest the image of a vessel filled with a different content, or even of a body with a god incarnate in it. We must think, rather, in terms of a purely mystical unity, the statue mystically becoming what it represents, the god, without, however, in any way limiting the god, who remains transcendent. In so "becoming," the statue ceases to be merely earthly wood, precious metals and stones, ceases to be the work of human hands. It becomes transubstantiated, a divine being, the god it represents.[19]

Yet it is clear that the statue is not coterminous with the deity. Jacobsen himself points to the Sippar cult relief of the Babylonian king Nabu-apal-iddina (885–852).[20] In this text the cultic emblem of the sun-god, Shamash, is said to have its mouth washed "before Shamash" (*ma-ḫar* ^{d}*UTU*).[21] That is, in the mouth-opening ritual (*mīs pî*) that provides transition[22] of the cult statue or emblem from workshop to the Ebabarra temple, the divine emblem is not tantamount to the deity. In all, these texts suggest a "sacramental communion" presuming real divine presence, yet not identified in whole with the deity's reality.

These ideas about cult statues would remain general if not for the texts attesting to the *mīs pî*, or mouth washing ceremony, and the related *pit pî* or mouth-opening ritual.[23] These rituals accompany the production of cult statues, from workshop to induction into the temple. The ritual establishes the proper procedure, and therefore the purity of the cult statue, and transform the statue into the representation of the god. Or, in the words of one version, "Without mouth-opening this image does not smell incense, eat food or drink water."[24] In short, the image in the ritual represents the god as recipient of cult. The tablets for this ritual date to the first millennium, but it

is possible that the ritual derives from an earlier period, for the incantations in the texts are in Sumerian. The oldest references are Sumerian administrative texts from the Ur III dynasty (2113–2006) referring to provisions for the ritual of opening the mouth of a statue of Gudea (2150), the dead, deified ruler of Lagash. In addition to evidence from the neo-Sumerian period, mouth-washing is also attested in the Middle Babylonian period.

The tablets show some geographical range, as they derive from Asshur, Nineveh, Nimrud, Babylon, Sippar, Nippur, Uruk, Sultantepe, and Hama, but the primary ritual tablets from Nineveh and Babylon contain instructions for the first day. The Nineveh version gives only an incomplete impression for the second day and may be supplemented by the Babylonian version. This version makes no references to mouth-opening as such. Instead, the mouth-washing ritual mentioned fourteen times included mouth-opening (*pit pî*), and the mouth-washing is assumed to encompass mouth-opening in this version. Mouth-washing, normally a purfication ritual, was not restricted to cult statues; it was used also for divine symbols (e.g., the ushkaru crescent of the moon-god) and cultic accoutrements, some even for the king.[25] The Babylonian version adds a long list of astral deities in the sacrifices. The Nineveh version mentions only “the gods of the night.”[26] The Nineveh version begins with a series of preparations unknown in the Babylonian version. In all, the ritual locations and processions mentioned in these two main versions suggest variously ten or eleven phases of the ritual. Each phase involve its own ritual actions and incantations. A. Berlejung divides the phases into three main parts, consisting of preparations, ritual proper, and induction of the statue, corresponding to the Ea sections (sections 1–4), the Ea-Asallaḫi-Shamash sections (5–6), and the enthronement in the temple (7–11).[27] Berlejung’s division is based on the indigenous division of the text, and she opposes both M. Dick and P. Bogen’s division into stages borrowed straight from van Gennep (preliminal rites, or rites separating individual from current status; liminal rites, reshaping intended to prepare the individual for new status; and postliminal rites, reintroduction of the changed individual). Despite some of the problems with mapping this schema straight onto the *mīs pî* ritual, some of van Gennep’s categories remain useful here. Separation, preparation for new status, and reintroduction can be mapped onto the ritual at a number of points. The bulk of the ritual concerns the new

status of the materials now understood as “the god,” who is “reintroduced,” or, more properly in this case, inducted into the sanctuary (according to the Babylonian version). Separation may be viewed in the disavowals of human involvement. Berlejung summarizes the ritual aims: to secure the image’s complete purity, to annihilate all traces of human involvement in production of the image, to activate the senses of the image, to determine the destiny of the image, to integrate the god into the community of the divine brothers, to transfer the *me* to their bearer, and to lead the image into its realm.[28]

The first day begins with preparations in the city, countryside, and temple (Nineveh version, lines 1–54). Purification rites provide the setting of the following rituals. Materials used are all ingredients with well-known purifying properties for both deities and humans. The scene then moves to the workshop. In the workshop, Ea, Asalluhi, and the statue are all fumigated and libated, and already the statue is referred to as *ilu*, “god,” not only as a “statue.” At this point the statue can be addressed in the second person as a god; at this point its ears and heart function. In the Babylonian version the priest carries out the mouth-washing, the god now receives its first offering, and the incantation follows. A procession moves from the workshop to the river, where another incantation is recited. At the river bank there are repeated appeals to count the divine image with its brothers, the gods.[29] The procession then proceeds from the river bank into the orchard. Then the god is seated, turned to the east (“toward the sunrise”). At the river, meal is thrown into the river, beer is libated, and several purifications and offerings are made. The Nineveh version adds a request for the inclusion of the image among the brother gods.[30] Here the first day of the ritual procedure ends.

On day two, the ritual resumes at the orchard. Three seats are set for Ea, Shamash, and Asalluhi, set off by a curtain. Then they receive offerings, accompanied by several incantations, including “Born in heaven by his own power,” and “On the day when the god was created.” After the priest retires, the craftsmen who played a role in the image’s manufacture are to declare: “I did not make him (the statue), Ninagal (who is) Ea (god) of smith made him.” With that action the eye of the image is open. The priest then recites a long string of incantations, with the following titles: “In your growing up, in your growing up …,” “Statue born in a pure place,” “Statue born in heaven,” “Ninildu, great carpenter of Anu,” “Exalted garment, … garment of white linen,” “Exalted tiara,” “Bright throne,” “In heaven you shall not

stand.” Afterward the offerings of the image and the great gods are removed. After this central section, the procession marches from the orchard to the temple gate, with more incantations and offerings. From the gate there is a further procession to the sanctuary niche. There the priest is to take the hand of the god and lead him in, and then repeat the incantation called “My King in the goodness of heart,” until they arrive in the shrine. There in the divine abode (niche), the image (that is the god) takes his seat, with the verbal accompaniment of two more incantations. At the side of the shrine a canopy is erected and an offering prepared for Ea and Marduk. With the offering completed, the washing of the mouth is performed. The image is purified, followed by the incantation “Asar [Marduk], God Being, son of Eridu” seven times. The Babylonian version adds a further, final step at “the quay of the *Apsû*.” The final result of the rituals is a mechanism for divine communion with humans: hearing and seeing the deity, being heard and seen by the deity. The ritual constitutes a sacramental communion, suggested by M. Dick’s comparison with the “real presence” of Jesus in the Eucharist.

In a contrast of the rhetoric of the *mīs pî* with Isaiah 40–48, a sharper profile of the biblical polemic emerges. We may note four general contrasts. First, and most basic, the Mesopotamian material claims divinity for the statue whereas “Second Isaiah,” especially in some of the monotheistic statements, ridicules the notion. The creation of the image is presented as a heavenly birth, in the titles of two texts, one the prayer called “Statue bo[rn] in heaven” (Nineveh version, line 190, also B 54), and the other the name of the incantation, “Incantation, On the day when the god was created” (Babylonian version, line 47). The image is also addressed as a divinity: “You are counted [with the gods], your [br]others” (Nineveh version, line 165); “[From today] may your destiny be [coun]ted as divinity, and [with the gods,] your [br]others you are counted” (Nineveh version, lines 167–168). In contrast, “Second Isaiah” stresses the earthly manufacture of the images by detailing both the process of their creation in the workshop and the other uses to which their wood is put (e.g., Isaiah 44:12–17). “Second Isaiah” also poses the impossibility of comparing such an image to the Israelite God (Isaiah 40:18). Such cannot provide benefit to worshippers (Isaiah 44:9), a sine non qua of divinity (as noted in chapter 5).

Second, the *mīs pî* claims that the statues are not made only by human hands. At the beginning of day two, the artisans deny their involvement: “I

did not make him (the statue), Ninagal (who is) Ea (the god) of the smith made him" (Babylonian version, line 52; cf. Nineveh version, lines 181–182: "I did not make [it] Ninildu who is Ea the god of the carpenter [made him …]," *anāku la ēpuš.. Ninildu Ea ilu ša nagāri[…]*). A presentation of a synergy of divine and human manufacture appears in one incantation that accompanies the ritual (STT 200, line 11): "in heaven he was made, on earth he was made" (*ina šamê ibbanu ina erṣeti ibbanu*). Similarly, the incantation, "When the god was made," in line 19 reads: "The statue is the creation of god and human!" (*[ṣa]lam [bun]nanê ša ilī u amēli*).[31] In contrast, "Second Isaiah" over and over claims human agency in the production of images. In fact, the most technical and technological language in the Bible for manufacturing an image derives from Isaiah 40:19–20 and 41:6–7, in order, among other things, to heighten the point of human production of images. After comparing Isaiah 40:12–26 with Genesis 1, R. Alter notes:

> Despite the reminscences of Genesis (to which mention of the host of heaven at the end should be added), the dominant imagery of the poem is actually technological, in part as a rejoinder to the paltry technology of idol-making which the poet denounces. God weighs, measures, gauges, plumbs, but these activities cannot operate in the opposite direction: no man can plumb the unfathomable spirit of the Lord.[32]

This contrast is already in the polemical material of Jeremiah 10, as noted by M. Dick:[33] the verb, "to make" (*‘*śh*) is applied to both the images (*ma‘ăśēh*) and Yahweh's act of creation (*‘*śh* in verse 12).

Isaiah 41:6–7 further highlights the human agency behind the images by contrasting the craftsmen with Yahweh, specifically by employing wordplay involving three Hebrew words or roots; (1) with the root *‘*zr*, "to help": craftsmen assist each other, but Yahweh assists Israel (Isaiah 41:10, 13, 14); (2) with the root **ḥzq*, "to be strong, to strengthen": workers fortify each other, but Yahweh fortifies Israel (Isaiah 41:9); (3) with the root *’*mr*, "to say, speak": craftsmen speak to each other, but Yahweh speaks to Israel (Isaiah 41:9). The issue of who is made versus who is a maker is matched by "Second Isaiah's" use of the word *’ēl* or "god": Yahweh is truly *’ēl* (Isaiah 46:9) versus idol claimed as *‘ēl* (Isaiah 46:6). In summary, images

are lifeless as they are made by human hands, and their creation by humanity shows them to be truly lacking in reality or life. In contrast, humanity does not make Israel's deity; rather, Yahweh created the living world, including Israel (Isaiah 44, especially verse 21).

Third, the images, like the gods, are attributed anthropomorphic senses: "Without mouth-opening this image does not smell incense, eat food or drink water" (STT 200).[34] Note the claim in "Second Isaiah" that the images cannot "look nor think" (Isaiah 44:9), nor offer benefit (Isaiah 44:10). This background may help to explain in part the satire of Isaiah 44:15–17 where the image-maker, tired from his labors, uses part of the wood for the statue and part for fuel for fire to warm himself and cook some food. Dick would extend the point in suggesting that the long listing of wood in Isaiah 44:9–20 may reflect an awareness of the indigenous ritual "in its broadest outline and [may] be mocking its seeming unnatural sequence."

Finally, the procession and induction into the temple of the images may raise an additional point about "Second Isaiah," in particular Isaiah 46:1–2. On one hand, the ritual reflects a common feature, the procession of statues. On the other hand, Isaiah 46 mocks the procession, but it is not satisfied with the simple criticism of Jeremiah 10:5: "They have to be carried, for they cannot walk." Isaiah 46:1–2 goes further, presenting a picture of captivity not by Babylonians but for Babylonians and their gods, who burden their carriers:

> Bel is bowed, Nebo is cowering,
> Their images are a burden for beasts and cattle;
> The things you would carry [in procession]
> Are now piled as a burden
> On tired [beasts].
> They cowered, they bowed low as well,
> They could not rescue the burden (or: "him who carried [them]"),
> And they themselves went into captivity.

The ritual presents a processional act of entry into sanctuary in Babylon versus Isaiah 46's description of a processional act exiting from Babylon. (There may be more to the polemic than taking a general aim at processions. W. W. Hallo compares Nabonidus's attempts to remove

Babylonian gods to safety against the imminent approach of Cyrus.[35]) The action of carrying becomes the entry-point for another positive claim about Yahweh: You carry idols (Isaiah 46:1) while I, Yahweh will carry you (Isaiah 46:3–4).[36] C. Franke observes: "The Babylonian gods must be carried, but Yahweh carries (the point of comparison centers on the word **nś'*). While Yahweh carries a burden, by contrast the Babylonian gods are a burden."[37] Yahweh's carrying suggests further the difference in Israel's and Babylon's fortunes. Franke insightfully notes: "The descent and exile of Babylon are contrasted with the ascent and liberation of Jacob/Israel."[38]

3. Insider Referentiality and Isaiah 44

The comparison of Mesopotamian material with "Second Isaiah" provides a helpful outsider context. Such a comparison makes it easier to understand the depth of the threat of images and the ideas associated with them. Like the conquering and exiling power of Babylon, so too the very fact of its religious proximity to Judean exiles would be powerful. Yet "Second Isaiah" does not draw solely on ideas well-known in the larger world of Mesopotamia. The work is indebted also to the author's (or authors') own Israelite traditions. From the context of "Second Isaiah," we can infer that the author and the audience were familiar with the important themes of cosmic creation, Exodus material, and royal covenantal formulary. We might infer further, from the placement of this text under the rubric of the book of Isaiah, that this author and audience are familiar also with an older corpus of Isaiah material or tradition. Therefore, to locate the rhetoric of monotheism, we may refer both to older traditional (now biblical) materials and then to the older Isaiah corpus of "First Isaiah."[39] Various polemical contrasts appear in all of the passages expressing monotheism in Isaiah 40–48. To do justice to their poetics, it would be necessary to examine all of them individually. I have selected only one example, Isaiah 44. I regard Isaiah 40–55 as interlocking sections with different themes woven through major parts of the whole, and, accordingly, chapter 44 may be analyzed either on its own or in conjunction with the preceding and following units or in terms of the themes issuing from earlier chapters and flowing through it (in short, poetry as symphonic).

The chapter opens with a speech addressed to “Jacob, my servant” in a manner designed to contrast with the end of the preceding chapter. Commenting on the phrase, “And now, hear” (*wĕ’attâh šĕma‘*) in Isaiah 44:1, ibn Ezra restates the verse to mean: “This evil I have brought upon you for your sanctuaries, but now hear the good which I will do for you.”[40] Here ibn Ezra is acknowledging the contrast marked by the particle *wĕ‘attâ*, “and now,” as opposed to the past punishment mentioned at the end of the last chapter. So, on one hand, we may see continuity with the preceding chapter, but we may begin also with this point. Verses 1–8 and 21–44 constitute two sections addressed by God to Jacob/Israel. Together they frame the long description of images in verses 7–20. Two semantic contrasts first alert us to the framing device of verses 1–8 and 21–44 around verses 7–20:

1. “To make” (*‘*śh*): idols in verses 13, 15, 17, 19 versus Yahweh the creator in verses 2 and 24.
2. “To craft” (**yṣr*): “idol crafters” in verse 9 versus Yahweh as one “who crafts you from the womb” in verses 2 and 24.[41]

The contrasts do not end with the semantic field of production:

3. “To fear” (**pḥd*): idol-makers are afraid in verse 11 versus Israel told in verse 8 “do not fear.”[42]
4. “Witness” (*‘*ēd*): Israel is Yahweh’s witness (verse 8), which contrasts with the witness of the idols in verse 9.
5. “To know” (**yd‘*): Israel knows who the only God is (verse 8), whereas image-makers do not (verses 18, 19).
6. “To be glorified/beauty” (**p’ r*): Yahweh is “glorified” through Israel (verse 23), whereas images are made according to the “beauty” (*tip’ eret*) of humans (verse 13).
7. “Wood” (‘*ēṣ*) + “forest” (*ya‘ ar*): wood is cut down in order to serve both as wood for the statue and fuel for burning (verse 14; see also ‘*ēṣ* in verse 19), whereas all the trees of the forest praise Yahweh (verse 23).
8. Recognition formulary: the craftsman declares the image: “You are my god” (*’ēlî ’attâ*, verse 17), whereas Yahweh declares to

Jacob/Israel: “You are my servant” (‘*abdî ‘attâ*)// “You are my servant” (‘*ebed-lî ’attâ*, verse 21).[43]

9. The statue is expected to be able to save (*n*ṣ*l*, verse 17), but Yahweh is the redeemer (**g’l*) of Jacob/Israel (verses 22, 23).

With titles and terms for God and Israel from earlier chapters, Isaiah 44 begins a section of consolation, telling the people, “do not be afraid.” Furthermore, the passage proclaims the new life of Jacob/Israel in terms that echo and reverse the image of the withered grass said to be the people in the opening section of “Second Isaiah” (40:6–8). “Second Isaiah” often revisits earlier language, echoes and develops it, and returns to it later. In this case, the dessication mentioned first in Isaiah 40:6–8 is replaced with fertility and blessing. Hence, the subject of verse 4 is the offspring (so Targum Jonathan and Rashi, and not the spirit and blessing, so ibn Ezra[44]).

Accordingly, verse 5 marks Jacob//Israel as belonging to the Lord (rendered poetically in aba′b′ fashion):

“I am the Lord’s”: “Jacob”
“I am the Lord’s”: “Israel”

This sort of quotation also ends the chapter as a whole in verses 26–28. Here again another element builds the frame. Divine prediction likewise appears in both verses 26–28 and verses 6–8, which press the case for Yahweh as the one and only real creator or god by claiming foreknowledge. In verses 6–8 Yahweh claims that he is the only god, the only divinity, and therefore the only one who could have foretold Israel’s destiny. Similarly, verses 26–28 denounce the predictions of Mesopotamian experts in favor of his own “servant” and “messengers.” Here is a central point. It is the word of Yahweh that stands forever, the theme that opens and closes “Second Isaiah” (40:1–11 and 55:1–5). This word then reflects Yahweh’s capacity to foretell the future, a theme in Isaiah 44, which resumes earlier passages: 41:21–28, 42:9, 44:7–8, 24–28; 45:20–23; 47:13. Indeed, these passages suggest a theme throughout Isaiah 40–48. In 44:7–8 this theme is directly tied to the monotheistic claims of 44:6–8. Similarly, in 43:10–11 the monotheistic claims accompany a description of Israel as Yahweh’s servant. This figure was chosen so that Yahweh may be believed and known as the only deity, one who long ago proclaimed the victory over Babylon. Yet

where did the author believe this claim to have been made long ago? Who is his messenger in verse 26? I propose that "Second Isaiah" may be referencing the earlier Isaianic corpus.

Study of "Second Isaiah" has recently focused on its relations with "First Isaiah."[45] Recent studies have sought to understand "Second Isaiah" as the positive message, "the new things," corresponding to the original prophet's presentation of the "former things" versus the "latter things" (*hāri' šōnôt* versus *hā' ōtiyyôt lĕ' āḥôr* in 41:22–23 or *ri' šōnô* versus *qadmōniyyôt* in 43:18; cf. Isaiah 44:7).[46] Isaiah 40–55 is not meant to be the prophet's continuing voice.[47] Chapter 39 marks the passing of Isaiah from the scene: Hezekiah's death is the focus of this prose section, and he is, after all, the last king mentioned in Isaiah 1:1.[48] Accordingly, "Second Isaiah" alludes to material in Isaiah 1–39. The comfort of 40:1 reprises the opening verb of chapter 12, which concludes the first section of the book, and it echoes through the hymnic material of 49:13, 51:3, 9; 52:9. The guilt to be forgiven in 40:1 is Israel's guilt declared in Isaiah 1:4.[49] To link the future of the original prophet's message with the present of the exilic anonymous author of "Second Isaiah," the author correlated the divine word provided via the original prophetic person's experience in chapter 6 with the announcement of the divine word in chapter 40. Hence, commentators since the Middle Ages have noted the similarities between the "call narrative" of Isaiah 6 with the apparent call of Isaiah 40, both involving a divine voice commissioning a prophetic figure in the company of the divine council.[50] Yet commentators have generally missed the allusion in Isaiah 40 to the portrait of Babylon in Isaiah 13–14, the dominant section of oracles against nations, in the emphasis on Babylon's pride and oppressiveness.[51] I believe that Isaiah 40 deliberately reverses the so-called oracles against Babylon in Isaiah 13–14:

1. Isaiah 13:2: set up a sign on a high mountain
2. "Voice" (*qôl*) in Isaiah 13: 2, 4 (two times)
3. Defeat of Babylon by the Medes in Isaiah 13:17–19
4. Compassion on Jacob//choice of Israel in Isaiah 14:1
5. Return of Jacob//Israel to the land in Isaiah 14:2
6. Rest of Jacob//Israel from its hard service in Isaiah 14:3
7. Nature's celebration in song in Isaiah 14:7–8

It is only natural that Isaiah 44's allusion about Yahweh's earlier prediction should derive precisely from the predictions regarding Babylon found in Isaiah in chapters 13 and 14. Unlike so many biblical works, this one has the singular distinction of alluding to an earlier description within the same corpus. The claim is founded on the formation of the prophetic book as a whole, and it further provides a basis for the claim of Yahweh as the only god. Israel can be Yahweh's witnesses (verse 8), because Israel has access to the information provided in the corpus of Isaiah. No other god can provide such information. Contrary to Babylonian claims, their divination is worthless (verse 25), so those whom they serve are nothing; Yahweh is the first and the last and there is no god but Yahweh (verse 6).

The opening section of Isaiah 44:1–8 poses the monotheistic issue, with Israel's answer stated in verse 8: "There is no other rock; I know none" (*wĕ' ên ṣûr balyādā' tî*). How does Israel know, or how is Israel expected to know, this fact? The clue lies in the form of the answer. The answer, that "There is no other rock; I know none," introduces a new element, Yahweh the "rock." This title is not uncommon in the Psalms, but the formulation with the negative may suggest that Israel may have access to this knowledge of God by virtue of its tradition, as represented in a text such as Deuteronomy 32.[52] At first glance, Deuteronomy 32 seems an unlikely candidate for comparison with "Second Isaiah," specifically Isaiah 44:8b. Yet the image of the rock is the central leitmotif of Deuteronomy 32. Moreover, Deuteronomy 32, like Isaiah 44, is largely a polemic against other gods, with an appeal to Yahweh as creator and rescuer from a land of captivity.[53] Accordingly, we might hear in Isaiah 44:8b an echo[54] of Deuteronomy 32's use of negatives, especially *'ên*, to denounce other gods:

> Verse 12: "And there was no alien god with Him" (*wĕ' ên 'immô' ēl-nēkar*)
>
> Verse 17: "Gods whom they did not know" (*' ĕlōhîm lō' -yĕdā'ûm*)
>
> Verse 21: "They incensed Me with no gods" (NJPS; *bĕlō'-' el*)
>
> Verse 39: "And there is no god with Me" (*wĕ'ên' ĕlōhîm 'immādî*; cf. *wĕ'ên* in verse 4)

Deuteronomy 32 provided an ideological template for the monotheistic rhetoric that takes aim at the external threat of image-making. And we will see further possible examples of using such a text to develop monotheistic rhetoric in Isaiah 44.

We have already seen the themes of mistaken divinity spelled out in Isaiah 44:9–11. The two descriptions of the craftsmen here stress first the technical aspects of their craft (verses 12a, 13–14), followed by comments that seem more satirical than polemical (verses 12b, 15–17). In verse 12b we are told that the craftsman may get wearied with his work, and we are perhaps seeing an echoing contrast with 40:29, where Yahweh is said to give strength to a fatigued Israel (the root *‘*yp*, at work in both verses).[55] In verses 15–17 we are given a wonderfully satirical dig at the nature of the god by showing what other uses the same wood may be put to. Verses 18–20 complete the polemic with straight criticism. Leaving aside the satire, these verses simply declare the lack of understanding on the part of the images’ makers, perhap as *pars pro toto*, for any who would treat these images as gods.

To draw this analysis of Isaiah 44 to a close, it would appear that the ritual of the *mīs pî* and the polemic of Isaiah 40–48 are opposite in their depiction of images. The latter’s understanding of false images shows the nature of true divinity. Yahweh has no image; he is the only God. Ritual, in general, is designed to incorporate and indoctrinate its participants, whereas polemic is designed to make distinctions, to separate people from practices; it involves “detraining.” Monotheism offers a “reality check” that should be clear in the minds of Jacob/Israel, not part of deluded minds. In the context of “Second Isaiah,” monotheism is a claim that defangs images, rendering them as lifeless depictions in the image of their human makers, or, as expressed in the words of verse 13, “like the pattern of a man, like human beauty” (*kětabnît ’îš kětip*’ *eret ’ādām*). Monotheistic statements in themselves play a secondary role in the discourse of this chapter, and they form within all of Isaiah 40–48 one of the many thematic strands. Actually, monotheism helps to illuminate the vacuity of Babylonian images: if there is no god present in the cult statue, the cult statue is only an assemblage of materials. And, therefore, images are worthless. In summary, monotheism as a claim is related to the problem of the practice of image-making, and as I have noted already, this practice really seems to drive the passage. Why? What makes images of Babylonians such a crucial issue for “Second Isaiah”?

If we coax some passages in Isaiah 40–48, we may hear the answer. Recall Isaiah 46:1:

Bel is bowed, Nebo is cowering,
Their images are a burden for beasts and cattle;
The things *you* would carry [in procession]
Are now piled as a burden
On tired [beasts].
They cowered, they bowed as well,
They could not rescue the burden,
And they themselves went into captivity.[56] (NJPS)

The addressee is none other than "you," "the house of Jacob," as named in the following verse 3. Here the author focuses just enough light on the problem at hand to show that it is Jacob, unconvinced of Yahweh's presence, who has turned to the images of neighbors and overlords.[57] Isaiah 46:5–8, in its denunciation of "you sinners" following the address to Jacob, locates the problem with Yahweh's own people. Chapter 48:5–8 shows the point explicitly. Addressed to "the House of Jacob," the chapter declares that Yahweh foretold future events so "that you might not say, 'My idol caused them, My carved and molten images ordained them'" (verse 5). Returning to Isaiah 44, we might have assumed that only Babylonians are the craftsmen (or, at least the only adherents) of the images in verses 7–20, but the text does not confirm this assumption.[58] Indeed, the ambiguity of identity is used rhetorically for the audience to make a choice: does it want to be a deluded image-seekers (or even image-makers?), or would it choose the only god who has chosen it from the very beginning of its existence?

The polemic of biblical monotheism is therefore complex. On one level, the theme of comfort and consolation involved in the glorious new events for Israel balances the denunciation of Babylon with its attendant practices. On another level, the audience is being challenged to identify with its own heritage and not the practice of Babylon. The dynamic of polemic therefore functions on multiple levels:

> When defined as the art of combat, religious polemic would seem to be directed at the enemy, the "other side" that supports views and practices that run counter to the ideas of the polemicist. In reality, the ideal audience of the polemist is made up of those who are already in sympathy with his cause. There are, in fact, two audiences to be reckoned with: the opponents and the converts; the former are the

> formal audience, the latter the intended audience. The audience in name does not coincide with the audience of fact. On the part of the author there is a deliberate duplicity: while his overt claim is to defeat his enemies (using words as his weapons), his real purpose is to foster complicity between himself and his readers. The enemy audience is addressed as an oblique way of transmitting a message to his support group.[59]

The polemic here purports to reclaim a group, to delineate between the overt object of attack (Babylonian idolatry) from the implicit object of attack (Judean participation in Babylonian idolatry). We may hear then in the polemic a literary polarity, one carried out explicitly elsewhere in Isaiah 40–48 between Zion and Babylon, the literary antipodes also of Psalm 137. The audience is to determine for itself to which entity it belongs.

4. Reading for Monotheism

As demonstrated by Second Isaiah (as well as Psalm 137), the loss of the monarchy and land as defining marks of Judean identity issued in a probing search for a reworked identity. This process of probing, involved an examination of Israel's older traditions. Older texts helped to provide a background for interpretation of this new reality of Yahweh as the only deity in the cosmos. Monotheistic claims made sense in a world where political boundaries or institutions no longer offered any middle ground. In its political and social reduction in the world, Israel elevated the terms of its understanding of its deity's mastery of the world. Thus, monotheism is not a new stage of religion but a new stage of rhetoric in a situation never known prior to the threat of exile. It represents not a change of religious policy but a new formulation or interpretation of religious reality delineating along cosmic lines what was no longer well delineated in the human, political lines. Such a vision would come to dominate discourse about divinity for Israel. The Judean community also molded monotheistic discourse into various forms according to their social background. Here, the rise of written prophecy, and of written Scripture more broadly,[60] aided various exilic and post-exilic Judeans in their religious quest to understand the god of Israel.

(Accordingly, we might even say that text substitutes for land.) Here, the dominant voices preserved in the post-exilic period—priestly, deuteronomic, wisdom, and apocalyptic—all promoted the new vision of the one and only deity, the one to whom the religions of the Book have continued to turn for inspiration.[61]

Like the post-exilic transmitters of the biblical corpus, believers read for the monotheistic God across the wide narrative contexts of the priestly work in the Pentateuch, the major prophetic books of the sixth century, the apocalyptic of later centuries, and the presentation of Wisdom personified. As a consequence, believers participate in a process begun already in the biblical period: they read for the monotheistic God in all the attested traditions of Israel, including earlier ones that contain vestiges of the polytheistic past of Israel and its national god. With such a process of reading, believers like the ancient tradents of the Bible, erase such vestiges and construct the "historical myth" of the monotheistic God as the original historical experience of ancient Israel at Sinai and afterward. As a result, like the ancient transmitters of biblical traditions, later readers confront the complex and many biblical texts and their shaping as a single text now called the Bible, an experience that induces a single reading of a single deity whose divinity spans all of its individual texts and beyond.

57. See the critical remarks of F. Stolz, “Der Monotheismus Israels im Kontext der altorientalischen Religionsgeschichte—Tendenzen neuerer Forschung,” *Ein Gott allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israeltischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; 13. Kolloquium der Schweizerischen Akademie der Geistes—und Sozialwissenschaften 1993; Freiburg Schweiz: Universitätsverlag, 1994 = repr. OBO 139; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1994), 33–50.

58. See *EHG*, 145–60.

59. Schloen, “The Patrimonial Household,” 29. See also pp. 5, 161–62. S. N. Eisenstadt broaches these issues in his contribution, “Introduction: The Axial Age Breakthrough in Ancient Israel,” to *The Origins and Diversity of Axial Age Civilizations* (ed. S. N. Eisenstadt; Albany: State University of New York Press, 1986), 127–34. However, the other material in this volume pertaining to Israel does not press this point sufficiently. See chapter 9, n. 84.

60. This section is an outgrowth of a conversation with Erich Gruen, following a lecture of mine ("The Rhetoric of Biblical Monotheism") at the University of California, Berkeley, in February 1998. I wish to thank Professor Gruen for his highly engaged and engaging interest in my lecture, and I am grateful for his efforts to make me more conscious about the modern use of the categories of monotheism and polytheism. For a critical discussion from the perspective of Egyptological studies, see J. Baines, "Egyptian Deities in Context: Multiplicity, Unity, and the Problem of Change," 9–78.

61. See F. Schmidt "Polytheisms: Degeneration or Progress?" *History and Anthropology* 3 (1987), 9–60; and J. M. Sasson, "Texts, Artifacts, and Images: Revealing Ancient Israelite Religion," *Text, Artifact, and Image. Revealing Ancient Israelite Religion* (ed. T. J. Lewis and G. Beckman; in preparation).

62. See n. 8.

63. See the overview in T. M. Ludwig, "Monotheism," *The Encyclopedia of Religion* (ed. M. Eliade; vol. 10; New York: Macmillan; London: Collier Macmillan, 1987), 75. This sort of rhetoric can be found in Schwartz's book (cited in n. 8).

64. Seitz, *Word Without End*, 255. See chapter 8.

65. For a helpful exception, see T. Frymer-Kensky, *In The Wake of the Goddesses: Women, Culture, and the Biblical Transformation of Pagan Myth* (New York: Free Press, 1992), 85–86. A further working out of Israelite polytheism might deepen some of the other claims made for monotheism. Monotheism, for example, does continue a series of "interactive forces" in nature because it continues the language of cosmic opposition; it does not banish such opposition, but holds it in check (see chapter 1).

66. For example, G. E. Wright, *The Old Testament Against its Environment* (Studies in Biblical Theology 2; London: SCM, 1950), 16–18, 78, 80; J. C. de Moor, *The Rise of Yahwism: The Roots of Israelite Monotheism* (rev. and enlarged ed.; BETL XCI; Leuven: University Press/Uitgeverij Peeters, 1997), 91. For some of the issues as they bear on the Bible, see T. Hiebert, *The Yahwist's Landscape: Nature and Religion in Early Israel* (New York: Oxford University Press, 1996), 140–62, esp. 152–53. T. Frymer-Kensky contrasts polytheism with divinity mediating between nature and humanity with a monotheism with humanity mediating

between nature and divinity (*In The Wake of the Goddesses*, 105). In general, this approach taken by Frymer-Kensky reflects the larger thrust of her interpretation of monotheism, that it is designed to make people take responsibility for the world in the wake of the demise of the other gods. I find this reading of religious responsibility very attractive, but it would not relate well to a biblical text like Psalm 82 (see Chapter 2, section 5). I am unsure why Frymer-Kensky's idea results from monotheism per se instead of deriving from specific Israelite texts.

67. G. E. Mendenhall, *The Tenth Generation: The Origins of the Biblical Tradition* (Baltimore: Johns Hopkin University Press 1973), 223. For further problems with this view, see the discussion at the end of chapter 1.

68. For representative examples of scholars who associate myth with polytheism, see Y. Kaufman, *The Religion of Israel From Its Beginnings to the Babylonian Exile* (trans. and abridged by M. Greenberg; New York: Schocken Books, 1972), 20; and more recently, P. D. Hanson, *The People Called: The Growth of Community in the Bible* (San Francisco: Harper & Row, 1986), 129. For discussions of "myth" in the Bible, see R. A. Oden, Jr., *The Bible without Theology: The Theological Tradition and Alternatives to It* (San Francisco: Harper & Row, 1987), 40–91, esp. 46–47; M. S. Smith, "Mythology and Myth-making in Ugaritic and Biblical Literature," *Ugarit and the Bible: Proceedings of the International Symposium on Ugarit and the Bible. Manchester, September 1992* (ed. G.J. Brooke, A. H. W. Curtis, and J. F. Healey; UBL 11; Münster: Ugarit-Verlag, 1994), 293–341; and the following section. For the further association of biblical narrative with biblical monotheism (as opposed to polytheistic myths), see R. Alter, *The Art of Biblical Narrative* (New York: Basic Books, 1981), 29. For a devastating critique of Alter's views, see S. B. Parker, *Stories in Scripture and Inscriptions: Comparative Studies on Narratives in Northwest Semitic Inscriptions and the Hebrew Bible* (New York: Oxford University Press, 1997), esp. 137–42.

69. Kaufman, *The Religion of Israel*, 21–59. In a similar vein see Kaufman's exaltation of monotheism in M. Greenberg, *Studies in the Bible and Jewish Thought* (Philadelphia: Jewish Publication Society, 1995), 175–88, esp. 182–83. Neither Kaufman nor Greenberg gives sufficient description to the potential positive meaningfulness of polytheism for their ancient adherents; their own exaltation of monotheism apparently prevents

them from doing so. Greenberg faults comparativists for leaning too heavily on analogy for making their reconstructions of Israel's religion too similar to its neighbors' polytheististic religions. I would fault Greenberg in turn for the anachronism in making Israel's early religious history conform too readily to its later religious practice. The Pentateuchal sources' monotheism is generalized to all Israel (with some backsliders), but it seems hardly fitting to assume that early Israel was generally monotheistic. B. Uffenheimer ("Myth and Reality in Ancient Israel," *The Origins and Diversity of Axial Civilizations* [ed. S. N. Eisenstadt; Albany: State University of New York Press, 1986] 135–68) offers many helpful corrections to Kaufman on myth and monotheism in Israel (e.g., the latter's relatively long development and emergence in the exilic period), but he still generalizes too broadly about religion in Israel and the biblical corpus versus other nations and their literatures (regarding "pagan myth," divine kingship, divination). For example, on the continuity of divine kingship in Ugaritic and Israelite literature, see J. C. L. Gibson, "The Kingship of Yahweh against its Canaanite Background," *Ugarit and the Bible: Proceedings of the International Symposium on Ugarit and the Bible. Manchester, September 1992* (ed. G. J. Brooke, A. H. W. Curtis, and J. F. Healey; UBL 11; Münster: Ugarit-Verlag, 1994), 101–12. Uffenheimer also follows Kaufman in lumping various forms of polytheism together in his analysis (see the following note). For Kaufman's work, see T. M. Krapf, *Yehezkel Kaufmann: ein Lebens- und Erkenntnisweg zur Theologie der hebräischen Bibel* (Berlin: Institut Kirche und Judentum, 1990); and *Die Priestschrift und die vorexilische Zeit: Yehezkel Kaufmanns vernachlässigter Beitrag zur Geschichte der biblischen Religion* (OBO 119; Freiburg: Universitätsverlag; Göttingen: Vandenhoeck und Ruprecht, 1992).

70. Curiously, Kaufman adverts rarely to the Ugaritic texts except where it suits his views. When Kaufman does cite Ugaritic, his line also strikes me as forcing a literal reading of mythological texts, with respect to birth and ages of deities. Theogony is surprising rare for the polytheism in the Ugaritic texts. Other features of Kaufman's description of polytheism apply poorly to the Ugaritic texts. And such a mismatch perhaps suggests caution against lumping all ancient expressions of polytheism together (see D. N. Freedman, *Divine Commitment and Human Obligation. Selected Wrtings of David Noel Freedman. Volume One: History and Religion* [ed. J. Huddlestun; Grand Rapids, MI: Eerdmans, 1997], 96; J. A. Dear-man,

Religion and Culture in Ancient Israel [Peabody, MA: Hendrickson, 1992], 37). Indeed, this approach may derive from the reductionism of seeing monotheism as a separate essence, and so too polytheism is treated as a single religious essence.

71. See *CAD S/3*:15b, #2b; Lawson, "The Concept of Fate in Ancient Mesopotamia of the First Millennium: Toward an Understanding of *šimtu*," 3, 24–25, 72, 74.

72. For example, Wright, *The Old Testament Against its Environment*, 16–18, 78, 80. Cf. W. F. Albright's comments on polytheism and monotheism in the modern context in *From the Stone Age to Christianity: Monotheism and the Historical Process* (sec. ed. with a new introduction; Baltimore: Johns Hopkins University Press, 1957), 288. On Albright and monotheism, see B. O. Long, *Planting and Reaping Albright: Politics, Ideology, and Interpreting the Bible* (University Park, PA: Pennsylvania State University Press, 1997), 83, 121–22, 134.

73. Wright, *The Old Testament Against its Environment*, 71–72, 73; Mendenhall, *The Tenth Generation*, 196–97. For Albright as theologian, see the reflections of his student, D. N. Freedman, *Divine Commitment and Human Obligation. Selected Writings of David Noel Freedman. Volume One: History and Religion* (ed. J. Huddlestun; Grand Rapids, MI: Eerdmans, 1997), 447, 449–51.

74. De Moor, *The Rise of Yahwism*, 71–102. The quotes appear on pp. 91 and 84. One need only examine some comparable biblical texts to realize that they do not constitute the basis for a general cultural theory of "a crisis of monotheism." I am thinking not only of the books of Qohelet (Ecclesiastes) and Job that present suffering and evil in terms comparable to what de Moor takes as evidence for the crisis of polytheism in what he calls Canaan. Other biblical texts likewise could be built into a case for a putative "crisis of monotheism." Such texts could include the expulsion of Hagar in Genesis 21 (see Genesis 16:9), the divine command to sacrifice Isaac in Genesis 22, the divine hardening of Pharaoh's heart in Exodus 4–14 and the divine rejection of Saul as king (see 1 Samuel 15:35). De Moor and others would probably defend the God of the Bible against such charges and they would not be prepared to defend the gods of Canaan in the same manner. Accordingly, it would be my contention that de Moor, like other authors who present polytheism in a negative way, does not provide a balanced view of polytheism in ancient Ugarit. I do see a fragile universe

for the Ugaritic pantheon (*UBC* 104), but this does not amount in my view to a crisis of polytheism. See further chapter 5, section 2.

75. L. Boadt, "Rhetorical Strategies in Ezekiel's Oracles of Judgement," *Ezekiel and His Book: Textual and Literary Criticism and their Interrelation* (ed. J. Lust; Leuven: University Press/Uitgeverij Peeters, 1986), 192.

76. Boadt, "Rhetorical Strategies," 193.

77. J. C. L. Gibson, "The Theology of the Baal Cycle," *Or* 53 (1984 = Mitchell Dahood Memorial Volume), 202–19. See also the constructive remarks of E. L. Greenstein, "The God of Israel and the Gods of Canaan: How Different Were They?" *Proceedings of the Twelfth World Congress of Jewish Studies Jerusalem, July 29–August 5, 1997: Division A. The Bible and Its World* (ed. R. Margolin; Jerusalem: World Union, of Jewish Studies, 1999) 47*–58*.

78. W. Lambert, "Trees, Snakes and Gods in Ancient Syria and Anatolia," *BSOAS* 48 (1985), 439.

79. J. D. Levenson makes this comment with respect to the creation of the Sabbath as "*both* a mimetic reenactment of the creator God's primordial rest *and* an enduring memorial to Israel's relief from slavery after the exodus." (Levenson, *Creation and the Persistance of Evil; The Jewish Drama and Divine Omnipotence* [San Francisco: Harper & Row, 1985], 82). Ancient Near Eastern myths often reflect the human world as their ultimate concern. See J. J. M. Roberts, "Myth *Versus* History: Relating the Comparative Foundations," *CBQ* 38 (1976), 1–13; J. M. Sasson, *Ruth: A New Translation with a Philological Commentary and a Formalist-Folklorist Interpretation* (sec. ed.; Sheffield: JSOT, 1989), 220–21. See also the remarks of J. Z. Smith, *Imagining Religion: From Babylon to Jonestown* (Chicago: University of Chicago Press, 1982), 101. The question of "myth" is discussed at considerably greater length later in section 4.

80. Wright, *The Old Testament Against its Environment*, 78.

81. Cf. the discussion of text and reality in P. Ricoeur, *Figuring the Sacred: Religion, Narrative and Imagination* (trans. D. Pellauer; ed. M. I. Wallace; Minneapolis: Fortress, 1995), 42–47.

82. For a recent survey of the issues, see M. S. Smith, *The Pilgrimage Pattern in Exodus* (JSOTSup 239; Sheffield: Sheffield Academic Press, 1997), 144–79.

102. Keel and Uehlinger, *Gods, Goddesses and Images of God in Ancient Israel* (trans. T. Trapp; Minneapolis: Fortress, 1998), 396. It is precisely this sort of negative evaluation that may lead Keel and Uehlinger to underplay the indigenous background of West Semitic astral religion. For evidence, see chapter 3, section 3.

103. *EHG* 1–26.

104. For many of these materials, see the collection of sources cited in *EHG*. For examples of pertinent rabbinic materials, see Jacobs, “Near-Eastern Mythology in Rabbinic Aggadah,” 1–11.

105. For example, U. Cassuto, “The Israelite Epic,” *Keneset* 8/3 (1943), 121–42 (Heb.) republished in *BOS* 69–109; N. M. Sarna, *The JPS Torah Commentary. Genesis: the Traditional Hebrew Text with the New JPS Translation* (Philadelphia: Jewish Publication Society, 3.

106. See Day, “Ugarit and the Bible: Do They Presuppose the Same Canaanite Mythology and Religion?” *Ugarit and the Bible: Proceedings of the International Symposium on Ugarit and the Bible. Manchester, September 1992* (ed. G. J. Brooke, A. H. W. Curtis, and J. F. Healey; UBL

11; Münster: Ugarit-Verlag, 1994), 35–52. A perusal of instances cited in the *EHG* would show essentially the same point.

107. For these abodes and enemies, see chapter 1.

108. Or, their gentilic forms in CAT 1.14 IV 35, 37–38. For the forms *ṣrm* and *ṣdynm*, see M. H. Pope, "Ugaritic Enclitic -m." *JCS* 5 (1951), 125–26. Ginsberg took both forms as gentilic, the first reflecting a contraction of the ending **îma* from *-iyima*. Pope suggests that the first term may be the place-name, "Tyre," and the second term is gentilic for Sidonians.

109. CAT 1.10 II 9; see *YGC* 118 n. 18.

110. Possible examples include (1) BH *zû* and Ugaritic *ḏ*; (2) **yqy* in its suzeraintyvassal sense, "to obey," in CAT 1.2 I 18, 34 (*ANET* 130) and Genesis 49:10 (NJPS; cf. Proverbs 30:17; cf. Arabic **wqy* [Lane 3059]; for this root in West Semitic proper names, see S. C. Layton, *Archaic Features of Canaanite Personal Names* [HSM 47; Atlanta, GA: Scholars, 1990], 222–23); (3) **hlm* in 1.2 IV 14, 16, 21, 24 and Judges 5:22, 26, which share a number of other features; (4) *hdrt* in 1.14 III 51 and Psalm 29:2; cf. Psalms 96:9; Isaiah 35:2.

111. A. Jirku, "Kana'anäische Psalmenfragmente in der vorisraelitischen Zeit Palästinas und Syriens," *JBL* 52 (1933), 108–20; R. Hess, "Hebrew Psalms and Amarna Correspondence from Jerusalem: Some Comparisons and Implications," *ZAW* 101 (1989), 249–65.

112. In addition to the material generally in this book and in *EHG*, see in particular 1–7.

113. Here I am thinking of the insightful remarks about methodology made by J. Z. Smith in his "In Comparison a Magic Dwells," *Imagining Religion: From Babylon to Jonestown* (Chicago: Univesity of Chicago Press, 1982), 19–35.

114. See also the broader consideration made by Morton Smith, "The Common Theology of the Ancient Near East," *JBL* 71 (1952), 135–136.

115. See *EHG* 145–60.

116. *EHG* 1–26.

117. For the knotty methodological issues, see J. Berlinerblau, "The 'Popular Religion' Paradigm in Old Testament Research: A Sociological Critique," *JSOT* 60 (1993), 3–26, esp. 9. For now I avoid the term "elites" and its implied opposite(s).

118. Geertz, "Thick Description: Toward an Interpretative Theory to Culture," *The Interpretation of Cultures: Selected Essays* (New York: Basic

Books, 1973; repr. London: Fontana, 1993), 3–30.

119. For an example, see the learned work of J. C. de Moor, *The Rise of Yahwism: The Roots of Israelite Monotheism* (rev. and enlarged ed.; BETL XCI; Leuven: University Press/Uitgeverij Peeters, 1997), 71–102.

120. See, for example, the essays on politics and religion in volume 24/1 (1982).

121. For a range of views on history and sociology, see the essays in T. Skocpol, ed., *Vision and Method in Historical Sociology* (Cambridge: Cambridge University Press, 1984). See also the review by J. A. Goldstone, "How to Study History: The View from Sociology," *Historical Methods* 19 (1986), 82–84.

122. For the problems involved, see the essays in *Can a 'History of Israel' be Written?* (ed. L. I. Grabbe; JSOTSup 245; European Seminar in Historical Methodology 1; Sheffield: Sheffield Academic Press, 1997). I found particularly helpful the essay by H. M. Barstad, "History and the Hebrew Bible," 37–64.

123. See the relevant articles in *Bulletin of the Council of Societies for the Study of Religion* 26/3 and 27/1. For a critique of the study of religion, See T. Fitzgerald, *The Ideology of Religious Studies* (New York: Oxford University Press, 2000).

124. See Berlinerblau, "The 'Popular Religion' Paradigm," 9–15.

125. For a reprise of these issues, see the essays in Lynn Hunt, ed., *The New Cultural History* (Berkeley: University of California Press, 1989).

132. For some reflections, see H. Ott, "Does the Notion of 'Mystery'—As Another Name for God—Provide a Basis for a Dialogical Encounter between the Religions?" *God: The Contemporary Discussion* (ed. F. Sontag and M. D. Bryant; New York: Rose of Sharon, 1982), 5–17. See further in chapter 5.

133. See J. Hick, "Is God Personal?" *God: The Contemporary Discussion*, 169–79. See also chapter 5.

134. Cf. Wallace, "Introduction," 8: "In its essence, faith is a living out of the figures of hope unleased by the imagination."

135. As a slight digression, it bears mentioning that it is not by accident that mountains play an important place in biblical and pre-biblical narratives about deities. As religious metaphors for approaching the divine, mountains express more than the connection between the divine and the human, by analogy to the heavenly and the earthly; they also represent what is physically overwhelming compared to humanity, yet perceptible by humanity. Mountains are a kind of metaphor for the divine, and the texts that present the beauty and power of such mountains are telling readers some insights about the divine. Chapter 1, section 2, discusses these sacred mountains.

136. Otzen, Gottlieb and Jeppesen, *Myths in the Old Testament* (trans. F. Cryer; London: SCM, 1980).

137. The following works survey the place of myth within biblical studies: J. W. Rogerson, *Myth in Old Testament Interpretation* (BZAW 134; Berlin: de Gruyter, 1974); Oden (*The Bible without Theology;* 52–91; ibid, "Mythology," *ABD* 4:946–56; ibid, "Myth in the OT," *ABD* 4:956–60; B. Batto, *Slaying the Dragon* (Minneapolis, MN: Augsburg-Fortress, 1992), esp. chapter 1.

138. Oden (*The Bible without Theology*, 42–52) notes Christian antipathy toward myth. Christianity assumed in the past that its theology reflects on true faith while other religions tell stories or myths. Eusebius condemns what he himself calls perhaps ironically "the theology of the

Phoenicians" (PE 1.10.54–55; H. W. Attridge and R. A. Oden, *Philo of Byblos. The Phoenician History: Introduction, Critical Text, Translation, Notes* [CBQMS 9; Washington: Catholic Biblical Association, 1981], 69). According to Oden, Christianity has argued that the Bible contains little or no myth because the Bible affirms a single deity while myths are stories about the gods. But a good deal of the Bible is mythic by this definition because the Hebrew Bible contains numerous references to beings beside Yahweh who are called "divine," "gods," or "sons of god/God" (e.g., Psalms 29:1; 89:7) or "holy ones" (Psalm 89: 6; Hosea 12:1; Zechariah 14:5; cf. KAI 4:5, 7; 14:9, 22; 27:12). Finally, Christian faith (1 Timothy 1:4; 4:7; Titus 1:14) has represented itself as a historical religion that regards the myths of other religions as untrue.

139. D. McGaughey, "Through Myth to Imagination," *Journal of the American Academy of Religion* 56 (1988), 57.

140. For Ewald, see Rogerson, *Myth in Old Testament Interpretation*, 27–28. This view of myth can be found in the third edition of Gunkel's Genesis commentary; see Rogerson, *Myth in Old Testament Interpretation*, 59; J. A. Wilcoxen, "Narrative," *Old Testament Form Criticism* (ed. J. A. Hayes; San Antonio: Trinity University Press, 1974), 68. Rogerson (*Myth in Old Testament Interpretation*, 59–60, 62–63) also notes Gunkel's inconsistency on this point: according to Gunkel Gen 2:2f. is a myth because God is involved. According to Rogerson, the inconsistency arose from Gunkel's use of two different definitions of myth (also observed by Otzen in Otzen, Gottlieb, and Jeppesen, *Myths in the Old Testament*, 5). In addition to the view that myths are stories about the gods (thus excluding narratives about Yahweh), he also held that myths answer questions of universal concern (hence including some narratives about Yahweh). The definition of myth as stories about deities but not the Deity of Israel implicitly underlies some of the twentieth century biblical theologies that viewed Israelite religion as historical and other ancient Near Eastern religions as largely mythic, ahistorical, and relatively devoid of theological importance except as a foil to Israelite religion. The names of G. Ernest Wright, Gerhard von Rad, and Yehezkiel Kaufman are usually invoked in this connection. See Oden, *The Bible without Theology*, 47–48; J. J. Collins, "Is a Critical Biblical Theology Possible?" *The Hebrew Bible and Its Interpreters* (ed. W. H. Propp, B. Halpern, and D. N. Freedman; Winona Lake, IN: Eisenbrauns, 1990) 4–5. For the ideological uses of Greek myth

in scholarship, see B. Lincoln, *Theorizing Myth: Narrative, Ideology, and Scholarship* (Chicago: University of Chicago Press, 1999).

141. Thompson, "Myth and Folktales," *Myth. A Symposium* (ed. T. A. Sebeok; Bloomington, IN: Indiana University Press, 1965), 173: "The practical definition which I have suggested and which seems to be rather well agreed upon is that myth has to do with the gods and their actions, with creation, and with the general nature of the universe and of the earth."

142. See McGaughey, "Through Myth to Imagination."

143. The school of analytical psychology associated with the name of Carl G. Jung has shown a positive attitude toward myth. For Jung and his disciples, myths are stories reflecting different stages in the development of human consciousness. See E. Neumann, *The Origins and History of Consciousness* (Bollingen Series XLII; Princeton: Princeton University Press, 1954); S. F. Walker, *Jung and the Jungians on Myth* (New York: Garland, 1990).

144. See the essays in *Myth and Mythmaking* (ed. H. A. Murray; Boston: Beacon, 1968); J. Z. Smith, *Imagining Religion: From Babylon to Jonestown* (Chicago: University of Chicago Press, 1982), 66–71, 78–79, 87–91; Y. Bonnefoy, *Mythologies* (ed. W. Doniger; trans. G. Honigsblum; 2 vols.; Chicago: University of Chicago Press, 1991).

145. For Stith Thompson's satirical remarks on various functional approaches to myth, see his article "Myth and Folktales," 171–72.

146. Eliade, "Toward a Definition of Myth," *Mythologies* (ed. Y. Bonnefoy and W. Doniger; trans. G. Honigsblum; vol. 1; Chicago: University of Chicago Press, 1991), 5.

147. Oden, *The Bible without Theology*, 55. See also Oden, "Myth in the OT," 959–60. One aspect of Oden's second criterion, namely that the context is "almost always" oral (so also M. Simpson, "Myths and Cosmologies," *Civilizations of the Ancient Mediterranean: Greece and Rome* [ed. Michael Grant and Rachel Kitzinger; New York: Scribner's, 1988], 862), is problematic; ancient Near Eastern societies produced and transmitted both oral and written forms of myths during the same periods.

148. The fourth criterion is emphasized by J. D. Levenson, *Sinai & Zion: An Entry into the Jewish Bible* (San Francisco: Harper and Row, 1987), 102–05.

149. Oden (*The Bible without Theology*, 58) oversteps his own definition by including some nonnarrative biblical material under the label

of myth (e.g., “any number of references to a cosmic mountain”). See later text for this problem.

150. Oden, *The Bible without Theology, 58*.

151. See J.J. M. Roberts, “Myth *Versus* History: Relating the Comparative Foundations,” *CBQ* 38 (1976), 1–13; J. M. Sasson, *Ruth; A New Translation with a Philological Commentary and a Formalist-Folklorist Interpretation* (sec. ed.; Sheffield: JSOT, 1989), 220–21. See also the remarks of J. Z. Smith, *Imagining Religion*, 101. Ancient Near Eastern myths not infrequently reflect the human world as their ultimate concern. Apocalyptic provides another example of the inadequacy of the dichotomy made between myth and history in biblical studies (see chapter 9, section 3).

152. See Rogerson, *Myth in Old Testament Interpretation*, 6–7. For the later form-critical adoption of this terminology, see Rogerson, *Myth in Old Testament Interpretation*, 57–65; Wilcoxen, “Narrative,” 60–79; Otzen in Otzen, Gottlieb, and Jeppesen, *Myths in the Old Testament*, 4–9. For criticism of these distinctions, see Thompson, “Myth and Folktales,” 175.

153. A development bearing on the problem of myth in the Bible may be seen in the attempt in the field of biblical theology to substitute the category of story for history (J. Barr, *The Scope and Authority of the Bible* [Philadelphia: Westminster, 1980], 5; cf. Collins, “Is a Critical Biblical Theology Possible?” 10–11). This move accommodates not only the nonhistorical sources of the Pentateuch as well as the more historical works of the books of Samuel and Kings, but also different sorts of poetic works. This approach seems to bear on myth in the Bible. Indeed, myth seems to be a subcategory of J. J. Collins’s (“Is a Critical Biblical Theology Possible?” 11) application of “story” to biblical narratives expressed in the following terms: “We recognize stories as ‘true’ or as valid expressions of reality in so far as they fit our experiences, although the fit cannot be scientifically verified …” Rather than use only the term “story,” though, Collins (“Is a Critical Biblical Theology Possible?” 13) cautiously employs the term “fiction”: “If we recognize that much biblical ‘history’ is fiction, in the sense of Paul Ricouer’s poetic language, then we must also recognize that statements about God must be in the context of that fiction.” The label “fiction” for biblical narrative in current theological discussions including those of biblical theology may indicate that myth no longer appears alien to the discussion of the Bible. It might be argued that myth constitutes one

type of biblical fiction, one which focuses on divine beings or the divine realm.

154. Eissfeldt, *Kleine Schriften II* (ed. R. Selheim and F. Maass; Tübingen: Mohr [Sie-beck], 1963), 496–501 cf. J. C. L. Gibson, "Myth, legend and folklore in the Ugaritic Keret and Aqhat Texts," *Congress Volume; Edinburgh 1974* (VTSup 28; Leiden: Brill, 1975), 60–68. For a discussion of Eissfeldt's views, see Rogerson, *Myth in Old Testament Interpretation*, 146. Like the Pentateuch and the books of Joshua and Judges, Keret and Aqhat might be viewed as a myth of societal origins. In the case of Keret, it would appear that this narrative was considered the story of a distant ancestor of the dynastic line if the blessing in CAT 1.15 III is any indication. In this blessing Keret is to be blessed among the *pʿr ddn*, "the Assembly of Didanu," an ancestral figure known from both CAT 1.161 and Assyrian King List A. For discussion, see *EHG* 76–77 n. 120.

155. For this consensus form-critical definition of myth, see O. Eissfeldt, *The Old Testament: an Introduction* (trans. P. R. Ackroyd; New York: Harper and Row, 1965), 35; Rogerson, *Myth in Old Testament Interpretation*, 145–73; see also G. W. Coats, *Genesis: With an Introduction to Narrative Literature* (FOTL 1; Grand Rapids, MI: Eerdmans, 1983), 10. For a wider form-critical assessment, see Otzen in Otzen, Gottlieb, and Jeppesen, *Myths in the Old Testament*, 4–9.

156. Thompson, "Myth and Folktales," 169–80, esp. 173–74.

157. So noted by Oden. This point is evident not only from the most brief range of opinions cited above, but from Oden's survey of definitions of myth (see *The Bible without Theology*, 42–52).

158. For an introduction to the Ugaritic Baal Cycle, for the present see *UBC* 1–114.

159. That the categories even for the Baal Cycle are somewhat open to discussion cannot be denied. The folklorist, Heda Jason (*Ethnopoetry: Form, Content, Function* [Forum Theologicae Linguisticae 11; Bonn: Linguistica Biblica, 1977], 32), and P. J. Milne (*Vladimir Propp and the Study of the Structure in Hebrew Bible Narrative* [Bible and Literature Series 13; Sheffield: Sheffield Academic Press, 1988], 169–70) classify the Baal Cycle (and Enuma Elish) as a "mythic epic."

160. Cf. *CMHE* 142.

161. This distinction might be compared to W. H. Schmidt's distinction between myth as story (*Erzählung*) and mythic conceptions (*Vorstellungen*),

but the term imagery seems preferable to conception as it constitutes less of an abstraction from the textual evidence. See Schmidt, “Mythos im Alten Testament,” *EvTh* 27 (1967), 237–54; Rogerson, *Myth in Old Testament Interpretation*, 159–60.

162. Cf. Cross’s characterization of this poem as exemplifying the old mythic pattern (*CMHE* 142). A. Fitzgerald (private communication) has observed that the poem does not reflect the march of the rain-wielding divine warrior since this god destroys not with a rain-bearing storm but with the dry scirocco. This feature is reflected in the language of Exodus 14:21 and 15:7.

163. Thompson, “Myth and Folktales,” 175–76.

164. M. Himmelfarb, “From Prophecy to Apocalypse: The *Book of the Watchers* and Tours of Heaven,” *Jewish Spirituality: From the Bible through the Middle Ages* (ed. A. Green; World Sprituality: An Encyclopedic History of the Religious Quest 13; New York: Crossroad, 1988), 145–65. For the West Semitic background of the interpreting angel, see S. Gevirtz, “Phoenician *wšbrt mlṣm* and Job 33:23,” *Maarav* 5–6 (1990) = *Sopher Mahir: Northwest Semitic Studies Presented to Stanislaus Segert* (ed. E. M. Cook; Santa Monica, CA: Western Academic Press, 1990), 145–58.

1. Anthropomorphic Deities and Divine Monsters

1. For example, see E. Shils, *Center and Periphery: Essays in Macrosociology* (Chicago: University of Chicago Press, 1975); and the essays in *Centre and Periphery in the Ancient World* (eds. M. Rowlands, M. Larsen, and K. Kristiansen; Cambridge: Cambridge University Press, 1987). For similar reflections on center and periphery for Mesopotamia, see M. Liverani, “The Ideology of the Assyrian Empire,” *Power and Propaganda: A Symposium on Ancient Empires* (ed. M. Trolle Larsen; Mesopotamia. Copenhagen Studies in Assyriology 7; Copenhagen: Akademisk forlag, 1979), 306–7; and P. Machinist, “On Self-Consciousness in Mesopotamia,” *The Origins and Diversity of Axial Age Civilizations* (ed. S. N. Eisenstadt; Albany: State University of New York Press, 1986), 184–91. For the dialectic between center and periphery in historical writing, see P. Burke, *History and Social Change* (Cambridge: Cambridge University Press, 1992), 79–84.

2. Wiggermann, “Scenes from the Shadow Side,” *Mesopotamian Poetic Language: Sumerian and Akkadian* (ed. M. E. Vogelzang and H. L. J. Vantiphout; Cuneiform Monographs 6; Groningen: Styx Publications, 1996), 207–20. See also Wiggermann, “Transtigridian Snake Gods,” *Sumerian Gods and Their Representations* (ed. I. L. Finkel and M. J. Geller; Groningen: Styx, 1996), 47–48, and *Mesopotamian Protective Spirits. The Ritual Texts* (Cuneiform Monographs I; Groningen: Styx & PP, 1992), 151–52.

3. J. D. Schloen, “The Patrimonial Household in the Kingdom of Ugarit: A Weberian Analysis of Ancient Near Eastern Society” (Ph.D. diss., Harvard University, 1995; UMI 9539430), 245 n. 1 (see also pp. 4 n. 4, 165–66, 391).

4. For more on the household in myth, see the following two chapters. O. Marc offers a psychological interpretation of the home as an expression of the self, and in particular as an image of the womb; see Marc, *The Psychology of the House* (London: Thames and Hudson, 1977). While such a Jungian interpretation imposes a broad archetypal reading on many different cultures and runs the risk of ignoring these cultures’ indigenous language for the home, West Semitic cultures do use anatomical terms for architectural terms, implying a homology between the human body and home; for examples, see *UBC* 349, esp. n. 228. The two appear as analogous structures subject to external threat and protective of their internal parts. Therefore, the comparison of the human body to parts of the house as in Ecclesiastes 12 is at home in ancient Israel.

5. One contrast works poorly for the Ugaritic texts compared to Mesopotamia—the contrast between time present and time past. According to Wiggermann, time present for Mesopotamia marks the epoch of deities and time past signals the ancient era of monstrous enemies. Hence, Enuma Elish recounts the ancient past that precedes Tiamat’s defeat at the hands of Marduk. The narrative is set in hoary antiquity. In marked contrast, in Ugaritic myth only one case might involve a “theogony” (1.23). See F. M. Cross, “The ‘Olden Gods’ in Ancient Near Eastern Creation Myths,” *Magnalia Dei. The Mighty Acts of God: Essays on the Bible and Archaeology in Memory of G. Ernest Wright* (ed. F. M. Cross, W. E. Lemke, and P. D. Miller, Jr.; Garden City, NY: Doubleday, 1976), 328–38; Mullen, *The Divine Council*, 34, 45, 76, 88. Cf. the far-ranging study of N. Wyatt, “The Theogony Motif in Ugarit and the Bible,” *Ugarit and the Bible*, 395–

419. For later West Semitic theogony, see further K. Koch, “Wind und Zeit als Konstituenten des Kosmos in phönikischer Mythologie und spätalttestamentlichen Texte,” *Mesopotamia—Ugaritica—Biblica: Festschrift für Kurt Bergerhof zur Vollendung seines 70. Lebensjahres am 7. Mai 1992* (ed. M. Dietrich and O. Loretz; AOAT 232; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener Verlag, 1993), 59–91.

The Ugaritic texts also lack a narrative rendering an ancient conflict between divine warriors and their cosmic enemies issuing in creation (or what F. M. Cross, his students E. T. Mullen and R. J. Clifford, and a variety of other scholars call “cosmogony”). See Cross, “The ‘Olden Gods’ in Ancient Near Eastern Creation Myths,” 328–38; Mullen, *The Divine Council*, 34, 45, 76, 88; R. J. Clifford, “Cosmogonies in the Ugaritic Texts and in the Bible,” *Or* 53 (1984 = Mitchell J. Dahood Memorial Volume), 183–201; P. D. Miller, “Aspects of the Religion of Israel,” 59. See also L. Fisher, “Creation at Ugarit and in the Old Testament,” *VT* 15 (1965), 313–25; N. Wyatt, “Killing and Cosmogony in Canaanite and Biblical Thought,” *UF* 17 (1985), 375–81; T. Fenton, “Nexus and Significance: Is Greater Precision Possible?” *Ugarit and the Bible: Proceedings of the International Symposium on Ugarit and the Bible. Manchester. September 1992* (ed. G. J. Brooke, A. H. W. Curtis, and J. F. Healey; UBL 11; Münster: Ugarit-Verlag, 1994), 76–81.

To be sure, such old conflicts are topics of conversation. So Anat and Mot both refer to ancient enemies (1.3 Ill 38–46; 1.5 I 1–3, 28–30; cf. 1.82.1). An ancient cosmogony featuring El as the warrior-creator has often been claimed for the Ugaritic texts, and the idea may be supported by reference to El’s weaponry in 1.65.12–14, but even this text, which is so focused on El and his household, does no more than allude to this possibility (for this text with transation, see chapter 2, section 2). There is no myth devoted to this topic, in stark contrast with the attested Mesopotamian and Israelite literary traditions. Of course, one might argue that the Ugaritic literary tradition once included such texts, but that they are no longer extant. Yet the Ugaritic text usually compared with Enuma Elish is the Baal Cycle, and they apparently differ in time-frame. Enuma Elish explicitly situates its narrative in the distant past. In contrast, the Baal Cycle presents Yamm and Mot not as subjugated foes of the past but as enemies whose struggles with Baal never seem to quite end. This is clear for Mot, who returns after seven years to renew his conflict with the storm-god (1.6

V 8–10); Yamm may also appear after his defeat at Baal's hands (1.4 VII 14). The warrior's battles over Yamm and Mot are not the stuff of high antiquity, but matters of a sort of present; whether timeless or repetitive I doubt anyone can really say (although many scholars do). I prefer to say that such conflict is represented as part of the present scheme of reality, not simply of the distant past. This presentation reflects the precarious character of the cosmic order represented by Baal's kingship (discussed in chapter 6, section 5).

The one myth considered a theogony is often called "the Birth of the Beautiful Gods" (CAT 1.23). Including the birth of two gods sired by El, this text has been regarded as the single instance of a theogony in the Ugaritic corpus. Like the Baal Cycle, this text is not explicitly set in the ancient past (although it does describe the births of gods long known, that is, Shahar and Shalim, or Dawn and Dusk). Yet the time of this text is the ritually present, as the many ritual comments of the text suggest. I cannot say whether such a "ritual present" likewise informs the narrative presentation of the Baal Cycle, even though this would fit very nicely with ritual theories of the text. Yet ritual perspective and information do not necessarily create a text for ritual performance. Accordingly, it may be preferable to investigate the Baal Cycle's temporal perspective as a literary question. The cosmic enemies may be divided according to time-frame in the Baal Cycle: most seem to belong to the ancient past, which is only a matter of passing reference, but Yamm and Mot belong to the present. Their power is manifest as much in the present cosmos as the kingship of Baal, their warrior-enemy. Cosmic enemies in the present of this sort may be an issue specific to the Baal Cycle, insofar as the text seems to view the cosmos in the present. Yet I am not aware of a classic Mesopotamian or Israelite text that represents the present threat of cosmic enemies in these terms and the help accorded the divine hero by other deities. In sum, the apparent present setting in the Baal Cycle seems to demarcate it from the Mesopotamian and Israelite texts commonly compared with it.

6. For Ugaritic evidence, see N. Wyatt, "Sea and Desert: Symbolic Geography in West Semitic Religious Thought," *UF* 19 (1987), 375–89, esp. 380–85, and Wyatt, *Myths of Power: A Study of Royal Power and Ideology in Ugaritic and Biblical Tradition* (UBL 13; Münster: Ugarit-Verlag, 1996), 19–115, esp. 26–30, 75–81. For Mesopotamian and biblical examples of the motif, see A. Haldar, *The Notion of the Desert in Sumero-*

Akkadian and West Semitic Religions (Uppsala: Lundequistska bokhandeln, 1950); S. Talmon, "The 'Desert Motif' in the Bible and in Qumran Literature," *Biblical Motifs: Origins and Transformations* (ed. A. Altmann; Cambridge, MA: Harvard University Press, 1966), 31–63; idem, "*miḏbār*," *TDOT* 8:87–118. For the root **dbr*, see most recently E. Lipiński, "<<Leadership>> The Roots DBR and *NGD* in Aramaic," *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 501–8.

7. See A. Rainey, "The Kingdom of Ugarit," *The Biblical Archaeologist Reader 3* (ed. E. F. Campbell, Jr. and D. N. Freedman; Garden City, NY: Doubleday, 1970), 93–94. Should we see here the religious practice of royal women? Cf. "the religion of the palace women" at Mari, discussed in W. G. Lambert, "The Pantheon of Mari," MARI 4 (1985), 527.

8. The word *šd* may apply not only to the center, but in its meaning "open country," it applies also to periphery (CAT 1.6 II 20; cf. 1.5 VI 6, 29).

9. See *CMCOT* 34–97.

10. The listing of Anat and Athtart together suggests a different figure here, as surmised by P. Bordreui, "Ashtart de Mari et les dieux d'ougarit," MARI 4 (1985), 545–47.

11. For the deities and these cult-sites, see D. Pardee, *Les textes para-mythologiques de la 24e Campagne (1961)* (Ras Shamra—Ougarit IV; Mémoire no 77; Paris: Editions Recherche sur les Civilisations, 1988), 210–12.

12. Very nicely observed by Wyatt, *Myths of Power*, 27–28. For further discussion of this mountain, see P. N. Hunt, "Mount Saphon in Myth and Fact," *Phoenicia and the Bible: Proceedings of the Conference held at the University of Leuven on the 15th and 16th of March 1990* (ed. E. Lipiński; OLA 44; Studia Phoenicia XI; Leuven: Department Oriëntalistiek/Uitgeverij Peeters, 1991), 103–15; K. Koch, "Ḥazzi-Ṣafôn-Kasion: Die Geschichte eines Berg und seiner Gottheiten," *Religionsgeschichte Beziehungen zwischen Kleinasien, Nordsyrien und dem Alten Testament: Internationales Symposion Hamburg 17.-21. März 1990*

(ed. B. Janowski, K. Koch and G. Wilhelm; OBO 129; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1993), 171–223.

13. Wyatt, *Myths of Power*, 27–28.

14. As seen by Wyatt, *Myths of Power*, 40 n. 38. See also T. Stordalen, "Echoes of Eden: Genesis 2–3 and Symbolism of the Eden Garden in Biblical Hebrew Literature," (Ph.D. diss., Norweigan Lutheran School of Theology, Oslo, 1998), 127, 132, where he notes the same word used for the land at the edge of the underworld, perhaps as a reflection of royal garden-graves at Ugarit. If so, this usage might reflect the cosmic connecting point between the royal center of the palace of the living dynasty and the royal periphery of the deceased royal ancestors in the underworld. The deceased ancestors are tied to the living even as they have passed into the realm of the underworld in the periphery. Rituals designed to communicate with the dead (such as CAT 1.161) and myths that reflect aspects of the cultic devotion to the dead (such as CAT 1.5–1.6) express contact of members of the living and deceased royal line between the center and the periphery. For these texts, see chapter 6.

15. Wyatt, *Myths of Power*, 27–115. Wyatt also identifies the temple and city as cosmic centers identified in various ways with the divine mountain and the garden.

16. The question is nicely raised by Stordalen, "Echoes of Eden," 117–32; see also D. P. Wright, "Holiness, Sex, and Death in the Garden of Eden," *Bib* 77 (1996), 305–29. Stordalen explores the question of whether 1.23.66–68a assumes a garden; it would seem based on the typology discussed that lines 68b-76 assume the notion of the sown as an enclosed garden complete with a "watchman of the sown." One problematic aspect of the text involves the command to El's wives to raise an offering in the outback, apparently for the ravenous gods (line 65–66). This command would fly in the face of the notion that monstrous forces generally do not receive cultic offerings, possibly even in a sanctuary site in the outback (*mdbr qdš*). However, it is unclear from the context whether such a command can be carried out, for no such offering is described in the narrative. In fact, such a proposed offering may be intended to forestall the monstrous gods' entry into the sown, which takes place in the following lines (lines 68–76).

17. Resheph's appearance with other deities, such as Baal, Yarih, Kothar, and perhaps Anat (under the title Rahmay) in 1.15 II 3–6 militates

against classifying him easily on this side. So, too, his name in lists of deities (1.47.27 = 1.118.26) and evidently his temple (4.219.3).

18. On this expression, see M. H. Pope, “Mid Rock and Scrub, a Ugaritic Parallel to Exodus 7:19,” *Biblical and Near Eastern Studies: Essays in Honor of William Sanford LaSor* (ed. G. Tuttle; Grand Rapids, MI: Eerdmans, 1978), 146–50 = Pope, *Probative Pontificating in Ugaritic and Biblical Studies: Collected Essays* (ed. M. S. Smith; UBL 10; Münster: Ugarit-Verlag, 1994), 45–50 (with “An afterthought 22/12/92 on ‘Mid rock and Scrub’”).

19. S. B. Parker’s recent translation of these pertinent lines renders *mdbr ’il š’iy* as “the god-aweful wilderness.” See *UNP* 189.

20. See A. van Selms, *Marriage and Family Life in Ugaritic Literature* (Pretoria Oriental Studies 1; London: Luzac, 1954), 63–64; and Pope, review of van Selms, *Marriage and Family Life in Ugaritic Literature*, *JBL* 74 (1955), 293–94, and *EUT* 37.

21. The word *ll* appears in Ugaritic otherwise as a time-referent in ritual texts using the expression *lll*, “at night” (1.39. 12; 1.49.9; 1.50.7; 1.106.27; cf. *II* in the partly non-Ugaritic texts, 1.69.3 and 1.132.17, 25, as the apparent recipient of cultic devotion).

22. The tiers of the pantheon are described in detail in chapters 2 and 3.

23. See T. H. Gaster, “The Religion of the Canaanites,” *Forgotten Religions* (ed. V. T. A. Ferm; New York: Philosophical Library, 1950), 121–30. Contrast the relationship between deities and realms in Mesopotamian myth; for discussion, see A. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars* (Oxford: Clarendon Press, 1986), 71–91. See also W. Horowitz, *Mesopotamian Cosmic Geography* (Mesopotamian Civilizations 8; Winona Lake, IN: Eisenbrauns, 1998).

24. See A. Rainey, *The Scribe at Ugarit. His Position and Influence* (The Israel Academy of Sciences and Humanities Proceedings III/4; Jerusalem: Israel Academy of Sciences and Humanities, 1968), 136, esp. n. 58.

25. On this name, see W. G. E. Watson, “The Ugaritic PN *krt*,” *UF* 26 (1994), 497–500.

26. For a presentation and discussion of CAT 1.161, see chapter 6, section 4. Deceased kings and heroes are discussed also in chapter 4,

section 2.

27. “L’onomastique . . . montrerait sans aucun doute que les noms de personne théophores cristallisent une attitude religieuse semblable: ils demandent à la divinité, quelque soit son nom, salut et bénédiction, protection et faveur.” In Caquot, “Problèmes d’histoire religieuse,” *La Siria del Tardo Bronzo* (Orientis Antiqui Collectio 9; Rome: Centro per le Antichìta e la Storia dell’Arte del Vicino Oriente, 1969), 70.

28. For a caution in identifying “fertility” primarily with goddesses or a particular goddess (as opposed to gods), see J. A. Hackett, “Can A Sexist Model Liberate Us? Ancient Near Eastern ‘Fertility’ Goddesses,” *Journal of Feminist Studies in Religion* 5 (1989), 65–76. See the well-placed caution of P. D. Miller against reducing Ugaritic religion to simply a “fertility religion” (Miller, “Aspects of the Religion of Israel,” *Ancient Israelite Religion: Essays in Honor of Frank Moore Cross* [ed. P. D. Miller, Jr., P. D. Hanson, and S. D. McBride; Philadelphia: Fortress, 1987], 59).

29. For this rendering, see A. Rainey, “Gleanings from Ugarit,” *IOS* 3 (1973), 51; see also *TO* 2.215; *UBC* 76. For a more generic translation, “death,” see D. Pardee, “Ugarit. Texts and Literature,” *ABD* 6:710. G. del Olmo Lete also takes *mt* here as the god of Death, but he interprets the third line as a further protasis; see del Olmo Lete, *Canaanite Religion According to the Liturgical Texts of Ugarit* (trans. W. G. E. Watson; Besthesda, MD: CDL Press, 1999), 95. This latter difference does not affect the interpretation of Mot here.

30. For discussion, see M. S. Smith, “Death in Jeremiah IX, 20,” *UF* 19 (1988), 289–93.

31. According to some scholars, *ym* in the ritual texts, e.g., 1.102.3, 1.118.29, 1.162.11, might not be the god Yamm, but a cultic basin; so J. F. Healey, “The Akkadian ‘Pantheon’ List from Ugarit,” *SEL* 2 (1985), 120. Or, it is a deity called “Day”; so see E. T. Mullen, *The Divine Council in Canaanite and Early Hebrew Literature* (HSM 24; Chico, CA: Scholars, 1980), 89. However, de Moor defends the identification (“The Semitic Pantheon of Ugarit,” *UF* 2 [1970], 201). Support for *ym* as a cultic item is derived from the observation that the next entry in 1.47 and 1.118 (but not in 1.148) is a divinized incense burner (’uṯṯ). On 1.148, see D. Pardee, “RS 24.643: Texte et Structure,” *Syria* 69 (1992), 153–70, esp. 158, 160.

32. Certainly not “divine Sapan,” as the mountain is mentioned in line 6 of the same text. See J. F. Healey, “The Akkadian ‘Pantheon’ List from

Ugarit," 117. Note that the offering list in 1.148 begins *dbḥ ṣpn*, apparently the sacrificial heading corresponding to the *'il ṣpn* in 1.147.1 (see the preceding note).

33. See del Olmo Lete, *Canaanite Religion*, 96, 260.

34. Pardee, "Ugarit. Texts and Literature," 709. For the lists, see J. F. Healey, "The Akkadian 'Pantheon' List from Ugarit," 115–25, and "The 'Pantheon' of Ugarit: Further Notes," *SEL* 5 (1988 = Fs. O. Loretz), 103–12.

35. P. Amiet, *Corpus des cylindres de Ras Shamra—Ougarit II: Sceaux-cylindres en hématite et pierres diverses* (Ras Shamra—Ougarit IX; Paris: Éditions Recherche sur les Civilisations, 1992) 68: "animaux attributs." Cf. "Animal attribute" in Amiet, *Art of the Ancient Near East* (trans. J. Shepley and C. Choquet; New York: Abrams, 1980), 440 no. 787. Amiet also uses "attendant animal," in "Part Five: A Lexicon" of the same work.

36. I prescind from the arguments over whether any goddess is to be considered the "mistress of animals." For discussion and references, see I. Cornelius, "Anat and Qudshu as the <<Mistress of Animals>>. Aspects of the Iconography of the Cananite Goddesses," SEL 10 (1993), 21–45. For a general treatment of evidence of the goddesses involved, see W. G. E. Watson, "The Goddesses of Ugarit: A Survey," SEL 10 (1993), 47–59. For the issue of the goddess's representation as a cow, see M. Dijkstra, "Semitic Worship at Serabit el-Khadim (Sinai)," *ZAH* 10 (1997), 89–97. Because the evidence at Ugarit is unclear, I prescind from this question as well. I would only point out the association of a domesticated species with a deity.

37. The element *ṯr* is not listed in F. Gröndahl, *Die Personnamen der Texte aus Ugarit* (Studia Pohl 1; Rome: Päpstliches Bibelinstitut, 1967).

38. See Amiet, *Corpus des cylindres de Ras Shamra*, 69. For examples from Ugarit, see Amiet, *Corpus des cylindres de Ras Shamra*, 68, 71, and 79 no. 146, and 73 and 81, no. 160. For the temporal extent of Levantine bull iconography, see O. Keel and C. Uehlinger, *Gods, Goddesses, and Images of God in Ancient Israel* (trans. T. Trapp; Minneapolis: Fortress, 1996), 37, 50–51, 56, 78, 82, 118–20, 130, 144–45, 158, 169, 172, 191–95, 278.

39. For the bull iconography at Bethel and the close relation of 1 Kings 12 and Exodus 32, see *CMHE* 198–99; Keel and Uehlinger, *Gods, Goddesses, and Images of God*, 191–92. On p. 194 n. 12 the authors

suggest that *ʿglyw* in the Samaria Ostracon no. 41 should be rendered not "YW is a bull calf," but "Bull calf of YW," a view that gains in plausibility and sense from the discussion in section 6 and n. 65 there.

40. See *EHG* 51.

41. See *CAD* E:63a: *būru ek-du ša Adad* in a Middle Babylonian kudurru and ^{d}*AMAR ek-du* in a list of divine symbols.

42. See K. van der Toorn, *Family Religion in Babylonia, Syria and Israel: Continuity and Change in the Forms of Religious Life* (Studies in the History and Culture of the Ancient Near East VII; Leiden: Brill, 1996), 321.

43. F. C. Fensham, "Winged Gods and Goddesses in the Ugaritic Tablets," *OA* 5 (1966), 157–64. For iconography of Anat as a bird, see M. H. Pope, "The Scene on the Drinking Mug from Ugarit," *Near Eastern Studies in Honor of William Foxwell Albright* (ed. H. Goedicke; Baltimore: Johns Hopkins University Press, 1971), 393–405 = Pope, *Probative Pontificating in Ugaritic and Biblical Studies: Collected Essays* (ed. M. S. Smith; UBL 10; Münster: Ugarit-Verlag, 1994), 17–27. On Anat's form as a bird, see further F. Gangloff and J. C. Haelewyck, "Osée 4, 17–19: Un marzeah en l'honneur de la déesse ʿAnat?" *ETL* 71 (1995), 370–82. For the lion possibly as her animal (representing her warrior prowess), see Amiet, *Corpus des cylindres de Ras Shamra*, 34, 35 no. 46.

44. For the parsing of the expression, see G. A. Tuttle, "*di dit* in UG 5.2.1.8," *UF* 8 (1976), 465–66; *TO* 2:116 n. 356.

45. Insightfully noted by Pope, "The Scene on the Drinking Mug from Ugarit," 393–405.

46. Tessier, *Ancient Near Eastern Cylinder Seals from the Marcopoli Collection* (Berkeley: University of California Press, 1984), 79.

47. Tessier, *Ancient Near Eastern Cylinder Seals*, 243 nos. 476, 477.

48. Tessier, *Ancient Near Eastern Cylinder Seals*, 245 no. 480 (?), 481 (?). For the possibility also of the cow as Anat's iconography representation, see Keel and Uehlinger, *Gods, Goddesses, and Images of God*, 126, 195. The winged figure standing on a bull on one of the bronze plaques from Dan could be Anat (see A. Biran, "Two Bronze Plaques and the *Hussot* of Dan," *IEJ* 42 [1999], 53–54).

49. For Ugaritic glyptic, see Amiet, *Corpus des cylindres de Ras Shamra*, 167–76. For the wider Levantine context, see also Keel and Uehlinger, *Gods, Goddesses, and Images of God*, 76–78, 155. Mesopotamia offers a wide variety of monstrous forms. See W. G. Lambert, "Ninurta

Mythology in the Babylonian Epic of Creation," *Keilschriftliche Literaturen* (ed. K. Hecker and W. Sommerfeld; XXXIII Rencontre Assyriologique Internationale; Berliner Beiträge zum Vorderen Orient 6; Berlin: Dietrich Reimer, 1986), 55–60; E. Reiner, "Magic Figurines, Amulets, and Talismans," *Monsters and Demons in the Ancient and Medieval Worlds: Papers Presented in Honor of Edith Porada* (ed. A. E. Farkas, P. O. Harper, and E. B. Harrison; Mainz: Philipp von Zabern, 1987), 27–36; Wiggermann, *Mesopotamian Protective Spirits*, 143–87. For a valuable comparative study, see T.J. Lewis, "*CT* 13.33–34 and Ezekiel 32: Lion-Dragon Myths," *JAOS* 116 (1996), 28–47. For Hittite and Aegean parallels, see recently C. Watkins, "Le dragon hittite Illuynkas et le géant grec Typhôeus," *CRAIBL* 1992: 319–30. Snakes of the more terrestrial variety may denote other values such as regeneration and they are depicted occasionally with the goddess. See Keel and Uehlinger, *Gods, Goddesses, and Images of God*, 53, 86, 274. Unfortunately the two uses of serpentine imagery are conflated and confused in Miles, *God: A Biography*, 32. It is arguable that a mythic battle underlies the reference to the serpent in Genesis 2; for clarification, see S. M. Olyan, *Asherah and the Cult of Yahweh in Israel* (SBLDS 34; Atlanta, GA: Scholars, 1988), 71.

50. Amiet, *Corpus des cylindres de Ras Shamra*, 71 and 78, no. 144. See also Amiet, *Corpus des cylindres de Ras Shamra*, 74 and 82, no. 166; See E. Williams-Forte, "The Snake and the Tree in the Iconography and Texts during the Bronze Age," *Ancient Seals and the Bible* (ed. L. Gorelick and E. Williams-Forte; Malibu, CA: Undena, 1983), 18–43. On this type in Mesopotamia, see Wiggermann, "Transtigridian Snake Gods," 210–11.

51. See A. Caquot, "Un recueil ougaritique de formules magiques: KTU 1.82," SEL 5 (1988—Fs. O. Loretz), 31–43; J. C. de Moor, *An Anthology of the Religious Texts from Ugarit* (Nisaba 16; Leiden: Brill, 1987), 175–81.

52. So in his treatment of Mesopotamian glyptic, see E. D. van Buren, "The Dragon in Ancient Mesopotamia," *Or* 15 (1946), 24–25. Cf. the massive literature on creatures of mixed form ("hybrid creatures") serving as guardians of deities' sanctuaries. See Keel and Uehlinger, *Gods, Goddesses and Images of God*, 248–53, 278–79, 290, 376.

53. Yamm in 1.3 III 38–39, etc.; 'Arsh in 1.3 III 43 and Mot in 1.4 VII 48–49, VIII 23–24, 30–32, etc.

54. Szubin, “The ‘Beloved Son’ in the Hebrew Bible and the ‘Beloved Disciple’ in the New Testament in Light of Ancient Near Eastern Legal Texts” (Abstract, Society of Biblical Literature International Conference, 1995; used with permission).

55. *UBC* 1.59–60, 150–1.

56. On this problem, see chapter 3, section 3.

57. Regarding Fire (’išt), see *UBC* 306 n. 158. For this divinity especially at Ebla, see also F. Pomponio and P. Xella, *Les dieux d’Ebla: Étude analytique des divinités éblaïtes à l’époque des archives royales du IIIe millénaire* (AOAT 245; Münster: Ugarit-Verlag, 1997), 201.

58. For further details to the following discussion, see M. S. Smith, “Terms of Endearment: ‘Dog’ (*klbt*) and ‘Calf’ (‘*gl*) in KTU 1.3 III 44–45,” “*Und Mose schrieb dieses Lieb auf. . . .” Studien zum Alten Testament und zum Alten Orient: Festchrift für Oswald Loretz zur Vollendung seines 70. Lebenjahres mit Beiträgen von Freuden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; Münster: Ugarit-Verlag, 1998), 713–16.

59. See the discussion of the identification of Akkadian *agālu* in *CAD* A/1:141b.

60. The gender of this dog presumably derives from the feminine gender of *’išt* (so suggested by T. J. Lewis, personal communication).

61. D. R. West has proposed that the title *klbt ’ilm* indicates that *’išt* (usually translated as “Fire”) was conceived as a cosmic dog, “a native form of Mesopotamian Lamashtu” (West, “Hekate, Lamashtu and *klbt ’ilm*,” *UF* 24 [1992], 384). The basis for West’s comparison is quite general: both Lamashtu and *’išt* have fiery and canine associations. Since so little is known of *’išt*, it is quite possible that *klbt* has some mythological association along the lines proposed by West. Other parallels, such as Cerberus, might leap to mind as well. For possible Akkadian parallels, see *CAD* K:71a, 2’f.

62. EA 67:16–18; 76:12–16; 84:6–10, 16–18; 90:19–26; 91:3–5; 108:25–28; 134:11–13; 201:9–16; 320:16–25; cf. 109:44–49; 130:31–38; 138:95–97. These texts are conveniently collected and discussed by J. M. Galán, “What Is He, the Dog?” *UF* 25 (1993), 174.

63. It is possible that such a metaphorical usage lies also behind *keleb*, a category of cultic personnel proscribed in Deuteronomy 23:19, and Phoenician *klbm* in the Kition plaque (CIS 86b = KAI 37, line 10; see also 86a, line 16). See F. L. Benz, *Personal Names in Phoenician and Punic*

Inscriptions: A Catalog, Grammatical Study and Glossary of Elements (Studia Pohl 8; Rome: Biblical Institute Press, 1972), 331; J. C. L. Gibson, *Textbook of Syrian Semitic Inscriptions. Volume III: Phoenician Inscriptions Including Inscriptions in the Mixed Dialect of Arslan Tash* (Oxford: Clarendon, 1982), 124–25, 126–27, 130. Some scholars, however, prefer a more literal understanding of **klb* for these cultic personnel. See L. E. Stager, *Ashqelon Discovered: From Canaanites and Philistines to Romans and Moslems* (Washington: Biblical Archaeologist Society, 1991), 35, 36. For further opinions on the two sides of this discussion, see further J. Hoftijzer and K. Jongeling, *Dictionary of the North-West Semitic Inscriptions. Part One: ’-L* (HdO; Leiden: Brill, 1995), 509. The issues attendant on the Kition plaque are beyond the scope of this investigation.

64. For Ugaritic evidence, Gröndahl, *Die Personennamen*, 150. For more Akkadian names with the element **kalbu*, see *CAD K:696*. For BH examples, see *BDB* 477. For Phoenician instances, see Benz, *Personal Names in Phoenician and Punic Inscriptions*, 131–32, 331.

65. See K. Koenen, “Der Name *‘GLYW* auf Samaria-Ostrakon Nr. 41,” *VT* 44 (1994), 399 n. 5. For further examples, see *CAD* A/1:141b. The personal name *‘glyw* in Samaria Ostracon 41 was also interpreted in this manner by Martin Noth, but this view is controverted. See the discussion in Koenen, “Der Name,” 399 n. 5. A verbal form of **‘gl* could be involved (J. Tigay, personal communication). See also the Palmyrene name *‘glbwl* discussed in Koenen, “Der Name,” 399 n. 2, 400 n. 15.

66. So *AHw* 141b. For other instances, see *CAD* B:342a. Note also the comment there: “OB personal names of the type *Būrija, Būratum* are probably hypocoristics of WSem. names.”

67. For domesticated dogs, see CAT 1.16 I 2, 15. For examples of domesticated dogs in shepherding and hunting, see *CAD* K:71a.

68. For animals in the Bible, see the essays in *Gefährten und Feinde des Menschen: Das Tier in der Lebenswelt des alten Israel* (ed. B. Janowski, U. Neumann-Gorsolke, and U. Glessmer; Neukirchen-Vluyn: Neukirchener, 1993). See also the surveys of Firmage, “Zoology (Animal Profiles),” 1109–67; and P. Riede, “‘Denn wie der Mensch jedes Tier nennen würde, so sollte es heissen’: Hebräische Tiernamen und was sie uns verraten,” *UF* 25 (1993), 331–78.

69. For this point about apocalyptic, see chapters 9 and 10.

70. For a convenient summary, see A. Kapelrud, “Ba‘al, Schöpfung und Chaos,” *UF* 11 (1979 = C. F. A. Schaeffer Festschrift), 407–12.

71. A summary of the evidence on this figure can be found in J. Day, “Leviathan,” *ABD* 4:295–96.

72. See J. Huehnergard, *Ugaritic Vocabulary in Syllabic Transcription* (HSS 32; Atlanta, GA: Scholars, 1987), 72, 185–186.

73. For this figure especially in the Bible, see W. Herrmann, “Jahwes Triumpf über Mot,” *UF* 11 (1979 = C. F. A. Schaeffer Festschrift), 371–38.

74. The text-critical difficulties with the end of this line make any translation little more than a hazardous guess.

75. Among more recent threatments, see T. N. D. Mettinger, “The Enigma of Job: The Deconstruction of God in Intertextual Perspective,” *JNWSL* 23/2 (1997), 1–19, esp. 14–15. My thanks go to Professor Mettinger for bringing this article to my attention.

76. For the evidence and argumentation regarding this convergence in Israelite religion, see *EHG* 21–24 and below chapter 7, section 5.

77. Furthermore, Yamm is perhaps treated as divine, if this is the figure lying behind the word *ym* included in two god-lists (1.47.30 = 1.118. 29) and equated with “Divine Sea” (^{d}*tâmtum*) in RS 20.24.29, marked with the divine determinative. There are questions, however, with this interpretation. See previous for a discussion of this issue.

78. See S. Layton, review of J. D. Fowler, *Theophoric Personal Names in Ancient Hebrew, JNES* 52 (1993), 69.

79. See S. Layton, review of J. D. Fowler, *Theophoric Personal Names in Ancient Hebrew, JNES* 52 (1993), 69.

80. Cf. I. Cornelius, “The Visual Representation of the World in the Ancient Near East and the Hebrew Bible,” *JNWSL* 20 (1994), 193–218, esp. 202.

81. This point has been made repeatedly by biblical scholars. See the fine presentation of J. D. Levenson, *Creation and the Persistance of Evil: The Jewish Drama of Divine Omnipotence* (San Francisco: Harper & Row, 1988), 53–99. See more recently E. T. Mullen Jr., *Ethnic Myths and Pentateuchal Foundations: A New Approach to the Formation of the Pentateuch* (SBL Semeia series; Atlanta, GA: Scholars, 1997), 94–98.

82. Levenson, *Creation and the Persistence of Evil*, 3.

83. For the relationship between “a form of discourse and a certain modality of the confession of faith,” see P. Ricoeur, *Figuring the Sacred:*

Religion, Narrative and Imagination (trans. D. Pellauer; ed. M. I. Wallace; Minneapolis: Fortress, 1995), 39. In this book Ricoeur's own examples suffer from outdated information concerning biblical scholarship since von Rad and about religion since Eliade. Broader generalizations about the relationship between monotheism and biblical genre is a problematic undertaking. For example, R. Alter associates biblical narrative with biblical monotheism (as opposed to polytheistic myths), but S. B. Parker has provided a devastating critique of Alter's interpretation of biblical genres. See Alter, *The Art of Biblical Narrative* (New York: Basic Books, 1981), 29; Parker, *Stories in Scripture and Inscriptions: Comparative Studies on Narratives in Northwest Semitic Inscriptions and the Hebrew Bible* (New York: Oxford University Press, 1997), esp. 137–42.

84. Cf. also the sun-goddess's titles "Great Sun" (*rbt špš*) in 1.16 I 37 and "Light of the Gods, Shapshu" (*nrt 'ilm špš*) in 1.3 V 17, 1.4 VIII 21, 1.6 I 8, 11, 13, II 24, III 24, IV 17, 1.19 IV 47, 49.

85. See further the discussion of El's astral family in chapter 3, section 3.

86. See T. McCreesh, "A Carnival of Animals in Job," presented at a meeting of the Old Testament Colloquium held at Conception Abbey in Conception, Missouri, on February 6, 1993. For the east wind as a possible terrestrial manifestation of the god of Death, see *EHG* 53; I base this observation on the unpublished work of Aloysius Fitzgerald, who has noted the role that the east desert wind plays in many biblical passages.

87. Mendenhall, *The Tenth Generation*, 211 n. 35.

88. The exilic period has been a long-championed backdrop for this chapter. See most recently Mullen, *Ethnic Myths and Pentateuchal Foundations*, 94. However, it has also been argued that Second Isaiah is dependent on Genesis 1; see A. Kapelrud, "The Date of the Priestly Code (P)," *ASTI* 3 (1964), 58–64; M. Weinfeld, "God the Creator in Genesis 1 and in the Prophecy of Second Isaiah," *Tarbiz* 37/2 (1968), 105–32; M. Fishbane, *Biblical Interpretation in Ancient Israel* (Oxford: Clarendon Press, 1985), 325; cited and discussed in P. T. Willey, *Remember the Former Things: The Recollection of Previous Texts in Isaiah 40–55* (SBLDS 161; Atlanta GA: Scholars, 1997), 32–33; and B. D. Sommer, A *Prophet Reads Scripture: Allusion in Isaiah 40–66* (Contraversions. Jews and Other Differences; Stanford, CA: Stanford University Press, 1998), 142–45.

89. *UBC* 109–10.

90. Cf. Ricoeur, *Figuring the Sacred*, 47: faith "could be called 'unconditional trust' to say that it is inseparable from a movement of hope that makes its way in spite of the contradictions of experience and that turns reasons for despair into reasons for hope according to the paradoxical laws of a logic of superabundance."

2. The Divine Council

1. See the well-known article of T. Jacobsen, "Primitive Democracy in Ancient Mesopotamia," *JNES* 2 (1943), 159–72. See further G. Evans, "Ancient Mesopotamian Assemblies: An Addendum," *JAOS* 78 (1958), 114.

2. See *AHw* 876.

3. See E. T. Mullen, *The Divine Council in Canaanite and Early Hebrew Literature* (HSM 2; Chico, CA: Scholars, 1980), 113–20. For the iconography of the divine council, C. Uehlinger, "Audienz in der Götterwelt: Anthropomorphismus und Sociomorphismus in der Ikonographische eines altsyrichen Zylindersiegels," *UF* 24 (1992), 339–59.

4. See *AHw* 876–77.

5. Contra Mullen, *The Divine Council*, 117; as questioned by D. Pardee, review of Mullen, *The Divine Council in Canaanite and Early Hebrew Literature*, JNES 45 (1986), 65.

6. *UBC* 231.

7. There phrases are preceded by *'ab*, "father" (in other words El). See n. 14.

8. Cf. the possibly nondivine usage, *bt qbṣ*, in 1.79.7.

9. Cf. the possibly nondivine usage in 4.120.3.

10. Here I am following the lead of major scholars of Ugaritic studies: Caquot, "Problèmes d'histoire religieuse," 70–71; de Moor, "The Semitic Pantheon of Ugarit," *UF* 2 (1970), 216; Miller, "Aspects of the Religion of Israel," 54; and the works of Pardee cited later. This assessment of the evidence stands in opposition to the otherwise highly informative work of Mullen, *The Divine Council* (see later).

11. See G. del Olmo Lete, *Canaanite Religion*, 101. See also pp. 343, 344–65.

12. *CMHE* 37, 183; cf. UBC 230–31.

13. *UBC* 225–34. As Baal's lament to El indicates, El and Athirat have a house while Baal and his "daughters" do not (1.3 IV 48–53, V 38–44; 1.4 I 9–18, IV 50–57; cf. the same model of human household is evident in Danil's lament in 1.17 I 16–27 that he lacks a son like his brothers).

14. For discussion of various options for each word, see *EUT* 85–88; and Y. Avishur, *Studies in Hebrew and Ugaritic Psalms* (Jerusalem: Magnes, 1994), 308–29; see also Pardee, "Ugarit. Texts and Literature," 709; and the bibliography cited in CAT p. 91, sub 1.65; also N. Wyatt, "Arms and the King. The Earliest Allusion to the *Chaoskampf* Motif and Their Implications for the Interpretation of the Ugaritic and Biblical Traditions," *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 858–61. Pardee takes lines 1–11 and 12–19 as two syntactical units: "the text becomes essentially bipartite: lines 1–11 a divine list centered on El and Baal, lines 12–19 a statement about El's creative abilities." I am inclined not to see such a division, but in general I am following Pardee's understanding of the words in lines 1–8 and 12–18 as outlined there and as further expressed in a personal communication (but on line 19 see later notes). Pardee's treatment of this text will appear in his forthcoming volume, *Les Textes rituels* (Ras Shamra-Ougarit; Paris: Éditions Recherche sur les Civilisations, in preparation). I remain very unsure about line 9 (which has been taken as containing divine titles) and about the specific meanings of the nouns in lines 15–19 (see later notes). Wyatt ("Arms," 858–59) takes the initial words in lines 6–8 as imperatives, unlikely given the final-*t* on *nṣbt* in line 7. Some disagreement is perhaps inevitable given the difficulties of this text (as with so many words in Ugaritic), and perhaps we do well to recall "Ginsberg's dictum" (as Marvin Pope used to call it): "[F]or the only people who have never made mistakes in Ugaritic philology are those who have never engaged in it" (Ginsberg, "Interpreting Ugaritic Texts," *JAOS* 70 [1950], 156). It is worth noting as well Ginsberg's lesser known sarcasm about the field: "Each of these texts by itself is a happy hunting-ground for philological sportsmen abounding as it does in lacunae and obscurities, while the intricate and tantalizing problems of the mutual relations of the texts themselves can afford even more ambitious nimrods of research scope for weeks and weeks of

congenial activity" (Ginsberg, review of J. Obermann, *Ugaritic Mythology, JCS* 2 [1948], 139).

15. So on the basis of the apparently comparable group of divinities listed in 1.40.33–35 and 1.65.1–4 (following J. C. de Moor, "The Semitic Pantheon of Ugarit," 197, 219):

'ab bn 'il	*'il bn 'il*
dr bn 'il	*dr bn 'il*
<mpḫrt bn 'il>	*mpḫrt bn 'il*
ṯkmn [w] šnm	*ṯkmn w šnm*

On the basis of this comparison, one might be inclined to view both first lines as construct chains despite the awkward sense this would produce in the case of 1.65.1 (“El/the god of the sons of El” = El!). On the other hand, this rendering would avoid the apparent repetition of *bn ’il*. See further Mullen, *The Divine Council*, 271. For CAT 1.40, see J. C. de Moor, “An Ugaritic Expiation Ritual and its Old Testament Parallels,” *UF* 23 (1991), 283–300; D. Pardee, “The Structure of RS 1.002,” *Semitic Studies in Honor of Wolf Leslau: On the Occasion of His Eighty-Fifth Birthday. November 14th, 1991. Volume II* (ed. A. S. Kaye; Wiesbaden: Harrassowitz, 1991), 1181–96.

16. See D. Pardee, “Tukamuna wa Šunama,” *UF* 20 (1988), 195–99.

17. The family of El in lines 1–5 is followed by three hypostases of El’s qualities. The element *ḫnn applies only to El in the proper names listed in Gröndahl, *Die Personnamen*, 136. For the element *nṯbt*, cf. the personal name *yṯb*, which Gröndahl (*Die Personnamen*, 169) derives from **nṯb*. This name belongs to the son of Krt, himself said to be *bn ’il*, “a son of El.” For the meaning of *nṯbt*, Avishur (*Studies*, 313) compares Aramaic *ni ṯbětā’*, “strength, stability” (Dan 2:41).

18. One might be inclined to see a divinity here because of *’il ḫšm* (1.123.30) in the context of a series of divinities (see the next note). Instead, Pardee would render “The god who shows solicitude” and compares Mari Akkadian *ḫâšu*, “to show solicitude” (following Dietrich and Loretz); *CAD* H:147 (*ḫâšu* B, “to worry”) remarks that the “Mari passages are not quite clear.” Pardee’s translation also assumes asyndesis unmarked by *d-*, and the change in word order may point in this direction. If this text is a prayer, however, these forms could be imperatives addressed to El: “O El, show solicitude! O El, exalt Baal Sapan. . . .” Y. Avishur has taken the text as a prayer and he renders: “El, hasten! El, save! On behalf of [Mount] Zaphon, on behalf of Ugarit” (Avishur is reading *b‘d* twice; so also Wyatt, “Arms,” 858–59). See Avishur, *Studies in Hebrew and Ugaritic Psalms*, 310. This translation presumes comparison with Akkadian *ḫâšu* A, “to move quickly, to rush to a goal” (*CAD* Ḫ: 146).

19. CAT reads *’add*. Accordingly, de Moor (“The Semitic Pantheon,” 198) compares Alalakh personal name *ḫa-aš-*^{d}*Adad* as well as ^{d}*Adad rapidim*. Based on the reading *ndd*, Pardee renders: “se leve.” Assuming

this reading, the following phrase *b‘d ṣpn* (and the following prepositional phrases) may be dependent on this verb. Line 19 remains problematic for this view.

20. Scholars emend either *b‘d* to *b‘l* on the basis of the following *b‘l* (e.g., Pardee); or they emend the following *b‘l* on the basis of the preceding *b‘d* (e.g., Avishur, Wyatt).

21. The word *mrḥ* is perhaps a weapon in 1.6 I 51: “One so weak cannot run / Like Baal, nor handle the lance (mrḥ) / Like the Son of Dagan for he is prostrate.” (M. S. Smith in *UNP* 154; see also 1.16 I 51 as rendered by E. L. Greenstein in *UNP* 33; 1.92.7, 12). Scholars compare BH *rōmaḥ* and Egyptian *mrḥ*. The latter reflects borrowing from a West Semitic word with the order of consonants as found in the Ugaritic word (so *UT* 19.1547; J. E. Hoch, *Semitic Words in Egyptian Texts of the New Kingdom and Third Intermediate Period* [Princeton, NJ: Princeton University Press, 1994], 139). Of course, it is possible that *’il*, here, as in the following lines, is not the name of the god El, but the substantive used to denote each weapon as “divine.”

22. The word *n’it* seems to be a tool of some sort in 1.86.21, 4.625.2, 5, 7, 9, 11, 16, 18, and 4.632.3, 7, 11, 16 (in these texts note also *m‘ṣd* and *ḥrmṯt*; see also Akkadian *nitu* in the Akkadian texts of Ras Shamra, taken as either a weapon [so *AHw* 798] or tool [so *CAD* N/2:300]). See J. C. Greenfield, “Ugaritic Lexicographical Notes,” *JCS* 21 (1967), 93; J. F. Healey, “Swords and Ploughshares,” *UF* 15 1983), 48–49. Given the other two words for weaponry in 1.65.11 and 13, I am inclined to view *n’it* similarly in line 12, even if the primary meaning is a tool. Pardee renders the word, “adze” (Pardee, “Ugarit, Texts and Literature,” 709). For examples from Ugarit, see A. Caquot and M. Sznycer, *Ugaritic Religion* (Leiden: Brill, 1980), 24, 26, plates XIII, XXI; several axes bear inscriptions (CAT 6.6–6.10).

23. The word *ṣmd* suggests a weapon (1.2 IV 11, 15–16, 18, 23–24; 1.6 V 3; see *UBC* 338–41) rather than a tool (El’s “yoke”?). For this term in administrative texts, see R. M. Good, “Some Ugaritic Terms Relating to Draught and Riding Animals,” *UF* 16 (1984), 77–80.

24. Apart from a possibly personal name, *dṯn* is a *hapax*. Based on a sacrificial view of *šrp* in the preceding line, one might guess that some sacrificial sense obtains in the case of *dṯn* (related to BH *dešen*? so *DLU* 138; but this assumes that *dšn* in 1.108.5 is *d* + *šn* instead of *dšn*; for this

text, see R. M. Good, “On RS 24.252,” *UF* 24 [1992], 155–60). However, such a view of *šrp* is unnecessary (see the previous note). Apparently assuming cognate with BH *dešen*, Gaster renders “richness” (see *EUT* 86). I am inclined to relate *dṯn* here to *dṯyḏ* in 1.18 I 19, taken by M. Dahood to mean “trample underfoot,” but better, “beat” *pace* Parker (*UNP* 64) and cognate with BH **dwš* (Dahood, *Ugaritic-Hebrew Philology* [BibetOr 17; Rome: Pontifical Biblical Institute, 1965], 56 no. 714) and apparently Arabic **dyṯ* (see J. C. Greenfield, “Amurrite, Ugaritic and Canaanite,” *Proceedings of the International Conference on Semitic Studies held in Jerusalem, 19–23 July 1965* [Jerusalem: Israel Academy of Sciences and Humanities, 1969], 96 n. 18; A. Rainey, “Observations on Ugaritic Grammar,” *UF* 3 [1971], 159, 5.12). Avishur (*Studies* 317) compares **dṯṯ*, “to thrust, strike hard” and renders “force.” Others prefer an abstract such as “honor” (Avishur, *Studies*, 317, citing Obermann, Ginsberg, and comparing Gaster’s “greatness” on the basis of Arabic **srf*). For a discussion for a possible Eblaite precedent, see F. Pomponio and P. Xella, *Les dieux d’Ebla: Étude analytique des divinités éblaïtes à l’époque des archives royales du IIIe millénaire* (AOAT 245; Münster: Ugarit-Verlag, 1997), 391.

25. Ugaritic *šrp* is a sacrificial term (see G. del Olmo Lete, “The Sacrificial Vocabulary at Ugarit,” *SEL* 12 [1995], 44), except in 1.6 V 14 where it is one step in Mot’s destruction. It is unclear whether a destructive or theophanic connotation would apply here. The *śĕrápîm* of Isaiah’s vision in Isaiah 6 have been related to Ugaritic *šrp* here (*EUT* 87). Would the biblical *serapîm* then be hypostases of this divine quality?

26. The best candidate for a divine attribute in these lines is *knt ’il* if *knt* derives from **kwn*, “to be” and hence means “order” or the like.

27. *ġdyn* might be a divine attribute as well (*DLU* 155). So Gaster: “Vigour (?)”; see *EUT* 86.

28. Pardee informs me about line 19 that the “best reading of the line as a whole is {*bn’il*}.” Accordingly, he wishes to take the final line as a verbal clause, “El builds,” on which the tools (not weapons) and other items in lines 12–19 refer to El’s building activity. This approach is hardly impossible, but I confess I find it unpersuasive. He does make the valid point: “If line 19 says simply ‘the sons of El,’ one is at a loss to explain the different syntaxes in lines 1–12 as compared with lines 12–18.” Perhaps

line 19 represents a final summary clause, separate from the preceding lines.

29. Cf. Mullen, *The Divine Council*, 273.

30. This overlap is noted by Pardee, “Ugarit. Texts and Literature,” 709.

31. On these two figures, see D. Pardee, “Ṯakamuna wa Šunama,” *UF* 20 (1988), 195–99.

32. *UBC* 231; cf. Mullen, *The Divine Council*, 114, 117, 269.

33. See Olmo Lete, “The Divine Panoply (KTU 1.65: 12–14),” *AO* 10 (1992), 254–56; Wyatt, “Arms,” 858–61.

34. See *CMHE* 40–41; P. D. Miller, “El the Warrior,” *HTR* 60 (1967), 411–31, and *DW* 48–58; Mullen, *The Divine Council*, 32–34, 181, 186. See also J.J. M. Roberts, “El,” *IDBS* 256; A. G. Vaughan, “*il ʿzr*—An Explicit Epithet of El as Hero/Warrior,” *UF* 23 (1993), 423–30 and K. van der Toorn, *Family Religion in Babylonia, Syria and Israel: Continuity and Change in the Forms of Religious Life* (Studies in the History and Culture of the Ancient Near East 7; Leiden: Brill, 1996), 327. Yet Cross and Mullen are correct to regard all other information as indicating at most that El’s battles are not extant in the Ugaritic texts and that his theogonic wars lie in the distant past. Regarding Vaughan’s attempt to take *ʿzr* as warrior title of El, a point made by J. D. Schloen may be noted: “In mythological texts from Ugarit, therefore, the social category indicated by the term *ʿzr* is that of an unmarried youth who is the son, not the servant, of the household head. Being unmarried, the *ʿzr* is well-suited for warfare and adventure; hence the extended meaning ‘hero’ or ‘soldier’” (Schloen, “The Patrimonial Household in the Kingdom of Ugarit: A Weberian Analysis of Ancient Near Eastern Society” [Ph.D. diss., Harvard University, 1995], 334 n. 154).

35. W. Herrmann, “El,” *DDD* 276.

36. See the further discussion in section 4.

37. On these three figures, see further chapter 3, section 1.

38. See N. Wyatt, “Baal’s Boars,” *UF* 19 (1987), 391–98; cf. *UBC* 113–14 n. 224.

39. Mullen, *The Divine Council*, 213, 269.

40. Amiet, Corpus des cylindres de Ras Shamra, 74 and 82, no. 167.

41. De Moor (*The Rise of Yahwism*, 73, 74, 79) asserts that Anat is Baal’s spouse and he is therefore El’s son-in-law. This scenario is plausible, but it has been seriously questioned by N. H. Walls, Jr., and P. L. Day. See

Walls, *The Goddess Anat in the Ugaritic Myth* (SBLDS 135; Atlanta, GA: Scholars, 1992); Day, "Why is Anat a Warrior and Hunter?" *The Bible and the Politics of Exgesis: Essays in Honor of Norman K. Gottwald on His Sixty-Fifth Birthday* (ed. D. Jobling, P. L. Day, and G. T. Sheppard; Cleveland, OH: Pilgrim Press, 1991), 141–146, 329–32. The positions of Walls and Day partially rely on an argument from silence.

42. This point was first made *in nuce* for the Ugaritic texts in M. S. Smith, "Divine Travel as a Token of Divine Rank," *UF* 16 (1984), 359. See also the extensive contributions of L. K. Handy, "Dissenting Deities or Obedient Angels: Divine Hierarchies in Ugarit and the Bible," *Biblical Research* 35 (1990), 18–35; *Among the Host of Heaven: The Syro-Palestinian Pantheon as Bureaucracy* (Winona Lake, IN: Eisenbrauns, 1994); and "The Appearance of the Pantheon," *The Triumph of Elohim: From Yahwisms to Judaisms* (ed. D. V. Edelman; Grand Rapids, MI: Eerdmans, 1996), 27–43. For further discussion of Handy's work, see the end of this chapter, and n. 76.

43. See N.-E. A. Anderson, "The Role of the Queen Mother in Israelite Society," *CBQ* 45 (1983), 179–94; S. Ackerman, "The Queen Mother and the Cult in Ancient Canaan," *JBL* 112 (1993), 385–401; N. Wyatt, "Asherah," *DDD* 99. For a critique of Ackerman's views, see B. Halpern, "The New Names of Isaiah 62:4: Jeremiah's Reception in the Restoration and the Politics of 'Third Isaiah'," JBL 117 (1998), 640 n.46.

44. In contrast, royal mothers bear the title, *mlkt* (e.g., 2.13.1, 15, 2.30.1, 2.36.1, 3, 2.68.1, 2.82.1; cf. 3.1.28). For citations, see J. C. Greenfield, "The Epithets *rbt//ṯrrt* in the KRT Epic," *Perspectives on Language and Text: Essays and Poems in Honor of Francis I. Andersen's Sixtieth Birthday July 28, 1985* (ed. E. W. Conrad and E. G. Newing; Winona Lake, IN: Eisenbrauns, 1987), 35–37, esp. 36 n. 6; and C. H. Gordon, "Ugaritic *RBT/RABĪTU*," *Ascribe to the Lord: Biblical & other studies in Memory of Peter C. Craigie* (ed. L. Eslinger & G. Taylor; JSOTS 63; Sheffield: JSOT, 1988), 127–32.

45. See the following chapter.

46. Mullen, *The Divine Council*, 186 n. 122.

47. However, *'adn* here is taken as a royal title by G. del Olmo Lete, "Receta màgica para un infante enfermo (KTU 1.124)," *Sefarad* 52 (1992), 187–92 and *Canaanite Religion*, 310. See later discussion on *'adn*.

48. J. Leclant, “Astarté à cheval d’aprés les représentations égyptiennes,” *Syria* 37 (1960), 1–67; R. Stadelmann, *Syrisch-Palästinensische Gottheiten in Ägypten* (Probleme der Ägyptologie 5; Leiden: Brill, 1967), 101–10; N. Wyatt, “Astarte,” *DDD* 110–11.

49. For a copy of the picture, see *UBC* 107. For further discussion, see *UBC* 106; T. L. Fenton, “Baal au foudre: of snakes and mountans, myth and message,” *Ugarit, religion and culture: Proceedings of the International Colloquium on Ugarit, Religion and Culture. Edinburgh, July 1994. Essays Presented in Honour of Professor John C. L. Gibson* (ed. N. Wyatt, W. G. E. Watson, and J. B. Lloyd; UBL 12; Münster: Ugarit-Verlag, 1996), 49–64.

50. For Baal as warrior: in prayer see 1.119; for incantations, see 1.93 and 1.169; in myth, 1.2 IV, 1.4 VII, 1.6 V 1–4, and 1.6 VI; and in personal names, see Gröndahl, *Die Personnamen*, 142 (under *yd*), 197 (under **ḏmr*).

51. M. S. Smith, “Kothar wa-Hasis, the Ugaritic Craftsman God” (Ph.D. diss., Yale University, 1985), 463. The characterization, “general factotum,” was Marvin Pope’s phrase. See also the summary about Kothar in Pardee, “Koshar,” *DDD* 490–91. For the view of Kothar as a “Heilbringer,” see P. Xella, “Il dio siriano Kothar,” *Magia: Studi di Storia delle religioni in memoria di Raffaela Garosi* (ed. P. Xella; Rome: Bulzani Editore, 1976), 124.

52. See Gröndahl, *Die Personennamen*, 152.

53. For *’inš ’ilm* as deceased kings divinized as gods of the palace, see del Olmo Lete, *Canaanite Religion*, 59, 89, 113, 260. Wyatt also proposes *ġlm* in 1.119.27 as “the Divine Assistant” and as a member of this tier; see Wyatt, *Religious Texts from Ugarit*, 417 n. 9.

54. Mullen, *The Divine Council*, 282.

55. See Mullen, *The Divine Council*, 113–20; also P. D. Miller, “Cosmology and World Order in the Old Testament: The Divine Council as Cosmic-Political Symbol,” *Horizons in Biblical Theology* 9 (1987), 53–78; also Miller, “The Divine Council and the Prophetic Call to War,” *VT* 18 (1968), 100–7.

56. See the references cited in n. 42.

57. For a discussion of the archaeology of the site as well as its finds (as well as further bibliography), see A. Mazar, *Archaeolog of the Land of the Bible 10,000–586* B.C.E. (ABRL; New York: Doubleday, 1990), 446–50. For discussions of the inscriptions, see J. A. Emerton, “New Light on Israelite Religion: The Implications of the Inscriptions from Kuntillet

‘Ajrud,” *ZAW* 94 (1982), 2–20; M. Weinfeld, “Kuntillet ‘Ajrûd Inscriptions and Their Significance,” *SEL* 1 (1984), 121–30; P. K. McCarter, “Aspects of the Religion of the Israelite Monarchy: Biblical and Epigraphic Data,” *Ancient Israelite Religion: Essays in Honor of Frank Moore Cross* (ed. P. D. Miller, Jr, P. D. Hanson, and S. D. McBride; Philadelphia: Fortress, 1987), 137–55; idem, “The Religious Reforms of Hezekiah and Josiah,” *Aspects of Monotheism: How God is One* (ed. H. Shanks and J. Meinhardt; Washington, DC: Biblical Archaeology Society, 1997), 74–80; S. M. Olyan, *Asherah and the Cult of Yahweh in Israel* (SBLMS 34; Atlanta, GA: Scholars, 1988), 23–34; J. M. Hadley, *The Cult of Asherah in Ancient Israel and Judah: The Evidence for A Hebrew Goddess* (Oriental Publications series 57; Cambridge: Cambridge University Press, 2000); idem, “Some Drawings and Inscriptions on Two Pithoi from Kuntillet ‘Ajrud,” *VT* 37 (1987), 180–213; idem, “The Khirbet el-Qom Inscription,” *VT* 37 (1987), 50–62; idem, “Chasing Shadows? The Quest for the Historical Goddess,” Congress *Volume: Cambridge 1995* (ed. J. A. Emerton; Leiden: Brill, 1997), 169–84; S. A. Wiggins, “The Myth of Asherah: Lion Lady and Serpent Goddess,” *UF* 23 (1991), 383–94; idem, A *Reassessment of ‘Asherah’: A Study According to the Textual Sources of the First Two Millennia* B.C.E. (AOAT 235; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener Verlag, 1993); M. Dietrich and O. Loretz, *“Jahwe und seine Aschera”: Anthropomorphes Kulbild in Mesopotamien, Ugarit und Israel. Das biblische Bilderverbot* (UBL 9; Münster: Ugarit-Verlag, 1992); Keel and Uehlinger, *Gods, Goddesses, and Images of God in Ancient Israel*, 228–48, 332, 369–70; C. Frevel, *Aschera und der Ausschliesslichkeitanspruch YHWHs* (BBB 94; two vols.; Weinheim: Beltz Athenäum, 1995); the response to Frevel in Keel, *Goddesses and Trees, New Moon and Yahweh: Ancient Near Eastern Art and the Hebrew Bible* (JSOTSup 262; Sheffield: Sheffield Academic Press, 1998); and P. Merlo, *La dea Ašratum —Aširatu-Ašera: Un contributo alla storia della religione semitica del Nord* (Mursia: Pontificia Università Lateranense, 1998). See also the survey in S. A. Wiggins, “Asherah Again: Binger’s *Asherah* and the State of Asherah Studies,” *JNWSL* 24 (1998), 231–40. For the sake of completeness, the books of T. Binger and R.J. Pettey may be mentioned; Binger, *Asherah: Goddesses in Ugarit, Israel and the Old Testament* (JSOTSup 232; Copenhagen International Seminar 2; Sheffield: Sheffield Academic Press, 1997); Pettey, *Asherah: Goddess of Israel* (American University Studies,

Series VII Theology and Religion, 74; New York: Peter Lang, 1990). On this subject, see further chapter 4, section 4.

58. This is not the place to engage into a full critique of this very widespread view, but suffice it to say that the so-called evidence does not tally into such a picture without a leap of faith. It remains quite possible that such a picture was the case in ancient Israel, but what passes for evidence hardly constitutes "hard evidence." Many may retort that few historical ancient realities enjoy such a level of "hard evidence"—and I would agree. Yet this difficulty does not compel historians to accept such conclusions; it may be better to prescind from a historical judgment in the matter (something we should perhaps do more often as a scholarly community). For further discussion, see chapters 4 and 9.

59. See N. Wyatt, "Astarte," *DDD* 112–13, esp. 111; P. Xella, "Resheph," *DDD* 702–03; G. del Olmo Lete, "Deber," *DDD* 231–32. For information on these deities from Ebla, see also Pomponio and Xella, *Les Dieux d'Ebla*, 82, 124.

60. See T. Hiebert, *God of My Victory: The Ancient Hymn in Habakkuk 3* (HSM 38; Atlanta, GA: Scholars, 1986), 4, 92–94, 123; R. D. Haak, *Habakkuk* (VTSup 44; Leiden: Brill, 1992), 83, 90. This phenomenon of military retinues in a theophanic context is noted also later in chapter 4, section 1.

61. The older treatments of Psalm 82 in this vein without reference to the Ugaritic texts include H. S. Nyberg, *Studien zum Hoseabuche: Zugleich ein Beitrag zur Klärung des Problems der Alttestamentlichen Textkritik* (Uppsala Universitets °Arsskrift 1935:6; Uppsala: Almqvist & Wiksells, 1935), 122–25; and O. Eissfeldt, "Neue Götter im alten Testament," *Atti del XIX Congresso Internazionale degli Orientalisti. Roma, 23–29 Settembre 1935-XIII* (Rome: Tipografia del Senato, 1938), 479. The best recent treatment is S. B. Parker, "The Beginning of the Reign of God. Psalm 82 as Myth and Liturgy," *RB* 102 (1995), 532–59. See also J. F. A. Sawyer, "Biblical Alternatives to Monotheism," *Theology* 87 (1984), 172–80; M. Dietrich and O. Loretz, *"Jahwe und seine Aschera": Anthropomorphes Kulbild in Mesopotamien, Ugarit und Israel. Das biblische Bilderverbot* (UBL 9; Münster: Ugarit-Verlag, 1992), 134–57; and A. Schenker, "Le monothéisme israélite: un dieu qui transcende le monde et les dieux," *Bib* 78 (1997), 442–44. Among the commentaries, see K. Seybold, *Die Psalmen* (HAT I/15; Tübingen: Mohr [Siebeck], 1996), 324–26.

62. Psalm 82 belongs to the "elohistic Psalter," thought by many scholars to have undergone a replacement of the name of Yahweh with the title "God" (*'akelōhîm*). I have reservations about this theory although it would point more clearly to Yahweh understood as the subject of this sentence.

63. T. Frymer-Kensky argues that the demise of the gods here leads to a responsibility for humans: "There are no longer any gods—and it is up to *humanity* to ensure that the foundations of the earth do not totter" (*In The Wake of the Goddesses: Women, Culture, and the Biblical Transformation of Pagan Myth* [New York: Free Press, 1992], 106). While this view makes for a powerful modern reading of the text, it is not supported by it. Instead, verse 6 summons God to fill the "power vacuum" created by the demise of all other gods. I take special note of this reading of Psalm 82 because this train of thought forms the basic point of Frymer-Kensky's reading of monotheism more generally, namely, that without other powers humanity is left to exercise great responsibility in the world. Theologically, I find the idea attactive, but I also find little biblical support for the idea that human responsibility is to replace the responsibility associated formerly with other gods.

64. 4QDeut^{q} *bny 'l[*; 4QDeut^{j} *bny 'lwhym[*; LXX *huiōn theou* (cf. LXX variants with *aggelōn* interpolated). For the evidence, see E. Tov, *Textual Criticism of the Hebrew Bible* (Minneapolis: Fortress; Assen/Maastricht: Van Gorcum, 1992), 269; J. A. Duncan, *Qumran Cave 4. IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich and F. M. Cross; DJD XIV; Oxford: Clarendon Press, 1995), 90; also BHS to Deuteronomy 32:8 note d. For older bibliography, *EHG* 30 n. 37; and A. Schenker, "Le monothéisme israélite: un dieu qui transcende le monde et les dieux," *Bib* 78 (1997), 438. For an older discussion, see O. Eissfeldt, "Neue Götter im alten Testament," 479. For further discussion, see chapters 8 and 9. L. K. Handy calls the textual variants from the Septuagint and Dead Sea Scrolls "invented text as real text" (*JAOS* 52 [1993], 157); Handy does not say why the Hebrew of Dead Sea Scrolls or the Greek variant represents an "invented text." In the absence of an explanation, it would appear that at least in this case he privileges the Masoretic text to the complete exclusion of textual variants, but it would be unfair to regard him as a "Masoretic fundamentalist."

65. Cf. the echo of Deuteronomy 32:7–9 in Ben Sira 44:2 (cf. verse 23), which reflects the understanding in MT. For discussion, see P. W. Skehan and A. A. DiLella, *The Wisdom of Ben Sira: A New Translation with Notes* (AB 39; New York: Doubleday, 1987), 498.

66. Tov, *Textual Criticism of the Hebrew Bible*, 269. Tov regards the change of *bĕnê ʾĕlōhîm*, "divine beings," in Psalm 29:1 to *mišpĕḥôt ʿammîm*, "families of the people," in Psalm 96:7 as another example of such an "anti-polytheistic alteration." For the literary dependence of Psalm 96 on Psalm 29, see H. L. Ginsberg, "A Strand in the Cord of Hebrew Psalmody," *EI* 9 (1969 = W. F. Albright volume), 45–50. Psalm 29 reflects an early expression of Israelite polytheism.

67. For example, see N. Habel, *Yahweh versus Baal: A Conflict of Religious Cultures* (New York: Bookman, 1964), 42.

68. See chapter 9 for a fuller discussion. The book of Jonah, set in the Neo-Assyrian period, apparently affirms both Yahweh as the universal god and the sailors' god. Perhaps then the Neo-Assyrian period marks the transition between the older forms of Israelite polytheism and the newer theology of monotheism. I thank T. J. Lewis for bringing this text to my attention.

69. The issues involving the development of "angels" are more complex than the presentation here suggests. For their analogy of characteristics with higher deities (size; protection, help and battle; divine communication and instruction) and with humans (praise, sacrifice), S. Meier, *The Messenger in the Ancient Semitic World* (HSM 45; Atlanta, GA: Scholars, 1989); and J. T. Greene, *The Role of the Messenger and Message in the Ancient Near East* (Brown Judaic Studies 169; Atlanta GA: Scholars, 1989). See also the very different studies of S. M. Olyan, A *Thousand Thousands Served Him* (TSAJ 36; Tübingen: J. C. Mohr [Siebeck], 1992); K. Koch, "Monotheismus und Angelologie," *Ein Gott allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israeltischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; 13. Kolloquium der Schweizerischen Akademie der Geistes- und Sozialwissenschaften, 1993; Freiburg Schweiz: Universitätsverlag, 1994), 565–81; R. Kasher, "Angelology and the Supernal Worlds in the Aramaic Targums to the Prophets," *Journal for the Study of Judaism in the Persian, Hellenistic, and Roman Period* 27/2 (1996), 168–91; I. Nowell, "The Angels Are Here," *Spirit and Life* 92/3 (1996) 16–18.

70. For a partial listing, see *The Dictionary of Classical Hebrew: Volume I:* א (ed. D. J. A. Clines, Executive Editor, J. Elwolde; Sheffield: Sheffield Academic Press, 1993), 253–54.

71. Miller, "Cosmology and World Order," 72.

72. Miller, "Cosmology and World Order," 72–73.

73. See Levenson, *Creation and the Persistence of Evil*, 131. Professor Benjamin Sommers has orally made essentially the same suggestion to me.

74. Handy, *Among the Host of Heaven*. For another treatment in this larger vein, see also J. Macdonald, "An Assembly at Ugarit?" *UF* 11 (1979), 515–26.

75. Handy, *Among the Host of Heaven*, 13–14.

76. Schloen has criticized Handy's application of Weber's notion of bureaucracy to the Ugaritic pantheon:

> Lowell Handy has, however, recently defended the proposition that the Syro-Palestininan pantheon reflects the *bureaucratic* structure of mundane society. In my view this is ananchronistic and improbable. Unlike the late-first millennium Near Eastern mythological compositions that are preserved in apocalyptic literature, the Ugaritic myths do not mention heavenly armies and grand battles. The scale is much smaller and the focus is the extended family; thus social conflict is typified by the factional rivalry for power and privilege among patrilaterals within larger patriarchal households. The Ugaritic myths accordingly validate an authority structure—based on familiar household relationships—that existed at all levels of society, from the royal family to the humblest household in the kingdom.

Schloen, "The Patrimonial Household," 400. It is not my intention, nor do I have sufficient expertise, to enter into the theoretical issues in the sociological theory of Max Weber that Handy and Schloen use. Schloen has laid the issues out on pp. 151–60. On the application of Weberian theory to Ugaritic mythology, see also L. Karkajian, "La maisonnée patrimoniale divine à Ougarit: une analyse wébérienne du dieu de la mort, Mot" (Ph.D. diss., University of Montreal, 1999). Directed by Dr. Robert David, the dissertation is now published on the internet by Presses Universitaires de

Montréal at: www.pum.montreal.ca/theses/pilote/karkajian/these.html. This work came to my attention after the completion of this study.

77. For examples and discussion, see *EHG* 10.

78. See, for example, the Sumerian composition often called "Enki and the World Order." For discussion, see H. L. J. Vanstipjhout, "Why Did Enki Organize the World?" *Sumerian Gods and Their Representations* (ed. I. L. Finkel and M. J. Geller; Groningen: Styx, 1996), 117–33. For bureaucracy in Mesopotamia, see the essays in *The Organization of Power: Aspects of Bureaucracy in the Ancient Near East* (ed. M. Gibson and R. Biggs; SAOC 46; Chicago: Oriental Institute of the University of Chicago, 1987).

3. The Divine Family

1. A point nicely emphasized by G. del Olmo Lete, *Canaanite Religion According to The Liturgical Texts of Ugarit* (trans. W. G. E. Watson; Bethesda, MD: CDL Press, 1999), 101. For some of these texts, see also chapter 2, sections 1 and 2.

2. Wyatt, "Baal, Dagan, and Fred: A Rejoinder," *UF* 24 (1992), 429.

3. Schloen, "The Patrimonial Household in the Kingdom of Ugarit: A Weberian Analysis of Ancient Near Eastern Society" (Ph.D. diss., Harvard University, 1995), esp. 399. See also the ranging observations of C. H. Gordon, "Father's Sons and Mother's Daughters in Ugaritic, in the Ancient Near East and in Mandaic Magic Texts," *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 319–24. For households in contemporary Akkadian texts from Syria, see further the essays in *Houses and Households in Ancient Mesopotamia: Papers Read at the 40th Rencontre Assyriologique Internationale. Leiden, July 5–8, 1993* (ed. K. R. Veenhof; Leiden: Nederlands Historisch-Archaeologisch Institut te Istanbul, 1996).

8. See M. H. Pope, "Seven, Seventh, Seventy," *IDB* 4:285–95; F. C. Fensham, "The Numeral Seventy in the Old Testament and the Family of Jerubbaal, Ahab, Panammuwa and Athirat," *PEQ* 109 (1977), 113–15; J. C. de Moor, "Seventy!" *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 199–203.

9. See A. Biran and J. Naveh, "The Tel Dan Fragment: A New Fragment," *IEJ* 45 (1995), 12–13; and most recently S. B. Parker, *Stories in Scripture and Inscriptions: Comparative Studies on Narratives in Northwest Semitic Inscriptions and the Bible* (New York: Oxford University Press, 1997), 46, 58.

10. J. Day, "Ugarit and the Bible: Do They Presuppose the Same Canaanite Mythology and Religion?" *Ugarit and the Bible: Proceedings of the International Symposium on Ugarit and the Bible. Manchester, September, 1992* (ed. G.J. Brooke, A. H. W. Curtis, and J. F. Healey; UBL 11; Munster: Ugarit-Verlag, 1994), 38–39.

11. *TO* 1.214 n. k.

12. S. E. Loewenstamm compares this filial devotion with the piety demonstrated by Shem and Japhet to their drunken father, Noah, in Genesis 9:20–24. See Loewenstamm, "Ham," *Enyclopaedia Miqra'it* 3:163; and M. Garsiel, *Biblical Names: A Literary Study of Midrashic Derivations and Puns* (Ramat-Gan: Bar Ilan University, 1991), 139–40. References are courtesy of Dr. David Goldenberg.

13. Del Olmo Lete, *Canaanite Religion*, 273–74.

14. Del Olmo Lete, *Canaanite Religion*, 257.

15. Del Olmo Lete, *Canaanite Religion*, 208–09.

16. Karkajian, "La maisonnée patrimoniale divine à Ougarit."

17. See N. Walls, *The Goddess Anat in Ugaritic Myth;* and P. L. Day, "Anat: Ugarit's 'Mistress of Animals'," *JNES* 51 (1992), 186. See also Day, "Why Is Anat a Warrior and Hunter?" *The Bible and the Politics of Exegesis: Essays in honor of Norman K. Gottwald on His Sixty-Fifth Birthday* (ed. D. Jobling, P. L. Day, and G. T. Sheppard; Cleveland, OH: Pilgrim Press, 1991), 141–46, 329–32. T. J. Lewis (personal communication) has suggested to me the possibility that if Anat were the daughter of a concubine, it might explain why her mother goes unnamed in the texts; perhaps Anat reflects the situation of concubines' daughters whose father would not be obliged to arrange a full marriage. Her liminal status as unmarried, but with access to her father, El, as perhaps sexually active, but not as a wife (as a concubine herself?), may reflect this status. On concubines in the family, see the later discussion. Would Baal and Anat's mythological kinship as siblings reflect a shared status below the other children in the family of El and Athirat?

18. Frymer-Kensky, *In the Wake of the Goddess: Women, Culture, and the Biblical Transformation of Pagan Myth* (New York: Free Press, 1992), 65.

19. De Moor, *The Rise of Yahwism*, 73, 74, 79.

20. Walls, *The Goddess Anat in the Ugaritic Myth;* Day, "Why Is Anat a Warrior and Hunter?" 141–6, 329–32.

21. *ANET* 200–01. For further examples of the identification of Seth with Baal in New Kingdom Egypt, see R. Stadelmann, *Syrisch-palästinensische Gottheiten in Ägypten* (Probleme der Ägyptologie 5; Leiden: Brill, 1967), 27–47; *ANET* 249; Cornelius, *The Iconography of the Canaanite Gods Reshef and Ba'al*. The identification of Baal and Seth may be reflected in the divine name Bolchoseth found on amulets, *defixiones*, and in formularies dating to the Hellenistic-Roman period. For discussion, see J. G. Gager (ed.), *Curse Tablets and Binding Spells from the Ancient World* (New York: Oxford University Press, 1992), 266.

22. *ANET* 15. See Te Velde (*Seth, God of Confusion: A Study of his Role in Egyptian Mythology and Religion* [Problem der Ägyptologie 6; Leiden: Brill, 1967], 29–30), seconded by Walls (*The Goddess Anat in Ugaritic Myth*, 144–52) and P. L. Day ("Anat: Ugarit's 'Mistress of Animals'," 186; idem, "Why Is Anat a Warrior and Hunter?" 141–46, 329–32).

23. A. Dupont-Sommer, “Une stèle araméene d’un prêtre de Ba‘al trouvée en Égypte,” *Syria* 33 (1956), 79–80. cf Day, “Anat,” *DDD* 72.

24. Cross (*CMHE* 17, 165–66 n. 86), Mullen (*The Divine Council*, 214), and others understand *‘nn* originally as “clouds” (i.e., servants for Baal) and hence “servants.” Yet R. M. Good observes that *‘nn* applies to servants belonging to figures other than Baal. See Good, “Clouds Messengers,” *UF* 10 (1978), 436–37; *UBC* 292–93.

25. P. Amiet, *Corpus des cylindres de Ras Shamra—Ougarit II: Sceaux-cylindres en hématite et pierres diverses* (Ras Shamra—Ougarit IX; Paris: Éditions Recherche sur les Civilisations, 1992), 68 discussing 70 and 78, no. 141–143.

26. The women who engage in sexual relations with El in 1.23 may belong to this category. See M. Dijkstra, “Astral Myth of the Birth of Shahar and Shalim (KTU 1.23),” *“Und Mose schrieb dieses Lied auf”: Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 287.

27. For a maximal case for Athirat’s maritime religious significance, see A. J. Brody, *“‘Each Man Cried Out to His God’: The Specialized Religion of Canaanite and Phoenician Seafarers* (HSM 58; Atlanta, GA: Scholars, 1998), 26–30. See also Baal Sapan as “patron of mariners,” according to M. Dijkstra, “Semitic Worship at Serabit el-Khadim (Sinai),” *ZAH* 10 (1997), 90.

28. On *ml’ak*, see E. L. Greenstein, “Trans-Semitic Equivalency and the Derivation of Hebrew *ml’kh,” UF* 11 (1979), 329–36; Mullen, *The Divine Council*, 210; S. Meier, *The Messenger in the Ancient Semitic World* (HSM 45; Atlanta, GA: Scholars, 1989); and J. T. Greene, *The Role of the Messenger and Message in the Ancient Near East* (Brown Judaic Studies 169; Atlanta, GA: Scholars, 1989).

29. See further the language of *nḥlt* applied to gods’ homes (1.3 III 30, IV 20, VI 16; 1.4 VIII 14; 1.15 II 16); the word, **nḥl*, “heir,” is very common in Ugaritic economic documents. See Pardee, “Ugarit. Texts and Literature,” 713; Schloen, “The Patrimonial Household,” 68. For the same vocabulary at Emar, see D. Arnaud, “Le vocabulaire du l’héritage dans les textes syriens du moyen-Euphrate à la fin de l’âge du Bronze Récent,” *SEL* 12 (1995), 21–26. For an important general discussion at Ugarit, see

Schloen, “The Patrimonial Household.” For helpful reflections on the “home” in antiquity, see D. Cave, “The Domicile in the Study and Teaching of the Sacred,” *The Sacred and the Scholars: Comparative Methodologies for the Study of Primary Religious Data* (ed. T. A. Idinipulos and E. A. Yonan; Numen LXXIII; Leiden: Brill, 1996), 156–68.

30. See Schloen, “The Patrimonial Household,” esp. 41, 73. In the general approach and areas of data pertaining to this subject, Schloen follows his mentor, L. E. Stager, “The Archeology of the Family in Ancient Israel,” *BASOR* 260 (1985), 1–35. See also C. Meyers, “‘To Her Mother’s House’: Considering a Counterpart to the Israelite *Bêt ʻāb*,” *The Bible and the Politics of Exegesis: Essays in Honor of Norman K. Gottwald on His Sixty-Fifth Birthday* (ed. D. Jobling, P. L. Day, and G. T. Sheppard; Cleveland, OH: Pilgrim Press, 1991), 39–51; S. Bendor, *The Social Structure of Ancient Israel* (Jerusalem Biblical Studies 7; Jerusalem: Simor, 1996); and K. Van der Toorn, *Family Religion in Babylonia, Syria and Israel: Continuity and Change in the Forms of Religious Life* (Studies in the History and Culture of the Ancient Near East 7; Leiden: Brill, 1996), 151–205. For an older appreciation of the family as the basic unit of society, see I. Mendelsohn, “The Family in the Ancient Near East,” *BA* 11 (1948), 24–40. See also economic emphasis on the family unit by B. Gordon, “Lending at Interest: Some Jewish, Greek, and Christian Approaches, 800 BC–AD 100,” *History of Political Economy* 14 (1982), 411.

31. See J. C. de Moor, “The Semitic Pantheon of Ugarit,” *UF* 2 (1970), 188; *DLU* 100–01; Schloen, “The Patrimonial Household,” 336–37.

32. The word has been taken as “patron” (*DLU* 9). The background here is familial, given the equation of this word with Akkadian *abu*, “father,” in *Ugaritica V*, text 130 ii 9’, and the parallelism of *’adn* with *’um* in 1.24.33–34 (DLU 9 renders *’adn* in 1.24.33 by “senör padre”). Note also the attestation of the family term *’ad* for “father” (1.23.32, 43; cf. 1.172.23; 2.26.30), from which *ʻadn* is derived (see *UT* 19.352; *UBC* 150 n. 58; see further *DLU* 9). For further evidence in favor of viewing *’adn* here as a familial term, see the later discussion.

33. Schloen (“The Patrimonial Household,” 336, 337) translates “his two married sons.” I accept this as an interpretation (note the lack of *w-* between the two nominal units), and I prefer to preserve in translation the appositional character of the units *n bnh* and *bʻlm*. Apposition obtains also in *w ’adnhm r*.

34. Ugaritic *n‘r* occurs once in a mythological text (1.114.28), but the context is unclear (see *UNP* 195). It is attested in a number of administrative texts (4.60.3; 4.179.3; 4.362.3; 4.402.2; 4.786.1; 4.788.4, 7). On the social significance of this term, see Stager, “The Archaeology of the Family in Ancient Israel,” citing H. P. Stähli’s definition: “a *na‘ar* is an unmarried male who has not yet become a ‘head of household’.” In someone’s household a *n‘r* is therefore a “retainer.” So also Schloen, “The Patrimonial Household,” 333.

35. Schloen (“The Patrimonial Household,” 337 n. 1) comments: “The term *ḫpṯ is cognate to Akk ḫupšu*, which seems to denote a low-ranking person or dependent peasant who nonetheless has a household of his own; i.e., a client…. The *ḫbṯ* is thus distinguished from the *n‘rm* (l. 5) who are domestic retainers without households of their own.” More research is warranted on the precise sense of these terms specifically in the Ugaritic adminstrative texts.

36. It is because of the consistent collocation of sons with *b‘lm* that I am not inclined to view the latter here as “workers,” a translation philologically but not contextually defensible.

37. Noted already in *EHG* 51.

38. So A. H. W. Curtis, “Some Observations on ‘Bull’ Terminology in the Ugaritic Texts and the Old Testament,” *OTS* 26 (1990), 17–31, esp. 30–31. See also *YGC* 120.

39. Concerning Dagan in the Ugaritic texts and Syro-Mesopotamia more generally, see J. F. Healey, “Dagon,” *DDD*, 216–19. For Dagan at Emar, see Emar 379.5 and 383.88’. For Baal and Dagan at Ekalte/Tell Munbaqa, see W. Mayer, “Eine Urkunde über Grund-stückskäufe aus Ekalte/Tell Munbaqa,” *UF* 24 (1992), 263–74, esp. 272.

40. For this word, see the options discussed in M. Dietrich, “Ugaritische Lexicographie,” *SEL* 12 (1995), 113–16.

41. The same figure as *rp’u mlk ‘lm* (1.108.1)? On this figure and the *rp’um*, see section 4.

42. F. Gröndahl, *Die Personennamen der Texte aus Ugarit* (Studia Pohl 1; Rome: Päpstliches Bibelinstitut, 1967), 86, 89.

43. Gröndahl, *Die Personnamen der Texte*, 99; cf. Pardee, “An Evaluation of the Proper Names from Ebla from a West Semitic Perspective: Pantheon Distribution according to Genre,” *Eblaite Personal Names and Semitic Name-Giving: Papers of a Symposium in Rome July 15–*

17, 1985 (ed. A. Archi; Archivi Reali di Ebla: Studi I; Rome: Missione Archaeologica Italiana in Siria, 1988), 139 n. 90. This instance of "Genuspolarität" is not exceptional; see also the name *adānu-ummu*, "Lord is mother" (Gröndahl, *Die Personnamen*, 46) and *špšmlk*, "Shapshu is king" (Gröndahl, *Die Personnamen*, 195).

44. Pardee, "An Evaluation of the Proper Names," 131–33. The topic of popular religion at Ugarit remains relatively unexplored; for some preliminary remarks, see M. Yon, "Recherche sur la civilisation ougaritiques: fouilles de Ras Shamra 1979," *La Syrie au Bronze Récent* (Paris: Éditions Recherche sur les civilisations, 1982), 14–16.

45. See the convenient resource of J. Aboud, *Die Rolle des Königs und seiner Familie nach den Texten von Ugarit* (Forschungen zur Anthropologie und Religionsgeschichte 27; Münster: Ugarit-Verlag, 1994), esp. 123–90.

46. For the family in the ancient Middle East generally, see Schloen, "The Patrimonial Household," 216–29.

47. Pardee, personal communication (20 April 1998).

48. See Rainey, "The Kingdom of Ugarit," 88.

49. For the distribution of sacred sites, see M. Yon, "Ugarit: History and Archaeology," *ABD* 6:703. See also Yon, *The City of Ugarit at Tell Ras Shamra* (Winona Lake, IN: Eisenbrauns, 2000, in press).

50. Yon, "Ugarit: History and Archaeology," *ABD* 6:697, 700, 702; Yon, *The City of Ugarit at Tell Ras Shamra*.

51. Yon, "Ugarit: History and Archaeology," 704.

52. KAI 26; *ANET* 653–54. See Y. Muffs, *Love & Joy: Law, Language and Religion in Ancient Israel* (New York: Jewish Theological Seminary of America, 1992), 57.

53. KAI 24; *ANET* 654–55. See Muffs, *Love & Joy*, 57.

54. Compare the typology proposed by R. R. Steiglitz for what he calls "the Old Semitic core of deities," namely "a celestial set consisting of Hadda, ʻAthtar, Astapil, Kabkab, Suinu, and UTU," and "a terrestrial set consisting of Il, Dagan, Hayyum, Kamish, Malik, and Rasap" (Steiglitz, "Ebla and the Gods of Canaan," *Eblaitica: Essays on the Ebla Archives and Eblaite Language. Volume 2* (ed. C. H. Gordon and G. A. Rendsburg; Publications of the Center for Ebla Research at New York University; Winona Lake, IN: Eisenbrauns, 1990], 82–83).

55. For an older, maximal investigation along these lines, see D. Nielsen, *Ras Šamra Mythologie und Biblische Theologie* (Abhandlungen

fuur die Kunde des Morgenlandes XXI/4; Leipzig: 1936; repr. Nendeln, Liechtenstein: Kaus Repint Ltd., 1966). For Nielsen, the astral family was the older Semitic group while the storm-god was later. This "chronology of divinity" cannot be sustained with the oldest attested textual material. See J. J. M. Roberts, *The Earliest Semitic Pantheon: A Study of the Semitic Deities Attested in Mespotamia before Ur III* (Baltimore/London: Johns Hopkins, 1972); F. Pomponio and P. Xella, *Les dieux d'Ebla: Étude analytique des divinités éblaïtes à l'époque des archives royales du IIIe millénaire* (AOAT 245; Münster: Ugarit-Verlag, 1997).

56. See del Olmo Lete, *Canaanite Religion*, 129, 285–86. See further pp. 199, 243, 289 n. 105. I am open to the possibility that the royal cult of infernal and astral deities reflects beliefs about the royal afterlife that involves descent to the underworld followed by some form of heavenly exaltation characterized as "astralization" (becoming one like the stars). This notion perhaps lies at the base of the "astral Dumuzi" (see chapter 6, section 3 for the discussion of Dumuzi/Tammuz in this vein) and perhaps later expressions of resurrection in Daniel 12:3. It is possible that such a conceptualization of royal afterlife also informs the apparent juxtaposition of Hadad and the king in the afterlife together in KAI 214.16, 21. On this juxtaposition, see J. C. Greenfield, "Un rite religieux aramén et ses parallèles," *RB* 80 (1973), 46–52; *EHG* 30.

57. For the readings, see CAT and Parker, *UNP* 182.

58. Also Parker, *UNP* 182.

59. See Parker, "Shahar," *DDD* 754–55; and H. B. Huffmon, "Shalem," *DDD*, 755–57. On the mythological motifs in 1.23, see Schloen, "The Exile of Disinherited Kin in *KTU* 1.12 and *KTU* 1.23," 209–20; Wyatt, "The Theogony Motif in Ugarit and the Bible," 395–419; Dijkstra, "Astral Myth of the Birth of Shahar and Shalim (KTU 1.23)," 265–87, especially 270, 274–79.

60. For a recent discussion of Yarih, see S. A. Wiggins, "What's in a Name? Yarih at Ugarit," *UF* 30 (1999), 761–79.

61. For convenience, see J. C. de Moor, "'Athtartu the Huntress (KTU 1.92)," *UF* 17 (1985) 225–30. See further M. Dijkstra, "The Myth of Astarte, the Huntress (KTU 1.92). New Fragments," *UF* 26 (1994), 113–26.

62. See section 4 for this text. The view that the stars in 1.43.2–3 represent the deified dead in the underworld may be doubted. So see the critical discussion in M. Dietrich and O. Loretz, "*Jahwe und seine*

Aschera": Anthropomorphes Kultbild in Mesopotamien, Ugarit und Israel. Das biblische Bilderverbot (UBL 9; Münster: Ugarit-Verlag, 1992), 50–51. For another indication of cultic devotion to the stars, see apparently 1.164.15.

63. B. Schmidt ("Moon," DDD, 587–88) argues that the moon is disparaged in 1.114 and the Ugaritic texts elevate the sun. This state of affairs would represent, according to Schmidt, "an exception to the rule in early Levantine lunar traditions." This reading of 1.114 is speculative, and even if it were correct, Schmidt reconstructs too much on the basis of it. He rejects the view of Yarih as gate-keeper, but it is hardly more speculative than his own view. Schmidt provides no real basis for his view as "more likely the case." And if anything, CAT 1.24 would hardly support any diminishment of the moon-god. The god-list of 1.118 lists Yarih well before Shapshu, again failing to support Schmidt's claim. Yet the two astral bodies may have developed separate mythologies, but this in itself does not indicate a disparity of status.

64. Dijkstra, "The Ugaritic-Hurrian Sacrificial Hymn to El (RS 24.278 = CAT 1.128)," *UF* 25 (1993), 161.

65. Emar 378.39. See D. Arnaud, *Recherches au pays d'Aštata. Emar VI, tome 3: texts sumériens et accadiens* (Paris: Editions Recherche sur les Civilisations, 1986), 373; noted and discussed in M. S. Smith, "The God Athtar in the Ancient Near East and His Place in KTU 1.6 I," *Solving Riddles and Untying Knots: Biblical, Epigraphic, and Semitic Studies in Honor of Jonas C. Greenfield* (ed. Z. Zevit, S. Gitin, and M. Sokoloff; Winona Lake, IN: Eisenbrauns, 1995), 628–29.

66. See P. Bordreuil, *Catalogue des sceaux ouest-sémitiques inscrits de la Bibliothèque Nationals, du musée du Louvre et du Musée biblique et Terre Sainte* (Paris, 1986), 75 no. 85. See also the reference to Arabs called "the people of Atarsamain" (^{lu}*a'lu ša* ^{d}*Ataršamain*) in Assurbanipal's royal annals (for discussion, see Smith, "The God Athtar," 633, esp. n. 47).

67. See T. Jacobsen, *Treasures of Darkness: A History of Mesopotamian Religion* (New Haven/London: Yale, 1976), 140; J. J. M. Roberts, *The Earliest Semitic Pantheon: A Study of Semitic Deities Attested in Mesopotamia before Ur III* (Johns Hopkins Near Eastern Studies; Baltimore: Johns Hopkins University Press, 1972), 39–40; W. Heimpel, "A Catalog of Near Eastern Venus Deities," *Syro-Mesopotamian Studies* 4/3 (1982), 14–15.

68. See J. Gray, “The Desert God ‘Aṯtr in the Literature and Religion of Canaan,” *JNES* 8 (1949), 72–83, and *The Legacy of Canaan* (VTSup 5; sec. ed.; Leiden: Brill, 1965), 170; A. Caquot, “Le dieu ‘Athtar et les textes de Ras Shamra,” *Syria* 35 (1958), 51; U. Oldenburg, *The Conflict between El and Ba’al in Canaanite Religion* (Supplementa ad Numen, III; Leiden: Brill, 1969), 39–45.

69. Fulco, *The Canaanite God Rešep* American Oriental Series; (New Haven, CT: American Oriental Society, 1976), 39–40. See also T. de Jong and W. H. van Soldt, “Redating an Early Solar Eclipse Record (KTU 1.78). Implications for the Ugaritic Calendar and for the Secular Accelerations of the Earth and the Moon,” *JEOL* 30 (1987–88), 65–77; D. Pardee and N. Swerdlow, “Not the Earliest Solar Eclipse,” *Nature* 363 (1993), 406. Note also G. del Olmo Lete, “Ug. *ḫgb* y *slḫ* como material sacrificial,” *AO* 10 (1992), 151–52.

70. Keel and Uehlinger, *Gods, Goddesses, and Images of God*, 310–11, 312–15, fig. 308; 402; Keel, *Goddesses and Trees, New Moon and Yahweh: Ancient Near Eastern Art and the Hebrew Bible* (JSOTSup 261; Sheffield: Sheffield Academic Press, 1998), 44.

71. A. J. Brody, “*‘Each Man Cried Out to His God’: The Specialized Religion of Canaanite and Phoenician Seafarers* (HSM 58; Atlanta SA: Scholars, 1998), 27.

72. El is said to survive in South Arabian religion as well. U. Oldenburg, “Above the Stars of El. El in South Arabic Religion,” *ZAW* 82 (1970), 187–208; J. Ryckmans, “South Arabia, Religion of,” *ABD* 6:172.

73. Epigraphic South Arabian sources may support this approach to Athirat. According to A. Jamme, Athirat is the name of a Qatabanian solar goddess and spouse of the moon-god. See Jamme, “La religion sud-arabe préislamique,” *Histoire des religions* 4 (publié sous la direction de M. Brillant et R. Aigrain; Paris: Bloud et Gay, 1956), 266. See also G. Ryckmans, *Les religions arabes préislamiques* (sec. ed.; Bibliothèque de Muséon XXVI; Louvain: Publications universitaires, 1951), 44. See also S. A. Wiggins, A *Reassessment of Asherah: A Study According to the Textual Sources of the First Two Millenia [sic]* B.C.E. (AOAT 235; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener Verlag, 1993), 161–62.

74. See Caquot, “Problèmes d’histoire religieuse,” 70. Similarly, J. Ryckmans has suggested that the South Arabian cult of El was displaced by

the cult of Athtar; Ryckmans, “South Arabia,” 172.

75. See F. Stolz, *Strukturen und Figuren im Kult von Jerusalem* (BZAW 118; Berlin: de Gruyter, 1980), 181–218.

76. Oldenburg, *The Conflict between El and Ba’al in Canaanite Thought*, 18.

77. See P. Raabe, *Obadiah* (AB 24D; New York: Doubleday, 1996), 132–33.

78. Cf. Obadiah 3. See Raabe, *Obadiah*, 132–33.

79. G. I. Davies (*Ancient Hebrew Inscriptions: Corpus and Concordance* [Cambridge: Cambridge University Press, 1991], 492) lists 14 instances.

80. On *šlm* in Hebrew personal names, see Davies, *Ancient Hebrew Inscriptions*, 495–96, who lists 23 instances.

81. So J. H. Tigay, “Israelite Religion: The Onomastic and Epigraphic Evidence,” *Ancient Israelite Religion: Essays in Honor of Frank Moore Cross* (ed. P. D. Miller, Jr., P. D. Hanson, and S. D. McBride; Philadelphia: Fortress, 1987), 164 and 166 nn. n, o, and p.

82. S. M. Olyan, *Asherah and the Cult of Yahweh* (SBLMS 34; Atlanta, GA: Scholars, 1988), 38–61; followed in *EHG* 19, as part of the larger process of convergence in Israelite religion.

83. Taylor, *Yahweh and the Sun: Biblical and Archaeological Evidence for Sun Worship in Ancient Israel* (JSOTSup 111; Sheffield: Sheffield Academic Press, 1993), 105–06, 258.

84. B. Halpern, “‘Brisker Pipes than Poetry’: The Development of Israelite Monotheism,” *Judaic Perspectives on Ancient Israel* (ed. J. Neusner, B. A. Levine, and E. S. Frerichs; Philadelphia: Fortress, 1987), 94, 98; idem, “Jerusalem and the Lineages in the Seventh Century BCE,” 81, 83–84.

85. Taylor, *Yahweh and the Sun*, 105–06.

86. See H. Spickermann, *Juda unter Assur in der Sargonidenzeit* (FRLANT 129; Göttingen: Vandenhoeck und Ruprecht, 1982); so too in the iconographic survey of Keel, *Goddesses and Trees*, 62–109. The latter’s particular emphasis on Aramean dispersion for astral imagery perhaps diverts his attention from the full force of the astral evidence in the Ugaritic texts. For the question of Assyrian influence, see the considerably more qualified study of S. W. Holloway, “The Case for Assyrian Religious Influence in Israel and Judah” (Ph.D. diss., University of Chicago, 1992).

87. See Taylor, *Yahweh and the Sun*, 105–06, 260–61.

88. See the summary of scholarly discussion in T. Hiebert, *God of My Victory: The Ancient Hymn in Habakkuk 3* (HSM 38; Atlanta, GA: Scholars, 1986), 100.

89. See the discussion in section 1.

90. The name of Dagan has been derived from Arabic **dajana*, "to be cloudy, rainy" (H. Wehr, A *Dictionary of Modern Written Arabic* [ed. J. M. Cowan; third ed.; Ithaca, NY: Spoken Languages Services, 1976], 245). See W. F. Albright, *JAOS* 40 (1920) 319; D. Marcus, "The Term 'Chin' in the Semitic Languages" *BASOR* 226 (1977), 53–60; S. E. Loewenstamm, "Did the Goddess Anat Wear Side-Whiskers and a Beard? A Reconsideration," *UF* 14 (1982), 120. F. Renfroe (*Arabic-Ugaritic Lexical Studies* [ALASP 5; Münster: Ugarit-Verlag, 1992], 91–94) and J. F. Healey (review of F. Renfroe, *Arabic-Ugaritic Lexical Studies, UF* 25 [1993], 507) are critical of this etymology, given the distance in time and space.

91. Ginsberg, *ANET* 140 n. 1.

92. On this text *PE* 1.10.18–19, see H. W. Attridge and R. A. Oden, *Philo of Byblos. The Phoenician History: Introduction, Critical Text, Translation, Notes* (CBQMS 9; Washington, DC: The Catholic Biblical Association of America, 1981), 50–51. For the issue, see *EUT* 47 n. 95; Mullen, *The Divine Council*, 19–20.

93. For Demarous = *dmrn* in 1.4 VII 39, see *BOS* 2.198. See also *CMHE* 15 n. 14; cf. E. Lipiński, "The 'Phoenician History' of Philo of Byblos," *BiOr* 40 (1983), 309.

94. *EUT* 47 n. 95; Mullen, *The Divine Council*, 19–20.

95. See C. E. L'Heureux, *Rank Among the Canaanite Gods: El, Ba'al and the Repha'im* (HSM 21; Missoula, MT: Scholars, 1979), 29–30, 31–32.

96. H. Hoffner has arrived at a comparable conclusion for Kumarbi and the Storm-god, that they do not stand in a single line; instead, their succession represents one dynastic line supplanting another. See Hoffner, "Hittite Mythological Texts: A Survey," *Unity and Diversity: Essays in the History, Literarure and Religion of the Ancient Near East* (ed. H. Goedicke and J. J. M. Roberts; Baltimore: Johns Hopkins University Press, 1975), 136–45. The succession of generations in the Hittite-Hurrian Kumarbi cycles might suggest the equation of Ouranos with Anu (L'Heureux, *Rank Among the Canaanite Gods*, 30–31), but Kumarbi has been equated with

both El and Dagan (see L'Heureux, *Rank Among the Canaanite Gods*, 39–40, for cautions).

97. *ANET* 519. See also Hofner, "The Elkunirsa Myth Reconsidered," *RHA* 23/76 (1965), 5–16.

98. Caquot, "Le dieu 'Athtar et les textes de Ras Shamra," 55. See also H. Gese, in H. Gese, M. Höfner, and K. Rudolph, *Die Religionen Altsyriens, Atlarabiens und der Mandäer* (Die Religionen der Menschheit X/II; Stuttgart: Kohlhammer, 1970), 138.

99. Cf. the comments of J. Gray (*The Legacy of Canaan*, 170 n. 2): "The fertility function of the deity is not to be doubted, but in view of the pre-eminence of the cult of 'A*tt*ar in oases and lands bordering on the desert it seems more natural than the fertility-function of the deity in the settled lands." Such observations call for a "divinity geography" (on analogy with dialect geography) that would show distributions for the cult-sites of various West Semitic deities in the Middle and Late Bronze periods. Taken far enough, such an inquiry might show some results reflected further in Ugaritic mythology.

100. Robertson Smith, *Lectures on the Religion of the Semites: The Fundamental Institutions* (third ed.; introduction and additional notes by S. A. Cook; New York: KTAV, 1969 [original, 1927], 102 n. 2. For subsequent modifications of this contrast, see Smith, *Lectures on the Religion of the Semites*, 95–113, esp. 100, 102 n. 2.

101. M. Yon, "Ugarit: History and Archaeology," 698.

4. Pluralities, Pairings, and Other Divine Relations

1. E. T. Mullen, *The Divine Council in Canaanite and Early Hebrew Literature* (HSM 24; Chico, CA: Scholars, 1980), 213, 269. We might also note in this connection the six occurrences of "Baal" (*b'lm*, a singular plus mimation as indicated by the Akkadian RS 20.24) following *b'l ṣpn* in 1.47.5–11 1.118.54–10. It is dubious that these *b'lm* are the Baals of various sites (see Pardee's discussion, "An Evaluation of the Proper Names, from a West Semitic Perspective: Pantheon Distribution According to Genre," *Eblaite Personal Names and Semitic Name-Giving* (ed. A. Archi; Rome: Missione Archaeologica Italiana in Siria, 1988) 138 n. 79). With *b'l ṣpn* in the list, there is no reason why the following entries would not also add the geographical name if these *b'lm* are references to Baal of particular locales.

Perhaps these *b'lm* and *'il t'dr b'l* are to be compared to the "Baali-Zaphon," attested in New Kingdom Egypt (*ANET* 250). J. A. Wilson (*ANET* 250 n. 12) interprets this phrase as either a plural of majesty or a collective noun. J. C. de Moor prefers to see each *b'lm* as identical to Baal Sapan; see de Moor, "The Semitic Pantheon of Ugarit," *UF* 2 (1970), 219. Cf. S. Parpola, "Monotheism in Ancient Assyria," *One God or Many?* 174.

2. On Resheph, see W. J. Fulco, *The Canaanite God Rešep* (New Haven, CT: American Oriental Society, 1976); P. Xella, "Le dieu Rashaph à Ugarit," *Les annales archaeologiques arabes syriennes* 29–30 (1979–80), 145–62; "KTU 1.91 (RS 19.15) e i sacrifici del re," *UF* 11 (1979), 833–38; and "Resheph," *DDD* 700–03; A. Cooper, "Divine Names and Epithets in the Ugaritic Texts," *Ras Shamra Parallels III: the Texts from Ugarit and the Hebrew Bible* (ed. S. Rummel; AnOr 51; Rome: Pontifical Biblical Institute, 1981), 413–15; Y. Yadin, "New Gleanings on Resheph from Ugarit," *Biblical and Related Studies Presented to Samuel Iwry* (ed. A. Kort and S. Morschauer; Winona Lake, IN: Eisenbrauns, 1985), 259–74.

3. J. M. de Tarragon, *Le Culte à Ugarit* (Paris: Gabalda, 1980), 167. This plural usage for divine statues may underline the apparently plural form *'štrm*, attested in several dedicatory inscriptions on unprovenanced Phoenician bronze bowls. See R. Deutsch and M. Heltzer, *Forty New Ancient West Semitic Inscriptions* (Tel Aviv: Archaeological Center Publication, 1994), 69, 71, 73, 75, 77, 79 (on the assumption of authenticity); T. C. Mitchell, Review of Deutsch and Heltzer, *Forty New Ancient West Semitic Inscriptions*, *PEQ* 128 (1996), 172.

4. *ANET* 250 n. 27.

5. Donner and Röllig (*Kanaanäische und Aramaische Inschriften; Band II: Kommentar* (Wiesbaden: Otto Harrassowitz, 1973), 24. Might *'rṣ* refer, like *šmm rmm* in the preceding line of KAI 15:2, to a sacred "district," in this case perhaps figuratively to the "underworld," and hence a cemetery? See G. C. Picard, "From the Foundation of Carthage to the Barcid Revolution," *Archaeologia Viva* 1/2 (1968–69), 152.

6. Fulco, *The Canaanite God Rešep*, 47.

7. Fulco, *The Canaanite God Rešep*, 69–70.

8. See T. Hiebert, *God of My Victory: The Ancient Hymn in Habakkuk 3* (HSM 38; Atlanta: Scholars, 1986), 4, 92–94, 123; R. D. Haak, *Habakkuk* (VTSup 44; Leiden: Brill, 1992), 83, 90; and noted in chapter 2, section 4.

9. H. W. Attridge and R. A. Oden, *Philo of Byblos: The Phoenician History: Introduction, Critical Text, Translation Notes* (CBQMS 9; Washington, DC: Catholic Biblical Association of America, 1981), 50–51.

10. For a survey with bibliography, see J. N. Ford, "The 'Living Rephaim' of Ugarit: Quick or Defunct?" *UF* 24 (1992), 73–101. To my mind the most insightful study of this collective remains W. J. Horowitz, "The Significance of the Rephaim *rm. aby. btk. rpim,*" *JNWSL* 7 (1979), 37–43.

11. As suggested by M. S. Smith in G. C. Heider, *The Cult of Molek: A Reassessment* (JSOTSup 43; Sheffield: JSOT Press, 1985), 127. For a discussion of the issues, see Heider, *The Cult of Molek*, 113–49.

12. This geographical identification perhaps militates against the view of M. Dietrich and O. Loretz that *rp'u mlk 'lm*, *gṯr wyqr*, and *'il* (= *mlk*/Milku) are three different figures. See Dietrich and Loretz, "Rapi'u and Milku aus Ugarit: Neuere historisch-geographischen Thesen zu *rpu mlk 'lm* (KTU 1.108:1) und *mt rpi* (KTU 1.17 I 1)," *UF* 21 (1989), 123–31, esp. 126; Dietrich and Loretz, *"Jahwe und seine Aschera": Anthropomorphes Kulbild in Mesopotamien, Ugarit und Israel. Das biblische Bilderverbot* (UBL 9; Münster: Ugarit-Verlag, 1992), 39–76. In addition, the word *gṯr* has been understood possibly as another name of *rp'u* in 1.108.2, since *rp'u* is called not only *mlk;* he may also be called *gṯr wyqr* (see de Tarragon, *Le Culte à Ugarit*, 159, 176). The latter is also the name of the dynastic "founder." At first glance the syntax does not suggest a personal name, Yaqaru, but another title. However, if *gṯr wyqr* were a binomial name, then *yqr* could not be precluded as the name of the original dynast whom the text regards as divine, especially as *'il yqr* heads the list of dynasts in 1.113.26 (cf. *rp'i yqr* in the unclear context of 1.166.13). For the record, one possible reading for the subjects of the two clauses in 1.108.1–2 would run "Rp'u the Eternal King//"[the god of] Gtr and Yqr" unless these latter two are the objects of the verb (see del Olmo Lete, *Canaanite Religion*, 186). In either case, Rp'u is not to be identified as *gṯr wyqr* (as most interpreters say), but may be the ancestral patron god of *gṯr wyqr* (might then *gṯr* be the father of *yqr*?). In any case, it would be tempting then to extend the equation in the following mannner: *rp'u: mlk: gṯr:: rp'um* : *mlkm: gṯrm* (cf. del Olmo Lete, *Canaanite Religion According to the Liturgical Texts of Ugarit* (trans. W. G. E. Watson; Bethesda, MD: CDL, 1999) 241). However, CAT 1.43, the one

text where *gṯr* and *gṯrm* both appear, hardly relates the two in particular together (see the following note; for text and translation, see section 4).

13. If and how *gṯrm* in 1.43 is to be identified with *rp'um* (and *mlkm*) is also unclear. Until Pardee's study (see the preceding note), many scholars equated *gṯrm* with *rp'um;* this identification is held by Caquot, de Tarragon, del Olmo Lete, and Sapin. For references, see Pardee, "RS 1.005 and the Identification of the *gtrm," Ritual and Sacrifice in the Ancient Near East: Proceedings of the International Conference Organized by the Katholieke Universiteit Leuven from the 27th to the 20th of April 1991* (ed. J. Quaegebeur; Leuven: Uitgeverij Peeters en Departement Oriëntalistiek, 1993), 312 n. 35; G. del Olmo Lete, "The Cultic Literature of Ugarit. Hermeneutical Issues and Their Application to KTU 1.112," *Keilschriften Literaturen* (ed. K. Hecker and W. Sommerfeld; XXXII Rencontre Assyriologique; Berliner Beitrage zum Vorderen Orient 6; Berin: Dietrich Reimer, 1986), 162. Others prefer a more specific identification. J. C. de Moor takes *gṯrm* as a dual refering to *gṯr wyqr;* de Moor, *An Anthology of Religious Texts from Ugarit*, 170 n. 15, 187 n. 2. O. Loretz and P. Xella interpret the form also as a dual, but one referring to the statues of two *gṯr;* see Dietrich and Loretz, *"Jahwe und seine Aschera,"* 54–55. See also P. Xella, "Le deu et <<sa>> déesse: l'utilisation des suffixes pronominaux avec des théonymes d'Ebla à Ugarit et à Kuntillet 'Ajrud," *UF* 27 (1995), 607–8. The grammar of the dual/plural indicative prefix form precludes a singular noun with mimation for lines 9–10: *t'rbn gṯrm bt mlk*, "the *gṯrm* enter the house of the king. . . ." The context could seem to suggest cult statues of some dual or plural figures. For cult statues as *'ilm*, see 1.42.23, 24 and 1.112.8. See Watson, "Notes on Some Ugaritic Words," *SEL* 6 (1989), 47. Pardee suggests that the term *gṯrm* covers three deities in 1.43, namely, Shapshu, Yarih, and *gṯr*. Cf. del Olmo Lete, *Canaanite Religion*, 241. With Pardee it remains feasible to hold out for the possibility that one of the *gṯrm* in 1.43.9–10 could be identified with *gṯr*, possibly *gṯr wyqr* in 1.108.2; see Pardee, "RS 1.005 and the Identification of the *gṯrm,"* 312–17. In *Les textes paramythologiques*, 91–93 esp. 93 n. 62, Pardee had accepted the widely held hypothesis that *gṯrm* are the *rp'um*.

14. In lines 1–5 this figure leads the musical celebration with *ḫbr kṯr ṯ bm*, "the goodly companions of Kothar," which I have taken as a possible reference to the *rp'um* (see Smith in D. Pardee, *Les textes para-mythologiques*, 100 n. 111).

15. See the important discussion of K. van der Toorn, “Ilib and the ‘God of the Father’,” *UF* 25 (1993), 379–87. Formerly most commentators had taken *’il’ib* to be the divine version of the family-god.

16. For these lists, see Healey, “The Akkadian ‘Pantheon’ List from Ugarit,” *SEL* 2 (1985), 115–25; Lewis, *Cults of the Dead*, 56–57.

17. See the informative survey in K. Spronk, *Beatific Afterlife in Ancient Israel and in the Ancient Near East* (AOAT 219; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener, 1986), 3–85.

18. The following are representative: Spronk, *Beatific Afterlife in Ancient Israel and in the Ancient Near East*, and the review of M. S. Smith and E. M. Bloch-Smith, “Death and Afterlife in Ugarit and Israel,” *JAOS* 108 (1988), 277–84; T. J. Lewis, *Cults of the Dead in Ancient Israel and Ugarit* (HSM 39; Atlanta, GA: Scholars, 1989); O. Loretz, “Nekromantie und Totenevokation im Mesopotamien, Ugarit und Israel,” *Religionsgeschichtliche Beziehungen zwischen Kleinasien, Nordssyrien und dem Alten Testament* (ed. B. Janowski; OBO 129; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1993), 285–318; B. Schmidt, *Israel’s Beneficent Dead: Ancestor Cult and Necromancy in Ancient Isrelite Religion and Tradition* (FAT 11; Tübingen: J. C. B. Mohr [Siebeck], 1994), 100–20, and my review in *CBQ* 58 (1996), 724–25; Bloch-Smith, *Judahite Burials and Beliefs about the Dead* (JSOT-Sup 123; Sheffield: Sheffield Academic Press, 1992). See also the articles devoted to this topic by H. Niehr, R. Wenning, J. F. Healey, K. van der Toorn, and T. Podella in *Theologische Quartalschrift* 177/2 (1997).

19. Bloch-Smith, *Judahite Burials and Beliefs about the Dead*; see also her article, “The Cult of the Dead in Judah,” *JBL* 111 (1992), 213–24. See the responses in A. Cooper and B. R. Goldstein, “The Cult of the Dead and the Theme of Entry into the Land,” *Biblical Interpretation* 1/3 (1993), 285–303, esp. 301 n. 37; and R. Tappy, “Did The Dead Ever Die in Biblical Judah?” *BASOR* 298 (1995), 59–68.

20. See Smith, “Kothar wa-Hasis, the Ugaritic Craftsman God” (Ph.D. diss, Yale University, 1985), 466, 468; Pardee, “Kosharoth,” *DDD* 491–92.

21. So Smith, “Kothar wa-Hasis, the Ugaritic Craftsman God,” 469; Pardee, “Kosharoth,” *DDD* 492. On the root, the most sustained treatment remains Smith, “Kothar wa-Hasis, the Ugaritic Craftsman God,” 51–81.

22. For example, *’ilhm b’lm* in 1.39.5, 9; 1.41.12; and *’iltm hnqtm* 1.102.13. On *’ilhm*, see the proposal of O. Loretz, “Die Teraphim als

‘Ahnes-Götter-Figur(in)en’ im Lichte der Texte aus Nuzi, Emar und Ugarit: Anmerkungen zu *’ilānu, ilhm/’lhym* und DINGER.ERIN.MEŠ/*inš ilm,” UF* 24 (1992), 156–61. For an important older survey, see J. C. de Moor, “The Semitic Pantheon,” *UF* 2 (1970), 187–228.

23. De Moor, “The Semitic Pantheon of Ugarit,” 187–228, esp. 227–28.

24. See Greenstein in *UNP* 25 and 45 n.66.

25. *ANET* 15. The value of this evidence for Anat as Baal’s consort has been challenged, however, by H. Te Velde (*Seth, God of Confusion: A Study of his Role in Egyptian Mythology and Religion* [Problem der Ägyptologie 6; Leiden: Brill, 1967], 29–30), seconded by Walls (*The Goddess Anat in Ugaritic Myth*, 144–52) and P. L. Day (“Anat: Ugarit’s ‘Mistress of Animals,’” *JNES* 51 [1992], 186). See also Day, “Why is Anat a Warrior and Hunter?” *The Bible and the Politics of Exegesis: Essays in Honor of Norman K. Gottwald on His Sixty-Fifth Birthday* (ed. D. Jobling, P. L. Day, and G. T. Sheppard; Cleveland, OH: Pilgrim Press, 1991), 141–46, 329–32. Te Velde’s chief argument is that other than in this one text Anat is not called the consort of Seth. The uniqueness of this rendering of Anat as the wife of Seth might be viewed as militating in favor of its authenticity as a witness to the West Semitic tradition. However, this need not apply at Ugarit, if marriage is a rarity among the members in the second tier of the pantheon.

26. *ANET* 200–01. For further examples of the identification of Seth with Baal in New Kingdom Egypt, see *ANET* 249. A single figure from Memphis served as the prophet of Baal and Astarte (*ANET* 250 n. 13), which perhaps also illustrates the close relationship between Baal and Astarte and their cult in Memphis during New Kingdom times. The identification of Seth and Baal may be reflected in the divine name Bolchoseth, found on amulets, *defixiones*, and in formularies dating to the Hellenistic-Roman period. For discussion, see J. G. Gager (ed.), *Curse Tablets and Binding Spells from the Ancient World* (New York: Oxford University Press, 1992), 266.

27. For a full listing, including additional examples from ritual texts, see de Moor, “The Semitic Pantheon,” 227–28. On the pairings in 1.100, see B. A. Levine and J. M. de Tarragon, “<<Shapshu Cries out in Heaven>>: Dealing with Snake-Bites at Ugarit,” *RB* 95 (1988), 505–06.

28. Cf. F. M. Cross, “The ‘Olden Gods’ in Ancient Near Eastern Creation Myths,” *Magnalia Dei. The Mighty Acts of God: Essays on the Bible and Archaeology in Memory of G. Ernest Wright* (ed. F. M. Cross, W. E. Lemke, and P. D. Miller, Jr.; Garden City, NY: Doubleday, 1976), 329–38; idem, *From Epic to Canon*, 74–83.

29. De Moor, “The Semitic Pantheon of Ugarit,” 227–28.

30. See S. M. Olyan, *Asherah and the Cult of Yahweh in Israel* (SBLMS 34; Altanta, GA: Scholars, 1988), 10, 30, 39–40, 48, 55–56, 59.

31. Del Olmo Lete, *Canaanite Religion*, 51–52, 65 n. 57.

32. In contrast, this title is viewed as original to the “Jahwist source” by T. L. J. Mafico, “The Divine Compound Name יְהוָה אֱלֹהִים and Israel’s Monotheistic Polytheism,” *JNWSL* 221 (1996), 155–73. Mafico takes the second part of the name as representing the gods of the ancestors of various tribes as “primarily a political move employed to unite all the ethnic groups of Israel under the monarchy” (p. 161), a change he would attribute to the “Yahwist.”

33. On Genesis 1’s “monotheistic poetics,” see the final section of chapter 1.

34. For text and translation, see Pardee, “RS 1.005 and the Identification of the *gtrm,*” 301–02.

35. See M. Dietrich and O. Loretz, “*Jahwe und seine Aschera*,” 39–76; Xella, “Le dieu et<<sa>> déesse,” 599–610, esp. 607–08. Xella relates this usage also to examples from Ebla. See also del Olmo Lete, *Canaanite Religion*, 289 n. 109.

36. Pardee, “RS 1.005 and the Identification of the *gṯrm,*” 309. See also his extensive remarks in his review of M. Dietrich and O. Loretz, “*Jahwe und seine Aschera,*” *JAOS* 115 (1995), 301–03.

37. See *EHG* 90–91.

38. For a discussion of the archaeology of this site as well as its finds (as well as comparable evidence at Khirbet el-Qom), see A. Mazar, *Archaeology of the Land of the Bible 10,000–586* B.C.E. (ABRL; New York: Doubleday, 1990), 446–50. For discussions of the inscriptions, see J. A. Emerton, “New Light on Israelite Religion: The Implications of the Inscriptions from Kuntillet ‘Ajrud,” *ZAW* 94 (1982), 2–20; M. Weinfeld, “Kuntillet ‘Ajrûd Inscriptions and Their Significance,” *SEL* 1 (1984), 121–30; P. K. McCarter, “Aspects of the Religion of the Israelite Monarchy: Biblical and Epigraphic Data,” *Ancient Israelite Religion: Essays in Honor*

of Frank Moore Cross (ed. P. D. Miller, Jr, P. D. Hanson, and S. D. McBride; Philadelphia: Fortress, 1987), 137–55; idem, "The Religious Reforms of Hezekiah and Josiah," *Aspects of Monotheism: How God Is One* (ed. H. Shanks and J. Meinhardt; Washington, DC: Biblical Archaeology Society, 1997), 74–80; S. M. Olyan, *Asherah and the Cult of Yahweh in Israel* (SBLMS 34; Atlanta, GA: Scholars, 1988), 23–34; J. M. Hadley, *The Cult of the Goddess in Ancient Israel and Judah: The Evidence for a Hebrew Goddess* (University of Cambridge Oriental Publications series vol. 57; Cambridge University Press, 2000); idem, "Some Drawings and Inscriptions on Two Pithoi from Kuntillet 'Ajrud," *VT* 37 (1987), 180–213; idem, "The Khirbet el-Qom Inscription," *VT* 37 (1987), 50–62; idem, "Chasing Shadows? The Quest for the Historical Goddess," Congress *Volume: Cambridge 1995* (ed. J. A. Emerton; Leiden: Brill, 1997), 169–84; S. A. Wiggins, "The Myth of Asherah: Lion Lady and Serpent Goddess," *UF* 23 (1991), 383–94; idem, A *Reassessment of 'Asherah': A Study According to the Textual Sources of the First Two Millennia* B.C.E. (AOAT 235; Kevelaer: Butzon & Bercker; Neukirchen Vluyn: Neukirchener, 1993); Dietrich and Loretz, *"Jahwe und seine Aschera"*, 77–133; Keel and Uehlinger, *Gods, Goddesses, and Images of God in Ancient Israel*, 228–48, 332, 369–70; C. Frevel, *Aschera und der Ausschliesslichkeitanspruch YHWHs* (BBB 94; two vols.; Weinheim: Beltz Athenäum, 1995); the response to Frevel in Keel, *Goddesses and Trees, New Moon and Yahweh: Ancient Near Eastern Art and the Hebrew Bible* (JSOTSup 262; Sheffield: Sheffield Academic Press, 1998); and P. Merlo, *La dea Ašratum—Aṯiratu—Ašera: Un contributo alla storia della religione semitica del Nord* (Mursia: Pontificia Università Lateranese, 1998). See also the survey in S. A. Wiggins, "Asherah Again: Binger's Asherah and the State of Asherah Studies," *JNWSL* 24 (1998), 231–40.

39. Gitin, "Cultic Inscriptions Found in Ekron," *BA* 53/4 (December 1990), 232. For the difficulties in using this term for the cultural features of this region in the Iron Age, see S. Bunomowitz, "Problems in the 'Ethnic' Identification of the Philistine Culture," *TA* 17 (1990), 210–22. L. E. Stager has suggested "neo-Philistine" (personal communication).

40. J. Naveh, "Writing and Scripts in Seventh Century B.C.E. Philistia: The New Evidence from Tell Jemmeh," *BASOR* 35 (1985), 8–21. The 1992 excavations at Ashqelon uncovered an inscription of a grain receipt that F.

M. Cross compares in script to the inscriptions at Tell Jemmeh and Tell Shariah (information courtesy of L. E. Stager).

41. For the following information I am indebted to S. Gitin, Director of the W. F. Albright Institute in Jerusalem and co-director of the excavations at Ekron-Tel Miqne. See his article, "Seventh Century B.C.E. Cultic Elements at Ekron," *Congress on Biblical Archaeology 1990* (Jerusalem: Israel Exploration Society, 1993), 248–58. See also Halpern, "Jerusalem and the Lineages in the Seventh Century BCE: Kinship and the Rise of Individual Moral Liability," *Law and Ideology in Monarchic Israel* (ed. B. Halpern and D. W. Hobson; JSOTSup 124; Sheffield: JSOT, 1991), 46–47 n. 1.

42. The evidence for *qdš* as an epithet of Asherah is problematic since final feminine *-t* would be expected for a goddess's title (so Wyatt, "Asherah," *DDD* 100), despite the name of Qudšu in the Winchester plaque (see later). The divine council is called *'ilm//bn qdšm*. The first word is the common word for "gods." The second is either a general designation, "the holy ones" (*EUT* 44; cf. *qdšm*, "gods," in KAI 4:4–5), or "the sons of Qdš," i.e., Athirat (*CML*^{2} 41, 156; J. C. de Moor, *An Anthology of Religious Texts from Ugarit* [Nisaba 16; Leiden: Brill, 1988], 32 n. 140). In the latter case, the divine council would be tantamount to the "seventy sons of Athirat" (KTU 1.4 VI 46). The word *qdš* in KTU 1.14 IV 34 is "sanctuary" and not a divine title (so *CMHE* 33 n. 124), and *qdš* in the title *ltpn w-qdš* may refer to El and not Athirat (so *EUT* 43). D. B. Redford ("New Light on the Asiatic Campaign of Horemheb," *BASOR* 211 [1973], 46) takes *qi-di[d-šu*] as a deity in *Ugaritica V*, text 137, iv a 14, but according to J. Huehnergard (*Ugaritic Vocabulary in Syllabic Transcription* [HSS 32; Atlanta, GA: Scholars, 1987], 173) the word means "sanctuary, shrine," given the Hurrian equivalent provided, *ḫa-ma-ar-re*, the definite form of the Hurrian noun *ḫamri*, "sanctuary." The Winchester plaque (I. E. S. Edwards, "A Relief of Qudšu-Astarte-Anath in the Winchester College Collection," *JNES* 14 [1955], 49–51) contains the names Qudšu-Astarte-Anat. Albright ("Some Observations on the New Material for the History of the Alphabet," *BASOR* 134 [1954], 26), Cross (*CMHE* 33–34), Olyan (*Asherah*, 40 n. 6), and R. Hestrin ("The Lachish Ewer and the 'Asherah," *IEJ* 37 [1987], 218) consider Qudšu to be an epithet of Athirat by a process of elimination, for Astarte and Anat appear after Qudšu in the inscription. Olyan calls the representation on the plaque "a triple-fusion hypostasis." Others scholars

take *qdš* as a title of either Astarte or Anat, however (see discussion in Olyan, *Asherah*, 40 n. 6). For extensive criticism of the identification of *qdš* as Asherah, see S. A. Wiggins, "The Myth of Asherah, 383–89.

43. See S. Gitin, "Ekron of the Philistines. Part II: Olive Suppliers to the World," *Biblical Archaeology Review* 16/2 (March/April 1990), 59 n. 18; idem, "Cultic Inscriptions Found in Ekron," 232.

44. Gitin, "Seventh Century B.C.E. Cultic Elements at Ekron," 248–58.

45. W. R. Garr, *Dialect Geography of Syria-Palestine, 1000–586 B.C.E.* (Philadelphia: University of Pennsylvania Press, 1985), 60–61, 94.

46. One might use the term "Philistian" rather than "Philistine" for the culture in the area of Philistia during this period, but the potential confusion as a specific ethnic designation remains. See Bunomowitz, "Problems in the 'Ethnic' Identification of the Philistine Culture," 210–22.

47. Information courtesy of Dr. S. Gitin.

48. See *CMHE* 33–35. See also S. Ackermann, *Under Every Green Tree: Popular Religion in Sixth-Century Judah* (HSM 46; Atlanta, GA: Scholars, 1992), 191. For criticisms, see Wiggins, "The Myth of Asherah, 383–89.

49. See S. Gitin, T. Dothan, and J. Naveh, "A Royal Dedicatory Inscription from Ekron," *IEJ* 47 (1997), 1–16. See also A. Demsky, "The Name of the Goddess of Ekron: A New Reading," *JANES* 25 (1997), 1–5; "Discovering a Goddess," *Biblical Archaeologist Review* 24/5 (1998), 53–58. Demsky reads the enigmatic name taken as *ptgyh* by Gitin et al. as *ptnyh*, known in Greek as *potnia*, a title meaning "mistress" or "lady." Demsky suggests further that this title here may refer to Asherah.

50. We are now predisposed to such conclusions reflecting contemporary interest in the worship of goddesses, whether in prehistoric or historical times. For interesting reflection on methodological issues attending this area of research, see J. Wood, "The Concept of the Goddess," *The Concept of the Goddess* (ed. S. Billington and M. Green; London:Routledge, 1996), 8–25. She makes one particularly interesting point that the idea of the goddess drives the research agenda as Victorian anthropology was driven by Sir James George Frazer. Comparing the two, Wood comments (p. 13): "Indeed, so similar are the assumptions and the methodology of many Goddess-studies that, in her universality and persistance, the Goddess resembles Frazer's Dying god, resuscitated once

again and cross dressed." Frazer's work is discussed at considerable length in chapter 6, sections 1 and 2.

51. See EHG 80–97; and C. Frevel, *Aschera und der Ausschliesslichkeitanspruch YHWHs*.

52. See Olyan, *Asherah*, 23–34.

53. See Olyan, *Asherah*, 23–34.

54. See *EHG* 80–97.

55. See Pardee, Review of M. Dietrich and O. Loretz, "*Jahwe und seine Aschera,*" 301–03; Frevel, *Aschera und der Ausschliesslichkeitanspruch YHWHs*. F. M. Cross too has commented: "In any case I must reject any attempt to make it a proper name." He prefers a position closer to the view of another former student of his, P. K. McCarter, that the asherah was "a conventionalized tree of life, a cult object, or a hypostasis of an aspect of 'EI." Finally, he comments: "If you want syncretism in the Hebrew Bible, there is plenty of material to be found without manufacturing it" (all three quotes are taken from a letter to me dated 7 December 1998). For McCarter's view, see his articles, "Aspects of the Religion of the Israelite Monarchy" and "The Religious Reforms of Hezekiah and Josiah." Compare Keel and Uehlinger, *Gods, Goddesses, and Images of God in Ancient Israel*, 228–48, 332, 369–70; Keel, *Goddesses and Trees*; Merlo, *La dea Ašratum—Aṯiratu—Ašera*. The last of these contains other relevant bibliography. Keel and Uehlinger dubiously combine two views, that the symbol of the asherah lost its associations to the goddess by the eighth century, only to regain them by the second half of the seventh century.

56. See M. D. Coogan, *Stories from Ancient Canaan* (Philadelphia: Westminster, 1978), 74; Olyan, *Asherah*, 48. *Šu-um* appears as a divinity at Ebla; see P. Xella, "Aspekte religiöser Vorstellungen in Syrien nach den Ebla-und Ugarit-Texten," *UF* 15 (1983), 290; R. R. Stieglitz, "Ebla and the Gods of Canaan," *Eblaitica: Essays on the Ebla Archives and Eblaite Language* (ed. C. H. Gordon and G. A. Rendsburg; two vols.; Winona Lake, IN: Eisenbrauns, 1990), 2.81; F. Pomponio and P. Xella, *Les dieux d'Ebla: Étude analytique des divinités éblaïtes à l'époque des archives royales du IIIe millénaire* (AOAT 245; Münster: Ugarit-Verlag, 1997), 503–05. The element **šm* is attested in second and first millennium proper names, including Amorite names (H. Huffmon, *Amorite Personal Names in the Mari Texts: A Structural and Lexical Study* [Baltimore/London: Johns

Hopkins, 1965], 248–49), Akkadian names from Ugarit (F. Gröndahl, *Die Personennamen der Texte aus Ugarit* [Studia Pohl l; Rome: Päpstliches Bibelinstitut, 1967], 193–94), and Phoenician and Hebrew names (see F. M. Cross, "Newly Found Inscriptions in Old Canaanite and Early Phoenician Scripts," *BASOR* 238 [1980], 3).

57. So noted by N. H. Walls, *The Goddess Anat in the Ugaritic Texts* (SBLDS 135; Atlanta, GA: Scholars, 1992), 117. Cf. Olyan, *Asherah*, 48. D. Fleming argues for a pairing of Baal and Athtart at Emar, but the evidence is presently meager. See D. Fleming, *The Installation of Baal's High Priestess at Emar: A Window on Ancient Syrian Religion* (HSS 42; Atlanta, GA: Scholars, 1992), 214–21, 293.

58. See *TO* 1.94. For Astarte in Egyptian sources, see J. Leclant, "Astarté à cheval d'après les représentations égyptiennes," *Syria* 37 (1960), 1–67.

59. *CMHE* 30.

60. Mullen, *The Divine Council*, 120.

61. For McCarter, see the discussion later in this section.

62. Olyan, *Asherah*, 48: "an early example of hypostasization in Canaanite religion, which directly associates her with Baal, as a manifestation of his name essence."

63. These scholars would identify other examples of hypostasis in Levantine religion. For further proposals, see M. Weinfeld, "Semiramis: Her Name and Her Origin," *Ah, Assyria; Studies in Assyrian History and Ancient Near Eastern Historiography Presented to Hayim Tadmor* (ed. M. Cogan and I. Eph'al; Scripta Hierosolymitana 33; Jerusalem: Magnes, 1991), 99–103, esp. 100; M. Barker, *The Great Angel: A Study of Israel's Second God* (London: SPCK, 1992), 97–102. See also Derketo as a fish in *De Dea Syria* 14 (Attridge and Oden, *The Syrian Goddess (De Dea Syria) Attributed to Lucian* [Texts and Translations 9, Graeco-Roman Religion Series 1; Missoula, MT: Scholars Press, 1976], 23). D. Pardee would apply the term "hypostasis" for various manifestations of Athtart (*ʿṯrt ḫr* in KTU 1.43.1, and *ʿṯrt šd* in KTU 1.91.10 and 1.148.18); see Pardee, "*Marziḥu*, *Kispu*, and the Ugaritic Funerary Cult: A Minimalist View," *Ugarit, Religion and Culture: Proceedings of the International Colloquium on Ugarit, Religion and Culture. Edinburgh, July 1994. Essays Presented in Honour of Professor John C. L. Gibson* (ed. N. Wyatt, W. G. E. Watson, and J. B. Lloyd; UBL 12; Münster: Ugarit-Verlag, 1996), 277. On the other

hand, manifestations of a deity are precisely what the biblical material shows for the name-hypostasis (see section 5).

64. Attridge and Oden, *Philo of Byblos*, 54–55.

65. Olyan, *Asherah*, 48.

66. For the West Semitic and biblical evidence, see especially S. D. McBride, “The Deuteronomic Name Theology” (Ph.D. diss., Harvard University, 1969).

67. T. H. Gaster, *Thespis; Ritual, Myth, and Drama in the Ancient Near East* (New York: Norton, 1977), 156; P. G. Mosca, “Child Sacrifice in Canaanite and Israelite Religion; A Study in Mulk and מלך,” (Ph.D. diss., Harvard University, Cambridge, 1975), 195–223; *EHG* 100–01; M. Barker, *The Great Angel: A Study of Israel’s Second God* (London: SPCK, 1992) 97. See NJPS n. i to this verse.

68. C. T. L. Kloos, *Yhwh’s Combat with the Sea: A Canaanite Tradition in the Religion of Ancient Israel* (Amsterdam: G. A. van Oorschot; Leiden: Brill, 1986) 33.

69. The eastward storm theophany in Psalm 29 moves from the Mediterranean Sea across the Lebanon, the Anti-Lebanon, and into the Syrian desert. The storm theophany of the psalm, the archaic form of the language, and the northern referents in the psalm would suit either a non-Israelite background or a northern Israelite provenance. Ginsberg, Gaster, Cross, and Fitzgerald suggest that Psalm 29 was originally a “Canaanite” hymn to Baal (for discussion, see J. L. Cunchillos, *Estudio del Salmo 29, Canto al Dos de la fertilidad-fecundidad. A portación al conocimiento de la Fe de Israel a su entrada en Canaan* (Valencia: San Jerónimo, 1976) 163–68; A. Fitzgerald, “A Note on Psalm 29,” *BASOR* 215 [1974], 61–63; J. Day, *God’s Conflict with the Dragon and the Sea: Echoes of a Canaanite Myth in the Old Testament* (University of Cambridge Oriental Publications Series, 35; Cambridge: Cambridge University Press, 1985) 58). According to Fitzgerald, the higher level of alliteration achieved by substituting the name of Baal for Yahweh in this psalm shows that it was originally a “Canaanite” psalm. Furthermore, the expression *midbar qādēš* in Psalm 29:8 recalls *tk mdbr qdš*, possibly translated either as “in the midst of the holy outback” or “in the outback a sanctuary,” in CAT 1.23.65. The other place-names apparently suit a Syrian site for *midbar qādēš* in Psalm 29:8 better than the traditional southern site named Kadesh (noted by many commentators; see *CMHE* 154 n. 37; cf. Day, *God’s Conflict*, 60 n. 169).

70. *CMHE* 153 n. 30, 165–67; M. Weinfeld, “Divine Intervention in War in Ancient Israel and the Ancient Near East,” *History, Historiography and Interpretation: Studies in Biblical and Cuneiform Literatures* (ed. H. Tadmor and M. Weinfeld; Jerusalem: Magnes; Leiden: Brill, 1986), 132–36.

71. Isaiah 63:9 attests the notion of the “face” (*pānîm*) as warrior. For discussion, see T. N. D. Mettinger, *The Dethronement of Sabaoth: Studies in the Shem and Kabod Theologies* (ConBOT 18; Lund: Gleerup, 1982), 124; *EHG* 100–01; A. Rofé, “Isaiah 59:19 and Trito-Isaiah’s Vision of Redemption,” *The Book of Isaiah. Le Livre d’Isaïe: Les oracles et leur relectures. Unité et complexité de l’ouvrage* (BETL 81; Leuven: University Press/Uitgeverij Peeters, 1989), 407. For the name as warrior in Judaism and Christianity in the Greco-Roman period, see the recent but flawed discussion of Barker, *The Great Angel*, 208–12. Barker claims that Revelation 19:15 presents the figure of Jesus as the hypostasis of the name, but in fact this figure receives the name of “The Word of God” (RSV). If any “hypostasis” is involved in this passage, it involves the word. Barker also includes as a “hypostasis” the notion of Jesus representing the name of the Father (John 17:6) as well as the notion of putting on the name. It is unclear if or how these phenomena are related.

72. The line is generally taken to mean that the worshippers in the temple “say glory” (NJPS, NRSV) or “cry glory” (RSV). It is possible that such a liturgical response to the coming theophany could take place, but more in keeping with the notion of biblical theophanies is not the proclamation but the appearance of glory. The apparent impediment to this interpretation in this context would be the semantics of the root *’mr, which generally means “to say.” However, “to see” is one meaning of Ugaritic *’*mr* (CAT 1.3 I 22) and Akkadian *amāru*. Cross (*CMHE* 154 n. 39) cites the Ugaritic proper name, *a-mur-*^{d}*ba‘l*, “I saw Baal”; see also R. de Vito, *Studies in Third Millennium Sumerian and Akkadian Personal Names: The Designation and Conception of the Personal God* (Studia Pohl: Series Maior 16; Rome: Editrice Pontificio Istituto Biblico, 1993), 192, 279; *PTU* 320). For the verb *’*mr*, see J. Barr, “Etymology and the Old Testament,” *Language and Meaning: Studies in Hebrew Language and Biblical Exegesis* (OTS 19; Leiden: Brill, 1974), 5–6; T. Abusch, “Alaktu and Halakhah: Oracular Decision, Divine Revelation,” *HTR* 80 (1987), 25. *Amur-names* are also attested in Mesopotamian and Eblaite personal names. See de Vito, *Studies in Third Millennium Sumerian and Akkadian Personal*

Names, 192, 279; P. Fronzaroli, “Eblaic Lexicon: Problems and Appraisal,” *Studies on the Language of Ebla* (ed. P. Fronzaroli; Quaderni de Semitistica 13; Florence: Istituto di Linguistica e di Lingue Orientali, 1984), 120. The form of the verb in Psalm 29:9 is perhaps then a passive-stative **qatul*. In any case, the Masoretes no longer knew the older meaning of **’mr* and interpreted this instance according to its better-known sense; interpreters have generally followed suit.

73. Other BH examples include Psalm 8:8; 2 Samuel 2:9; Isaiah 16:7; Jeremiah 18: 31; Ezekiel 29:2; 35:15; Job 34:13 (arguably Numbers 16:3 as well); see J. C. de Moor and P. van der Lugt, “The Spectre of Pan-Ugaritism,” *BibOr* 31 (1974), 9. The postpositive constructive is known also in Ugaritic (CAT 1.3 VI 14; 1.6 I 65; 1.14 IV 20; often reconstructed in 1.1 III 1* on the basis of 1.3 VI 14) and Aramaic (KAI 215:17; 222 A 5; Peshitta Lev 8:21; Peshitta Num 14:21). See I. Avinery, “The Position of the Declined *kl* in Syriac,” *Afroasiastic Linguistics* 3/5 (1976), 25. The usage is not restricted to place names: Psalm 8:8 uses it after two words for animals; CAT 1.6 I 65 employs it after *’ar*ṣ, “land,” and CAT 1.14 IV 20 uses it in a temporal construction. Syriac attests *ldkr’ klh*, “the whole ram” (Peshitta Lev 8:21) and *b’r‘’ kwlh*, “in all the earth” (Peshitta Num 14:21). For further discussion, see Avinery, “The Position of the Declined *kl* in Syriac,” 25. There is no text-critical, grammatical, or poetical basis for its deletion from Psalm 29:9. Cf. *CMHE* 154 n. 39, which dismisses the form as “prosaic.”

74. McCarter, “Aspects of the Religion of the Israelite Monarchy, 147.

75. See Gröndahl, *Die Personennamen*, 31, 193–94, 355.

76. See *CMHE* 11; R. S. Hess, *Amarna Personal Names* (American Schools of Oriental Research Dissertation Series 9; Winona Lake, IN: Eisenbrauns, 1993), 145–46, 212. For a personal name with **šm* as a theophoric element in an arrowhead inscription thought to date to the eleventh century, see R. Deutsch and M. Heltzer, *New Epigraphic Evidence from the Biblical Period* (Tel Aviv/Jaffa: Archaeological Center Publication, 1995), 14. Although the arrowheads discussed by F. M. Cross (“The Arrow of Suwar, Retainer of ‘Abday,” *EI* 25 [1996] 9*–17* do not include this inscription, he does note the problem of forgeries of arrowheads, a problem that may apply in this instance. The photograph for the obverse is very unclear, which complicates resolution of the issue.

77. See chapter 2, section 2.

78. See B. F. Batto, “Zedeq,” *DDD* 929–34.

79. The evidence from personal names at Ugarit is inconclusive; see Gröndahl, *Die Personennamen*, 148. For the element **kabid-* as a theophoric element in Ebla and Amarna personal names, see Stieglitz, “Ebla and the Gods of Canaan,” 82; Pomponio and Xella, *Les dieux d’Ebla*, 174.

80. The entry of J. E. Fossum, “Glory,” in *DDD* 348–52 omits discussion of the older Levantine evidence.

81. J. S. Kselman and M. L. Barré, “Psalms,” *NJBC* 1.533.

82. For the biblical material, see D. P. Wright, “Holiness, Sex, and Death in the Garden of Eden,” *Bib* 77 (196), 305–29. For the possibility of the notion of sacred garden lying behind the Ugaritic use of *n‘m*, see also chapter 1, section 2, and chapter 5, section 3.

83. Del Olmo Lete, *Canaanite Religion*, 119 n. 123.

84. See B. A. Levine and J. M. de Tarragon, “The King Proclaims the Day: Ugaritic Rites for the Vintage (*KTU* 1.41//1.87),” *RB* 100 (1993), 97; Wyatt, *Religious Texts from Ugarit*, 353 n. 42.

85. Cross, “The ‘Olden Gods’ in Ancient Near Eastern Creation Myths,” 330. Cross’s disclaimer that the Ugaritic ritual texts do not attest to olden gods such as “heaven and earth” may now be modified by reference to 1.47.12 = 1.118.11 and 1.148.24. See further M. Hutter, “Heaven,” *DDD* 388.

86. See Healey, “The Akkadian ‘Pantheon’ List from Ugarit,” *SEL* 2 (1985), 120.

87. Jacobsen, “Foreword” in Y. Muffs, *Love & Joy: Law, Language and Religion in Ancient Israel* (New York: Jewish Theological Seminary of America, 1992), xix. For extensive discussion of divinized cult items in Mesopotamia, see G. J. Selz, “The Holy Drum, the Spear, and the Harp. Towards an Understanding of the Problems of Deification in the Third Millennium Mesopotamia,” *Sumerian Gods and Their Representations* (ed. I. L. Finkel and M. J. Geller; Cuneiform Monographs 7; Groningen: Styx, 1997), 167–213.

88. These generalizations are not intended to preclude a variety of other means of conceptual unity within Mesopotamia. Another that comes to mind is the equation of the parts of Marduk’s, Ninurta’s, or Ishtar’s body with other deities, as indicating that these deities literally embody the others. See chapter 5, section two for discussion.

89. See chapter 5, section 2 for discussion.

90. Cf. triads of deities described in familial terms in Egyptian religion. See S. Morenz, *Egyptian Religion* (trans. A. E. Keep; Ithaca, NY: Cornell University Press, 1992), 142–46. Reference courtesy of T. J. Lewis.

91. Pardee, "Ugarit. Texts and Literature," *ABD* 6:713. See further J. D. Schloen, "The Patrimonial Household in the Kingdom of Ugarit: A Weberian Analysis of Ancient Near Eastern Society" (Ph.D. diss., Harvard University, 1995), 66. Note also the central importance of the family in both Keret and Aqhat.

92. See L. E. Stager, "The Archeology of the Family in Ancient Israel," *BASOR* 260 (1985), 1–35. See also C. Meyers, "'To Her Mother's House': Considering a Counterpart to the Israelite *Bêt 'āb*," *The Bible and the Politics of Exegesis: Essays in Honor of Norman K. Gottwald on His Sixty-Fifth Birthday* (ed. D. Jobling, P. L. Day, and G. T. Sheppard; Cleveland, OH: Pilgrim Press, 1991), 39–51.

93. For evidence and argument, see B. Halpern, "Sybil, or the Two Nations? Archaism, Kinship, Alienation, and the Elite Redefinition of Traditional Culture in Judah in the 8th–7th Centuries B.C.E.," *The Study of the Ancient Near East in the Twenty-First Century: The William Foxwell Albright Centennial Conference* (ed. J. S. Cooper and G. M. Schwartz; Winona Lake, IN: Eisenbrauns, 1996), 291–338; J. Blenkinsopp, "The Family in First Temple Israel," in L. Perdue et al., *Families in Ancient Israel* (The Family, Religion, and Culture series; Louisville, KY: Westminster John Knox, 1997), 88–92. See further K. van der Toorn, *Family Religion in Babylonia, Syria and Israel: Continuity and Change in the Forms of Religious Life* (Studies in the History and Culture of the Ancient Near East 7; Leiden: Brill, 1996), 362, 371–72.

94. J. J. Collins, "Marriage, Divorce, and Family in Second Temple Judaism," in L. Perdue et al., *Families in Ancient Israel*, 105.

95. Reference courtesy of S. Olyan. See Geller, "The God of the Covenant," 298.

96. See B. Halpern, "Jerusalem and the Lineages in the Seventh Century BCE: Kinship and the Rise of Individual Liability," *Law and Ideology in Monarchic Israel* (ed. B. Halpern and D. W. Hobson; JSOTSup 124; Sheffield: Sheffield Academic Press, 1991), 11–15. See further Halpern, "Sybil, or the Two Nations?" 295, 317–18, 323, 326; and Geller, "The God of the Covenant," 298.

97. As noted independently by Geller, “The God of the Covenant,” 298. See Halpern, “Jerusalem and the Lineages in the Seventh Century BCE,” 11–107. See further Halpern, “Sybil, or the Two Nations?” 291–338.

98. De Moor, “The Crisis of Polytheism in Late Bronze Ugarit,” *OTS* 24 (1986), 1; and *The Rise of Yahwism: The Roots of Israelite Monotheism* (revised and enlarged edition; Bibliotheca Ephemeridum Theologicarum Lovaniensium XCI; Leuven: University Press/Uitgeverij Peeters, 1997), 71. This is not to deny that elite members of the culture may not have explored the problems of religious existence. For further discussion, see Introduction, section 2.

99. For some preliminary reflections in this direction, see *UBC* 96–114; M. S. Smith, “Myth and Mythmaking in Canaan and Ancient Israel,” *Civilizations of the Ancient Near East* (ed. J. M. Sasson; four vols.; New York: Scribner’s/Macmillan, 1995), 3.2032–33; and part 2 of this work.

5. The Traits of Deities

1. For comparable reflections for Mesopotamia, see J. Black, “The Slain Heroes—Some Monsters of Ancient Mesopotamia,” *Society for Mesopotamian Studies Bulletin* 15 (1988), 19–20. For a broader study of many of these characteristics in the ancient Near East, see K. van der Toorn, “God (I),” *DDD* 352–65. See also R. C. van Leeuwen, “The Background to Proverbs 30:4aα,” *Wisdom, You Are My Sister: Studies in Honor of Roland E. Murphy, O. Carm., on the Occasion of His Eightieth Birthday* (ed. M. L. Barré; CBQMS 29; Washington, DC: Catholic Biblical Association of America, 1997), 102–20; note especially his comment on p. 20: “The main purpose of the topos [of ascent to heaven] is to reaffirm the great gulf that separates humans from the divine realm and prerogatives of deity, such as immorality, superhuman knowledge, wisdom and power.” None of these studies addresses at any great length the Ugaritic evidence pertaining to divine characteristics. For an important comprehensive listing with discussion, see M. C. A. Korpel, A *Rift in the Clouds: Ugaritic and Hebrew Descriptions of the Divine* (UBL 8; Münster: Ugarit-Verlag, 1990). On the issue of knowledge and wisdom, see the next note.

2. I would be inclined to include knowledge and wisdom as a fifth characteristic. However, the Ugaritic texts do not present knowledge and wisdom as general aspects of divinity. Moreover, the number of Ugaritic personal names denoting wisdom and knowledge is quite limited (see Gröndahl, *Die Personennamen*, 142–43 for **yd‘*; **ḫss* does not appear in Gröndahl’s listing). Instead, they are concentrated in the figures of El and to a lesser extent Kothar (based on his technological expertise). On the wisdom of El, see *EUT* 42–43; M. Dietrich and O. Loretz, “Die Weisheit des ugaritisches Gott El im Kontext der altorientalisches Weisheit,” *UF* 24 (1992), 31–38. Regarding Kothar’s wisdom, see Smith, “Kothar wa-Hasis, the Ugaritic Craftsman God,” 85–90. To be sure, other deities such as Baal may have been thought to possess special knowledge unknown to humans; so P. Xella, “La >>sagesse<< de Baal,” *Ana šadî Labāni lu allik: Beiträge zu orientalischen und mittelmeerischen Kulturen. Festschrift für Wolfgang Röllig* (ed. B. Pongratz-Leisten, H. Kühne, and P. Xella; AOAT 247; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener, 1997), 435–46. J. C. de Moor discusses divine “foreknowledge” as a general

feature of “the great gods of Ugarit” (de Moor, *The Rise of Yahwism: The Roots of Israelite Monotheism* [sec. ed.; ETL XCI; Leuven: University Press/Uitgeverij Peeters, 1997], 85–87). Features that de Moor takes as theologically significant strike me at times as literary matters: El’s caution to Yamm and his so-called unwillingness to help him heighten the tension of the narrative, to my mind. However, missing on the whole from Ugaritic myths are any general statements about the wisdom or knowledge of the deities. In contrast, a particular stress is placed on knowledge and wisdom in Mesopotamian and Israelite texts. In Gilgamesh the woman tells Enkidu: “You are wise, Enkidu, and you have become like a god” (Gilgamesh 4:34; *ANET* 75). In addition to Genesis 3:22, wisdom texts such as Job 11:7–8 and Sirach 1:3, 8 acknowledge this divine feature. For discussion, see R. C. van Leeuwen, “The Background to Proverbs 30:4aα,” 107–08. See also the title “God of knowledge” (1 Samuel 2:3) echoed in 1QH 1:27, 12:10, 13:18, etc.; for additional listings, see *The Dictionary of Classical Hebrew: Volume II*. רב (ed. D. J. A. Clines, J. Elwolde, Executive Editor; Sheffield: Sheffield Academic Press, 1995), 456. Knowledge also obtains among angels (2 Samuel 14:17, cf. 1 Peter 1:12); see further R. Kasher, “Angelology and the Supernal Worlds in the Aramaic Targums to the Prophets,” *Journal for the Study of Judaism in the Persian, Hellenistic, and Roman Periods* 27/2 (1996), 176. Accordingly, this category might represent an “isogloss of divinity” between Ugaritic, on the one hand, and, on the other, Mesopotamian and Israelite texts. Note also the limits on divine knowledge in the Bible, discussed by M. Carasik, “The Limits of Omniscience,” *JBL* 119 (2000), 221–32.

3. Caquot and Sznycer, *Ugaritic Religion*, 23, plates VII, VIII. See also O. Negbi, *Canaanite Gods in Metal* (Tel Aviv: Tel Aviv University, Institute of Archaeology, 1976), 46; and N. Wyatt, “The Stela of the Seated God from Ugarit,” *UF* 15 (1983), 271–77.

4. Caquot and Sznycer, *Ugaritic Religion*, 24, plate XIV; Negbi, *Canaanite Gods in Metal*, 114, figure 129 no. 1630. See the beautiful photograph in Amiet, *Art of the Ancient Ancient Near East*, 202 and 203, no. 78.

5. See J.J. M. Roberts, “The Hand of Yahweh,” *VT* 21 (1971), 244–51, esp. 246–48; S. Norin, “Die Hand Gottes im alten Testament,” *La Main de Dieu/Die Hand Gottes* (ed. R. Kieffer and J. Bergman; WUNT 94;

Tübingen: Mohr [Siebeck], 1997), 54. Other essays in this volume address the broader ancient Near Eastern context of this motif.

6. Roberts, “The Hand of Yahweh,” 247–48; Pardee, “‘As Strong As Death’,” *Love & Death in the Ancient Near East: Essays in Honor of Marvin H. Pope* (ed. J. H. Marks and R. M. Good; Guilford, CT: Four Quarters, 1987), 65–69.

7. See M. S. Smith, “Divine Form and Size in Ugaritic and Israelite Religion,” *ZAW* 100 (1988), 424–27. For some Mesopotamian evidence, see V. Hurowitz, *I Have Built You an Exalted House: Temple Building in the Bible in Light of Mesopotamian and Northwest Semitic Writings* (JSOTS 115; Sheffield: JSOT, 1992), 337.

8. See M. Delcor, “Two Special Meanings of the יד,” *JSS* 12 (1967), 234–40; A. Fitzgerald, “Hebrew *yd* = ‘Lore’ and Beloved,’” *CBQ* 29 (1967), 368–74; *CMHE* 23 n. 56; *TO* 1.205 n. i; M. H. Pope, “The Ups and Downs of El’s Amours,” *UF* 11 (1979), 706; C. L. Seow, *Myth, Drama, and the Politics of David’s Dance* (HSM 46; Atlanta, GA: Scholars, 1989), 110 n. 88. Cross, Pope, Seow, and others rightly argue for wordplay here, but the development underlying this wordplay may be delineated further. As these authors note, the Ugaritic word is literally “hand,” but it is also a term for “love,” with the further connotation of “penis.” Two roots seem to underlie Ugaritic *yd*, namely, the primitive bi-consonantal **yd*, “hand” and the triconsonantal **wdd*, “love.” In Ugaritic these two roots have coalesced and the meaning of the former seems to have affected the semantics of the latter (see n. 116 for BH examples of this phenomenon). The semantic connotation of “love” underlying **wdd* has evidently influenced the meaning of **yd*, “hand,” by taking on the nuance of “passion” and “penis.” The usage appears in the two passages cited. Ugaritic *yd* is sometimes a circumlocution for penis, as 1.23.33–35 illustrates, and 1.4 IV 38–39 likewise uses both *yd* and *’ahbt* in a sexual manner.

9. M. H. Pope and J. H. Tigay, “A Description of Baal,” *UF* 3 (1971), 122.

10. See W. H. Irwin, “The Extended Simile in RS 24.245 obv.,” *UF* 15 (1983), 54–57.

11. See A. Abou Assaf, *Der Tempel von ‘Ain Dara* (Damaszener Forschungen 3; Mainz: Philip von Zabern, 1990), 13–16; E. M. Bloch-Smith, “‘Who is the King of Glory?’: Solomon’s Temple and Its Symbolism,” *Scripture and Other Artifacts: Essays on the Bible and*

Archaeology in Honor of Philip J. King (ed. M. D. Coogan, J. C. Exum, and L. E. Stager; Louisville, KY: Westminster/John Knox, 1994), 21–25; and in M. S. Smith, *The Pilgrimage Pattern in Exodus* (JSOTSup 239; Sheffield: Sheffield Academic Press, 1997), 85, 87. For pictures of the foot impressions, see T. J. Lewis, "Divine Images and Aniconism in Ancient Israel," *JAOS* 118 (1998), 40. For an older discussion of deities' supersize, see M. S. Smith, "Divine Form and Size in the Ugaritic and Pre-Exilic Israelite Religion," *ZAW* 100 (1988), 424–27.

12. For the following points, see E. M. Bloch-Smith, "'Who Is the King of Glory?'" 18–31. See also her contribution in Smith, *The Pilgrimage Pattern in Exodus*, 84–85, 86.

13. However, see the discussion in the following section regarding the meaning of *šûl*, customarily regarded as the skirt of the divine robe.

14. The phrase derives from a discussion of comparable Mesopotamian material by van Leeuwen, "The Background," 105.

15. Hurowitz, in his presentation at the symposium in April 1998 sponsored by the Center for Judaic Studies. See Hurowitz, "What Goes In Is What Comes Out: Materials for Creating Cult Statues," *Text, Artifact, and Image. Revealing Ancient Israelite Religion* (ed. T. J. Lewis and G. Beckman; in preparation).

16. Schmandt-Besserat, "'Ain Ghazal 'Monumental' Figures," *BASOR* 310 (1998), 12. For Schmandt-Besserat, such descriptions imply two heads.

17. *ANET* 62.

18. This material derives from Smith, *The Pilgrimage Pattern in Exodus*, 249–57.

19. For Mesopotamia, see P. Amiet, "La Naissance des Dieux. Approche iconographique," *RB* 102 (1995), 481–505.

20. Mullen (*The Divine Council*, 78) suggests instead that *'glt* is a goddess, in which case neither divinity would be theriomorphic.

21. Parker in *UNP* 186–87. For discussion of some terms for divine genitalia in the Ugaritic texts, see D. Pardee, "(Rather Dim but Nevertheless Appreciable) Light from (a Very Obscure) Ugaritic (Text) on (the) Hebrew (Bible)," *To Touch the Text: Biblical and Related Studies in Honor of Joseph A. Fitzmyer, S. J.* (ed. M. P. Horgan and P.J. Kobelski; New York: Crossroad, 1989), 84; Watson, "Notes on Some Ugaritic Words," 47.

22. On the attribute animals of various Ugaritic deities, see chapter 1, section 4.

23. De Moor, *The Rise of Yahwism*, 84.

24. De Moor, *The Rise of Yahwism*, 84.

25. See M. S. Smith, "Divine Travel as a Token of Divine Rank," *UF* 16 (1984), 359.

26. To be sure, de Moor offers other passages as evidence for this crisis of belief in the gods. For the problems with de Moor's view of the gods' "ineffectual foreknowledge," see n. 2. For other related matters, see the end of the last section of chapter 4. Contra de Moor (*The Rise of Yahwism*, 88–91), evil is hardly less overcome in biblical texts than in the Ugaritic texts (see chapter 1), and the presentation of Mot in the Baal Cycle hardly suggests a crisis in divinity, only the limits of Baal's kingship. The situation reflects a theology of divinity that is at once powerful even if at times precarious (*UBC* 101–10, esp. 104). Kirta's situation, which de Moor takes pains to show reflects badly on the gods (*The Rise of Yahwism*, 91–95) is hardly worse off than Job's (see Introduction, nn. 66, 74; cf. chapter 4, section 8). Some of the pessimism detected by de Moor derives from his view of the inexorable turn of the seasons to which even the gods are subject. Yet this approach depends on de Moor's view of the seasonal pattern in the Ugaritic texts, which has received substantial criticism (see *UBC* 60–75). As for "becoming too human," such a later notion for the second person of the Trinity does not seem to have produced a "crisis of faith," on the contrary.

27. See T. Jacobsen, *Treasures of Darkness: A History of Mesopotamian Religion* (New Haven/London: Yale, 1976), 234–36; A. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars* (Oxford: Clarendon Press, 1986), 101–02, 233; idem, *Court Poetry and Literary Miscellanea* (State Archives of Assyria III; Helsinki: Helsinki University, 1989), 99; W. G. Lambert, "The Historical Development of the Mesopotamian Pantheon: A Study in Sophisticated Polytheism," *Unity and Diversity* (ed. H. Goedicke and J. J. M. Roberts; Baltimore: Johns Hopkins University Press, 1975) 191–200; idem, "Syncretism and Religious Controversy in Babylonia," *Altorientalische Forschungen* 24 (1997), 158–62; P. K. McCarter, "The Religious Reforms of Hezekiah and Josiah," *Aspects of Monotheism: How God is One* (ed. H. Shanks and J. Meinhardt; Washington, DC: Biblical Archaeology Society, 1997), 67–69; and Porter, "The Anxiety of Influence," 240–54. This sort of comparison is reminiscent of incantations invoking divine help by

identifying parts of the body with various deities. For an example, see T. Jacobsen, “Mesopotamia,” in H. Frankfort et al., *The Intellectual Adventure of Ancient Man: An Essay on Speculative Thought in the Ancient East* (Chicago: University of Chicago Press, 1946), 133. Such an approach does not appear in texts from Syria-Palestine. The thrust of R. S. Hendel’s discussion links the former sort of text to Mesopotamian iconism. See Hendel, “Aniconism and Anthropomorphism in Ancient Israel,” *The Image and the Book: Iconic Cults, Aniconism, and the Rise of Book Religion in Israel and the Ancient Near East* (ed. K. van der Toorn; Leuven: Peeters, 1997), 208. Accordingly, the lack of such texts in Israel might be linked to its so-called aniconic tradition. If correct, some sort of similar text might be expected in Ugarit. See 1.101 discussed in section 1.

28. KAR 102, lines 10–19, quoted in Jacobsen, *Treasures of Darkness*, 235.

29. CT XXIV pl. 50, no. 47406 obv. 3–10, cited in Jacobsen, *Treasures of Darkness*, 235. See also B. Hartmann, “Monotheismus in Mesopotamien?” *Monotheismus im Alten Israel und seiner Umwelt* (ed. O. Keel; BB 14; Fribourg: Schweizeriches Katholisches Bibelwerk, 1980), 64.

30. CT 24 50, BM 47406, quoted translation taken from Lambert, “The Historical Development of the Mesopotamian Pantheon,” 198.

31. Hendel, “Aniconism and Anthropomorphism in Ancient Israel,” 208. McCarter sets this sort of monism within polytheism under the rubric of the “origins of monotheism” (McCarter, “The Religious Reforms of Hezekiah and Josiah,” 67–69); only someone looking toward the *telos* of monotheism would view such a monism in this manner. I have preferred to relate this phenomenon to the apparent convergence of different divinities’ characteristics in the figure of Yahweh (see *EHG* xxiii–xxiv, 21–24, 36–37, 146–47, 154–57); but this development constitutes neither monotheism nor even monolatry. Instead, both the Mesopotamian and Israelite phenomena involve exaltation of the national god, which in Israel’s case turned out to be prerequisite to the development of monotheism. See chapter 8.

32. See the previous section for further discussion of this text. See also W. H. Irwin, “The Extended Simile in RS 24.245 obv.,” *UF* 15 (1983), 54–57. See comparisons sometimes made with Song of Songs 5:10–16 (M. H. Pope and J. H. Tigay, “A Description of Baal,” *UF* 3 [1971], 117–30; W. Tyloch, “Ugaritic Poems and Song of Songs,” *Šulmu IV: Everyday Life in the Ancient Near East: Papers Presented at the International Conference.*

Poznan, 19–22 September 1989 [ed. J. Zablocka and S. Zawadzki; Seria Historia 182; Poznan: University Press of Poznan, 1993], 300–01).

33. *EHG* 97–103; B. Uffenheimer, "Myth and Reality in Ancient Israel," *The Origins and Diversity of Axial Civilizations* (ed. S. N. Eisenstadt; Albany: State University of New York Press, 1986), 164–66.

34. For a summary of the current discussion about this so-called source, see Smith, *The Pilgrimage Pattern in Exodus*, 146–59.

35. See J. J. M. Roberts, "The Motif of the Weeping God in Jeremiah and Its Background in the Lament Tradition of the Ancient Near East," *Old Testament Essays* 5 (1992), 361–74.

36. Eslinger, "The Infinite in a Finite Organical Perception (Isaiah VI 1–5)," *VT* 45 (1995), 145–73; followed by Wyatt, *Myths of Power*, 5, 342. Wyatt argues that the suffixes on the body parts named in verse 2 belong to Yahweh and not the seraphim since the suffixes are plural, but this argument ignores the distributive prepositional phrase, *le'eḥād*, "to each one," applied to the seraphim in this verse.

37. One may remain open to this theory for **šûl* in verse 1 as divine genitals, but I would voice the following reservations about the arguments: (1) I am not as prepared as Eslinger is to dismiss the relevance of *šûl* as part of priestly garment in Exodus 38:33–34, 39:25–26 (the point of such a divine covering may be to mark the divine holiness on analogy with the holiness of the priesthood); (2) the other biblical contexts (as well as the cognates) sometimes involve human dress or lack thereof, and Eslinger allows for dress *or* pudenda in some passages, with the former sometimes as a hint of the latter; and (3) the typical description of the divine leader of the heavenly council elsewhere in either Ugaritic or biblical texts lacks any such reference to sexuality per se (I do not regard El and Athirat's conversation in CAT 1.4 IV–V as typical). It is to be noted that **šûl* in the meaning of "side" is clearly attested elsewhere (e.g., in the Copper Scroll, 3Q15 1.11, 4.9) and therefore not easily dismissed. Finally a separate issue: the "feet" in verse 2 have been taken by many commentators as an euphemism for genitalia of the seraphim, but Eslinger sees Yahweh as the one with the "feet" as well as the "face" here; for a traditional approach to these body parts as belonging to the seraphim augmented by iconographical analysis, see Keel and Uehlinger, *Gods, Goddesses and Images of God*, 272–74, 401. Eslinger's view of verse 2 requires a reading of the pronominal suffixes that is elastic at best (in the article sometimes *lô* in

verse 2 is arranged with what precedes, sometimes with what follows). For all of these reasons, the interpetation remains problematic. Despite these questions, readers should understand that despite their possible sense of propriety about biblical portraits of the divine, a divine portrait with sexual aspects is a priori not impossible or even improbable.

38. Pope, Review of M. C. A. Korpel, *A Rift in the Clouds*, *UF* 22 (1990), 497–502. M. Dijkstra (personal communication) has expressed reservations about the order of elements assumed by this interpretation, but I think that this point is hardly as salient as he believes.

39. The material and issues are complex and beyond the scope of this investigation. See (by year) R. S. Hendel, "The Social Origins of the Aniconic Tradition in Ancient Israel," *CBQ* 50 (1988), 365–82; idem, "Images of God in Ancient Israel," *Bulletin of the Anglo-Israel Archaeological Society* 8 (1988–89), 81–82; the seminal book of T. N. D. Mettinger, *No Graven Image? Israelite Aniconism in Its Ancient Near Eastern Context* (ConBOT 42; Stockholm: Almqvist & Wiksell, 1995); the thoughtful review of Mettinger's book by T.J. Lewis, "Divine Images and Aniconism in Ancient Israel," *JAOS* 118 (1998), 36–53; and the various responses to Mettinger's work in *The Image and the book*. The arguments for aniconism in ancient Israel rest variously on an argument from silence (i.e., the lack of excavated divine images), a dismissal of pillar figurines as divine statuary, and stelas (*maṣṣēbôt*) as aniconic symbols of deities; all three are debatable. With regard to the third, the main clear indigenous information about how stelas were perceived cultically, namely, Genesis 28, would suggest that they do not represent the deity per se, but mark the *place* of the deity's cultic presence. Specifically, the reference to *bêt-'ēl*, "the house of God," suggests that it is the place and not the deity so much that the stelas signify (the same point would apply to stelas called *baitylia* in PE 1.10.16 and other late classical sources). However, this distinction may not have obtained in some contexts. For the evidence and issues, see M. Hutter, "Kultstelen und Baityloi: Die Ausstrahlung eines syrischen religiösen Phänomensnach Kleinasien und Israel," *Religionsgeschichtliche Bezlehungen zwischen Kleinasien, Nordsyrien und dem Alten Testament: Internationales Symposion Hamburg 17–21. März 1990* (ed. B. Janowski, K. Koch and G. Wilhelm; OBO 129; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1993), 87–108; K. van der Toorn, "Worshipping Stones: On the Deification of Cult Symbols," *JNWSL* 23

(1997) 7–10; E. Bloch-Smith, “Representations of Divinity in the Archaeological Record of Ancient Israel,” *Text, Artifact, and Image. Revealing Ancient Israelite Religion* (ed. T. J. Lewis and G. Beckman; in preparation).

40. See the same vocabulary in lines 1, 12, 15, and 16 of the Tell Fakhariyah inscription, discussed in D. M. Gropp and T. J. Lewis, “Notes on some Problems in the Aramaic Text of the Hadd-Yith’i Bilingual,” *BASOR* 259 (1985), 47. For the editio princeps, see A. Abou-Assaf, P. Bordreuil, and A. R. Millard, *La statue de Tell Fekheriyé et son inscription bilingue assyro-araméenne* (Paris: Editions recherche sur les civilisations, 1982). Accordingly, one may sense in this usage an implicit polemic against the making of images, since humanity serves as the living image of the Israelite deity while images of of man-made objects constitute lifeless symbols of dead gods. In Second Isaiah such a polemic against images is explicit. See further chapters 9, section 1, and chapter 10 in general.

41. The most recent proponent of this approach is J. C. de Moor, “The Duality in God and Man: Gen. 1:26–27 as P’s Interpretation of the Yahwistic Creation Account,” *Intertextuality in Ugarit and Israel: Papers Read at the Tenth Joint Meeting of the Society for Old Testament Study and Het Oudtestamentisch Werkgezelschap in Nederland en Belgie held at Oxford*, 1997 (ed. J. C. de Moor; OTS XL; Leiden: Brill, 1998), 112–25.

42. M. S. Smith, “God Male and Female in the Old Testament: Yahweh and his asherah,” *Theological Studies* 48 (1987), 333–40. Cf. *EHG* 114 n. 138.

43. For a discussion of divine and human sexuality in this text without recourse to such explanations, see T. Frymer-Kensky, *In The Wake of the Goddesses: Women, Culture, and the Biblical Tansformation of Pagan Myth* (New York: Free Press, 1992), 142.

44. For the details in the following remarks, see *EHG* 97–103.

45. For the female imagery of the divine in “Second Isaiah,” see especially M. I. Gruber, *The Motherhood of God and Other Studies* (South Florida Studies in the History of Judaism 57; Altanta, GA: Scholars, 1992), 3–15. Cf. B. S. Childs, *Old Testament in a Canonical Context* (Philadelphia: Fortress, 1985) 39–40.

46. See Roberts, “The Motif of the Weeping God in Jeremiah,” 361–74.

47. See chapter 10.

48. For references for the following material, see *EHG* 99–100. See further the fine study of H. W. Jüngeling, "'Was anders ist Gott für Menschen, wenn nicht sein Vater und seine Mutter?' Zu einer Doppelmetapher der religiösen Sprache," *Ein Gott allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israeltischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; 13. Kolloquium der Schweizerischen Akademie der Geistes- und Sozialwissenschaften 1993; Freiburg Schweiz: Universitätsverlag, 1994 = repr. OBO 139; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1994), 365–86.

49. De Moor, "The Duality in God and Man: Gen. 1:26–27," 112–25; see also S. D. Moore, *God's Gym: Divine Male Bodies of the Bible* (New York: Routledge, 1996), 92.

50. So the heavy-handed interpretation of H. Eilberg-Schwartz, *God's Phallus and Other Problems for Men and Monotheism* (Boston: Beacon Press, 1994); the question would be whether the homoeroticism belongs to the text or this author. There is no biblical evidence for the subordinate clause in the following claim: "these men [Moses and the patriarchs] love, in ways that are imagined as erotically and sensually, a male deity" (p. 3). Eilberg-Schwartz also writes wrongly of Israelite religion as "imagining men as wives of God." The logic for the claim is flawed: because Israel is imagined as God's lover and men are part of Israel (including ones who author such images), it is assumed that men then imagined themselves as lovers. This logic indeed manifests "the worst kind of literalism" (see the following note). See also his article, "God's Phallus and the Dilemmas of Masculinity," *Reclaiming Men: Religion and Masculinities* (ed. S. B. Boyd, W. M. Longwood, and M. W. Muesse; Louisville, KY: Westminster John Knox, 1996), 36–47 (I thank Professor Shawn Krahmer for bringing this reference to my attention). This is not to deny the potential value of psychoanalytic theory for the study of religion. See chapter 8, section 5. For further discussion of the "corporeal God" in the Bible informed by the work of Eilberg-Schwartz, see Moore, *God's Gym*, esp. 82–86.

51. Childs, *Old Testament in a Canonical Context*, 40.

52. Frymer-Kensky, *In The Wake of the Goddesses*, 189.

53. Hendel, "Aniconism and Anthropomorphism in Ancient Israel," 222–23 n. 68.

54. Eilberg-Schwartz (*God's Phallus and Other Problems for Men and Monotheism*, 71) recognizes that authority is part of the issue with these passages, but he insists on their "ambivalence" (p. 64) and "teasing uncertainty" (p. 70). Eilberg-Schwartz can always claim that scholars who deny his view are "into denial," but I see no such features in these texts. I take authority as the central issue in the prophetic passages. I see Exodus 33–34 as a commentary on the visionary experience of Exodus 24:9–11 (Smith, *The Pilgrimage Pattern in Exodus*, 248–57), and I see this bit of old tradition also as an expression of the privileged place of Moses and the other Israelite leaders in a piece of Pentateuchal tradition now largely unpreserved and perhaps rewritten.

55. See J. K. Eakins, "Anthropomorphisms in Isaiah 40–55," *HS* 20 (1979), 47–50, with the well-noted accompanying citation of Isaiah 55:6: "Seek Yahweh while He can be found, // Call to Him while He is near."

56. See *EHG* 101, and the secondary literature cited there. See also chapter 4, n. 41.

57. It is possible that in the second translation *qdš* is to be regarded as the title of a specific deity (Athirat is the usually cited possibility here), but this view is debated. For discussion, see *UBC* 294–95; P. Merlo, "Note critiche su alcune presunte iconografie della dea Ashera," *SEL* 14 (1997), 43–64, esp. 50.

58. For the different views, see *EUT* 43; *UBC* 295 n. 135 with further literature.

59. For discussion, see chapter 4, section 7.

60. As noted by D. P. Wright, "Holiness, Sex, and Death in the Garden of Eden," *Bib* 77 (1996), 305–29.

61. These points are made in K. van der Toorn, *Sin and Sanction in Israel and Mesopotamia: A Comparative Study* (Studia Semitica Neerlandica 22; Assen: Van Gorcum, 1985), 28–29; idem, "La pureté rituelle au proche-orient ancien," *RHR* 206 (1989), 339–56. It is claimed that the Akkadian word related to the Hebrew words for "holy" and "holiness" (*qdš*) means "to be clean" (so *AHw* 891a). However, such usage is rarely, if ever, attested, according to van der Toorn (*Sin and Sanction*, 28). For some further clarifications on the Mesopotamian evidence, see M. J. Geller, "Taboo in Mesopotamia: A Review Article," *JCS* 42 (1990), 105–17.

62. For this latter meaning in Ugaritic as applied to lapis lazuli, see CAT 1.4 V 19. For discussion of both this Ugaritic passage and Exodus

24:10, see Smith, “Kothar wa-Hasis, the Ugaritic Craftsman God,” 321–22.

63. For this point, see van der Toorn, *Sin and Sanction*, 23.

64. Jacobsen, *Treasures of Darkness*, 3. For a valuable appreciation of this work, see Muffs, *Love and Joy*, 61–66.

65. R. A. Di Vito, *Studies in Third Millennium Sumerian and Akkadian Personal Names: The Designation and Conception of the Personal God* (Studies Pohl: Series Maior 16; Rome: Pontificio Istituto Biblico, 1993), 256–57.

66. To be sure, Otto’s *mysterium tremendum et fascinosum* has been influential in the analysis of other religions. For only one example, see R. C. Zaehner, *Hinduism* (sec. ed.; Oxford: Oxford University Press, 1966), 86.

67. See the cases discussed by Jacobsen, *Treasures of Darkness*, 16.

68. See F. A. M. Wiggerman, *Mesopotamian Protective Deities: The Ritual Texts* (Cuneiform Monographs 1; Groningen: Styx & PP, 1992), 151–54. For further discussion of such monsters, see section 4 and chapter 1.

69. Van der Toorn, *Sin and Sanction*, 23.

70. For a discussion of Otto’s concept of the *mysterium tremendum et fascinosum*, see D. Merkur, “The Numinous as a Category of Values,” *The Sacred and the Scholars: Comparative Methodologies for the Study of Primary Religious Data* (ed. T. A. Idinipulos and E. A. Yonan; Numen LXXIII; Leiden: Brill, 1996), 104–23.

71. For the ideological use of “holiness” of temples and other sacred spaces, see S. Guthrie, “The Sacred: A Skeptical View,” *The Sacred and the Scholars: Comparative Methodologies for the Study of Primary Religious Data* (ed. T. A. Idinipulos and E. A. Yonan; Numen LXXIII; Leiden: Brill, 1996), 124–138.

72. Guthrie, “The Sacred: A Skeptical View,” 135.

73. W. E. Paden, “Sacrality as Integrity: ‘Sacred Order’ as a Model for Describing Religious Worlds,” *The Sacred and the Scholars: Comparative Methodologies for the Study of Primary Religious Data* (ed. T. A. Idinipulos and E. A. Yonan; Numen LXXIII; Leiden: Brill, 1996), 15. See also p. 13: “The rites for honoring a religious leader or a king and those for honoring a god are often hard to distinguish.” So, too, myths for a deity?

74. See *BDB* 871–74.

75. T. Frymer-Kensky, *In the Wake of the Goddesses: Women, Culture, and the Biblical Transformation of Pagan Myth* (New York: Basic Books,

1992), 189–90. See also E. S. Gerstenberger, *Yahweh the Patriarch: Ancient Images of God and Feminist Theology* (trans. F. J. Gaiser; Minneapolis: Fortress, 1996), vi, 90; and Wright, "Holiness, Sex and Death," 314.

76. Sexual impurity includes menstruation (Leviticus 15:19–30; 18:19), pregnancy (Leviticus 12), a male's emission of semen (Leviticus 15:1–18). The connection between these sorts of impurity and the holiness of Yahweh is made explicitly in Leviticus 15:31.

77. For restrictions on priestly contact with the dead, see Leviticus 21:1–3, 11; 22:4b; Numbers 6:6–7. The statement in Leviticus 21:3 stands in distinct tension with 22:4b. See E. M. Bloch-Smith, "The Cult of the Dead in Judah: Interpreting the Material Remains" *JBL* 111 (1992), 222–23, who emphasizes the financial benefit gained through these prohibitions.

78. For the degrees of holiness between the people, the priesthood, and the chief priest, see J. Milgrom, "Israel's Sanctuary: The Priestly 'Picture of Dorian Gray'," *RB* 83 (1976), 390–99; reprinted in *Studies in Cultic Theology and Terminology* (Leiden: Brill, 1983), 75–84.

79. *EHG* 165.

80. OB X iii 3–5. See *ANET* 90 and W. G. Lambert, "The Theology of Death," *Death in Mesopotamia: Papers read at the XXVI^e Rencontre assyriologique internationale* (ed. B. Emerton* (ed. J. Day, R. P. Gordon, and H. G. M. Williamson; Cambridge: Cambridge University Press, 1995), 41.

81. OB III iv 6–8 (*ANET* 79).

82. Kovacs, *The Epic of Gilgamesh* (Stanford, CA: Stanford University Press, 1989), 19 n. 6.

83. W. G. Lambert posits a literary relationship between Gilgamesh and Ecclesiastes, mediated by the inclusion of the former by scribes at Ugarit and Emar in the Late Bronze Age. See Lambert, "Some New Babylonian Wisdom Literature," 41–42. The point is mentioned here in order to highlight one social location of this sort of description of deities and humanity or at least of its transmission, namely, scribes of the Late Bronze Age through the Persian period.

84. OB Meissner ii 4'. See B. Foster, "Gilgamesh: Sex, Love and the Ascent of Knowledge," *Love and Death in the Ancient Near East: Essays in*

Honor of Marvin H. Pope (ed. J. H. Marks and R. M. Good; Guilford, CT: Four Quarters, 1987), 41.

85. Tablet I ii 1 in *ANET* 73; IX ii 16 in *ANET* 88.

86. This information is taken from H. Hoffner, "Hittite Terms for the Life Span," *Love and Death in the Ancient Near East*, 53.

87. This title also applies to an Egyptian king in 2.42.9, perhaps a reflection of royal ideology that kings are eternal in a manner analogous to deities. Deceased Ugaritic kings were likewise labelled as *'il* (see 1.113.14–26). Cf. the apparent scribal exercise in 5.9 I 2–6, which requests blessing of eternity for *mnn*, either a personal name or "whomever"; if the latter were correct, it might reflect an extension of royal ideology.

88. For further discussion, see chapter 6, section 4.

89. See J. F. Healey, "The Immortality of the King: Ugarit and the Psalms," *Or* 53 (1984 = M.J. Dahood Memorial Volume) 246–47.

92. See Mullen, *The Divine Council*, 57, 91.

93. Lambert, "The Theology of Death," 64. The following points derive from Lambert, "The Theology of Death," 64–5. Note also the dead gods can have ghosts in Mesopotamian literature. See W. L. Moran, "The Creation of Man in Atrahasis I 192–248," *BASOR* 200 (1970), 54 n. 21.

94. For the divine character of such monsters, see Lambert, "The Theology of Death," 64; J. Black, "The Slain Heroes—Some Monsters of Ancient Mesopotamia," *Society for Mesopotamian Studies Bulletin* (Toronto) 15 (1988), 19–25. Such monsters are not deities in the same sense as their opponents. For some important distinctions, see Wiggerman, *Mesopotamian Protective Deities*, 158; and chapter 1.

95. See A. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars* (Oxford: Clarendon Press, 1986) 142–45.

96. *ANET* 68.

97. *ANET* 67, 501–02.

98. Creation of the human person from the dust of the earth, a common Middle Eastern motif, signifies humanity's reality as created, but receiving the breath of life from Yahweh in Genesis 2 signals at the same time the

connectedness of the human person to the divine. Genesis 1:26–28 achieves a comparable effect in a less anthropomorphic manner. To be in the divine image is to be connected somehow to the divine without actually being divine.

99. See Jacobsen, *Treasures of Darkness*, 25–27; Wiggermann, "Transtigridian Snake-Gods," 33–34, 41.

100. See Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars*, 136–41.

101. J. Z. Smith, "The Glory, Jest and Riddle: James George Frazer and *The Golden Bough*" (Ph.D. diss., Yale University, 1969), 366–75; idem, "Dying and Rising Gods," *The Encyclopedia of Religion. Volume 4* (ed. M. Eliade; New York: Macmillan; London: Collier Macmillan, 1987) 521–27. See chapter 6, section 1.

102. See the next chapter for detailed discussion.

103. On this text, see Mullen, *The Divine Council*, 118, 226–38; S. B. Parker, "The Beginning of the Reign of God. Psalm 82 as Myth and Liturgy," *RB* 102 (1995), 532–59; see also chapter 2, section 4.

104. Holloway, "The Case for Assyrian Religious Influence," 346, cites the notion of dead gods in Psalm 82 in connection with no. 30:3 in A. Livingstone, *Court Poetry and Literary Miscellanea* (State Archives of Assyria 3; Helsinki: Helsinki University, 1989): "servant of a dead god, house whose star has been disappeared from the heavens." The passage is discussed in chapter 2, section 4.

105. The passage and the different text-critical readings are discussed in chapter 2, section 4.

106. This is the translation of New Jewish Publication Society version, which notes that the Hebrew actually reads "we," "a change made by a pious scribe."

107. The parade West Semitic examples are CAT 1.108.11–12; 5.9.2–6; KAI 10:9; 26 A III 5–6; Psalm 72:5. For Akkadian and West Semitic evidence, see J. C. Greenfield, "Scripture and Inscription: The Literary and Rhetorical Element in Some Early Phoenician Inscriptions," *Near Eastern Studies in Honor of William Foxwell Albright* (ed. H. Goedicke; Baltimore: Johns Hopkins University Press, 1971) 266–68; S. M. Paul, "Psalm 72:5—A Traditional Blessing for the Long Life of the King," *JNES* 31 (1972) 351–5; M. L. Barré, "An Analysis of the Royal Blessing in the Karatepe Inscription," MAARAV 3/2 (1982) 177–94. For Hittite prayers requesting

long life, see H. Hoffner, “Hittite Terms for the Life Span,” *Love and Death in the Ancient Near East*, 53–55.

108. S. Smith, *The Statue of Idrimi* (Occasional Papers of the British Institute of Archaeology in Anakara 1; London: The British Institute of Archaeology in Ankara, 1949), 22; cited by M. L. Barré, “An Analysis of the Royal Blessing in the Karatepe Inscription, 185 n. 28.

109. For these alternatives, see G. A. Barton, *A Critical and Exegetical Commentary on the Book of Ecclesiastes* (ICC; Edinburgh: T. & T. Clark, 1912), 105; R. Gordis, *Koheleth—The Man and His World: A Study of Ecclesiastes* (third augmented ed.; New York: Schocken, 1968), 231. The last of the four is favored by Gordis. For etymological discussion of these suggestions, see W. Leslau, *Comparative Dictionary of Ge’ez (Classical Ethiopic)* (Wiesbaden: Otto Harrassowitz, 1987), 61.

110. *BDB* 761.

111. See J. C. de Moor, *An Anthology of Religious Texts from Ugarit* (Nisaba 16; Leiden: Brill, 1987), 65 n. 297.

112. This meaning has also been claimed for Ugaritic in the expression *mlk ‘lm*, “king of the universe,” attested in CAT 1.108.1. See *UT* 19.1858; cf. A. Cooper, “*MLK ‘LM*: ‘Eternal King’ or ‘King of Eternity’?” *Love & Death in the Ancient Near East*, 1–7. However, the imputed meaning is apparently anachronistic.

113. So C. L. Seow, *Ecclesiastes* (AB 18C; Garden City, NY: Doubleday, 1997), 163.

114. Comparing Ecclesiastes 8:17, M. Fox emends to *‘āmāl*, “labor”; see Fox, *Qohelet and His Contradictions* (JSOTSup 71; Bible and Literature 18; Sheffield: Almond, 1989), 194. Cf. B. Isaksson, *Studies in the Language of Qoheleth: With Special Emphasis on the Verbal System* (Acta Universitatis Upsaliensis Studia Semitica Upsaliensia 10; Stockholm: Almqvist & Wiksell, 1987), 79–81.

115. Barton translates “ignorance,” based on the sense of “hidden” or “secret” derived from the second alternative. See Barton, *A Critical and Exegetical Commentary*, 105.

116. Ugaritic offers another example of coalescence of first **w-/y-* roots and their subsequent semantic coalescence. The word Ugaritic *yd* is literally “hand,” but it is also a term for “love,” with the further connotation of “penis.” Two roots seem to underlie Ugaritic *yd*, namely, the primitive biconsonantal **yd*, “hand” and **wdd*, “love.” See *TO* 1.205 n. 1; Seow,

Myth, Drama, and the Politics of David's Dance, 110 n. 88. In Ugaritic these two roots have coalesced and their meanings seem to have affected one another. It would seem that the semantic sense of "love" underlying **wdd* has come to exert a connotation on the literal meaning of **yd*, "hand." Accordingly, Ugaritic *yd* has the resultant nuance of penis. (The usage may be illustrated by two passages, 1.23.33–35, cited in section 1, and 1.4 IV 38–39.) From these cases it is evident that any given context may draw on the connotations of both of the older roots now coalesced into a single word.

Two Hebrew roots may serve as further illustrations. Ugaritic *'iṯ*, a word for a sacrifice, has coalesced in BH *'iššeh* as an offering made by fire (*BDB* 77–78; cf. Ugaritic *'išt* for "fire"). More controversial is the verb *ta'ăzôb* in Psalms 16:10, often derived from the old or original (for heuristic purposes, sometimes called "Proto-Semitic" or PS for short) root **'ḏb* > BH **zb*, "to put, place," as suggested by the parallelism with **ntn*, "to give." See M. Dahood, *Psalms I.1–50* (AB 16; Garden City, NY: Doubleday, 1965) 90–1. The meaning "abandon, leave" from the PS root**'zb*, which merged with the root **'ḏb* (both became **'zb* in Hebrew) does not suit the context, and it may be argued that the original root therefore was **'ḏb* > BH **'zb*, "put, place." For the author of this psalm, however, this distinction would not have existed; rather, the author may have associated within this one Hebrew word the range of meanings and connotations of the two original PS roots, **'ḏb* and **'zb*.

117. Cf. the restlessness of Gilgamesh's heart and his quest for eternity. See Ninevah version III ii 10: *lìb-bi la ša-li-la*. See *ANET* 81; Foster, "Gilgamesh," 33.

118. Pardee, "An Evaluation of the Proper Names," 149.

119. If knowledge and wisdom were to be included (see n. 2), they might be added in the following manner:

	some knowledge of the world and	
ignorance	God, but experience of disorder and	wisdom and knowledge
	unintelligibility	

120. See the reflections on this problem by P. Machinist, "The Question of Distinctiveness in Ancient Israel: An Essay," *Ah Assyria . . . : Studies in Assyrian History and Ancient Near Eastern Historiography*

Presented to Hayim Tadmor (ed. M. Cogan and I. Eph'al; Jerusalem: Magnes, 1991) 196–212; E. L. Greenstein, "The God of Israel and the Gods of Canaan: How Different Were They?" *Proceedings of the Twelfth World Congress of Jewish Studies Jerusalem, July 29 to August 5, 1997: Division A. The Bible and Its World* (ed. R. Margolin; Jerusalem: World Union of Jewish Studies, 1999) 47*–57*; and by Lewis, "Divine Images," 53.

6. *The Life and Death of Baal*

1. For the scholarly research, see J. B. Tsirkin, "The Labours, Death and Resurrection of Melqart as Depicted on the Gates of the Gades' Herakleion," *RSF* 9 (1981), 21–27; T. N. D. Mettinger, *In Search of God: The Meaning and Message of the Everlasting Names* (trans. F. H. Cryer; Philadelphia: Fortress, 1988) 82–91; *idem*, "The Elusive Presence: YHWH, El and Baal and the Distinctiveness of Israelite Faith," *Die Hebräische Bibel und ihre zweifache Nachgeschichte: Festschrift für Rolf Rendtorff zum 65. Geburstag* (ed. E. Blum, C. Macholz, and E. W. Stegemann; Neukirchen-Vluyn: Neukirchener, 1990), 401 n. 44; "The 'Dying and Rising God': A Survey of Research from Frazer to the Present Day," *SEÅ* 63 (1998) 111–23; J. Day, "Baal," *The Anchor Bible Dictionary* (ed. D.N. Freedman; six vols.; New York: Doubleday, 1992), 1.549. See also Ackerman, *Under Every Green Tree: Popular Religon in Sixth-Century Judah* (HSM 46; Atlanta, GA: Scholars, 1992), 84, 90. For ^{d}NIN.KUR at Emar as "dying and rising god," see D. Arnaud in *Bulletin de la Société Ernest Renan* 1979, 118 (discussed by D. E. Fleming, *The Installation of Baal's High Priestess at Emar* [HSS 42; Atlanta, GA: Scholars, 1992], 170). For nonscholarly literature, see D. Leeming and J. Page, *God: Myths of the Male Divine* (New York: Oxford University Press, 1996). The last item of Mettinger's cited here, which came into my hands after the completion of this chapter, provides a very serviceable history of scholarship in the twentieth century. I wish to thank Profressor Mettinger for making this article available to me; in it he mentions his book in progress, tentatively entitled *Resurrection Reconsidered: Dying and Rising Gods. A Study of West Semitic Religion*. The results of the discussion in this chapter will undoubtedly require modification in light of Professor Mettinger's research.

2. J. Z. Smith, "The Glory, Jest and Riddle: James George Frazer and *The Golden Bough*" (Ph.D. diss., Yale University, 1969), 366–75; idem,

"Dying and Rising Gods," *The Encyclopedia of Religion. Volume 4* (ed. M. Eliade; New York: Macmillan; London: Collier Macmillan, 1987), 521–27; idem, *Drudgery Divine: On the Comparison of Early Christianities and the Religions of Late Antiquity* (Jordan Lectures in Comparative Religion, XIV. School of Oriental and African Studies University of London; Chicago Studies in the History of Judaism; Chicago: University of Chicago Press, 1990), 85–115, esp. 90–93; W. Burkert, *Structure and History in Greek Mythology and Ritual* (Berkeley: University of California Press, 1979), 100; J. P. Södergard, "The Ritualized Bodies of Cybele's Galli and the Methodological Problem of the Plurality of Explanations," *The Problem of Ritual: Based on Papers Read at the Symposium on Religious Studies Held at Åbo, Finland on the 13th–16th of August, 1991* (ed. T. Ahlbäck; Scripta Instituti Doneriani Aboensis; Stockholm: Almqvist and Wiksell, 1993), 175–76. For the biblical and ancient Middle Eastern fields, see the citations of J. Z. Smith, "The Glory, Jest and Riddle," 40 n. 43; and more recently, H. Barstad, *The Religious Polemics of Amos: Studies in the Preaching of Am 2, 7B–8, 4, 1–13, 5, 1–27, 6, 4–7, 8, 14* (VTSup 34; Leiden: Brill, 1984), 84 n. 45, 148–51; and N. Walls, Jr., *The Goddess Anat in the Ugaritic Texts* (SBLDS 135; Atlanta, GA: Scholars, 1992), 5–6, 68. H. Frankfort's points made in his *Kingship and the Gods: A Study of Ancient Near Eastern Religion as the Integration of Society & Nature* (Chicago: University of Chicago Press, 1948, 286–94) still stand.

3. Mettinger, *In Search of God*, 84–85.

4. Mettinger, *In Search of God*, 82–91, 214 n. 6; see Ackerman, *Under Every Green Tree*, 92. This view is debatable and is susceptible to other explanations. For example, A. Kapelrud regards the use of this title in Jeremiah 10:10 as a polemic against lifeless idols; see Kapelrud, *God and His Friends in the Old Testament* (Oslo: Universitetsforlaget, 1979), 20. B. Halpern views this title as a polemic aimed against the cult devoted to deceased ancestors; see Halpern, "Jerusalem and the Lineages in the Seventh Century BCE: Kinship and the Rise of Individual Liability," *Law and Ideology in Monarchic Israel* (ed. B. Halpern and D. W. Hobson; JSOTSup 124; Sheffield: JSOT, 1991), 73.

5. Day, "Baal," 549. Cf. O. Loretz, "Tod und Leben nach altorientalischer und kanaanäisch-biblischer Anschauung in Hos 6, 1–3," *BN* 17 (1982), 37–42. The argument regarding the imagery in Hosea 6:3 may be approached in a similar way. It, too, may reflect concepts associated

not with a particular ritual devoted to a "dying and rising god." Indeed, M. L. Barré regards the pertinent language in this passage as medical in character; see Barré, "New Light on the Interpretation of Hosea VI 2," *VT* 28 (1978), 129–41; "Bullutsa-rabi's Hymn to Gala and Hosea 6:1–2," *Or* 50 (1981), 241–45. I am inclined to see an allusion to deceased ancestors (*EHG* 53; cf. McAlpine, *Sleep*, 195). Whether or not these particular alternatives (or those of the preceding note) prove correct, they do not rely on the ritual category of "dying and rising gods."

6. Apart from fuller uses of the category of "dying and rising gods," this category might also be seen as surviving vestigially in the label "vegetation god." See A. Kapelrud, *God and His Friends*, 201.

7. In fairness to Mettinger and Day, they may not assume all of the freight associated with Frazer's use of this category, nor do their remarks reflect an extended discussion of the issues. I mention these two biblical scholars in particular because of the great respect their works deservedly command.

8. See R. Ackerman, *J. G. Frazer: His Life and Work* (Cambridge: Cambridge University Press, 1987), 236.

9. Eliot acknowledges his debt to Frazer in his notes to *The Waste Land* (*The Complete Poems and Plays 1909–1950* [New York: Harcourt, Brace, 1952], 50): "To another work of anthropology I am indebted in general, one which has influenced our generation profoundly; I mean *The Golden Bough;* I have used especially the two volumes *Adonis*, *Attis*, *Osiris*. Anyone who is acquainted with these works will immediately recognize in the poem certain references to vegetation ceremonies." For Frazer's impact on Eliot, see the detailed discussion of J. B. Vickery, *The Literary Impact of* The Golden Bough (Princeton, NJ: Princeton University Press, 1973), 233–79. For Frazer's influence on the wider culture, see in addition to Vickery's work, J. Z. Smith, "The Glory, Jest and Riddle," 8–9.

10. For the cultural and artistic appeal of the work, see Vickery, *The Literary Impact of* The Golden Bough, 3–37 (esp. 8, 19–21, 32) and 68–138.

11. For the sake of convenience, readers may consult Frazer, *The Golden Bough: A Study in Magic and Religion* (I Volume, Abridged Edition; New York: Macmillan, 1951), 378–443.

12. Frazer, *The Golden Bough*, abridged, 391.

13. Frazer, *The Golden Bough*, abridged, 378.

14. Frazer, *The Golden Bough*, abridged, 378.

15. Frazer, *The Golden Bough*, abridged, 392.

16. Frazer, *The Golden Bough* (London: Macmillan, 1890), xi. See also Ackerman, *J. G. Frazer*, 229, 238.

17. Robertson Smith, *Lectures on the Religion of the Semites* (New York: D. Appleton, 1889), 393; quoted in T. O. Beidelman, *W. Robertson Smith and the Sociological Study of Religion* (Chicago: University of Chicago Press, 1974), 57.

18. Ackerman, *J. G. Frazer*, 168–69, 238; Vickery, *The Literary Impact of* The Golden Bough, 134–35. For a choice example, see Frazer, *The Golden Bough*, abridged, 401–02. Frazer's driving motivation to "explain" Jesus's death and resurrection against the backdrop of the category of "dying and rising gods" misses the background of Jewish resurrection. See the survey of G. Nickelsburg, "Resurrection (Early Judaism and Christianity)," *Anchor Bible Dictionary. Volume 5. O–Sh* (ed. D. N. Freedman; New York: Doubleday, 1992), 684–91; and the important study of E. Puech, *La croyance des Esséniens en la vie future: Immortalitee, résurrection, vie éternele? Histoire d'une croyance dans le Judaïsme ancien* (two vols.; Études Bibliques 21–22; Paris: Librairie Lecoffre/Gabalda, 1993). After all, Jesus as the Christ is "the first fruits of all who have fallen asleep" (1 Corinthians 15:20; cf. 1 Thessalonians 4: 13–14). Accordingly, as for Baal, Osiris, Melqart, and Herakles before him (see section 3), Jesus's resurrection was informed by cultural mortuary traditions and beliefs about human beings and their possible afterlife. For a recent defense of comparing Osiris and Jesus, see R. G. Bonnell and V. A. Tobin, "Christ and Osiris: A Comparative Study," *Pharaonic Egypt: The Bible and Christianity* (ed. S. Israelit-Groll; Jerusalem: Magnes, 1985), 1–29 (reference courtesy of G. A. Rendsburg). The claims are based on rather general thematic similarities, with little reference to their cultural background. Curiously, the name of Frazer goes uncited in this study. I am aware of the considerably later Christian presentation of Christ's descent into the underworld and resurrection, a narrative that would seem to belie such a dismissal on my part. However, it is unclear that this Christian presentation is to be traced back to West Semitic mythology. Here one may note that one recent attempt to argue for an ancient Middle Eastern background of the Christian descent theology relies less on the West Semitic evidence of the Baal Cycle and

more on Egyptian texts; see A. Cooper, “Ps 24:7–10: Mythology and Exegesis,” *JBL* 102 (1983), 37–60.

19. Robertson Smith, *Lectures on the Religion of the Semites* (third ed.; ed. S. A. Cook; New York: KTAV, 1927), 411 n. 4, 414 n. 2. Emphasizing the influence of Robertson Smith is not to slight the influence of other contemporary discussions, for example, by W. Mannhardt (see J. Z. Smith, “The Glory, Jest and Riddle,” 371); these are beyond the scope of this investigation.

20. Hvidberg’s work, *Graad og Latter i det Gmale Testmente*, was published originally as an annual University-Programme (1938) and translated into English after his death by Løkkegaard under the title, *Weeping and Laughter in the Old Testament* (trans. F. Løkkegaard; Leiden: Brill; Copenhagen: Nyt Nordisk Forlag/Arnold Busck, 1962); *Thespis* 87 (see also p. 324); Widengren, *Sakrales Königtum im Alten Testament und im Judentum* (Stuttgart: Kohlhammer, 1955), 62–79 (cited and discussed in Mettinger, *In Search of God*, 214 n. 7). To Gaster’s credit, he does not organize his analysis around the figures associated by Frazer and others with this category.

21. *Thespis*, 324.

22. See Ackerman, *J. G. Frazer*, 99, 315 n. 5. It may be noted in passing that a strong critic of Frazer’s second edition of *The Golden Bough* (1899) was Gaster’s father (Ackerman, *J. G. Frazer*, 170). In contrast, Gaster was very much influenced by Frazer; see Gaster’s use of Frazer’s materials in *Thespis*, 41, 49, 84, 217, 359, 367, 423, 424. *Thespis* more generally follows Frazer’s comparative agenda (especially Frazer’s ritualist underpinnings), although obviously Gaster is far more aware of the ancient Near Eastern cultures.

23. For further discussion and evaluation of Gaster’s approach, see *UBC* 60–63.

24. See L. J. Greenspoon, “The Origin of the Idea of Resurrection,” *Traditions in Transformation: Turning Points in Biblical Faith* (ed. B. Halpern and J. D. Levenson; Winona Lake, IN: Eisenbrauns, 1981), 247–321; N. Robertson, “The Ritual Background of the Dying and Rising God in Cyprus and Syro-Palestine,” *HTR* 75 (1982), 314–59.

25. For discussion and criticism, see Barstad, *The Religious Polemics of Amos*, 84 n. 45. As mentioned in note 141, the formula may not mean so

much that Baal has returned from death, but that he is present to the world, and his power is now operative in it.

26. *Thespis*, 156.

27. This is the force of Gaster's translation (*Thespis*, 347–48). This passage is discussed in section 4. For an alternative, see nn. 192, 197.

28. For Ugaritic *'ars* as both "earth" and underworld," see *UBC* 176.

29. Ug V 44–45; noted in *CMHE* 56 n. 49; *TO* 1.79.

30. According to W. G. Lambert, "The Theology of Death," *Death in Mesopotamia: Papers read at the XXVIe Recontre Assyriologique internationale* (ed. B. Alster; Mesopotamia; Copenhagen Studies in Assyriology 8; Kopenhagen: Akademisk forlag, 1980), 64, this goddess may be the spouse of Alla. For Allatum, see also the treaty of Ramses II with Hattusilis (*ANET* 205) and Emar '383.11'.

31. See *CML*^{2} 72, 142.

32. In a letter dated November 8, 1889, written to his publisher, George Macmillan. See Ackerman, *J. G. Frazer*, 95.

33. Ackerman, *J. G. Frazer*, 47, 78, 85, 99, 158. For an interesting reflection on Frazer and the comparative agenda in anthropology, see Smith, "The Glory, Jest and Riddle," 404–42.

34. Ackerman, *J. G. Frazer*, 98, 167–74, 236.

35. James's italics; quoted in Ackerman, *J. G. Frazer*, 175.

36. For this information see R. Rhees, ed., *Ludwig Wittgenstein: Remarks on Frazer's Golden Bough* (trans. A. C. Miles; Atlantic Highlands, NJ: Humanities Press, 1979), v.

37. Rhees, *Ludwig Wittgenstein*, 13e.

38. Gordon, "Canaanite Mythology," *Mythologies of the Ancient World* (ed. S. N. Kramer; Chicago: Quadrangle, 1961), 184. Cf. *Thespis*, 109. For other criticisms by experts in the various fields of ancient Near Eastern studies, see the studies cited by J. Z. Smith, "The Glory, Jest and Riddle," 400 n. 43.

39. This point is made even in the saccharine biography of R. A. Downie, *Frazer and the Golden Bough* (London: Gollancz, 1970), 85–92; see also Ackerman, *J. G. Frazer*, 87, 105, 256. On Malinowski's relationship with Frazer, see Ackerman, *J. G. Frazer*, 172, 266–69. For one anecdote reflecting Evans-Pritchard's acquaintance with Frazer in 1926, see Ackerman, *J. G. Frazer*, 334 n. 2. For cultural reasons behind this sea-change in anthropology following the First World War, see Ackerman, *J. G.*

Frazer, 100. He views the all-embracing detail of Frazer's method as a function of the British Empire's dominance within the world, and along with it, British (and other European) scholars' belief in their capacity to cover the entire world intellectually. With the decline of the empire came the decline of such a comparative enterprise: "[W]e no longer have the cultural self-confidence that underlay the entire enterprise of anthropology."

40. For discussion, see J. Z. Smith, "The Glory, Jest and Riddle," 404–42; idem, "Dying and Rising Gods," 521; cf. Ackerman, *J. G. Frazer*, 233.

41. Downie, *Frazer and the Golden Bough*, 93. See also Ackerman, *J. G. Frazer*, 17–34.

42. Frazer, *The Golden Bough*, abridged, 378, 381, 384, 421, 422, 456.

43. H. W. Attridge and R. A. Oden, *The Syrian Goddess (De Dea* Syria) *Attributed to Lucian* (SBL Texts and Translations 9; Missoula, MT: Scholars, 1976), 14–15. The Vulgate version of Ezek 8:14 used the name of Adonis to translate BH Tammuz. Origen likewise identified Adonis and Tammuz.

44. Frazer, *The Golden Bough*, abridged, 430–1.

45. See the reference to Catullus in Frazer, *The Golden Bough*, abridged, 406. See also 414–15 for an explicit expression of Frazer's prejudices for ancient Greece and against Middle Eastern cultures.

46. J. Z. Smith, "Dying and Rising Gods," 521–27 (see also the other authors mentioned in n. 2).

47. J. Z. Smith, "Dying and Rising Gods," 523–24. For more on Attis and the problems of the classification of him as a "dying and rising god," see P. Lambrechts, "Les fêtes phrygiennes be Cybèle et d'Attis," *Bulletin de l'Institut belge de Rom* 27 (1952), 141–70; idem, *Attis, van herdersknaap tot god* (Amsterdam: Noord-Hollandische Uit. Mig., 1967); M. J. Vermaseren, *Cybele and Attis: The Myth and the Cult* (London: Thames and Hudson, 1977), 92, 112; Södergard, "The Ritualized Bodies of Cybele's Galli and the Methodological Problem of the Plurality of Explanations," 169–93. Attis is said to be dead but not resurrected; he is not a divinity.

48. Frymer-Kensky, "The Tribulations of Marduk. The So-called 'Marduk Ordeal Text'," *JAOS* 103 (1983), 131–41 (reference courtesy of V. Hurowitz). The political background of this text, namely, the death and return to life of the deity in order to express the return of his statue to Babylon in 669 (according to Frymer-Kensky), may serve as a valuable analogue to Baal's death and return to life: Baal's death may reflect Ugarit's

weakness relative to the great empires and his return to life refers to his ongoing cult at Ugarit. In Marduk's case, the text reflects a rather specific, temporary condition, whereas Ugarit's was longer lasting.

49. For summary and bibliography on Osiris, see M. Heerma van Voss, "Osiris," *DDD* 649–51. The older standard work is J. G. Griffiths, *The Origins of Osiris and His Cult* (Numen 40; Leiden: Brill, 1980).

50. See E. Hornung, "Ancient Egyptian Religious Iconography," *Civilizations of the Ancient Near East* (ed. J. M. Sasson; four vols.; New York: Scribner's/Macmillan Library Reference USA, 1995), 3:1718. I am grateful to T. J. Lewis for bringing this reference to my attention.

51. Lichtheim, *Ancient Egyptian Literature. Volume II: The New Kingdom* (Berkeley: University of California Press; 1976), 81.

52. See Hornung, "Ancient Egyptian Religious Iconography," 3:1718, figure 11 (brought to my attention by T. J. Lewis). See further the reserved commentary of Griffiths, *Origins of Osiris and his Cult*, 163–70.

53. See the discussion in L. H. Lesko, "Ancient Egyptian Cosmogonies and Cosmology," *Religion in Ancient Egypt: Gods, Myths, and Personal Practice* (ed. B. E. Shafer; Ithaca, NY: Cornell University Press, 1991), 92–93. This view, common since Breasted, is disputed by Griffiths, *Origins of Osiris and His Cult*, 151–63.

54. Griffiths, *Origins of Osiris and his Cult*, 29. See also J. Z. Smith, "Dying and Rising Gods," 524.

55. De Moor, *An Anthology of Religious Texts from Ugarit* (Nisaba 16; Leiden: Brill, 1987), 88 n. 430. See also F. Løkkegaard, "A Plea for El, the Bull, and Other Ugaritic Miscellanies," *Studia Orientalia Ioanni Pedersen: Septuagenario A. D. VII Id. Nov. Anno MCMLIII a Collegis Discipulis Amicis Dedicata* (Hauniae: Einar Munksgaard, 1953), 230–31.

61. Griffiths, *The Origins of Osiris and his Cult*, 51–62, 84. See also J. Z. Smith, “Dying and Rising Gods,” 525.

62. Regarding Dumuzi generally, see T. Jacobsen, *The Treasures of Darkness: A History of Mesopotamian Religion* (New Haven: Yale University Press, 1976), 25–73; B. Alster, “Tammuz,” *DDD* 828–34. See also A. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars* (Oxford: Clarendon Press, 1986), 136–39, 156–66. For the early iconography of Dumuzi, see W. G. Lambert, “Sumerian Gods: Combining the Evidence of Texts and Art,” *Sumerian Gods and Their Representations* (ed. I. L. Finkel and M. J. Geller; Cuneiform Monographs 7; Groningen: Styx Publications, 1997), 4.

63. See S. N. Kramer, “Sumerian Literature and the Bible,” *Studia et Orientalia Edita a Pontificio Instituto Biblico ad celebrandum Annum ex quo conditum est institutum 1909—VII Mai–1959. Volumen III. Oriens Antiquus* (AB 12. Rome: Pontificio Istituto Biblico, 1959), 198–99 n. 1; E. M. Yamauchi, “Tammuz and the Bible,” *JBL* 84 (1965), 290.

64. S. N. Kramer, “Dumuzi’s Annual Resurrection: An Important Correction to ‘Inanna’s Descent,” *BASOR* 183 (1966), 31. For a translation of the section, see also T. Jacobsen, *The Harps That Once . . . : Sumerian Poetry in Translation* (New Haven: Yale University Press, 1987), 232. For another substitution of this type, cf. W. G. Lambert, “A New Babylonian Descent to the Netherworld,” *Lingering Over Words: Studies in Ancient Near Eastern Literature in Honor of William L. Moran* (ed. T. Abusch, J. Huehnergard and P. Steinkeller; HSS 37; Atlanta, GA: Scholars, 1990), 289–300.

65. Kramer, “Dumuzi’s Annual Resurrection,” 31.

66. BM 100046, line 22, published by S. N. Kramer, “The Death of Dumuzi: A New Sumerian Version,” *Anatolian Studies* 30 (1980), 5–13.

67. For example, see BM 96692, published by S. N. Kramer, “A New Dumuzi Myth,” *RA* 84 (1990), 143–49.

68. Kramer, “The Dumuzi-Inanna Sacred Marriage Rite: Origin, Development, Character,” *Actes de la XVIIe Rencontre Assyriologique Internationale. Université Libre de Bruxelles, 30 juin–4 juillet 1969* (ed. A. Finet; Duculot/Gembloux: Comité belge de recherches en Meesopotamie, 1970), 136.

69. Alster, “Tammuz,” *DDD* 829.

70. Alster, “Tammuz,” *DDD* 828.

71. Foxvog, “Astral Dumuzi,” *The Tablet and the Scroll: Near Eastern Studies in Honor of William H. Hallo* (ed. M. Cohen, D. C. Snell, and D. B. Weisberg; Bethesda, MD: CDL Press, 1993), 103–08. See also Alster, “Tammuz,” *DDD* 830.

72. See *ANET* 101, 102.

73. Translation from B. Foster, *Before the Muses: An Anthology of Akkadian Literature* (two vols.; Bethesda, MD: CDL Press, 1993), 1.432. For discussion, see F. A. M. Wiggermann, “Transtigridian Snake-Gods,” *Sumerian Gods and Their Representations* (ed. I. L. Finkel and M. J. Geller; Cuneiform Monographs 7; Groningen: Styx Publications, 1997), 41–42.

74. Foxvog, “Astral Dumuzi,” 106–07.

75. See Foxvog, “Astral Dumuzi,” 108; and in this section. For the royal setting for this aspect of royal cult, see chapter 3, section 3, n. 56.

76. For the passage, see *CAD E*:122a, 2’. The following points derive from S. Paul, “‘Emigration’ from the Netherworld in the Ancient Near East,” *Immigration and Emigration within the ancient Near East: Festschrift E. Lipiński* (ed. K. van Lerberghe and A. Schoors; OLA 65; Leuven: Peeters/Departement Orië ntalistiek, 1995), 225–26. See Alster, “Tammuz,” *DDD* 833; and K. van der Toorn, *From Her Cradle to Her Grave: The Role of Religion in the Life of the Israelite and Babylonian Woman* (Biblical Seminar 23; trans. S. J. Denning-Bolle; Sheffield: JSOT, 1994), 124. The corresponding Sumerian verb e_{11} applies in *Ishtar’s Descent to the Underworld* to Inanna. Note the latter use of *‘ly for going up from the grave in a late Herodian inscription; see F. M. Cross, “A Note on a Burial Inscription from Mount Scopus,” *IEJ* 33 (1983), 244–45.

77. I owe this point to J. Klein. For a translation, see Jacobsen, *The Harps That Once*, 56–84, with the explicit mention of Ur III rulers on p. 78. See also Jacobsen’s discussion in *Treasures of Darkness*, 66; and Wiggermann, “Transtigridian Snake-Gods,” 41.

81. Cohen, *The Cultic Calendars of the Ancent Near East*, 477.

82. Astour, “The Netherworld and Its Denizens at Ugarit,” *Death in Mesopotamia: Papers Read at the XXVI^{e} Rencontre Assyriologique*

Internationale (ed. B. Alster; Mesopotamia Copenhagen Studies in Assyriology 8; Copenhagen: Akademisk Forlag, 1980), 230–31.

83. Gaster, *Thespis*, 325.

84. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars*, 162.

85. See Jacobsen, *Treasures of Darkness*, 25–27; Wiggermann, "Transtigridian Snake-Gods," 33–34, 41.

86. For documentation regarding this god, see C. Bonnet, *Melqart: Cultes et mythes de l'Heraclès tyrien en méditerranée* (Studia Phoenicia VIII; Bibliothèque de la faculté de philosophie et lettres de Namur 69; Leuven: Uitgeverij Peeters/Presses universitaires de Namur, 1988). For further questions as to his identity, see Bonnet, "Melqart est-il vraiment le Baal de Tyr?" *UF* 27 (1995), 695–701.

87. Clermont-Ganneau, "L'egersis d'Heraclès et le reveil des dieux," *Recueil d'archéologie orientale* 8 (1924), 149–67.

88. Lipiński, "La fête de l'ensevelissement et de la résurrection de Melqart," *Actes de la XVIIe Rencontre Assyriologique Internationale, Université Libre de Bruxelles, 30 juin–4 juillet 1969* (ed. E. Finet; Publications du comité belge de recherches historiques, épigraphiques et archéologiques en Mésopotamie 1; Brussels: Université Libre de Bruxelles, 1970), 30–58.

89. Following Lipiński (see previous note), but with reservations, Teixidor, *The Pagan God: Popular Religion in the Greco-Roman Near East* (Princeton, NJ: Princeton University Press, 1977), 35.

90. C. Bonnet, "Le culte de Melqart à Carthage: Un cas de conservatisme religieux," *Studia Phoenicia IV. Religio Phoenicia: Acta Colloquii Namurcensis habiti diebus 14 et 15 Decembris anni* 1984 (ed. C. Bonnet, E. Lipiński, and P. Marchetti; Namur: Société des Études Classiques, 1986) 214–15; idem, *Melqart*.

91. See references in J. C. Greenfield, "*Larnax Tes Lapethou* III Revisited," *Studia Phoenicia V. Phoenicia and the East Mediterranean in the First Millennium B. C.: Proceedings of the Conference Held in Leuven from the 14th to the 16th of November* 1985 (ed. E. Lipiński; OLA 22; Leuven: Uitgeverij Peeters, 1987), 398.

92. Ribichini, "Melqart," *DDD* 563–65, and see the further secondary literature cited there.

93. Bonnet, "Le culte de Melqart à Carthage, 215 n. 28.

94. See KAI III.62. CIS i 377:4–6 shows that the office could be held by father and son. The role did not preclude the holding of another office such as judge (see Berger *RHR* [1914] 1, line 5) or priest (RES 553.3–4). See also Bonnet, "Le culte de Melqart à Carthage," 216.

95. In some cases the title appears in apposition with "the title *mtrḥ ʿštrny*, <<Astartean bridegroom>>, alluding in all likelihood to a function in the *hieros gamos*" (Greenfield, "*Larnax Tes Lapethou* III Revisited," 399; Greenfield's italics). The text is clear, for example, in the case of one inscription from Rhodes (KAI 44). For criticisms of this view, which will be left aside in my further discussion, see J. C. L. Gibson, *Textbook of Syrian Semitic Inscriptions. Volume III: Phoenician Inscriptions including Inscriptions in the Mixed Dialect of Arslan Tash* (Oxford: Clarendon Press, 1982), 146.

96. Originally published by A. M. Honeyman, "Larnax Tes Lapethou: A Third Phoenician Inscription," *Le Muséon* 51 (1938), 285–98. For the issue of the date, see Greenfield, "*Larnax Tes Lapethou* III Revisited," 395. The following information draws heavily from Greenfield, "*Larnax Tes Lapethou* III Revisited," 397–99.

97. Greenfield, "*Larnax Tes Lapethou* III Revisited," 398. The words, *mqm ʾlm mlt*, in CIS i 5980 have been interpreted as "the one who raises the god, Melqart" (Bonnet, "Le culte de Melqart à Carthage," 215 n. 28). This view of *mlt* is debated. For references, see J. Hoftijzer and K. Jongeling, *Dictionary of the Northwest Semitic Inscriptions. Part Two: M–T* (HdO; Leiden: Brill, 1995), 1003.

98. *ʾtpnmlqrt* in line 2 has been taken as a PN, but P. Schmitz (personal communication) argues that it is an appositive of specification, meaning "in the presence of Melqart."

99. See T. H. McAlpine, *Sleep, Divine & Human, in the Old Testament* (JSOTSup 38; Sheffield: JSOT Press, 1987), 233 n. 13.

100. See the considered remarks of Gibson, Textbook of Syrian Semitic Inscriptions. Volume III, 145–47.

101. Honeyman, "Larnax Tes Lapethou," 288, 297. So also P. Magnanini, *Le iscrizioni fenicie dell'oriente: Testi, Traduzioni, Glossary* (Rome: Istituto di Studi del Vicino Oriente Universita' degli Studi di Roma, 1973), 183.

102. Contra Greenfield ("*Larnax Tes Lapethou* III Revisited," 397–98), LL III.6 may suggest that *ʾlm* could refer to a goddess: *bbt ʾlm ʿštrt*.

The simplest rendering is “in the house of the goddess, Ashtart” (see Honeyman, “Larnax Tes Lapethou,” 297).

103. H. P. Müller, “Der phonizisch-punische *mqm ’lm* im Licht einer althebräischen Isoglosse,” *Or* 65 (1991), 116–22.

104. In an article responding to my review (*JAOS* 110 [1990], 590–92) of her book, *Melqart*, C. Bonnet marshalls evidence to demonstrate the equation of Baal of Tyre with Melqart, about which I expressed reservations for the *Phoenician mainland*. The very late inscription from Arados that Bonnet cites (Melqart, 114–15; “Melqart,” 697) can be used to support this equation, but it is not altogether clear and it is very late. It hardly helps for the Iron Age, or perhaps considerably later. See further Smith, “Melqart, Baal of Tyre and Dr. Bonnet,” *UF* 28 (1996), 773–75. However, future discoveries may prove Bonnet’s position.

105. For text and translation, see H. W. Attridge and R. A. Oden, *Philo of Byblos. The Phoenician History: Introduction, Critical Text, Translation, Notes* (CBQMS 9; Washington, DC: Catholic Biblical Association of America, 1981), 52, 53. Philo of Byblos identifies them further with Demarous, known from the Ugaritic texts as a title of Baal (see Attridge and Oden, *Philo of Byblos*, 90 n. 118). Unfortunately, equations of deities hardly guarantee equations of functions and features in different cultures.

106. For text and translation, see H. W. Attridge and R. A. Oden, *The Syria Goddess (De Dea Syria) Attributed to Lucian* (SBL Texts and Translations 9, Graeco-Roman Religion series 1; Missoula, MT: Scholars, 1976), 10, 11.

107. For a more extended commentary on the data in this paragraph, with a view to support the idea of the death and resurrection of Melqart-Herakles, see Bonnet, *Melqart*, 33–40.

108. R. Marcus in H. St. J. Thackeray and R. Marcus, *Josephus V. Jewish Antiquities, Books V–VIII* (Loeb Classical Library; London: William Heinemann; Cambridge, MA: Harvard University Press, 1934), 649–51.

109. Both positions are presented by Marcus in Thackeray and Marcus, *Josephus V. Jewish Antiquities, Books V–VIII*, 651 n. a. See also Müller, “Der phonizisch-punische *mqm ’lm* im Licht einer althebraischen Isoglosse,” 114–15 (reference courtesy of T. N. D. Mettinger).

110. Thackeray, *The Life/Against Apion* (Loeb Classical Library; London: William Heinemann; Cambridge, MA: Harvard University Press, 1926), 209–11.

111. F. Abel, “Inscriptions de Transjordane et de haute Galilée,” *RB* n. s. 5 (1908), 573. See also the discussions in Clermont-Ganneau, “L’egersis d’Heraclès et le reveil des dieux,” 149–67; Teixidor, *The Pagan God*, 35; Gibson, *Syrian Semitic Inscriptions. Volume III*, 145–46.

112. Tsirkin, “The Labours,” 21.

113. Tsirkin, “The Labours,” 22–23, citing Nonnos’ *Dyonisiaka* XI 358.

114. See the previous citation.

115. The following remarks about Adonis on the Greek side are based largely on M. Detienne, *The Gardens of Adonis: Spices in Greek Mythology* (trans. J. Lloyd; Atlantic Highlands, NJ: Humanities Press, 1977). For the West Semitic side, see E. Lipiński, *Dieux et déesses de l’univers phénicien et punique* (OLA 64; Leuven: Uitgeverij Peeters/Departement Oosterse Studies, 1995), 90–105; S. Ribichini, “Adonis,” *DDD* 7–10; B. Soyez, *Byblos et la fête des Adonis* (EPRO 60; Leiden: Brill, 1977).

116. Loretz, “Vom Baal-Epitheton *adn* zu Adonis und Adonij,” *UF* 12 (1980), 287–92; K. Spronk, *Beatific Afterlife in Ancient Israel and in the Ancient Near East* (AOAT 219; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener, 1986), 194; de Moor, *An Anthology*, 90 n. 435. For Adonis at Byblos, see *De Dea Syria* 6 (Attridge and Oden, *The Syrian Goddess*, 12, 13).

117. Attridge and Oden, *The Syrian Goddess*, 12, 13.

118. J. Z. Smith (“Dying and Rising Gods,” 522) believes that Adonis is represented in statuary form in this passage despite no explicit mention of such.

119. J. Z. Smith, “Dying and Rising Gods,” 522.

120. J. Z. Smith, “Dying and Rising Gods,” 522.

121. Detienne, *Gardens of Adonis*, 1–2.

122. See *Thespis* 129; S. Ribichini, *Adonis: Aspetti ‘Orientali’ di un mito greco* (Studi Semitici 55; Rome: Consiglio Nazionale di Ricerche, 1981); see also O. Loretz, “Vom Baal-Epitheton *adn* zu Adonis und Adonij,” 287–92.

123. Robertson, “The Ritual Background of the Dying and Rising God in Cyprus and Syro-Palestine,” *HTR* 75 (1982), 314–59.

124. On this point Robertson (“The Ritual Background of the Dying and Rising God in Cyprus and Syro-Palestine,” 347) incorrectly says that “[e]veryone agrees that the manner of [Mot’s] death reflects the threshing

and the winnowing of grain." See J. F. Healey, "Burning the Corn: New Light on the Killing of Motu," *Or* 52 (1983), 251.

125. D. B. Redford, "The Sea and the Goddess," *Studies in Egyptology Presented to Miriam Lichtheim* (ed. S. Israelit-Groll; two vols.; Jerusalem: Magnes, 1990), 2.828.

126. Frazer, *The Golden Bough*, abridged, 378. Note W. G. Lambert's comments about cultural influence in his discussion of the Dumuzi-Tammuz traditions, "A New Babylonian Descent to the Netherworld," 290:

> The story of the rape of Persephone in Greek myth is a very close parallel, and from a more comprehensive study of ancient mythology from the Aegean to India, it seems that many such similarities are due both to a common intellectual heritage going back at least to Neolithic times and to interaction of places and areas on one another in prehistoric and historic times.

127. See J. Gray, "Baal," *IDB* 1:329; Ackerman, *Under Every Green Tree*, 79–92.

128. This is an old suggestion to be found, for example, in T. Cheyne's commentary on Isaiah. See also Mettinger, *In Search of God*, 84; Ackerman, *Under Every Green Tree*, 83. This cult may have influenced the cult of Hadad-Rimmon (Zech 12:10–11); on this figure, see J. C. Greenfield, "The Aramean God Ramman/Rimmon," *IEJ* 26 (1976), 195–98. For the medieval cult of Ta'uz conducted by the Sabeans of Harran, see Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars*, 162.

129. The possibility was brought to my attention by Karel van der Toorn. On the passage, see Ackerman, *Under Every Green Tree*, 83. Following Albright, Ackerman assumes that Damu is Dumuzi. It would appear that the two are distinguished, yet sometimes identified. See Jacobsen, *Treasures of Darkness*, 25–27, 63–73. For EA 84:31. cf. N. Na'aman, "On Gods and Scribal Traditions in the Amarna Letters," *UF* 22 (1990), 248–50.

130. Detienne, *The Gardens of Adonis*, 128.

131. See J. A. Fitzmyer, "The Phoenician Inscription from Pyrgi," *JAOS* 86 (1966), 294; Gibson, *Textbook of Syrian Semitic Inscriptions. Volume III*, 151–59; G. N. Knoppers, "'The God in His Temple': The

Phoenician Text from Pyrgi as a Funerary Inscription," *JNES* 51 (1992), 105–20; P. C. Schmitz, "The Phoenician Text from the Etruscan Sanctuary at Pyrgi," *JAOS* 115 (1995), 562, 565; Hoftijzer and Jongeling, *Dictionary of the Northwest Semitic Inscriptions. Part Two: M–T*, 984.

132. Cf. the plausible, but quite speculative, discussion of Knoppers, "'The God in His Temple'," 111–2.

133. As suggested to me by P. Schmitz.

134. Gibson, *Textbook of Syrian Semitic Inscriptions. Volume III*, 158.

135. Fitzmyer, "The Phoenician Inscription from Pyrgi," 294.

136. Knoppers, "'The God in His Temple,'" 116.

137. Knoppers, "'The God in His Temple,'" 120.

138. Tikva Frymer-Kensky reminds me of Persephone in Greek tradition. See W. Burkert, *Greek Religion* (trans. J. Raffan; Cambridge, MA: Harvard University Press, 1985), 159–60.

139. In addition to the Sumerian material, note also the claims made by R. Amiran for an Early Bronze depiction from Arad: a stick figure shows two postures, standing and lying down, with corn for an ear and roots for feet. Amiran regards the figure as a depiction of the death and resurrection of a fertility god. See Amiran, "A Cult Stele from Arad," *IEJ* 22 (1972), 86–88; cf. A. Mazar, *Archaeology of the Land of the Bible 10,000–586* B.C.E. (Anchor Bible Reference Library; New York: Doubleday, 1990), 137. See also D. Schmandt-Besserat who entertains such possibilities for Pre-Pottery Neolithic B material from 'Ain Ghazal; see Schmandt-Besserat, "'Ain Ghazal 'Monumental' Figures," *BASOR* 310 (1998), 14.

140. Bonnet, *Melqart: Cultes et mythes de l'Heraclès tyrien en méditerranée*, 173; M. S. Smith and E. Bloch-Smith, "Death and Afterlife in Ugarit and Israel" (review article of K. Spronk, *Beatific Afterlife in Ancient Israel and in the Ancient Near East*), JAOS 108 (1990), 591.

141. Older attempts to take *ḥy 'al'iyn b'l* ("Mighty Baal lives") in CAT 1.6 III 2, 8, 20 as a reference to Baal's resurrection have scant support. H. Barstad comments: "The usefulness, and even possibility, of isolating one formula like *ḥy 'aliyn b'l* and giving it a content of such wide-reaching consequences as has been done is dubious, to say the least." Barstad, *The Religious Polemics of Amos*, 150–51. As noted, the formula may not mean so much that Baal has returned from death, but that he is present to the world and his power is now operative in it.

142. The count derives from D. Pardee, “The Structure of RS 1.002,” *Semitic Studies in Honor of Wolf Leslau: On the Occasion of his Eighty-Fifth Birthday. November 14th, 1991* (ed. A. S. Kaye; two vols.; Wiesbaden: Harrassowitz, 1991), 2.1181 n. 2: “There are approximately thirty reasonably well-preserved ritual texts in the Ugaritic language, and another forty or so fragmentary texts.” The count continues to rise. RS 1992.2014, an incantation similar to RIH 78/20, has appeared in translation and notes by D. Pardee in W. W. Hallo, ed., *The Context of Scripture: Volume I. Canonical Compositions from the Biblical World* (Leiden: Brill, 1997), 327–28. Approximately sixty-six new Ugaritic texts from Urtennu’s family archive have been reported (as well as three hundred Akkadian texts). See M. Dietrich and O. Loretz, “Neue Tafelfunde der Grabungskampagne 1994 in Ugarit,” *UF* 26 (1994), 21.

143. Ackerman, *Under Every Green Tree*, 86.

144. It is interesting that Gaster (*Thespis*, 270–376) discusses this type, but he did not include Baal under this rubric, preferring instead what he called “the comprehensive type.”

145. J. Z. Smith, “Dying and Rising Gods,” 521.

146. J. Z. Smith, “Dying and Rising Gods,” 521–22.

147. A. Kapelrud, *Baal in the Ras Shamra Texts* (Copenhagen: Gad, 1952), 38–39; Gaster, *Thespis*, 215; S. Parker, “KTU 1.16 III, the Myth of the Absent God and 1 Kings 18,” *UF* 21 (1989), 295–96; idem, *The Pre-biblical Narrative Tradition: Essays on the Ugaritic Poems Keret and Aqhat* (SBL Resources for Biblical Studies 24; Atlanta, GA: Scholars, 1989), 186–87. The following study is not available to me: George C. Moore, “The Disappearing Deity Motif in Hittite Texts: A Study in Religious History” (B.A. thesis, Oxford, Faculty of Oriental Studies, 1975).

148. For this information about CTH 323–336, see G. Beckman, “Mythologie. A. III. Bei den Hethitern,” *Reallexikon der Assyriologie* 8:566–67. My thanks go to G. Beckman for providing me with his article.

149. H. Hoffner, *Hittite Myths* (ed. G. Beckman; SBL Writings from the Ancient World 2; Atlanta, GA: Scholars, 1990), 14–20.

150. Hoffner, *Hittite Myths*, 15–20.

151. *ANET* 126–27; Hoffner, *Hittite Myths*, 14–17. Ritual texts from Emar, such as Emar 446:47–57, show a similar concern for life and death. Cohen (*The Cultic Calendars of the Ancient Near East*, 356) describes a series of rituals in Emar 446:

> On the 15th of the month before ninkur, there were special sacrifices at the ox stalls, at the horse stables, and in the garden of the *birikku* of Ba‘al. There was also a special ceremony involving seeding: an offering was made to Dagan-Lord-of-the-Seeds and then the diviner strewed seeds over the ground, either symbolically planting the first seeds of the season or reading the signs for the upcoming planting season from the pattern of the scattered seeds.

The text in question has many breaks. For this reason Cohen’s translation (*The Cultic Calendars of the Ancient Near East*, 358) of the pertinent passage is cited in full:

> On the 15th they bring Šaggar down to the oxen’s stalls (and) they slaughter (an ox?). They slaughter a sheep at the horses’ stables. In the same month, (during) the evening, they take out (the statues of the gods (?). They slaughter one sheep in the presence of the men who . . . then first a sheep at the garden of the . . . (structure) of Ba‘al, (and then) [a sheep for] Dagan-Lord-of-the-Seeds. The diviners toss seeds about onto the ground.

As the breaks and question-marks indicate, many details about these rituals are unknown. See further D. Fleming, “New Moon Celebration Once a Year: Emar’s *Ḫidašu* of Dagan,” *Immigration and Emigration within the Ancient Near East: Festschrift E. Lipiński* (ed. K. van Lerberghe and A. Schoors; OLA 65; Leuven: Peters/Department Oriëntalistiek, 1995), 62. Cohen’s inferences about the ritual of the seeds are reasonable. The title of Dagan here seems to connect him to the concern about seeds in this context. By further inference one might draw Baal into this discussion. It would seem plausible to regard the rituals represented here as concerned for natural fertility and as trying to secure the support of Baal and Dagan in engendering it. What further relevance this text may hold for understanding Baal cannot be determined at present, but the evidence of the Baal Cycle alone indicates the importance of Baal for natural fertility.

152. For this point in the latter text, see *UBC* 105–14.

153. Parker, “KTU 1.16 III, the Myth of the Absent God and 1 Kings 18,” *UF* 21 (1989), 283–96.

154. Hoffner, *Hittite Myths*, 22–23.

155. Hoffner, “Second Millennium Antecedents to the Hebrew *’Ôḇ*,” *JBL* 86 (1967), 385–401, esp. 389–92. For a critique of Hoffner’s interpretation of BH *’ôb* as “pit,” see T. J. Lewis, *Cults of the Dead in Ancient Israel and Ugarit* (HSM 39; Atlanta, GA: Scholars, 1989), 57–58.

156. J. Z. Smith “Dying and Rising Gods,” 521–22.

157. Mot informs Baal at the end of his speech demanding Baal’s descent into the underworld: “And you will know, O god, that you are dead” (1.5 V 16–17; cf. Ps 82:7a). Kings occupy a zone between divinity and humanity. Ideally speaking, Kirta cannot die since he is a “son of El,” the cliché used in the Baal Cycle for divinities. After all, as indicated in the last of the remarks made by Kirta’s son, deities do not die and Kirta belongs to their rank. Yet Kirta is indisputably mortal. The text of Kirta here faces a similar problem as the medieval political theory of the “king’s two bodies” (E. H. Kantorowicz, *The King’s Two Bodies: A Study in Medieval Political Theology* [Princeton, NJ: Princeton University Press, 1957)] brought to my attention by T. Frymer-Kensky): “the King has in him two bodies, *viz*., a Body natural, and a Body politic. His Body natural . . . is a Body mortal. . . . But his Body politic is a Body that cannot be seen or handled” (p. 7, quoting Edmund Plowden); “The King’s Two Bodies thus form one unit indivisible, each being fully contained in the other. . . . Not only is the body politic ‘more ample and large’ than the body natural, but there dwells in the former certain truly mysterious forces which reduce, or even remove, the imperfections of the fragile human nature” (p. 9). “The king is a twinned being, human and divine (49).” The political life of the king is ritually expressed in this doctrine: the king in his social-political role literally embodies the dynasty in its all various functions and its putative qualities, including its eternity, yet in his own personal self is as mortal as any other person. The text of Kirta poses the problem of the clash of the “king’s two bodies” in narrative form. Just as for Kirta, for the medieval king, time exposed the underlying difficulty of the king’s dual natures, as Kantorowicz (*The King’s Two Bodies*, 171; see further p. 271) observes:

> [T]he king was . . . a “temporal being,” strictly “within Time,” and subjected, like any ordinary human being, to the effects of time. In other respects, however, that is, with regard to things *quasi sacrae* or public, he was unaffected by Time and its prescriptive power; like the

> “holy sprites and angels,” he was beyond Time and therewith perpetual or sempiternal. The king, at least with regard to Time, had obviously “two natures”—one which was temporal and by which he conformed with the conditions of other men, and another which was perpetual and by which he outlasted and defeated all other beings.

It remains only to mention that the origins of this theology are profoundly Christological, as Kantorowicz’s discussion amply documents; this Christology is in turn indebted ultimately to the West Semitic royal ideology as reflected in the text of Kirta and the so-called royal psalms (Psalms 2, 72, 89).

158. Hornung, *Conceptions of God in Ancient Egypt: The One and the Many* (trans. J. Baines; Ithaca, NY: Cornell University Press, 1985), 152.

159. Readings are based on D. Pardee, “Poetry in Ugaritic Ritual Texts,” *Verse in Ancient Near Eastern Prose* (ed. J. C. de Moor and W. G. E. Watson; AOAT 42; Kevelaer: Bercker & Butzon; Neukirchen-Vluyn: Neukirchener, 1993), 208–10; Pardee’s partial readings with partial brackets are not distinguished here. For the poetic divisions, see Pardee, “Poetry in Ugaritic Ritual Texts,” 208–10. Issues of interpretation have been reviewed in some detail in Lewis, *Cults of the Dead*, 5–46; and P. Bordreuil and D. Pardee, “Les textes en cunéiformes alphabétiques,” *Une bibliothèque au sud de la ville: Les textes de la 34e campagne (1973)* (Ras Shamra-Ougarit VII; Paris: Éditions Recherche sur les Civilisations, 1991), 151–63; these issues are not repeated here. B. Schmidt’s innovations, both grammatical and interpretational, are often misinformed. See Schmidt, *Israel’s Beneficent Dead: Ancestor Cult and Necromancy in Ancient Israelite Religion and Tradition* (FAT 11; Tübingen: J. C. B. Mohr [Siebeck], 1994), 100–20; and the review of M. S. Smith in *CBQ* 58 (1996), 724–25. For bibliography, see Bordreuil and Pardee, “Les textes en cunéiformes alphabétiques,” 152; Pardee, “Poetry in Ugaritic Ritual Texts,” 208–10; Schmidt, *Israel’s Beneficent Dead*, 100–20. Whether or not Emar 6.452 proves a comparable text remains to be seen (brought to my attention by T. J. Lewis). For now see W. T. Pitard, “Care of the Dead at Emar,” *Emar: The History, Religion, and Culture of a Syrian Town in the Late Bronze Age* (ed. M. Chavalas; Bethesda, MD: CDL Press, 1996), 130–37.

160. The vocative may take the accusative as in Arabic. The only form that poses problems for this reconstruction is *ks'i* in line 13, which may however reflect loss of final ending (hence **ks'i'a*). For discussion of the problem, see J. G. Taylor, "A Long-Awaited Vocative Singular Noun with Final Aleph in Ugaritic (KTU 1.161.13)?" *UF* 17 (1986), 315–18.

161. A number of writers compare Arabic *'adima*, "to be wanting, lacking, needy, destitute." W. W. Hallo (personal communication) has suggested the possibility of a threefold repetition of *'dmt*, "how long?" Hallo compares BH *'ad-mātay* and Akkadian *adi mati*, used in lament literature (for the Akkadian expression, see *CAD A/1*:119a).

162. A singular may be involved; if so, it would refer, in my mind, to Niqmaddu.

163. Grammatically, "to" is another feasible interpretation, but the funerary ritual calls for descent from the throne and probably not to a throne located in the underworld, nor is the throne invoked here. See Lewis, *Cults of the Dead*, 13; J. G. Taylor, "A First and Last Thing to Do in Mourning: *KTU* 1.161 and Some Parallels," *Ascribe to the Lord: Biblical & Other Studies in Memory of Peter C. Craigie* (ed. L. Eslinger and G. Taylor; JSOTSup 647; Sheffield: Sheffield Academic Press, 1988), 153; M. Dietrich and O. Loretz, "Grabbeigaben für verstorbenen König: Bemerkungen zur Neuausgabe von RS 34.126 = KTU 1.161," *UF* 23 (1991), 106.

164. Pardee ("Poetry in Ugaritic Ritual Texts," 209) reads *ksh* and suggests that the reading should be *ks'i*. Or the reading is perhaps *ks'ih*.

165. Dietrich and Loretz ("Grabbeigaben," 106): "zusammen mit."

166. Reading with Pardee ("Poetry in Ugaritic Ritual Texts," 209) for *thm*.

167. It would be possible to take the first instance of *šlm* here with the previous line in the meaning of "peace-offering," except that the word with this meaning is usually spelled *šlmm*. As a result, it seems preferable to take the word here with this line. Given the structure of lines 32–34, however, one might suspect here a dittography. In any case, the second use of *šlm* here may be understood as a blessing. Cf. *šlm* in 1.123.1–3, taken as "Hail" plus DN in the vocative (so del Olmo Lete, *Canaanite Religion*, 343).

168. For *b'at*, Pardee ("Poetry in Ugaritic Ritual Texts," 210) reads as another possibility *bnh*, "her/his sons." Parallelism favors Pardee's rendering here.

169. Others are less confident as to the reading of the final letter, which Pardee marks with partial brackets. As a result, Lewis (*Cults of the Dead*, 10) offers this possibility as well as an alternative, *[’a]ry[h]*, “his kinsmen.”

170. The translation “shades” may be wishful thinking on the part of its supporters because all three root letters of geminate roots would appear in the consonantal writing in Ugaritic. Lewis, *The Cult of the Dead*, *11*, *discusses* this problem at great length. The alternatives are hardly more attractive or free of difficulties. Could a cultic statue (**ʾalmu*) of the recently deceased king be involved (a query put to me by S. Tinney)?

171. Cf. the plural construct form presumably in 1.91.2, assuming that lines 3–20 of this text involve a list of sacrificial rituals (e.g., del Olmo Lete, *Canaanite Religion*, 257).

172. See M. H. Pope, “Notes on the Rephaim Texts from Ugarit,” *Essays on the Ancient Near East in Memory of Jacob Joel Finkelstein* (ed. M. de Jong Ellis; Memoirs of the Connecticut Academy of Arts and Sciences 19; Hamden, CT: Archon, 1977), 177.

173. W. Pitard, “RS 34.126: Notes on the Text,” MAARAV 4/1 (1987), 75–86; B. A. Levine and J. M. de Tarragon, “Dead Kings and Rephaim: the Patrons of the Ugaritic Dynasty,” *JAOS* 104 (1984), 652; D. Sivan, A *Grammar of the Ugaritic Language* (HdO1/28; Leiden: Brill, 1997), 114.

174. Lewis, *Cults of the Dead*, 7–8; Pardee, “Poetry in Ugaritic Ritual Texts,” 208–09.

175. See Schmidt, *Israel’s Beneficent Dead*, *112–13*.

176. See *UT* 9.31; D. Marcus, “The Qal Passive in Ugaritic,” *JANES* 3 (1970), 102–11; D. Sivan, A *Grammar of the Ugaritic Language*, 126–28. For the G-stem passive in West Semitic languages generally, see also R. J. Williams, “The Passive *qal* Theme in Hebrew,” *Essays on the Ancient Semitic World* (ed. J. W. Wevers and D. B. Redford; Toronto: University of Toronto Press, 1970), 43–50.

177. Pardee, “Epigraphic and Philological Notes,” *UF* 19 (1987), 211–6.

178. Levine and de Tarragon call the three words “a rare triplication”; see Levine and de Tarragon, “Dead Kings and Rephaim,” 652. On this possibility for Isaiah 6:3, I am indebted to Professor Levine.

179. So Bordreuil and Pardee, “Les textes,” 158.

180. See Lewis, *Cults of the Dead*, 43. Given the implicit command to Ammurapi in the preceding section, that he is to lament for the dead king, I am inclined to see Ammurapi as the addressee in this section as well. The parallel wording with other texts also militates in favor of this view. A third possibility, namely, the royal furniture, is contextually plausible, but the parallel wording would militate against this view. For a thorough, critical review, see D. T. Tsumura, "The Interpretation of the Ugaritic Funerary Text KTU 1.161," *Official Cult and Popular Religion in the Ancient Near East: Papers of the First Colloquium on the Ancient Near East—The City and Its Life held at the Middle Eastern Culture Center in Japan (Mitaka, Tokyo). March 20–22, 1992* (ed. E. Matsushima; Heidelberg: Universitätsverlag C. Winter, 1993), 40–55, esp. 45–52. As this discussion indicates, no view is without its difficulty.

181. Unless the forms are taken as denominative verbs, with Lewis, *Cults of the Dead*, 9, 26–27; and apparently Pardee, "Poetry in Ugaritic Ritual Texts," 209.

182. See D. Freedman, "Counting Formulas in Akkadian Epics," *JANES* 3/2 (1970–71), 65–81.

183. See Lewis, *Cults of the Dead*, 27.

184. *UT* 19.2715; J. M. de Tarragon, *Le culte à Ugarit d'après les textes de la pratique en cunéformes alphabétiques* (Cahiers de la Revue Biblique 19; Paris: Gabalda, 1980), 58, 75 n. 11.

185. Levine and de Tarragon, "Dead Kings and Rephaim," 649–59, esp. 656–58. See also Lewis, *Cults of the Dead*, 41–43; and G. A. Anderson, A *Time to Mourn, A Time to Dance: The Expressions of Grief and Joy in Israelite Religion* (University Park, PA: Pennsylvania State University Press, 1991), 60–67. I would favor Lewis's view that it is Ammurapi who is told to descend aided by the illumination of Shapshu.

186. Levine and de Tarragon, "Dead Kings and Rephaim," 657. The authors' italics.

187. See Bordreuil and Pardee, "Les textes," 158.

188. See n. 180.

189. Levine and de Tarragon, "Dead Kings and Rephaim," 657.

190. The prepositional phrase *ʿmh* could be translated "with her" or "to him." The preposition *ʿm* commonly means "with" in the sense of accompaniment (e.g., 1.1 IV 14; 1.3 III 24, 25, IV 11–12; 1.5 I 22–23, 24–25, V 8, 10–11, 20) and so it might be thought that *ʿmh* is to be rendered

“with her,” namely, Anat. Accordingly, **yrd ʿm* might seem to mean “to descend with” (as opposed to “to descend to”); see D. Pardee, “The Preposition in Ugaritic,” *UF* 7 (175), 350, *UF* 8 (1976), 279 (see also 317–8). Yet *ʿm* is not uncommon with verbs in the sense of “to, toward”: *ytn *pnm ʿm* in 1.1 IV 21–22; 1.2 I 4, 14, 19; 1.3 III 37, IV 21; 1.4 V 23, VIII 1–4; 1.5 I 9–10, II 14–15, in some cases parallel with *tk* (e.g., 1.2 I 19; 1.5 II 14–15); and **lsmʾm* in 1.3 III 19 (cf. 1.1 IV 11 and commonly reconstructed elsewhere in the same formulas). Finally, it is to be noted that **yrd l-* means “to descend from” (*UF* 7 1975], 350), and no other preposition with **yrd* means “descends to.” Therefore, **yrd ʿm* may mean “descend to.” Note Pardee’s comments on the overlap between *l-*, “to,” and *ʿm*, “with” in *UF* 8 (1976), 317–18. Accordingly, Baal might seem to be the object of the preposition in order to indicate Shapshu’s role in accompanying Anat to the underworld to locate his corpse.

191. This clause is narrative and not direct discourse, although on purely grammatical grounds it would be possible to render it so (“To him you will descend, O Divine Light, Shapshu”). The sense is indicated from the following clause beginning with *ʿd* (1.6 I 9). This is a subordinating conjunction that begins clauses governed by a preceding independent verb, in this case *trd*. Anderson (*A Time to Mourn*, 63–64) divides the lines differently, rendering: “We [Anat and Shapshu] are descending into the netherworld, to the place of Baal/The torch of the gods, Shapshu, descended.” This division is unlikely, as “into the netherworld” is parallel to “to Baal.” (His translation omits the prepositional phrase *ʿmh*.) Furthermore, parallels in 1.161.20–21 and Gen 37:35 makes it unlikely that *ʾaṯr bʿl* is to be understood literally as “to the place of Baal.”

192. It is this language of the dead king that may lie behind the allusion to *bʿl* in 1.17 VI 30 and not the Storm-god, Baal, as generally thought. See n. 197.

193. Levine and de Tarragon, “Dead Kings and Rephaim,” 657.

194. Based on *ʾard* in the parallel in 1.5 VI 25, some scholars emend to *ʾard*, but the emendation is not necessary. It could be argued that the context with both Anat and Shapshu would comport with the plural form.

195. The description of Anat descending and fetching the corpse of Baal may also help to locate the *Sitz im Leben* of CAT 1.161; the comparison of the two texts would point to CAT 1.161 as a funerary text on behalf of the most recently deceased king, Niqmaddu, as argued by Lewis

(*The Cult of the Dead*, 32), and perhaps not a text commemorating his death, as suggested by Levine and de Tarragon ("Dead Kings and Rephaim," 654). In the narrative (1.6 I 11–15), the sun-goddess Shapshu loads the body onto Anat so that she can provide Baal with an appropriate burial and funerary offerings. These narrative details presume the sun-goddess's capacity to aid in locating the deceased and it may also presuppose a role of the sun-deity in bringing up the deceased in the ritual of necromancy. This role is known for Shamash in Mesopotamian ritual of necromancy (see I. Finkel, "Necromancy in Ancient Mesopotamia," *AfO* 29–30 [1983–84], 1–17; Lewis, *The Cults of the Dead*, 38) and the same may lie behind the narrative account of Shapshu's setting Baal's corpse on Anat's shoulders in 1.6 I 14–15. These texts may help to provide some indication as to the result of the descent in CAT 1.161, namely, the making ritually present, conceived as the raising of the deceased from the underworld in order to receive the offerings made in lines 27–31. Does this use of **ʿ*ly* in 1.6 I 15 echo the language of necromancy (*elû*), noted in the case of Dumuzi (see n. 76)?

196. CAT 1.113 may also bear on the royal cult of the dead (see D. Pardee, *Les textes paramythologiques de la 24^e^ campagne (1961)* [Paris: Éditions Recherche sur la Civilisations, 1988], 170–78), as attested in 1.3 I and 1.17 VI. The front of the text describes musical instrumentation, either described as *nʿm*, "goodly," or perhaps played by a figure called *nʿm*. The back of the text contains a king list originally containing at least thirty-two names and perhaps as many as fifty-two (Pardee, *Les textes paramythologiques*, 173). Despite the differences in details among the texts in question (Pardee, *Les textes paramythologiques*, 170–78), it would appear that the royal cult of Ugarit invoked the dead ancestors (CAT 1.161) and perhaps this cult is reflected in the musical instrumentation in CAT 1.113. CAT 1.3 I and 1.17 V 28–33 apparently drew on this imagery. A further connection among these texts might involve 1.108, if the figure of *rpʿu* who plays music in this text is to be identified with *nʿm* or is to be viewed as the eponymous tribal figure corresponding or related to the royal figure of *nʿm*. This figure of *rpʾu* leads the musical entertainment of the *hbr kṯr tbm*, who may be the Rephaim as suggested by M. S. Smith (in Pardee, *Les textes paramythologiques*, 100 n. 111).

197. This crucial insight about this text was made by J. C. Greenfield, "Une rite religieux araméen et ses parallèles," *RB* 80 (1973), 46–52.

Accordingly, I am prepared to entertain the possibility that the *b'l* mentioned in 1.17 VI 28–33 is not the god Baal but the figure of the deceased human "lord."

198. For this problem in Egypt and Mesopotamia, see W. W. Hallo, *Origins: The Ancient Near Eastern Background of Some Modern Western Institutions* (Studies in the History and Culture of the Ancient Near East VI; Leiden: Brill, 1996), 152, 196–210 (esp. 203), 229.

199. See n. 157 for the comments regarding Kirta. Like Kirta, the description of Baal embodies the enigma of royal death and eternity. Baal, the patron of Ugaritic kings, undergoes a death congruent with the conceptual tension understood between the divine character of kings and the dynasty and their well-known mortal nature. Yet Baal is a major god, and no major deity with a current cult remains dead in mythological narratives. On many of these texts and their royal background, see esp. J. F. Healey, "The Immortality of the King: Ugarit and the Psalms," *Or* 53 (1984), 245–54.

200. For this view of sleep, see B. Batto, "The Sleeping God: An Ancient Near Eastern Motif of Divine Sovereignty," *Bib* 68 (1987), 153–77. For divine sleep and death, see also McAlpine, *Sleep*, 135–49, 181–99; Mettinger, *In Search of God*, 88–89. McAlpine and Mettinger also note some differences in the uses of these two sorts of language. As McAlpine shows, sleep is hardly attributed only to the figures in Frazer's category. He demonstrates that sleep is described as the daily activity of many main deities in Mesopotamian literature (McAlpine, *Sleep*, 183–86) and of Yahweh (m. Ma'aser Sheni 5.15; McAlpine, *Sleep*, 194–95, 233 n. 15). As McAlpine observes, most of these examples of divine sleep run not on an annual cycle. The biblical language regarding Yahweh's sleep (e.g., Psalms 44:24–25, 78: 65, 121:3–4) involves not annual sleep/death as for Dumuzi but divine sleep during an occasion of human need. McAlpine strongly criticizes atttempts to amalgamate these different sorts of divine sleep that he nicely lays out (*Sleep*, 194–95).

201. For documentation of this point, see *UBC* 104–05.

202. For further discussion of many of the following points, see *UBC* 96–114. My thanks go to T. Frymer-Kensky, B. Levinson, and J. Tigay for discussion of these points.

203. See R. A. Simkins, Creator & *Creation: Nature in the Worldview of Ancient Israel* (Peabody, MA: Hendrickson, 1994), 121–72.

204. For full discussion, see *UBC* 60–87, 96–100.

205. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars*, 162–63.

206. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars*, 167.

207. Frazer, *The Golden Bough*, abridged, 396.

208. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars*, 167.

209. For some discussion, see chapter 1, sections 5 and 6. For more evidence, see the summary in *EHG* 49–50, 52.

210. For example, see J. C. Greenfield, "The 'Cluster' in Biblical Poetry," *Maarav* 5–6 (1990), = *Sopher Mahir: Northwest Semitic Studies Presented to Stanislaus Segert* (ed. E. M. Cook; Santa Monica, CA: Western Academic Press, 1990), 159–68, esp. 160.

211. For a survey of the biblical evidence with Ugaritic parallels, see N. J. Tromp, *Primitive Conceptions of Death and the Nether World in the Old Testament* (BibetOr 21; Rome: Pontifical Biblical Institute, 1969); Greenspoon, "The Origin of the Idea of Resurrection," 247–321; and Cooper, "Ps 24:7–10: Mythology and Exegesis," 54.

212. I wish to thank Joseph Everson for bringing this issue to my attention in a conversation in the mid-1980s.

213. Greenspoon is correct to see concepts in the Baal Cycle as background to later concepts of resurrection, but this has little bearing on the deity as a "dying and rising god"; see Greenspoon, "The Origin of the Idea of Resurrection," 247–32! Indeed, in his extensive reconstruction of continuity from the Baal Cycle's presentation of Baal's death and descent to the underworld to biblical tradition, Greenspoon shows no clear examples of warrior language for God when it comes the mythology of Death. Instead, both the Baal Cycle and biblical material on resurrection appear to be influenced by West Semitic concepts of human afterlife. See further the example of royal "resurrection" in the Panammu inscription (KAI 214.21), discussed in section 4. See also the discussion of this problem in n. 1 of chapter 9.

214. For some of the biblical scholars holding this view, with further discussion, see Tromp, *Primitive Conceptions of Death and the Nether World in the Old Testament*, 197–213.

215. For details, see *UBC* 17–19. For background for the proposed literary development of the cycle, see *UBC* 29–36.

216. For the priesthood's reaction, see in chapter 5, section 3. For deuteronomistic theology against the Rephaim, see chapter 4, section 2. For the historical setting for these developments, see the important studies of B. Halpern, "'Brisker Pipes than Poetry': The Development of Israelite Monotheism," *Judaic Perspectives on Ancient Israel* (ed. J. A. Neusner, B. A. Levine, and E. S. Frerichs; Philadelphia: Fortress, 1987), 77–115; "The Baal (and the Asherah) in Seventh Century Judah: Yhwh's Retainers Retired," *Konsequente Traditionsgeschichte: Festchrift für Klaus Baltzer zum .65 Geburstag* (ed. R. Bartelmus, T. Krüger, and H. Utzschnieder; OBO 126; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1991), 115–54; "Jerusalem and the Lineages in the Seventh Century BCE: Kinship and the Rise of Individual Liability," *Law and Ideology in Monarchic Israel* (ed. B. Halpern and D. W. Hobson; JSOTSup 124; Sheffield: Sheffield Academic Press, 1991), 11–107; idem, "Sybil, or the Two Nations? Archaism, Kinship, Alienation, and the Elite Redefinition of Traditional Culture in Judah in the 8th–7th Centuries B.C.E.," *The Study of the Ancient Near East in the Twenty-First Century: The William Foxwell Albright Centennial Conference* (ed. J. S. Cooper and G. M. Schwartz; Winona Lake, IN: Eisenbrauns, 1996), 291–338.

7. *El, Yahweh, and the Original God of IsraEL and the Exodus*

1. Basic bibliography on El includes: F. M. Cross, "El," *TDOT* 1:242–61; *CMHE* 3–75; *EUT*; Pope, "Ups and Downs in El's Amours," *UF* 11 (1979 = C. F. A. Schaeffer Festschrift), 701–08; reprinted in Pope, *Probative Pontificating in Ugaritic and Biblical Literature: Collected Essays* (ed. M. S. Smith; UBL 10; Munster: Ugarit-Verlag, 1994), 29–39; idem, "The Status of El at Ugarit," *UF* 19 (1989), 219–29; reprinted in Pope, *Probative Pontificating in Ugaritic and Biblical Literature*, 47–61; W. Herrmann, "El," *DDD* 274–280. The following description of El in the Ugaritic texts is indebted to these works.

2. Cross, *TDOT* 1:242–61. See the discussion at the beginning of the Introduction, section 1.

3. See Herrmann, "El," *DDD* 274.

4. See I. J. Gelb, “Mari and the Kish Civilization,” *Mari in Retrospect: Fifty Years of Mari and Mari Studies* (ed. G. D. Young; Winona Lake, IN: Eisenbrauns, 1992), 134, 149, 158, 193; R. S. Hess, *Amarna Personal Names* (ASOR Dissertaton Series 9; Winona Lake, IN: Eisenbrauns, 1993), 237.

5. See R. A. Di Vito, *Studies in Third Millennium Sumerian and Akkadian Personal Names: The Designation and Conception of the Personal God* (Studia Pohl: Series Maior 16; Rome: Pontificio Istituto Biblico, 1993), 235–36.

6. See most recently, J. F. Healey, “The Kind and Merciful God: On Some Semitic Divine Epithets,” *“Und Mose schrieb dieses Lied auf”: Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 349–51.

7. The discussion between M. H. Pope and F. M. Cross extended over decades. See *EUT* 37–41; “Up and Downs in El’s Amours,” *UF* 11 (1979 = C. F. A. Schaeffer Festschrift), 701–08; reprinted in Pope, *Probative Pontificating in Ugaritic and Biblical Literature*, 29–39; idem, “The Status of El at Ugarit,” 219–29. See F. M. Cross, “El,” *TDOT* 1:246–48; *CMHE* 24. The debate turns largely on the word *mmnnm*. For discussion and Cross’s more recent view of *mmnnm*, see S. M. Olyan, *Asherah and the Cult of Yahweh in Israel* (HSM 34; Atlanta, GA: Scholars, 1988), 42 n. 12. As indicated in his letter of December 7, 1998 to me, Cross may finish an article on this text, so I do not cite his current view of *mmnnm*.

8. On the tent of El, see *CMHE* 36–39; CMCOT 35–57; *UBC* 188–89. For new information on the West Semitic tent tradition, see D. Fleming, “Mari’s Large Public Tent and the Priestly Tent Sanctuary,” *VT* 50 (2000), in press. For a maximal case for Athirat’s maritime religious significance, see A.J. Brody, *“Each Man Cried Out to His God”: The Specialized Religion of Canaanite and Phoenician Seafarers* (HSM 58; Atlanta, GA: Scholars, 1998), 26–30.

9. El’s role as warrior is not the only aspect of his possibly displaced by Baal. Other features of his were perhaps also acquired by Baal. This is argued for Mount Sapan by J. C. de Moor, “Ugarit and Israelite Origins,” *Congress Volume. Paris 1992* (ed. J. A. Emerton; VTSup 61; Leiden: Brill, 1995), 231–32.

10. Chapter 3, section 3, examines the evidence for El's astral family, including Athtar.

11. See K. van der Toorn, "Anat-Yahu, Some Other Deities, and the Jews of Elephantine," *Numen* 39 (1992), 87.

12. See B. Levine, "The Balaam Inscription from Deir 'Alla: Historical Aspects," *Biblical Archaeology Today* (Jerusalem: Israel Exploration Society, 1985), 326–39. M. Barker (*The Great Angel: A Study of Israel's Second God* [London: SPCK, 1992], 17–27) also expresses this view.

13. *PE* 1.10.44 4.16.11. See H. W. Attridge and R. A. Oden, *Philo of Byblos. The Phoenician History: Introduction, Critical Text, Translation, Notes* (CBQMS 9; Washington, DC: Catholic Biblical Association of America, 1981), 62–63, 86 n. 85. See also *PE* 1.10.18–27, 29.

14. *EHG* 25; cf. O. Loretz, "Der Wohnort Els nach ugaritischen Texten und Ez 28, 1–2.6–10," *UF* 21 (1989), 259–67.

15. Barré, *The God-List in the Treaty between Hannibal and Philip V of Macedonia* (Baltimore/London: Johns Hopkins, 1983), 48–49. The possible implication of this reasoning is that Anat-Bethel in the treaty of Esarhaddon with Baal II of Tyre is Asherah. See P. K. McCarter, "Aspects of the Religion of the Israelite Monarchy: Biblical and Epigraphic Data," *Ancient Israelite Religion: Essays in Honor of Frank Moore Cross* (ed. P. D. Miller, Jr, P. D. Hanson, and S. D. McBride; Philadelphia: Fortress, 1987), 147.

16. Van der Toorn, "Anat-Yahu, Some Other Deities and the Jews of Elephantine," 87. Specifically, he argues that Bethel and Anat-Bethel are not at home in Phoenicia, as they are not otherwise attested in Phoenician material.

17. See S. C. Layton, *Archaic Features of Canaanite Personal Names in the Hebrew Bible* (HSM 47; Atlanta, GA: Scholars, 1990) 56.

28. For example, the Ugaritic name for Memphis is spelled both *ḥkpt* and *ḥqkpt* (see *UT* 19.860).

29. D. Pardee, "An Evaluation of the Proper Names from a West Semitic Perspective: Pantheon Distribution According to 'Genre," *Eblaite Personal Names and Semitic Name-Giving* (ed. A. Archi; Rome: Missione Archaeologica Italiana in Siria, 1988), 119–51.

30. For connections between these inscriptions and biblical texts, see J. A. Hackett, "Religious Traditions in Israelite Transjordan," *Ancient Israelite Religion*, 125–36. Another proposal locates Job in the middle Euphrates where Aramaic was spoken in the first millennium; it was also contiguous to areas inhabited by Arab tribes. See J. C. Greenfield, "The Language of the Book," *The Book of Job* (New York: KTAV, 1980), xvi; "Philological Observations on the Deir 'Alla Inscriptions," *The Balaam Text from Deir 'Alla Re-evaluated: Proceedings of the International Symposium Held at Leiden 21–24 August 1989* (ed. J. Hoftijzer and G. van der Kooij; Leiden: Brill, 1991), 120.

31. Levine, "The Balaam Inscriptions from Deir 'Alla: Historical Aspects," 326–39.

32. See Greenfield, “Philological Obsrvations on the Deir ‘Alla Inscriptions,” 120.

33. The evidence of El proper names in Edomite material suffers from similar difficulties of interpretation. See J. R. Bartlett, *Edom and Edomites* (JSOT/PEF Monograph Series 1; Sheffield: JSOT Press, 1989), 190.

34. Van der Toorn, “Anat-Yahu,” 87.

35. Cross, “The Epic Traditions of Early Israel: Epic Narrative and the Reconstruction of Early Israelite Institutions,” *The Poet and the Historian: Essays in Literary and Historical Biblical Criticism* (ed. R. E. Friedman; Chico, CA: Scholars, 1983), 37; Tigay, “Israelite Religion: The Onomastic Evidence,” *Ancient Israelite Religion*, 171, 187 n. 66; Aufrecht, “The Religion of the Ammonites,” *Ancient Ammon* (ed. B. Macdonald and R. W. Younker; Leiden: Brill, 1999), 158–60.

36. See U. Oldenburg, “Above the Stars of El. El in South Arabic Religion,” *ZAW* 82 (1970), 187–208; J. Ryckmans, “South Arabia, Religion of,” *ABD* 6:172.

37. A recent example of this approach can be found in de Moor, *The Rise of Yahwism*, esp. 223–60; see also *CMHE* 71–75.

38. See the following among recent commentators (with earlier references) by order of year: L. E. Axelsson, *The Lord Rose up from Seir: Studies in the History and Traditions of the Negev and Southern Judah* (ConBOT 25; Lund: Almqvist & Wiksell, 1987), esp. 56–65; E. A. Knauf, *Midian: Untersuchungen zur Gechichte Palästinas und Nordarabiens am Ende des 2. Jahrtausends v. Chr*. (Wiesbaden: Harrassowitz, 1988), 43–63; T. N. D. Mettinger, “The Elusive Essence: YHWH, El and Baal and the Distinctiveness of Israelite Faith,” *Die Hebräische Bibel und ihre zweifache Nachgeschichte* (ed. E. Blum et al.; Festschrift für R. Rendtorf; Neukirchen-Vluyn: Neukirchener 1990), 393–417; K. van der Toorn, *Family Religion in Babylonia, Syria and Israel: Continuity and Change in the Forms of Religious Life* (Studies in the History and Culture of the Ancient Near East VII; Leiden, 1996), 281–86; and F. M. Cross, *Epic and Canon: History and Literature in Ancient Israel* (Baltimore: Johns Hopkins University Press, 1998), 45–70. The Septuagint, Demetrius, Josephus, and a possible number of other sources favor this Arabian location according to A. Kerkeslager, “Jewish Pilgrimage and Jewish Identity in Hellenistic and Early Roman Egypt,” *Pilgrimage and Holy Space in Late Antique Egypt* (ed. D. Frankfurter; Leiden: Brill, 1998), 99–225, esp. 150–210. For a

recent attempt to find the "original Sinai" at Jebel el-Lawz in northwestern Saudi Arabia (based on a suggestion of F. M. Cross), see H. Blum, *The Gold of Exodus: The Discovery of the True Mount Sinai* (New York: Simon & Schuster, 1998); see the review of R. S. Hendel in *Biblical Archaeology Review* 25/4 (1999), 54, 56.

39. *CMHE* 101–02, 105.

40. McCarter, "Aspects of the Religion of the Israelite Monarchy," 137–55.

41. Seow, *Myth, Drama, and the Politics of David's Dance* (HSM 44; Atlanta, GA: Scholars, 1989), 11–54. I do not share Seow's view that the sojourn of the ark at Shiloh was a factor in Yahweh's acquisition of El's characteristics.

42. Seow takes the name of his father, Yeroham, as a hypocoristic of *yrḥm'l*, which, if correct, would also suggest—albeit indirectly—the cult of El at Shiloh. Proper names are notoriously problematic indicators of religious practice, but combined with other data, they may be used to defend reconstructions of religious practice or tradition. See section 5 on this point.

43. Seow argues that the title of *yhwh sĕbā'ôt*, the name of the god of Shiloh (1 Samuel 1:1–3), derives from a god who presided over the divine hosts of the divine council, and following T. N. D. Mettinger, Seow surmises that the best candidate for such a concept would be El. If El were originally the god of Shiloh and Yahweh were not originally a title of El, then the title *yhwh sĕbā'ôt,'ot* would be secondary.

44. Or possibly, "the god of the covenant." If this is correct, still the evidence weighs slightly in favor of seeing El as this god. T. J. Lewis, "The Identity and Function of El/Baal Berith," *JBL* 115 (1996), 401–23.

45. The word may refer to the god Ilabrat according to M. Dijkstra, "The Ugaritic-Hurrian Sacrificial Hymn to El (RS 24.278 = KTU 1.128)," *UF* 25 (1993), 157–62, esp. 161.

46. For the complex issues surrounding this material, see Lewis, "The Identity and Function of El/Baal Berith," 401–23.

47. Cf. Yahweh Elyon in 1 Kings 9:8, Psalms 7:18, 47:3, 97:9. See the classic treatment of G. Levi della Vida, "'El 'Elyon in Genesis 14:18–20," *JBL* 63 (1944), 1–19.

48. For recent discussions, see R. W. L. Moberly, *The Old Testament of the Old Testament: Patriarchal Narratives and Mosaic Yahwism* (OBT;

Minneapolis, MN: Fortress, 1992), 44; Garr, "The Grammar and Interpretation of Exodus 6:3," 385–408.

49. See Weinfeld, "Kuntillet 'Ajrud Inscriptions and Their Significance," *SEL* 1 (1984), 126.

50. Weinfeld, "Kuntillet 'Ajrud Inscriptions and Their Significance," 126.

51. Whitt, "The Divorce of Yahweh and Asherah," *SJOT* 6 (1992), 49 n. 51. For a listing of personal names with **'l* as the theophoric element, see G. I. Davies, *Ancient Hebrew Inscriptions; Corpus and Concordances* (Cambridge: Cambridge University Press, 1991), 278–83.

52. Edelman, "Tracking Observance of the Aniconic Tradition through Numismatics," *The Triumph of Elohim: From Yahwisms to Judaisms* (ed. D. V. Edelman; Grand Rapids, MI: Eerdmans, 1996), 185–225.

53. Olyan, *Asherah and the Cult of Yahweh*, 38–61; followed in *EHG* 19. For discussion of Yahweh and Asherah possibly as consorts, see also chapter 4, section 4.

54. See de Moor, *The Rise of Yahwism*, 267.

55. Pardee, "An Evaluation of the Proper Names," 119–5!

56. For the name at Ebla, see M. Krebernik, *The Study of the Ancient Near East in the Twenty-First Century: The William Foxwell Albright Centennial Conference* (ed. J. S. Cooper and G. Schwartz; Winona Lake, IN: Eisenbrauns, 1996), 46. The comparison of Ugaritic *yšr'il* in CAT 4.623.3 with the biblical name Israel was brought to my attention by the late Gösta Ahlström.

57. The point is laid out in *EHG* 16–17.

58. 4QDeut^{q}: *bny 'l[;* 4QDeut^{j}: *bny 'lwhym[;* LXX *huiōn theou* (cf. LXX variants with *aggelōn* interpolated). For the evidence, see E. Tov, *Textual Criticism of the Hebrew Bible* (Minneapolis: Fortress; Assen/Maastricht: Van Gorcum, 1992), 269; J. A. Duncan, *Qumran Cave 4. IX: Deuteronomoy, Joshua, Judges, Kings* (ed. E. Ulrich and F. M. Cross; DJD XIV; Oxford: Clarendon Press, 1995), 90; noted also BHS to Deuteronomy 32:8 note d. For older bibliography, *EHG* 30 n. 37; and A. Schenker, "Le monothéisme israélite: un dieu qui transcende le monde et les dieux," *Bib* 78 (1997), 438. For an older discussion, see O. Eissfeldt, "Neue Götter im alten Testament," 479. For further discussion, see chapters 7 and 8.

59. Cf. El Elyon in Genesis 14:18–20, 22 noted in section 4.

60. See the discussion of Psalm 82 in chapter 2, section 2 and in the following chapter. Psalm 82 distinguishes the figure of the standing Yahweh from the presiding, seated divinity, evidently El Elyon to judge from the reference to Elyon in verse 6. For a tortured attempt to argue for the two deities as a single figure, see Wyatt, *Myths of Power*, 357–65; this view is driven perhaps in part by the author's presupposition that Yahweh was originally a form of El (cf. Albright, *From the Stone Age to Christianity*, 296–97).

61. To be credited with this point is the otherwise problematic work of Barker, *The Great Angel*, 17–25. Barker's attempt to trace the separate status of El and Yahweh throughout the Iron II period down through the Father and the Son in Christianity is brave but fraught with methodological issues. Barker misses a great deal of the early Israelite evidence for El (e.g., the name of Israel, Genesis 49; Numbers 23–24) that would have bolstered her case. Barker wishes to see El continue quite late, especially based on reading *'ēl* as "El" in "Second Isaiah." This interpretation is unconvincing, since *'ēl* seems often to mark the contrast with other gods, hence "god," or it can be seen in some contexts simply as a title for Yahweh (see chapter 10). Barker does not demonstrate that *'ēl* in Second Isaiah refers to a god separate from Yahweh. Barker also conflates the issue of *bĕnê 'ēlîm*, "sons of gods," with the issue of the Son in the New Testament. From a history of religions perspective, the "sons of gods" is a generic reference to deities, which biblical texts use to refer to the low level of the ruled divinities, who serve the Supreme Ruler (see Psalm 29:1, Job 1–2). In contrast, "the Son" would belong to the second tier of the pantheon. Typologically, the mediating step between early Israelite polytheism of El-Baal-Yahweh and later Christian thought of Father-Son might involve the re-application of Baal imagery to hypostases (cf. Isaiah 30) and angelic beings, perhaps including the figure of "the Son of Man" in Daniel 7. Yet this development is exceptionally complicated. Barker touches on a great deal of pertinent evidence, but it requires considerably greater sifting and discernment. Barker also throws the royal language of sonship into the mix, as this complex is also significant for Christian interpretation of Jesus and it deploys sonship language. Yet here again Barker does not sort out the relationships of this royal complex to other uses of "son" in relation to divinity. Barker's work essentially draws out implications from J. A. Emerton's old insight concerning the relationship between Ugaritic

presentation of El and Baal, on the one hand, and “the Ancient of Days” and “the Son of Man” in Daniel 7 (Emerton, “The Origin of the Son of Man Imagery,” *JTS* 9 [1958], 225–42; see also *CMHE* 17, 345 n. 8). Barker unfortunately overlooks the well-known and best treatment on the monarchy as the medium of this mythological complex to post-exilic apocalyptic, namely, P. Mosca, “Ugarit and Daniel 7: A Missing Link,” *Bib* 67 (1986), 496–517. I do not deny that the different complexes of material Barker presents affected the interpretation of the reality of Jesus, only that their relationship to one another as Barker presented is at best nebulous. The complications are immense and far beyond the scope of this study.

62. Following the lead of W. F. Albright, F. M. Cross, D. N. Freedman, and others. See Albright, “The Earliest Forms of Hebrew Verse,” *JPOS* 2 (1922), 69–86; “Some Additional Notes on the Song of Deborah,” *JPOS* 2 (1922), 284–85; “The Song of Deborah in the Light of Archaeology,” *BASOR* 62 (1936), 26–31; *From the Stone Age to Christianity: Monotheism and the Historical Process* (sec. ed. with a new introduction; Baltimore: Johns Hopkins University Press, 1957), 14; and *YGC* 13; Cross and Freedman, *Studies in Ancient Yahwistic Poetry* (Missoula, MT: Scholars, 1950 [repr.1975]), 5; Freedman, *Pottery, Poetry and Prophecy: Studies in Early Hebrew Poetry* (Winona Lake, IN: Eisenbrauns, 1980), 147–50; L. E. Stager, “Archaeology, Ecology and Social History: Background Themes to the Song of Deborah,” Congress *Volume: Jerusalem 1986* (ed. J. A. Emerton; VTSup 40; Leiden: Brill, 1988), 221–34 (with references to the earlier supporters of this view); and J. C. de Moor, “The Twelves Tribes in the Song of Deborah,” *VT* 43 (1993), 483–93, and *The Rise of Yahwism*, 267, 292. See also J. D. Schloen, “Caravans, Kenites, and *Casus Belli*: Enmity and Alliance in the Song of Deborah,” *CBQ* 55 (1993), 18–38; van der Toorn, *Family Religion*, 281–86; and the recent survey of K. Koch, “Jahwäs Übersiedlung vom Wüstenberg nach Kanaan: Zur Herkunft von Israel’s Gottesverständnis,” *“Und Mose schrieb dieses Lied auf”: Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 440–70. For the evidence based solely on grammatical considerations, see D. A. Robertson, *Linguistic Evidence in the Dating of Early Hebrew Poetry* (SBLDS 3; Missoula, MT: Scolars, 1972), 153–54. I hasten to add that I do not accept early datings of all other poems

thought to be similarly early. For the problems, see my discussion in *The Pilgrimage Pattern in Exodus* (with contributions by Elizabeth M. Bloch-Smith; JSOTSup 239; Sheffield: Sheffield Academic Press, 1997), 219–26.

63. Such an identification of deities of different character is hardly exceptional in the ancient Middle East. Here we may note Amun-Re in Late Bronze Age Egypt. For the "fusion" of multiple deities, see Olyan, *Asherah*, 10 n. 29. The Judean context that leaves Yahweh-El as the only major deity is partially exceptional in this case. Whether there is a more precise analogy for the southern warrior-god merging with the highlands patriarchal god requires further investigation.

64. Here religious change becomes manifest in a paradigm that Sigmund Freud would have understood. Here the application of Freudian theory to Israelite religion by H. Eilberg-Schwartz would have been more promising (see chapter 5, section 2). See Eilberg-Schwartz, *God's Phallus and Other Problems for Men and Monotheism* (Boston: Beacon Press, 1994).

65. See the references in n. 38.

66. Schloen, "Caravans, Kenites, and *Casus Belli,*" 18–38, taking up the lead of Stager, "Archaeology, Ecology and Social History," 221–34. See also Stager, "Forging an Identity: The Emergency of Ancient Israel," *The Oxford History of the Biblical World* (ed. M.) D. Coogan; New York; Oxford University Press, 1998), 142–48.

67. For contact between Judeans and Calebites and Kenites, see Axelsson, *The Lord Rose up from Seir*. For an argument for Saul's importation of the cult of Yahweh due to his Edomite background, see van der Toorn, *Family Religion*, 285–86.

68. See G. L. Mattingly, "Amalek," *ABD* 1:169–71. Judges 6–8 presents the Midianites and Amalekites in a negative light. Either one can attribute such a negative view to a later retrojection or perhaps more plausibly to some kernel of tradition that recalls the tensions between the Isralite highlanders and the southern caravaner groups. Such a record of conflict does not undermine the evidence for positive relations. For Midian in early Israelite tradition, see further G. E. Mendenhall, "Midian," *ABD* 4:815–17; Cross, *From Epic to Canon*, 60–70.

69. For this positive evidence, see Schloen, "Caravans, Kenites and *Casus Belli,*" 27. Schloen would also see a reference to Midian behind MT *middîn* in v 10. Whether an emendation is warranted, or a verbal allusion is

intended, the connection seems plausible given the reference to traders (*hōlĕkê ʿal-derek*) here.

70. See *CMHE* 200. For the old "Kenite hypothesis" that worship of Yahweh was mediated to the Israelites via the Kenites, see the discussion of van der Toorn, *Family Religion*, 283–84. For further information concerning the Kenites, see B. Halpern, "Kenites," *ABD* 4:17–22. See further Cross, *From Epic to Canon*, 45–70.

71. It is often mentioned in the secondary literature that the Egyptian place-name *yhw3*, apparently located in the Negev-Sinai region, may derive from the name, Yahweh, e.g. Mettinger, "The Elusive Essence," 404; van der Toorn, *Family Religion*, 283; but see the discussion of H. Goedicke, "The Tetragrammaton in Egyptian?" *The Society for the Study of Egyptian Antiquities Journal* 24 (1994), 24–27. The theory in its current form goes back to R. Giveon, "Toponymes Ouest-Asiatiques à Soleb," *VT* 14 (1964), 244. Without some further evidence apart from place-names, it is difficult to place too much weight on this information. Moreover, etymological questions about the evidence have been raised (see Halpern, "Kenites," 20). For these reasons it is not given greater prominence here.

72. See T. Hiebert, *God of My Victory: The Ancient Hymn in Habakkuk 3* (HSM 38; Atlanta, GA: Scholars, 1986), 129–49; R. D. Haak, *Habakkuk* (VTSup 44; Leiden: Brill, 1992), 16–20.

73. See Albright, Cross, Freedman, de Moor, and Dikjstra as reported and summarized in K. van der Toorn, "Yahweh," *DDD* 910–13. See in particular *CMHE* 60–75; Cross, *TDOT* 1:260. See also de Moor, *The Rise of Yahwism: The Roots of Israelite Monotheism* (BETL XCI; Leuven: University Press/Uitgeverij Peeters, 1990), 237–39. Note also Wyatt, *Myths of Power*, 332, 357 n. 2 for Yahweh as a southern Palestinian form of El. How this view dovetails with Wyatt's efforts at an Indo-European etymology for Yahweh is unclear. For criticism of this general approach, see van der Toorn, "Yahweh, 1722.

74. For example, Mettinger, "The Elusive Essence," 393–417, esp. 410. This view is preferred also by K. van der Toorn, "Yahweh," *DDD* 916–17.

75. For these aspects of the god, see M. S. Smith, "The God Athtar in the Ancient Near East and His Place in KTU 1.6 I," חיים ליונה *Solving Riddles and Untying Knots: Biblical, Epigraphic, and Semitic Studies Presented to Jonas C. Greenfield* (ed. Z. Zevit, S. Gitin and M. Sokoloff; Winona Lake,

IN: Eisenbrauns, 1995), 627–40. I do not see such a view as precluding a derivation of the name from *hwy, “to blow” (of the wind), an etymology that at the present seems the least objectionable of the current theories; see E. A. Knauf, “Yahwe,” *VT* 34 (1984), 467–72; cited favorably by van der Toorn, “Yahweh,” 915–16; and Mettinger, “The Elusive Presence,” 410. The diversity of scholarly views points to the great uncertainty on this point.

76. Among recent commentators, see Mettinger, “The Elusive Essence,” 411: “YHWH is the God of the exodus.”

77. Wyatt, “Of Calves and Kings: The Canaanite Dimension in the Religion of Israel,” SJOT 6 (1992), 78–83. I do not accept a number of the arguments forwarded by Wyatt.

78. Smith, “Yahweh and the Other Deities of Ancient Israel: Observations on Old Problems and Recent Trends,” *Ein Gotte allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israelitischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; OBO 139; Freibourg: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1994), 207–08.

79. Discussed in chapter 1, section 4.

80. See Levine, “The Balaam Inscription from Deir ‘Alla: Historical Aspects,” 337–38; “The Plaster Inscriptions from Deir ‘Alla: General Interpretation,” *The Balaam Text from Deir ‘Alla Re-evaluated* (ed. J. Hoftijzer and G. van der Kooij; Leiden: Brill, 1991) 58–72. I am highly indebted to Levine for his seminal research on El traditions in early biblical literature, especially in Transjordanian material. See especially his commentary, *Numbers 21–36* (AB 4B; New York: Doubleday, 2000), 243–75.

81. P. K. McCarter believes that the Egyptian names of the Levitical priesthood “suggest that a portion of the tribe of Levi may have lived in Egypt at some time.” See McCarter, “Exodus,” *Harper’s Bible Commentary* (ed. J. L. Mays; San Francisco, CA: Harper & Row, 1988), 134.

82. Smith, “Southern Influences upon Hebrew Prophecy,” AJSL 35 (1918), 8. See also Albright, “The Evolution of the West Semitic Divinity ‘An-‘Anat-‘ttâ,” *AJSL* 41 (1925), 84 n. 1. NJPS 410 n.d.

83. See Stager, “The Archaeology of the Family in Ancient Israel,” 26; “Archaeology, Ecology, and Social History,” 230–31. This status may suggest the (secondary?) derivation of *lēwî* from **lwy*, “to attach” (here to a

sanctuary [?]). It is evident that the tradition of the exodus was transmitted through various Levitical santuaries including Dan, which is reflected in Judges 17–18 (*CMHE* 197–99).

84. For El Shaddai in P, see W. R. Garr, "The Grammar and Interpretation of Exodus 6:3," *JBL* 111 (1992), 385–408.

85. Quoted with permission from Lewis's unpublished book manuscript on the religion of Israel to be published by Doubleday in its Anchor Bible Reference Library series. I wish to thank Professor Lewis for access to his manuscript.

86. See Cross's seminal work in this regard by *CMHE* 3–12, 46–60.

8. *The Emergence of Monotheistic Rhetoric in Ancient Judah*

1. For references to Albright, Kaufman, and de Moor, see chapter 1, section 2. See C. H. Gordon, "Indo-European and Hebrew Epic," *Eretz Israel* 5 (1958 = B. Mazar volume), *15 n. 42, where the patriarchal narratives are attributed "the monotheistic principle." The formulation of H. Orlinsky ("The Hebrew Origins of Monotheism: Abraham and Moses," *Monotheism and Moses* [ed. R. J. Christen and H. E. Hazelton; Lexington, MA: D. C. Heath, 1969], 59) likewise associates the patriarchs with a sort of practical monotheism. Propp's views are expressed in his unpublished essay, "Monotheism and 'Moses'" (my thanks to Professor Propp for his permission to cite this piece). For a recent appreciation of this approach, see also Tigay, *The JPS Torah Commentary*: Deuteronomy דברים (Philadelphia: Jewish Publication Society, 1996), 433–35. See, with important qualifications, P. K. Mc-Carter, "The Religious Reforms of Hezekiah and Josiah," *Aspects of Monotheism: How God is One* (ed. H. Shanks and J. Meinhardt; Washington, DC: Biblical Archaeology Society, 1997), 73–74; K. van der Toorn, "Yahweh," *DDD* 918. For a critique of de Moor's work in this area, see N. Wyatt, *Myths of Power: A Study of Royal Power and Ideology in Ugaritic and Biblical Tradition* (VBL 13; Münster: Ugarit-Verlag, 1996), 326–27.

2. See B. Uffenheimer, "Myth and Reality in Ancient Israel," *The Origins and Diversity of Axial Civilizations* (ed. S. N. Eisenstadt; Albany: State University of New York Press 1986), 144, with important modifications of Kaufman's theories. See further introduction, section 2.

See also P. Sanders, *The Provenance of Deuteronomy 32* (OTS 37; Leiden: Brill, 1996), 426–29.

3. See C. Breytenbach and P. L. Day, "Satan," *DDD* 726–32 (with further bibliography). See further E. Pagels, *The Origins of Satan* (New York: Random House, 1996).

4. See chapter 3 for discussion.

5. See Tigay, *The JPS Torah Commentary*, 433.

6. See chapter 4, section 3.

7. An old distinction, for example, made by G. A. Barton, *The Religion of Ancient Israel* (New York: A. S. Barnes, 1961; original, 1928), 94–105, 123.

8. Meek, *Hebrew Origins* (New York: Harper & Row, 1936), 204–28. See also D. Baly, "The Geography of Monotheism," *Translating & Understanding the Old Testament: Essays in Honor of Herbert Gordon May* (ed. H. T. Frank and W. L. Reed; Nashville: Abingdon, 1970), esp. 267. Despite his critique of Albright, Baly locates the requisite features of monotheism historically in the desert experience and the experience of God at Sinai; accordingly, Baly's view shares a number of points with Albright's.

9. Meek, *Hebrew Origins*, 204–28.

10. Letter dated January 22, 1938, American Philosophical Society Albright Personal Corresp. 1936–38. For their exchange in print, see also their contributions to *Monotheism and Moses* (ed. R.J. Christen and H. E. Hazelton; Lexington, MA: D. C. Heath, 1969). Albright added a little-known rejoinder in this volume (pp. 78–79), which identifies later claims against all deities with earlier claims against specific cults (1 Kings 18:27, 2 Kings 1:6).

11. Albright, *From the Stone Age to Christianity: Monotheism and the Historical Process* (sec. ed.; Baltimore: Johns Hopkins University Press, 1946), 271.

12. Albright, *From the Stone Age to Christianity*, 257.

13. Letter dated January 31, 1943, American Philosophical Society Albright Personal Corresp. 1943.

14. See J. Hoftijzer and K. Jongeling, *Dictionary of the North-West Semitic Inscriptions. Part Two: M–T* (HdO 21/2; Leiden: Brill, 1995), 919, f.

15. Albright, *From the Stone Age to Christianity* (sec. ed.; 1946), 367; see also the 1967 printing on p. 297 n. 29.

16. Albright, *From the Stone Age to Christianity*, 197.

17. See B. Long, "Mythic Trope in the Autobiography of William Foxwell Albright," *BA* 56/1 (1993), 36–45; and *Planting and Reaping Albright: Politics, Ideology, and Interpreting the Bible* (University Park, PA: Pennsylvania State University Press, 1997), 156–57. Readers interested in Albright and his legacy may peruse D. N. Freedman, "W. F. Albright as an Historian," *The Scholarship of William Foxwell Albright. An Appraisal: Papers Delivered at the Symposium "Homage to William Foxwell Albright." The American Friend of the Israel Exploration Society. Rockville, Maryland, 1984* (ed. G. van Beek; HSS 33; Atlanta, GA: Scholars, 1989), 33–43; P. Machinist, "William Foxwell Albright: The Man and His work," *The Study of the Ancient Near East in the Twenty-First Century* (ed. J. S. Cooper and G. M. Schwartz; Winona Lake, IN: Eisenbrauns, 1996), 385–403 (with further bibliography); the essays in *BA* 56/1 (1993) devoted to Albright and his work. See also M. S. Smith, *Untold Stories: The Bible and Ugaritic Studies in the Twentieth Century* (Peabody, MA: Hendrickson, 2001).

18. Some possibilities for this issue are raised in *EHG*.

19. For important basic works on monotheism in ancient Israel, see *Monotheismus im alten Israel und seiner Umwelt* (ed. O. Keel; BB 14; Fribourg: Schweizeriches katholisches Bibelwerk, 1980); *Gott, der Einzige: Zur Enstehung des Monotheismus in Israel* (Quaestiones Disputatae 104; Freiburg/Basel/Vienna: Herder, 1985) (reference courtesy of W. Propp); *Ein Gott allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israeltischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; 13. Kolloquium der Schweizerischen Akademie der Geistes-und Sozialwissenschaften 1993; Freiburg Schweiz: Universitätsverlag, 1994 = repr. OBO 139; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1994). See also B. Uffenheimer, "Myth and Reality in Ancient Israel," 164–66; A. Schenker, "Le monothéisme israélite: un dieu qui transcende le monde et les dieux," *Bib* 78 (1997), 436–38. Uffenheimer stresses the Israelite deity's ontological transcendance from creation. Schenker emphasizes a conceptual distinction of Yahweh's transcendance over and above other deities. At the outset of the discussion, I favor a more pedestrian approach based on the terms employed in the texts. I am unsure whether Schenker's definition of monotheism might not also apply to some reduced forms of Yahwistic

polytheism described in chapter 3. Moreover, mention of other deities for other peoples or in the Decalogue implies a de facto acceptance of polytheism for non-Israelites; this is not monotheism. I am not sure I understand what it means to have "une conception simultanément monothéiste et polythéiste" (p. 445). Despite these qualms, Schenker is absolutely correct to view monotheism in the larger polytheistic context. Finally, the authors in these works who express their view on the date of Israelite monotheism situate it in the context of the exile and, in some cases, possibly a bit earlier as well. As the discussion indicates, I share this view of matters. There are dissenters presently to this view (J. C. de Moor, W. H. C. Propp; see later), but their approach hinges on a slippery definition of monotheism and flies in the face of evidence for polytheism in ancient Israel in the Iron Age.

20. Statements of incomparability are not included; such hyperbole is known also in Mesopotamian texts. Note also 2 Kings 5:15 (anachronistic?).

21. For discussion, see Tigay, *The JPS Torah Commentary*, 439. Cf. Psalm 73:19; the interrogative formulations in 2 Samuel 22:32//Psalm 18:32.

22. For variants, see T. J. Lewis, "The Textual History of the Song of Hannah: 1 Samuel II 1–20," *VT* 44 (1994), 27–29.

23. See Tigay, *The JPS Torah Commentary*, 529 n. 3; and B. Halpern, "The Names of Isaiah 62:4: Jeremiah's Reception in the Restoration and Politics of 'Third Isaiah,'" *JBL* 117 (1998), 623–43, esp. 632. Cf. the claim by Tigay (p. 529 n. 5) that Jeremiah 2:11 and 5:7 are monotheistic. Whether or not these passages are included does not affect the argument made here.

24. For the application of this definition to Deuteronomy 32, see P. Sanders, *The Provenance of Deuteronomy 32*, (OTS 32; Leiden: Brill, 1996), 426–29.

25. See *Tigay, The JPS Torah Commentary*, 76.

26. See the considered remarks of Tigay, *The JPS Torah Commentary*, 440.

27. Von Rad, *Deuteronomy: A Commentary* (trans. D. Barton; OTL; London: SCM, 1966), 63.

28. Tigay, *The JPS Torah Commentary*, 76. See also his fine discussion on pp. 438–40.

29. Note the well-placed considerations of J. C. L. Gibson, “Language about God in the Old Testament,” *Polytheistic Systems* (ed. G. Davis; Cosmos: Yearbook of the Traditional Cosmology Society 5; Edinburgh: Edinburgh University Press, 1989), 43–50.

30. See Schenker, “Le monothéisme israélite,” 447–48. On the issue of possible Persian influence, see the final section of this chapter.

31. Tigay, *The JPS Torah Commentary*, 529 n. 3; and Halpern, “The Names of Isaiah 62:4,” 632.

32. Halpern, “The Names of Isaiah 62:4,” 632.

33. For over a century commentators have argued for a Babylonian provenance (the notable exception was C. C. Torrey) for the following reasons:

1. Command to depart from Babylon in 48:20 and “redeemed of Zion” will depart (51:11).
2. Allusion to Babylonian gods (Bel = title of Marduk, Nebo = Nabu, son of Marduk, in Isaiah 46:1). The image of the two carried in Akitu (New Year) festival in the spring. Isaiah 46 as allusion to this procession? So see C. Stuhlmueller, *Creative Redemption in Deutero-Isaiah* (AnBib 42; Rome: Pontifical Biblical Institute, 1970), 75–77, with parallels between the Akitu and Isaiah 40:3–5 and 52:7–19.
3. Allusion to Babylonian astrology, divination, and magic (44:24–25, 47:12–13).
4. Allusions to Babylon (Isaiah 47).
5. Cuneiform royal titulary said to be applied to Jacob/Israel. See, for example, R. Kittel, “Cyrus und Deuterojesaja,” *ZAW* 18 (1998), 149–64, who compares “Second Isaiah” with Cyrus inscriptions, both being dependent on “Babylonian court style; S. M. Paul, “Deutero-Isaiah and Cuneiform Royal Inscriptions,” *JAOS* 88/1 (1968) = Essays *in Honor of E. A. Speiser* (ed. W. W. Hallo; New Haven, CT: American Oriental Society, 1968), 181–86: “beloved, servant, shepherd”; “to be called by name”; royal role of liberate prisoners/open eyes; being called from the womb (also in Jeremiah): to proclaim neither world domination (as in Mesopotamian royal inscription), but world salvation.
6. Akkadian loanwords in “Second Isaiah.”

While the dominant view since Duhm accepts a Babylonian provenance, recently H. M. Barstad has pushed for a Judean setting. See Barstad, *A Way in the Wilderness: The <<Second Exodus>> in the Message of Second Isaiah* (JSS Monograph 12; Manchester: University of Manchester, 1989); *The Babylonian Captivity of the Book of Isaiah 40–55* (The Institute of Comparative Research in Human Culture. Oslo; Oslo: Novus forlag, 1997); "On the So-Called Babylonian Literary influences in Second Isaiah," *SJOT* 2 (1987), 90–110; "Akkadian 'Loanwords' in Isaiah 40–55—And the Question of Babylonian Origin of Deutero-Isaiah," *Text and Theology: Studies in Honour of Professor Dr. Theol. Magne Sæbø Presented on the Occasion of His 65th Birthday* (ed. A. Tångberg; Oslo: Verbum, 1994), 36–48; see also Seitz, *Word Without End: The Old Testament as Abiding Theological Witness* (Grand Rapids, Ml: Eerdmans, 1998). The main value of Barstad's research is to show many weaknesses in the arguments made for a Babylonian setting. Barstad also shows continuity of life in the land during the exile and the ideological purpose that the idea of a land emptied of its people served the interests of those taken to Babylon (*The Myth of the Empty Land: A Study of the History and Archaeology of Judah During the "Exilic" Period* [Symbolae Osloenses Fasc. Suppl. XXVIII; Oslo: Sandinavian University, 1996]). While all this may be true, it does not disprove a Babylonian provenance or establish a Palestinian one for "Second Isaiah."

Barstad's critique requires scholars not only to question the old arguments for "Second Isaiah" 's Babylonian background, but also to reconsider the entire historical (or historicist) approach to the issue. I argue at the end of section two in the final chapter that the Babylonian-Jerusalem polarity is a literary construct, as in Psalm 137, another exilic period composition. (The book of Ezekiel illustrates the real-life communication between home community in Judah and the Babylonian community.) The operative geographical perspective is Zion-Jerusalem in Isaiah 40:1–11 (verses 9, 11): the journey is bring the people from there (verse 11) to here. It is a commonplace to argue that this journey represents a "Second Exodus," and I suggest that ultimately both journeys are modeled on a more basic pattern, used literarily elsewhere in the Bible, namely, the pilgrimage to the sanctuary site. Yet such an interpretive move does not remove the further question of historical setting. Despite the many good criticisms Barstad makes of the traditional scholarly view of "Second Isaiah" 's

Babylonian setting, such criticism does not demonstrate a Palestinian background, and I think it is still quite feasible to argue for a Babylonian provenance. Indeed, specific passages in "Second Isaiah" would have little force in a Palestinian provenance, but would suit very well a Babylonian setting (e.g., Isaiah 46:1–4).

34. See the careful study of H. G. M. Williamson, *The Book Called Isaiah: Deutero-Isaiah's Role in Composition and Redaction* (Oxford: Clarendon Press, 1994); also Seitz, *Word Without End*. See also the many fine essays in *The Book of Isaiah. Le Livre d'Isaïe: Les oracles et leur relectures unité et complexité de l'ouvrage* (ed. J. Vermeylen; BETL LXXXI; Leuven: University Press/Peeters, 1989); and *Studies in the Book of Isaiah: Festschrift Willem A.* M. *Beuken* (ed. J. van Ruiten and M. Vervenne; BETL CXXXII; Leuven: University Press/Uitgeverij, 1997). For further issues, see B. D. Sommer, A *Prophet Reads Scripture: Allusion in Isaiah 40–66* (Contraversions. Jews and Other Differences; Stanford, CA: Stanford University Press, 1998), 73–107; and R. L. Schultz, *The Search for Quotation: Verbal Parallels in the Prophets* (JSOTSup 180; Sheffield: Sheffield Academic Press, 1999).

35. I do not agree with N. P. Lemche's reconstruction of "a general development towards a practical monotheism in the ancient Orient," but he does note rightly the literary character of Israelite monotheism: "the unique element is the literary investment that monotheism has acquired in the Old Testament" (Lemche, "From Prophetism to Apocalyptic: Fragments of an Article," *In the Last Days: On Jewish and Christian Apocalyptic and Its Period* [ed. K. Jeppesen et al.; Aarhuis: Aarhus University, 1994], 102). However, the "literary investment" may not be the only "unique element." It is too easy to assume a "practical monotheism" and treat it as commensurate with the more restrictive monotheism expressed in "Second Isaiah" and other biblical texts. Israelite monotheism's further "achievements" (to use Lemche's term) were its restrictive and explicit character and the normative status it achieved in the post-exilic community. Here the category of "practical monotheism" of a sort is held, ironically enough, by those scholars who see monotheism as hardly unique to Israel and perhaps late (so Lemche) and those scholars who see monotheism as unique and early (so Tigay).

36. This lack of clear development is evident in reconstructions that move from "*de facto* monotheism" to explicit monotheism. See the

following discussion.

37. Seitz, *Word Without End*, 255: “It is an intramural statement, made by Israel’s named deity, that he alone is God.”

38. Seitz, *Word Without End*, 255.

39. See chapter 4, section 4, for discussion.

40. See chapter 2, section 4, for discussion.

41. Note the formulation of Wyatt (*Myths of Power*, 325): “Because of ‘historical drag’, we find gods persisting who in all conscience, from the point of view of a systematic theology, should have been pensioned off years ago.”

42. For a survey of late monarchic polytheism in Jeremiah 7 and 44 and Ezekiel 8, see S. Ackerman, *Under Every Green Tree: Popular Religion in Sixth Century Judah (HSM* 46; Atlanta, GA: Scholars, 1992), 5–99.

43. See the important book of Keel and Uehlinger, *Gods, Goddesses, and Images of God*, 177–281, 323–49 (with bibliography). For a popular survey of the archaeological evidence (with some of the iconography), see W. Dever, “Folk Religion in Early Israel: Did Yahweh Have a Consort?” *Roots of Monotheism: How God Is One* (ed. H. Shanks and J. Meinhardt; Washington, DC: Biblical Archaeology Society, 1997), 27–56.

44. The older treatments of Psalm 82 in this vein without reference to the Ugaritic texts include H. S. Nyberg, *Studien zum Hoseabuche: Zugleich ein Beitrag zur Klärung des Problems der Alttestamentlichen Textkritik* (Uppsala Universitets Årsskrift 1935:6; Uppsala: Almqvist & Wiksells, 1935), 122–25; and O. Eissfeldt, “Neue Götter im alten Testament,” *Atti del XIX Congresso Internazionale degli Orientalisti. Roma, 23–29 Settembre 1935-XIII* (Rome: Tipografia del Senato, 1938), 479. The best recent treatment is S. B. Parker, “The Beginning of the Reign of God. Psalm 82 as Myth and Liturgy,” *RB* 102 (1995), 532–59. See also J. F. A. Sawyer, “Biblical Alternatives to Monotheism,” *Theology* 87 (1984), 172–80; M. Dietrich and O. Loretz, *“Jahwe und seine Aschera”: Anthropomorphes Kulbild in Mesopotamien, Ugarit und Israel. Das biblische Bilderverbot* (UBL 9; Münster: Ugarit-Verlag, 1992), 134–57; and Schenker, “Le monothéisme israélite,” 442–44. Among the commentaries, see K. Seybold, *Die Psalmen* (HAT 1/15; Tübingen: Mohr [Siebeck], 1996), 324–26.

45. 4QDeut^{q}: *bny ’l[:* 4QDeut^{j}: *bny ’lwhym[:* LXX *huiōon theou* (cf. LXX variants with *aggelōn* interpolated). For the evidence, see E. Tov, *Textual Criticism of the Hebrew Bible* (Minneapolis: Fortress;

Assen/Maastricht: Van Gorcum, 1992), 269; J. A. Duncan, *Qumran Cave 4. IX: Deuteronomy, Joshua, Judges, Kings* (ed. E. Ulrich and F. M. Cross; DJD XIV; Oxford: Clarendon Press, 1995), 90; noted also in BHS to Deuteronomy 32:8 note d. For older bibliography, *EHG* 30 n. 37; and A. Schenker, "Le monothéisme israélite: un dieu qui transcende le monde et les dieux," *Bib* 78 (1997), 438. For an older discussion, see already O. Eissfeldt, "Neue Götter im alten Testament," 479. For further discussion, see chapters 7 and 8.

46. Cf. the echo of Deuteronomy 32:7–9 in Ben Sira 44:2 (cf. verse 23), which reflects the understanding in MT. For discussion, see P. W. Skehan and A. A. DiLella, *The Wisdom of Ben Sira: A New Translation with Notes* (AB 39; New York: Doubleday, 1987), 498.

47. See M. H. Pope, "Seven, Seventh, Seventy," *IDB* 4:285–95; F. C. Fensham, "The Numeral Seventy in the Old Testament and the Family of Jerubbaal, Ahab, Panammuwa and Athirat," *PEQ* 109 (1977), 113–15; J. C. de Moor, "Seventy!" *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 199–203. In the narrative of Elkunirsa, a West Semitic myth written in Hittite, Ashertu's children number 77//88. H. A. Hoffner, *Hittite Myths* (ed. G. M. Beckman; SBL Writings from the Ancient World Series 2; Atlanta, GA: Scholars, 1990), 69. See also chapters 3 and 7.

48. For an interesting but often overlooked study of the correlation between human and divine monarchy in Judah, see J. A. Winter, "Immanence and Regime in the Kingdom of Judah: A Cross-disciplinary Study of a Swansonian Hypothesis," *Sociological Analysis* 44 (1983), 147–62.

49. For a valuable survey of this topic, see T. N. D. Mettinger, *King and Messiah: The Civil and Sacred Legitimization of the Israelite Kings* (Coniectana Biblica, Old Testament Series 8; Lund: Gleerup, 1987). See also K. W. Whitelam, "Israelite Kingship. The Royal Ideology and Its Opponents," *The World of Ancient Israel: Sociological, Anthropological and Political Perspectives: Essays by Members of the Society for Old Testament Study* (ed. R. E. Clements; Cambridge: Cambridge University Press, 1989), 119–39 (which includes a discussion of the old question of the

king's "divine status"); see most recently M. Dietrich and W. Dietrich, "Zwischen Gott und Volk: Einführung des Königtums und Auswahl des Königs nach mesopotamischer und israelitischer Anschauung," *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70, seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 215–64. For "mythical elements" in the Psalter in general, see the helpful survey of C. Petersen, *Mythos im Alten Testament: Bestimmung des Mythosbegriffs und Untersuchung der mythischen Elemente in den Psalmen* (BZAW 157; Berlin: de Gruyter, 1982).

50. For a discussion of "mythic imagery" in the Bible, see the final section of the Introduction.

51. The notion that the kings of the Davidic dynasty were "sons" of Yahweh is a fourth "royal theology" that has been compared with similar formulations in the Ugaritic narrative of Keret and Akkadian inscriptions. On the Akkadian material, see S. M. Paul, "Adoption Formulae: A Study of Cuneiform and Biblical Legal Clauses," *Maarav* 2/2 (1980), 175–79. Whether or not this sonship was expressed as a matter of "adoption" or "natural sonship" remains a controverted issue (see n. 75). In any case, the influence may have moved from royal ideology to mythology. For example, this idea of royal sonship was incorporated into the divine drama of the Baal Cycle (specifically 1.1 IV 12). In general for the application of royal language to Yahweh, see M. Z. Brettler, *God is King: Understanding an Israelite Metaphor* (JSOTSup 76; Sheffield: JSOT, 1989); and J. Tigay, "On Some Aspects of Prayer in the Bible," *AJSreview* 1 (1976), 363–79.

52. For the use of myth by the Egyptian monarchy, see V. A. Tobin, "The Creativity of Egyptian Myth: Wanderings in an Intellectual Labyrinth," *The Society for the Study of Egyptian Antiquities Journal* 18 (1988), 111–13. I wish to thank Professor Gordon Hamilton for bringing this reference to my attention.

53. Cf. the invocation of Addu to march at the side of Zimri-Lim: *i-la-ak ad-du-um i-na šu-me-li-šu*, "March, Addu, at his left side," cited by D. Charpin, "De la Joie à l'Orage," *MARI* 5 (1987), 661.

54. See T. Hiebert, *God of My Victory: The Ancient Hymn in Habakkuk 3* (HSM 38; Atlanta, GA: Scholars, 1986), 4, 92–94, 123; R. D. Haak, *Habakkuk* (VTSup 44; Leiden: Brill, 1992), 83, 90.

55. Haak, *Habakkuk*, 98–99. Hiebert's attempt to locate the "anointed" in the premonarchic period is unpersuasive; see Hiebert, *God of My Victory*, 107.

56. Described extensively in chapter 1. See also J. Day, *God's Conflict with the Dragon and the Sea: Echoes of a Canaanite Myth in the Old Testament* (University of Cambridge Oriental Publications No. 35; Cambridge: Cambridge University Press, 1985), 151–78.

57. In view of the Ugaritic evidence, one may wonder if *něhārôt* represents a plural of majesty or the like or implies a re-application of the mythic language to the maximal borders of the Wadi el-Arish to the Euphrates.

58. G. W. Ahlström, *Psalm 89: Eine liturgie aus dem Ritual des leidenden Königs* (Lund: Gleerup, 1959), 108–11; E. Lipiński, *Le poème royal du Psaume LXXXIX 1.5.20–38* (Cahiers de la Revue biblique 6; Paris: Gabalda, 1967), 53; J.-B. Dumortier, "Un rituel d'intronisation: Le Ps. LXXXIX 2–38," *VT* 22 (1972), 188 and n. 1; *CMHE* 258 n. 177, 261–62; Mosca, "Ugarit and Daniel 7," 509, 512; idem, "Once Again the Heavenly Witness of Ps 89:38," *JBL* 105 (1986), 33. Mosca ("Once Again," 33) points to other examples of "mythico-religious terms" in Psalm 89: the king is "the 'first-born' (*bĕkôr*, v 28) of 'my father' (*'abî*, v 27), and serves as the 'Most High' (*'elyôn*, v 28) with respect to earthly kings." Cf. M. Weinfeld, "Zion and Jerusalem as Religious and Political Capital: Ideology and Utopia," *The Poet and the Historian: Essays in Literary and Historical Biblical Criticism* (ed. R. E. Friedman; HSS 26; Chico, CA: Scholars, 1983), 97–98.

59. For argumentation, see *UBC* 104–5.

60. Stolz, "Funktionen und Bedeutungsbereiche des ugaritischen Ba'almythos," *Funktionen und Leistungen des Mythos: Drei altorientalische Beispiele* (ed. J. Assman et al.; OBO 48; Freiburg: Universitätsverlag; Göttingen: Vandenhoeck und Ruprecht, 1981), 83–118.

61. See P. D. Miller, "Ugarit and the History of Religions," *JNWSL* 9 (1981), 125. For an example of Egyptian cultural influence on the Ugaritic monarchy's iconographic self-presentation (on ivories), see B. M. Bryan, "Art, Empire, and the End of the Bronze Age," *The Study of the Ancient Near East in the Twenty-First Century: The William Foxwell Albright Centennial Conference* (ed. J. S. Cooper and G. M. Schwartz; Winona Lake, IN: Eisenbrauns, 1996), 69–70.

62. Stolz, “Funktionen und Bedeutungsbereiche des ugaritischen Ba’almythos,” 83–118.

63. For discussion, see *EHG* 56–57; J. M. Sasson, “Mari Historiography and the Yahdun-Lim Disc Inscription,” *Lingering Over Words: Studies in the Ancient Near Eastern Literature in Honor of William L. Moran* (ed. T. Abusch, J. Huehnergard and P. Steinkeller; HSS 37; Atlanta, GA: Scholars, 1990), 444 n. 12.

64. E. Gaál, “Tuthmosis III as Storm-God?” *Studia Aegyptiaca* 3 (1977), 29–38. See also *ANET* 249.

65. See chapter 1 for discussion.

66. *CMHE* 258 n. 177; *UBC* 109.

67. *CMHE* 258 n. 177.

68. Cf. the self-comparison of Shalmaneser III with Hadad in *ANET* 277; D. Damrosch, *The Narrative Covenant: Transformations of Genre in the Growth of Biblical Literature* (San Francisco: Harper and Row, 1987), 55, 61, 70.

69. C. F. Whitley, “Textual and Exegetical Observations on Ps 45, 4–7,” *ZAW* 98 (1986), 277–82.

70. For the problems in the dating of this verse, see A. Laato, *Who Is Immanuel? The Rise and Foundering of Isaiah’s Messianic Expectations* (Abo: Abo Academy Press, 1988), 179–88.

71. For Yahweh as “warrior-god,” see also Deuteronomy 10:17 and Jeremiah 32:18. See Mettinger, *King and Messiah*, 273.

72. J. S. M. Mulder, *Studies on Psalm 45* (Oss, the Netherlands: Offsetdrukkerij, 1972), 105.

73. See Holladay, *Isaiah, the Scroll of a Prophetic Heritage* (New York: Pilgrim, 1978), 106–108. I wish to thank Professor Holladay for bringing his discussion of this passage to my attention.

74. H. Wildberger, *Jesaja* (BKAT X/1; Neukirchen-Vluyn: Neukirchener, 1972), 381–89.

75. Holladay cites as parallel the Egyptian practice of giving throne names to the king upon his accession (Holladay, *Isaiah, Scroll of a Prophetic Heritage*, 106–09; see also Mettinger, *King and Messiah*, 287). Akkadian parallels to the language for divine adoption and Ugaritic expressions of Keret as “a son of El” complicate the assumption of direct Egyptian influence on Israelite conception of divine sonship (as argued by Mettinger, *King and Messiah*, 265). During the Late Bronze Age, Egypt and

the Syro-Palestinian coast show mutual influence in the area of royal theology, which perhaps mediated some indirect Egyptian influence on later Israelite royal theology. For a similar argument for possible indirect Egyptian influence in another area of Israelite culture, see *CMHE* 247. For a judicious general opinion about direct Egyptian influence on Israelite culture, see K. A. Kitchen, "Egypt and Israel during the First Millennium," Congress *Volume: Jerusalem 1986* (ed. J. A. Emerton; VTSup 40; Leiden: Brill, 1988), 107–23. For a more optimistic view, see M. Görg, *Gott-König-Reden in Israel und Ägypten* (BWANT 105; Stuttgart: Kohlhammer, 1975).

76. Laato, Who Is Immanuel?, 193.

77. S. C. Layton, *Archaic Features of Canaanite Personal Names in the Hebrew Bible* (HSS 47; Atlanta, GA: Scholars, 1990), 134. Gabriel is a well-known proper name (Daniel 8:16; 9:21; Luke 1:19; for a defense of Gabriel as a sentence-name meaning "El is my strong one" as well as other views, see Layton, *Archaic Features*, 131–34).

78. Or more specificially as "El titles"; see Layton, *Archaic Features*, 133 n. 124.

79. For an Ugaritic mythological example, see CAT 1.1 IV 25, discussed by Wyatt, "'Jedidiah' and Cognate Forms as a Title of Royal Legitimation," *Bib* 66 (1985), 112–25; del Olmo Lete, *Canaanite Religion*, 180.

80. So Laato, *Who Is Immanuel?*, 192–93.

81. See del Olmo Lete, *Canaanite Religion*, 176–81. The best Ugaritic example is CAT 7.63.1–9, discussed on pp. 176–77.

82. Cross (*CMHE* 16) relates both titles to El.

83. See the discussion of this issue in chapter 2, section 2.

84. Deuteronomy 32:8–9; 2 Samuel 22 (Psalm 18):14–16. For discussion, see *EHG* 21.

85. For discussion of the relations between Psalm 45:7 and to Zechariah 14:8, see Whitley, "Textual and Exegetical Observations."

86. Ugaritic evidence has played a role in the debate over the king as "divine" (see Mettinger, *King and Messiah*, 273). The relevance of Keret (specifically CAT 1.14 I 17–23) to this category may not hinge on whether one views *bn 'l* and *qdš* as specific designations for El (and/or Athirat), i.e. "the son of El" and "the Holy One," or general terms, "a divine son," and "a holy one." It may arguable that in the biblical material *bn 'l(m)* is a general designation, "a divine being" (see Psalm 29:1).

87. See H. Schmidt, *Die Psalmen* (HAT 15; Tübingen: Mohr [Siebeck], 1934), 86; W. O. E. Oesterley, *The Psalms; Translated with Text-Critical and Exegetical Notes* (London: SPCK, 1962), 252–53; Kraus, *Psalms 1–59*, 451–52, 455. The range of opinions on this verse may be found in Mulder, *Studies on Psalm 45*, 33–80. Mulder objects to the king as *ʻĕlōhîm* in this verse because *ʾĕlōhîm* elsewhere in the psalm is God. This objection requires a flat reading of the highly charged language in this psalm. The ambiguity of *ʾĕlōhîm* heightens the relationship between God and the monarch in this psalm, which Mulder otherwise views as a central point of the composition.

88. Many commentators construe *ʾĕlōhîm* as the nominal predicate of *kisʾăkā* (see B. Duhm, *Die Psalmen* [KAT XIV; Freiburg/Leipzig/Tübingen: J. C. B. Mohr (Paul Siebeck], 1899], 129; A. K. Kirkpatrick, *The Book of Psalms* [Cambridge: Cambridge University Press, 1957], 247–48; J. R. Porter, "Psalm XLV. 7," 51–53; Mosca, "Once Again the Heavenly Witness of Psalm 89:38," 34–35; RSV). M.J. Dahood (*Psalms I: 1–50* [AB 16; New York: Doubleday, 1966], 269) translates the first half of v 7: "The eternal and everlasting God has enthroned you!" This translation assumes the revocalization *kissēʾăkā*, a denominative *D*-stem verb from *kissēʾ*, "throne." The suggestion is inspired in part by parallelism with *bērakĕkā ʾĕlōhîm* in v 3. The otherwise unattested denominative **ksʾ* and such distant parallelism constitute poor grounds for Dahood's suggestion. Indeed, it may be noted that C. A. and E. G. Briggs (A *Critical and Exegetical Commentary on the Book of Psalms*, [2 vols.; ICC; Edinburgh: T. & T. Clark, 1906], 1.383) render v 7b as parallel to *bērakĕkā ʾĕlōhîm* in v 3. Following G. R. Driver ("The Modern Study of the Hebrew Language," *The People and the Book* [ed. A. S. Peake; Oxford: Clarendon Press, 1925], 115–16), J. A. Emerton ("The Syntactical Problem of Psalm XLV.7," JSS 13 [1968], 58–63) makes the clause into an implicit comparison: "thy throne is (like the throne of) God." This view is followed also by Mulder, *Studies on Psalm 45*, 33–80; and Mettinger, *King and Messiah*, 265, 273. For criticism of this interpretation, see Mosca, "Once Again," 35 n. 24.

89. The Targum makes God the explicit addressee. The Greek versions translate *ho theos*, which may refer either to the king (so C. and E. Briggs, A *Critical and Exegetical Commentary on the Book of Psalms*, 1:387) or God (Mulder, *Studies on Psalm 45*, 48). The Briggses (A *Critical and Exegetical Commentary on the Book of Psalms*, 1.387) and A. Weiser (*The*

Psalms; A Commentary [trans. H. Hartwell; OTL; Philadelphia: Westminster, 1962], 360) also take *'ĕlōhîm* as the king.

90. Emerton, "The Syntactical Problem of Psalm XLV.7," 58–63.

91. Mosca, "Once Again," 35 n. 24.

92. This phrase is used by Mosca ("Once Again," 35), who uses this argument for his own interpretation. He also says of the wording (according to his interpretation) "quite daring," a description that, compared to what survives of expressions of royal theology, also applies to the Israelite king as *'ĕlōhîm*. It may be, however, that such language for the monarch was quite common within royal circles.

93. Whitley, "Textual and Exegetical Observations on Ps 45, 4–7," 282.

94. See Mettinger, *King and Messiah*, 271.

95. Kraus, *Psalms 1–59; A Commentary* (trans. H. C. Oswald; Minneapolis: Augsburg, 1988), 455; see also Mettinger, *King and Messiah*, 242–43.

96. Whitley, "Textual and Exegetical Observations on Ps 45, 4–7," 282.

97. J. R. Porter, "Psalm XLV. 7," *Journal of Theological Studies* n.s. 12 (1961), 51.

98. Emerton, "The Syntactical Problem," 58.

99. Whitelam, "Israelite Kingship," 136. Cf. M. Barker, *The Great Angel: A Study of Israel's Second God* (London: SPCK, 1992), 36.

100. For detailed discussion and notes on the Ugaritic and biblical texts concerning the "ban" (*ḥrm*), see M. S. Smith, "Anat's Warfare Cannibalism and the Biblical Herem," *The Pitcher Is Broken: Memorial Essays in Honor of Gösta W. Ahlström* (ed. L. K. Handy and S. Holloway; JSOTSup 190; Sheffield: JSOT, 1995), 368–86.

101. NJPS translation.

103. See Gibson, "Language about God in the Old Testament," 43–50.

104. For these factors, see F. Stolz, "Monotheismus in Israel," *Monotheismus im Alten Israel und seiner Umwelt* (ed. O. Keel; BB 14; Fribourg: Schweizeriches Katholiches Bibelwerk, 1980) 143–84; *EHG*

145–57; R. Albertz, “Der Ort des Monotheismus in der israeltischen Religionsgeschichte,” *Ein Gott allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israeltischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; 13. Kolloquium der Schweizerischen Akademie der Geistes-und Sozialwissenschaften 1993; Freiburg Schweiz: Universitätsverlag, 1994), 77–96. See also the survey of A. Schenker, “Le monothéisme israélite,” 436–48. I place no stock in either Israel’s “nomadic background” as a factor or the present form of the biblical evidence pertaining to the Exodus.

105. *EHG* xxiii, xxiv, xxxiii, 21–24, 36–37, 145–57, 161, 163.

106. For developments in the eighth to the sixth centuries, see especially B. Halpern, “Jerusalem and the Lineages in the Seventh Century BCE: Kinship and the Rise of Individual Liability,” *Law and Ideology in Monarchic Israel* (ed. B. Halpern and D. W. Hobson; JSOTSup 124; Sheffield: Sheffield Academic Press, 1991), 11–107; idem, “Sybil, or the Two Nations? Archaism, Kinship, Alienation, and the Elite Redefinition of Traditional Culture in Judah in the 8th–7th Centuries B.C.E.,” *The Study of the Ancient Near East in the Twenty-First Century: The William Foxwell Albright Centennial Conference* (ed. J. S. Cooper and G. M. Schwartz; Winona Lake, IN: Eisenbrauns, 1996), 291–338. See further Halpern, “‘Brisker Pipes than Poetry’: The Development of Israelite Monotheism,” *Judaic Perspectives on Ancient Israel* (ed. J. A. Neusner, B. A. Levine, and E. S. Frerichs; Philadelphia: Fortress, 1987), 77–115; idem, “The Baal (and the Asherah) in Seventh Century Judah: Yhwh’s Retainers Retired,” *Konsequente Traditionsgeschichte: Festchrift für Klaus Baltzer zum .65 Geburstag* (ed. R. Bartelmus, T. Krüger, and H. Utzschnieder; OBO 126; Freiburg Schweiz: Universitätsverlag; Göttingen: Vandenhoeck & Ruprecht, 1993), 115–54.

107. See chapter 3 for discussion.

108. For evidence and argument, see Halpern, “Sybil, or the Two Nations?” 291–338. See also J. Blenkinsopp, “The Family in First Temple Israel,” in L. Perdue et al., *Families in Ancient Israel* (The Family, Religion, and Culture series; Louisville, KY: Westminster John Knox, 1997), 88–92. For the family in early Israel, see the references in chapter 3, note 30.

109. J. J. Collins, “Marriage, Divorce, and Family in Second Temple Judaism,” in *Families in Ancient Israel*, 105.

110. Reference courtesy of Professor S. Olyan.

111. See Halpern, “Jerusalem and the Lineages in the Seventh Century BCE,” 11–15. See further Halpern, “Sybil, or the Two Nations?,” 295, 317–18, 323, 326. Note also the criticism of family religion in Jeremiah and Deuteronomy discussed by K. van der Toorn, *Family Religion in Babylonia, Syria and Israel: Continuity and Change in the Forms of Religious Life* (Studies in the History and Culture of the Ancient Near East 7, Leiden: Brill, 1996), 352–72.

112. See Halpern, “Jerusalem and the Lineages in the Seventh Century BCE,” 11–107. See also Halpern, “Sybil, or the Two Nations?” 291–338.

113. This point is not to deny the ongoing use of images for divinity based on familial concepts (such as “father” or “redeemer”); the point involves naming other deities as family relations of Yahweh, for example, as implied in the earlier Psalm 82. For discussion of these points, see the independent discussion of Geller, “The God of the Covenant,” 298.

114. Tigay, *The JPS Torah Commentary*, 433. See further W. Dietrich, “Der Eine Gott als Symbol politischen Widerstands. Religion und Politik im Juda des 7. Jahrhunderts,” *Ein Gott allein? JHWH-Verehrung und biblischer Monotheismus im Kontext der israeltischen und altorientalischen Religionsgeschichte* (ed. W. Dietrich and M. A. Klopfenstein; 13. Kolloquium der Schweizerischen Akademie der Geistes-und Sozialwissenschaften 1993; Freiburg Schweiz: Universitätsverlag, 1994), 463–90; P. Machinist, “The Fall of Assyria in Comparative Ancient Perspective,” *Assyria 1995: Proceedings of the 10th Anniversary Symposium of the Neo-Assyrian Text Corpus Project. Helsinki, September 7–11, 1995* (ed. S. Parpola and R. M. Whiting; Helsinki: The Neo-Assyrian Text Corpus Project, 1997), 179–95 esp. 184; and Geller, “The God of the Covenant,” 316.

115. As noted in n. 1 above, Uffenheimer (“Myth and Reality in Ancient Israel,” 164–66) and Schenker (“Le monothéisme israélite: un dieu qui transcende le monde et les dieux,” 436–38) stress transcendance, albeit in different ways.

116. J. D. Schloen, “The Patrimonial Household in the Kingdom of Ugarit: A Weberian Analysis of Ancient Near Eastern Society” (Ph.D. diss., Harvard University, 1995), 29. See also pp. 5, 161–62.

117. This argument has a long lineage. For a recent discussion in this vein, T. L. Thompson, “The Intellectual Matrix of Early Biblical Narrative: Inclusive Monotheism in Persian Period Palestine,” *The Triumph of Elohim:*

From Yahwisms to Judaisms (ed. D. V. Edelman; Grand Rapids, MI: Eerdmans, 1996), 107–26. For an older argument with critique, see Albright, *From the Stone Age to Christianity*, 358–63. For another recent consideration of some of the issues, see G. Ahn, "Schöpfergott und Monotheismus: Systematische Implikationen der neueren Gatha-Exegese," *"Und Mose schrieb dieses Lied auf": Studien zum Alten Testament und zum Alten Orient. Festschrift für Oswald Loretz zur Vollendung seines 70. seines Lebenjahres mit Beiträgen von Freunden, Schülern und Kollegen* (ed. M. Dietrich and I. Kottsieper; AOAT 250; Münster: Ugarit-Verlag, 1998), 15–26. For a broader consideration of religious issues in the post-exilic period, see *The Crisis of Israelite Religion: Transformations of Religious Tradition in Exilic and Post-Exilic Times* (ed. B. Becking and M. C. A. Korpel; OTS 42; Leiden: Brill, 1999).

118. For this issue as well as other problems, see H. Niehr, "Religio-Historical Aspects of the 'Early Post-Exilic' Period," in *The Crisis of Israelite Religion*, 229.

119. See M. Boyce, "Persian Religion in the Achaemenid Age," *The Cambridge History of Judaism* (ed. W. D. Davies and L. Finkelstein; 3 vols.; Cambridge: Cambridge University Press, 1985), 1:279–307. See also her magisterial study, A *History of Zoroastrianism* (3 vols.; Leiden: Brill, 1975), 1.181–228. See also the summary E. Y. Yamauchi, "Persians," *Peoples of the Old Testament World* (ed. A. J. Hoerth, G. L. Mattingly and E. M. Yamauchi; Cambridge: Lutterworth; Grand Rapids, MI: Baker Books, 1996), 121–23.

120. See C. Breytenbach and P. L. Day, "Satan," *DDD* 726–32 (with further bibliography). Albright dates this development to the second century bce in Testaments of the Twelve Patriarchs (Test. Jud. 20) (see *From the Stone Age*, 362).

121. Oppenheim, "The Eyes of the Lord," *JAOS* 88 (1968), 173–80.

122. This is not to suggest a later uniformity in the Jewish presentation of monotheism in the Hellenistic and Roman periods. See L. W. Hurtado, *One God, One Lord: Early Christian Devotion and Ancient Jewish Monotheism* (sec. ed.; Edinburgh: T. & T. Clark, 1998); idem, "What Do We Mean by 'First-Century Jewish Monotheism'?" *SBLSP* 32 (1993), 348–68; and the ground-breaking book of A. H. Segal, *Two Powers in Heaven: Early Rabbinic Reports about Christianity and Judaism* (Studies in Judaism in Late Antiquity 25; Leiden: Brill, 1997). For a popular survey, see J. J.

Collins, “Jewish Monotheism and Christian Theology,” *Aspects of Monotheism: How God Is One* (ed. H. Shanks and J. Meinhardt; Washington, DC: Biblical Archaeology Society, 1997), 81–105. Yet even where there were some difficulties in the presentation of monotheism, the commitment to the presentation of monotheism remained deeply rooted.

9. *The Formation of Monotheistic Theologies in Biblical Literature*

1. Occasionally later tradition tapped into mythic material generally known but for various reasons not attested as used (as far as is known) by the monarchy, the priesthood, or other authoritative groups in ancient Israel until the Persian period. The post-exilic concept of resurrection gives the appearance of this phenomenon. L. J. Greenspoon (*Traditions in Transformation: Turning Points in Biblical Faith* [ed. B. Halpern and J. D. Levenson; Winona Lake, IN: Eisenbrauns, 1981], 247–321) stresses continuity between Ugaritic material and Israelite notions of resurrection (see chapter 6 n. 213). Ugaritic attests a cult devoted to dead royal ancestors. This cult, evident from both rituals (CAT 1.161) and mythic narratives (CAT 1.20–1.22), describes the living communicating and eating with former monarchs (for surveys, see K. Spronk, *Beatific Afterlife in Ancient Israel and in the Ancient Near East* [AOAT 219; Kevelaer: Butzon & Bercker; Neukirchen-Vlugn: Neukirchener, 1986]; T. J. Lewis, *Cults of the Dead in Ancient Israel and Ugarit* [HSM 39; Atlanta, GA: Scholars, 1989]; see further chapter 6). This idea continued in first-millennium texts, such as references to the dead ancestors in Phoenician sources or the request of the dead King Panammu to drink with the great god, Hadad (= Baal), in KAI 214 (J. C. Greenfield, "Un rite religieux araméen et ses parallèles," *RB* 80 [1973], 46–52); this text explicitly manifests the modification that the dead were thought not to dwell in the underworld but with the high gods, in a sense "in heaven." Resurrection in Israelite tradition is explicit only beginning with Daniel 12:3, sometimes thought to derive from the notion of "national resurrection" in Ezekiel 37 and Isaiah 26:17–19. All three of these texts may be viewed as responses to contemporary needs utilizing old material; resurrection in Daniel 12:3 provides hope to a community in the late Seleucid period, and Ezekiel 37 and Isaiah 26:17–19 visualize restoration from the diaspora. These texts reflect traditional mythic materials, specifically a notion presupposing the image of a person's rising from the dead, and this imagery has pre-exilic roots (e.g., evidently Hosea 6:1–3) in Israelite popular religion continuous to some degree with ideas represented on the royal level in Ugaritic material (Spronk, *Beatific Afterlife*, 293–306). Denials of notions or rituals associated with the dead (e.g., Psalm 16), appropriation of the resurrection

imagery (Hosea 6:1–3; so F. I. Andersen and D. N. Freedman, *Hosea* [AB 24; New York: Doubleday, 1980], 419–21; I thank Professor John J. Collins for bringing this point to my attention) and the Israelite continuation of underworld imagery from second-millennium antecedents witnessed in the Ugaritic texts (N. J. Tromp, *Primitive Conceptions of Death and the Nether World in the Old Testament* [Rome: Pontifical Biblical Institute, 1969]) illustrate that cultic customs associated with the dead, including some idea of resurrection, continued from Ugarit through the rabbinic period; these motifs seem to hibernate from the perspective of scholars, because the religious texts from the Bible and early rabbinic sources rarely mention them and certainly give them no sanction. The idea of resurrection may not derive from mythic material about Baal, however. Rather, it is equally arguable that ideas about Baal's death and resurrection were based on the royal cult of the dead ancestors. The same direction of influence is evidence in the Phoenician material where descriptions of Melqart's death draw on the Phoenician practice of cremation (see C. Bonnet, *Studia Phoenicia VIII: Melqart. Cultes et mythes de l'Héraklès tyrien en Méditerranee* [Leuven: Uitgeverij Peeters, 1988], 173; M S. Smith and E. Bloch-Smith, Review of Bonnet, *Studia Phoenicia VIII*, *JAOS* 110 [1990], 591), as argued in chapter 6. B. Lang ("Life After Death in the Prophetic Promise," Congress *Volume: Jerusalem 1986* [ed. J. A. Emerton; VTSup 40; Leiden: Brill, 1988], 144–56) examines the rise of post-exilic notions of resurrection in a linear fashion, tracing the cessation of pre-exilic ancestor worship due to a "Yahweh-only" party of the late monarchy and the post-exilic rise of resurrection due to Iranian influence. The archaeological evidence shows no change due to the "Yahweh-only" party. Instead, as E. M. Bloch-Smith has shown, attention to the dead possibly including providing food for the dead continued throughout ancient Israel (Bloch-Smith, *Judahite Burial Practices and Beliefs about the Dead* [JSOTSup 123; Sheffield: JSOT, 1992]; idem, "The Cult of the Dead in Judah: Interpreting the Material Remains," *JBL* 111 [1992], 222–23), which indicates that despite religious programs of the eighth through the sixth centuries, popular practices concerning the dead continued. See further chapter 6, section 6. Consequently, post-exilic notions of resurrections may owe more to evolving indigenous popular ideas than to Iranian influence as often suggested. For further discussion of putative Iranian influence on ancient Judean thought, see chapter 8, section 5.

2. The pre-priestly background of Genesis 1:1–2:4a is not the focus of attention here. For the theory that this text is "based upon a poetic document probably of catechetical origin," see *CMHE* 301, citing the Harvard dissertation of J. Kselman, "The Poetic Background of Certain Priestly Traditions" (1971). The bibliography on the first creation story is immense. In addition to the commentaries and works cited here, see W. P. Brown, *Structure, Role, and Ideology in the Hebrew and Greek Texts of Genesis 1:1–2:3* (SBLDS 132; Atlanta, GA: Scholars, 1993); and S. L. Jaki, *Genesis 1 through the Ages* (London: Thomas More, 1992).

3. On creation, see most recently (and the works cited therein) R. J. Clifford, *Creation Accounts in the Ancient Near East and in the Bible* (CBQMS 26; Washington: Catholic Biblical Association of America, 1994); and R. A. Simkins, *Creator and Creation: Nature in the Worldview of Ancient Israel* (Peabody, MA: Hendrickson, 1994). An excerpt based on C. Westermann's three-volume commentary on Genesis was published as *Creation* (trans. J. J. Scullion; Philadelphia: Fortress, 1974) and remains a helpful precis of pertinent information. For some further considerations of issues in this first section, see J. G. Janzen, "On the Moral Nature of God's Power: Yahweh and the Sea in Job and Deutero-Isaiah," *CBQ* 56 (1994), 458–78, esp. 460–65.

4. See B. Foster, *Before the Muses: An Anthology of Akkadian Literature* (2 vols.; Bethesda, MD: CDL Press, 1993), 1.351–402. The well-known older translation of E. A. Speiser is available in *ANET* 60–72, with additions rendered by A. K. Grayson in *ANET* 501–03. For an accessible discussion, see Clifford, *Creation Accounts*, 82–93. This epic poem has been read against the political events of the late second-millennium Babylon and the later neo-Assyrian and neo-Babylonian empires of the first millennium. For a recent discussion, see B. N. Porter, *Images, Power, and Politics: Figurative Aspects of Esarhaddon's Babylonian Policy* (Memoirs of the American Philosophical Society held at Philadelphia for Promoting Useful Knowledge 208; Philadelphia: American Philosophical Society, 1993), 115, 139–43; see also J. Oates, *Babylon* (rev. ed.; London: Thames and Hudson, 1986), 169–74. For further discussion of the theological milieu of the Babylonian version of Enuma Elish, see A. Livingstone, *Mystical and Mythological Explanatory Works of Assyrian and Babylonian Scholars* (Oxford: Clarendon Press, 1986).

5. For further evidence of Yahweh's inheritance of other features associated specifically with Baal, see *EHG* 50–55.

6. G. W. Ahlström, *Psalm 89: Eine liturgie aus dem Ritual des leidenden Königs* (Lund: CWK Gleerup, 1959), 108–11; E. Lipiński, *Le poème royal du Psaume LXXXIX 1.5.20–38* (CahRB 6; Paris: Gabalda, 1967), 53; J.-B. Dumortier, "Un rituel d'intronisation: Le Ps. LXXXIX 2–38," *VT* 22 (1972), 188 and n. 1; *CMHE* 258 n. 177, 261–62; P. Mosca, "Ugarit and Daniel 7: A Missing Link," *Bib* 67 (1986) 509, 512; idem, "Once Again the Heavenly Witness of Ps 89:38," *JBL* 105 (1986), 33. Mosca ("Once Again," 33) points to other examples of "mythico-religious terms" in Psalm 89: the king is the "first-born" (verse 28) of "my father" (verse 27), and serves as the "Most High" (verse 28) with respect to earthly kings." See also M. Weinfeld, "Zion and Jerusalem as Religious and Political Capital: Ideology and Utopia," *The Poet and the Historian: Essays in Literary and Historical Biblical Criticism* (ed. R. E. Friedman; Harvard Semitic Studies 26; Chico, CA: Scholars, 1983), 97–98.

7. J. D. Levenson, *Creation and the Persistence of Evil: The Drama of Divine Omnipotence* (San Francisco: Harper & Row, 1988), 3–78, esp. 3–10.

8. For these points, see following a long line of continental scholarship, Levenson, *Creation*, 53–127.

9. Levenson, *Creation*, 111–20.

10. The royal model is especially pronounced in the study of B. Janowski, "Herrschaft über die Terre: Gen 1, 26–28 und die Semantik von רדה", "*Biblische Theologie und gesellschaftlicher Wandel. Für Norbert Lohfink SJ* (ed. G. Braulik, W. Gross and S. McEvenue; Freiburg: Herder, 1993), 183–98. See also P. Bird, "Gen 1:27b in the Context of the Priestly Account of Creation," *HTR* 74 (1981), 138–44, esp. 140. The further issue is the degree to which the priestly account has moved away from a primarily royal background or model.

11. See the many interpreters cited by Kraus, *Psalms 1–59*, 183. Kraus rejects this view as missing the specifically priestly context of this passage, but this is to miss the borrowing and adaptation of the old royal language. For this usage of the divine image in Egyptian literature (which shows a long history of using this language for the king), see Merikare (*ANET* 417; for further discussion, see Smith, "Mythology and Myth-making," 321–22).

12. For the Mesopotamian and Egyptian evidence, see W. H. Schmidt, *Die Schöpfungsgeschichte der Priesterschrift* (WMANT 17; Neukirchen-Vluyn: Neukirchener, 1964), 136–42; H. Wildberger, "Das Abbild Gottes; Gen. I, 26–30 (2. Teil)," *ThZ* 21 (1965), 484–91; T. N. D. Mettinger, "Abbild oder Urbild? >>Imago Dei<< in traditionsgeschichtlicher Sicht," *ZAW* 86 (1974), 412–18. My thanks go to T. N. D. Mettinger for these references. See further G. A. Jonsson, *The Image of God. Genesis 1:26–28 in a Century of Old Testamament Research* (ConBOT 26; Lund: Almqvist & Wiksell, 1988).

13. Schmidt, *Die Schöpfungsgeschichte*, 139; Fishbane, *The Garments of Torah: Essays in Biblical Hermeneutics* (Bloomington: Indiana University Press, 1989), 139 n. 7.

14. *ANET* 417.

15. Schmidt (*Die Schöpfungsgeschichte*, 140) cites a similar example from a neo-Assyrian letter, but the pertinent passage has been rendered quite differently by S. Parpola (*Letters from Assyrian Scholars to the Kings Esarhaddon and Assurbanipal: Part I: Texts* [AOAT 5/1; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn: Neukirchener, 1970], 112–13). See also *CAD* M/1 281. for further examples, see S. W. Cole and P. Machinist, *Letters from Priests to the Kings Esarhaddon and Assurbanipal* (with contributions by S. Parpola; State Archives of Assyria XIII; Helsinki: Helsinki University, 1998), XXII n. 12.

16. Cf. J. M. Sasson, "Time . . . To Begin," *"Sha'arei Talmon": Studies in the Bible, Qumran, and the Ancient Near East Presented to Shemaryahu Talmon* (ed. M. Fishbane and E. Tov with the assistance of W. W. Fields; Winona Lake, IN: Eisenbrauns, 1992), 186.

17. See also R. D. Nelson, *Raising Up a Faithful Priest Community and Priesthood in Biblical Theology* (Louisville KY: Westminster/John Knox Press, 1993, 23, 36, 94; Blenkinsopp, *Sage, Priest, Prophet: Religious and Intellectual Leadership in Ancient Israel* (Louisville, KY: Westminster/John Knox Press, 1995), 67, 101–04.

18. Without evidence this view is argued also by Blenkinsopp, *Sage, Priest, Prophet*, 68, 104, 113. For the temple background to Genesis 1, see M. Weinfeld, "Sabbath, Temple and the Enthronement of the Lord—The Problem of the Sitz im Leben of Genesis 1:1–2: 3," *Mélanges bibliques et orientaux en l'honneur de* M. *Henri Cazelles* (ed. A. Caquot and M. Delcor; AOAT 212; Kevelaer: Butzon & Bercker; Neukirchen-Vluyn:

Neukirchener, 1981), 501–12; Levenson, *Creation*, 78–87; B. Janowski, "Tempel und Schöpfung. Schöpfungstheologische Aspekte der priesterschriftlichen Heiligtumskonzeption," *Jahrbuch für Biblische Theologie* 5 (1990), 37–69.

19. Levenson, *Creation*, 78–87.

20. For a reading of this verse based on parallels cited in the following note, see Y. Hurowitz, *I Have Built You an Exalted House: Temple Building in the Bible in the Light of Mesopotamian and North West Semitic Writings* (JSOTSup 115; Sheffield: JSOT Press, 1992), 335–37.

21. This connection was made in the Syro-Mesopotamian world as well. See Gudea, Cylinder A, xxv, line 2: "the house's stretching out . . . was like the heights of heaven aweinspiring" (T. Jacobsen, *The Harps that once . . . : Sumerian Poetry in Translation* [New Haven: Yale University Press, 1987], 419). For other examples, see Hurowitz, *I Have Built*, 335–37. See also the cosmic ramifications of Baal's palace in the Ugaritic Baal Cycle (for discussion, see *UBC* 77–78).

22. The translation follows NJPS, apart from the capitalization of the first word and the lack of indentation in the second line.

23. Houston, *Purity and Monotheism: Clean and Unclean Animals in Biblical Law (JSOTS 140; Sheffield: JSOT*, 1993).

24. For correlations between social groups and their cosmologies, see M. Douglas, *Natural Symbols*, esp. 138–40, 169–71, 175–76, 195.

25. See the instructive comments of P. Bird, "'Male and Female He Created Them': Gen. 1.276 in The Context of the Priestly Account of Creation," HTR 74 (1981), 143 n. 37, 152. The royal model also informs the picture of Israel in Isaiah 42:5–6, 55:3, as argued by many interpreters. See most recently J. G. Janzen, "On the Moral Nature of God's Power: Yahweh and the Sea in Job and Deutero-Isaiah," *CBQ* 56 (1994), 469–78. It may be noted further that, according to Isaiah 40–55, the universe is not only the scene of divine conflict (51:9–10a), but also a divine dwelling, specifically a tent (40:22; cf. 42:5). Cf. Isaiah 66:1: "'The heavens are My throne and the earth is My footstool . . . '"

26. See Levenson, *Creation*, 88.

27. Cf. also the sun-goddess' titles "Great Sun" (*rbt špš*) in CAT 1.16 I 37 and "Light of the Gods, Shapshu" (*nrt 'ilm špš*) in 1.3 V 17, 1.4 VIII 21, 1.6 I 8, 11, 13, II 24, III 24, IV 17, 1.19 IV 47, 49.

28. For this interpretation, see *EHG* 102.

29. For another example of this phenomenon in P, see M. S. Smith, "*Bĕrît ʻām/bĕrît ʻôlām*: A New Interpretation of Isa 42:6," *JBL* 100 (1981), 241–43.

30. See the same vocabulary in lines 1, 12, 15, and 16 of the Tell Fakhariyah inscription, discussed in D. M. Gropp and T. J. Lewis, "Motes on some Problems in the Aramaic Text of the Hadd-Yithʻi Bilingual," *BASOR* 259 (1985), 47. For the editio princeps, see A. Abou-Assaf, P. Bordreuil, and A. R. Millard, *La statue de Tell Fekheriyé et son inscription bilingue assyro-araméenne* (Paris: Editions recherche sur les civilisations, 1982).

31. For the paradise traditions, see the summary of J. van Seters and his tour de force in his book, *Prologue to History: The Yahwist as Historian in Genesis* (Louisville, KY: Westminster/John Knox, 1992), 107–34. According to D. Damrosch (*The Narrative Covenant: Transformations of Genre in the Growth of Biblical Literature* [San Francisco: Harper and Row, 1987] 121–22) and B. Batto (*Slaying the Dragon* [Philadelphia: Fortress, 1992]), the biblical picture of paradise and the "fall" represents the priestly tradition's rewriting of the Yahwistic account of Genesis 2–3. Batto argues that for this Yahwistic tradition there was neither a realm of primordial bliss for the human race nor a fall resulting from disobedience; this shaping of the narrative derived from the priestly redaction of the earlier material. He claims that Genesis 1:1–2:4a provides a "new mytho-theological framework" by which the priestly writer provided "a radically new interpretation of a fall from paradise" rather than the Jahwist's "story of inchoate creation wherein the definition of humankind vis-à-vis the deity and animalkind was but gradually worked out." Batto also uses the "fall" in Ezekiel 28 to support this view of the priestly reshaping of the material in Genesis 1–3. Batto assumes that Ezekiel 28 is dependent on Genesis 1–3 for the motif of the fall, but it may be that the motif of the fall predates its priestly reception. It is arguable that the fall with its attendant theological import in Genesis 3 was a variation on the mythic fall inherited by Israelite traditions of paradise. According to H. Bloom (D. Rosenberg and H. Bloom, *The Book of J* [New York: Grove Weidenfeld, 1991], 182, 186), J makes a major point of the original human potential for immortality. The account may function, however, to explain only why humanity is not immortal (as commentators have long noted). Consistent with Bloom's view, however, some scholars have argued for a theory of "the first man" (or "*Urmensch*")

privileged to access to the original heavenly mountain of Yahweh (see Mettinger, *King and Messiah*, 268–75 D. E Callendar, Jr. *Adam in Myth and History: Ancient Israelite Perspective on the Primal Human* [HSS 48; Winona Lake, IN: Eisenbrauns, 2000]). Some trace see this idea as an element of royal theology (see the point of Porter mentioned in chapter 8, section 4). For the figure in Ezekiel 28 as royal, see van Seters, *Prologue to History*, 120). If so, it would indicate how paradise traditions reflect both royal and priestly influence.

32. Many of the following points may be found in Levenson, *Sinai & Zion*, 111–37; M. S. Smith, *Psalms: The Divine Journey* (Mahwah, NJ: Paulist, 1987), 44–47. The old Israelite elements may have included the amalgamation of three divine mountains into a single divine mountainous abode. Paradise incorporates three divine mountains known from Ugaritic tradition: (1) the home of the heavenly council located on the top of a mountainous abode like Mount Olympus; (2) the abode of the god El situated at the meetingpoint of divine waters called “rivers” or “deeps”; and (3) the temple/palace home of the storm-god Baal on his heavenly mountain (H. N. Wallace, *The Eden Narrative* [HSM 32; Atlanta, GA: Scholars, 1985], 70–88 following in the main Cross, *CMHE* 36–39). The mountains of El and the divine assembly may not have been identified in Ugaritic tradition as is commonly claimed by Cross and others. Ezekiel 28 shows reflexes of the heavenly mountain, and Genesis 2–3 contains the element of the rivers. Israelite myth-making transformed these traditions, at least compared with the information provided by the Ugaritic texts, in amalgamating these various abodes into a single divine abode. It is also arguable that some elements known from the Ugaritic texts were deleted in Israelite tradition; the description of the waters of El’s abode never appears in biblical descriptions of the divine mountain, but only in language for the underworld (see *EHG* 22–24, 33–34 n. 57). Genesis 2–3 diminishes the heavenly placement of Eden insofar as Eden is not situated explicitly on the holy mountain of God. Other motifs in the biblical paradise traditions may have further contacts in West Semitic literature. Like Genesis 3, CAT 1.23 may contain the motif of the divine refuge guarded by a divine figure: born of divine parents, the “gracious gods” are expulsed into the desert for seven or eight years, and finally find refuge in a cultivated reserve with a divine guardian. According to de Moor (“East of Eden,” *ZAW* 100 [1988], 106), CAT 1.100 and 1.107 “seem to presupppose a Canaanite tradition about the

garden of Eden." Despite de Moor's departures from less controversial approaches to these texts (see B. A. Levine and J. M. de Tarragon, "<<Shapshu Cries out in Heaven>>: Dealing with Snake-Bites at Ugarit (KTU 1.100, 1.107)," *RB* 95 [1988] 481–518, esp. 505–18; D. Pardee, *Les textes para-mythologiques de la 24e Campagne (1961)* [Ras Shamra-Ougarit IV; Paris: Editions Recherche sur Civilisations, 1988], 223–25, 255–56), they should prompt reconsideration of the assumptions about Mesopotamian influence on the biblical traditions of paradise. The direction of influence is unclear; nor is it evident that these paradise traditions were not part of the stock of mythology common to Mesopotamia and the Levant.

33. For the relations between temple and paradise, see Levenson, *Creation*, 82–99, esp. 93; M. Ottoson, "Eden and the Land of Promise," *Congress Volume: Jerusalem 1986* (ed. J. A. Emerton; VTSup 40; Leiden: Brill, 1988), 179, 188. For the narrative relationship between paradise in Genesis and the Tabernacle narrative in Exodus, see M. Fishbane, *Text and Texture: Close Readings of Selected Biblical Texts* (New York: Schocken, 1979), 8–13; R. H. Moye "In the Beginning: Myth and History in Genesis and Exodus," *JBL* 109 (1990) 577–98.

34. Rather than an Akkadian loan *edinu*, "steppe" (popularized by E. A. Speiser, *Genesis* [AB 1; New York: Doubleday, 1964] 16, 19), the BH word Eden (*ʿēden*) means "fertility, abundance, luxuriance." The root of the word "Eden" first appears in the Baal Cycle in reference to the storm-god, Baal-Hadad (J. C. Greenfield, "A Touch of Eden," *Acta Iranica deuxième série, volume IX. Orientalia J. Duchesne-Guillemin Emerito-oblata* [Leiden: Brill, 1984], 219–24; A. Millard, "The Meaning of Eden," *VT* 34 [1984], 103–06; Ottoson, "Eden and the Land of Promise," 177). It is the word that describes what his rains do for the earth; Baal fertilizes (*ʿdn//yʿdn* [!]) the earth with his rain (*mṭrh*) in CAT 1.4 V 6–7. The word appears later, in line 4 of the Tell Fekheriyeh inscription (see A. Abou-Assaf, P. Bordreuil, and A. Millard, *La Statue de Tell Fekherye et son inscription bilingue assyro-araméenne* [Etudes Assyriologiques 10; Paris: Recherche sur les civilizations, 1982], 23, 62). This text describes Hadad, that is Baal, as the god who makes the earth fertile (*mʿdn*). Eden may be thought then to be the terrestrial sacred mountain fertilized by the storm-god and in this sense a "garden." For the date of the association of the divine mountain with Eden, see Wallace, *The Eden Narrative*, 85–86.

35. Cf. Psalm 36:7–10 with its allusions to *harĕrê ’ēl* and *tĕhôm rabbâ* in verse 7 constitute an example of what Greenfield calls “clusters” (Greenfield, “The ‘Cluster’ in Biblical Poetry,” 159–60). See also F. C. Fensham, “The Term *‘dn* in Keret 14:32–34 (KTU 1.14: II:32–34) and a Few Other Other Occurrences in Ugaritic Reconsidered,” *JNWSL* 15 (1989), 87–90.

36. G. W. Ahlström, *Aspects of Syncretism in Israelite Religion* (Lund: Gleerup, 1963) 44–45 n. 1; J. Levenson, *Theology of the Program of Restoration of Ezekiel 40–48* (HSM 10; Missoula, MT: Scholars, 1976), 25–34; J. Strange, “The Idea of After Life in Solomon’s Temple in Ancient Israel: Some Remarks on the Iconography,” *PEQ* 117 (1985), 35–40; Wallace, *The Eden Narrative*, 85–86; Smith, *Psalms: the Divine Journey*, 44–47.

37. Levenson, *Sinai & Zion*, 130. For different views, see C. Westermann, *Genesis 1–11: A Commentary* (trans. J.J. Scullion; Minneapolis, 1984), 218.

38. Van Seters, *Prologue to History*, 119–22.

39. Wilson, “The Death of the King of Tyre: The Editorial History of Ezekiel 28,” *Love and Death in the Ancient Near East: Essays in Honor of Marvin H. Pope* (ed. J. H. Marks and R. M. Good; Guilford, CT: Four Quarters, 1986), 211–18, esp. 215–16.

40. The divine fall from heaven reflects an ancient mythic motif. The fall is not to be El’s, however. Rather, the clearest attestations of this very difficult motif are related of Athtar in Ugaritic texts and the possibly related astral figure, Shahar ben-Helal, in Isaiah 14. For discussion, see P. K. Craigie, “Helal, Athtar and Phaeton (Jes 14, 12–15),” *ZAW* 85 (1973), 223–25; P. D. Hanson, “Rebellion in Heaven, Azazel, and Euhemeristic Heroes in 1 Enoch 6–11,” *JBL* 96 (1977) 195–233; H. Page, *The Myth of Cosmic Rebellion: A Study of Its Reflexes in Ugaritic and Biblical Literature* (VTSup 65; Leiden: Brill, 1996).

41. Van Seters’ criticisms of Wilson’s proposal are hardly telling against a redactor who may have altered the figure from an originally royal one into a priest (see *Prologue to History*, 131–32 n. 45; see also Callender, *Adam in Myth and History*, 87–135).

42. Parallels with Gilgamesh have been invoked to illustrate some of the oldest features of the Israelite paradise myth, e.g., Cassuto, “The Israelite Epic,” in Cassuto, *Biblical and Oriental Studies, Volume 2:*

Biblical and Ancient Oriental Texts (trans. I. Abrahams; Jerusalem: Magues, 1975), 106. According to Gilgamesh XI:195 (*ANET* 95), Utnapishtim dwells "at the mouth of the rivers" (*ina pî narāti*), a description that many scholars have compared with the location of El's abode in the Ugaritic texts "at the confluence of the two rivers" (*mbk nhrm*) and with the detail of the four rivers in Genesis 2 (see Wallace, *The Eden Narrative*, 76–77, 85–86, Calender, *Adam in Myth and History*, 78). When Gilgamesh meets Utnapishtim, the ancient sage relates how Enlil granted him immortality (XI 193–194; *ANET* 95). Utnapishtim is said to have joined the assembly of the gods (XI:7; *ANET* 93), a notion presumed of dwelling on the divine mountain in Ezekiel 28. The hero Gilgamesh could have eaten a plant of rejuvenation prior to its being snatched by a snake. For treatments of the parallels between Mesopotamian literature and Genesis 2–3, see Westermann, *Genesis 1–11*, 213–75; Wallace, *The Eden Narrative*, 71–72, 104, 119–20; W. G. Lambert, "Old Testament Mythology in its Ancient Near Eastern Context," *Congress Volume: Jerusalem 1986* (ed. J. A. Emerton; VTSup 40; Leiden: Brill, 1988), 138–39; van Seters, *Prologue to History*, 120–27. For a comparison of the stones and trees in the Garden of Eden and in Gilgamesh IX 5, 47–51, see H. P. Müller, "Parallelen zu Gen 2f. und Ez 28 aus dem Gilgamesch-Epos," *ZAH* 3 (1990), 167–78. For various points of comparison between Adam and Adapa, see J. J. M. Roberts, "Does God Lie? Divine Deceit as a Theological Problem in Israelite Prophetic Literature," Congress *Volume: Jerusalem 1986* (ed. J. A. Emerton; VTSup 40; Leiden: Brill, 1988) 212; G. Erickson, "Adam och Adapa," *STK* 66 (1990), 122–28; H. P. Müller, "Drei Deutungen des Todes: Genesis 3, der Mythos von Adapa und die Sage von Gilgamesch," *Altes Testament und christlicher Glaube* (ed. I. Baldermann et al.; Jahrbuch für Biblische Theologie 6; Neukirchen-Vluyn: Neukirchener, 1991), 117–34; and Callender, *Adam in Myth and History*, 75–84.

43. For discussion, see *EHG* 94–95. For discussion of this goddess, see chapter 4, section 4.

44. Cf. the olive tree of Astarte; see R. Hanson, *Tyrian Influence in the Upper Galilee* (Meiron Excavation Project 2; Cambridge, MA: American Schools of Oriental Research, 1980), 37; P. Naster, "Ambrosiai Petrai sur les monnaies de Tyr," *Studia Phoenicia IV: La religion phénicienne* (Leuven: Uitgeverij Peeters; Namur: Presses universitaires de Namur, 1986), 361–71.

45. A wordplay first brought to my attention by A. Ceresko.

46. See Lang, *Wisdom and the Book of Proverbs: A Hebrew Goddess Redefined* (New York: Pilgrims, 1986). Cited and endorsed by S. A. Meier, "Women and Communication in the Ancient Near East," *JAOS* 111 (1991), 543.

47. For a recent discussion of the material culture pertinent to scribalism in ancient Israel, see D. W. Jamieson-Drake, *Scribes and Schools in Monarchic Judah: A Socio-Archeological Approach* (Sheffield: Almond, 1991). According to Jamieson-Drake, scribes may be better regarded as professional administrators.

48. This view has been advocated by John M. Miller ("The Malachi Circle and the Book of Proverbs" [unpublished manuscript, gratefully cited with permission]), based on parallels between Proverbs, on the one hand, and Deuteronomy and Malachi, on the other hand. The latter two works have been long traced to a Levitical background. For the Levitical background of Deuteronomy, see S. D. McBride cited in R. R. Wilson, *Prophecy and Society in Ancient Israel* (Philadelphia: Fortress, 1980), 18 n. 36, 156–66, 222; McBride, "Biblical Literature in its Historical Context: The Old Testament," *Harper's Bible Commentary* (ed. J. L. Mays; San Francisco: Harper & Row, 1988), 20, 21. Concerning the Levitical background of Malachi, see McBride, "Biblical Literature in its Historical Context: The Old Testament," 23; J. M. O'Brien, *Priest and Levite in Malachi* (SBLDS 121; Atlanta, GA: Scholars, 1990).

49. See M. S. Smith, "The Levitical Compilation of the Psalter," *ZAW* 103 (1991), 258–63. Ben Sira (Ecclesiasticus) continues and amplifies the female personification of Wisdom. Ben Sira 1:20 draws on the image of Wisdom as a tree of life: "To fear the Lord is the root of wisdom, and her branches are long life." Ben Sira 24:12–17 likewise describes Wisdom as different types of trees. Ben Sira 4:13 and Baruch 4:1, echoing Proverbs 3:18, use the image of holding fast to Wisdom. Narrative (within direct discourse) concerning Wisdom appears in Ben Sira 10, and Wisdom of Solomon 10 narrates past acts by Wisdom. This wisdom material shows the transformation of mythic imagery into narrative form. There have been attempts to retroject this narrative to the older biblical passages about Wisdom (for criticisms of this approach, see G. von Rad, *Wisdom in Israel* [trans. J. D. Martin; Nashville: Abingdon, 1972], 160 n. 17). This material, like royal psalms, may show the impact of a group's interests or background

in creating mythic material. The majority of biblical critics might be followed in viewing this material in terms of "wisdom circles." The social background involved may not simply be "wisdom circles." Rather, like Proverbs, Ben Sira may have been a priestly product (S. Olyan, "Ben Sira's Relationship in the Priesthood," *HTR* 80 [1987], 261–86). The narrative of the female figure of Wisdom in this work may have served to legitimate his priestly concerns. By the same token, Baruch 4 and Wisdom of Solomon 10 indicate that the notion of personified wisdom circulated more widely.

50. *CMHE* 137; Clifford, *Creation Accounts*, 154–56, 168–72.

51. The apocalyptic sections of Daniel represent further well-known examples of the use of mythic material to express a political agenda. See J. Emerton, "The Origin of the Son of Man Imagery," *Journal of Theological Studies* 9 (1958), 225–42; J.J. Collins, *The Apocalyptic Vision of the Book of Daniel* (HSM 16; Missoula, MT: Scholars, 1977), 95–105; idem, "Apocalyptic Genre and Mythic Allusions in Daniel," *Journal for the Study of the Old Testament* 21 (1981), 89–93; P. Mosca, "Ugarit and Daniel 7: A Missing Link," *Biblica* 67 (1986), 496–517. For the Ugaritic background of the name of Daniel, see J. Day, "The Daniel of Ugarit and Ezekiel and the Hero of the Book of Daniel," *VT* 30 (1980), 174–84.

52. For discussion, see R. R. Wilson, "From Prophecy to Apocalyptic: Reflections on the Shape of Israelite Religion," *Semeia* 21 (1981), 79–95; and J. J. Collins, *Daniel: A Commentary on the Book of Daniel* (ed. F. M. Cross; Hermaneia; Minneapolis: Fortress, 1993), 286–94. For the best treatment of the thematic continuities from royal theology to apocalyptic, see P. Mosca, "Ugaritic and Daniel 7: A Missing Link," *Bib* 67 (1986), 496–517.

53. For the priestly and royal patronage of the Baal Cycle, see the colophon in CAT 1.6 VI 54–56. For discussion, see A. Rainey, *The Scribe at Ugarit. His Position and Influence* (Proceedings of the Israel Academy of Sciences and Humanities, Vol. III, No. 4; Jerusalem: Israel Academy of Sciences and Humanities, 1968), 127–28. The priestly transmission of the other literary texts from Ugarit are also indicated in colophons (1.6 VI 58; cf. 1.17 VI 55).

54. Gunkel, *Schöpfung und Chaos in Urzeit und Endzeit. Eine religionsgeschichtliche Untersuchung über Gen 1 und Ap Joh* 12 (sec. ed.; Göttingen: Vandenhoeck und Ruprecht, 1921).

55. See S. Mowinckel, “Hat es ein israelitisches Nationalepos gegeben?” *ZAW* 53 (1953), 130–54; U. Cassuto, “The Israelite Epic”; C. Conroy, “Hebrew Epic: Historical Notes and Critical Reflections,” *Bib* 61 (1980), 1–30; Watson, *Classical Hebrew Poetry*, 83–86. For a helpful discussion of the hermeneutical problems involved, see Damrosch, *The Narrative Covenant*, esp. 51–87. Damrosch’s genetic explanation for the prose epic hinges on Israelite use of Mesopotamian prose models (see esp. pp. 41, 43, 46). While intriguing, Damrosch does not address West Semitic mythic antecedents to biblical myth and mythic material.

56. Talmon, “Did There Exist A Biblical National Epic?” *Proceedings of the Seventh World Congress of Jewish Studies; Studies in the Bible and the Ancient Near East* (Jerusalem: World Union of Jewish Studies, 1981), 50–53. Talmon does not specify which Ugaritic texts he has in mind; to judge from his remarks one might assume that he means the Baal Cycle, Keret, Aqhat, and other texts usually cited as Ugaritic “mythological texts” (see the texts in CAT 1.1–1.24).

57. Talmon, “Did There Exist A Biblical National Epic?” 55–58. Talmon’s view has a long scholarly lineage (see O. Eissfeldt, *The Old Testament: An Introduction* [trans. P. R. Ackroyd; New York: Harper and Row, 1965], 35).

58. Talmon, “Did There Exist a Biblical National Epic?” 55. More relevant is Talmon’s point regarding the shift from poetry to prose in the later shaping of Israelite literature, especially if it were to be construed as a shift from oral compositions (set down in writing) to written compositions.

59. Cassuto, “The Israelite Epic,” 76–80.

60. Cassuto, “The Israelite Epic,” 80.

61. Cf. Eissfeldt, *The Old Testament*, 36.

62. Damrosch, The Narrative Covenant, 46.

63. Damrosch, *The Narrative Covenant*, 41, 43. As Damrosch (*The Narrative Covenant*, 159 n. 13) notes, his argument depends on the dating of the biblical materials, and for this argument he observes that he remains unable to adjudicate the issue. Indeed, linguistic arguments such as the neo-Assyrian loan *abarraku* behind BH *’abrēk* (Genesis 41:43) suggest a date after major cultural contact between Israel and the neo-Assyrians. Similarly, the thematic connection between the story of baby Moses in the ark (Exodus 2) and the Sargon Birth legend suggests a neo-Assyrian date. See

W. W. Hallo, *The People of the Book* (Brown Judace Studies 225; Atlanta, GA: Scholars, 1991), 39, 48.

64. Damrosch, *The Narrative Covenant*, 88–143.

65. Damrosch, *The Narrative Covenant*, 263.

66. On the topics of myth and mythic material, see Introduction, section 4. It might be argued that the creation of an anti-mythic deity constituted in some sense a new mythic image for Yahweh.

67. See chapter 5, section 2; also *EHG* xxiv, 150–52.

68. For more recent authors in this vein, see for example, A. H. W. Curtis, *Ugarit (Ras Shamra)* (Cities of the Biblcial World; Cambridge: Lutterworth, 1985), 121; M. C. A. Korpel, A *Rift in the Clouds: Ugaritic and Hebrew Descriptions of the Divine* (Munster: UGARIT-Verlag, 1990), 125–27; *EHG* 163–65.

69. Barr, "Theophany and Anthropomorphism in the Old Testament," *Congress Volume: Oxford 1959* (VTSup 7; Leiden: Brill, 1960), 31–38.

70. See M. H. Pope, "The Scene on the Drinking Mug from Ugarit," *Near Eastern Studies in Honor of William Foxwell Albright* (ed. H. Goedicke; Baltimore: Johns Hopkins University Press, 1971), 393–405; M. Weinfeld, "Semiramis: Her Name and Her Origin," *Ah, Assyria: Studies in Assyrian History and Ancient Near Eastern Historiography Presented to Hayim Tadmor* (ed. M. Cogan and I. Eph'al; Scripta Hierosolymitana 33; Jerusalem: Magnes, 1991), 99–103. See also Derketo as a fish in *De Dea Syria* 14 (Attridge and Oden, *The Syrian Goddess (De Dea Syria) Attributed to Lucian* [Texts and Translations 9, Graeco-Roman Religion Series 1; Missoula, MT: Scholars Press, 1976], 23).

71. Bloom in Rosenberg and Bloom, *The Book of J*, 301.

72. See S. Mowinckel, "Det kultiske synspunkt som forskningsprincipp i den gammeltestamentlige videnskap," *NTT* 25 (1924), 20; translated in M. R. Hauge, "Sigmund Mowinckel and the Psalms," *SJOT* 2 (1988) = *The Life and Work of Sigmund Mowinckel* (ed. H. M. Barstad and M. Ottoson), 62.

73. See *CMHE* 33 n. 151. The comparison is not without difficulties since the biblical word-pair indicates "face" for *pānêkā* while Ugaritic scholars take *pnth* as "his joints," which is semantically more proximate to BH **tĕmûnâ* and Ugaritic **tmnt* (see H. L. Ginsberg, "The Victory of the Land-God over the Sea-God," *JPOS* 15 [1935], 332 nn. 18–19). For another suggestion, see J. C. de Moor, "The Anatomy of the Back," *UF* 12 (1980),

425–26. Ps 17:15 involves the experience of seeing the form of the god, probably a morning vision following a night of sleep-incubation in the temple or the like; cf. the late Egyptian tale of Setne Khamwas and Si-osire, which describes the appearance of the form of Thoth in a dream-vision (M. Lichtheim, *Ancient Egyptian Literature: Volume III: The Late Period* [Berkeley: University of California Press, 1980], 146; S. B. Parker, *The Pre-biblical Narrative Tradition: Essays on the Ugaritic Poems Keret and Aqhat* [SBLRBS 24; Atlanta, GA: Scholars, 1988], 101–05, 155).

74. The literature on this subject is enormous. See the survey of F. W. Dobbs-Allsopp, "The Syntagma of *bat* Followed by a Geographical Name in the Hebrew Bible: A Reconsideration of Its Meaning and Grammar," *CBQ* 57 (1995), 451–70.

75. Von Rad, *Wisdom in Israel*, 167.

76. And perhaps the goddess Asherah and her tree or pole called by the same name. For discussion of Asherah in Israel, see chapter 4, section 4.

77. See also linguistic examples cited in *EHG* 100.

78. For a more detailed discussion, see chapter 5, section 2.

79. For a possible Egyptian analogue, see J. Baines, "Egyptian Myth and Discourse: Myths, Gods, and the Early Written and Iconographic Record," *JNES* 50 (1991) 103–05; cf. V. A. Tobin, "The Creativity of Egyptian Myth: Wanderings in an Intellectual Labyrinth," *The Society For The Study of Egyptian Antiguities Journal* 18 (1988), 107.

80. Narrative set in the present (see Zechariah 3–5) would not qualify as a myth for Oden (see the Introduction, section 4). Cf. Baines, "Egyptian Myth and Discourse," 99.

81. Damrosch, *The Narrative Covenant*, 46, 122.

82. For some examples from Jewish tradition, see Jacobs, "Elements of Near-Eastern Mythology in Rabbinic Aggadah," *JJS* 28 (1977), 1–11. As Jacobs ("Elements of Near-Eastern Mythology in Rabbinic Aggadah," 2) observes, b. B. Bat. 74b attests Yamm's title in the form, *śar šel yam*, "Prince of the sea":

> When God desired to create the world, He said to the Prince of the sea, "Open your mouth and swallow up all the waters of the world!" The latter answered, "Lord of the universe, I have enough with my own!" Whereupon God trampled on him and slew him, as it is said,

> “By his power He beat down the sea, and by his understanding He smote Rahab.”

The parade example of West Semitic myth from the NT is Revelation 21:1–4, which includes the disappearance of sea, the appearance of the new Jerusalem, the bride “adorned for her husband,” and the disappearance of death. Indeed, this passage approximates the sequence of the three main parts of the Baal Cycle.

10. *Monotheism in Isaiah* 40–55

1. More recently, see B. D. Sommer, *A Prophet Reads Scripture: Allusion in Isaiah 40–66* (Contraversions. Jews and Other Differences; Stanford, CA: Stanford University Press, 1998), 84–86, 112–19. This move is reflected also in the priestly view of the eternal covenant in Genesis 9, 17 and Exodus 31 (cf. Jeremiah 32:40, 50:5; Ezekiel 16:60); see M. S. Smith, *“Bĕrît ʻām/bĕrît ʻôlām*: A New Proposal for the Crux of Isa 42:6,” *JBL* 100 (1981), 241–43. For Second Isaiah more generally, see the references in chapter 8, note 34.

2. Clearly a precondition for this form of monotheism then is the attribution of both creation and war to Yahweh. Both, however, predate the expressions of monotheism in the seventh and sixth centuries. For this reason, the more local explanation for monotheism lies in the specific conditions of this later situation.

34. Walker and Dick, “The Induction,” 114.

35. Hallo (“Cult Statue and Divine Image,” 14–15) compares Nabonidus’s attempts to remove Babylonian gods to safety against the imminent approach of Cyrus. See P.-A. Beaulieu, *The Reign of Nabonidus King of Babylon 556–539* B.C. (Yale Near Eastern Researches 10; New Haven: Yale University Press, 1989), 220–24. For disputes about image-making in competing neo-Babylonian cults and their possible relevance to image polemics in Second Isaiah, see V. Hurowitz, חקות העמים הבל הוא (Jer 10:3) in Light of Akkadian *parṣu* and *Zaqīqu* referring to Cult Statues,” *JQR* 89 (1999), 277–90. For the wider context of competition among neo-Babylonian cults and its pertinence to monotheistic discourse in Second Isaiah, see P. Machinist, “Mesopotamian Imperialism and Israelite Religion: A Case from the Second Isaiah,” *Symbiosis, Symbolism and the Power of the Past: Canaan, Ancient Israel and Their Neighbors from the Late Bronze Age Through Roman Palestine* (ed. W. Dever and S. Gitin, in preparation).

36. C. Franke, *Isaiah 46, 47, 48: A New Literary-Critical Reading* (Biblical and Judaic Studies from UCSD 3; Winona Lake, IN: Eisenbrauns, 1994), 98: “These two [Bel and Nebo//Jacob/Israel] are compared in that both are carried, borne up. The contrast is in the agents who carry. In the case of Bel and Nebo, it is the animals in. 1–2 or the people in vv. 6–7 who must carry them. The People of Israel by contrast are carried by their God.”

37. Franke, *Isaiah* 46, 47, 48, 98.

38. Franke, *Isaiah* 46, 47, 48, 263; see also p. 72.

39. See the seminal work by B. D. Sommer, *A Prophet Reads Scripture*. His work touches little on the example explored here. See also P. T. Willey, *Remember the Former Things: The Recollection of Previous Texts in Isaiah 40–55* (SBLDS 161; Atlanta, GA: Scholars, 1997).

40. M. Friedländer, *The Commentary of Ibn Ezra on Isaiah. Vol. I. Translation of the Commentary* (London, 1873; New York: Philipp Feldheim, nd), 198.

41. Cf. **p‘l*: Isaiah 44:15 image-maker makes a god versus Yahweh’s making in Isaiah 43:13.

42. R. J. Clifford, “The Function of Idol Passages in Second Isaiah,” *CBQ* 42 (1980), 463. For further discussion of Isaiah 44, see K. Holter, *Second Isaiah’s Idol-Fabrication Passages* (Beiträge zur biblischen Exegese und Theologie 28; Frankfurt: Peter Lang, 1995), 127–212.

43. Clifford, “The Function of Idol Passages in Second Isaiah,” 463.

44. Friedländer, *The Commentary of Ibn Ezra on Isaiah. Vol. I*, 199.

45. See the careful study of H. G. M. Williamson, *The Book Called Isaiah: Deutero-Isaiah's Role in Composition and Redaction* (Oxford: Clarendon Press, 1994); also C. R. Seitz, *Word Without End: The Old Testament as Abiding Theological Witness* (Grand Rapids, MI: Eerdmans, 1998), 168–93. See also the many fine essays in *The Book of Isaiah. Le Livre d'Isaïe: Les oracles et leur relectures unité et complexité de l'ouvrage* (ed. J. Vermeylen; BETL LXXXI; Leuven: University Press/Peeters, 1989); and *Studies in the Book of Isaiah: Festschrift Willem A.* M. *Beuken* (ed. J. van Ruiten and M. Vervenne; BETL CXXXII; Leuven: University Press/Uitgeverij, 1997). For intertextual study of "Second Isaiah" more generally, see Willey, *Remember the Former Things*. This work does not address Isaiah 44. According to Sommer (A *Prophet Reads Scripture*, 71–74), "Second Isaiah" references First Isaiah less than other prophetic section such as Jeremiah, but his work also notes literary allusions to First Isaiah in "Second Isaiah."

46. C. Seitz, "The Divine Council: Temporal Transition and New Prophecy in the Book of Isaiah," *JBL* 109/2 (1990), 229–47; cf. R.J. Clifford, "The Unity of the Book of Isaiah and Its Cosmogonic Language," *CBQ* 55/1 (1993), 1–17.

47. Unless one accepts the first-person reading of the objecting voice in 40:6b–7 as at Qumran; See D. L. Petersen, *Late Israelite Prophecy: Studies in Deutero-Prophetic Literature and in Chronicles* (SBLDS 23; Missoula, MT: Scholars, 1977), 20. The third-person reading of MT represents the more difficult reading (or *lector difficilior*); see Seitz, "The Divine Council," 234–35, 237.

48. C. R. Seitz, "How is the Prophet Isaiah Present in the Latter Half of the Book? The Logic of Chapters 40–66 within the Book of Isaiah," *JBL* 115 (1996), 219–40.

49. R. J. Clifford, *Fair Spoken and Persuading: An Interpretation of Second Isaiah* (New York: Paulist, 1984), 1.

50. See Seitz, "The Divine Council," 229–47.

51. See C. Begg, "Babylon in the Book of Isaiah," *The Book of Isaiah. Le Livre d'Isaïe: Les oracles et leur relectures unité et complexite de l'ouvrage* (ed. J. Vermeylen; BETL LXXXI; Leuven: University Press/Peeters, 1989), 121–25; cf. Sommer, A *Prophet Reads Scripture*, 74.

52. For a balanced treatment of this poem's background, see P. Sanders, *The Provenance of Deuteronomy 32* (OTS 32; Leiden: Brill, 1996). Sanders favors a pre-exilic date, perhaps the ninth or eighth century.

53. Note also in Deuteronomy 32:10 the theme of *midbār* (cf. Isaiah 40); and in 32: 36 *wĕ'al-'ăbādāyw yitnĕhām* (cf. Isaiah 40).

54. For discussion of this term, see Sommer, A *Prophet Reads Scripture*, 66–67. Whether more is involved cannot be determined.

55. *Clifford, Fair Spoken and Persuading*, 112 n. 10.

56. For the difficulties, see Clifford, "The Function of Idol Passages in Second Isaiah," 455 n. 19:

Bel bows down; Nebu dips low	*kr' bl qrs nbw*
On beasts and cattle are they borne,	*lḥyh wlbhmh nś't*
Carried as a loan on weary animals.	*mwswt ms' l'yph*
They dip low; they bow down together.	*qrsw kr'w yḥdw*

Clifford takes hāyû 'ăsabbêhem, "they were their idols," as a gloss secondarily incorporated into the text understood as the idiom, **hyh l-*, "to become."

57. On this question, see D. W. van Winkle, "Proselytes in Isaiah XL–LV?: A Study of Isaiah XLIV 1–5," *VT* 47 (1997), 341–59. I do not believe that proselytes are the issue here.

58. Franke, *Isaiah 46, 47, 48*, 263: "The passages in which the people are criticized for being stubborn and far from justice, that is, rebels, are related to the theme of idolatry. While many scholars look upon the polemic against idols as mocking the foolish Babylonians for their worship of mere wood and metal objects, in these two poems it is far more serious. The charges of idolatry are directed at Jacob/Israel. It is the Israelites, not the Babylonians, who are criticized for making and worshipping idols. DI is not addressing his message to the Babylonians, nor is he concerned with their future. This poet is concerned that the exiles might once again jeopardize their chance to escape from oppression, just as they did at Mt. Sinai by their lack of true righteousness and their making and worshipping idols." See pp. 32, 52–55.

59. "Religious Polemics," *Leiden Institute for the Study of Religions (LISOR) Newsletter* 1997/1:8–9.

60. For some of the issues concerning scribes and literacy in ancient Israel, see D. W. Jamieson-Drake, *Scribes and Schools in Monarchic Judah: A Socio-Archeological Approach* (Sheffield: Almond, 1991); I. M. Young, "Israelite Literacy: Interpreting the Evidence," *VT* 48 (1998), 239–53. For the emergence of written prophecy especially in the sixth century, see Sommer, A *Prophet Reads Scripture*. See also the fine survey of W. M. Schniedewind, "Orality and Literacy in Ancient Israel," *Religious Studies Review* 26/4 (2000), 327–32. The literature on these topics is vast and beyond the scope of this work.

61. See the important reflections of S. A. Geller, *Sacred Enigmas: Literary Religion in the Hebrew Bible* (London: Routledge, 1996), esp. 168–94.

ACKNOWLEDGEMENTS

I owe a great debt of gratitude to many people and institutions, but I would like to begin by thanking scholars who have dedicated their energies to investigating the many mysteries of the Baal Cycle, other Ugaritic texts and relevant Near Eastern works. A commentary such as this one necessarily pays tribute to the labors of many predecessors and contemporaries.

This work was made possible through the aid of numerous institutions. I am grateful to the National Endowment for the Humanities, which awarded me a summer travel grant in 1986 for research on the Baal Cycle. During the spring and summer of 1987 and the summers of 1986 and 1989, I worked on this book in the hospitable surroundings of the William Foxwell Albright Institute and École Biblique et Archéologique Française de Jérusalem. For their generous hospitality I am grateful to these institutions and their members. I heartifully thank the American Schools of Oriental Research, the Association of Theological Schools and the Dorot Foundation for providing funding for the spring semester of 1987. As director of the West Semitic Research project, Professor Bruce Zuckerman was very generous in letting me use photographs of 1.1 and 1.2. It was a time-consuming chore to produce the photographs, and I wish to express my heartfelt thanks to Professor Zuckerman. I also am deeply indebted to the Département des Antiquités Orientales at the Louvre, which allowed me to examine the originals of KTU 1.1 and 1.2 in September of 1992. I thank the director of the department, Madame Béatrice André-Salvini, and I am grateful to the members of the department for their kind hospitality during my visit. I wish to express further my gratitude to Professor Bruce Zuckerman for permission to publish WSRP photographs of 1.1 and 1.2 and to the Louvre for permission to publish to publish these photographs as well a photograph of the Baal stele (AO 15.775).

I wish to thank friends who have aided this work over the years. Professor Benjamin Foster offered many criticisms and corrections to the Introduction. The members of the Old Testament Colloquium offered many criticisms of sections of this work, and they have been an inspiration to me. I have read the Baal Cycle with different classes which have given me new insights. I deeply appreciate my former students, especially Douglas Green, Richard Whitekettle and Wolfgang Hüllstrung. I also wish to thank my father, Donald

E. Smith, and my mother-in-law, Sonia Bloch, for providing me with recent newspaper reports pertaining to the domestication of horses. The members of the theology department of Saint Joseph's University have been gracious to me, and with their encouragement this work has finally come to publication. Paul Aspan, Gary Beckman, Richard Clifford, Aloysius Fitzgerald, Jonas Greenfield, Tryggve Mettinger, Dennis Pardee, Christopher Seitz, Karel van der Toorn, Robert Wilson and Bruce Zuckerman have sustained me with their interest, their help and their many acts of kindness. It remains to be added that I alone am responsible for the errors in this work.

My family has time and again earned my many thanks. My wife, Liz, and our children, Benjamin, Rachel and Shulamit, have given me many moments of joy, and these moments day in and day out whisper the wonder of life which the Baal Cycle expresses so eloquently and so deeply. I began work on this volume in the year of our Benjamin's birth, and I now come to its end eight years later in the third year of our Shulamit's life.

Finally, I reserve some words for my teacher, Marvin H. Pope, who has influenced this work more than any other person. I met Professor Pope in his office in the spring of 1980. The room was filled with shelves and boxes of books, papers, cards, drawings. In the middle stood a small seminar table with a blackboard of Professor Pope's own making with lines of some Ugaritic text. Little did I know that this would be the place where as a graduate student I would witness the resurrection of an ancient cosmos thanks to Professor Pope's imagination. Since graduate school I have continued to learn from Professor Pope through his works especially his ground-breaking *El in the Ugaritic Texts* (1955), his internationally acclaimed Anchor Bible commentaries on Job and the Song of Songs, and his most recent volume, *Probative Pontificating in Ugaritic and Biblical Literature; Collected Essays*.[1] In these and other works of his, I have frequently revisited Professor Pope's insights, his humor and expressions of humility. As a small expression of my thanks, I dedicate this work to this gracious man, my mentor and my friend.

25 January 1994
Bala Cynwyd, Pennsylvania

PREFACE

The Story of the Baal Cycle

Greatest Astarte and Zeus, called both Demarous and Adodos, king of gods, were ruling over the land with the consent of Kronos.

With these words the late classical work, *The Phoenician History* attributed to Philo of Byblos[1] characterizes the political harmony in the West Semitic pantheon. Astarte and Baal, here called Zeus, jointly exercised power over the universe under the aegis of El identified in this text as Kronos. With the consent of El, the revered executive over the pantheon, Astarte and Baal ruled, the latter in the words of Philo, as "king of the gods." Philo of Byblos describes a peaceful rule which followed a divine struggle for kingship over the pantheon and the cosmos. The one extant indigenous source that details this struggle for kingship among the West Semitic gods is the Ugaritic Baal Cycle. This myth comes from the city of Ugarit, modern Ras Shamra, which lies near Latakia on the Syrian coast, approximately a hundred miles north of Beirut. It was during the first half of the fourteenth century that the extant form of the Baal Cycle, one of the classics of ancient literature, was committed to writing.

The six tablets[2] of the Baal Cycle[3] present a vivid story of conflict and kingship, love and death. The first two tablets present the battle of the storm-god Baal with his enemy, Yamm, whose name literally means "Sea." The next two tablets recount how Baal's palace, the mark of his kingship, came to be built. The last two tablets describe Baal's struggle against Mot, whose name means "Death." The god Athtar is also mentioned in two interludes as a possible rival to Baal. These four deities are warrior-gods who rule different realms of the universe: Baal, the god of the storm; Athtar, the god of the stars who

---

[1] PE 1.10.31; Oden and Attridge 1981:55.

[2] See pp. 2-15. The enumeration of Ugaritic texts in this volume follows KTU which employs four numbers for any given textual citation: first, according to the type of text; second, according to the number of the tablet in that classification; third, according to the column of that tablet; and finally, according to the line number in that column. The Baal Cycle belongs to the first group of texts in KTU, specifically the mythological or literary texts; it constitutes the first text of this group, and it comprises six tablets. Its number in KTU is therefore KTU 1.1 through 1.6, and its columns are cited in Roman numerals followed by line numbers.

[3] The ancient name of this work is unknown except in the form of the superscription to 1.6 I 1, *lbʿl*, "concerning Baal," hence the modern name "the Baal Cycle.

is perhaps considered a natural irrigator[4]; Yamm, the god of the sea; and Mot, the god of the underworld (Gaster 1950:121-30; Smith 1985:115). Other deities take part in various parts of the narrative. El, the older king and executive over the pantheon, and Athirat, his wife and mother of the pantheon or "queen-mother" in Handy's formulation (1990:20), rule their divine family which is represented in narrow terms as "the seventy sons of Athirat" or in wider terms as the divine assembly patterned after the human royal council.[5] This older divine couple is generally construed as the parents of the pantheon who mediate the struggle among their sons making rival claims to the divine throne. The other characters in the cycle manifest other aspects of nature and society: Kothar, the middle-level specialist who serves other deities with his craftsmanship which includes spells (Smith 1985:464); Shapshu, the divine messenger who mediates among the rival claimants and travels between the realms of life and death; and Astarte and Anat, Baal's warrior allies.[6] The names of two of Baal's three women (*ʾaṯtm*) and "brides" (*klt*), Tallay ("Dewy") and Pidray ("Flashy"?) reflect their meteorological kinship with Baal, while the name of Arsay ("Earthy" or "Netherworldly"[7]) may evidence her chthonic relationship to him. The unnamed messengers of Yamm as well as Baal's messengers named Gpn w-Ugr, and Athirat's messengers, Qdš w-Amrr, occupy the lowest level of divine society (Smith 1984b). Based largely but not exclusively on the Baal Cycle, Handy (1990) sees four levels of rank among these deities: (i) highest

---

[4] For a survey of the evidence, see Excursus 3 (pp. 240-50) below.

[5] It is under the wider definition that Baal refers to El as "my father," although Baal bears the title *bn dgn*, "son of Dagan." For the issue of Baal's paternity, see pp. 91-94 below. For further definition of the family of El and Athirat, see pp. 92-93 below.

[6] Anat is also called Baal's sister. For discussion of Anat, see pp. 195-96 n. 147, 205, 311. For Astarte, see pp. 278-79, 311. It is often assumed that Anat and Astarte are also consorts of Baal, but this view of Anat has been disputed by P. L. Day (1991: 141-46; 1992:181-90) and Walls (1992:145-46). While both scholars note the absence of explicit sexual relations between Baal and Anat in clearly understood Ugaritic texts, Anat and Astarte are viewed as Seth's wives (*ANET* 15). This relationship may reflect a West Semitic association of these goddesses with Baal and may complicate the view of Day and Walls. The relevance of this evidence has been accordingly challenged by both Day and Walls following Te Velde (1977:29-30) since otherwise Anat is not called the consort of Seth. The very uniqueness of the rendering may militate in favor of its authenticity, however.

[7] See p. 72 for the evidence.

authority (El and Athirat); (ii) major active gods which form what Handy calls the managerial stratum of the cosmos (Baal, Yamm, Mot); (iii) craft-gods who have a "specialist responsibility" acknowledged and used by superiors in the divine organization (Kothar); and (iv) messenger deities. While the Ugaritic pantheon included a large host of other deities, the Baal Cycle shows a limited cast of characters in rendering its story of divine struggle.

The construction of the cosmos as represented by the divine abodes reflects aspect of their inhabitants. El's abode is cast in cosmic terms without explicit terrestrial referent.[8] As the wife of El, Athirat is not accorded a separate abode. Baal's abode is located on the mountain that receives the greatest rainfall in Syria.[9] His three "women" presumably live with him, although prior to receiving his own "palace," Baal and his three women apparently dwell with El and Athirat (KTU 1.3 IV 48-53, V 38-44, 1.4 I 9-18, IV 52-57). Mot dwells in the Underworld. Perhaps in accordance with his function as natural irrigator Athtar may live on earth.[10] Yamm presumably lives in the sea, although this fact is never made explicit. Anat's home is described in terrestrial terms in 1.3 II, although the text does not explicitly locate this palace at Inbb, the name of her mountain given elsewhere. Kothar's abodes at Memphis and Kaphtor may reflect trade in materials for crafts such as metals or trade in materials produced by crafts.[11] In sum, the Baal Cycle presents a royal society, with different deities and their abodes showing various aspects of the world known to the culture of ancient Ugarit.

For decades scholars have rightly emphasized the kingship of Baal as the main theme of the cycle. This volume modifies the general scholarly view of the cycle in three major ways. The first is to extend the political understanding of the text. It is well-known that political language dominates the Baal Cycle, but it should be recognized that the Baal Cycle presents the universe as a single political reality connecting different levels. This political reality of Baal's rule integrates three levels, cosmic, human and natural. First, the Baal Cycle concentrates on the interaction of the deities in the larger cosmos. Ritual texts and other mythological works involve deities, but no other text

[11] See below p. 167.

focuses so strongly on the Ugaritic deities and the larger cosmos as the Baal Cycle. Second, the political events in the Baal Cycle reflect a concern for human society. The ramifications of Baal's struggles on humanity are occasionally expressed in the text. Indeed, the divine struggles represent life and death for Ugarit's society.[12] According to Mosca (1986:506-07), the Baal Cycle recapitulates the story of human life itself: "Even the individual life-cycle mirrors the myth's movement: before life, chaos; after life, death. This pattern, too, is built into the myth."[13] The struggles of Baal mirror the struggles of humanity against the vicissitudes of a dangerous world, but his victories re-invigorate not only the world of the divine pantheon but also human society. The dangers and defeats, the victories and the glories described on the divine level serve to give a religio-political interpretation of human experience. Third, the Baal Cycle uses natural phenomena, especially lightning, thunder and rains to underscore the political power of Baal the Storm-god. Through Baal's struggles for power, the Baal Cycle interrelates humanity, nature and divinity, and thereby yields an integrated political vision of chaos, life and death. As Kinet (1978:238) remarks, "Der Baʿal-Zyklus birgt eine mythologische Deutung der Wirklichkeit, in der der Ugariter lebt." Finally, it is to be observed that given the extent and depth of martial language attributed to the West Semitic storm-god in human political texts outside of Ugarit, it seems quite plausible to stress the Baal Cycle's political importance and perhaps to suggest a political setting for the background of the Baal Cycle and its transmission.

The second modification concerns the general view of Baal in the cycle. Baal has often been compared with the powerful figures of Marduk in Enuma Elish and Yahweh in the Hebrew Bible, but the differences among these three deities are as significant as their similarities. Indeed, the Baal Cycle does not render the West Semitic storm-god in the exalted terms reserved for Marduk or Yah-

---

[12] Cf. Buckert's remarks (1979:98): "...civilized man, and monarchy, and warfare are not self-sufficient, as man is not the only representative of life; if he has managed to achieve dominance, this is by a violent tour de force, hope transcending the desperate borders of factuality."

[13] In this connection it may be noted Erich Neumann, a disciple of Carl G. Jung, interpreted some features in the Baal Cycle in terms of psychological development. See Neumann 1970:74, 97,160, 179; and p. 75 below.

weh. Nor does the Baal Cycle construe Baal as a champion who vanquishes his enemies for all time. Rather, Baal acquires a limited kingship and not primarily through his own exploits, but mostly thanks to the aid of other deities. His foes loom large not only in a single combat, but in repeated engagements, and without definitive outcomes. The threat of their return is never overcome entirely, at least in the case of Mot, and perhaps their return was as expected as the annual return of Baal's rains. Baal's kingship is indeed finite, won despite his own limitations and perhaps the limitations of the great deities as well. The cosmos of Baal's kingship is a universe nurturing life wondrously, but precariously. This universe is frequently, if not usually, overshadowed by chaos, the transient character of life and finally death. In its powerful vision of reality and its aesthetic accomplishment, the Baal Cycle is the greatest example of West Semitic myth.

The third scholarly view which requires correction involves the relationship between the Baal Cycle and the Hebrew Bible. Apart from its own importance, the Baal Cycle is central to the study of Syro-Palestinian religious literature in the Bronze and Iron Ages (2200-587 B. C. E.). The Baal Cycle manifests many of the religious ideas contained in the Hebrew Bible. Indeed, it may be said that the Baal Cycle expresses the heart of the West Semitic religion from which Israelite religion largely developed (Smith 1990:xxii-xxiv, 1-7). The original god of Israel was probably El (Smith 1990:7). Two deities, Baal and Athirat, who play major roles in the Baal Cycle, were worshipped and condemned in ancient Israel, according to 1 Kings 18 and other biblical passages. The depictions of Yahweh as enthroned king in Isaiah 6 and Daniel 7, or stormy warrior-god in Psalm 18 = 2 Samuel 22, resemble depictions of El and Baal respectively in the Baal Cycle (*CMHE* 13-75, 145-94). Many of the type-scenes and literary formulas in the Bible are found in the Baal Cycle (*BOS* 16-109). Several renderings of deities and literary features of the West Semitic milieu reflected in the Baal Cycle passed into ancient Israelite culture described by the Hebrew Bible and then into the New Testament and other Jewish works of the Second Temple period (6th century B. C. E. to 1st century C. E.). Numerous features of western civilization have their roots in West Semitic literature, best represented in its premier exemplar, the Baal Cycle. The message of peace of Christmas night, the heavenly banquet of the Last Supper, the depiction of God as "my heavenly

father," the beast of Revelation and many other features familiar from the New Testament and rabbinic literature stem from a long history which includes the Baal Cycle.

The closing chapters of Revelation provide a glimpse of the future which recalls the three major themes of Baal's defeat of Yamm, the building of the heavenly palace for Baal, and his conflict with Mot. In the words of Rev 21:1-4,

> Then I saw a new heaven and a new earth; for the first heaven and the first earth had passed away, and the sea was no more. And I saw the holy city, new Jerusalem, coming down out of heaven from God, prepared as a bride adorned for her husband; and I heard a great voice from the throne saying, "Behold, the dwelling of God is with people. He will dwell with them, and they will be his people, and God himself will be with them; he will wipe every tear from their eyes, and death shall be no more, neither shall there be mourning nor crying nor pain anymore, for the former things have passed away.

This passage includes the death of Sea, the descent of the heavenly city and the final destruction of Death. The Baal Cycle describe a similar sequence, specifically Baal's defeat of Yamm, Baal's enthronement in his heavenly palace, and his battle against Mot. In both Rev 21:1-4 and the Baal Cycle these events issue in the rejuvenation of the earth and the proximity of divine presence. Baal assumes residence in his temple producing the rains which refructify the world. In Revelation 21 divine proximity is represented by the divine presence dwelling in the temple-city which signals the transformation of the world. It is no exaggeration to suggest that early forms of many, if not most, formative religious concepts of the western civilization may be found in the Baal Cycle.

Despite the importance of the Baal Cycle for biblical studies, this work and other Ugaritic texts have suffered in the assessment of at least a few biblical scholars, largely because of their personal convictions. The religious sentiments of U. Oldenburg (*CEBCR* xi) perhaps prevented him from appreciating the greatness of a Ugaritic work such as the Baal Cycle:

> That which impelled me to begin the study of Canaanite religion was my desire to investigate its relationship to Hebrew religion, to see whether the faith of Yahweh was a product of the soil of the Canaanite religion. The more I studied pre-Israelite religion, the more I was amazed with its utter depravity and wickedness. Indeed there was *nothing* in it to inspire the sublime faith of Yahweh. His coming is like the rising sun dispelling the darkness of Canaanite superstitition. (Oldenburg's italics)

As this quotation indicates, the Baal Cycle and other Ugaritic texts have served in the imagination of some biblical scholars as a foil to the advent of "true" Israelite monotheism. Indeed, this approach to Ugaritic literature replicates an older "scholarly" denigration of post-exilic Israelite religion. Mendenhall's work, *The Tenth Generation* (1973:226) impugns both post-exilic Judaism and the West Semitic religion of the Late Bronze Age in exalting both biblical prophecy and Christianity.[14] This attitude is unwarranted in the work of religious historians, especially as it may be argued that the Baal Cycle presents as deep and rich a religious vision of human existence as any biblical book.

This study represents the first volume of a commentary on the Baal Cycle, and it is my hope that it will contribute to a deeper appreciation of this work both on its own terms and in its relations to the Bible. A further goal of this work is to overcome the largely atomistic fashion of studying the Baal Cycle. Study of the Baal Cycle has long focused primarily on philological concerns, an understandable emphasis given the enormous etymological difficulties which Ugaritic literature presents. Apart from notable exceptions such as de Moor's *SPUMB* and van Zijl's *Baal*, longer works treating the whole of the Baal Cycle have been generally lacking. Studies dealing with the literary themes or structures of the Baal Cycle are conspicuous for their absence, except for del Olmo Lete's comments on the Baal Cycle (*MLC*). This first volume of this commentary contains the introduction and treatment of the first two tablets (KTU 1.1-1.2). A further volume(s) will address the other four tablets (KTU 1.3-1.6).

The Format of This Volume

This study follows the format of biblical commentaries in a number of ways. These are main features of this volume:

1. Introduction

Addressed in this section are general matters including the date of the tablets, their order, the development of the cycle, its literary classification, and the history of its interpretation with a critical assessment.

---

[14] I wish to thank Professor David Owen for bringing this passage to my attention.

2. Bibliography for each column

The study of each column begins with a bibliography of text editions, studies and translations.

3. Text

The readings of the text are based on a comparison of several sources: Virolleaud's *editio princeps* (cited as V); CTA and KTU; previously unpublished photographs of KTU 1.1 and 1.2 produced by Professor Bruce Zuckerman of the University of Southern California, director of the West Semitic Research Project (WSRP); and 20.5 hours spent on examining the originals (with two magnifying lenses) housed in the Département des Antiquités Orientales of the Louvre.

The siglum ° over a letter indicates a damaged but visible wedge. Damage consists generally of two sorts, either the loss of part of the sign in a lacuna or damage to the surface of the tablet. The siglum ° with no sign beneath it indicates the attestation of a wedge of a letter which cannot be identified. In contrast to the format of Virolleaud, CTA and KTU, spaces have not been placed between words (including those with proclitics or enclitics). Emendations are not made in the text, but are recorded in the textual notes and reflected in the vocalized texts. Reconstructions have been held to a relative minimum and have been based on generally accepted parallels.

4. The Textual Notes

It is my goal to present a minimal text which may serve as the reliable basis for interpretation and to inform readers as to the relative reliability or unreliability of different readings. The brief descriptions of the epigraphical views concerning the readings of signs may enable readers to appreciate the complexities involved. The textual notes survey the opinions of Virolleaud's *editio princeps* of each text, CTA, KTU, and less frequently the views of other scholars (e.g., *UT*, *SPUMB*, *CML*^{2} and *MLC*). Further observations are made on the basis of comparison of the WSRP photographs with the originals in the Louvre. The remarks frequently refer to these photographs

which have been produced as plates at the end of this volume. Disputes over reading word-dividers are not easily resolved, as they represent one of the greatest sources of diagreement among the editions. Some comments are made on the epigraphy of word-dividers in KTU 1.1 and 1.2, but readers may consult Horwitz 1972 for further details (see also Horwitz 1973).

For a number of reasons this edition of the text does not represent a marked advance. First, the tablets have suffered deterioration, and as a result some readings given by Virolleaud, CTA and KTU cannot be seen. This fact is especially evident in cases where Virolleaud was able to see more wedges than subsequent epigraphers. Second, the scholars who undertook these editions had far more experience with Ugaritic epigraphy than I do, and as a result, their readings represent an important witness even in cases where my readings differ. Third, the readings and the various proposed reconstructions could have been discussed at considerably greater length. Readers interested in pursuing less likely readings and reconstructions may consult *MLC*. Finally, due to my lack of drawing ability, this edition does not contain drawings which have rightly become *de rigeur* for the epigraphy of Ugaritic tablets.

5. Translation

Translations of Ugaritic texts have varied in style. Ginsberg's translation of the Baal Cycle (*ANET*) renders the archaic, epic flavor of the original. Coogan (1981) presents the cycle in a polished prose. Pope's translations, scattered throughout his articles and biblical commentaries, customarily keep the English translation as terse as the Ugaritic original. Parker (1990b:262-63) recommends that translations be rendered in traditional English meter. These translations are to be neither colloquial nor archaic. Rather, they should translate the picture, activity, idea or mood conveyed in a group of words (as opposed to word-for-word translations), and express the tension associated with great poetry.

A wooden translation has been avoided in this volume. Rather, a direct and terse translation has been attempted in order to form a bridge between the original text and modern readers. In passages where a word-for-word translation especially fails the original, I have tried to heed Parker's call for a translation which conveys the overall effect produced by groups of words. Parker calls also for a

metrical translation. It has been argued that meter is not a feature of Ugaritic poetry (Pardee 1981a), and it is not clear that its reproduction in translation is the most appropriate means of rendering the original. The translation in this volume follows the generally recognized canons of Ugaritic poetry, namely various types of parallelism and terseness of lines (see Pardee 1988d). Furthermore, an attempt has been made to capture some of the paranomasia of the original. Finally, unlike Parker, I sense that the Baal Cycle was somewhat archaic to its audience. This view may be more intuitive than not, but some grammatical features seem to point in this direction.[15]

The words of Novalis (Friedrich von Hardenberg) in his Pollen (no. 68) capture the task facing the translator:

> A translation is either grammatical, transforming, or mythic. Mythic translations are translations of the highest sort. They realize the purest, most perfect character of the individual work of art. There does not yet exist, I believe, a complete model of this... It calls for a mind that has been permeated by the poetic spirit and the philosophic spirit to their full extent... Grammatical translations are translations in the ordinary sense. They require much scholarship but only discursive qualities. What is called for in the transforming translations if they are to be authentic is the highest poetic spirit... The true translator of this kind must in fact be the artist himself, capable of realizing the idea of the whole at will, in one way or another—He must be the poet of the poet, and thus capable of letting him speak in accord with his and the poet's own idea at the same time.

While this standard is impossible to achieve, it remains a goal, nonetheless. If it cannot be achieved in translation, it is sought more fully in the commentary; and if neither translation nor commentary "transforms" readers, then it is my hope that through the rest of this work readers may at least sense and appreciate the vast mythic world lying within and behind the translation.

A few matters of format and style in the translation should be mentioned. Line numbers appear at the left-hand side of the translation. This format departs from the custom of many editions of Ugaritic texts, which place line numbers at the precise points in the translation corresponding to the beginning of lines in the original text. Furthermore, the translation in this volume delimits major sections within a column by headings intended to indicate the plot for

---

[15] For the possibility of archaic language in the Baal Cycle, see below p. 36-58.

readers. These headings have been set in bold print to distinguish them from the translations. I have indented lines where parallelism between lines is clear in order to indicate the division of passages into bicolas (two-line poetic units) and tricolas (three-line units). Where the parallelism is unclear, no indentation has been made in the translation. Although the problem of "tense" in verbs in poetic narrative has not been resolved fully, verbs in narrative are rendered in the English historical present, as the present-future prefix form is the dominant one used in Ugaritic poetic narrative.[16]

6. *Vocalized Texts*

For those columns which are not too damaged, namely 1.1 III, 1.1 II, 1.2 III, 1.2 I and 1.2 IV, a vocalized text has been provided next to the translation. Texts that are very damaged, specifically 1.1 V, 1.1 IV and 1.2 II, remain unvocalized. This difference in format creates some inconsistency, but it is my hope that such inconsistency will be worth the gain provided by vocalizations. The *Ugaritica V* polyglot lists, Ugaritic loanwords into Akkadian texts from Ras Shamra and the three forms of ʾ in Ugaritic[17] provide information about the syllabic forms of Ugaritic words. Because of these sources, vocalizing texts involves more than comparing the syllabic formation of cognate words in other Semitic languages. There are, however, many hazards involved in vocalizing Ugaritic texts,[18] and I do not pretend that the vocalizations presented in this volume approximate the speech of the inhabitants of ancient Ugarit. Indeed, sometimes individual words cannot be vocalized with confidence. In some instances footnotes explain the vocalization. A lower case $_{v}$ (for vowel) is supplied to indicate the likelihood of the presence of a vowel although it is unknown which vowel is involved. Similarly, many passages cannot be vocalized with confidence, and readers will realize this fact by noting those lines in the translation which lack a corresponding vocalized text. KTU 1.1 III and II, while quite broken, have parallels elsewhere, and can be vocalized partially.

---

[16] See below pp. 39-41.

[17] For the first two categories, see Huehnergard 1987b. For the "three ʾalephs," see Marcus 1968. For further discussion of particulars, see notes to the vocalizations.

[18] See the cautionary remarks of *CMHE* 21 n. 50; Pope 1977:181-82 n. 90; Pardee 1978b:75 n. 5, 1988d:1; Tuttle 1978:253-68.

KTU 1.2 I and IV are in better shape and are provided with vocalizations.

Despite the obvious and insurmountable problems facing vocalizations of Ugaritic texts, there are four advantages to presenting a vocalized text with a translation. First, it makes the commentary easier to follow. The vocalized text and translation can be read together as readers peruse the commentary. Second, a vocalized text makes explicit the grammatical analysis underlying the translations. Third, it indicates to an imperfect degree the assonance in each colon. While the assonance represented in a vocalized text remains purely theoretical, for the purpose of sensing the poetry a vocalized text appears preferable to a text without vowels. Indeed, the vocalization of a text read and heard many times may echo, albeit imperfectly, the great beauty of the original and may permit a deeper appreciation of its sonant quality. Fourth, a vocalized text provides readers with a general indication as to its difficulty.

7. Commentary

The commentary for each vocalized column begins with a poetic analysis consisting of a vocalization of each colon, followed first by a scanning of semantic parallelism (indicated by lower case letters) and then by word and syllable counts. The scanning of semantic parallelism renders construct phrases as a single unit, but where construct phrases in a second or third line correspond to a single word in the previous line within a colon, the siglum "x + y" is given in parentheses, following the practice of Pardee (1988d:9, 77-78). While the sigla for parallelism includes both grammatical and semantic parallelism (cf. Pardee 1988d:9-10 n. 15), some of the more distinctive features of grammatical parallelism are indicated in the remarks which follow the word and syllable counts.

The word and syllable counts indicate the length of lines within a colon. At times, a word count may be misleading in suggesting an imbalance in the length of lines in a colon, but the syllable count in the same colon not infrequently corrects this misimpression. The word count remains valuable, since the syllable count depends on the vocalization and is therefore purely theoretical. Some remarks bearing on various sorts of parallelism—syntactical, morphological and sonant (Hrushovski 1971:1201-02; Berlin 1985; Greenstein 1986-87)—often follow the presentation of cola, although syntactical

parallelism is not treated according to any specific system. Rather, it has been my interest to indicate how these sorts of parallelism may bind and contrast lines of cola, especially in the absence of apparent semantic parallelism.

Berlin's treatment of sound pairs has advanced the understanding of sonant parallelism, and her definition of a sound pair (Berlin 1985:104; Berlin's italics) is followed in this volume: "*the repetition in parallel words or lines of the same or similar consonants in any order within close proximity.*" Observations regarding various links between cola in this commentary are based more specifically on three criteria used by Berlin to delimit sonant parallelism (Berlin 1985:105): (i) "at least two sets of consonants must be involved"; (ii) "the sets must be in close proximity, within a word or adjacent words in both lines"; and (iii) "'same or similar consonant' means the identical phoneme, an allophone . . ., or two phonemes which are articulated similarly". I have not exhausted the observations which might be made about poetic features on the colonic and super-colonic levels in the meticulous manner presented by Pardee (1988d). Without denying the value of Pardee's approach, I have attempted instead to identify distinctive features especially within cola (see Berlin 1985:130-40; Parker 1990a:504). Furthermore, it is occasionally possible to suggest how formal features may affect the understanding of the content. They may shape the perspective given to the content or suggest further meaning. In these instances one may sense the performative character of the poetic medium. Indeed, the poetry of the Baal Cycle is sometimes so passionate and imaginative that even modern minds molded by sensibilities so distant from ancient Ugarit may be profoundly moved.

The poetic analysis is followed by some overall contextual remarks (labelled as "Introduction"). The commentary then presents detailed exegesis. The smallest unit of interpretation is the word followed in complexity by the syntax of a phrase; the clause; the sentence (often equivalent to a line); the colon (of which there are three general types, the monocolon, the bicolon and the tricolon); multi-cola units; and the larger setting of narrative or direct speech. Within these various units of length are other indicators of meaning: formulas varying in intricacy, form-critical elements, type-scenes, the intertextual relationships with other passages.[19] Each of the

[19] Ginsberg 1948:139; Parker 1989b:7-59; Fisher, *RSP III* 253, 260 n. 16; Whitaker, *RSP III* 209-11.

units of length and other features provide insights as well as check and balances on interpretation. In short, there is no philology without literary analysis; in turn, literary analysis has no foundation without sound philology. Literary structures and form-critical elements are noted in the section-by-section commentary which correspond to the divisions made in the translation.

Detailed philological notes for some words appear in the commentary proper. Otherwise, they have been relegated to footnotes to the translation when philological discussions are judged not to be central to the commentary. Readers will find further available philological options not discussed in this volume provided either in the notes of Caquot and Sznycer (*TO*), Cassuto (*GA*), de Moor (1988), the glossaries of *UT* and del Olmo Lete (*MLC*), the monographs of de Moor (*SPUMB*) and van Zijl (*Baal*), the list of Pardee (1987c; cf. 1980), or the many other studies provided in the bibliography for each column. It seems unnecessary to duplicate the philological information given in all of these works. Indeed, it appears misguided to list every proposed etymology, although a limited number of sound philological suggestions is obviously necessary in order to clarify a passage. The philological discussions in this commentary tend toward the scholarly consensus and avoid highly irregular interpretations although many of these are noted in the commentary. The context of a word, whether it involves the syntax of the line, the parallelism within a colon, or the fixed expression or *topos* or even its usage elsewhere within Ugaritic, represents the final determinant for suggested etymologies. While it is not always possible at this stage of knowledge to offer a solution which meets all the criteria suggested by the various levels of unit (line, colon, etc.), this standard remains the goal.

8. Bibliography

The bibliography at the end of this volume provides full documentation for the secondary sources cited in the text. The bibliography for Ugaritic studies is extensive,[20] and the Baal Cycle is no exception. The "social science" format is used for citing secondary literature,

---

[20] In general, see AOAT 21/1-5 for works up to 1971; for works after 1970, see the *Newsletter for Ugaritic Studies*.

thereby eliminating the need for many footnotes. The bibliography cited in this work indicates my great indebtness to the works of so many others.

9. Plates of Tablets

Photographs of the tablets appear at the end of this volume. The plates represent only a selection (which perhaps points to the need for published volumes of photographs for each tablet or group of tablets).

INTRODUCTION

The Data of the Tablets

The date of the tablets has been established by correlating textual and archaeological evidence. The colophon at the end of the Baal Cycle's sixth and final tablet, KTU 1.6 VI 54-58, mentions the name of king *nqmd*, supposedly Niqmaddu II, the contemporary of Amenophis IV and Shuppiluliuma I (Kitchen 1977; *SPUMB* 47).[1] According to Goetze (1975:6-19), Niqmaddu II reigned ca. 1380-1346. De Moor (*SPUMB* 47) proposes that the accessions of Niqmaddu II, Amenophis IV and Shuppiluliuma I may be calculated to approximately 1380. On the basis of this synchronization, de Moor argues that the extant tablets of the Baal Cycle may be dated more precisely to 1380-1360 (see Kinet 1981:67).[2] Other scholars prefer a wider range of 1400-1350, since the synchronization of the three monarchs' reigns may allow for a greater latitude in date (*CML*[1] 1; *CML*[2] 1).

The archaeological information pertaining to the tablets comports with a date in the first half of the fourteenth century. The tablets and fragments belonging to the Baal Cycle, generally regarded as KTU 1.1-1.6 (see the following section), were excavated between 1930 and 1933 from what has been called the "library of the High Priest," or scribal school situated between two temples, traditionally thought to belong to Baal and Dagan, which stand on the acropolis. The following synopsis indicates the relative provenance within the "library" and year of discovery of the six tablets[3]:

1.1: South-east, tranchée B 3, point topographique 9 at a depth of .65 cm (= point topographique 345). 1931.
1.2 I, II, IV: South-east, tranchée N 3, point topographique 3 at a depth of 2.10 cm, perhaps of the "terre ramenée" (= point topographique 203). 1931.

---

[1] There may have been more than two Ugaritic kings named *nqmd*, as the list of kings in KTU 1.113 contains many lacunas presumably containing the names of numerous unknown monarchs. Pardee (1988b:173) suggests that originally this text may have listed as many as fifty-two kings.

[2] For the dates of Amenophis' reign, given as 1379-1362, see Goetze 1975:7; cf. Astour 1989:5-9, 77.

[3] For this information, see Bordreuil and Pardee 1989:31, 32. See also Sasson 1981:89 n. 19; van Soldt 1991:212-20. The precise find sites were not published by Schaeffer (1956:252, fig. 216). On the basis of Schaeffer's excavation notebooks, Bordreuil and Pardee (1989) provide more precise information, at least for the first two tablets.

1.2 III: South-east, tranchée B 3, point topographique 3, 5, 7 at a depth of .30-.40 cm, perhaps of the "terre ramenée" (= point topographique 338, 343, 341). 1931.
1.3: South-east, tranchée C-E, K-L, point topographique 210-264. 1931.
1.4: North-east/South-east, tranchée C-E, K-L, point topographique 210-264. 1930/1931.
1.5: North-east/South-east, tranchée C-E, K-L, point topographique 210-264. 1930/1931.
1.6: North-east, tranchée C-E, K-L, point topographique 210-264. 1930/33.

Schaeffer (1956:252, fig. 216) stated that some of the tablets excavated in 1931 "were fixed in cement blocks from a demolished building; the blocks had been reused for buildings erected after the library." (Schaeffer 1932:22; North 1973:146 n. 114). De Vaux (1940:249; North 1973:146 n. 113) surmised that the tablets had been found in or near ash-layers dating to the first half of the fourteenth century.

The Order of the Tablets and their Narrative and Thematic Continuity

The initial issues facing the interpretation of the Baal Cycle involve the length of the cycle as well as the number, order and continuity of the tablets. It is presently impossible to determine the original length of the cycle. From the physical evidence of the tablets, Herdner's reconstructions of KTU 1.1-1.6 totalled about 1830 lines. Albright (1961:31) opined that "the Baal Epic contained at least 5,000 lines and perhaps even two or three times as much."[4]

The following chart produced by del Olmo Lete[5] represents a partial consensus of Ugaritic scholarship concerning the number and order of the tablets, KTU 1.1–1.6:

Herdner	1	2	3	4	5	6
Driver	1(+9?)	2	3	4	5	6
Jirku	1	2	3	4	5	6
van Zijl	1?	2	3	4	5	6
Gray	1?	2(+9?)	3	4	5	6

[4] It is unclear whether or not this estimate included tablets other than 1.1-1.6.
[5] *MLC* 83; cf. *Baal* 7; Vine 1965:277; cf. Fisher, *RSP III* 233.

Vine .....1?	2(+ 9?)		3	4	5	6		
de Langhe	2	3	4	5	6

Attempts to assign other tablets (such as KTU 1.7 – 1.12) to the Baal Cycle have been generally rejected (*SPUMB* 3-8; *MLC* 81 – 88). KTU 1.7 – 1.12 contain material that overlaps with the Baal Cycle. For example, KTU 1.7 provides direct parallels with KTU 1.3 II-III. KTU 1.7 appears not to be a duplicate of 1.3 II-III, but a slightly different version written in a different hand (*SPUMB* 4; *MLC* 86). Dijkstra (1983:26 – 28) suggests that KTU 1.7 provides some parallels for reconstructing some of the lacunas in 1.3 II-III. KTU 1.8 likewise parallels parts of KTU 1.4 I, III, IV, V and VII (*SPUMB* 5; *MLC* 86) and, according to Dijkstra (1983:28-30), this tablet adds further information for lacunas in the Baal Cycle. There are a number of direct parallels between passages of the Baal Cycle and other texts (e.g., KTU 1.5 I 11-22 and 1.133), but these parallels do not indicate that 1.133 belongs to the extant text of the Baal Cycle (Pardee 1988b:160). Moreover, it is generally thought that the scribal hand of KTU 1.7 – 1.12 differs from that of *ʾilmlk* (usually called Ilimilku, but as or more likely Ilimalku[6]), the scribe of the extant texts of KTU 1.1 – 1.6.[7] Finally, it has been argued

---

[6] On the basis of the spelling *ma-al-ku* for "king" in the Ugaritica V polyglot, van Soldt (1991:21 n. 182) prefers to spell the name as Ilimalku. Van Soldt also observes (personal communication) that the only evidence from Ugarit for Ilimilku is the name of royal messenger *ᵖdinger—mil-ku* (*PRU IV*, 294:8), but "consonant-vowel-consonant signs like *MIL* can in principle be read with every possible vowel and *MIL* can therefore also be read, for example *mal*$_x$." All other syllabic spellings of names with *milku* belong to foreigners at Ugarit (e.g., Queen Ahat-milku). Ilimalku can be supported not only from the syllabic spelling *ma-al-ku* in the polyglot, but from other names (see *PTU* 157) including *[ᵖ] ᶜaʾ-bi-ma-al-ku* in *PRU* VI, 79:17. I wish to thank Dr. Van Soldt for these points. On the background of this scribe, see van Soldt 1991:28-29.

[7] *SPUMB* 4-6; *Baal* 6-12; Sasson 1981:89 n. 19, 91-93; *MLC* 83-87.

that KTU 1.101 belongs to the Baal Cycle (Rummel 1978; de Moor 1987:1-2), but as Pardee (1988b:129 n. 20; 1989-90a:179) observes, this tablet does not resemble KTU 1.1-1.6. No material extant from 1.1-1.6 corresponds precisely to the text of 1.101.

The question of the degree to which KTU 1.1-1.6 represents a continuous narrative or a collection of texts lacking narrative continuity remains a controversial issue. The superscription, *lbʿl*, in KTU 1.6 I 1[8] and the colophons at the end of KTU 1.4 and 1.6[9] would suggest that at least these texts were collected purposefully as a narrative concerning Baal.[10] The superscription *lbʿl* indicates that Baal is the central topic of at least 1.6 (cf. *MLC* 89). There are, however, numerous lacunas in the cycle and there is certainly no proof of narrative continuity between KTU 1.1 and 1.2 or between KTU 1.2 and 1.3. Furthermore, some scholars doubt as well the continuity between KTU 1.3 and 1.4. which constitute variants of the same story.[11] Some scholars also view the cycle as three originally separate and discontinuous narratives, KTU 1.1–2, 1.3–1.4 and 1.5–1.6. The view of del Olmo Lete (1977:31) is not atypical. For him, KTU 1.1–1.6 constitutes the "basic cycle" of the myth, but it is not a "redactional unity." Rather, it is "a literary complex of similar compositions on either a subject or a character." Other commentators accept the narrative continuity of most of the cycle.[12] In order to evaluate the merits of these views, it is necessary to test the arguments about narrative continuity on a case-by-case basis.

1. First of all, no one questions the narrative continuity between KTU 1.5 and the larger fragment of 1.6.

2. The field of Ugaritic studies by and large accepts the narrative continuity of KTU 1.4 and 1.5.[13] Clifford (1984:189-191;

1987:64), however, contests this view. His first argument is epigraphic in nature: there is not enough space in KTU 1.4 VIII for the length of description theoretically required before the commencement of KTU 1.5 I. KTU 1.5 I continues a message which Mot commands Gpn w-Ugr to deliver to their master, Baal. According to Clifford's count, the space required for continuity is approximately one hundred seventy-five letters. Yet the end of KTU 1.4 VIII can accommodate only one hundred and twenty-eight letters. It should be noted that Margalit (1980:87), from whom Clifford derives this argument, does not dismiss the narrative continuity between KTU 1.4 and 1.5, however. Abbreviated variants of speeches in the Baal Cycle vary in length, which jeopardizes the assumption that a speech and the following narrative describing the events mentioned in the speech are equal in length. One may compare KTU 1.1 III 10-16 with KTU 1.3 III 18-29 (the former omitting *ʾabn brq dl tdᵏ šmm*); KTU 1.3 V 35-43 with KTU 1.4 I 4-18 and 1.4 IV 47-57 (the former omitting *mṯb klt knyt*); KTU 1.3 III 18-31 with 1.3 IV 11-20 (the latter omitting *bnʿm bgbʿ tlʾiyt*); and KTU 1.4 V 13-19 with 1.4 V 29-35 (the latter omitting *yblk ʾudr ʾilqṣm*). While these examples involve the omission of relatively few words, they demonstrate some variation in the repetition of passages. Either a great deal or little may transpire in a lacuna; how much material has been omitted cannot always be demonstrated only from parallel passages. Parallel passages indicate generally what events have transpired, but they do not show how many words or lines have been used to describe the events. This phenomenon might be invoked to account for the disparity between the number of letters for which there is space in KTU 1.4 VIII and the number of letters that Clifford argues is necessary.

There is a feature of 1.4 VIII which may explain better the disparity. De Moor (*SPUMB* 4-5) comments:

> The most interesting point is the fact that the double line after CTA 3:C.28 coincides with the beginning of a repetition of CTA 3.B.2ss in CTA 7. I venture to propose that by this double line Ilimilku wanted to indicate that he omitted a portion of standard text, in this case the repetition of CTA 3:B.2ss.
>
> A similar double line has been drawn between CTA 4.VIII.47 and 48. Of this column about 16 lines are broken off, about 14 of which may be supplied by CTA 5:I.14-27. From this it follows that between CTA 4:VIII.47 and 48 Ilimilku has omitted the transmission of the message of Baʿlu to Môtu by means of Gupanu and Ugaru (repetition of CTA 4:VII.55—VIII.46, *mutatis mutandis*).

> Finally, Ilimilku followed the same procedure after CTA 4:V.103, where he omitted the transmission of Baʿlu's message to Kôṯaru. In this particular case, however, he adds to the double line a specific direction...

This observation could explain the apparent disparity observed by Margalit and Clifford in the attempts to reconstruct the whole of Gpn w-Ugr's speech in the lacuna following l.4 VIII.

Besides his epigraphic argument, Clifford advances a literary argument against the continuity between 1.4 and 1.5. He notes that KTU 1.5 I 1 displays signs of discontinuity with the preceding column especially in the use of the "when" (*k*-) opening of KTU 1.5 I 1, reminiscent of the opening of other "cosmogonies."[14] This fact might suggest that KTU 1.5-1.6 was originally a unit separate from KTU 1.4. It is clear from the ending of KTU 1.4 VIII and the rest of KTU 1.5 I, however, that this traditional way of opening "cosmogonies" has been reworked into a dialogue between Baal and Mot (transmitted through Baal's messengers). The word, "when" (*k*-), indicates that originally separate material may have been incorporated into a larger section of the Baal Cycle. Furthermore, the Baal-Mot section commences with KTU 1.4 VIII, not with KTU 1.5 I, as is commonly asserted, which would suggest that *k*- in 1.5 I 1 does not represent a formal break in narrative.

Finally, Clifford adduces a thematic argument against the narrative continuity between KTU 1.4 and 1.5. Clifford suggests that the reversal from Baal's victorious status in KTU 1.4 VIII to his defensive posture in KTU 1.5 I represents too abrupt a shift for there to be narrative continuity between the two columns. This assessment is a matter of opinion. It might be argued that there is nothing too abrupt or illogical about the narrative shift from KTU 1.4 VIII to KTU 1.5 I. After Baal defeats Yamm's challenge for kingship (KTU 1.1-1.2) and consolidates his kingship in the form of a palace for himself (KTU 1.3-1.4), Mot challenges Baal (KTU 1.5-1.6). Ancient Near Eastern monarchs often faced challenges to their crown, especially at the beginning of their reigns. In this respect, Baal is no exception.

---

[14] Such as Gen 1:1, 2:4b, Enuma Elish, and a Sumerian-Akkadian bilingual creation text dating at least to the reign of Tiglath-pileser I. For discussions of the Ugaritic and biblical texts, see *CMHE* 118-119; von Soden 1982; Wallace 1985: 66-67. For the Sumero-Akkadian bilingual, see Bottéro and Kramer 1989:503.

In sum, Clifford's reasons for questioning the conventional acceptance of the narrative continuity between KTU 1.4 and 1.5 are inadequate. As Ginsberg (1955:238) noted long ago, the speeches of Baal to Mot in KTU 1.4 VIII and Mot to Baal in KTU 1.5 I are easier to explain as two parts of a single narrative. KTU 1.4 VIII does not provide a conclusive ending to KTU 1.4, but it appears continuous with 1.5 I since its content fits the opening of KTU 1.5 I (see *SPUMB* 2). Furthermore, Clifford does not offer either an alternative logical ending to KTU 1.4 VIII or a sufficient understanding for the beginning of KTU 1.5 I. Therefore, it is reasonable to conclude that KTU 1.4-1.5-1.6 represents a continuous narrative.

3. KTU 1.3-1.4 likewise has been generally viewed as a continuous narrative.[15] A few questions about their continuity have been raised, however. De Moor (*SPUMB* 41-43) argues that the relationship between KTU 1.17 VI and KTU 1.3 and 1.6 indicates that 1.3 begins the cycle and 1.6 ends it. The themes described in the two texts may indeed be closely related.[16] That this proves that KTU 1.3-1.1-1.2-1.4-1.5-1.6 constitutes the only possible order is subject to dispute, as it assumes that the two events are related in a linear fashion. Following Gaster's insight that two sections of the cycle culminate in the autumn, it is possible to argue that the three sections of the cycle evoke phenomena associated with the same time of year, namely the early autumn.[17] The order of the tablets proposed by de Moor does not necessarily follow from the thematic proximity which he has correctly noted.

De Moor doubts the continuity of KTU 1.3 with 1.4 for another reason. Assuming that El does give permission to both Anat and Athirat for the building of the house in both KTU 1.3 and 1.4, de Moor argues:

> With regard to CTA 3:E-F [KTU 1.3 V-VI] we have seen that if Ilu actually did give permission for the building of Baʿlu's palace there, which is by far the most probable supposition, the sequence CTA 3-4 [KTU 1.3-1.4] becomes dubious (B.b). But with the sequence CTA 3-1-2-4-5-6 [KTU 1.3-1.1-1.2-1.4-1.5-1.6] it may quite reasonably be assumed that Ilu revoked his initial decision because of the complaints

[17] For further explanation of this point, see pp. 97-100 below.

> lodged against Baʿlu in CTA 1:IV. Thereupon he gave the permission to build a palace to Yammu instead of Baʿlu (B.d and CTA 2: 'III'.7-10 [KTU 1.2 III 7-10]).

The first part of de Moor's argument is controvertible: it is equally possible that El does not give permission to Anat in 1.3, but he does give it to Athirat in 1.4. Like de Moor, Clifford argues for a narrative discontinuity between KTU 1.3 and 1.4 and assumes a specific reconstruction for the lacuna at the end of KTU 1.3 V, namely that El grants permission for the house to Anat (just as he does at the end of KTU 1.4 IV; so also *SPUMB* 38). In a similar vein, Margalit (1980:9) would argue that because Anat wins El's permission in the similar scene in KTU 1.17 VI, she wins the permission from El also in KTU 1.3 V, this time for the construction of Baal's palace. In all of these reconstructions, it is assumed but not demonstrated that like Athirat, Anat receives permission.

This argument for narrative discontinuity of KTU 1.3 and 1.4 rests on the unproven assumption that parallel motifs or plots indicate parallel stories or parallel resolutions at the ends of stories.[18] The further assumption that the parallel plots belong to an unconnected narrative is also left undemonstrated. There is another way to view the parallel plots in KTU 1.3-1.4. They may constitute two parts of a diptych, the first depicting Anat's failure to win El's permission for the house, and the second describing Athirat's success in gaining the very same permission.[19] This reconstruction would account also for the ending of KTU 1.3, which otherwise lacks a conclusion. Furthermore, a close comparison of 1.3 V with 1.18 I and 1.4 V indicates some differences suggesting that El's response in 1.3 V differs from his answers in 1.18 I and 1.4 V where he gives permission to the goddesses' wishes. The scene in KTU 1.18 I depicts El and Anat discussing the fate of Aqhat. In lines 17b-19 El admits that Anat will do what she intends, but the words in KTU 1.3 V 28-29 that correspond to 1.18 I 17b-19 appear as a question *mh tʾaršn lbtlt ʿnt*, "what do you desire, Adolescent[20] Anat?" In

---

[18] Clifford 1984:191; Margalit 1980:9-11; for further references, see *MLC* 94, n. 58; del Olmo Lete 1983:67.

[19] *Baal* 10; Mullen 1980:66 n. 108; *MLC* 93-94; del Olmo Lete 1983:67-69.

[20] The word *btlt* is often translated "virgin," but this is inaccurate (see Marcus 1970b:113; Pardee 1980:276; P. L. Day 1991; Walls 1992:78-79). Marcus suggests "maiden" and compares Akk *batultu*, "adolescent, young girl." The fact that *bĕtûlâ* in Joel 1:8 has a *baʿal nĕʿūrêhâ* ("the husband of her youth"), shows that the term

KTU 1.18 I 17b-19, El acquiesces to Anat's designs to murder Aqhat, but in KTU 1.3 V 28-29 El's question suggests that he does not readily agree to Anat's demand for permission for the building of Baal's palace. Unlike 1.18 I 17-19, 1.3 V does not describe El telling Anat to "do what is in her heart."

Other differences between the speeches in KTU 1.3 V and 1.4 IV also suggest that El's response to Anat's request may have differed from his reaction to Athirat's supplications. While both goddesses declare how wise El is (KTU 1.3 V 30-31; 1.4 IV 41-43), Athirat's exclamation of El's wisdom follows his solicitous questions regarding her welfare, whereas Anat's declaration of his sagacity follows his observation about her bellicose threat, and then his question, "what do you want, Adolescent Anat?" (cf. 1.6 II 13-14). The different roles which El's beard plays in 1.3 V 24-25 and 1.4 V 4 also point to the different character of the two passages. In Anat's speech, El's beard appears as part as her threat to make his beard run with blood. For Athirat, El's beard serves as a mark of his wisdom. Although it is difficult to be sure, these differences in otherwise parallel scenes may issue in different outcomes. It seems more likely than not that El refuses Anat his permission for Baal's palace.

Clifford's doubts (1984:191-193) that KTU 1.3 and 1.4 belong to the same narrative rest on other thematic grounds. Mot is Baal's enemy in KTU 1.4-1.6, whereas Yamm is the enemy in KTU 1.2-1.3. The references to Yamm in KTU 1.4 IV 12 and 1.4 VIII 4 are too obscure for Clifford to indicate that Yamm remains Baal's threat until KTU 1.4 VII and that Mot becomes Baal's challenge only in KTU 1.4 VIII. Many, however, take these references to indicate at least that Yamm is still in the picture in KTU 1.4 VII (Ginsberg, *ANET* 134; *Thespis* 192-193; *DW* 34-37).

---

does not concern the status of marriage as such (P. L. Day 1991:145). Similarly, *bĕtûlâ* in Gen 24:16 would appear not to refer to a virgin as such since the word is qualified by the phrase *wĕʾîš lōʾ yĕdāʿāh* ("and a man had not known her," i.e., had not had sexual relations with her). Citing the BH and Akk cognates, Day (1991:144) suggests that *btlt* "refers to an age group, appromximately equivalent to the English term 'adolescent,' but applied specifically to females." Day proposes that a female could be called *btlt* until the birth of her first child. The application of this term to Anat indicates that she is "not (as defined by her patriarchal culture) fully an adult women. Adolescence is the time when males and females part ways in terms of their respective and normative social roles. Anat as perpetual *btlt* is suspended, as it were, at this crucial point in time". As a result, Anat engages in the characteristically male roles of warfare and hunting, according to Day. The discussion of Walls largely follows suit.

Margalit (1980:9 n. 1) raises another thematic point that could be an impediment to establishing narrative continuity between KTU 1.3 and 1.4. To Margalit it seems unlikely that Anat in KTU 1.3 VI would delegate a mission to Qdš w-Amrr, the servant of another goddess, Athirat. Margalit argues:

> Some scholars believe that Anat delegates the mission to Qdš-w-Amrr, but this seems unlikely. The latter, be it recalled, works for Asherah; and there is little love lost between Anat and Asherah! More probably, Qdš-w-Amrr dwells at a point along the way to Ktr; by informing Asherah's servant, Anat circulated the news of El's decision without wasting time.

Margalit's reconstruction of events presupposes that either the narrative which he describes falls in the lacuna between KTU 1.3 and 1.4, or the narrative retains continuity without actually detailing all the events as he describes them. The first alternative would suggest narrative discontinuity between KTU 1.3 and 1.4. The premise to the first argument is, however, open to question. Miller (*DW* 16) observes that the two messengers, Gpn w-Ugr, carry a message for Mot in KTU 1.5 I although they are Baal's servants. Messengers can carry messages for deities other than their masters. The thematic observation raised by Margalit does not appear to be a serious objection for narrative continuity between KTU 1.3 and 1.4.

Rummel's discussion of the originally separate traditions in KTU 1.3 serves as a useful starting-point for seeing their larger integration within the narrative of the Baal Cycle. Rummel (*RSP III* 251) correlates elements of KTU 1.3 with those in KTU 1.2 and 1.4 (conflict, order, kingship, temple, banquet) and suggests that KTU 1.3 shows distinct traditions compared to the narrative centered on Baal in the rest of the cycle. Yet, the correspondences delineated by Rummel point to the connections between KTU 1.3 and the story of Baal's rise to power. The kingship in KTU 1.3 cited by Rummel is Baal's kingship, and the temple to which KTU 1.3 refers is Baal's temple. Rummel is probably correct in seeing in KTU 1.3 II a tradition of Anat's cosmogonic battle which originally differed from the tradition of Baal's cosmogonic battles, but Anat's battle in 1.3 II has been reworked into the larger framework of Baal's rise to kingship,[21] and may represent a secondary inclusion of an originally

[21] Cf. Peterson and Woodward 1977:242.

distinct story about Anat. Her battling described in KTU 1.83 and mentioned in KTU 1.3 III 37-IV 4 enhances this possibility (Smith 1986b:328-29). Anat's battle may have been placed in KTU 1.3 II for one of two reasons. It may be that when other deities come to them, deities are depicted in a mode typical of their character. Athirat is going about domestic chores when Baal and Anat come to her in KTU 1.4 III. El is seated in his watery abode when Anat and Athirat approach him in KTU 1.3 V and 1.4 IV (see KTU 1.17 V). When Baal's messengers travel to Mot in KTU 1.4 VIII, he is described as a ruler at home in his underworld city. Likewise, Anat is concluding a battle when Baal's messengers come to her in KTU 1.3 III.

Another possible reason for the present placement of Anat's battle in the story of Baal involves their relationship. The battle against the foes in KTU 1.2 IV and 1.3 II may take place simultaneously on heavenly and earthly levels: Baal fights a cosmic battle against Yamm in KTU 1.2 IV while Anat fights human soldiers in 1.3 II (Gray 1979:315, 323; see *DW* 44-48).[22] In sum, just as KTU 1.4 and 1.5 are considered parts of a single narrative, so also KTU 1.3 and 1.4 may be understood as a continuous narrative. Since a messenger is commanded to travel to Kothar at the end of KTU 1.3 and Kothar is receiving a message at the beginning of KTU 1.4, it appears unreasonable to disconnect KTU 1.3 and 1.4. Furthermore, it would be unclear how a message to Kothar provides a suitable conclusion to KTU 1.3. This review of the positions held by de Moor, Clifford and Margalit indicates that there is no serious impediment to viewing KTU 1.3-1.6 as a continuous narrative. At the same time, continuity for 1.3-1.6 cannot be fully confirmed due to the condition of the texts, and it is possible that they represent different texts involving Baal. Finally, it should be noted as before that 1.3-1.6 were not discovered in precisely the same area; this would cast some serious doubt on the assumption that the extant exemplars of 1.3-1.6 originally formed a single "text."

---

[22] Some depictions of Yahweh as "divine warrior" link heavenly and terrestrial levels. The earthly level is especially vivid in some biblical texts (Deut 32:42, Isaiah 34 and 63, Ezek 32:5-6, and Pss 50:13, 58:11 and 68), where the description of human blood is reminiscent of Anat's destruction of humans in KTU 1.3 II 9-15, 21-31. The "heads" and "corpses" heaped up in Ps 110:6 compare with the human "heads" and "hands" of those whom Anat slays in a bloodbath in KTU 1.3 II 9-15, 27-28 and cf. 34-35 (see Roberts 1982:102-106; Smith 1990:61-64).

4. KTU 1.1, 1.2 III and 1.2 I-II-IV were not found in precisely the same area, which raises a serious question regarding whether or not they also belong to the same narrative as KTU 1.3-1.6. Due to the lacuna in KTU 1.2, it is impossible to establish the narrative continuity of KTU 1.2 with 1.3-1.6. Meier (1986:241-54; 1989:154-55, 184-85) argues against direct narrative continuity on the basis of 1.2's physical character and internal evidence. The format of the tablet differs considerably from the other tablets of the cycle. According to Meier, the average number of alphabetic cuneiform characters in 1.2 I, III and IV is, respectively, 33.33, 40.0 and 28.8 while the lowest average in any column of 1.3-1.6 is 10.38 and the highest is 19.88. The longer length of lines in 1.2 points to fewer columns in this tablet and therefore at least a different copy or version, as tablets in the same series normally have the same number of columns. This physical difference between 1.2 and the other tablets of the cycle suggests that the "library of the chief priest" contained two versions of the Baal Cycle. In support of separating 1.2 from 1.3-1.6, Meier also cites the work of Horwitz (1973) showing that the small vertical wedges, customarily called "word dividers" in Ugaritic studies, appear differently in KTU 1.2 than in the other tablets of the cycle.[23]

---

[23] Meier also proposes that the different divine titles in 1.2 would indicate that it is a different composition from the rest of the extant copy of the Baal Cycle, but the argument is inconclusive. The differences might be attributed to the literary character of the text rather than problems of "distinct myths" (so Meier 1986:246), an approach which Meier does not consider. To take one example from Meier's presentation, he cites the poetic pair Yamm//Nahar only in KTU 1.2 but not in the other tablets; he contrasts this usage with the formulation *mdd ʾil ym* as well as the replacement of *tpṭ nhr* in 1.2 with *nhr ʾil rbm* in 1.3 III 39. Does this discrepancy indicate that 1.2 constituted a different version of the myth from the rest of the cycle? It is possible, but the differences in terms between 1.2 and the other tablets which Meier advances as evidence do not necessarily point to this solution. The phrases *mdd ʾil ym* and *nhr ʾil rbm* in 1.3 III 38-39 are irrelevant to his point since these lines belong to a passage which appears to have been redacted secondarily into the cycle. Furthermore, like 1.3 III 38-39, the version of 1.2 was redacted secondarily into the extant version of the cycle. In other words, the literary differences which Meier cites, including epithets, may reflect a separate prehistory and possibly a different scribal tradition, but not necessarly two extant redactions of the myth. The titles, *mdd ʾil* and *ydd ʾil*, which both mean "beloved of El," may represent further examples of epithets which point not to two extant versions of the same story, but to texts with separate prehistories redacted into the same single extant version of the Baal Cycle. The epithet *mdd ʾil* belongs to Yamm in 1.1 IV 20 1.3 III 38-39, 1.4 II 34 and VII 2-3. Mot is called *mdd ʾil* in 1.4 VIII 23-24 and *ydd ʾil* in 1.4 VII 46-47, 48, VIII 31-32, 1.5 I 8, 13, II 9, III 10, 26 and 1.6 VI 30-31. Hence tablets

Despite the evidence to the contrary, Meier allows that the themes of 1.2 belong to the cycle. Meier (1986:244) notes that the cosmogonic approach to the cycle would suggest the thematic continuity of 1.2 with 1.4 (*CMHE* 113-116; Rummel, *RSP III* 241-243) even if "such a general thematic condition is too loose to bind this particular tablet [KTU 1.2] to the rest of the cycle."[24] Hurowitz (1992: 93) also compares the two descriptions of divine victory and palace-building in Enuma Elish (Ea's defeat of Apsu followed by his building of a palace on him; and Marduk's defeat of Tiamat followed by his construction of a palace atop her) as well as Exodus 15. Hurowitz (1992:82) relates this pattern of divine battle and divine palace-bulding to the connection between temple building and defeat of the enemies in Assyrian and some Neo-Babylonian inscriptions:

> The linking of the two events may be related to the pattern of the 'victorious temple builder' or the 'divine warrior' frequently mentioned in the writings of biblical scholars . . . This pattern in fact exists in all the Assyrian royal inscriptions in which the king's military victories are placed before the building account concluding the inscription.

Hurowitz suggests that this pattern appears also in the Idrimi inscription, 2 Samuel 7 and 1 Kings 5.

As these parallels suggest, the events of KTU 1.2 may connect thematically with the following tablets in other ways. In the present form of the text, the battles against the foes in KTU 1.2 IV and 1.3 II may take place simultaneously, as noted above. Similarly, the feast of Baal in KTU 1.3 I serves as a fitting aftermath to his battle in KTU 1.2 IV, and the sequence of battle and feast of Ugaritic tradition appears to underlie these motifs in biblical tradition represented, for example, in Isa 25:6-8. Marduk's battle is celebrated likewise with a feast of the great gods in Enuma Elish 3.136-38.[25] Given the possible thematic continuities between 1.2 I-II-IV and

---

1.1-1.3 appear to differ from 1.5-1.6 in the use of these titles. But 1.4 contains both epithets, and it is unlikely that two versions are to be posited in a single tablet. Moreover, the different epithets may be attributed to other factors. The story of Mot may have a different literary history as the narrative involving Yamm; it may be that the Baal-Mot section was patterned on the Baal-Yamm section, a theory explored below. The appearance of both *ydd ʾil* and *mdd ʾil* in 1.4 may reflect seams in the story where the narrative of Mot has been joined secondarily to the rest of the story, at a point possibly prior to the writing of the extant text.

[24] See below p. 15.

[25] Cf. J. Day 1985b:148-51; Levenson 1988:28-34.

1.3-1.6, it is possible that 1.2 represents part of another copy of the cycle, probably also copied by Ilimalku, to whom the tablet is commonly attributed. Ilimalku may have copied this tablet from an earlier copy that was like all the other tablets in its length of lines and other physical characteristics. Because of the highly fragmentary state of 1.2, it is impossible to adjudicate further the precise relationship of 1.2 to the rest of the cycle. As Meier states, neither continuity nor discontinuity can be proven,[26] and in view of the physical evidence, Meier's questioning of direct continuity is reasonable. In sum, KTU 1.3-1.6 could constitute one version of the Baal Cycle, which presumably is missing some narrative like the material in 1.2. KTU 1.2 may represent part of another version which perhaps included at least the palace-building material known also from 1.4, since the themes of battle and temple-building often go together.

5. Finally, there is the question of KTU 1.1's relationship to the rest of the tablets. Some degree of doubt has been expressed as to whether KTU 1.1 is connected even to 1.2. KTU 1.1 was discovered near neither 1.3-1.6 nor 1.2 I-II-IV (although it was found near 1.2 III). To explain the relationship of 1.1 to the other tablets, some scholars have argued that KTU 1.1 is a "synopsis" of the remainder of the Baal Cycle (*TO* 297-298; *CML*^{2} 3; Watson 1977:273). As support for this thesis, Caquot and Snzycer (*TO* 297-298) note the following correspondences:

KTU 1.1 column:	KTU tablet:
II	1.3
III	1.4
IV	1.2
V	1.6

Although these correspondences show that themes in other tablets appear also in KTU 1.1, they do not demonstrate that KTU 1.1 constitutes a synopsis of KTU 1.2-1.6. Furthermore, KTU 1.5 is absent from the synopsis.

Similarities do not establish narrative continuity. Gibson, who at one time subscribed to the synopsis theory (*CML*^{2} 205) has since re-

---

[26] The question of the relationship of the two fragments, KTU 1.2 I + IV and "1.2 III" is discussed below on p. 22. The latter fragment may not belong to 1.2, but may represent a text which contains a variant of part of 1.1 III plus a further episode involving Athtar otherwise unattested.

jected it (1984:205). De Moor (*SPUMB* 39) suggests the plausibility of the order 1.1-1.2, largely on the basis of the observation that the crisis described in 1.1 IV leads to the conflict like the one related in KTU 1.2 I and IV.

In sum, narrative continuity among 1.3-1.6 is possible (see Gibson 1984:206), but the relationship between 1.1, 1.2 I-II-IV and 1.2 III and the other tablets remains unclear. It is not unlikely based on the physical evidence that 1.2 I-II-IV and 1.2 III belong to a different copy of the cycle. It is possible that 1.1 belongs either to one of the same copies as 1.3-1.6 or to yet another copy. Although direct narrative continuity between 1.1, 1.2 and the other tablets seems unlikely, the continuity of material and themes may suggest that 1.1-1.6 represent different copies of the cycle.

The many correspondences between the Baal-Yamm and Baal-Mot episodes merit a reconsideration as to whether these two parts of the cycle reflect a thematic symmetry:

1. Speech of enemy's messengers to Baal	1.2 I	1.5 I
2. Baal's initial surrender	1.2 I 36-37	1.5 II 12-20
3. Baal is "servant" (*ʿbd*)	1.2 I 36	1.5 II 12-20
4. Baal fights the enemy twice	1.2 IV, 1.4 VII 1-4	1.6 V 1-4, 1.6 VI 12-22
5. Battle on Sapan	1.2 IV; cf. 1.1 V 5, 18	1.6 VI 13
6. Baal receives divine aid	1.2 IV (Kothar)	1.6 II (Anat)
7. Baal fights with a *ṣmd*	1.2 IV	1.6 V 1-4
8. The Athtar interlude	1.2 III 12-25	1.6 I 43-65
9. Baal's enemy is "strong" (*ʿz*)	1.2 IV 17	1.6 VI 17-20
10. Baal's two main enemies are both El's "beloved"	1.1 IV 20	1.4 VII 46-47 1.3 III 38-39 1.4 VII 31-32, cf. 1.4 II 34, 1.5 I 13
11. Another deity declares Baal's victory	1.2 IV 32, 34	1.6 VI 17
12. Expression of Baal's kingship	1.2 IV 32-34	1.6 VI 33-35
13. Refrain: "how shall El hear you", etc.	1.2 III 17-18	1.6 VI 26-29

The thematic and verbal connections between KTU 1.1-1.2 and 1.3-1.4 are likewise noteworthy:

1. Anat pours peace into the earth	1.1 II 19-21	1.3 III 11-14
2. The message which the heavens do not know	1.1 III 12-16	1.3 III 21-31

			1.3 IV 13-20
3.	Kothar summoned to build a house	1.1 III 26-30	1.4 V 51-57
		1.2 III 7-10	
4.	Yamm fights Baal	1.2 IV	1.4 VII 2
5.	Description of El's abode	1.1 III 21-25	1.3 V 5-9
6.	"You delay, and I depart"	1.1 III 18-21	1.3 IV 32-36

The similar descriptions concerning palaces to be constructed for Yamm and Baal accounts for many of the correspondences (*UgM* 1-20). Indeed, the building narratives of 1.1 V-1.2 III and 1.3 III-1.4 VII may serve as foils to one another. While the building sequences share three elements, namely El's permission for the building project, the securing of Kothar's aid in building the palace and the announcement of the project to Anat, the two building sequences differ in some fundamental details. The story of the palace for Yamm opens with El's initiative in the matter, but no more is heard of this palace after Yamm fails to dispatch Baal in battle. In contrast, the sequence describing Baal's acquisition of a palace opens laconically: Baal secures El's permission for the palace only after the lengthy intervention of Anat and Athirat. Yet, once the permission is granted, the steps for the building project follow in short order. Baal's palace story ends where Yamm's begins: in the final scene of the building sequence (1.4 VII), Baal apparently strikes a further blow to Yamm. Such massive symmetries perhaps point to the secondary unification of originally unconnected narratives into a story with a basic symmetry: the palace of Baal, the crowning symbol of royal status, flanked on either side by a struggle over his kingship. Even if 1.1-1.6 do not belong to a single copy, it might be inferred by the themes shared by these tablets that they belong to different copies or versions of the same text.

Further features of the Baal-Yamm and Baal-Mot narratives might be used to argue that 1.1-1.6 belong to a single story. Both the Baal-Yamm and Baal-Mot stories have been classified as cosmogonies, as battles between a divine hero and his cosmic enemy issuing in cosmic order.[27] More specifically, the sequence of Baal's captivity, victory in battle and the proclamation of his kingship is prominent in both the Baal-Yamm and Baal-Mot narratives (Cross

[27] *CMHE* 120; Clifford 1984:184-98; cf. Peterson and Woodward 1977:241-42. See below pp. 75-87.

1968:3-5; Rummel, *RSP III* 234, 242, 249). Petersen and Woodward (1977:243, 241-42) comment:

> Whereas the Baal-Yamm episode deals with Baal's rise over the earth, the Baal-Mot conflict uses the same logical structure to address quite different issues, the flux between life and death, fertility and sterility. The differences in characters and theme between these two episodes should not however obscure the structural similarity in the myths.
>
> The relational structures of the Baal/Yamm and Baal/Mot conflicts are isomorphic, i.e. not only is there a one to one correspondence between the vertices of the two models, but also there is a similar correspondence between the relations linking these points. Since there are no points or relationships in one episodic model which do not have analogs in the other, each model may be understood to be a structural transformation of the other. By this we mean that while the two episodes of the myth may have different surface language, they share a common logical structure.

The argument that the Baal-Yamm and Baal-Mot stories are parallel and possibly genetically related would appear to be undermined by the fact that the features of a hero's captivity, victory and kingship are known in other ancient Near Eastern texts. The more specific structure observed by Wyatt (1986:137), however, supports a more particular relationship between the two parts. Wyatt notes the following correspondences[28]:

KTU 1.1-1.2	KTU 1.5-1.6
Yamm triumphant	Mot triumphant
Baal cowed and imprisoned	Baal killed
Athtar rejected	Athtar rejected
Yamm killed	Mot killed
Baal triumphant	Baal triumphant

The first and last elements of this schema for 1.1-1.4 involve divine lordship, first of Yamm (1.1 IV 17; cf. 1.2 I 37-38) and then of Baal (1.4 IV 42; cf. 1.2 IV 32, 34). The first and last elements of 1.5-1.6 declare divine fear, first of Baal (1.5 II 6-7) and then of Mot (1.6 VI 30-31). The most important evidence are the specific verbal links (listed above) which indicate that various parts of the cycle share much more than "surface language" or "structural similarities."

It is also possible that the symmetry between 1.1-1.2 and 1.5-1.6

---

[28] Wyatt's view depends on taking 1.2 III after 1.2 I which is addressed in the next section.

may have resulted from the modelling of 1.5-1.6 after 1.1-1.2. This transformation may have included patterning the character of Mot in 1.4 VIII-1.6 after the figure of Yamm in 1.1-1.2 (Smith 1988). The distribution of evidence pertaining to Death may provide some basis for this view. The figure of Death differs in Mesopotamian literary tradition and West Semitic texts.[29] In general, Death does not appear in Mesopotamian literary tradition as a stock character, although Mesopotamian texts sometimes allude to Death personified (*CAD* M/II:318). In VAT 10057.3 (Livingstone 1989:7), "Death" ([d]*mu-ú-t[u?]*) appears in a group of underworld figures. The relatively fewer West Semitic texts, in contrast, allude to Death more frequently and portray him as an important character, especially in the Baal Cycle. Death functions as a main character in KTU 1.5 I -1.6 VI, where the struggle between life and death is rendered as a personal one. While Death in the Baal Cycle lacks a clear analogue in Mesopotamian literary tradition, the stories of Dumuzi and Inanna/Ninhursag have been compared with the Baal-Mot narrative (see Smith 1986a:313-14; Walls 1992:71-74). The traditions about Dumuzi and Baal are similar in their deaths and perhaps in their returns to life. Both Dumuzi and Baal are related to agricultural fertility, albeit in different ways. Their divine consorts, Inanna/Ninhursag and Anat respectively, both mourn and search for them.[30] The Baal-Mot narrative contains other traditional elements found also in Mesopotamian texts. Such features include descriptions of the underworld; the descent of a main character to the underworld (Hutter 1985:130-46, 150-55); the description of Baal and Mot fighting like warriors in 1.6 VI (cf. Gilgamesh and Enkidu in Gilgamesh, OB version, 2[Pennsylavania tablet].6.15-25; Dalley 1991:14; *ANET* 78); perhaps the intervention of the sun-deity to give the hero the upper hand in fighting the enemy (1.6 VI 22-29; cf. Gilgamesh, Hittite recension of tablet 5.4, lines 10-20, *ANET* 83)[31]; and the description of the sun deity as the ruler over

---

[29] Walls (1992:183) argues that Ugaritic differs from other ancient Near Eastern mythological traditions in that "the god of the dead is not a member of the Ugaritic pantheon." Rather, "he is Death personified—the Grim Reaper—rather than simply a deity whose realm is the Netherworld."

[30] For Inanna's laments for Dumuzi, see especially Kramer 1982, 1983. For their similarities to the Ugaritic descriptions of Anat's laments for Baal, see Smith 1986a.

[31] I wish to thank Professor Aage Westenholz for bringing this parallel to my attention.

the dead (1.6 VI 45b-47; Healey 1980). The Baal-Mot narrative also exhibits some profound differences with the Dumuzi stories.[32] Dumuzi is no great god like Baal, nor does he engage in mortal combat as part of the description of the struggle between life and death.

Various explanations may be proffered for these similarities and differences. Perhaps the Baal Cycle used traditional elements well-known also in Mesopotamian literary texts in shaping its unique story about Baal versus Mot. Or, the tale of Baal's demise may have had an older form primarily consisting of traditional elements. It told the story of Baal's death which resulted in his descent to the Underworld, Anat's mourning for Baal and her searching for him, and his eventual return to life. If so, adding the figure of Death made Baal's death into a personal conflict. One might speculate further about the creation of Death. The epic figure of Mot may have derived from his personification as a demonic force, represented in texts such as KTU 1.127.29-31 and 2.10.11-14. Like Akkadian *mūtu* and BH *môt*, Ugaritic *mt* seems to have been a demon, associated especially with pestilence (Tawil 1980; Smith 1988; cf. Paul 1968). In the Baal Cycle he looms as a figure larger than life. This sort of development has Near Eastern analogues.[33] The cosmic and terrestrial levels are related in the Ugaritic texts as well. According to de Moor (1984) and Caquot (1988), *tnn*, Mot, and *brḥ*, a title of *ltn*, three of Baal's enemies known from the Baal Cycle, seem to appear in the very difficult text, KTU 1.82, as demonic forces which Baal was believed to be able to expel, perhaps in accordance with his ability to defeat cosmic enemies.

In closing, it may be suggested that if the character of heroes is revealed through the character of their adversaries and the nature of their conflicts,[34] then Yamm and Mot reveal aspects of Baal's character. Yamm and Mot are cosmic figures, and they show Baal's heroism in equally cosmic stature and proportion. Furthermore, as Yamm represents the chaotic waters and Mot signifies death in its cosmic proportions, Baal embodies order and life in equal, if not greater, universal proportions.

---

[32] For the many differences and some misleading assumptions in this comparison, see below pp. 69-74.

[33] To note one example, the figure of the *asakku*, initially a disease, appears as Ninurta's major enemy in Lugal-e (see Jacobsen 1988).

[34] For this point I am indebted to Professor Ron Hendel.

The Order of Columns in KTU 1.1 and 1.2

KTU 1.1 is the most broken tablet of the Baal Cycle, and as a result the placement and order of its columns are two highly debated issues. The tablet originally had six columns, three on each side. Two of the original columns have not survived and the edges of the other four columns are broken. L'Heureux (1979:19) has outlined three major options regarding the order of the columns in KTU 1.1. L'Heureux's listing, represented in the following schema, includes the views of Cassuto (*GA* 58) and Virolleaud (1938), as well as two alternatives considered by Herdner (CTA):

		Virolleaud/Herdner a	Cassuto	Herdner b
Recto	1st col.	missing	KTU 1.1 V	missing
	2nd	KTU 1.1 II	KTU 1.1 IV	KTU 1.1 V
	3rd	KTU 1.1 III	missing	KTU 1.1 IV
Verso	4th	KTU 1.1 IV	missing	KTU 1.1 III
	5th	KTU 1.1 V	KTU 1.1 III	KTU 1.1 II
	6th	missing	KTU 1.1 II	missing

The placement of the columns may be determined in part by the thickness of the tablet. The curvature of the tablet indicates that its narrowest portions are not extant; therefore it is not the middle columns that are missing, as in Cassuto's reconstruction, but the initial and final columns, as proposed by Virolleaud, Herdner a and Herdner b.

Unlike the issue of the placement of columns, their relative order has not been settled on epigraphic grounds. In their text editions, Virolleaud, Herdner and KTU suggested the order of KTU 1.1 II-1.1 V. Cassuto (*GA* 156) long held the opposite opinion contending that the events described in KTU 1.1 V and IV precede those of 1.1 III and II. Cassuto did not offer further reasons for his position, but Pope (*EUT* 96) and Oldenburg (*CEBCR* 123) follow his view. According to their interpretation, KTU 1.1 V constitutes Baal's dethronement of El, and the other columns contain his attempt at revenge through the agency of his son, Yamm. While this view of the tablet has been criticized (L'Heureux 1979:18-26), it has been modified by del Olmo Lete (1977:32-35). Del Olmo Lete takes his starting point from the words of 1.1 IV 23, *kd yn*ʾ*aṣn*, "when he reviled me." According to del Olmo Lete, this line presumes an attempt on Baal's part to supplant El as king of the pantheon. Then in 1.1 IV El decides to name Yamm as king. In order to support

Yamm's claims to kingship in 1.1 III and IV, El orders Kothar to build a palace for Yamm.

The arguments of Pope, Oldenburg and del Olmo Lete may be bolstered by some circumstantial epigraphic and thematic evidence. According to Dijkstra (1987:51, 53), the order KTU 1.1 V-IV-III-II appears preferable for epigraphic reasons:

> . . . a scribe was more often forced to divide a word on the reverse than on the obverse of a tablet. . . The two, possibly three cases of word-division on the alleged column suggests, however, that we have in reality to do with the fifth column of the reverse.

Furthermore, the order of events in ancient Near Eastern narratives describing the construction of temples and palaces also comports with the order of events in KTU 1.1 V-IV-III-II rather than vice-versa. According to Hurowitz (1985; 1992:137, 163-64), the feature of the summoning of the craftsman appears in building stories in a consistent manner. Whether the story involves the divine permission for the building project or divine initiation of the project, the summoning of the craftsman follows the permission for, or initiation of, the project. In the case of KTU 1.1, El's support for Yamm in 1.1 IV 20 and El's discussion of the palace in 1.1 IV 21 reflect his role in initiating the building project, which in compliance with the pattern of other narratives, precedes his summoning of Kothar in 1.1 III (see also Dijkstra 1987:54 n. 29).[35] On the basis of this evidence, the order advocated by Cassuto and considered by Herdner b is apparently correct. For this reason the order 1.1 V-IV-III-II is given in the arrangement of the commentary below, although the enumeration of KTU, based on Virolleaud and CTA, is followed.

The issues involving the order of columns in 1.2 differ in character. The main problem concerns the relationship of two fragments of 1.2. The larger fragment measures 125 millimeters in height and 101 millimeters in width. One side has the lower part of what Virolleaud designated III AB B (= CTA 2.1 = KTU 1.2 I), and the other side has the upper part of Virolleaud's III AB A (= CTA 2.4 = KTU 1.2 IV) plus fifteen lines of what CTA labelled as a second column (CTA 2.2 = KTU 1.2 II).[36] The smaller fragment,

---

[35] This reconstruction also contradicts the view that KTU 1.1 constitutes a synopsis (see above p. 14).

[36] 1.2 II may be assumed to followed 1.2 I, although little else can be said about either the former's placement or its contents.

60 millimeters in height and 69 millimeters in width, has writing on only one side. Virolleaud originally placed this fragment which he called III AB C (= CTA 2.3 III = KTU 1.2 III) between 1.2 II and 1.2 IV. Del Olmo Lete (1984:48-49) defends the appropriateness of the themes and therefore the placement of 1.2 III between KTU 1.2 I and IV. More specifically, he explains the apparently disruptive appearance of Athtar in 1.2 III as a structural interlude similar to the one attested in 1.6 I.

There is no epigraphic reason for doubting that "1.2 III" belonged originally to 1.2. The number of alphabetic cuneiform signs per line in "1.2 III" corresponds approximately to the number of signs in 1.2 I and IV (Meier 1986:241-54; 1989:154-55, 184-85). However, the content of "1.2 III" partially matches the material in 1.1 III. Both 1.1 III 21-29 and 1.2 III 4-10 contain information detailing travel to El, obeisance before him, and El's commands that Kothar build a house for Yamm.[37] These similarities cannot be harmonized by viewing "1.2 III" as the sequel to 1.1 III; this would assume that the column following 1.1 III can be displaced by "1.2 III," but such an insertion is materially impossible. The order of either 1.1 II-III-IV-V or 1.1 V-IV-III-II cannot be interrupted on any basis. In other words, "1.2 III" may contain a variant of some material in 1.1 III in addition to a further episode involving Athtar. Ginsberg (*ANET* 129) noted that the placement of "1.2 III" between 1.2 I and 1.2 IV "seems strange; so, perhaps, it belongs to a tablet which preceded, and in outward disposition resembled, the tablet of which III AB B-A is a remnant." On the basis of these observations it would appear that 1.2 III 4-10 contains a variant to 1.1 III 21-29. Both variants may represent early parts in two versions of the Baal Cycle. The implications for the placement of 1.2 III seem clear: "1.2 III" would appear not to stand between 1.2 I and 1.2 IV, although epigraphically it belongs with them. Furthermore, 1.2 III is epigraphically separate from 1.1. Due to the many features shared between 1.1 III and 1.2 III, it would seem that "1.2 III" may belong prior to 1.2 I, II and IV.

Establishing the place of "1.2 III" requires an examination of the possible literary relationship among 1.2 and other Levantine texts describing similar episodes. On the basis of literary comparisons, it

---

[37] For another example of overlap of one column with another, compare 1.4 II and III.

might be argued that "1.2 III" is not to be placed between 1.2 I and 1.2 IV. Gaster (1952:82-85) and Albright (*YGC* 116) regarded 1.2 I + IV as a variant of the extremely fragmentary Egyptian text sometimes called "Astarte and the Tribute of the Sea" (*ANET* 17-18; see Wente in Simpson et al. 1973:133-36). In this story Astarte comes to Sea singing and laughing. Sea accepts the tribute from Astarte, and taken by her appearance he desires the goddess as an additional payment.[38] Astarte also makes a brief appearance before the divine council (*ANET* 18, iii y-2). The motifs shared by 1.2 I + 1.2 IV and "Astarte and the Tribute of the Sea" include: (1) the claim of tribute by the figure of Sea (1.2 I 21-35; *ANET* 17, i x + 8); (2) the payment of tribute (1.2 I 36-38; *ANET* 17, i x +); (3) the initiative against Sea (1.2 IV; *ANET* 18, xv y); (4) the response of Baal to fight against Sea (1.2 I 38-44 [?]; *ANET* 18 xv y); (5) Sea's title, "ruler" (1.2 I 17, 22, 26, 28, 30, 34, 41, 44; 1.2 IV 25, 27, 30; *ANET* 17, i x + 8, ii x + 3); and (6) the role of the goddess Astarte (1.2 I 40-43 [?]; *ANET* 17, x + 17; 18, iii y-2).

The Song of Ullikumi also incorporates the motif of the goddess' confronting the divine challenger from the sea within the larger narrative of this challenger's battle against the Storm-god. When the threat of Ullikumi becomes known, the goddess goes to the sea (Hoffner 1990:56; cf. *ANET* 123):

> Sauska kept on singing and put on herself a seashell and a pebble (for adornment). A great wave(?) ⟨arose⟩ out of the sea. The great wave(?) said to Sauska, "For whose benefit are you singing? For whose benefit are you filling your mouth with wind? The man (meaning Ullikumi) is deaf; he can[not] hear. He is blind in his eyes; he can-

---

[38] This addition apparently contains the further motif of the lecherous sea who pursues the goddess ending in her own dramatic escape (Redford 1990:831-33; 1992:45-47). Classical sources contain vestiges of other stories relating how the sea-goddess was desired by the Sea. Redford takes the story of Isis at Gaza in Plutarch (*De Iside*, 357D-E in Griffiths 1970) as a reflection of a cult-myth indigenous to Gaza. Redford also considers the Egyptian Story of the Two Brothers (Lichtheim 1976:203-10) as another variant, since the narrative detailing how the water monster chases the goddess is placed in the "Valley of the Cedar," known later as the river of Adonis in Lebanon. According to Redford (1992:45-47) this motif underlies the stories of Andromeda and Perseus and of Europa and Zeus as well (see p. 24). The difficulty is that the endings of these two stories dramatically differ: the hero saves the female; she does not need to make a desperate escape of her own. Hence it would appear that these two narratives echo at least partially the conflict between the Storm-god and the Sea.

> not see. He has no compassion. So go away, Sauska, and find your brother before he (Ullikumi) becomes really valiant, before the skull of his head becomes really terrifying.

The song has no effect, however, and as in the Baal Cycle, only a direct meeting between the divine males resolves the conflict. The explicitly West Semitic features in the text are limited. Mount Hazzi, known also as Mount Sapan, the home of the West Semitic Storm-god, Baal-Haddu, appears as the site where the Anatolian Storm-god spies his enemy. Another motif perhaps influenced by a West Semitic model is the brother-sister relationship between the Storm-god and the goddess. Other specifically West Semitic features are absent, perhaps reflecting modification of the type-elements in the Song of Ullikumi.

It is possible that this traditional episode was known further east as well. Lambert (1985b:535-37) compares the attestation of the deities ^{d}*ID* and ^{d}*aš-tár-ra-at* in a dedicatory inscription in the late Early Dynastic or early Sargonic bowl from Mari, although this evidence is minimal at best. Emar 373.92 attests to an offering made to the pair ^{d}*INANNA* (*Aštartu ša abi*) and the god ^{d}*Ya-a-mi* (Smith 1990:75 n. 110; Fleming 1992:300).

The classical story of Perseus' rescue of Andromeda may reflect the old West Semitic story of Astarte and the Sea.[39] According to Greek tradition, Andromeda, a daughter of the Ethiopian king, was bound to a rock in the sea at the Levantine port of Jaffa as tribute to a sea monster. On his return from slaying the Medusa, Perseus rescues Andromeda from the sea monster. Redford (1990:830) also compares the story of Europa carried by Zeus in the form of a bull, a tale placed on the Tyrian coast.

These narratives involve many of the same figures and events. The version in the Baal Cycle perhaps shaped a traditional story around the theme of Baal's place within the pantheon and cosmos. The divine council is not threatened by Sea's demands in the Baal Cycle. In 1.2 I the struggle does not belong to the divine council, as it does in the Egyptian version; rather, it becomes the story of Baal's own struggle placed in the setting of the divine council. Com-

---

[39] Apollodorus 2.4.3; Strabo 1.2.35; 16.2.28; Pliny, *Natural History* 5.14.69; Herodotus 2.91. See Yadin 1968:19; Fontenrose 1980:27; Redford 1990:831; cf. Wyatt 1989:376.

pared with the Egyptian version, 1.2 I Baal takes the place of the tribute in Yamm's demands. The extant Egyptian version gives a prominence to Astarte apparently absent from the Ugaritic version. Indeed, the Ugaritic version relegates Astarte to a secondary role: in 1.2 I 40-43 (?) she restrains Baal and in 1.2 IV 28-30 she rebukes him. Furthermore, unlike the Egyptian version which uses Astarte to convey Sea's demands to the Ennead, in 1.2 I Yamm has messengers who declare his demands before the divine council.

On the basis of some of these and other differences, Posener (1953:461-78) considered the Egyptian version indigenous to Egypt, with only superficial similarities to the West Semitic story (cf. Gardiner 1932). Te Velde (1967:122-23) sees some Semitic influence in this Egyptian treatment of Seth. While the views of Posener and Te Velde warrant caution, Gaster draws attention to a number of West Semitic expressions and motifs in the Astarte papyrus which would indicate some West Semitic influence. The mention of Astarte and Pa-Yamm and the substitution of Seth, the Egyptian equivalent of Baal, for Re, point in the direction of West Semitic influence during the New Kingdom period.[40] Furthermore, Redford (1990:833) labels the story of Astarte and the Sea as "clearly a translation of one version of the story. . . localized in some Levantine cult-centre and presumably owing much to the foreign community in Memphis."[41] Similarly, J. van Dijk (1986:32) remarks: "it is in my opinion hard to imagine that the Egyptian text could have been written without any knowledge of the Canaanite myth." From this survey of views by scholars of Egyptology, it would appear that the Egyptian story has been influenced by a West Semitic story involving Astarte, Baal and Yamm. The common plot would indicate that the scenes of 1.2 I and IV incorporated a story of the goddess and the Sea well-known along the Levantine coast from Anatolia to at least Joppa and borrowed into New Kingdom Egypt and possibly harmonized with indigenous Egyptian material. This survey would suggest that 1.2 I + 1.2 IV belong together and that 1.2 III may represent an interruption (although the text is very fragmentary). Given the epigraphic arguments as well as the thematic considerations, it would appear prudent to position "1.2 III" before 1.2 I.

---

[40] *ANET* 17; Stadelmann 1967:125-31; Wente in Simpson 1973:133.

[41] The type of translation envisioned by Redford (1990:833 n. 96) involved "oral tradition."

Literary Classification

The Baal Cycle (KTU 1.1-1.6) is generally considered a myth (Sasson 1981). The folklorist Heda Jason (1977:32) classifies the Baal Cycle as a "mythic epic" because of the epic elements involving the hero and his challenger especially in 1.2 I and IV.[42] Parker (1992:114) regards the Baal Cycle as a literary text which contains much myth. While scholars generally label the Baal Cycle as a myth, they disagree over the definition of myth. This disagreement is not only a matter of theoretical curiosity. Rather, it affects the interpretation of the text. For this reason some current views of myth require a brief discussion.

The term myth generally carries a negative connotation in western culture, but this attitude has changed in the fields of modern philosophy and theology, psychoanalysis, anthropology and history of religion which have examined myth in a more positive manner.[43] For anthropologists myths reveal important values or structures in the societies which produce them. Anthropological approaches toward myth tend to be functional rather than formal in character. Unlike formal definitions, functional definitions state what myths "do," such as "explain things." For some anthropologists, myths reflect social structure or resolve social conflict.[44] Following the insights of anthropologists such as B. Malinowski, the classicists G. S. Kirk (1970:41) and W. Buckert (1979:1, 23) regard myths as traditional tales that have a bearing on matters of cultural importance. Oden (1987:55) offers a similar definition of myths: (1) myths are narratives; (2) they are traditional, that is, transmitted almost always orally within a communal setting and for a long time; (3) they contain characters who are more than human in some way; and (4) they relate events from remote antiquity. According to Oden's definition, the Baal Cycle, Keret and Aqhat and many other texts are myths. Based on his work in the history of religions, Mircea Eliade (1991:5) combines formal and functionalist criteria in

---

[42] So also Milne 1988:169-70. See below pp. 75-76, 337.

[43] See the surveys in Oden 1987:40-91; Batto 1992:1-14. The school of analytical psychology associated with the name of Carl G. Jung has shown a very positive attitude toward myth. For Jung and his disciples, myths are stories reflecting different stages in the development of human consciousness. See Neumann 1954.

[44] For Stith Thompson's criticisms of various functional approaches to myth, see Thompson 1965:171-72.

his definition of myths as stories about supernatural beings; these stories are considered both true because they refer to realities, and sacred because they involve supernatural beings. For Eliade myths describe origins of realities manifest in the world, and people who "live" the myths are able to affect these realities by knowledge of myths.

These views mark a major departure from the traditional definition of myths as narratives centering on divine beings. Indeed, these definitions do not differentiate myth from folktales, legends and sagas, although this distinction proposed by the Grimm brothers has played a role in biblical studies and other fields at least since Johann Gabler in the late eighteenth century.[45] Like myths, folktales, legends and sagas are narratives which were thought to hail from remote antiquity and which contain characters who are in some way more than human. Ugaritic texts such as Keret and Aqhat are sometimes considered myths, but the label of myth is controverted in these cases, and Eissfeldt and others have regarded them instead as saga.[46] Some scholars categorize narratives focusing on human deeds of remote antiquity as legend even though deities appear in them, while narratives focusing on deities are considered myths.[47] The definition of myth might be broadened to include narratives involving divine beings and not only ones centering on divine beings. Indeed, as the folklorist Stith Thompson (1965:169-80, esp. 173-74) as well as Kirk (1970:31-36) and Buckert (1979:22) note, many cultures do not make this distinction. When such a distinction appears problematic, the validity of the definition might be called into question, or it might even lead to jettisoning the category of myth.

Despite the valid criticisms of the older formal definition of myth, a narrower, formal definition retains some merit. In accordance

---

[45] See Rogerson 1974:6-7. For the later form-critical adoption of this terminology, see Rogerson1974: 57-65.

[46] Eissfeldt 1963:496-501; cf. Gibson 1975:60-68. For a discussion of Eissfeldt's views, see Rogerson 1974:146. Like the Pentateuch and the books of Joshua and Judges, Keret and Aqhat might be viewed as a myth of societal origins. In the case of Keret, it would appear that this narrative was considered the story of a distant ancestor of the dynastic line if the blessing in KTU 1.15 III is any indication. In this blessing Keret is to be blessed among the *phr ddn*, "the Assembly of Didanu," an ancestral figure known from both KTU 1.161 and Assyrian King List A. For discussion, see Smith 1990:76-77 n. 120; below pp. 112-13.

[47] For this consensus form-critical definition of myth, see Eissfeldt 1965:35; Rogerson, 1974:145-73.

with Thompson's observations, using a narrower, formal definition rather than a functional one permits the identification of myths before moving to the question of identifying their functions according to different approaches whether they are form-critical, myth and ritual, anthropological, structuralist or whatever. Indeed, for ancient societies accessible chiefly through literary, iconographic and other archaeological remains, a formal definition of myth is necessary prior to making wider claims about different myths in relation to their cultural contexts. At the present state of knowledge of the ancient Near East, it can be said that myths are traditional tales preserved and modified in literary forms, and at least in many cases these texts center on deities. Moreover, the functions of myths in general and ancient Near Eastern texts in particular may have evolved considerably. Beginning with a functional definition may preclude the variety of functions which different myths may have enjoyed over a long period of time (see Buckert 1979:2, 4). A text such as the Baal Cycle represents a literary agglomeration of traditional material which functioned in a number of ways, as the following sections suggest.

Finally, Jacobsen's comments (1987:xiii) on Sumerian literary texts may serve as an apt starting-point for appreciating the Baal Cycle:

> The strictly literary Sumerian works can be defined generally as works of praise. The praise can be for something extant and enjoyed, a temple, a deity, or a human king. It can take narrative form as myth or epic, or descriptive form as hymn. The praise may also, however, be praise of something cherished or lost, a destroyed temple, a god who has died, or a dead human relative.

Jacobsen's comments apply in two ways to the Baal Cycle. First, the Baal Cycle represents a narrative of praise devoted to its main character, Baal. Second, the Baal Cycle reuses various forms as well including the spell, curse, lament and perhaps the hymn. The incantation tradition may lie behind the literary topos of the divine champion in the divine assembly in 1.2 I. The summoning of Kothar in 1.1 III and 1.2 III as well as the entire narrative in 1.3 III 8b-1.4 VII contains standard features of temple and palace building stories known from other West Semitic and Mesopotamian texts. All of these re-uses of forms suggest a complex development, as the next three sections suggest.

The Development of the Cycle

According to many scholars the Baal Cycle enjoyed a long oral history prior to its commitment to writing.[48] The dates proposed for the *terminus a quo* of the Baal Cycle range from the third millennium down to the middle of the second millennium. Albright (1933:19) argued that the earliest possible date of composition is fixed by West Semitic names and words transcribed into Egyptian and cuneiform during the early Middle Bronze Age.

Gordon (1958:109 n. 10) takes the absence of horses from the Baal Cycle as a sign of great antiquity (cf. Lambert 1960b). According to de Moor, this observation suffers from relying on an argument from silence (*SPUMB* 49). Furthermore, the argument from silence no longer holds. Recent excavations point to the domestication of the horse by the end of the third millennium. A Syrian site known as Tell es-Sweyhat has yielded a small clay figurine of a horse dating to about 2300.[49] T. Holland notes that the horse figurine has a hole through the muzzle, indicating that the horse is domesticated. Moreover, he also observes that the mane of this animal figurine "is laying down," unlike the manes on figurines of wild horses which "stand erect."

According to Vine (1965:119, 208), the cycle commemorates the founding of the so-called Baal temple at Ugarit by Amorites. Using the archaeological date assigned to this temple, Vine places the Baal Cycle toward the end of the twenty-first century. This date remains highly speculative.

Drower (1975:155) notes the great difference between the hierarchies of deities in the Baal Cycle and ritual texts, and suggests that this discrepancy points to the great antiquity of the Baal Cycle. De Moor (*SPUMB* 48) is rightly cautious about this criterion for dating because the deities in the Baal Cycle are mentioned in later Ugaritic texts. Indeed, the difference may be due as much to variations between genres.

[49] So John Noble Wilford, "Ancient Clay Horse is Found in Syria," *New York Times*, Sunday, Janaury 3, 1993. I wish to thank my father, Donald E. Smith, for bringing this article to my attention. See also Don Babwin, "Discovery by U. [University] of C. [Chicago] team sheds new light on antiquity," *The Chicago Tribune*, Sunday, 3 January 1993, section 2, pages 1, 3. I wish to thank my mother-in-law, Sonia Bloch, for sending me this article. The basis for dating the find remains unclear. Otherwise on horses in the ancient Near East, see the summary in Firmage 1992:1136.

De Moor (*SPUMB* 50-51) argues that the Baal Cycle shows signs of composition during the middle of the second millennium. He argues that Baal as the proper name of the storm god does not appear until the mid-second millennium (see also *YGC* 124).[50] De Moor (*SPUMB* 50-52) cites other features in the cycle in his argument for a mid-second millennium date. In incorporating the Amorite god, Amurru, the Baal Cycle has apparently demoted him from head of an Amorite pantheon to the lowly position as Athirat's lackey.[51] De Moor supposes that this change would have probably occurred during the middle of the second millennium. De Moor (*SPUMB* 49) points out that the so-called temple of Baal is not to be dated prior to the mid-nineteenth century since the two sphinxes found in the temple bear the cartouche of Ammenemes III (ca. 1842-1797). The cartouches do not provide, however, a date for the building of the temple, much less for the Baal Cycle. De Moor concludes that a tentative date of the nineteenth century would be suitable for the beginning of the Baal Cycle's composition.

Despite some of the difficulties in the evidence advanced by de Moor, his proposed dating for the cycle is compatible with its overall perspective, which reflects the financial support of, if not the urban, commercial setting of Ugarit, during the second millennium. Geographical references, such as Lebanon (*lbnn*), the Anti-Lebanon (*šryn*), Amurru (*ʾamr*), Sapan (*ṣpn*) and possibly also Byblos (*gbl*), point to ancient Ugarit as the backdrop for the cycle (Eissfeldt 1940). While the temple described in KTU 1.4 V-VII may not have been identified directly with the so-called temple of Baal excavated at Ras Shamra, it indicates an urban setting of a developed city-state.[52] On the basis of this approach, a date of the eighteenth century or later is possible (see *CMHE* 113), as Ugarit was already flourishing at this time (Drower 1975:132). This would correspond with the period of the early monarchs of Ugarit (Kitchen 1975; cf. Pardee 1988b:173). By this time Baal-Haddu may have become the divine patron of the Ugaritic dynasty as evidenced by the theophoric element **(h)d* in several royal names.[53] His place in the Ugarit pan-

---

[50] The argument of Pettinato (1980) to the contrary that the name of Baal is attested at Ebla, Abu-Salabikh and Mari is problematic. See Koch 1988:196, 204.

[51] See also Perlman 1978. The main difficulty with this argument is that the place-name, Amurru, is spelled *ʾamr* in Ugaritic while the servant's name is *ʾamrr*. See Pardee 1977:8 and esp. nn. 45-46.

[52] On this point, see below p. 79.

[53] On this point, see further below p. 90.

theon suggested by the Baal Cycle therefore may have represented an exaltation not only of the storm-god, but also of the king who named himself after Baal-Haddu. The time of Niqmaddu I and his line at Ugarit seems a plausible setting for the origins of at least some parts of the Baal Cycle.[54]

Scholars have used other features to date the Baal Cycle. D. Freedman (1970-71: 80-81) proposed that the formula for describing events of seven days in the Baal Cycle (KTU 1.4 VI 24-33) indicates a date ca. 2000. According to Freedman, the formula in the Baal Cycle is much older than comparable formulas in Aqhat and Keret. The Ugaritic versions predate the formulas in Gilgamesh 11 and the Sultan Tepe version of the Nergal-Ereshkigal myth, both dated to the first millennium. Albright (1933:19; 1958:36-38), Ginsberg (1946:46) and Held (1959) also suggested that the archaisms and archaic style in the Baal Cycle indicate its great age. De Moor (*SPUMB* 48) rejects this argument and suggests that apparent archaisms may represent scribal archaizing (cf. Lambert 1968a:124). Unfortunately, none of the criteria proposed for the early period of the Baal Cycle's composition is firm. Indeed, the grammatical evidence which has been marshalled is restricted. The following section provides a detailed discussion of the grammatical data which suggest a date older than the Ugaritic prose texts.

The material shared by KTU 1.3 IV-VI and 17 VI-1.18 I and IV points to the former's relatively secondary character (Parker 1989b:115). These passages describe how Anat travels to El and attempts to gain his permission for her plans. In the case of the passage in the Baal Cycle, Anat threatens El in order to win his permission for the construction of a palace for the Storm-god whereas in Aqhat, Anat threatens El in order to win his leave to avenge Aqhat's rejection of her advances toward him. Parker notes the well-known parallel between Aqhat and Gilgamesh 6 which describes Ishtar's threats before Anu induced by Gilgamesh's rejection of her. Based on this parallel Parker argues that the use of the material in Aqhat comports with its original context more suitably than it does in the Baal Cycle, suggesting that its usage of this traditional type-scene is secondary. Indeed, it does appear that the threat has been refitted

---

[54] See below pp. 33–34. This is also the period when Syrian seals depict together the weather god and the winged, armed goddess who are interpreted as Baal and Anat (so Tessier 1984:79).

in the Baal Cycle to support the pursuit of Baal's palace. At least one motif in Aqhat would then predate its counterpart in the Baal Cycle.

Before entertaining a hypothetical reconstruction of the cycle's development, it is necessary to mention the issue of the cycle's oral and written transmission which has been the subject of considerable discussion. The Baal Cycle contains a number of both oral and written scribal errors (Segert 1958; Horwitz 1977). Oral scribal errors (Segert 1958:211 n. 20; Horwitz 1977:124 n. 10) could have occurred at various stages of transmission or even at a late point of composition if one were to assume that the later stage of writing these texts entailed an oral recitation of some sort. Cross (*CMHE* 112-13, 117 n. 18, 127 n. 50) argues that the Ugaritic myths were transmitted by singing and orally dictated to a scribe. Cross' reconstruction has been challenged by Horwitz (1977:124) who argues:

> Not only does the evidence in the Ugaritic myths support Cross' theory of the transmission of the Ugaritic myths, but the procedure which he outlines has parallels in other literatures as well. Therefore, his theory may well be correct. But one can of course accept the theory of oral development and transmission without being bound to the view that the tablets which we possess are the first reductions of the myths to writing. The fact that the mythology as a genre generally requires dictation at some time is no proof that our present Ugaritic tablets were not copies of written texts. If such was the case, it is to be expected that some errors arose during dictation and others during copying.

An equally important issue for Cross' reconstruction is simply the general lack of evidence for late oral transmission. K. van der Toorn suggests the possibility that KBo 8.86//88 (Haas and Wilhelm 1974:260-63) and KUB 44.7 (which may be a copy of the same ritual) may bear on the question of the oral recitation of Baal's exploits.[55] The colophons for this text mention Mount Hazzi. It is unclear why Mount Hazzi gives its name to this ritual; the mountain could be either part of the subject or site of the ritual, or the recipient of the sacrifice. The ritual preceding the colophon in KBo 8 no. 86//88 alludes to the Storm-god (always written ^{d}U) and "the Song of Kingship (?)." Haas and Wilhelm transcribe and translate lines 8-12 of KBo 8.88, with restorations from KBo 8.86:

---

[55] Professor van der Toorn, personal communication. My thanks go to Dr. G. Beckman for his aid with the following discussion.

LÚ^{MEŠ} NAR šar-ra-aš-ši-ia-as [(ŠÌR)]
ŠÌR^{RU} nu ma-aḫ-ḫa-an GUNNÌ^{MEŠ}
kat-ta e-ša-an-da-ri nu EGIR-an-[(da)]

ki-iš-ša-an ši-pa-an-da-a[(n)-zi]

Die Sänger singen das Lied des Königtums.
Und sobald die Herdstellen
niederbrennen, opfert man danach
zuerst dem Wettergott zum Heile
folgendermassen

This ritual prescribes the "Song of Kingship (?)" before an offering to the Storm-god. The ritual in column i of KUB 44 no. 7 (which likely belongs with the colophon as part of the same text) mentions that "they sing the Song of the Sea" (*[ŠJA A.AB.BA ŠIR$_3$ ŠIR$_3$RU*), although there is no allusion to the Storm-god in the little which is preserved of this text. Hurrian compositions attested in Hittite are not infrequently entitled "Song of so and so," named after their main character (Hoffner 1990:9, 38); perhaps in "the Song of the Sea," the figure of Sea is the main character. Given that the colophons to the texts mention Mount Hazzi, Baal might be also part of the topic of the two songs. They may refer to deeds of Baal, perhaps even his defeat of Yamm, but this is only a guess. Indeed, given the uncertainty as to which storm-god stands behind the ideogram ^{d}U, it is possible that these songs involve the storm-god known from Hittite mythology rather than Baal (Laroche 1975:63). Indeed, the god in question is more likely Tessub, given the Hurrian technical terms, but there has been considerable syncretism in late Hittite times, and the Storm-god here might have features of other storm-gods including West Semitic Baal. The scribed notation in KTU 1.4 V 42-43 may suggest a verbal recitation as well.

The evidence thus far discussed combined with internal evidence may permit a tentative and hypothetical reconstruction of four stages in the development of the Baal Cycle.

1. Originally various stories about Baal may have circulated separately. It may suggested that originally independent episodes perhaps included the story of Sea's demand of tribute from the divine council in KTU 1.2 I, the Baal-Yamm conflict in KTU 1.2 IV, the battle of Anat in KTU 1.3 II,[56] the audience of Athirat before

[56] Fisher, *RSP III* 240, 251; cf. Smith 1986b:326 n. 73.

El with Anat listening in the background in 1.4 IV, the building of Baal's palace in KTU 1.3 III-1.4 VII, the Baal-Leviathan struggle mentioned in KTU 1.5 I, and the death of Baal and his return to life in KTU 1.5 II-1.6 II. As noted above,[57] the figure of Mot himself may have been secondary to the development of the story. The development of the figure of Mot perhaps belongs to a later stage than the Baal-Yamm tradition.

Variants of these episodes in the cycle suggest their originally separate character. The story of Sea's demand of tribute from the divine council is attested in KTU 1.2 I, the Egyptian Astarte Papyrus of the 18th or 19th dynasty and other texts.[58] The episode of Athirat's audience before El in 1.4 IV appears also in the Elkunirsa story (*ANET* 519; Pope 1971). The two conflicts of Baal against his enemies, Yamm and Leviathan, constituted apparently separate traditions. Each of these stories perhaps served as a prelude to kingship. This reconstruction is compatible with the view of Cross (*CMHE* 120, 149; 1976:333) who understands the conflict stories of Baal-Yamm, Baal-Leviathan and Baal-Mot as "alloforms" or "variants" of the same type of cosmogonic story representing the victory of life over death (see also *CMHE* 58, 116, 156). A text from Mari appears to confirm at least a Middle Bronze date of the Baal-Yamm tradition. Durand (1993:45; cf. Charpin and Durand 1986:174) presents a text (A.1968. lines 1'-4') that quotes the words of Nur-Sin of Aleppo to Zimri-lim of Mari: "I s[et] you on the thr[one of your father]; the weapons with which I had battled against Sea (*têmtum*) I gave to you" (*lu-t[e-e]r-ka a-na giš-[gu-za é a-bi-ka] ú-te-er-ka giš-tukul-[meš] ša it-ti te-em-tim am-ta-aḫ-ṣú ad-di-na-ak-kum*). Charpin and Durand (1986:174; Bordreuil and Pardee 1993) compare this passage with the Baal-Yamm conflict. The eighteenth century Mari text provides the earliest literary witness to the tradition of the Baal-Yamm conflict. The tradition could be considerably older than this date, but for the first time external data push back the date of the Baal-Yamm tradition at least to the Middle Bronze Age. The conflict tradition perhaps was not tied originally to the palace-building tradition of KTU 1.3 III-1.4 VII, although both the Baal Cycle and Enuma Elish have amalgamated the traditions of their

---

[58] Gardiner 1932; Gaster 1952:82-83; Stadelmann 1967:125-31; Luft 1978: 217-18; J. van Dijk 1986:31-32. See above pp. 23-25 for further discussion.

divine heroes' battle, victory and proclamation of their kingship with the construction of a palace marking their sovereignty. The principle for the collection and integration for these diverse materials in the Baal Cycle is the exaltation of Baal much as the diverse materials in Enuma Elish served the purpose of exalting Marduk (Lambert 1965).[59]

2. The relatively early oral stage perhaps overlapped with a second stage when various stories about Baal were committed to writing separately. Internal evidence provides signs of originally separate written stories. The beginning of the fifth tablet (KTU 1.5 I) shows signs of having incorporated or alluded to an earlier version of a cosmogonic conflict between Baal and *ltn*. As noted above, the "when . . . then" opening in KTU 1.5 I has been compared with the beginning of a number of ancient Near Eastern stories and would appear to indicate an originally separate tradition about Baal and *ltn*.[60] This older material would have been redacted secondarily into the context of Mot's message to Baal. Furthermore, Anat's battle in KTU 1.3 II within the larger framework of Baal's rise to kingship may represent the secondary inclusion of an originally distinct story about Anat who battles alone in KTU 1.13 and 1.83 and whose martial exploits are cited in KTU 1.3 III 37-IV 4.

3. Writing errors detected in the tablets point to a third stage. These scribal mistakes indicate a prior written copy of the cycle from which the extant texts were copied.[61] Horwitz (1973:165-73; 1974:78; 1979:393-94) argues on the basis of the distribution of the small vertical wedge, called traditionally in Ugaritic studies the "word divider," that the scribe Ilimalku was a copyist of a prior written text. Instead of regarding the small vertical wedge as a word divider, Horwitz suggests that the wedge served as a metrical device designed to divide two words. From this feature Horwitz (1979:392-93) deduces:

> The use of the small vertical wedge as a metrical device is sophisticated enough to imply a thorough knowledge and analysis of the written forms of the myths. Thus, the manner in which Ilimilku distributed the small vertical wedge supports the hypothesis that he was a copyist.

---

[59] For further discussion, see below pp. 103-104.

[60] Albright 1924:364; *CMHE* 118-20, 149-50; Wallace 1985:66-67.

[61] Rosenthal 1939:216, 218; Segert 1958:205, 211 n. 20; 1971:415; Horwitz 1977:124 n. 10; Sasson 1981:93.

Parker's observations noted above on the relationship between 1.3 IV-VI and 17 VI-1.18 I and IV suggest that at this point in the literary tradition, traditional material known from other compositions was incorporated secondarily into the Baal Cycle and modified in accordance with its plot. This third stage may also represent the point at which originally separate stories were connected. Baal's declaration of his kingship in KTU 1.4 VII 45-52 functions both as the completion of the palace episode and the beginning of his conflict with Mot. The speech secondarily links together what were originally different materials about Baal.

4. The fourth and final stage in the development of the Baal Cycle involved the copying of the tablets which stemmed from an earlier written form of the cycle. The extant tablets date to 1400-1350, and perhaps more precisely to 1380-1360.[62]

In closing, this reconstruction remains highly hypothetical as it is deduced largely from internal evidence. Although the criteria are inadequate for dating (Held 1969:74 n. 32), some of them may suggest the relative antiquity of the Baal Cycle, or at least of some of its plot and motifs. Some of the grammatical features considered in the next section may suggest the antiquity of the Baal Cycle, if not relative to the other literary poetic texts, then to the prose texts.

Grammatical Dating of the Cycle

Various grammatical features have been invoked to support the high antiquity of the Baal Cycle (Ginsberg 1950:158; 1973:131-32; Held 1959:174-75; 1969:74 n. 32; *CMHE* 113). These features include: (1) the alphabet; (2) orthography and phonology; (3) various morphological items, especially the indicative verbal system; (4) syntax; and (5) vocabulary.

1. The Alphabet

Greenfield (1969:96-97) notes that the rise of the Ugaritic twenty-two letter alphabet developed by the time of the extant copy of the Baal Cycle, which like all the literary texts is written in a thirty-letter alphabet. The implications of this development are significant for

---

[62] See above p. 1.

understanding the character of the Ugaritic poetic texts, according to Greenfield (1969:96-97):

> A very plausible conclusion from the above considerations is that the main Ugaritic alphabet, with its panoply of possible phonemic realizations, was either archaic, obsolescent, or anachronistic during a good part of the period of its known use (1400-1200). At the time of its invention—better (for I follow in this Albright and Cross & Lambdin), at the time when a Canaanite model was 'cuneiformized'—the full graphemic-phonemic panoply was still in use (or was used in 'liturgical' recitation of the epics). It soon became a sort of etymological, historical spelling as found later in Hebrew, Aramaic and Arabic.

Dietrich and Loretz (1989) challenge the view that the shorter alphabet represents a reduction from the longer alphabet. According to Dietrich and Loretz, the longer alphabet was based on the shorter coastal or "Phoenician" alphabet and supplemented by letters of the "southern" tradition represented by the Beth-Shemesh tablet. If this reconstruction were correct, Greenfield's argument would be problematic, since the longer alphabet would be no older or archaic than the shorter alphabet. However, the reconstruction of Dietrich and Loretz remains highly hypothetical, as Sass (1991) has observed.[63] The older view as represented in Greenfield's remarks remains as likely, if not more so. Moreover, the orthographic and phonological evidence is consonant with Greenfield's view.

2. Orthography and Phonology

According to Greenfield (1969:95) and Garr (1986), originally unvoiced consonants in some words in the Baal Cycle did not shift to their voiced variants as found in other Ugaritic texts and therefore represent a retention of archaic spellings. Some variant spellings of the same words and roots in Ugaritic represent two sets of spellings, one an older and original set and the other a secondary set which reflect specific sound shifts. On the one hand, some words in the Baal Cycle reflect an archaic spelling. For example, *yṣ*ʾ*a*, "he left," in KTU 1.2 IV 30 represents an older spelling, while the more contemporary spelling of the root is represented in *ẓ*ʾ*i* in KTU 1.12 I 14, 19. Similarly, *yṣḥq* in KTU 1.4 IV 28 and 1.6 III 16 shows the older spelling of the word, while *yẓḥq* in KTU 1.12 I 12 represents

---

[63] For difficulties concerning the view of Dietrich and Loretz, see also Segert 1991:86-88.

the contemporary spelling affected by a voicing of the consonant. It may be noted that some genuinely archaic spellings occur only in the Baal Cycle (e.g., *tkšd*; *thrm*, "pure" in 1.4 V 19, 34).

On the other hand, Garr notes four words in the Baal Cycle that exhibit sound shifts due to voicing: *ybrd*, "he cuts" (KTU 1.3 I 6) ⟨ **prd*; *lpš*, "garment" (KTU 1.5 VI 16; 1.6 II 10)⟨ **lbš*; *tkḏd*, "it attracts" (?) (KTU 1.5 I 16)[64] ⟨ **kšd* (?); and *ḏrt*, "vision" (KTU 1.6 III 5, 11) ⟨ **šhr* (?). These forms reflects contemporary spellings of these words. In sum, the Baal Cycle contains both older and more recent spellings, in one case possibly of the same roots perhaps used for poetic contrast in the same bicolon (*tkšd* and *kḏd* in 1.5 I 16-17).

3. Morphology

Garr (1986:52 n. 50) notes the contrast between *whn*, "and behold" ⟨**w-hn*, in Keret and Aqhat (KTU 1.14 II 14; 1.17 V 3) versus *wn*, "and behold," in the Baal Cycle (KTU 1.2 III 22; 1.4 IV 50). If *wn* in the Baal Cycle derives from **w-hn* (so *GA* 141), then the form *wn* in the Baal Cycle would be linguistically secondary to the form *whn* in Aqhat and Keret.

Held (1959) suggests that the *Gt*-stem form of the roots **mḫṣ* and **ḫṣb* only in the Baal Cycle represents an indication of its great antiquity. This view is unverifiable. *Gt*-stem forms are attested in West Semitic texts well into the first millennium, suggesting that these forms are not necessarily a mark of high antiquity.[65]

In his study of the older singular feminine ending *-(a)y*, Layton (1990:241-45) notes a clear example from the Baal Cycle. The form *brky*, "spring," in KTU 1.5 VI 16 has been recognized as equivalent to the form *brkt* in the copy of the same passage preserved in KTU 1.133.6. Another plausible case is represented by *nᶜmy* in KTU 1.5 VI 6, paralleled by KTU 1.17 II 41. The word stands in parallelism with the variant feminine forms, *ysmt* (KTU 1.5 VI 7) and *ysmsmt* (KTU 1.17 II 42), and describes *ʾarṣ*, a feminine noun in 1.5 VI 6. The hypothesis that *-(a)y* formation contained in *nᶜmy* represents an old feminine ending represents the most satisfactory

---

[64] So, based on *šbšt*, "it attracts," in the parallel copy, KTU 1.133. 8; see Garr 1986:47 n. 22; cf. "to long," so Held 1962:285 n. 4, 290; "to hasten," Pope 1978:27, 30 n. 9; cf. Held 1962:289 n. 1.

[65] See Greenfield 1969:97 n. 23. For Ugaritic *Gt*-stem forms in general, see Greenfield 1979.

explanation offered to date. The *-(a)y* ending in the divine names of *ʾarṣy*, *ṯly* and *pdry* has been viewed as either a hypocoristic or feminine ending. The old feminine ending *-(a)y* in the Baal Cycle and Aqhat reflects the archaic character of these two texts relative to prose texts, though not relative to the other epics.

The indicative verbal system has played a role in the discussion of the relative date of the Baal Cycle. Moran (1961:75) offers some cautionary remarks on this topic: "It is clear that the Ugaritic tense system is not that of contemporary Byblian Amarna. But what is it? The writer would make no pretensions of knowing. . ." With no less a disclaimer, an attempt is made in this section to clarify the Ugaritic verbal system in order to address its possible signficance for the date of the language in the Baal Cycle. Moran's reservations about knowledge of the Ugaritic verbal system are understandable. For while **yaqtulu*, **yaqtul* and **qatala* forms[66] are attested in the Ugaritic material, the usage and distribution of these forms have been a matter of great discussion.

The prefix forms are the norm for poetic narrative (*UT* 9.4; 13.32; Fenton 1973:365; Watson 1989). It remains unclear, however, why various verbal forms occur in the same or similar contexts in Ugaritic poetry. In other words, what different function does each different form have, especially in poetic passages where two of the forms occur together? According to many reconstructions of the indicative verbal system (see Verreet 1988), the **yaqtul* preterite past, **yaqtulu* present-future durative and the **qatala* past forms are attested. The verbal forms for narrative in Ugaritic poetry vary, but the prefix forms, especially **yaqtulu*, predominate. The Ugaritic evidence regarding the **yaqtul* preterite is problematic. Segert (1984: 62) and Sivan (1984b:147-49) omit any discussion of a **yaqtul* preterite in Ugaritic.

Greenstein (1988:13-14) doubts that a semantic distinction is to be drawn between Ugaritic **yaqtul* and **yaqtulu*:

> The very existence of a *yaqtul* preterite in Ugaritic is open to serious doubt. Rainey has himself been sensitive to this problem and has attempted to identify a very few instances. The form written *wyʿn*, "he spoke up," cannot be unequivocally parsed as a preterite, as Rainey

---

66 These *G*-stem forms are cited in the following discussion to represent the indicative forms of all stems.

> does, because it is only one of several final-*yod* verbs in Ugaritic that occur with the final *y* unwritten (e.g., *ybk*, *ymġ*, *tšt*, etc.). In the clause *tiššaʾū ʾilūma raʾašātihuma*, "the gods raised their heads" (III AB B, 1:29), I see no reason to separate the verb from the ordinary prefixed form, which in the plural is commonly attested without the nun-augmentation. Again, the apparent lack of a semantic distinction between prefixed forms with and without nun in Ugaritic would be of little moment were it not that in a BH text like Exod 15:2... the distinction is likewise hard to maintain. The fact that the prefixed form of the verb never serves as a preterite in Phoenician also diminishes the plausibility of the notion that there was a YQTL preterite in Ugaritic.

This presentation of the issue contains two main arguments against **yaqtul* and **yaqtulu* as "corresponding in a one-to-one manner to two separate forms."[67] According to Greenstein, the variation between *yʿn* and *yʿny* (in their various persons) within identical environments points to a lack of semantic distinction corresponding in a one-to-one manner to two separate forms. The crux of the matter hinges on some III-*y* verbs which appear with and without final *-y* (not including forms with nunation) even in the same sort of context. For example, *wyʿn* and *wyʿny* both belong to what Verreet (1988:99-103) calls "Zitationsformeln," formulas introducing speeches. From Verreet's lists of these forms (1988:100-02; cf. *UT* 9.12), it is clear that *wyʿny* (including its first, second and third person forms) is relatively rare. *CUL* list eight long forms out of a total of sixty-four cases of both long and short forms. Verreet (1988:102) explains the eight instances as a special stylistic use: the long forms signal a contrast between the speeches preceding and following the long forms. While there is no means presently available to confirm Verreet's theory, this approach does not indicate a semantic distinction corresponding in a one-to-one manner between the short and long forms. Rather, the distinction suggested by Verreet is stylistic in character.

The second type of evidence in Greenstein's argument is that the plurals of some short forms seem to be used in an identical manner as the long forms. The short and long forms would therefore appear to be variants of the same verbal prefix-form. As with the III-*y* forms, the short and long forms of the same verbal prefix form offer

---

[67] Professor Greenstein, personal communication, as a clarification to the interpretation of his position given in Smith 1991:65-67 n. 1.

no clear semantic difference corresponding in a one-to-one manner to short and long forms, but only a possible stylistic contrast. As Greenstein argues, **yaqtul* and **yaqtulu* are used similarly.[68]

There is a third context where both of the two prefix forms occur. The poetic texts use both **yaqtul* and **yaqtulu* after various adverbial particles (*ʾidk*, *hl*, *ʾaphn*, *ʾapnk*). The particles *ʾapnk* and *ʾaphn* take various prefix forms, for example **yaqtul* in the case of *yʿl* in 1.6 I 56, but **yaqtulu* in the case of *ytšʾu* in 1.19 I 21 (Fenton 1969:37).

Given these functional parallels between the two forms, it is possible that the preterite function of **yaqtul* was obsolescent already in the time of the written composition of the poetic texts. The prose texts show further obsolescence of **yaqtul*. Gordon (*UT* 13.32) and Mallon (1982:67, 77-78) note the relatively few examples of the **yaqtul* preterite in the prose texts relative to its occurrences in the poetic texts. According to Mallon, the **yaqtul* preterite is rare in the prose texts: *yph* (KTU 1.90.1); *ʾiph* (KTU 2.25.4); *yʿl* (KTU 1.127.29). Assuming that **yaqtul* is obsolescent in the prose texts, it would suggest that the frequency of the form in the poetic texts is relatively archaic. In sum, the **yaqtul* preterite forms seem to be indicated in numerous short III-*y* forms and III-ʾ forms ending in *ʾi* in the poetic texts. It appears from the similar usage of **yaqtul* and **yaqtulu*, that the two forms, though different originally in morphology, are functional variants as Greenstein suggests.[69] The distribution and usage of **yaqtul* forms also suggest that they are a regular feature of the Ugaritic poetic texts functioning in contexts equivalent to **yaqtulu*, but their rarity in prose texts seems to reflect their further obsolescence. Their more common occurrence in Ugaritic poetry compared to Ugaritic prose would seem to be a mark of archaism. Finally, Greenstein (1993) makes the intriguing suggestion that prefix forms are customary for poetic narrative because Ugaritic poetry deliberately renders narrative in the dramatic present, unlike biblical narrative which places the action in the past through the use of suffix forms as well as *waw*-consecutive forms.

The **qatala* form in Ugaritic poetry represents an equally difficult problem. Scholars have long noted the contrast in the distribution of **qatala* forms in Ugaritic poetry and prose. While **qatala* is the

---

[68] Greenstein's appeal to the loss of **yaqtul* in Phoenician is controvertible as evidence for the same phenomenon in Ugaritic. See Smith 1991:67 n. 1.

[69] Cf. Smith 1991:65-67 n. 1.

characteristic verbal form for past narration in prose texts, its usage diverges in poetic texts. As Fenton (1973:365) notes, the **qatala* form in narrative is confined to specific usages; otherwise the prefix forms are employed. Not including cases not entirely obscured by broken contexts, there are one hundred and fifty-two forms in the Baal Cycle plausibly identifiable as **qatala*.[70] The text of Keret contains fourty-nine instances.[71] Aqhat attests to at least twenty-one cases of the suffix form.[72]

Many **qtl* are generally presumed to be **qatala*, although whether some of the **qtl* forms are instead infinitives cannot be easily determined, as Gordon notes (*UT* 9.4 n. 1). For example, the infinitives, *šmḫ*, "she rejoices," and *ṣḥq*, "she laughs," in 1.4 II 28, V 20, 25 and 1.18 I 22 would suggest caution in assuming that *šmḫ*, "he rejoices," in 1.4 V 35 is a **qatala* form; it may be an infinitive. The forms, *wᶜn* in 1.6 I 53 and *ᶜrb* in 1.17 II 26, are likewise narrative infinitives. Similarly, the **qtl* forms in 1.4 VI 40-56 and 1.5 IV 12-16 might be infinitives.

Some forms of verbs I-*y* are also problematic since their consonantal spelling does not distinguish always whether they are prefix or suffix forms. As a result, they are omitted from consideration below, except in those cases where there is further evidence that helps to determine their form. The final ʾ of the verb **yṣʾ*, "to depart," clarifies forms of this root. In the case of *lyrt*, "you shall surely descend," in 1.5 I 6, the second person ending indicates assimilation /dt/ > /tt/ in a suffix form. On occasion verbs in the immediate vicinity may suggest the form: the prefix forms surrounding *yṣq* in 1.3 II 31 may suggest that it is a prefix form rather than a suffix form.

As Watson (1989) observes, the usages of **qatala* may be distin-

---

[70] 1.1 III 18; IV 2, 4, 9, 15, 19, 28, 29, 30; V 8, 21; 1.2 I 3, 13, 19, 21, 24, 33, 38, 43, 45, 46; III 22 (2x); IV 6, 7, 8, 17, 32-33; 1.3 I 2-3, 4, 8, 18; II 3, 11-12, 19, 41; III 4, 38-46; IV 33, 40, 41, 44; V 17, 27, 30; 1.4 I 23; II 3, 8, 22-23; III 14, 17, 23-24, 30-31; IV 9 (2x), 10, 12, 16, 19, 31-32, 33-34; V 3, 6, 27, 35-36, 44-45; VI 13 (2x), 34, 35, 40, 41, 44, 45, 47, 48, 49, 50, 51, 52, 53, 54, 55 (2x), 56; VII 8, 9, 21, 23, 43 (2x); VIII 22; 1.5 I 6, 9, 17, 22, 23; II 7, 8, 13, 20; IV 12, 13, 15; V 17, 19, 23; VI 3, 5, 8, 9-10, 23; 1.6 I 6, 41-42; II 17, 19, 24; III 1, 14, 20; V 12, 13, 14, 15, 17, 18; VI 17 (2x), 18, 19, 20 (2x), 21, 22, 30.

[71] 1.14 I 14; II 39, 41, 43; III 55 (2x), 59; IV 2-9, 17, 19, 49-50; 1.15 I 1-2; IV 27; V 10; VI 4; 1.16 I 33 (2x), 39-41, 44, 51, 61-62; II 19-20//22-23; III 3, 12, 13-15; IV 2, 3; VI 13-14, 32, 35-36, 44, 51 (2x).

[72] 1.17 II 14, 31; V 31-32; 1.18 I 16 (2x); IV 33, 36; 1.19 II 26, 29 (2x); III 7, 9, 22, 23, 35, 37; IV 49, 51-52, 58.

guished according to their attestation in direct discourse and narrative within the Baal Cycle (KTU 1.1-1.6), Keret (1.14-1.16) and Aqhat (1.17-1.19). While **qatala* shows many of the same usages in both prose and poetic texts, it also exhibits additional functions in poetic usage.[73] Six basic usages known from Ugaritic prose and four additional usages in poetry unattested in the extant Ugaritic prose texts have been identified for **qatala*: (1) stative; (2) past report; (3) continuation of other perfects; (4) background information[74]; (5) subordination; (6) performative perfect; (7) optative perfect; (8) contrast with prefix forms; (9) report of action commanded commanded in imperative; and (10) delimitation of a section. Almost all the examples of **qatala* fit these categories. The Baal Cycle has a number of broken contexts which makes it impossible to assign precisely some possible **qatala* forms to any of the ten categories[75]; otherwise, all of the suffix forms in the Baal Cycle conform to the ten categories. Lest the discounting of problematic contexts appear to represent a case of special pleading, it may be noted that 128 of 152 of all forms plausibly identified as **qatala* in the Baal Cycle comport with the ten categories. Keret contains only two forms which do not fit the following ten categories; both forms involve a lacuna or some other interpretational difficulty (1.16 I 44, 50). Without exception, all of the forms identified as **qatala* in Aqhat conform to the ten categories. The following selected examples are divided within each category according to direct discourse and narrative (so also Watson 1989).

1. A number of stative **qatala* forms appear in Ugaritic narrative poetry: *ʿz*, "he is strong" (1.2 IV 17; 1.6 VI 17 [2x], 18, 19, 20 [2x]); and *šbʿt*, "she is sated" (1.3 II 19). The three-fold repetition of *ṣḫrrt* (1.3 V 17; 1.4 VIII 22; 1.6 II 24) is likely a stative **qatul(a)l* form.[76]

---

[73] Prose functions for **qatala* unattested in poetry are omitted from the following discussion.

[74] See Greenstein 1993. While prefix forms clearly are preferred for narrative in Ugaritic poetry, it is not clear that no **qatala* forms are used in narrative. Nonetheless, some of the forms discussed in categories one and two might be classified along the lines suggested by Greenstein. Previously I had referred to this category as a pluperfect (see below), but in view of some of the examples, Greenstein's view appears preferable.

[75] 1.1 IV 2, 4, 9, 15, 19, 28, 29, 30; 1.2 I 3, 38, 43, 46; 1.3 III 4; 1.4 II 3; 1.5 V 23.

[76] Some BH words for colors may also derive originally from **qatull-* with reduplicated final radical; cf. Arabic IX and XI forms for colors and defects (T.

Instances from direct discourse are numerous. KTU 1.4 IV 31-34 contains two stative verbs in direct discourse: "Surely you are hungry (*rgb rgbt*)..."//"Surely you are thirsty (*gmʾu gmʾit*)..." In 1.4 V 3, El is praised: *ḥkmt*, "you are wise." In a parallel passage, 1.3 V 30, Anat praises El's decree: "your decree, El, is wise." Similarly, in 1.16 IV 2 an unnamed figure is praised: *ḥkmt ktr llṯp[n]*, "you are wise like Bull Benefi[cent]."[77] In 1.2 IV 32 and 34, the proclamation of Baal as king is accompanied by the double proclamation of Yamm's death: *ym lmt*, "Yamm is surely dead."

To communiqués delivered by messengers Kothar in 1.1 III 18 and Anat in 1.3 IV 33 retort: *ʾatm bštm wʾan šnt*, "You are slow and I am fast" (*ANET* 137), or "While you delay I do quit" (*CML*^{2} 51).[78] Clifford (*CMCOT* 86 n. 59) notes that *bštm* is a stative perfect. Ginsberg (1944:27 n. 9) insists on the stative character of the second verb as well, but the cognates for the second verb are verbs of motion.[79] This form is likely not a stative verb, as Gibson's translation suggests. The context would suggest that the messengers delay while their divine superiors respond quickly in accordance with the message.[80]

The verb **ydᶜ* appears as a stative in direct discourse (1.1 V 8, 21; 1.3 V 27//1.18 I 16; 1.16 I 33; cf. future *wʾidᶜ* in 1.16 III 8). To the verb **ydᶜ* 1.16 I 33 adds *rḥmt*, "you are compassionate," and 1.3 V

O. Lambdin, personal communication). For this word, see Diest 1971; Rendsburg 1987b:625.

[77] For these three examples, see *EUT* 43.

[78] Many commentators compare *bštm* with BH *bōšēš*, "to delay" in Judg 5:28 and Exod 32:1 (*UT* 19.532; *CMCOT* 86 n. 59; *MLC* 530). Gordon, al-Yasin (1951:no. 93) and Caquot and Sznycer (*TO* 171 n. u) cite Arb *bassa*, "to drive (a caravan) slowly," but according to Kopf (1955:135) Arabic sources explain this word in various ways and therefore are not a good source to explain Ugaritic *bštm*. The vocalization of this word follows that of the Hebrew form. Comparison with Akk *bēšu*, "to depart" (*AHw* 123; *CAD B*:214), though semantically proximate (de Moor 1979:647 n. 54), suggests an originally middle weak root containing PS **h* or ᶜ. Given that the middle weak forms appear semantically unrelated to Ugaritic *bštm* and BH *bōšēš*, this would appear to constitute a separate root. The BH forms of the word seem to reflect an analogous extension of **qatala* from middle weak roots to geminates, while the Arabic second form shows this extension to the strong verb as well.

[79] Akk *šanû*, "to change, depart" (*AHw* 1166-67a); Syr *šnʾ*, "to depart" (*LS* 789). See *CMCOT* 86 n. 59; *TO* 171 n. v; *CML*^{2} 158; *MLC* 630.

[80] Clifford (*CMCOT* 86-87 n. 59) suggests that the messengers' divine superiors travel faster due to their greater abilities. For other opinions, see Smith 1985:235-56.

27//1.18 I 16 adds *ʾanšt*, "you are irrascible."[81] Other cases of statives in direct speech appear in 1.4 IV 33-34, 1.5 V 17, 1.6 I 6, and 1.6 II 17.

2. The fientic **qatala* apparently refers sometimes to narrative past action. At the end of Baal's wrestling march with Mot in 1.6 VI 21-22, "Mot falls" (*mt ql*) and "Baal falls on him" (*bʿl ql ʿln*). This example may, however, belong to category ten.[82] The opening scene of Keret reports his various misfortunes with some **qatala* forms (1.14 I 7-14),[83] but Greenstein (1993) regards these forms as providing background information (see category four below). This use may apply to other apparent fientic **qatala* forms. For example, 1.15 I 1-2 describes how "she [Ḫry] extended (*mṯkt*) a hand" to the hungry and thirsty. Other instances of fientic **qatala* include 1.4 VII 9 and 21 (if this form is not an infinitive or does not belong to category ten), 1.14 IV 17 and 19, perhaps 1.4 II 3, 8 and 1.16 III 3 (if the form *sb* is not an imperative).

The forms, *šrḥq* and *št* in 1.3 IV 40-41, might be interpreted along these lines if they are not infinitive forms.[84] The verbs in the divine feasting topos in 1.4 VI 40-56 and 1.5 IV 12-16 may be narrative **qatala* forms if they are not infinitives.

In direct discourse, **qatala* refers to past action. Athirat asks in 1.4 III 30-31: *mgntm ṯr ʾil dpʾid//hm ġẓtm bny bnwt*, "Have you beseeched Bull El the Benign// Or entreated the Creator of Creatures?"[85] Fenton (1969b:199) takes the four forms in 1.4 IV 31-34 as **qtl*, and he translates them in the past tense: "You have been hungry (*rġbt*) so you came here (*wmġt*)//You have been thirsty (*ġmʾit*), so you came in (*wʿ-*)." The first verb in each clause is stative, which is frequently expressed by **qtl* (see category one above).

According to Fenton (1973:35; cf. 1969b:199 n. 4), there is another literary convention used to report past action in direct speech: "in conversations, that is, when the 'characters' of the poems address each other, they refer to, or inform of, past events in

---

[81] For discussion, see below pp. 311-12.

[82] See below p. 56.

[83] For the idiom of **tbʿ*, to depart," for "to die" in line 14, cf. BH **hlk* in Gen 15:2; Ps 58:9; see Rabin 1977:339.

[84] The **qatala* forms in 1.4 II 3 and 8 may serve to structure the description of Athirat working at her domestic chores.

[85] For Ugaritic rhetorical questions, see Held 1969.

the *qtl* form, not *yqtl*." The verbs in Anat's speech of KTU 1.3 III 38-46 are **qatala* forms apparently conforming to Fenton's rule (Fenton 1969b:199-200). In this speech Anat proclaims her martial prowess:

> I indeed smote (*lmḫšt*) the Beloved of El, Yamm
> I indeed destroyed (*tklt*) River, the Great God...
> I smote (*mḫšt*) the Serpent, the Twisty One...
> I smote (*mḫšt*) the Divine Bitch, Fire,
> I destroyed (*klt*) the Daughter of El, Flame...

In 1.5 I 22-23, Mot recounts how Baal invited (*ṣḥn//qrʾan*) his brothers and him to feast (cf. prefix forms in direct discourse in 1.5 II 21-22). In their search for the dead Baal, El's two servants report to him in KTU 1.5 VI 3-8 (Ginsberg 1944:29 n. 20):

> We went about (*sbn*)...to the watery ends,
> We two arrived (*mġny*) at the beautiful outback of the Earth.
> To the beautiful fields of the shores of Death,
> We two came (*mġny*) upon Baal fallen to the Earth.

El's messengers go on to inform him of Baal's condition: "he is dead," *mt*//"he has perished," *ḫlq* (1.5 VI 9-10//1.6 I 41-42//1.6 III 1). Mot reports to Anat in 1.6 II how he arrived (*mġt*) at the same location. Mot later recounts his destruction at Anat's hands with a seven-fold repetition, *pht*, "I experienced..." (1.6 V 12-18).

Keret's wife, Ḥuray, thrice tells the nobles that "I invited you (*ṣḥtkm*) to eat and drink" (1.15 IV 27; V 10; VI 4). In his attempt to withhold the truth of his illness from his daughter, Keret orders his son to tell her that he is busy feasting (1.16 I 39-40), which the son then relates to his sister (1.16 I 61-62). In his speeches directed first to himself and then to his father (1.16 VI 32//44-45), Yaṣṣib complains to Keret that in failing to keep justice, "you have dropped your hand in weakness" (?) (*šqlt bġlt ydk*).

When Aqhat learns of his son's birth, he declares (1.17 II 14): *kyld bn ly km ʾaḫy//wšrš km ʾaryy*, "for a son has been born to me like my brothers//a scion like my kinsmen." The topos of the report of the birth of a son, in this instance repeated by the father, usually uses a *G*-stem passive suffix form.[86]

3. The **qatala* forms continuing past action marked in the previous

---

[86] E.g., 1.23.53, 60. For other West Semitic examples, see Parker 1989b:63-70.

line by **qatala* have been listed by Watson (1989:439-40). Examples include *s²id*, "he waiters" (// *ᶜbd*, "he serves" in 1.3 I 2-3) and *šnst*, "she fastens" (//*ᶜtkt*, "she binds" in 1.3 II 11-12). See also *tbr//tbr* in 1.19 III 22-23 discussed below in category seven.

4. The **qatala* used for background information might be rendered in English as a "pluperfect," as it constitutes one past action relative to a second past action (rendered as a historical present). 1.16 III 13-15 describes how food, wine and oil had been "consumed" or "used up" (*kly*) from their various containers at the time of the preceding **qatala* form, *nš²u*, in line 12.[87] Similarly, *qm* and *ytb* in 1.2 I 21 provide background information.

The idiom, *bph rgm lyṣ²a*..., "From his mouth the message had not left" (1.2 IV 6; 1.19 II 26, III 7, 35) might be included in this category, as the phrase provides background information for the following verb: before a word had departed from the mouth of one protagonist, then a second action transpired.[88]

5. The **qatala* in sentences with subordination is relatively rare and is controvertible. Blake (1951:80 n.1) interprets KTU 1.4 III 23-26 as a temporal sentence:

> Just when (*²aḫr*) Mightiest Baal arrived (*mġy*),
> Adolescent Anat arrived (*mġyt*),
> They bestowed gifts on Lady Athirat of the Sea,
> They entreated the Creatress of the Gods.

In this interpretation, two **qatala* forms stand in the protasis. KTU 1.4 V 44-48 shows the same usage: *²aḫr mġy kṯr w-ḫss*...*tᶜdb ks²u wyttb*, "after Kothar wa-Hasis arrives..., a seat is prepared and he seats him." If *²aḫr* may be regarded as an adverb, "afterwards," rather than a subordinating conjunction (see Pope 1986), then these cases might be interpreted as instances of simple past (category two above).[89]

---

[87] This example may provide a parallel for the BH "pluperfect." The BH prosaic equivalent of the verbal sequence of **qatala* plus **qatala* to express the pluperfect occurs regularly in clauses of the type **qatal* followed by *²ăšer* + **qatal*. The BH poetic equivalent may omit *²ăšer*.

[88] For other possible examples, see category two above.

[89] The sequence of a single suffix form followed by prefix forms in 1.17 VI 30b-31 has been understood also as temporal clause: "(when) he is brought to life (*ḥwy*), then one serves (*yᶜšr*) and gives him drink (*wyšqynh*)." This sentence would appear to give support for the type of subordinate clause which Blake has identified

Blake (1951:80 n.1; cf. Cazelles 1947) also takes *qm* in KTU 1.3 I 4 as logically subordinate to *yṯ*ᶜ*r* and translates: "(after) he arose he prepares...".[90] This example may belong to category ten, however.[91]

6. A sixth function of the **qatala* known from both prose and poetic texts may be termed the "performative perfect." Some verbs of speech represent the performance of the action which they name.[92] Recanati (1987:46; see also 94-113, esp. 95-96, 216) discusses the nature of performative verbs: "The distinguishing characteristic of a performative verb is that when I use it in the first person present, I actually perform the act it denotes...To say 'I swear' is to swear...".[93]

Performative verbs in Ugaritic most commonly occur in the first person. The verb, *p*ᶜ*rt*, in 1.1 IV 19 reflects El's royal naming of Yamm and constitutes an example of a performative perfect, and the form, *p*ᶜ*r*, in line 15 introduces this naming section.[94] The phrase *ʾan rgmt* in 1.2 I 45 may also be a performative perfect, although it appears in a broken context. KTU 1.2 IV 7-8 provides two examples

---

in Ugaritic. The difficulty with this example is that the form *ḥwy* appears in this passage as the parallel term to *yḥwy* in the same bicolon and is dictated apparently by the convention of prefix and suffix verbal forms in parallelism (category eight), in this case in a subordinate clause (for this passage, see below pp. 64-65). Therefore, it is unclear that **qatala* is used as a characteristic form for subordinate clauses in Ugaritic narrative poetry. If it were so used, it would occasion no grammatical difficulty as this usage is known in Ugaritic prose texts and the Amarna letters.

[90] See below pp. 55-56.

[91] See below pp. 53-56.

[92] The epistolary perfect identified by Pardee and Whiting (1987) belongs to this category.

[93] Arabic also attests to first person performative verbs in the **qatala*. For Arabic examples see Wright 1898:2.1. For further discussion of the Ugaritic evidence, see Hillers cited in Lewis 1989:13 n. 27.

[94] In a similar biblical usage, Mettinger (1976:261) applies the label "perfectum performativum" to *yĕlidtîkā*, "I have begotten you" (Ps 2:7): "In this case the performative utterance initiates the king's status as son of God at the same moment that is pronounced." The "performative perfect" appears in BH direct discourse. Ecclesiastes uses verbs of speech in the **qatala* in this manner (see Fredericks 1988:58-59). Eccles 6:3 states: *ʾāmartî ṭôb mimmennû hannāpel*, "I say: 'Better than the miscarriage...' Similarly, Eccles 8:14 declares: *ʾāmartî šeggam zeh hābel*, "I say that this also is vanity." Fredericks (1988:36-46) makes a major point of the colloquial character of the language of Ecclesiastes, and similarly Isaksson (1987) stresses the autobiographical thread running throughout the book providing its structural continuity. These observations would comport with seeing the "performative perfect" as a feature belonging primarily to speech which could be used in more formal settings such as ritual or poetic narrative, as the Ugaritic cases illustrate.

of this usage in a poetic setting. In this passage, Kothar introduces his speech predicting Baal's impending victory:

lrgmt lk lzbl bʿl I indeed tell you, Prince Baal,
*tn*t lrkb ʿrpt I repeat, Cloud-rider.

The verbal usage here as elsewhere in the Ugaritic mythological texts[95] is derived from the language of letters where **rgm* serves to introduce the body of a letter. Like 1.2 IV 7-8, KTU 2.72 uses **rgm* and **tny* to introduce the body of a message: the initial message is introduced by **rgm* in line 6, and the further message is introduced by **tny* in line 12 (Pardee 1977:7). The beginning of the second part of the body of a letter in KTU 2.36.14 has been reconstructed */wtJnty*, "secondly" (Dijkstra 1989:142). Kothar opens another speech to Baal also with *lrgmt* (1.4 VII 23).[96]

7. Cassuto (*BOS* 128 n. 56, 149) and Held (1962:283-85, 288-90) pointed to the parallelistic use of the indicative prefix and suffix forms.[97] The usage appears to be largely a narrative device, as it occurs rarely in direct discourse.[98] The following examples may be noted: *tskh//nskh* (1.3 II 40-41); *štt//ʾištynh* (1.4 III 14-16); *yʿdb//ʿdb* (1.4 VI 38-40); *kḏd//tkšd* (1.5 I 17); *yrʾaʾun//ttʿ* (1.5 II 7); *škb//tšʿly* (1.5 V 19-21); *ytb* (**yaqtul[uJ]//ytb* (**qatala*) (1.5 VI 12-13); *yrʾu//ttʿ* (1.6 VI 30); *yḥwy//ḥwy* (1.17 VI 30-31[99]); *ytbr//tbr* (1.19 III 8-9[100]); *mḥṣt//tmḥṣ* (1.19 IV 58-59). Some of these instances use the same root for both forms (Held 1962; *UT* 13.58; *CMHE* 115 n. 13).

The example from 1.19 IV 58-59 is notable for another reason, as it belongs to a sequence of curses. The sequence varies the format of the verbal forms, departing from the bicolon pair of *ytbr//tbr* used in 1.19 III 8-9. The variations derive from the presence of the convention of the **qatala* used to report an order issued in the impera-

---

[95] E.g., 1.1 III 14; 1.2 I 16; cf. the Assyrian version of the Myth of Anzu 2.103-104 in *ANET* 516.

[96] The verbs in 1.161.2-12 reflect the performative perfect in a ritual context. For readings, see Pardee 1987b:211-12; for a discussion of this text, see Lewis 1989:5-46.

[97] Cf. *UT* 13.58; Marcus 1969b:57; Fensham 1978; Freedman 1980:248; Watson 1989:440-41.

[98] The corresponding phenomenon in direct discourse may be a jussive parallel to the precative perfect as in KTU 1.4 V 6-9, discussed under category nine below.

[99] For translation, see Spronk 1986:151; below p. 65.

[100] For further discussion of this example see below p. 52.

tive. As a result, the reports also use *tbr*, e.g., the **qatala* alone, as in 1.19 III 37, or *tbr//tbr*, in 1.19 III 22-23.

Cassuto (*BOS* 137; also *TO* 214 n. l) plausibly reconstructed the **qtl-*yqtl* sequence in three bicola in 1.4 VI 47-54:

špq ʾilm krm	He provides the gods with rams,
yšpq ʾilht ḫprt	He provides the goddesses with ewes;
špq ʾilm ʾalpm	He provides the gods with bulls,
yšpq ʾilht ʾarḫt	He provides the goddesses with cows;
špq ʾilm kḥtm	He provides the gods with thrones,
yšpq ʾilht ksʾat	He provides the goddesses with chairs;
špq ʾilm rḥbt yn	He provides the gods with jars of wine,
špq ʾilht dkrt [yn]	He provides the goddesses with cruets [of wine].

This interpretation obviates the reconstruction of *[n]* and *[yn]* in alternating lines (e.g., *špq ʾilm krm y[n]//špq ʾilht ḫprt [yn]*). Based on this reconstruction, some commentators envision a scene of ram-gods, ewe-goddesses, etc.. Ginsberg (*ANET* 134), for example, translates the first bicolon: "He sates the he-lamb gods with w[ine], He sates the ewe-lamb goddesses [. . .?]." Del Olmo Lete (*MLC* 206-07) follows Ginsberg's lead and reconstructs *[n]* and *[yn]* in each bicolon. Other scholars have argued that the verb in each line of this passage takes one indirect object, namely the deities, and two direct objects, the reconstructed "wine" and a second noun, in the first two lines of the passage, "rams and ewes." So Gibson (*CML*^{2} 63) renders the first two lines: "he did supply the gods with rams (and) with wine,//he did supply the goddesses with ewes [(and) with wine]." The parenthetically translated "and" points to a problem with this rendering: two uncoordinated direct objects would be rare in the Ugaritic poetic corpus. Unlike these views Cassuto's interpretation engenders no grammatical or thematic difficulty.

The attempt to view *tt*$^{\varsigma}$*r*//*t*$^{\varsigma}$*r* (1.3 II 20-21) as another example of **yqtl*//**qtl*, perhaps most recently advocated by Marcus (1969b:57), founders on his assumption that stative verbs need not agree in in gender with their subjects. There is no reason not to expect the third feminine perfect form **t*$^{\varsigma}$*rt* to parallel imperfect *tt*$^{\varsigma}$*r*, as Loewenstamm (1969b) argued. Marcus' rejoinder that the **yqtl*-infinitive sequence is otherwise unknown would militate against this solution, but poetic dictates do not nullify grammatical analysis. Indeed, *[t]*$^{\varsigma}$*r* in 1.3 II 36 would appear also to be an infinitive which comports with the suggestion of Gai (1982:55) that narrative infinitives may occur where the subject is clear from context; all of these cases follow

a prefix form. The pair *ʾirkm//ʾark* in KTU 1.23.33-35 would represent another disputed instance of **yqtl*-infinitive sequence or **yqtl-*qtl* (perfect) sequence (so Marcus 1969b:56).

It remains to be noted that Held (1962:286 n. 4) takes *yqtl-qtl* and *qtl-yqtl* sequences in the Baal Cycle, their relative rarity in Aqhat and their absence from Keret as an indication of the Baal Cycle's relative antiquity. As Held himself observes, however, this sequence appears centuries later in biblical poetry. This usage has been recognized also in the Amarna texts (Gevirtz 1973) and biblical poetry.[101]

8. Fenton (1969a; 1973:35) notes another function of **qatala* in Ugaritic narrative poetry. With commands issued in **tqtl*, the fulfillments of those commands are reported with **yqtl* forms; but if the command is expressed in the imperative **qtl*, the action is reported with the **qtl* past form. Examples of the latter include *mdl . . . št . . . ʿdb* (1.4 IV 9), *ʿrb . . . lqḥ . . . lqḥ . . . yṣq . . . wʿly . . . rkb . . . nšʾa . . . dbḥ . . . šrd . . . yrd . . . ʿdb* (1.14 III 55-IV 9), and *grnn . . . srnn* (1.14 IV 49-50). Fenton (1969:36-37) notes a few exceptions to this stylistic rule. It is possible to account for some of the exceptions. The sequence in 1.19 II 1-11 is commanded in the imperative, but recounted in the prefix form preceded by *bkm*, "then." This example belongs to a group of constructions which utilize either the particles *ʾidk*, *hl* (and in combination with other particles *-h*, *-k* and *-n*) and *ʾapnk* and *ʾaphn* with the prefix forms or suffix forms in order to begin new narrative sections. BH particles such as *ʾaz*, *bĕṭerem*, *ṭerem* and *ʿad* appear with the prefix form to express a past time-frame. Like the Ugaritic instances of this construction, the biblical examples may constitute a stylistic preference.

9. Ugaritic narrative poetry contains a few cases of the optative perfect.[102] Gordon (*UT* 13.28) takes the form *ḫwt* in the expression *ḫwt*

---

[101] Held (1962:281) noted biblical examples without *waw* in Pss 38:12, 93:3, and Prov 11:7. According to Held, examples with *waw* include Isa 60:16, Amos 7:4 and Ps 29:10 (although this case has been questioned; see Fensham 1978:15-16). Other biblical examples of prefix-suffix parallelism with verbs of different roots have also been observed. Dahood (1970:420-23) notes numerous examples from the Psalter. Cross (*CMHE* 125 and n. 44; 139 n. 93) points to instances in Exod 15:5, 7-8, 14 and 15, and Ps 114:3, 5 and 6. Freedman (1980:46, 68, 210, 248, 299) has identified a score of other biblical cases.

[102] The optative is well-known for Arabic **qatala* (on the problems of an optative or precative perfect in Akkadian, see Marcus 1969a). Similarly, BH examples

ʾaḫt (KTU 1.10 II 20) as an optative and translates "may you live, my sister." The verbal form has been regarded as a *D*-stem form (Marcus 1972), and if correct, it would suggest a *D*-stem passive optative, "may you be preserved."[103] The form *lyrt*, "you shall surely descend," in 1.5 I 6 may be regarded as an optative.[104]

The form *hlk* appears twice in 1.14 II 39 and 41. Given that their context is replete with commands and jussives, these two cases of *hlk* would seem to be optative if they are not infinitives. After El grants permission for the building of Baal's house, the Cloud-rider instructs Kothar wa-Hasis in KTU 1.4 V 51-57:

[ḥ]š bhtm [kṯr]	Hurry, the house, [Kothar],
ḥš rmm hk[lm]	Hurry, erect the pal[ace];
ḥš bhtm tbn[n]	Hurry, the house let it be bu[ilt],
ḥš trmmn hk[lm]	Hurry, let the pal[ace] be erected
btk ṣrrt ṣpn	Amidst the recesses of Sapan.
ʾalp šd ʾaḫd bt	A thousand acres let the house cover (*ʾaḫd*),
rbt kmn hkl	A myriad of hectares the palace.

The imperatives of the first bicolon and the jussives of the second bicolon suggest a precative force for *ʾaḫd* in line 56. Appealing to the infinitive's function of mimicing verbs that precede it (Gai 1982), Marcus (1970a:17-34; Greenstein 1988:9 n. 8) takes *ʾaḫd* as an infinitive, but *ʾaḫd* may be a precative perfect. Indeed, Marcus (1970a:17-34) denies the optative perfect in Ugaritic, yet elsewhere (1969b:57 n. 8) he takes *ṯbr* (*//yṯbr*) in 1.19 III 8-9 as jussive, "may [Baal] break." The form *ṯbr* in this instance may be an optative perfect.

Interpreting the first attestation of *ʿdn* in 1.4 V 6 as a precative perfect would clarify the stichometry in this passage. According to

---

of the optative **qātal* have been long noted. For a recent sound defense of the BH precative perfect in Lam 3:52-66, see Provan 1991. A case also occurs in Jeremiah 28 (Professor A. Fitzgerald, private communication). In verse 2 the prophet Hananiah speaks in God's name: *šābartî ʾet-ʿōl melek bābel*, "I shall break the yoke of the king of Babylon." Hananiah repeats the message in verse 11: *kākâ ʾešbōr ʾet-ʿōl nĕbūkadneʾṣṣar melek-bābel*, "Thus I shall break the yoke of Nebuchadnezzar, king of Babylon..." The parallel contexts in this chapter provide a control illustrating the future time-frame of the optative **qātal* in verse 2. For other proposed BH poetic examples, see Dahood 1970:404, 414-17, 422, 423; Freedman 1980:65 n. 17; 68; 299.

[103] For discussions of the problem, see Marcus 1972; Walls 1992:91 n. 13.

[104] The further example of *šlm* cited by Cunchillos (1986) from requests for information in Ugaritic letters is unconvincing. In this context *šlm* is more likely a nominal form.

1.4 V 6-7, Athirat exclaims these words after El grants permission for the building of Baal's house:

wn ʾap ʿdn mṯrh bʿl And now may Baal also luxuriate with his rain,
yʿdn ʿdn *ṯrt bglṯ May he luxuriate luxuriantly with abundant water in a downpour (?).

This bicolon is difficult. Some scholars emend *ṯkt* (a kind of ship) to **ṯrt* (precipitation of some sort, attested with *glṯ* in KTU 1.101.7-8; see Pardee 1988b: 145-46). The word *glṯ* remains difficult despite the helpful comparison with Biblical and Mishnaic Hebrew "to seethe, boil over" (of water) (Greenfield 1969a:99). Accordingly, *ṯrt* means watering in general and *glṯ* refers to the motion of water. The old view of Gaster (1933) that the root **ʿdn* in this passage means "to make luxuriant (with water)" has received support from **ʿdn* in a context refering to Hadad's rains in the Tell Fekheriyah inscription (see Greenfield 1984; Millard 1984; Cross cited in Tuell 1993: 100 n. 7). Other scholars reject the emendation as unnecessary and translate *ʿdn tkt bglṯ* as "the season of the ship on the wave" (see Tuell 1993), but KTU 1.101.7-8 militates against this view.

Like a number of the words in this bicolon, the stichometry has posed difficulties. Taking the first instance of *ʿdn* as the cognate accusative of *yʿdn*, some commentators understand this verb as part of the first poetic line (so *SPUMB* 148; cf. *CML*^{2} 60), but this approach would be stichometrically unbalanced. However, the initial *ʿdn* may be a verb of the first poetic line and *yʿdn* may be the verb of the second line (followed by the second occurrence of *ʿdn* which would be either the cognate infinitive or accusative of *yʿdn*). This approach provides superior balance. If it is correct, the bicolon contains a precative perfect parallel with a jussive expressing Athirat's hope for Baal's rains. This interpretation provides both a grammatical solution for the verbal forms and a stichometrical solution for the bicolon. The two lines may therefore exhibit parallelism of volitive suffix and prefix forms resembling the parallelism between indicative suffix and prefix verbs, noted in category seven above.

10. Fenton (1973:35) was the first scholar to observe that some cases of the suffix form signal the beginning of a new turn or a significant moment in the narration before the narrative reverts to its customary prefix verbal forms to continue the plot. Fenton (1973:35) remarks:

> when a significant stage in the narrative is reached, when there is a change in subject matter, or when the narrative turns to a "character" who has not been the focus of attention in the preceding lines, the first verb or verbs of the new episode may be in the *qtl* form before the narrative reverts to *yqtl*.

Fenton's description includes two different usages: one is to mark the beginning of a new section and the second to mark highpoints in the narrative. At the outset, it needs to be mentioned that these two categories are *prima facie* subjective and difficult to establish.

Narrative sections involving travel begin with **qatala* and then revert to suffix forms. The verb *tbᶜ* occurs in 1.2 I 19, 1.4 IV 19, 1.5 I 9 and II 8 and 13 to open a travel section which then reverts to prefix forms. 1.17 II 31 uses the same form to close an episode. Likewise, the verbs of motion, *sb//nsb* in 1.4 VI 34-35, close a section otherwise narrated with prefix forms. In this example both the use of the **qatala* forms and the parallelism of two different stem forms highlight the closure of this unit.[105] In contrast, the prefix forms, *ytbᶜ* (1.14 VI 35; 1.16 VI 39) and *ttbᶜ* (1.6 IV 6; reconstructed in 1.18 I 19 and 1.18 IV 5 in *CML*² 111), do not open new sections. In the unreconstructed cases, there may be no intention to demarcate the section beginning with *ytbᶜ* or *ttbᶜ*; indeed, there is no change in subject in these cases, except in 1.14 VI 35, as opposed to the examples with *tbᶜ*.

Another example of a **qatala* verb of motion beginning a section is **ᶜly*, "to ascend," in 1.4 I. Kothar "goes up," *ᶜly*, to his bellows in 1.4 I 23 and then fashions a series of gifts for Asherah, described by verbs *yṣq*, "he pours,"...*yšlḫ*, "he casts,"...*yṣq*, "he pours,"...*yṣq*, "he pours," in lines 25-29.[106] The second verb, *yšlḫ*, would suggest that the other three verbs are prefix forms.

The forms *yṣ̌at* in 1.16 I 51 and *mǵy[t]* in 1.19 IV 49 appear also to commence new sections. The **qatala* form in *bkm [ᶜ]rb* (so CTA; see *DW* 34-35) in 1.4 VII 13 may also mark a new point in narration. The reading of the line is in question, however; KTU reads *bxxxb**. As verbs of motion not infrequently begin sections describing travel, it might be suspected that the two occurrences of *yrd* in 1.6 I 63-64 are suffix forms and not prefix forms.[107] The two **qatala*

---

[105] For this particular example of parallelism involving two different stem forms of the same root, see Held 1965a:273.

[106] The nominal clauses in the remainder of the column are syntactically dependent on the last verb.

[107] Cf. *bkm ytb* in 1.4 VII 42.

forms in 1.4 II 3 and 8 belong to the description of Athirat at her domestic chores. The sections of lines 3-7 and 8-11 begin with **qatala* and then revert to prefix forms; in this manner, the two **qatala* forms provide structure to the description. 1.4 V 35-36 also begins a new section with two **qatala* forms, *šmḫ* and *ṣḥ* (if these are not infinitives); the narrative then reverts to the standard prefix forms. Similarly, *šmḫ* in 1.5 II 20 and 1.6 III 14 begins a new section, but this form may be an infinitive in these two passages.[108]

KTU 1.2 I may contain six **qatala* forms. Bracketing for the moment occurrences in direct discourse[109] and the forms which provide background information, the following four **qatala* forms remain: *tbᶜ* in line 19; *rgm* in line 33; and *ʾanš* in lines 38 and 43. These forms may mark a new departure in the narrative. The word *tbᶜ* begins the travel section; immediately after this verb, the verbal forms revert to the prefix verbal forms customarily found in the travel clichés attested elsewhere. The form *rgm* commences the speech section, and the two instances of *ʾanš* start short sections detailing Baal's response.

KTU 1.3 I uses the **qatala* form three times in an unusual fashion (Watson 1989:441). The first example in line 4 begins a tricolon[110]:

qm yṯᶜr wyšlḫmnh	He arises, he prepares and feeds him,
ybrd ṯd lpnwh	He slices a breast before him,
bḥrb mlḫt qṣ mrʾi	With a salted knife a cut of fatling.

The first line of this tricolon does not correspond syntactically to any other line within this colon. In using only verbal forms, the syntax in this initial line also differs from not only the other lines in this tricolon, but from any other line in Ugaritic poetry, except for two other cases in this same column.[111]

The next example occurs in this passage in the immediately following lines (1.3 I 8-11):

---

[108] Those instances of Ugaritic **qatala* beginning a new narrative section which reverts to prefix verbal forms correspond to the BH prose construction of initial **qātal* followed by converted imperfects.

[109] See *ypᶜt* in line 3 and possibly *ṯbr* in line 13; the latter form sometimes is viewed as a precative (*CML*² 40 n. 4).

[110] As the third example below illustrates; cf. Pardee 1988d:6, 9, 16-17.

[111] Watson (1989:441) also lists 1.17 I 3-4, but the context is difficult and *yd* may be interpreted as a prefix form.

ndd yᶜšr wyšqynh	He arises, he serves and gives him drink,
ytn ks bdh	He places a cup in his hand,
krpnm bkl²at ydh	A goblet in both his hands.

The two tricola in 1.3 I 4-11 manifest similar syntax: three verbs in line one, verb-direct object-prepositional phrase in line two, and prepositional phrase-direct object in line three (though in reversed order compared with the second example). The comparable syntax of the two tricola perhaps signals their parallelism with one another. This is also the case semantically: the singer serves food according to the first tricolon and drink in the second, the typical order of service in Ugaritic literature, as Lichtenstein (1968-69) observes. As a further observation, the identical structure of the two tricola would appear to help resolve the form of *ytn* in 1.3 I 10. Like *ybrd* in the syntactically parallel position in 1.3 I 6, *ytn* in 1.3 I 10 seems to be a prefix form.

The third instance occurs in 1.3 I 18: *qm ybd wyšr*, "he arises, chants and sings." Lichtenstein notes that the traditional order of the feast describes music after food and drink. The section continues with a description of singing in lines 19-21. This passage reflects in some ways then the most unusual usage of **qatala* in all Ugaritic poetry. Blake (1951:80 n.1; cf. Cazelles 1947) takes *qm* in KTU 1.3 I 4 as logically subordinate to *yṯᶜr* and translates: "(after) he arose he prepares..".. Gordon (*UT* 9.8) calls these instances of the **qatala* auxiliary verbs. These examples may belong to category ten, **qatala* to begin or end a section, with an additional feature of structuring the description of the feast.

The use of **qatala* to draw special attention to a narrative high-point is more difficult to identify with certitude. 1.17 IV 36 would appear to provide an example. Through her agent, Yatpan, Anat achieves revenge against Aqhat. The last clear tricolon of 1.18 IV 36-37 represents the climax of action leading to Aqhat's demise: *yṣ²at km rḥ npš[h]*, "his life-breath departs like wind." Another passage manifests a similar progression. KTU 1.6 VI 17-20 reports how Baal and Mot are "strong" (*ᶜz*) in their combat against one another, and 1.6 VI 21-22 proceeds to relate that Mot "falls" (*ql*) and how Baal then "falls on him" (*ql ᶜln*).

In conclusion, the **qatala* form in the poetic texts is more restricted than its occurrences in the prose texts. Whereas **qatala* is the general form for the past in prose texts, **qatala* occurs generally in

poetic narrative either to mark various sorts of disjunction in the narrative (Smith 1991:67-69 n. 3) or to produce specific stylistic effects. While this definition does not apply to all the forms of **qatala* in Ugaritic poetry, especially in direct discourse, perhaps it provides a glimpse of an earlier stage of **qatala* in Ugaritic poetry relative to Ugaritic prose; if so, it would represent a further sign of the archaic character of Ugaritic poetry. Some other differences between the Baal Cycle on the one hand, and Keret and Aqhat on the other hand, are conspicuous. The use of special particles plus the prefix forms appear in Keret and Aqhat, but not in the Baal Cycle. Where the Baal Cycle tends to use the suffix form to mark the opening of a new section, Keret (1.14 I 26, III 50, IV 31; 1.15 III 25; 1.16 I 46, II 17) and Aqhat (1.19 III 50 and IV 1) occasionally shows a prefix form. This particular difference may reflect either a stylistic preference or a more archaic usage.

4. Syntax

A few syntatical features suggest the relative antiquity of the poetic language. Loewenstamm (1969a:173) argued for the archaic character of "a day" (*ym*) for the first day in Ugaritic mythological texts. Here the expression for "a first day," may be contrasted with the prosaic *bym pr*ᶜ, "on the first day," which appears in a rations list (KTU 4.279.1; cf. *UT* 19.2113). Although this root occurs in the Baal Cycle (KTU 1.4 VII 56), its use in the formula for "the first day" is restricted to the prose material.

The syntax for time also differs. The poetic seven-day formulas use the adverbial accusative without a preposition while a rations list uses *btlt*, *brb*ᶜ and *bḫmš* (KTU 4.279.3-5). This particular feature may be a matter of poetic and prosaic style and not a question of archaic style.

Loewenstamm (1969:175) also suggests that the predominance of *l-* for composite forms of numerals in the mythological texts "creates a more archaic impression."

5. Vocabulary

A number of lexical items have been cited to support the antiquity of the Baal Cycle. Held (1959:174-75) noted how *ʾalp* and *ṣʾin*, used for large and small animals, appear only in the literary texts while their counterparts, *gdlt* and *dqt*, are attested only in the ritual and economic texts (Levine 1963). Similar contrasts obtain in *ʾimr* versus

š for sheep, *ǵlm* versus *nᶜr* for a "youth," *mṡbṭm* versus *mqḥm* for a sort of tool for metallurgy. Ginsberg (1973:131-32; cf. 1950:158) observed that the Ugaritic pair, *ᶜr//pḥl*, "donkey"//"jackass" (so *ANET* 133), occurs in the Baal Cycle but never the later equivalent *ḥmr*, "donkey." This word appears only in later texts including Aqhat and Keret, and Ginsberg took its omission as evidence for the great antiquity of the Baal Cycle. Ginsberg (1973:131) similarly argued that **ḫlq*, "to perish" in the Baal Cycle is replaced by the less archaic **ʾbd*, "to perish," in Keret. The B-words for these two verbs show a similar substitution: **mwt* in the Baal Cycle is replaced by *l* + **ḫyy* in Keret.

From these comparisons, Ginsberg and Held argued that the Baal Cycle represents the oldest literary text, followed in age by Aqhat and Keret. This position at times seems an argument from silence, which in some cases may not be invalid. Perhaps some old grammatical features which appear only in the Baal Cycle, while not providing a date for the cycle, suggest its relative antiquity. The use of the longer alphabet was probably archaic for the date of the extant Baal Cycle. One may regard the attempt to preserve such an alphabet as archaizing in intention, but such a preservation may reflect the retention of a genuinely old practice. The same may be said for the lexicographical items attested only in the older literary texts. The inconsistent spellings of the same roots in the Baal Cycle would indicate that some of the spellings are genuinely archaic, as the newer spellings would have been eliminated if a conscious attempt at archaizing were at work.

In sum, the indicative verbal system of all the three major literary texts appears quite archaic compared to the prose texts, and some items of phonology, morphology and vocabulary may suggest that the Baal Cycle is the most archaic of all three of the major Ugaritic literary texts. Given the apparently long development of the Baal Cycle, it is also possible that some of its sections were composed after Aqhat or Keret, but many elements of the Baal Cycle appear to be older.

Interpretations of the Baal Cycle

Six and a half decades of Ugaritic studies have witnessed numerous views of the Baal Cycle which in the words of Walls (1992:185) "remains largely impervious to comprehensive interpretation."

Approaches to the cycle include seasonal and ritual interpretations, historical and political views, and cosmogonic theories. These views have been prominent for decades and continue to exert considerable influence on how the Baal Cycle is understood. They have also guided the interpretation of details in the Baal Cycle. Each one illuminates various aspects of the Baal Cycle and each has significantly advanced its understanding as a whole. Indeed, the most serious interpretations offer profound syntheses integrating the themes of kingship, temple building and divine conflict within the Baal Cycle.[112]

It should be observed at the outset that virtually all interpreters agree that the Baal Cycle narrates a basic story of conflict and resolution.[113] On one side of the Baal Cycle stands Baal, the source of life in the cosmos, and on the other side are Yamm ("Sea") and Mot ("Death"), the sources of destruction and death in the universe. Yamm embodies the chaos that threatens the life of the world. Mot is Death incarnate. The struggle between Baal and his opponents represents the conflict between life and death. The building of Baal's house represents the victory of life over chaos. Baal's final meeting with Mot in KTU 1.6 VI celebrates life's overcoming of death.

Scholars also recognize the royal nature of the conflict and resolution (Smith 1986b:322). Baal's battles with Yamm and Mot are cast in terms of kingship in KTU 1.1 IV 24-25, 1.2 IV 10, 32, 1.6 V 5-6, and 1.6 VI 28-29, 33-35. Likewise, Yamm's epithet, *ʾadn*, "lord," indicates his royal character. Baal is described as Yamm's "servant" (*ʿbd*), which reflects Baal's subservience, much as one monarch subservient to a second referred to himself as *ʿbd*, "servant" (Greenfield 1967:117; Fensham 1979a:272-273). Yamm's title, *ṯpṭ*, "judge," reflects a function of kingship.[114] Baal and Mot are struggling for *mṯpṭ*, "rule," also a royal quality (Cazelles 1984:177-182). The titles of Yamm and Mot, *ydd* and *mdd*, "beloved," may be royal titles (*Thespis* 125). Wyatt (1985:117-125)

---

[112] Professors F.M. Cross and L. Boadt (personal communications) rightly criticize the survey of Smith (1986b:313-39) for construing too narrowly the interpretation of some scholars whose views combine a number of approaches. For an older survey, see Kapelrud 1952:13-27.

[113] *GA* 174-177; cf. *CMHE* 116, 120, 149; 156; *MLC* 143-153; Margalit 1980:202-205. In a more comparative vein, see Stannard 1992:227-53, 285-86, 295-96.

[114] Gevirtz 1980:61-66; Fensham 1984:65; Muntingh 1984:7-8; cf. Stol 1972.

suggests that these titles point to these two gods as the blood princes of El who were expected to succeed him as monarch. Scholars have noted that Baal's palace perhaps holds a political significance akin to the temple of Solomon (*SPUMB* 59-61). In numerous ways, the Baal Cycle alludes to the royal nature of the struggle between Baal and his adversaries, Yamm and Mot. The Baal Cycle concerns the process of recognition that Baal wins for his own kingship through his battles against Yamm and Mot and through his acquisition of a palace.

Given the general acceptance of the royal character of the Baal Cycle, various approaches have been proposed to explore its underlying meaning. These views are addressed in the following order corresponding to their relative appearance over the history of the Baal Cycle's interpretation: (1) Ritual and Seasonal Theories; (2) Cosmogonic Interpretations; and (3) Historical and Political Views. A synthesis of these views is offered in (4) The Limited Exaltation of Baal.

1. Ritual and Seasonal Theories

Since the decipherment of the Baal Cycle, Baal's conflicts with Yamm and Mot as well as his palace have received ritual explanations. Virolleaud, Dussaud, Gaster, Hvidberg, Gray, de Moor (*SPUMB* 9-24), Schaeffer-Forrer (1979:42-43) and Yon (1989) have articulated ritual theories involving most or all of the Baal Cycle. In the formulation of the ritual interpretation's most significant proponent, Gaster (*Thespis* 17, 19, 24-25; cf. *UL* 185-186),

> seasonal rituals are accompanied by *myths* which are designed to present the purely functional acts in terms of ideal and durative situations. The interpenetration of the myth and ritual creates *drama*... The texts revolve around different elements of the primitive Seasonal pattern, some of them concentrating on the ritual combat, others on the eclipse and renewal of kingship, and others again on the disappearance and restoration of the genius of topocosmic vitality ... myth is not... a mere outgrowth of ritual, an artistic or literary interpretation imposed later upon sacral acts; nor is it merely... the spoken correlative of "things done." Rather, it is the expression of a parallel aspect inherent in them from the beginning; and its function within the scheme of the Seasonal Pattern is to translate the punctual into terms of the durative, the real into those of the ideal.

According to Gaster (*Thespis* 124-125), the proper names of the major deities reflect their roles in the Baal Cycle. The "land of

Baal'' refers to soil watered by rain in Arabic.[115] Yamm, literally ''sea,'' embraces the seas, lakes, rivers ''and other inland expanses of water,'' while Mot, meaning, ''death,'' is the god of all that lacks vitality or life, as reflected by Arabic *mawat*, ''dead soil which remains arid and infertile.'' Each deity was sovereign over his own domain.

Gaster's theory involves ritual drama. Baal's fight against Yamm mirrors the cosmogonic battle with the ''dragon'' (or ''monster'') (*Thespis* 128-129). The house of Baal is the durative counterpart of the annual installation of the king. The Baal-Mot conflict introduces the motif of the dying and reviving god. The end of the cycle describes ritual wailing for Baal (''a projection of the seasonal ululations''), usurpation by Athtar (''a projection of the interrex''), the restoration of Baal through Shapshu (''a projection of the solar aspects of the seasonal festival''), and the final defeat of Mot (''a projection of the Ritual Combat''). Gaster (*Thespis* 129) concludes:

> *On both internal and external grounds, therefore, there is every reason for seeing in the Canaanite* Poem of Baal *a seasonal myth based on the Traditional drama of the autumn festival.* (Gaster's italics)

In his study of the ritual underpinnings of myths, Gaster (*Thespis* 18) groups features common to myths from various areas: ''What is at issue is, in fact, the history of the literary genre as a whole, not of the particular compositions.''

The explanatory power of Gaster's interpretation was immense. It achieved a total synthesis tying cosmic and royal dimensions of the Baal Cycle to the human and seasonal realities facing Ugaritic society. Gaster's ritual approach was paralleled or followed in great part in the works of Hvidberg (1938), Dussaud (1941), Engnell (1943), Kapelrud (1952), Gray (*LC*[1]; *LC*[2]; 1979:324), de Moor (*SPUMB*), van Zijl (*Baal*), Toombs (1983) and others (see *SPUMB* 8-24).

Many criticisms of Gaster's work on the Baal Cycle have been voiced and may be rehearsed in brief.[116] First, Gaster's approach assumes elements unattested in the Baal Cycle, but based on other literatures (such as the equation of Yamm with ''the Dragon''). Second, his theory offers unsupported speculations about some

---

[115] Cf. b. Taʿan. 6b: *mṭr ʾbʿl dʾrʿ*, noted by Ginsberg 1935:328.

[116] See *SPUMB* 13-19, 30; Robertson 1982:335. For more general criticisms of the myth and ritual approach, see Fontenrose 1966; Kirk 1970: 12-28; Buckert 1979:35-39, 56-58.

texts. According to Gaster, KTU 1.4 VIII leads to the banishment of Mot, but the text says nothing of the kind, and it apparently issues in a very different outcome, namely Mot's challenge to Baal in KTU 1.5 I. Third, Gaster's view of the seasons reverses the order of the texts. KTU 1.2 and 1.4 are autumnal, KTU 1.5-6 I summer, KTU 1.6 II-VI late summer, 1.1 III is a subsidiary text corresponding to the fall (*Thespis* 128-129; cf. *SPUMB* 19). Even if these correlations were correct, such an approach does not explain the texts in their present order. Fourth, the Baal Cycle purportedly reflects the autumnal New Year festival, and yet none of the extant ritual or administrative texts attest to such a festival.[117] There are additional difficulties in using either a hypothetical biblical New Year Festival or the Babylonian Akitu festival as supporting evidence.[118] Even those who otherwise maintain ritual interpretations, such as de Moor (*SPUMB* 162-163) and Robertson (1982:319, 335), dissent from this cornerstone of Gaster's reconstruction. Fifth, the explicit terms of the narrative are rarely either ritual or seasonal in character. The themes of the cycle bear out this point: in KTU 1.2 I and 1.2 IV Yamm demands not water or flooding, but kingship. As Loewenstamm (*CS* 350) observed, "it is just the name of the god of the sea which draws the reader's attention to the connection with the cosmic element of the water." Both the characters and the plot are removed from a purely seasonal setting. The cycle sometimes draws on seasonal and ritual elements for descriptions, but this usage need not indicate a seasonal or ritual setting for the cycle. Sixth, Gaster's comparative framework tends to diminish the historical dimensions of the material.[119] Finally, Gaster's view implies that the Baal temple excavation at Ras Shamra is the temple mentioned in the Baal Cycle (*Thespis* 128-129; cf. Schaeffer 1939:68). This view continues to be expressed,[120] but without much textual support. As Cunchil-

[118] See Smith 1986b:330-31. For cautions against comparing the Akitu festival, see Lambert 1968b:106-08; Nakata 1968; cf. J. Z. Smith 1982:90-96. For a balanced comparison of the Akitu festival and purported biblical evidence for an autumnal New Year festival, see van der Toorn 1991a.

[119] On the comparative method, see the instructive remarks of J. Z. Smith 1982:22-35.

[120] Kapelrud 1952:17-18, 87; *SPUMB* 59-61; Miller 1981:126; see Clifford 1979:145; 1984:198.

los (1984-85:232) stresses, the text of the Baal Cycle explicitly locates this palace on Mount Sapan, which lies to the north of the city of Ugarit. Correlating the palace of Baal in the Baal Cycle with the so-called temple of Baal excavated in Ras Shamra would assume that the cycle's audience equated the two structures.[121]

A number of points may be offered in Gaster's defense. First, the hypothetical New Year festival has yet to be disproved. While the evidence does not support Gaster's reconstruction of a New Year festival, there is at present little evidence against this view. The rejection or acceptance of Gaster's view relies on an argument from silence. Second, Gaster recognized the "depth dimension" of the language of the cycle; the cycle presupposed on the part of its audience aspects of religious thought barely accessible to modern commentators. While interpreters may have some idea of the cycle's ancient significance thanks to data gleaned from other Ugaritic and Near Eastern texts, a great deal of information now unaccessible to modern interpreters was assumed on the part of the cycle's audience. Third, his interpretation of the seasons in the Baal Cycle represents a natural reading of the texts, for both the Baal-Yamm and Baal-Mot conflicts lead up to the autumn rains. This view would sugggest that the cycle is not arranged according to the order of a single annual cycle. Finally, despite the general lack of evidence, it remains theoretically possible that parts or all of the Baal Cycle were recited in ritual form.[122] In sum, the ritual underpinnings presupposed by Gaster lack for evidence both inside and outside of the Baal Cycle.

Following the lead of Gaster, de Moor has developed most fully the seasonal dimension of the ritual approach. While ritual interpretations presuppose a correlation between the Baal Cycle and the annual cycle of weather on the Syrian coast, de Moor's theory represents the most comprehensive effort to coordinate the events reported in the Baal Cycle with the weather of the Syrian coastal climate within a single annual cycle (see also Yon 1989). The interpretation assumes that the rites or cultic acts celebrating the divine deeds reflect the vicissitudes of the seasons (*SPUMB* 61, 67):

---

[121] As well as the gods, *bʿl ʾugrt* and *bʿl ṣpn*. This equation seems quite likely, although the two gods are distinguished in ritual texts (e.g., KTU 1.109.9, 16).

[122] For possible evidence, see above pp. 32-33.

> The myth of Baʿlu is a combination of a nature-myth and a cult-myth because it wanted to explain the origin of the alternation of the seasons as well as the origin of the Ugaritic cult which was largely based on rites determined by the same seasons.
>
> In accordance with the principle laid down in the preceding chapters I shall now try to demonstrate that the Ugaritic Myth of Baʿlu contains a large number of references to datable seasonal events that follow the course of Ugaritic cultic year which coincided with the Syrian agroclimatic year.

The seasonal interpretation correlates the three phenomena of seasons, rites, and myths.

De Moor situates passages in the cycle in specific ritual and seasonal settings. He treats thirty-seven passages that constitute a sampling sufficient in his opinion to demonstrate his theory. Perhaps he made his most fundamental correlation in connecting KTU 1.3, which he considers the beginning of the cycle, and the end of the cycle, 1.6, to the beginning and end of the year during the autumn. As support de Moor (*SPUMB* 42-43; cf. 1987:4 n. 7) compares KTU 1.17 VI 28-33 with KTU 1.3 I. KTU 1.17 VI 28-33 alludes to resurrection involving Baal followed by a feast with music; under one view the passage includes a singer called *nʿm*. De Moor locates in this setting both 1.3 I 18-22a, which narrates *nʿm*'s musical entertainment at a feast for Baal, and 1.6 III which describes El's vision of Baal's return to life. KTU 1.17 VI 28-33 would then suggest a religious background shared by KTU 1.3 I and 1.6 III. As noted by de Moor and others, KTU 1.3 I 18-22a and 1.17 VI 28-33 share common wording and ideas. KTU 1.3 I 18-22a is translated by de Moor (1988:4):

qm ybd wyšr	He rose, improvised a poem and sang,
mṣltm bd nʿm	The gracious lad (held) the cymbals in his hands,
yšr ǵzr ṯb ql	The sweet-voiced youth sang
ʿl bʿl bṣrrt ṣpn	Before Baʿlu in the heights of Sapanu.

KTU 1.17 VI 28-33 celebrates the return to life and divine celebration[123]:

ʾašsprk ʿm bʿl šnt	I will make you count the years with Baʿlu,
ʿm bn ʾil tspr yrḫm	With the sons[124] of El you will count the months!

---

[123] De Moor (1987:238-39; *SPUMB* 42) and Spronk (1986:151-61) take Baal as the subject of *yḫwy* and *ḫwy*.

[124] Either singular or plural is theoretically possible. If the former, the reference may be to Baal as suggested by the parallelism, as Professor Nicholas Wyatt re-

kbʿl kyḥwy yʿšr	Like Baal when he is revived,[125] he is served -
ḥwy yʿšr wyšqynh	(When) he is revived, one serves and gives him drink,
ybd wyšr ʿlh	Chants and sings before him -
nʿmn [dy?]ʿnynn	A gracious one (?)[126] [who is?] his servant (?),[127]
ʾap ʾank ʾaḥwy ʾaqht [ǵz]r	So I too can revive Aqhat [the her]o!

According to de Moor the correlation between 1.17 VI 28-33 on the one hand, and 1.3 I 18-22a and 1.6 III on the other hand

> proves conclusively that the events of CTA 6 were followed very shortly by those of CTA 3. This is possible only if we assume a cycle ending with CTA 6 and beginning with CTA 3. It is impossible, however, to reconcile CTA 17:VI.28ss with a series consisting of the sequence, CTA 1-2-3-4-5-6.

Hence for de Moor 1.3 begins the cycle and 1.6 ends it.

In favor of de Moor's thesis, KTU 1.4 V 6-9 and KTU 1.4 VII 25-31 clearly refer to the rains of Baal that rejuvenate the world. In

---

minds me. The phrase is elsewhere, however, stereotypical for the deities of the Ugaritic pantheon.

[125] Literally, "is made to live" (i.e., *D*-stem passive). De Moor and Spronk takes these forms as active transitive and assume that Baal is the subject, but the absence of an object does not militate in favor of this view (van der Toorn 1991b:46). Van der Toorn's translation of the occurences of **ḥwy*, "he comes to life" is unlikely, since, as Marcus (1972) shows, **ḥwy* in these cases is a *D*-stem (see the Ugaritic *D*-stem infinitive syllabic form *ḫu-PI-ú* = /huwwû/ in Huehnergard 1987b:123). The translation, "comes to life," would not appear to be within the usage of the *D*-stem of this verb. Like other commentators van der Toorn deletes *ḥwy* (before *yʿšr*) due to dittography. The line-length in the parallel line suggests retaining the word as it has been here.

[126] Given the suitability of the context, it is difficult not to consider Cassuto's view (*GA* 111-12) that Ug *nʿmn* is related to BH **nʿm*, "to sing, chant." For this meaning Cassuto cites 2 Sam 23:1, Pss 81:3, 135:3 and 147:1. Sarna 1993:213 n. 8 adds Ben Sira 45:9 and this meaning in various forms of the root in rabbinic Hebrew. The Arabic cognates constitute the obvious difficulty for this view of Ugaritic *nʿm*. Arabic **nʿm* means "to live in comfort , to enjoy"; related are the nouns *niʿma*, "benefit, blessing favor, grace, *nuʿma*, "favor, good will, grace," *nuʿma*, "happiness," and particles *naʿm*, "yes" and *niʿma* "what a perfect, wonderful, truly" (Wehr 980). Arabic **ngm* means to "hum a tune, sing" with the cognate nouns *nagm* and *naġam*, "tune, air, melody" as well as *nagma*, "tone, sound, musical note" (Wehr 981). Fronzaroli (1955:19) notes some cases of Proto-Semitic **ǵ* > Ugaritic ʿ, but does not discuss Ugaritic *nʿm* in this connection. Cf. *CMHE* 185 n. 169.

[127] The reconstruction *[dy]ʿnynn* is suggested by Spronk. For **ʿny* in this sense, see KAI 202:2 discussed below p. 294. Pope (1981:162) renders: "One sings and chants before him/ Sweetly [and they] respond." Given the lacuna, any suggestion remains most tentative.

the first of these passages, Athirat exclaims these words when El finally grants permission for the building of Baal's house:

wn ʾap ʿdn mṯrh bʿl	And now may Baal also luxuriate with his rain,
yʿdn ʿdn *ṯrt bglṯ	May he luxuriate luxuriantly with abundant water in a downpour (?).[128]
w⟨yʔ⟩tn qlh bʿrpt	And may he give his thunder in the clouds,
šrh lʾarṣ brqm	May he flash to the earth lightning.

When the house is completed, a window is installed, and from it Baal utters his holy voice in KTU 1.4 VII 25-31:

yptḥ ḫln bbhtm	He opens a window in the house,
ʾurbt bqrb ḫk[lm]	A window in the midst of the pala[ce].
[yp]tḥ bʿl bdqt [ʿrp]t	Baal open[s] a break in the [clou]ds,
qlh qdš b[ʿl y]tn	Ba[al g]ives his holy voice
yṯny bʿl ṣ[ʾat šʔ]pth	Baal repeats the is[sue of?] his [liʔ]ps,
qlh q[dš tʔ]r ʾarṣ	His ho[ly?] voice, the earth [shaʔ]kes.

Few scholars, if any, would deny that these two passages refer to Baal's luxuriant rains that fertilize the earth.

De Moor's interpretation has been criticized on a number of grounds. First, athough de Moor (*SPUMB* 150, 162-163) assigns the manifestation of Baal's thunder and rain in these passages to the spring, a number of scholars who espoused a seasonal interpretation took these passages to refer to the fall rains.[129] It was precisely this type of ambiguity for the apparently clear references to the weather that led to criticism of de Moor's seasonal interpretation. Second, the few passages that explicitly refer to the weather constitute a limited base of data. The more ambiguous references to the seasons as well as to the many passages in the Baal Cycle that make no reference to weather further complicate de Moor's hypothesis. In several instances Grabbe (1976:57-63) criticizes de Moor's assignment of specific non-meteorological phenomena to particular times of the year. Third, de Moor is faulted for relying too heavily on broken passages to sustain some important correlations between the text and the seasonal pattern. He interprets some Ugaritic words in relation to the seasons although the same words are susceptible also to non-meteorological interpretations. According to Grabbe, these criticisms affect the interpretation of twenty of the thirty-seven texts that de Moor analyzes. These criticisms do not disprove the idea of a seasonal pattern in the Baal Cycle. They demonstrate, rather, the

[129] Dussaud 1932:298-300; *Thespis* 195; Hvidberg 1962:51-55; *LC*[1] 70.

difficulties in sustaining a comprehensive seasonal interpretation. Fourth, the Baal Cycle has few correspondences with Ugaritic ritual texts,[130] and weather plays little explicit role in other Ugaritic mythological or ritual texts.

Fifth, Gordon argues that the seven-year drought caused by Baal's death in KTU 1.6 V 7-9 directly contradicts a one-year seasonal interpretation.[131] If the seven-year period is simply a metaphor for "a long time" as de Moor (*SPUMB* 238) argues, then other allusions to weather in the Baal Cycle may be metaphorical as well. Gordon (1977:103) also notes that the summer is not the time of utter sterility, as de Moor's seasonal interpretation apparently suggests. Gordon (*UT* 19.37) argues:

> The fact that Baʿl, as a god of fertility-giving water, is associated with the dew as well as rain in 1 Aqht:44 rules out any seasonal interpretation of his role. . . Dew in Canaan is a round-the-year phenomenon. It condenses most when the rainfall is least. . . Dew is connected with fertility (e.g., Gen 27:28 and ʿnt: II: 39. . .) quite like rain. For the concept that dew in summer takes the place of rain in winter, note the Jewish prayer for dew which states *lk lšlwm gšm wbʾw bšlwm ṭl* 'depart in peace, O rain, and come in peace, O dew' anticipating the rainy season and start of the dewy summer.

The Gezer Calendar (KAI 182; *ANET*, 320), and Amos 7-8 (Talmon 1963) attest to summer fertility as well.

Finally, de Moor and Spronk (1986:152-54) assume that in 1.17 VI 28-33 Anat draws the analogy between Baal and herself, but van der Toorn (1991b:46) suggests that Anat draws the analogy between Baal and Aqhat: in exchange for his bow, Anat promises to give to Aqhat the return to life commonly associated with Baal. Under this view Baal is the recipient of resurrection and not the cause of others' resurrection as envisioned by de Moor. Hence the role of Baal's resurrection remains unclear.

Although other criticisms of de Moor's seasonal interpretation have been made,[132] his treatment represents an important contri-

bution in a number of respects. First of all, its comprehensiveness exceeded that of its predecessors. Second, it is the only major seasonal interpretation that does not rearrange the sequence of KTU 1.4-1.6.[133] Third, de Moor's study showed the depth of seasonal information embedded in the cycle as well as the limits of the seasonal approach.

Fourth, de Moor's argument about the relationship between KTU 1.17 VI and KTU 1.3 I is fundamentally correct insofar as the two passages appear to be closely related. That this relationship proves that KTU 1.3-1.1-1.2-1.4-1.5-1.6 constitutes the order of tablets is subject to dispute, as it assumes a linear reading within the scheme of a single year. Following Gaster's insight that two sections of the cycle culminate in the autumn, the three sections of the cycle may be viewed as parallel, each evoking phenomena associated with the same time of year, specifically the early autumn. KTU 1.1-1.3 I, especially Baal's battle with Yamm, evokes the arrival of Baal's rains in the fall. KTU 1.3 II-1.4 VII conjures up the image of the autumnal inauguration of a temple and the rains it is to provide (cf. 1 Kgs 8:36[134]). KTU 1.4 VIII-1.6 suggests the end of the period of the summer, perhaps manifest in Mot as the personified scirocco or east wind, and the return of the Cloud-rider to life (so de Moor 1987:97 n. 470; Yon 1989:462). Each of these sections evokes a meteorological wonder based on Baal's powers, and each one ends in the acknowledgement of Baal's kingship (see Rummel, *RSP III* 234-35). De Moor's own arguments for a single annual cycle in the Baal Cycle provide the basis for seeing autumnal imagery in each of the three major sections of the cycle. De Moor dismissed the possible autumn background of Baal's manifestation of rain in KTU 1.4 VII, because he assumed a single annual cycle (*SPUMB* 162 n. 1). De Moor (1987:97 n. 470; *SPUMB* 238-39) argues, nonetheless, that the battle between Baal and Mot was inspired by the autumn setting: "The ensuing fight is the mythological representation of the 'fight' between hot dry east winds and moist west winds in September." Although de Moor rejects an autumnal setting for either Baal's clash with Yamm in 1.2 IV or his meteorological manifestation in 1.4 VII, the background which he assigns to 1.5-1.6 may ap-

---

[133] To be sure, de Moor's identification of KTU 1.3 as the first tablet of the Baal Cycle has not met with acceptance; see above p. 7.

[134] Kapelrud 1952:29-30;1963; Fisher, *RSP III* 284; Hurowitz 1983.

ply as well to these sections. It may be argued that his analysis, like the work of Gaster before him, has provided the evidence and general direction for viewing the three major sections as drawing on meteorological imagery of the early autumn.

Some subsequent ritual and seasonal interpretations have been founded on the basis of parallels between the Baal Cycle and traditions associated with Tammuz and Adonis.[135] Robertson (1982) interprets the Baal Cycle as the outgrowth of rituals which he detects in the Adonis traditions. Robertson reconstructs an ancient ritual background by using *aitia* about Adonis, that is, the classical explanations given for the traditions associated with him. Robertson extends this approach to the Baal Cycle. For him, the Baal Cycle contains reflexes of Baal/Adonis rituals: the winnowing of Mot in KTU 1.6 II corresponds to a threshing rite of the gardens of Adonis, which in the summer flourished, only then to expire.[136] Robertson's interpretation of the Baal Cycle does not account for both the differences and similarities between the Baal Cycle and the Adonis traditions (cf. Loretz 1980). The application of the Greek *aitia* and their *Sitz im Leben* to the Ugaritic myths is assumed and never demonstrated. Robertson's approach (1982:315-320, 339) also reverses the sequence of events in the Baal Cycle in some cases. His perspective is atomistic, as it reduces the episodes of the Baal Cycle to numerous units reflecting rituals. Robertson does not address the numerous chronological and thematic differences between the Baal and Adonis traditions. Robertson's theory about the comparison between 1.6 II and the death of Adonis inherent involves a further difficulty: it would be expected that Adonis' counterpart in the Ugaritic tradition, Baal, would be the victim of winnowing and grinding. However, it is Mot who is subject to this fate in the Baal Cycle.

The problem of whether Baal is "a dying and rising god" affects Robertson's reasoning. It has been long assumed that Baal is a "dying and rising god" like Tammuz, Adonis and Osiris, and this view continues to be expressed (Mettinger 1988:77, 83-84; 1990:401 n. 44; Day 1992:549).[137] A number of scholars, including Lambrechts

---

[135] See *Thespis* 129; Ribichini 1981; see also Loretz 1980.

[136] On this point Robertson (1982: 347) incorrectly states that "Everyone agrees that the manner of [Mot's] death reflects the threshing and the winnowing of grain" (see Healey 1983a:251).

[137] See the survey and critical discussion of Barstad 1984:84 n. 45, 148-51.

(1952, 1955, 1967), Buckert (1979:100-1), Barstad (1984:150), J. Z. Smith (1987), Redford (1992:43-44) and Walls (1992:5-6, 68), question the category of the "dying and rising god" and the textual foundations on which it was based. Buckert's comments (1979:101) are characteristic of the criticisms:

> The evidence for resurrection is late and tenuous in the case of Adonis, and practically non-existent in the case of Attis; not even Osiris returns to real life, but instead attains transcendant life beyond death.[138]

In view of the many difficulties, it is presently impossible to accept a general category of a "dying and rising god" in the ancient Mediterranean and Levantine world. Indeed, the similarities need not be explained on the basis of a shared ritual background. Redford (1992:44) argues that some similarities may be due not to a common type of god involved, but to a history of shared plot structures and roles. Some Adonis traditions may be related to the Late Bronze Age Ugaritic traditions of Baal. For example, KTU 1.12 represents the clearest Ugaritic antecedent to the classical tradition about the boar goring Adonis (Redford 1990:828). The relationship may, however, be entirely literary in character.

A general literary approach to the similarities may also help to explain the many, important differences between Baal and the so-called "dying and rising" gods. Baal is a high god, unlike Tammuz and Adonis. Furthermore, Baal shows major meteorological functions unlike Tammuz and Adonis. Indeed, it might be argued that Baal shares less with Tammuz and Adonis than with the Hittite disappearing gods, the Storm-god and his son, Telepinu (Kapelrud 1952:38-39; *Thespis* 215; Parker 1989a:295-95; 1989b:186-87). The disappearance of the Storm-god causes the withering of vegetation (Hoffner 1990:20-22). Similarly, Telepinu's absence on a journey and sleep causes the destruction of vegetation and his return restores fertility (*ANET* 126-27; Hoffner 1990:14-17). Baal's absence likewise threatens vegetation and his return fructifies the world, as El foresees in a vision in 1.6 III 1-13 (Barstad 1984:84 n. 45). Divine absence and sleep are two of the taunts which Elijah directs against the prophets of Baal in 1 Kgs 18:27 according to Parker (1989a:

---

[138] Buckert goes on to question the dying and rising of Dumuzi, but the case can evidently be made. See Kramer 1966:31; Scurlock 1992.

295-96): "But he may be in a conversation, he may be detained, *or he may be on a journey, or perhaps he is asleep and will wake up.*" (NJPS; my italics).[139] This source does not, however, mention Baal's death. Indeed, it may be no coincidence that although Philo of Byblos' *Phoenician History*, the longest late classical source for West Semitic religion, mentions Adonis,[140] it also shows no evidence of Baal as "a dying and rising god."

Finally, some of the language used to establish Baal's so-called death and resurrection in the Baal Cycle has been interpeted in other ways. The attempt to take *ḥy ʾalʾiyn bʿl* (KTU 1.6 I 2, 8, 20) as a reference to Baal's resurrection has scant support. Barstad (1984: 150-51) comments: "The usefulness, and even possibility, of isolating one formula like *ḥy aliyn bʿl* and giving it a content of such wide-reaching consequences as has been done is dubious, to say the least." The attempt to view takes the BH expression, "the living god" (*ʾĕlōhîm ḥayyîm*) as an anti-Baal title because Baal is a "dying and rising" god (Mettinger 1987:82-91) is equally problematic and other views are plausible. Halpern (1991:73), for example, prefers to read this biblical title as a polemic against the cult devoted to deceased ancestors.

The Ugaritic text sometimes invoked as support for Baal as a "dying and rising god" is 1.17 VI 30 where Baal appears to "be brought to life (*yḥwy*)."[141] The contacts between this text and 1.3 I indicate a relationship with the notion invoked in 1.17 V 28-33, but it is clear from the many differences that the Baal Cycle does not explicitly show the idea of "being made alive." Furthermore, the relationship between 1.3 I and 1.17 V 28-33 may be a literary one and not a ritualistic one: the first may re-use an old plot structure cited explicitly by 1.17 V 28-33. As for the language of Baal's death, this does appear in the Baal Cycle (1.5 VI 8, 23; 1.6 I 6, 41). Baal descends to the underworld (1.5 V 14-15) and Mot attacks and con-

---

[139] The first three verbs in this verse have been interpreted quite differently, however, and may be irrelevant to the point at hand. The first three verbs are interpreted in scatological terms by Young 1993:172-73. This issue does not change the plausibility of the comparison between the last two verbs and the notion of Telepinu's sleep.

[140] PE 1.10.29; Attridge and Oden 1981:54-55, 91 n. 123.

[141] The form is *D*-stem 3 masc. sg. impf. It remains a controverted point as to whether the form is active or passive (see above p. 65). For the proponents of the active voice, the form implies not only Baal's resurrection, but also Baal's ability to make humans (primarily kings) alive. The view is problematic, however.

sumes him (1.6 II 21-23). Moreover, one of his three "daughters" or "women" is Arsay, literally "Earthy," but plausibly "Netherworldly,"[142] given the equation of this goddess with Allatum (*UgV*:44-45),[143] an underworld figure in Mesopotamian myth.[144] As Pidray and Tallay, Baal's other two "women," seem connected with his meteorological functions, Arsay's characteristics might be taken as an indication of some chthonic aspect of Baal. Gaster (*Thespis* 156) argued that the imagery of Baal's death and return to life in the Baal Cycle was related to the seasonal imagery. This image may not derive from a specific ritualistic understanding of Baal as "a dying and rising god."[145] Rather, the notion of Baal's death may reflect the power of the storm eclipsed by the power of Death in the form of the east wind. Using this language for Baal's disappearance, perhaps like that of Telepinu, does not make Baal a "dying and rising god" like Adonis and Tammuz, but only a weather-god whose powers and presence wax and wane in language

---

[142] For Ugaritic *ʾarṣ* as both "earth" and underworld," see below p. 178 n. 118.

[143] Noted by *CMHE* 56 n. 49; *TO* 79. Equations do not always rest on a single characteristic, and perhaps in this case the basis for the equation is not the underworld. The other argument that Arsay is "Underworldly" derives from the equation drawn between her title *bt yʿbdr* interpreted as "daughter of wide world" (< Arb **wʿb*, be large, big" [Lane 2954] plus **dwr*, "circuit" [cf. Arb *madar*, "celestial orb" in Lane 931]; so *CML*[1] 165), and Akk *irṣitu rapaštu*, "broad land," a designation for the underworld (cf. Astour, *UgVI*, 13). Other views of *yʿbdr* have been proposed: "ampleness of flow," assuming Arb **wʿb* and **drr* (Lane 862-63; so *SPUMB* 84 n. 6; *CML*[2] 48 n. 8); "great rain," assuming Arb **wʿb* plus *badray*, "rain that is before...or in the first part of winter" (Lane 166; so Smith 1985:290). Either of these two derivations would assume a meteorological characteristic of Arsay in accordance with those of Pidray and Tallay. Finally, commentators observe that of Baal's three women, it is Arsay who does not descend to the Underworld with him in KTU 1. 5 V 10-11 (*CML*[2] 48 n. 8), the assumption being that as a netherworld figure, there is no point in describing her as descending to the Underworld. So Gibson (*CML*[2] 72 n. 5) following de Moor (*SPUMB* 83) construes this feature in meteorological terms: "her role is not affected by the summer drought."

[144] According to Lambert (1980b:64), this goddess may be the spouse of Alla who is "a dying god, a type of Tammuz." For Allatum, see also the treaty of Ramses II with Hattusilis (*ANET* 205). Emar 383.11' contains the phrase *^{d}Al-la-tu$_4$ ša kib-r[i]*, "Allatu de la ri[ve]."

[145] It is possible that Baal's apparent death and return to life is reflected in some biblical texts as argued by Mettinger and Day. According to Day, the imagery of death and resurrection of "a dying and rising fertility god" is reflected in Hos 5:12-6:3 and the parallel imagery of national death and resurrection in Hosea 13-14 should be read against this same background, as 13:1 mentions Baal. Whether or not a specific ritualistic notion of "dying and rising" inheres in these texts is a matter of presupposition.

reminiscent of the seasons. Given the difficulties with correlating at Ugarit rites and literary texts, and the numerous differences between these gods and Baal, it would appear unwarranted to assume that Baal is "a dying and rising god," at least not one like Adonis and Tammuz. The first millennium cult of Hadad-Rimmon might be invoked to support the notion of Baal-Hadad as "a dying and rising god," but this cult is poorly understood (Greenfield 1976), and it is possible that it was influenced secondarily by the cults of Adonis and/or Tammuz. In sum, Baal may have been thought to return to life in accordance with his meteorological character, and this return may have been formulated in literary terms possibly influenced by the Ugaritic royal cult of the dead. At the present state of knowledge[146] it would seem that Baal's return to life does not reflect a ritualistic concept of the Storm-god as a "dying and rising" god.[147]

Hvidberg-Hansen (1971) borrows Dussaud's ritualistic idea that the destruction of Mot in KTU 1.6 II (cf. 1.6 V) symbolizes the agricultural ritual of the sacrifice of the last sheaf (cf. Yon 1989:464). Healy (1983a:251) raises three criticisms of the theory espoused by Hvidberg-Hansen. First, Mot is alive soon after he has been killed. Second, the details of such rituals differ from any other evidence contained in the Ugaritic texts. Third, there is no evidence of such traditions of the last sheaf in ancient Syria or Palestine. The immediate narrative context of 1.6 II likewise militates against a ritual theory. Commenting on the consumption of Mot's limbs by birds in 1.6 II 36-37, Gibson (*CML*^{2} 7 n. 7) observes: "It is particularly difficult to see the point of this action for any agrarian rite." These problems illustrate that if 1.6 II drew on traditional sacrificial language known to its audience, it has rearranged this material to suit its own narrative ends in presenting Anat's destruction of Mot. The weapons which Anat uses to destroy Yamm apparently are specifically agricultural implements (Healey 1983a; 1983b; 1984a), and it would appear that the passage evokes realia of the agricultural world familiar to the ancient audience. Whether or not a specific ritual of the last sheaf also stands behind this description, the text does not correspond to a known Ugaritic ritual. Loewenstamm (1972:382) is

---

[146] In the second volume of this commentary I will return to the question of the similarities among Baal, Adonis and Dumuzi in greater detail.

[147] This direction of influence might underlie descriptions of Melqart's death which may draw on the Phoenician practice of cremation (Bonnet 1988:173; M. S. Smith and E. Bloch-Smith 1990:591).

critical of the approach represented in the work of Robertson and Hvidberg-Hansen: "Farfetched associations to heterogeneous sources are welded in order to ascribe to the killing of Mot the sense of a ceremony in a fertilizing rite, i.e. a meaning thoroughly different from that of a punishment inflicted on a hated enemy." It may be said at most that the passage may draw on agricultural language in order to heighten the dramatic effect of Mot's destruction.

Livingstone (1986:162-64) provides further comparative evidence for Hvidberg-Hansen's view by noting the motif in two other texts. In the neo-Assyrian text known as "Marduk's Ordeal" (Livingstone 1986:207-53), the abundance of grain following the harvest in the month of Nisan is explained as the result of a god, probably Marduk, having been taken as prisoner (Livingstone 1986:163). Livingstone (1986:162) also cites the identification of Dumuzi with grain among the Sabeans of Harran in an Arabic text dating to the middle of the first millennium:

> In the middle of the month is the festival of the *būqāt*, that is, of the wailing women. It is also called Ta'uz, as it is the festival performed for the god Ta'uz. The women lament for him, and that his master murdered him, ground his bones in a mill and winnowed them in the wind. The women do not eat anything ground in a mill, but only moistened wheat, chick pea paste, dates, raisins, and similar foods. On the twenty-seventh of the month the men performed the mystery of the North for the jinn, satans and deities. They make many loaves of bread cooked under the cinders, out of flour, terebinth, "*mais*" raisins, and shelled walnuts, in the manner made by the shepherds. They sacrificially slit the throats of the nine lambs to Hāmān, the chief, the king of the gods, and there are sacrifices to Namriyyā. On this day the chief takes from every man among them two dirhams, and they eat and drink.

Following Ebeling and Jacobsen, Livingstone takes this text as referring to a myth in which the death of the god Dumuzi is understood in the processes of winnowing and grinding grain. Livingstone's discussion shows both the range of attested material for this ritual language and restraint in suggesting no more than that the Baal Cycle has used this imagery in 1.6 II.

In retrospect, the emphasis of the seasonal approach, like that of the ritual approach, falls heavily on explaining the setting and therefore the origins of the cycle. Neither seasonal nor ritual interpretations place as much stress on what is unique to the Baal Cycle.

Rather, by their very character they tend to focus on what the Baal Cycle shares with other compositions thought to belong to the same "type" or genre. In sum, although seasonal or ritual settings or patterns explain neither the overall diachronic formation nor the larger synchronic narrative of the Baal Cycle, it would appear the Baal Cycle used and assumed a wide range of seasonal and ritual information on the part of its audience.

2. Cosmogonic Interpretations

As noted at the outset of this survey, many interpretations of the Baal Cycle include the observation that on one side of the Baal Cycle stands Baal, the source of life in the cosmos, and on the other side are Yamm ("Sea") and Mot ("Death"), the sources of destruction and death in the universe. This approach may be called in most general terms the cosmogonic view, as it interprets the Baal Cycle primarily in terms of the conflict of the major figures, Baal, Yamm and Mot which issues in the Storm-god's divine kingship. This view has been expressed by numerous scholars, especially Mowinckel (1962:1.134), Cassuto (*GA* 174-77), Fisher, Cross and Clifford. Like these scholars, Margalit (1980:202) offers the view that 1.5-1.6 reflects the struggle between life and death:

> For like it or not, Death is the ultimate ruler of all that lives. However Mot has a very serious problem, to wit, guaranteeing his source of supply. Stated differently: Mot's enormous strength, symbolized by his unlimited ability to take away life, is circumscribed by his inability to grant or restore it. In order to ensure his supply of food, Mot needs Baal—the agency of life-giving precipitation, especially of the winter rains.

While Margalit's remarks parallel Cassuto's emphasisis on the inexorable struggle between life and death, Margalit further notes their interdependence. Similarly, for the disciple of Carl Jung, Erich Neumann (1970:97), Baal and Mot are twins reflecting two aspects of the same cosmic reality. Neumann identified the two gods as expressions of psychological development. Recent descriptions of the Baal Cycle by folklorists comport with the cosmogonic interpretation. Jason (1977:32) classifies the Baal Cycle (as well as Enuma Elish) in the following terms: "In the mythic epic positive mythic forces (deities) create the order of the world in a struggle with negative mythic forces. The struggle has a strong element of physical warfare." This ethnopoetic classification and description conforms

to the cosmogonic interpretation of the cycle. The "mythic epic" also renders Baal as a divine, monarchical hero. Like the work of Cassuto, Fisher, Cross and Clifford, the ethnopoetic classification of "mythic epic" also points to the underlying unity connecting the cosmogonic and royal perspectives on the cycle.

The basic view of the cosmogonic approach is well-founded. While not allies, Yamm and Mot may be seen as comparable forces treated as rivals to Baal for divine kingship, albeit not simultaneously.[148] Other Ugaritic texts would appear to support this view of Yamm and Mot. In KTU 1.2 IV 3 and KTU 1.14 I 19-20, Yamm is characterized as a source of destruction. One Ugaritic letter, KTU 2.10.11-14 refers to Mot to describe the speaker's difficult circumstances.[149] Pardee renders these lines:

(11) wyd	Also, the "hand
(12) ʾilm p kmtm	of a god" is here, for Death (here)
(13) ʿz mʾid	is very strong[150]

Another Ugaritic text, KTU 1.127.29-31, describes Mot as one who attacks humanity (Rainey 1973:51):

(29) hm qrt tʾuḫd hm mt yʿl bnš
(30) bt bn bnš yqḥ ʿz
(31) wyḥdy mrḥqm

(29) If the city is (has been) taken, (or) if Mot should attack man,
(30) the house of the son(s) of man(kind) will (should) take a goat
(31) and will (should) look to the future (lit. afar).[151]

Viewing Yamm and Mot as comparable forces rivaling Baal suits Cross' view of the Baal-Yamm story and the Baal-Mot narrative as variants forms or "alloforms." In short, on one level Baal embodies life for the cosmos, while Yamm and Mot are characters of chaos and death.

---

[148] Dividing the characters of the Baal Cycle into forces of fertility and powers of destruction has two limitations. First, as Loewenstamm (*CS* 350) has observed, the battle of Baal and Yamm would never have been interpreted as a battle of order over chaos, except that the name of Yamm ("Sea") suggests such a possibility. The names of the protagonists of the Baal Cycle should not be ignored, however. Second, Cassuto's interpretation envisions Yamm and Mot as allies against Baal.

[150] Pardee 1987a:66-68.

[151] Cf. an Akkadian text from Ugarit which reads: *ultu pî mu-ti ikimanni* "he snatched me from the mouth of death." *Ug V*, #162: 40, pp. 268-9; *CAD* M/2, 317-8.

In the work of Fisher, Cross and Clifford, the cosmogonic approach has taken a more particular expression. Building on the work of Mowinckel (1962:1.134), Fisher (1965: 314-15) proposes that the Baal Cycle constitutes a mythological description of the creation of the world:

> Is this conflict theme related to kingship, temple building, or creation? I think that this is an improper question. . . conflict, kingship, ordering of chaos, and temple building are all related to an overarching theme that I would call "creation." However, this is not theogony or a creation of the El type. Rather it is cosmogonic and is of the Baal type.

Fisher (1965:317-18) bases his view of creation in the Baal Cycle on a number of points.

First, Fisher (1965:318) argues that the palace of Baal constitutes a microcosm of the whole world or cosmos. That the palace symbolized Baal's place in the world as its fructifier is evident from the window in Baal's house, according to Kapelrud (1952:29-30; 1963) and Fisher (1963:40; 1965:318; cf. Rummel, *RSP III* 284). That the language of creation, in Fisher's terms, underlies the description of the building of the palace in KTU 1.4 V-VII appears plausible when it is compared to Ps 78:69: *wayyiben kĕmô-rāmîm miqdāšô kĕ'ereṣ yĕsādāh lĕʿôlām*, "He built his sanctuary like the high heavens, like the earth which he has founded for ever" (see Hurowitz 1992:332, 335). Levenson (1988:87) observes that creation and temple-building in biblical texts such as this one serve as a "homology" which interpenetrate descriptions of one another: creation can be rendered in terms of temple-building and vice-versa (see also Hurowitz 1992: 242).

For the interpretation of the Baal Cycle, it is important to determine the significance of the "interpenetration." While the Ugaritic passage evokes cosmic dimension and importance by drawing on cosmic imagery, this usage does not indicate that the building of Baal's palace constitutes an act of the creation of the cosmos. Indeed, the "homology" in the Baal Cycle perhaps renders cosmic fructification (but not creation) in terms of temple-building and vice-versa. Furthermore, Fisher's thesis that the temple-building episode in KTU 1.4 V-VII describes creation is not confirmed, however, by the passage's other features. What Fisher calls the "creation" language of Baal's palace evokes the cosmic grandeur of his role in maintaining the cosmos. The divine palace has cosmic

ramifications: it is the source of well-being for the cosmos. It also may have been understood as enthroned on top of the known cosmos. The house is clearly cosmic in importance, but this fact does not indicate that Baal is a creator. If fructifying the world and maintaining it qualifies as cosmogony, then there is no denying that the Baal Cycle contains these features, but then the definition of creation is imprecise. Fisher's own formulation of cosmogony at Ugarit (1965:320) is ambiguous: "At Ugarit we have no description of the process of ordering the cosmos, but nevertheless we have it."

Second, according to Fisher (1965:319; cf. 1969:204), the motif of "seven days" in both Genesis 1 and KTU 1.4 VII further indicates that the temple-building constitutes a type of creation. Fisher might have also mentioned that the tabernacle was thought to have been built over seven months (Hurowitz 1992:227), and Solomon spent seven years building the Temple (1 Kgs 6:38). As Hurowitz' discussion (1992:242-43 n. 3) of temple-building indicates, these examples suggest not that temple-building is a metaphor for creation in the Baal Cycle, but that creation in Genesis 1 uses the language of temple-building. It might be questioned further whether the motif of the seven-day period is too common (Freedman 1970-71; *CS* 192-209) to be considered a basis for inferring creation or cosmogony from the biblical account of Genesis 1 to KTU 1.4 VII. Finally, Fisher suggests that Baal's setting of the "season" (*ʿdn*) in KTU 1.4 V 6-7 represents an act of creation, but this view is based on a faulty understanding of **ʿdn*.[152]

For some proponents of cosmogony in the Baal Cycle, cosmogony represents a kind of creation different from theogony. Cross (1978: 333-34) focuses attention on this aspect of the definition of cosmogony:

> The Ugaritic cosmogonic cycle (in which Baʿl battles with Sea and Death to secure kingship) is not prefaced by a theogony. Indeed no theogonic myth is extent in the Canaanite cuneiform texts. This circumstance has led certain scholars to claim that there is no creation myth at Ugarit. Such a view is wholly wrong-headed in my judgement.

---

[152] See above p. 53.

> The absence of a theogonic prologue is merely a primitive feature of the Ugaritic cosmogonic cycle. Otherwise, it bears all the traits of the cosmogony. The conflict between Baʿl and Yamm-Nahar (Sea and River), Môt (Death), and Lôtan are alloforms reflecting the usual conflict between the olden gods and the young gods of the cult. The primary focus of the cycle is the emergence of kingship among the gods. Baʿl the divine warrior returns victorious to the divine assembly, receives kingship, builds his royal temple on Mount Sapon, and invites the gods to the royal banquet. The pattern of the cosmogonic myth could not be more evident.

In a theogony the events are described as having occurred in the distant past. However, the Baal type of creation is a cosmogony, which pits a young god in battle against a divine force representing chaos or death; it may or may not locate events in time. It delineates primordial events and structures, such as kingship.

Clifford (1984) expands on the ideas of Fisher and Cross. According to Clifford, cosmogony is not a creation from nothing (*creatio ex nihilo*), but the ordering of chaos. Clifford (1984:186-87, 198) suggests:

> Ancient cosmogonies were primarily interested in the emergence of society, organized with patron gods and worship systems, divinely appointed kings or leaders, kinship and marriage systems.
>
> Baal's move to a central place among the gods contributes to the establishment of the world. Baal arranges the heavens and earth as a source of life for humans. In the myths the perspective is heavenly. From the earthly perspective, Baal's palace is reflected in the temple in the city of Ugarit. It is the place where the king is identified as the regent of the god. The stories are thus cosmogonies, stories which describe how the society came to be established and how it continues to remain supportive of human community.

According to Clifford, Genesis 1-3, Psalms 77, 78:41-55, and 104, Enuma Elish and Atrahasis also constitute cosmogonies issuing in conditions requisite for a stable human society. Genesis 1-3 and Enuma Elish also describe the formation of order for human society and the creation of the world. Creation follows Marduk's defeat of Tiamat in Enuma Elish, and numerous biblical passages recount the defeat of cosmic foes in the primordial time of creation. Genesis 1 plays on this tradition, asserting the divine omnipotence by omitting mention of any cosmic opposition to the divine plan of creation (Levenson 1988:3-77). While older treatments of this question occasionally posited a creation account in a lacuna of the Baal Cycle,

Clifford (1984) has changed the basis for the argument for the Baal Cycle as a cosmogony. He redefines cosmogony in a manner which fits the Baal Cycle by arguing that cosmogony does not constitute creation out of nothing (*creatio ex nihilo*) or primarily creation of the physical universe, but the formation of conditions suitable for human society. By this logic Clifford classifies the Baal Cycle as a cosmogony. Finally, for both Fisher and Clifford, the absence of one element from a cosmogony (such as kingship, temple building or the rendering of order from chaos) is not crucial. For an ancient cosmogony may concentrate on "one element without explicit reference to the whole." It is "a kind of synecdoche, the part stands for the whole" (Clifford 1984:188).

Several commentators have criticized the cosmogonic approach developed in the work of Fisher, Cross, Clifford and other scholars.[153] The most common objection to their approach involves the terms of creation and cosmogony.[154] Greenfield (1987b:557) regards creation as a major criterion for defining an ancient Near Eastern cosmogony:

> In the Ugaritic tale Baʿal must defeat Yamm in order to achieve rule, but there is nothing more than that in the text, notwithstanding scholars' efforts to interpret those texts as indicating that Baʿal imposed order on a chaotic world, and the battle with Yam as thus taking on cosmogonic significance. There are two reasons for this line of thought, the first being that in the Hebrew Bible the theme of the defeat of the sea is connected with creation, as in Psalm 74:16-17...Defeat of the monster symbolizing chaos, followed by creation and the ordering of the universe, is known also from the Babylonian creation epic [Enuma Elish], a work which may have come under western influence before it was written down, which happened after the composition of the Ugaritic texts. Be that as it may, this creation theme is lacking in the Ugaritic texts that have reached us.

Battle conflicts like 1.2 IV appear in other ancient Near Eastern texts in the context of creation. The Egyptian Instruction of King Merikare lines 13f. read: "Well directed are men, the cattle of their god. He made heaven and earth according to their desire, and he

[154] Caquot 1959; McCarthy 1967; Kapelrud 1979, 1980; Margalit 1981; Korpel and de Moor 1986:243-44; Cunchillos 1987.

repelled the water monster" (*ANET* 417; Lichtheim 1973:106; Faulkner in Simpson 1973:191). This passage contains a "reference to the concept of a primordial water monster, defeated at the time of creation" (Lichtheim 1973:109 n. 29; cf. *ANET* 417 n. 49). In his discussion of creation in the Coffin Texts, Allen (1988:33-35) notes the role which the language of battle plays in conveying the struggle between the forces of development and inertia, between life and lifelessness. This struggle began in creation and is replicated in daily life. According to Korpel and de Moor (1986:244), biblical narratives sometimes combine conflict with creation not because the two motifs necessarily belonged together in all cases, but because the two were attributed to a single deity in biblical tradition (cf. Levenson 1988:10; Smith 1990); the same point applies to Marduk in Enuma Elish.[155] Caquot (1959:181-82; cf. J. Day 1985b:12) suggests that although the Ugaritic texts do not include any examples of cosmogony as such, the West Semitic literary tradition knew such cosmogonies because of the biblical texts (Psalms 93, 95-99) attesting to the combination of battle and creation. It is unclear whether cosmogonies constituted a general genre of the West Semitic literary tradition. The combination of battle and creation may have been secondary within Israelite culture, or it was simply absent from Ugaritic literature. Indeed, Curtis (1978:255) notes a number of psalms where the theme of Yahweh's subjugation of the waters is separate from creation, and he argues that in the Psalms the former is at least as prominent a theme as the latter. In sum, if the Baal Cycle constitutes a cosmogony, it must be asked why creation material is absent from the Baal Cycle (or from the other Ugaritic texts as well).

The difficulty in definition is the primary crux in the cosmogonic approach. The Baal Cycle is unlike many of the "cosmogonies" which Clifford compares to it. Clifford (1984:185) notes that scholars have taken Enuma Elish as "the standard" of cosmogonies, and he also classifies Atrahasis and biblical poems with creation motifs as cosmogonies (see Clifford 1984:185-86 n. 8). The argument that the Baal Cycle is a cosmogony has depended on comparisons with Enuma Elish. There are many parallels between the two texts, as commentators have long noted.[156] The dissimilarities between

---

[155] Kapelrud (1952:28) called this development "absorption."

[156] See pp. 13, 34-35, 79, 82, 95, 96, 101, 103-05, 110-12, 130, 150, 231, 288, 296, 300, 314-15, 319, 335, 340, 353 and 358-61. Enuma Elish is too complex in its composition (Lambert 1965:287-300; cf. Komoróczy 1973:32) to serve as "the standard" against which cosmogony in the Baal Cycle is to be assessed.

Baal Cycle and Enuma Elish are equally instructive. Unlike Enuma Elish, the Baal Cycle relegates the deeds of the older generation of deities to the background and only alludes to old events such as creation in the form of divine epithets. The Baal Cycle does not describe primordial events such as the creation of the cosmos, but rather its maintenance through the power of the storm-god. The Baal Cycle concerns a more "recent" series of divine events compared to either the opening tablet of Enuma Elish or the opening chapters of Genesis, and in this sense the Baal Cycle differs sharply from well-known "cosmogonies." Because of comparisons with texts such as Genesis 1-3 and Enuma Elish, the cosmogonic interpretation focuses on the human dimension of the Baal Cycle, but this story concentrates on the affairs of deities; it is theocentric in its perspective, although its concerns sometimes reflect human needs (KTU 1.4 VII 49-52; 1.6 I 6-7, II 17-19, V 25-26[157]). As a result, in order to understand the Baal Cycle in Clifford's terms, it is necessary to impose the features of ordering society, explicit in texts like Enuma Elish and Atrahasis, onto the Baal Cycle which is silent on these matters. The Baal Cycle therefore appears to be fundamentally different from any of these texts in its expression of "cosmogony." Furthermore, Albright classifies the text of Illuyankas as a cosmogony, but like the Baal Cycle, this text has no creation or ordering of human society.[158] While Fisher, Cross, Clifford and others distinguish between theogony and cosmogony, still other scholars such as G. Komoróczy (1973:31) categorize Enuma Elish as a cosmogony with two parts, the theogony and the theomachy, and elsewhere Komoróczy (1973:36) calls the opening portion of Enuma Elish a cosmogony which Fisher and others label as theogony. These different uses in terminology and classification therefore require further clarification and refinement.

Hillers (1985: 266) also addresses the problem of terminology, especially Cross' application of the terms "theogony" and "cosmogony" to Ugaritic texts:

> But the support for such a view of Canaanite religion in general. . . is derived from the lists of divine witnesses in Anatolian treaties and what we could call the "late-late show," Eusebius and Damascius. Against this choice of a center for Canaanite religion we may set the attested diversity visible in Ugaritic texts: god-lists arranged on

---

[157] See pp. xviii-xix.

[158] Albright 1936b:18; cf. Komoróczy 1973:33. For recent treatments of Illuyankas, see Beckman 1982; Hoffner 1990:10-14.

> neither theogonic nor cosmogonic principles, but by cultic rank (with many vagaries), or by theological principles, or geographically or in ways that baffle us; and the obvious prominence not just of myths of various sorts, but also of rituals, divination, and prayer. For that matter, it is easier to find in Ugaritic texts something like "Hebrew epic" than it is to find cosmogonic myths.

It is commonly objected that the terminology of creation in the Baal Cycle itself militates against the approach of Fisher, Cross and Clifford. Some of the epithets attributed to El and Athirat suggest that they, and not Baal, are the creators of humanity and hence the agents of cosmogony or "world-building."[159] Two of El's titles are *ʾab ʾadm*, "father of humanity," and *bny bnwt*, "creator of creatures." Athirat is *qnyt ʾilm*, "creatress of the gods." These epithets suggest that the generation of El and Athirat is responsible for the creation of humanity.[160] According to Lambert (1985b:537), this dimension of El's character underlies one inscription of Yahdunlim of Mari. The inscription states that "El (*ilum*) built the city of Mari."[161] Roberts (1972:32-33) would see a similar depiction of El evident in a number of Akkadian personal names (cf. Millard 1974:89). El performs actions indicative of his creative power (e.g., the creation of Shaᶜtaqat in KTU 1.16 V 23-30) in the image of the potter nipping clay, precisely the language of creation in Mesopotamian,[162] Egyptian[163] and Israelite literatures.[164]

El's character raises a serious issue as to Baal's role within the cosmos. The Baal Cycle does not assert that Baal "creates" or even "arranges" the cosmos. It suggests, rather, that Baal is its preserver and savior. As Korpel and de Moor (1986:244) summarize the evidence, "Baal may have been the champion among the gods able to

[160] Cf. El's role in the theogony, in KTU 1.23; cf. Ugaritic DN, *ybnʾil*, "El builds/creates" (*PTU* 96).

[161] For the issue whether *ilum* is El or a generic usage meaning "god" and involving another deity, see Hurowitz 1992:333.

[162] E.g., the creation of humanity in the Assyrian version of Atrahasis in *ANET* 100, related to the OB composition called "Creation of Man by the Mother Goddess," in *ANET* 100; creation of Enkidu by the goddess Aruru in Gilgamesh 1.2.34-35 in *ANET* 74. See Moran 1970.

[163] See the creation of humanity by Khnum in *ANET* 441; see Gordon 1982.

[164] Isa 64:7; Job 33:6; 1QH 13:14-15. See Ginsberg 1946:48; Pope 1973:217; Margalit 1981:144.

subdue the forces of evil, yet he was unable to create anything new." In the Baal Cycle the Cloud-rider revives the world. This is clear from the effects of his rains that fructify the earth (KTU 1.3 IV 25-27; 1.4 V 6-9; 1.4 VII 26-31) and his feast that nourishes the gods (KTU 1.4 VI 38-59). KTU 1.4 VII 49-52 relates the primary function which the divine king is expected to exercise on behalf of the pantheon and humanity:

ʾaḥdy dymlk ʿl ʾilm	I alone am the one who rules over the gods,
lymrʾu ʾilm wnšm	Indeed commands/fattens gods and men,
dyšb[ʿ?] hmlt ʾarṣ	Who satis[fies?] earth's multitudes.

Baal's death lamented in KTU 1.5 VI 23-24 and 1.6 I 6-7 threatens the continuation of human life:

bʿl mt my lʾim	Baal is dead! What of the people?
bn dgn my hmlt	The son of Dagan! What of the multitudes?

These passages demonstrate that Baal is the fructifier of the earth, the source of well-being for the pantheon and humanity alike, and only in this sense, the "recreator" of the cosmos. While El is the creator of the cosmos, it is Baal who gives life to the world.[165] Although the old generation of creator-deities appears in the Baal Cycle, their original act of creation is not the concern of the Baal Cycle. Rather, the accent falls entirely on Baal's conflict with his enemies, Yam and Mot, and his kingship in the cosmos.

The express differences between the Baal Cycle and other ancient Near Eastern "cosmogonies" may suggest another approach to the appearance of "cosmogonic" elements in the Baal Cycle. As opposed to creation accounts described in the idiom of the battle conflict, the Baal Cycle reuses elements of creation accounts in its rendering of the battle between Baal and Yamm. Yamm as the embodiment of chaos or destruction on a cosmic level may represent a vestige of a creation background. It has been claimed that the natural conditions of the storm constituted the source for the symbolization of Yamm as chaos. Various views, such as flooding (*ANET* 135 n. 28; Kloos 1986:170; cf. Coogan 1981:81), and inter-

---

[165] Hvidberg 1962:62-63; Kapelrud 1979:407-12; *Baal* 145; *CS* 353 n. 106; see also Kaiser 1959:76; Schmidt 1961:38; Mowinckel 1962:1.241 n. 21. See Lambert 1985a:538.

ruption of shipping (*SPUMB* 141; *CML*^{2} 7), have been suggested. According to Kaiser (1959:65), the waters whipped up by the storm were viewed as a symbol of resistance to the the storm-god whose "own season in the fall marked the cessation of Sea's hostility." Commenting on this particular version of the argument, Greenfield (1961:91) questions "if the battering of the Syro-Palestinian coast by the waters of the Mediterranean. . . does not really have enough motivating force to have engendered the mythological material. . ." For all their threat to human living conditions, the storm may not lie directly behind the representation of Yamm as chaos. A direct natural interpretation may be insufficient to explain the symbol of Yamm as the divine enemy embodying chaos and destruction (KTU 1.2 IV 3; 1.14 I 19-20); rather, a more complex natural interpretation may be involved.

Like Tiamat, Yamm may represent a deity from an older theogonic tradition. Creation stories regularly describe the primeval chaos as watery. Allen (1988:63) notes the oldest concept of creation in Egypt: "The first concepts may well have been those with obvious roots in the experience of Egyptian life—the image of a first sunrise over the first mound of earth to appear from the receding waters of pre-existence." In one Egyptian text (from CT 714), the primeval waters constitute "the milieu within which the creation unfolds" (Allen 1988:14). The image of the god Atum floating in the primeval waters at the moment of creation serves to convey this process (Allen 1988:13): "See, the Flood is subtracted from me (Atum): see, I am the remainder." As Allen (1988:14) notes of this description: "Creation involves the distinction between this primordial mass and the surrounding waters." Traditions from Hermapolis, Heliopolis and Memphis depict creation as the primeval hillock arising from the waters of chaos (*ANET* 3, 8; cf. 4a n. 7, 4b n. 6; Allen 1988; Plumley 1975:25-29). As early as the Coffin texts, the primeval waters bear the epithet, "father of the gods" (Allen 1988:21).

Greek and Levantine seem to follow suit. The Iliad (14:201, 246; cf. 23:607-08) calls Okeanos "the genesis of all." According to PE 1.10.1, at the beginning of the cosmos there was "chaos," which Baumgarten (1981:106-07) interprets as watery chaos and equates with BH *tĕhōm*, "Deep." Given the absence of an attested Ugaritic tradition regarding creation, Yamm perhaps constituted the primeval waters in older traditional material or was related to these waters in some manner. According to Baumgarten (1981:106), a remnant of an older cosmogony may lie behind the descriptions of

El's abode in the Baal Cycle. El's abode has been compared with the home of Ea (*EUT* 71; Lipiński 1971), built over the watery Apsu according to Enuma Elish 1.71f. (see *ANET* 72, 111, 342, 390). The creation of Ea's abode shortly after the first conflict following the theogony and anticipates the later creation of Marduk's palace atop the carcass of Tiamat in Enuma Elish 4.137-39. A similar situation may be operative in the Baal Cycle. According to Baumgarten, like Ea's creation of his abode on top of Apsu, El's home at the source of the "Double-Deeps," *thmtm* (*EUT* 71) may reflect an element of an old cosmogony.

It may be noted further that if the figure of Yamm goes back to an older, unattested West Semitic theogony, it would have an analogy in the Mesopotamian theogonic traditions. The first millennium theogony known as "the Harab myth"[166] includes both "Sea" (*tâmtum*) and "River" (^{d}ID) in the earliest divine generations. In this account "Sea" is the mother of "River." It might be suggested further that the storm on the Levantine coast may have constituted the ultimate background to the West Semitic traditions about the sea, and therefore indirectly the figure of Yamm as a source of chaos and destruction in the Baal Cycle. By the same token, the setting for this development is so removed in time[167] from the extant text of the Baal Cycle that it only partially addresses the meaning of the Baal Cycle for the Ugaritic society which produced, transmitted and added to it.

Despite these problems, it is important to note that the cosmogonic approach makes a number of significant contributions. First, this interpretation accounts for the whole of the Baal Cycle, and it finds support in the effects that the death of Baal brings to the earth in KTU 1.6 I 6-7 and KTU 1.6 IV 1-2. As noted above, Baal's house and the opening of the window is expected by Athirat to produce a luxuriant, green earth in KTU 1.4 V 6-9. Second, the language of creation, in Fisher's terms, underlying the description of the building of the palace in KTU 1.4 may point not to an implicit account of creation, but to the reuse of the language of creation designed to serve the concerns of this particular text, which is not creation but

[167] For Lambert (1988:128) fundamental myths involving nature derived from pre-historic times:

Baal's power. Third, the cosmogonic approach offers a rich explanation and larger context for understanding the themes of kingship, temple building and divine conflicts. Fourth, the cosmogonic view of the Baal Cycle shows how the conflict in 1.2 IV and temple-building in 1.4 VII thematically belong together and are thus plausibly parts of a single work.[168] Finally, Clifford's statement that an ancient cosmogony may concentrate on one element without specific reference to other parts of even the whole is significant, because it can show what is special about one cosmogony as opposed to another. What the Baal Cycle means depends on those elements and themes upon which it concentrates in a way that no other "cosmogony" does. Or, to make the point differently, the question that remains is the theme which the Baal Cycle emphasizes and the materials and strategies which the cycle deploys to underscore it.

3. Historical and Political Views

Although ritual and seasonal interpretations dominated discussion of the Baal Cycle from the 1930s through the 1960s, a number of scholars proposed historical settings or factors to account for the formation of the Baal Cycle. Virolleaud (1946) and Obermann (1947) argued that the background of the Baal's conflict with Yamm in KTU 1.2 IV was to be located in the arrival of the Sea Peoples to the Syrian littoral in the late Bronze Age. Obermann (1947: 205-06) remarks:

> For the present, however, it is all but impossible to escape the impression that—unlike the enmity between Baal and Mot, which may be best understood as one of cosmological character—that between Baal and Prince Sea should be considered as having originated under definite conditions. In other words, in the light of the fragment which we have analyzed, the narrator of 3AB [KTU 1.3] would appear to have incorporated in his version of the building saga a myth designed

---

> It seems to the present writer that the creative period lies in prehistory. That was the time of genuine mythic creativity, so that the basic material was spread everywhere from the Aegean to India before our written evidence begins. When the earliest myths and allusions known to us were written down, the basic concern of myth had already lost some of its force. But there was still a good measure of respect both for these powers and the traditional stories about them, so the stories were maintained, but often with new uses.

[168] See also p. 13.

> to explain, etiologically how the people of Ugarit succeeded in expelling a hostile invasion effected by the inhabitants of a sea region, say, on the eastern shore of the Mediterranean, how they routed and deranged the invader's forces, how they destroyed his ranks into ruin. That, by the medium of folklore, the struggle between two peoples may easily have come to be remembered as the struggle between their respective gods—and, in the present instance, between Baal, the most active and the most popular god of Ugarit, and Prince Sea, the real or popularly assumed name of the god worshipped by the invaders from the sea region—is too well-known a phenomenon to need being discussed here.

The evidence for this historical background is minimal at best.[169]

Some scholars followed the historical lead of Virolleaud and Obermann. A student of Obermann, Pope (*EUT* 92-93) argues that the narrative of the Baal Cycle reflects the replacement of El by Baal. For Pope (*EUT* 103-104) this theme had historical implications:

> The social and political forces that caused El to be displaced before Baal at Ugarit can only be surmised. The displacement of one god by another is probably brought chiefly by the influx of new cultural and ethnic groups, whether by conquest or peaceful infiltration. At Ugarit there was a large Hurrian element mixed with the Semitic population. For the Hurrians, Kumarbi, like El, was the father of the gods, but Hittite texts of about the 14th century B. C. or earlier mythologize the displacement of this god before the Storm-god, and the Ugaritic texts, we believe, do the same in regard to El and Baal. In the Amarna and Ramessid period, the storm-gods, the Hurrian Teshub and the Semitic Hadad-Baal, are the major deities—their identification with one another and with the Egyptian Seth in the Ramessid period is patent—while Kumarbi and El have passed out of the picture.[170]

---

[169] Gray (1979b:323) offers a historical interpretation for 1.2 IV and 1.3 II comparable to the view of Obermann. Gray begins with the valid observation that 1.2 IV may reflect on a cosmic level what the 1.3 II represents on a terrestrial level. He then suggests that these two episodes may have commemorated the supplanting of the cult of Yamm by that of Baal. On the historical level, these passages in the Baal Cycle might reflect Ugarit's assertion of independence from Beirut under Egyptian hegemony. Gray proposes that the address in an Akkadian letter from the king of Beirut to his "son, the governor of Ugarit" reflects a period of Beirut's hegemony over Ugarit, and that KTU 1.2 IV and 1.3 II would then reflect an attestation to these political conditions. Gray admits that this hypothesis is conjectural and he offers a ritual interpretation for KTU 1.3 II in addition to his historical reconstruction. Fensham (1979: 272-274) offers a similar historical interpretation of the Baal Cycle. According to Fensham, the treaty terminology in 1.2 I 36-38 and 1.5 II 12 suggests the possibility that Yamm and Mot may have represent invaders from the west and east.

[170] Mann (1977:96-100; cf. Wyatt 1979:826-27) also describes the exaltation of Baal in these terms.

Coogan (1981:81) echoes Pope's view:

> The transfer of power from an older god to a younger storm god is attested in contemporary eastern Mediterranean cultures. Kronos was imprisoned and succeeded by his son Zeus, Yahweh succeeded El as the god of Israel, the Hittite god Teshub assumed kingship in heaven after having defeated his father Kumarbi, and Baal replaced El as the effective head of Ugaritic pantheon. A more remote and hence less exact parallel is the replacement of Dyaus by Indra in early Hinduism. These similar developments can be accurately dated to the second half of the second millennium B.C., a time of prosperity and extraordinary artistic development, but also of political upheaval and natural disasters that ended in the collapse or destruction of many civilizations, including the Mycenaean, Minoan, Hittite, and Ugaritic. In such a context a society might suppose that its traditional objects of worship had proved ineffective, that the pantheon in its established form had, like entrenched royalty, become incapable of dealing with new challenges. At this point it might choose an extradynastic god, as Ugarit chose Baal, son of Dagon and not of El; and, beset by invasions from the sea and tidal waves arising from earthquakes, it might construct a mythology in which the new god demonstrated his mastery over the sea.

Vine (1965) offeres a more precise historical view of the cycle. Distancing his position from the earlier historical interpretations of Virolleaud and Obermann, Vine (1965:vi-vii, 148) argues that the Baal Cycle reflects the rise of the Amorites at Ugarit in the twenty-first or twentieth century B.C. With the emergence of the Amorites, Baal, the new god of the Amorites, replaced El, the local god. In a similar vein, Oldenburg (*CEBCR* 101-42) suggests that the rivalry between Baal and the family of El and Athirat reflects a tension in their cults at Ugarit during the second millennium. Like Vine, Oldenburg views Baal-Haddu as an Amorite god. According to Oldenburg (*CEBCR* 143-63), the cult of Baal progressively spread into Mesopotamia and along the Levantine coast and came into conflict with the cult of El during the Middle Bronze Age.

The interpretations of Vine and Oldenburg have been criticized for their lack of evidence (*Baal* 325). However, two Ugaritic texts published since Vine's study have established the Amorite background of the Ugaritic dynasty of "Niqmaddu II," under whose royal patronage the extant copy of the Baal Cycle was produced. According to Levine and de Tarragon (1984:655), the references to *ddn* in KTU 1.161 and *dtn* in 1.124.2 (cf. lines 4 and 11) demonstrate the Amorite background of the Ugaritic dynasty: "At Ugarit, there was a tradition which traced the origin of the Ugaritians and their

kings and heroes to the Didanum-people who flourished in what is today North-East Syria, long before a rise of a dynasty at Ugarit."[171] In view of these texts, Vine's proposal may be rehabilitated and revised. The Baal Cycle may be understood to reflect not the rise of the Amorites at Ugarit, but the origins of Ugaritic kingship under the Amorite dynasty of Niqmaddu (see Kitchen 1977:131-142). To extend this speculative reconstruction, "Niqmaddu II" took the name of the early Ugaritic leader, Niqmaddu. The name of both rulers may reflect their devotion to the Baal-Addu, given that the name Niqmaddu is an Addu name meaning "Addu has vindicated" (*PTU* 17, 168). A third monarch had the name *yʿdrd*, "Addu helps" (see Kitchen 1977:132, esp. n. 12; *PTU* 41, 113, 133). As Pardee (1988b:140) observes, *(h)addu* is the only theophoric element in royal names from Ugarit, which would suggest that this god is the dynastic god (Garbini 1983:57[172]). The importance of Baal may be measured also from his iconography at Ugarit. Seeden (1980:106) observes that Baal "was in greater demand at Ugarit than any other male deity, since his representations are by far the most numerous."

To support his dynasty at Ugarit, "Niqmaddu II" sponsored the scribal production of the Baal Cycle, as indicated by the colophon at the end of KTU 1.6 VI. The description of Baal's rise to kingship might have been understood as a divine reflection of the emergence of the Ugaritic dynasty of "Niqmaddu I." Without advancing a specific theory about Amorite invasions or the arrival of specific deities to Ugarit, the Baal Cycle may have served to support the rise of Niqmaddu's line in the Middle Bronze Age or the maintenance of the line during the Late Bronze Age.[173] The rise of the dynasty was traced back to the early figures of Niqmaddu I and Yaqaru, as shown by the king list in KTU 1.113. The royal seal bearing the words, "Yaqaru, son of Niqmaddu, king of Ugarit," *ya-qa-rum mâr ni-iq-má-du šàr* ^{al}*ú-ga-ri-it* (*PRU III*: xli) comes from "Level II" of Ugarit, which might suggest the Middle Bronze Age as the general period for the rise of Baal and the dynasty of Niqmaddu. Presuma-

[171] For a phonological explanation of the variation in dentals in *ddn* and *dtn*, see Garr 1986.

[172] This point and reference were brought to my attention by Professor K. van der Toorn.

[173] So-called "Level II" = ca. 2100-1500 according to the excavator; see Courtois 1974; North 1975.

bly this process continued into the Late Bronze Age when Baal and the dynasty of Niqmaddu were entrenched firmly in the city-state of Ugarit. The Baal Cycle may reflect the culmination of this development. Thus the broad cultural context for the emergence of Baal at Ugarit as described by Pope and Coogan may be correlated with specific texts reflecting the rise of the dynasty of Niqmaddu such as KTU 1.113 and 1.161, the Yaqaru seal and perhaps the Baal Cycle itself.

Stolz (1982) argues for a more precise political interpretation. Baal not only represents the rise of Ugaritic dynasty; El and his distant abode represent Ugarit's overlords during the fourteenth and thirteenth centuries. One possible difficulty with the element of El's symbolization of the foreign empires resides in the Ugaritic use of a Ugaritic god to symbolize a non-Ugaritic power. Nonetheless, Stolz's view rightly emphasizes that Baal wields limited power, which reflects Ugarit's relative position among the great powers of Egypt and Hatti.

The thesis that the Baal Cycle reflects the rise of a new dynasty at Ugarit may help to explain why Baal, although not a son of El and Athirat, is selected king of the cosmos. Indeed, the tension between the family of El and Baal belongs to the theme of kingship in the Baal Cycle (cf. *EUT* 55-56, 93, 97; Pope 1989:228-30). Although Baal calls El "father" in both Ugaritic texts (KTU 1.3 V 35; 1.4 IV 47; cf. 1.4 I 5) and in the Elkunirsa story (*ANET* 519), Baal is also the "son of Dagan," for example in the Baal Cycle in 1.2 I 19, 35, 37, 1.5 VI 23-24 and 1.6 I 6, which would suggest that his status as El's son represents a secondary divine lineage. The Cloud-rider's title, *bn dgn*, "son of Dagan," suggests that El was not considered his father by blood. In view of the derivation of Dagan's name based on Arabic **dgn*, "to be cloudy, rainy,"[174] Baal the Cloud-rider would appear naturally the son of Dagan rather than a son of El.[175]

[174] Lane 853-54; Albright 1920:319 n. 27; Pope, *WdM* 277; Roberts 1972:18; Renfroe 1992:92.

[175] On Dagan, see Roberts 1972:74-75 nn. 95,151; Healey 1977; Lambert 1985a:538; cf. Wyatt 1980. For Dagan at Ebla, see Pomponio 1983:149; Xella 1983:289. For Dagan at Emar, see Fleming 1992:169-71, 203-08, 240-56. Fleming (1992:247) speculates that Dagan and Baal were originally both heads of pantheons. At Emar, Fleming argues, the confrontation of the two pantheons was "resolved by placing Dagan at the top, with ^{d}IM given the next position." According to Fleming Baal's title "son of Dagan" may reflect a means of reconciling the two cults.

Moreover, Roberts notes that a fragment from northern Mesopotamia gives Dagan as the father of Addu.[176] In a number of god-lists discovered at Ugarit, the position of Dagan corresponds to that of Kumarbi, likely indicating an identification between the two gods (Laroche, *UgV* 523-24; 1968:150). The equation may be ascribed to their common status as fathers of the storm gods,[177] who are also identified at Ugarit (*UgV* 249, #137, IVb, line 17[?]); otherwise, the comparison would appear problematic since Kumarbi and the storm god are adversaries (*ANET* 120-25) while Dagan and Baal are not.

Philo of Byblos reports a tradition bearing on Baal's parentage:

> Thus, Kronos waged war against Ouranos, expelled him from his dominion, and took up his kingdom. Ouranos' favorite mistress, who was pregnant, was also captured in the battle and Kronos gave her in marriage to Dagon. While with the latter, she gave birth to the child conceived by Ouranos, whom she called Demarous.[178]

The use of this tradition to reconstruct a conflict within the Baal Cycle might been criticized since the witness of Philo is layered heavily with elements of Phoenician and Hellenistic religion (L'Heureux 1979:42; Barr 1974). As Pope (*EUT* 47 n. 95) notes, the tradition of Philo of Byblos, however complex, reflects an attempt to render order from the conflicting traditions about Baal's irregular paternity. It would appear that this account reflects Baal's secondary relationship to the family of El and Athirat.[179] According to KTU 1.4 VI 46, this divine couple had seventy children, or as the Elkunirsa myth (*ANET* 519) says, seventy-seven//eighty-eight offspring.[180] Athirat's sighting of Baal provokes her to inquire in KTU 1.4 II 24-26 if Baal is the killer of her children. Her question implies that

[176] Roberts 1972:75 n. 98. See *CRRA* 3 (1954) 129.

[177] Laroche, *UgV* 523-24; 1968:150; Roberts 1972:75 n. 98.

[178] PE 1.10.18-19; Attridge and Oden 1981: 48-51.

[179] Lipiński (1983:308, 309) argues that Kronos in this passage is to be identified with Dagon and not El and that the identification of Kronos wth Elos in PE 1.10.29 (Attridge and Oden 1981:54-55) is secondary.

[180] This mythological enumeration appears to be related to the expression attested at Emar: "all the seventy gods of Emar" (Emar 373.37-38; Fleming 1992:73, 242). It is also a standard for a royal family (Fensham 1977:113-15). Panammu refers to his seventy brothers (KAI 215:3). Jerubbaal likewise had seventy sons (Judges 9) as did Joram (2 Kings 10). Similar enumerations of divine groups appear also in Egyptian material (Massart 1954:85, 101). It is unclear whether the seventy-seven//eighty-eight siblings in 1.12 II 48-49 belong to Baal's family or Athirat's clan.

Baal does not belong to her brood.[181] Baal, born of parents different from the children of El and Athirat, but adopted secondarily into the central divine family, competes with them for kingship. In short, the Baal Cycle explains how Baal the outsider came to assume kingship in the divine family of El and Athirat.[182]

As a result of Baal's status as an outsider to the family of El, it has been thought that the Baal Cycle reflects tensions between El and Baal (*EUT* 55-56, 93, 97). Indeed, the notion of Baal's kingship as the outcome of two rival lines might be seen to have parallels in Hittite texts. Hoffner (1975:138-139) argues that the theme of the four generations of divine kingship in Hittite literature, in particular the Kumarbi cycle consisting of the Kingship in Heaven myth, the myth of the kingship of the god KAL and the Ullikummi myth, involves two competing rival lines. Hoffner (1975:139) diagrams the two lines as follows:

Alalu	Anu
Kumarbi	Storm god (Teshub)
Ullikumi	

Hoffner argues that these two rival lines compete for divine kingship. Hoffner (1975:139) concludes: "it is indisputable that we have two rival dynasties here with the kingship alternating between them in their struggles. Each deposed father is avenged by his son, who then becomes the new ruler." This struggle culminates in Teshub's successful defense of his kingship.[183]

The remarks of Hoffner may be suggestive for the interpretation of the Baal Cycle. The pattern of divine kingship appears in comparable form in Hittite and Ugaritic traditions, though in a truncated manner in the latter. On one side stand El and his two "beloved" ones (*ydd ʾil/mdd ʾil*), Yamm and Mot, and the other side stands their rival, Baal. The theme of the rival lines never emerges in full form in the Baal Cycle (L'Heureux 1979:3-70). El is never

---

[181] According to Greenfield (1985:193 n. 1; cf. Kapelrud 1952:64; 77-78), the brood of El and Athirat does not include Yamm and Mot.

[182] Cf. Pope 1987:228-29.

[183] Beckman (1986:18-20) notes that this pattern differs from Hittite secular texts, including the statements of Shuppiluliuma I to two vassals (KBo 1.5 i; 5.3 i) and the "Edict of Hattusili" (CTH 6). According to these texts, any of the royal sons were eligible for kingship; the reigning king made the decision, and he sometimes changed his mind on the subject This pattern perhaps compares with El's choices of Athtar and *yd*ˁ *ylḥn* as the new king in KTU 1.6 I.

explicitly opposed to Baal; indeed, he mourns the death of the Cloud-rider (KTU 1.5 VI) and later supports his kingship (1.6 VI 35-36). Indeed, it might be argued, following Schloen (1993), that the family issue is not so much one of tension between El and Baal but of sibling rivalry between Baal, the son only indirectly related to El, and the two "beloved" of El, Yamm and Mot. Other Ugaritic sources which Pope (1988) cites to support the tension between El and Baal, namely 1.12 (and by implication, 1.1 IV and V), reflect emnity among brothers according to Schloen (1993:219-20):

> Fratricide or parricide, and not regicide, is the issue in the Hurrian and Ugaritic myths and in Hesiod's *Theogony*. But this is to be expected if second-millennium political structures were closer to what Max Weber called "patrimonial" regimes than to professionalized bureaucratic states. In a patrimonial state the kingdom is simply the patriarchal household writ large, and the struggle for power is analogous to the factional rivalry for property and privilege between patrilaterals in extended patrilineages that is so well known in Middle Eastern anthropology. Thus in Ugaritic mythology the stories of internecine warfare between Baʿl and his "brothers" in the household of ʾEl—who is both patriarch and king—are not simply a picture of days gone by but a living tradition reflecting the workings of a complex patrimonial state in which the struggles between "kin" were a determinant of social relations at all levels of society, from the patriarchal household of the villager to the royal household itself.

Under this view El would appear more removed from the field of rivalry. It is true, however, that El takes more than a casual interest in the struggle among the brothers. El seems to support Yamm's cause in 1.1 IV and V. In either case the model of the family and its tensions are raised to a cosmic, political level in the Baal Cycle. This view is consistent with Gaster's view (1946-47:288) that El presides over a household of divine children who rule over their own realms. Gaster (1950:121-30) stresses the tripartite division of the cosmos corresponding to the realms of Baal, Yamm and Mot: Baal rules the heavens, Yamm the seas and waters, and Mot the underworld, like Zeus, Poseidon and Hades in Greek myth.[184]

---

[184] So also Toombs 1983:613-23; for further discussion, see Smith 1985:115-18; Handy 1990:21-22. These observations are echoed in structuralist discussions of the pantheon in the Baal Cycle. Petersen and Woodward (1977) suggest that the Baal Cycle reflects a universe consisting of three "tiers" ruled by different deities. In these three tiers, El rules the macrocosm, Baal the microcosm and Anat the human world, a view partially reflected in the parallelism between Baal's heavenly

The division of the cosmos into different realms appears in literature from not only Ugarit and Greece, but also Mesopotamia. Marduk's assumption of control not only over the cosmos as a whole echoes that of Baal. Baal and Marduk assume their place in their palaces (KTU 1.4 V-VII; Enuma Elish 5.119-22) as well as dominion over the cosmos. The comparison between the two texts also highlights some central differences between the Baal Cycle and Enuma Elish: whereas Marduk has entirely supplanted the rule of the older generation of gods such that he assumes their place in assigning their places in the order of cosmic creation, Baal does not assume El's full rank. El remains the executive director of the pantheon and the cosmos. Furthermore, Yamm and Mot hold a rank represented spatially on par with Baal's own insofar as they hold power over a specific realm like Baal. In contrast, Marduk is not identified with a specific realm; rather, his strength transcends specific realms. These differences illustrate that the exaltation of Baal in the Baal Cycle remains a partial one at best.[185]

Handy (1988) suggests that the differences between the kingship of Baal and El can be understood in part as a matter of realms: Baal's kingship extends over his heavenly realm, corresponding to the kingship of Yamm and Mot in their respective realms. According to Handy, Baal is also king over the city of Ugarit. Handy (1988:59) offers the following schema to represent the different expressions of kingship:

Title	Level	Example
mlk	Highest Authority	El
mlk	Patron Deity	Baal
mlk	City Ruler	Niqmaddu

Identifying different domains constitutes an important point for understanding Baal's kingship in tandem with the kingship of El. Baal moves from being king over his own heavenly domain to becoming king over the cosmos and the pantheon (so KTU 1.3 V 32; 1.4 IV 43-44). As the new king, Baal serves in conjunction with the old king of the gods, El; Baal may be viewed as his "co-regent."[186] Both El

---

battling in 1.2 IV and Anat's terrestrial warfare in 1.3 II. In a similar vein, Wyatt (1985; 1986; 1988; 1989) and Waterston (1988; 1989) also categorize into "tiers" the deities and the realms which they represent and rule.

[185] See below pp. 104-05.

[186] Cf. PE 1.10.31 translated above on p. xxii.

and Baal are called "king" (*mlk*) though in complementary ways: El remains the executive over the universe and Baal is the sustainer of the cosmos (Mullen 1980:84-85; cf. Handy 1988, 1990). El is not deposed in an active struggle with Baal; nor is El degraded or demoted by Baal. El retains his dignity in a way comparable to Ea in Enuma Elish. As Greenfield (1985:196) suggests, El is the aging head of the pantheon not unlike Ea.[187] El and Baal differ more in function than in realm. Baal's traditional heavenly domain expands to embrace the entire pantheon and cosmos in conjunction with El. Baal's kingship is realized in terrestrial terms by providing rains for the earth, which differentiates him from Yamm, Mot and Athtar, who may desire dominion over the earth, but do not attain it. While the Baal Cycle presents Baal's kingship over pantheon and cosmos alike, the text also manifests constraints on Baal's kingship; he is "king" (*mlk*), but not "king of kings" (*mlk mlkm*), a title attested in the letter RS 34.356. Indeed, the limitation on Baal's exaltation is a central feature of the following synthesis.

4. The Limited Exaltation of Baal

The theme of Baal's kingship provides an appealing starting-point for interpreting the Baal Cycle, as royal language permeates the cycle. Moreover, this political framework accounts well for the whole of the cycle. It can also explain the references to the seasons without being indebted to a specific, reconstructed setting that has little corroborative evidence. However, there remains important considerations of why Baal and not another deity is king, and what the nature of his kingship is (Smith 1986b). Baal is monarch precisely because he is the deity who can mediate the blessings of the natural cosmos both to human society and to the company of the pantheon. The means of providing blessings are his rains, which the seasonal interpretation has emphasized. These rains revivify the world, duly noted by proponents of the cosmogonic approach. Indeed, without the rains, there is no life. Baal's kingship brings life to the world, prevailing over the forces of death and destruction, as stressed by those who view the Baal Cycle as a struggle between the forces of life and death. The theme of kingship is the explicit topic of the cycle, but its expression and meaning depend on information

---

[187] Both gods also display wisdom and inhabit watery abodes (*EUT* 43, 45, 71; Lambert 1985a:538; cf. Pope 1987:228-30).

stressed by various interpretations. The various phenomena emphasized in the different approaches, whether they be seasons, ritual elements or expressions of cosmogony, play a significant role in the cycle, and their importance is not to be underestimated only because they may be subsumed under the rubric of kingship.

Diverse elements, such as meteorological phenomena, cosmogonic traditions and the character of other deities advance the theme of Baal's kingship.[188] Gaster, de Moor and other proponents of ritual and seasonal interpretations rightly emphasize how the use of language undoubtedly held tremendous religious, social, economic and political significance for the culture of Ugarit; rains at the correct time affected all dimensions of this agrarian society. Some elements of weather have been incorporated to dramatize Baal's kingship (KTU 1.3 IV 25-28 and 1.4 V 6-9). Other internal indications that the Baal Cycle draws on meteorological elements include Baal's epithet, *rkb ʿrpt*, "Cloud-rider" and his meteorological entourage in KTU 1.5 V 6-11 (*BOS* 160). The weather elements often serve as indications of Baal's power. The Baal Cycle is not arranged, however, according to a single annual cycle. This is evident from the present sequence of texts which differs from the order advocated by proponents of the seasonal and ritual approaches. The order proposed by Gaster corresponds to a view of KTU 1.1-1.2 and 1.4 VIII-1.6 as texts with parallel plots climaxing in the period of autumn rains (see Millar 1976:71-81; Clifford 1984:190). From this evidence Gaster builds a circumstantial case for an autumn festival that celebrated the kingship of Baal.

A different approach is perhaps indicated by the difficulties incurred by Gaster's view. Instead of examining the meteorological references for information which they may provide about a theoretical ritual setting which is then read as the background of the text, the meteorological references may have been used and adapted to the literary framework of the text. As Gaster's arrangment of the seasons in the Baal Cycle partially suggests, each major part of the cycle uses the imagery of the fall interchange period (Gibson 1984:216; Smith 1986b:331; cf. Mosca 1986:506-07). This period witnesses the alternation of the eastern dry winds of the scirocco with

[188] The following discussion was inspired in part by conversations with Professor Robert R. Wilson, and I wish to thank him. For traditional roles of deities placed in service to the theme of Baal's kingship, see also Walls 1992:177.

the western rain-bearing winds coming off the Mediterranean Sea until the western winds finally overtake the eastern winds (Nash 1989:18-19).[189] KTU 1.1-1.2 reaches its climax in Baal's victory over Yamm in KTU 1.2 IV. The meteorological phenomenon of Baal's coming in the storm over Yamm could be correlated with the coming of the fall rains. Scholars have long viewed Baal's battle with Yamm as inspired by the eastward procession of the rain-storm from the Mediterranean Sea to the coast. According to Gaster (*Thespis* 164-165), Lipiński (1967:253-282), Yadin (1970:211-214) and J. Day (1992:545), Baal's weapons in KTU 1.2 IV symbolize lightning.[190] These weapons may represent Baal's lightning and herald the coming rains, perhaps reflecting the Palestinian proverb that at the time of the fall interchange "the lightning is a sign of rain."[191] KTU 1.3-1.4 reaches its crescendo in the opening of the window in KTU 1.4 VI. Up to this point the rains have been lacking according to 1.4 V 6-9, and thus the opening of the window would mark the beginning of the rainy season during the period of the fall interchange. Scholars have compared the inauguration of Solomon's temple in the autumn; perhaps Baal's temple held a similar political significance (*SPUMB* 59-61). Finally, KTU 1.4 VIII-1.6 describes Baal's disappearance from, and return to, the realm of life. El's dream in 1.6 III implies Baal's meteorological powers, for El interprets the rain in his dream as a sign of Baal's return to life. The struggle between Baal and Mot in KTU 1.6 VI may draw on the imagery of the alternation of the eastern and western winds in the fall interchange, and Baal's tenuous victory over Mot at the end of this column may suggest the end of the summer dry season and the beginning of the early autumn rainy season. The narrative so inter-

---

[189] See above p. 68. The following remarks not only draw on the work of Gaster, de Moor and Mosca, but also the insight of A. Fitzgerald (apud Nash 1989) that the setting of some biblical texts is the fall interchange period when after alternation of westward dry winds (sirocco) and eastward rain-cloud bearing winds, the rains finally arrive from the Mediterranean. Based largely on the observations of Dalman and other visitors to the Holy Land during the late nineteenth and early twentieth centuries as well as their native Palestinian informants, Fitzgerald identifies the imagery of numerous biblical compositions with meteorological phenomena known during the fall interchange period. Particularly successful is the interpretation of the book of Joel along these lines which has been developed in the dissertation of Nash (1989).

[190] Cf. the similar arguments of Rendsburg (1984:18) regarding the Tell Asmar seal noted below on pp. 348-49.

[191] *Thespis* 238 citing Dalman; see Dalman 1928:114.

preted does not demonstrate that an autumn festival was the background for the Baal Cycle and its celebration. Rather, it suggests only that the Baal Cycle used the background of the fall interchange period to dramatize Baal's power. If an analogue may be suggested, Amos 4:6-13 and 7:1-9:6 climax in the storm theophany of Yahweh using imagery connected with the autumnal festival of Sukkot (see Talmon 1963; Coote 1981:56-57).

This approach affects the understanding of ritual information in the cycle. De Moor and Spronk propose a New Year's festival as the setting for the Baal cycle (cf. Dietrich and Loretz 1980). For de Moor (1988:238 n. 101) the religious setting is Baal's effecting of human resurrection, specifically "the revivification of the spirits of dead kings and heroes in the course of the New Year festival." Some scholars also use the closing lines of the cycle, 1.6 VI 42-53, to reconstruct a major New Year celebration involving Baal.[192] Dijkstra (1974:68) initially suggested that the final lines of the cycle, KTU 1.6 VI 42-53, represent an instruction from Baal to Shapshu to guide the shades to a sacrifical banquet. Dijkstra (1986: 152) subsequently re-interpreted this passage as a liturgical address to the audience[193] to participate in the autumnal festival which celebrated Baal's return and re-instatement as king. These reconstructions are highly controversial because the extant data are too problematic to confirm the background (Marcus 1973). The Baal Cycle evoked the associations of vivid religious language, even if the particular cultic setting of a hypothetical New Year's celebration did not underlie the cycle itself (Smith and Bloch-Smith 1988). While it is difficult to establish this specific ritual background, de Moor may be correct in detecting some religious background relating to the Ugaritic beliefs about the dead behind the related language in 1.17 VI 28-33 and 1.3 I 18-22a.[194] The language of 1.3 I 18-22a ob-

---

[192] See Kapelrud 1952: 29-30, 36, 97, 117, 123, 128, 131-33, 143; *Thespis* 31; *SPUMB* 244; cf. Spronk 1986:150-51.

[193] Rather than to Shapshu as most commentators propose.

[194] Later texts have played a role in this discussion. An Aramaic royal inscription, KAI 214:15-17, 20-22, reflects an apparently related belief about royal afterlife, as recognized by Greenfield (1973:46-52). Greenfield translates the passage:

> He will take the sceptre and he will sit on my throne [as king of Ya'diy] and he will acquire power... and he will sacrifice to Hadad... and he will sacrifice to Hadad and invoke the name of Hadad..(then he will say) "may the soul of Panamu eat with you and the soul of Panamu drink with you"...he will invoke the soul of Panamu with Hadad...may the offering be acceptable to

served by de Moor may draw on the powerful royal background of the cult of the dead to communicate and advance the theme of Baal's kingship.[195] Indeed, as noted above,[196] the description of Baal's death and return to life was perhaps influenced by the royal cult of the dead and not vice-versa.

Further circumstantial evidence may be cited to suggest the plausibility of this view. KTU 1.113 may bear on the royal cult of the dead (Pardee 1988b:170-78) as attested in 1.3 I and 1.17 VI. The front of the text describes musical instrumentation perhaps played by a figure called *nʿm* (Pardee 1988b:172); the same word is used for the player in 1.3 I 19 and the personage seems to be called by a similar appellation, *nʿmn,* in 1.17 VI 32. The back of 1.113 contains a list of kings originally containing at least thirty-two names (Kitchen 1975) and perhaps as many as fifty-two (Pardee 1988b:173). Despite the differences in details among the texts in question (Pardee 1988b:170-78), it would appear that the royal cult of Ugarit invoked the dead ancestors (KTU 1.161) and perhaps this cult is reflected in the musical instrumentation in KTU 1.113. KTU 1.3 I and 1.17 V 28-33 may have drawn on this imagery from the Ugaritic cult devoted to the dead monarchs. This religious background might also involve 1.108.1-5, if *rpʾu mlk ʿlm* who plays music in this text were to be identified with *nʿm* or viewed as the eponymous tribal figure (Yaqaru?) corresponding or related to the royal figure of *nʿm*. Indeed, it has been suggested that *ḫbr ktr ṯbm* in 1.108.1-5, whom *rpʾu* musically entertains, may be the Rephaim (so Smith apud Pardee 1988b:100 n. 111).

In addition to seasonal and ritual data, the Baal Cycle has incorporated older traditions of "cosmogony," or battles pitting a divine hero against a cosmic enemy to achieve its picture of Baal. While the Baal Cycle may be understood as cosmogonic in a general sense,

---

> Hadad and to El and to Rakib-El and to Shamash... Who[ever of] my sons grasps the sceptre and sits upon my seat as king [of Yaʾdiy] and confirms his rulership and sacri[fices to this Hadad and menti]ons the name of Panamu, let him say, "May the soul of Panamu e[a]t with Hadad, and may the soul of Panamu drink with Ha[dad]."

This text may suggest a royal setting for the theology of immortality in KTU 1.17 VI 28-33 (Healey 1984b; Spronk 1986:207). This background was perhaps presupposed for KTU 1.3 I and 1.6 III as well.

[195] It is also important to note one narrative difference between 1.3 I 18-22a and 1.17 VI 28-33. 1.3 I 18-22a makes no mention of Baal's return to life.

[196] See above p. 73.

strictly speaking the cycle has re-used the traditions of cosmogonic battle to highlight Baal's power. KTU 1.3 III 38-47 alludes to the tradition of Anat's victory over Yamm. The Baal Cycle perhaps reuses some of this material to stress that it is Baal's role to defeat Yamm. KTU 1.5 I 1-8 likewise alludes to an old battle between *ltn* and probably Baal.[197] The tradition of the battle against the seven-headed serpent, of which *ltn* and Leviathan are the Ugaritic and biblical reflexes, goes back at least to the late third millennium, as suggested by the Tell Asmar seal.[198] The Baal Cycle refers to these older conflicts perhaps as preludes to the victories of Baal over Yamm and Mot (*CS* 353). This use of older tradition might be compared with Ea's defeat of Apsu which anticipates Marduk's victory over Tiamat in Enuma Elish (Bottéro and Kramer 1989:658, 666-67).

The descriptions of Baal's enemies in the Baal Cycle may have developed at least in part to exalt the storm-god. As noted above,[199] Mot may have been modelled literarily after Yamm. The depiction of Yamm, too, may represent a literary creation. While traditions of battles against various creatures in the sea are known to antedate the Baal Cycle, there seems to be little if any evidence for the cosmic sea as an enemy of the storm-god beyond West Semitic tradition. In Greek tradition Zeus' enemies include Typhon (Weinfeld 1973), but not Poseidon who rules the sea. Similarly in Hittite mythology, Teshub defeats Ullikumi who arises out of the sea. When Indra fights the great cosmic battle, it is against Vrtra (Rgveda 1.32; *Thespis* 164-165). "Sea" is personified in Mesopotamian tradition, for example in the "Harab myth,"[200] but the references to Sea appear largely in theogonies and not in "cosmogonies" (to use the terminology of Fisher, Cross, Clifford and others). The exaltation of Baal through his conquest over Yamm is also realized in a specific

---

[197] Binger (1992:144-45) would prefer to attribute this role to Anat. Either is grammatically feasible although in a dialogue involving Baal as the addressee, it would seem more likely that Baal is the referent (see Clifford 1987). While one might bracket the evidence of 1.5 I 1-8 and one may agree with Binger that Anat's battles mentioned in 1.3 III 37-46 show her to be the slayer of the dragon, there is no reason to assume that Baal never manifested this role. Iconographic evidence, including the Tell Asmar seal (noted on pp. 346-47), would tend to support Baal as the hero of KTU 1.5 I 1-8.

[198] See below pp. 346-47.

[199] See above pp. 18-19.

[200] See above p. 86.

shift of Yamm's title *tpṭ* (KTU 1.2 IV 15, 16, 22, 25) to Baal (KTU 1.3 V 32; 1.4 IV 44). Baal receives recognition by Anat and Athirat as the figure who embodies "rulership." Thus Baal's defeat of Yamm contributes directly to a heightening of Baal's character: Baal is magnified through Yamm.

Anat's role as warrior and Baal's ally also exalts him, as her battling in the valley in KTU 1.3 II and her conflict with Mot in KTU 1.6 II contribute to Baal's victory over Yamm and Mot, respectively. Walls (1992:184, 185) presents Anat's defeat of Mot in terms of her character:

> Anat's mythic identity as a nubile young female is essential to her unique ability to defeat Death and restore fertility to the cosmos. This symbolism acknowledges that females have the ability to create life—to overcome death—while males do not. . . Anat overcomes Death by the creative potential stored within her as an adolescent maiden.

Van Rooy (1979) observes that Anat's relationship to Baal is not a static one in the Baal Cycle. Rather, the text shows a change from her restraint of Baal at the end of 1.2 I to her warfare and intercession on his behalf (cf. Walls 1992:163 n. 1). Furthermore, while Anat's battling in 1.3 II may have originated outside of the traditions associated with Baal, it perhaps functions in its present setting as the terrestrial counterpart to Baal's cosmic battling in 1.2 IV (Gray 1979:323). Other material in the Baal Cycle associated traditionally with Anat serves the narrative function of exalting Baal. As discussed above,[201] Parker (1989b:115) notes the material shared in common between KTU 1.3 IV-V1 and 17 VI-1.18 I and IV. Parker shows that the material from Aqhat comports with its context more suitably than in the Baal Cycle, implying secondary usage of traditional material in the Baal Cycle. The material assumes a different function in the Baal Cycle than it holds in Aqhat: it serves to advance the theme of Baal's kingship through the pursuit of his palace.

Just as the characters of Yamm and Mot as well as Anat ultimately exalt Baal, so also El and Kothar contribute to Baal's success as the new king of the cosmos. El's title of king is applied to Baal. El is called king in the formulas, *mlk ʾab šnm*, "king, father of years"

---

[201] See pp. 31-32.

(KTU 1.1 III 24; 1.3 V 1; 1.4 IV 24; 1.6 I 36), and *ʾil mlk dyknnh*, "El, the king, who created him" (KTU 1.3 V 35-36; 1.4 I 5-6). Baal, however, is hailed by Anat and Athirat as the new king (KTU 1.5 III 32, 1.4 IV 43). In receiving the title of "king," Baal grows in stature in terms of his authority within the pantheon and in the cosmos. As the new king, Baal serves in conjunction with the old king of the gods, El.[202]

Like El, Kothar (Smith 1985) contributes to the glory of Baal. Kothar's magical weapons bring Baal victory over Yamm in KTU 1.2 IV and then later the gifts necessary to bribe Athirat in KTU 1.4 I so that she might help to convince El of Baal's need for his own palace. Athtar and *ydʿ ylḥn*, two candidates nominated in KTU 1.6 I to replace Baal as divine king, likewise contribute to exalt Baal's kingship, for their inadequacies, manifest upon their attempts to assume the divine throne, serve as foils to underscore the strength and size of Baal (Greenfield 1985).[203] In sum, every major figure of the Baal Cycle contributes to the theme of Baal's kingship.

This overview of the diverse materials and traditions including meteorological phenomena, ritual information, cosmogonic battles and the characters of various deities, raises the question of the rationale behind this amalgamation and ordering of these materials. The answer lies in part with the central theme of the cycle, Baal's kingship. All of these different sets of material have been shaped to contribute to the story of Baal's rise to power and thereby magnify him. This development finds an analogue in Enuma Elish (see

---

[202] There is minimal evidence for El as a warrior (Roberts 1972:95-96 n. 233). If any such traditions for El as warrior existed in Ugaritic, they are attested vestigially at best and appear to have been displaced at Ugarit by the martial exploits of Anat and Baal.

[203] The poetic structure of 1.5 VI-1.6 III is pertinent to this point. The passage exhibits the large structure of a concentric pentacolon (ABCB'A'):

A Discovery of Baal's death (1.5 VI 3*-25)
  B Anat searches for Baal and mourns him (1.5 VI 25-1.6 I 31)
    C Nominations to replace Baal (1.6 I 32-67)
  B' Anat searches for Baal and destroys Mot (1.6 II)
A' Discovery of Baal's life (1.6 III).

This arrangement not only illustrates the balance and relationships among these columns; it also focuses attention on the events of the central section indicating that Baal is irreplaceable. Once the central section illustrates this point through the negative portraits of the two nominees for kingship, the narrative moves inexorably toward Baal's return to life and kingship (Waterston 1988:363). The word-pair *yrʾaʾun//ṯtʿ* in 1.5 II 7 is repeated as *yrʾu//ṯtʿ* in1.6 VI 30, and thus marks the episode of Baal's demise and its reversal.

Lambert 1965), a text frequently compared to the Baal Cycle. Like Marduk, Baal is a figure raised to a position of primary importance. The manner in which the text describes Baal also represents a significant departure from prior tradition. Baal resembles Marduk in Enuma Elish in that both gods are fitted with the attributes of other deities. Similarly, Baal compares with Yahweh in Israelite tradition who displays the characteristics associated with deities such as Baal, Asherah and Mot although biblical traditions are equally insistent on the distinction between Yahweh and the other deities of Israel (Korpel and de Moor 1986:244; Smith 1990). The collection of both older, traditional materials and the introduction of new features about Baal and the rest of the pantheon serve to exalt him over the cosmos. This manner of rendering Baal transforms him from being one contender for divine kingship to being literally the natural choice for the royal role. This development may be reflected also in his name. While Baal is identified with Haddu/Addu, the West Semitic storm-god, the reason for the dominance of his title *bʿl* in the Baal Cycle is unclear. In the Baal Cycle the name of Baal is shorthand for his longer title *bʿl ṣpn*, "Baal of Sapan," but it could additionally represent the embodiment or personification of divine "lordship" or "ownership," or in Koch's formulation (1988:201), "Innewerden der numinosen Kraft von Autorität."

While Baal's kingship is glorious, it is also fragile. The Baal Cycle describes a circumscribed or limited exaltation of the storm-god. This limited exaltation is indicated by the differences between the Baal Cycle and those texts which it is thought to resemble most closely. Major differences between the Baal Cycle and Enuma Elish indicate that the kingship of Baal is a hard-won reign, fraught with peril (cf. Lambert 1988:140). First, Baal fights on his own behalf and without the assembly's support. Lambert (1988:140) argues that unlike Marduk in Enuma Elish, the stature of Baal recalls Tishpak in the Labbu myth and Ninurta in the Anzu myth:

> . . . a junior god does battle with a demonic being or monster on behalf of elders unable to face the challenge themselves, but the promised reward does not include abdication in favour of the young victor.

The position of Baal in 1.2 I is even weaker than that of Tishpak and Ninurta, because unlike them the Cloud-rider fights on his own without the assembly's support. Second, Baal's victory in KTU 1.2 IV requires the aid of another deity, Kothar. In contrast, Marduk needs no help from an outsider. Third, while Marduk's palace is vir-

tually concomitant with his victory, Baal's palace requires a lengthy process of help and negotiations dependent on the aid of Anat and Athirat (1.3 III-1.4 VII). Furthermore, securing Athirat's aid additionally requires Kothar's help to make gifts so that she would be persuaded to intercede on Baal's behalf before El. Hurowitz (1992: 96) notes that different building stories emphasize different elements:

> Just as the 'historical' temple building stories displayed a tendency to emphasize a certain motif or segment in the story at the price of brevity in describing other segments, so in the myth: one story element has been blown out of proportion in such a way that it occupies most of the story.

While the quest for El's permission does not occupy "most of the story," it is the main issue governing seven extant columns. When this amount of text is contrasted with the relatively few number of columns or lines devoted to any other theme, for example Baal's status as king or his victory over Yamm in 1.2 IV, then it suggests his relatively weak status in the Baal Cycle. Fourth, Baal is proclaimed king after his defeat of Yamm, while Marduk is acclaimed king before his engagement with Tiamat. Moreover, the older gods including Ea proclaim Marduk as king while the old executive of the Ugaritic pantheon, El, acquiesces to Baal's kingship only after a lengthy process following his defeat of Yamm. Fifth, the Baal-Mot narrative represents a challenge to Baal's kingship and indicates the fragility of his royal status; there is no comparable sequence in Enuma Elish. Upon Baal's death, El and Athirat select candidates to replace Baal. Sixth, it is not by his own power that Baal returns to life in 1.6. Rather, Anat's destruction of death accompanies and apparently enables Baal's reappearance. Finally, the end of the cycle also reflects the fragility inherent in Baal's power. Baal's struggle with Mot in KTU 1.6 VI is ultimately a stalemate. Neither foe defeats the other, and Baal gains the upper hand only through the intervention of another deity. In sum, the general equilibrium of forces in the universe is achieved thanks not only to Baal's power, but perhaps more remarkably to all the help which he receives from the other deities.

This limited exaltation of Baal may correspond in some manner to Ugarit's limited political situation lying between the great powers of the ancient Near East, as Stolz (1982) quite correctly suggests. Through the myth Baal gains his own throne in his own palace

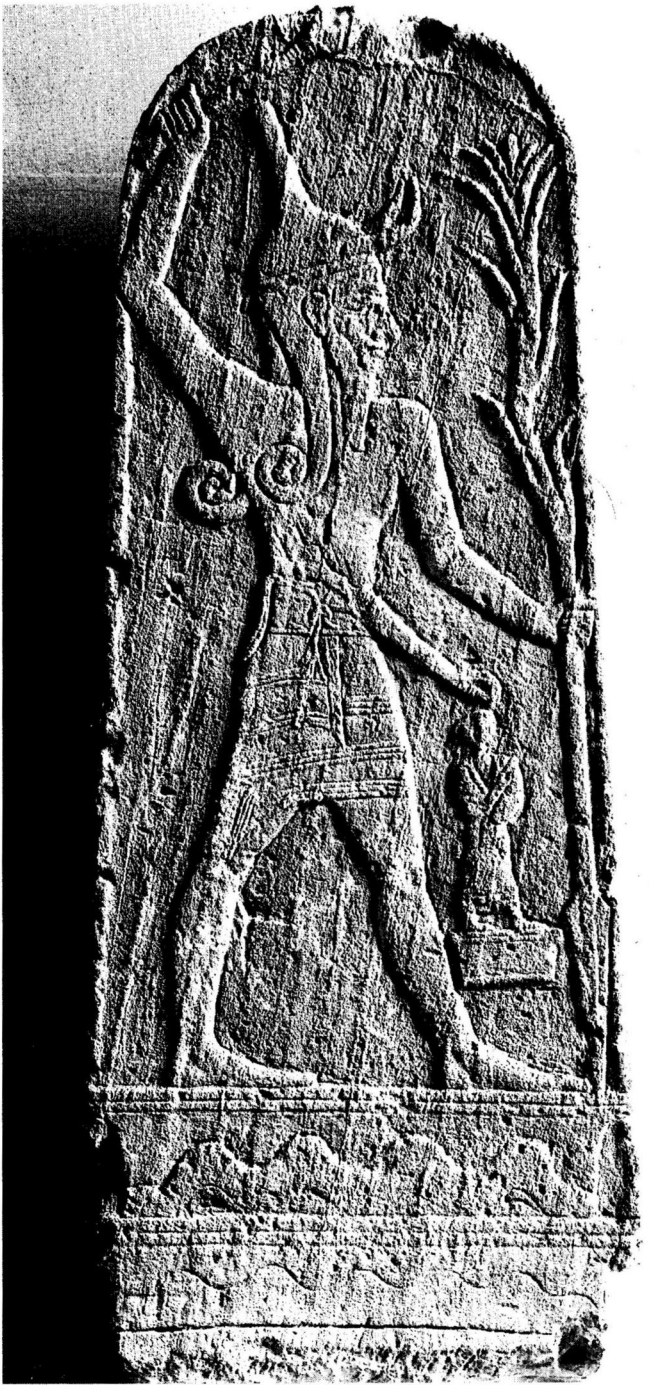
(Uehlinger 1992:355). As Baal's palace is located terrestrially at Mount Sapan, his kingship at Ugarit is identified with his kingship over the cosmos. The political ramifications were presumably immense. The cycle was developed under the royal aegis of the dynasty of Niqmaddu at Ugarit (Miller 1982:125). Divine kingship not infrequently paralleled human kingship in the Near East (Mann 1977), and the association between divine and human kingship sometimes involves expressions of the storm-god's support for the monarch. A famous stele from Ugarit now housed in the Louvre (RS 4.427 = AO 15.775) may link the human and divine dimensions of kingship. The stele (on facing page) depicts the god Baal wielding a weapon and standing on top of what scholars have taken as either Baal's mountain (Frankfort 1954:256), the sea or possibly both (Yon 1985:180; 1991:295; Bordreuil 1991:21-24).[204] There are two sets of undulating lines, one set beneath the figure of the standing god and another set further below. The separation of the two sets of undulating lines as well as the different mode of rendering these sets of lines would suggest that the two sets of lines represent two different features. For this reason the notion of the storm-god standing on mountains which lie above the waters is a reasonable interpretation. Bordreuil understands the four crests in the top set of undulating lines as the mountain range encompassing Mount Sapan. According to Ginsberg (1945a:53), Amiet (1980:201), Yon (1985:181) and Bordreuil (1991:21), the smaller figure standing before Baal and facing in the same direction as the god is the Ugaritic king.[205] Yon suggests that the stele expresses the close relationship between the god and the king; the god stands as the king's patron and protector. This depiction may encapsulate the political significance which KTU 1.1-1.2 held for the dynasty of Niqmaddu.

Other descriptions of the king couched in the language of the West Semitic storm-god hail from Egypt, Mari and the Levantine littoral.

---

[204] Williams-Forte (1983:30) consider mountains or a writhing serpent as possibilities. For a beautiful picture of this stele, see Amiet 1980:201 # 75. For a complete description, see Yon 1991: 294-99. For a discussion of this stele with the iconographic evidence for Baal standing on double mountains, see Dijkstra 1991. For other iconographic representations of the storm-god at Ugarit, see Seeden 1980:102-06.

[205] In contrast, Frankfort (1970:257, 396 n. 58) and Williams-Forte (1983:30) take the smaller figure as a goddess allied with the storm-god.



Baal and the Ugaritic King. Louvre AO 15.775 = RS 4.427.
Used with permission of the Musée du Louvre.

These examples illustrate the political application of the West Semitic conflict-myth. EA 108, 149:7, 159:7 and 207:16 (partially reconstructed) compare the pharaoh to Baal. EA 147:14 goes further, describing the Egyptian king as one "who gives forth his cry in the sky like Baal" (Moran 1992:233). In Egyptian texts, too, the pharaoh was not infrequently compared to Baal. One text (*ANET* 249) proclaims: "His battle cry is like (that of) Baal in the heavens."[206] According to Gaál (1977) lines 15 and 18 of the victory stele of Tutmosis III renders this king in terms reminiscent of Baal-Haddu:

> I have come that I may cause You to trample on the eastern land and to tread down those who are in the regions of Tonuter; that I may cause them to see Your Majesty as a lightning flash, strewing its levin-frame and giving its flood of water. . . I have come that I may cause you to trample on the Islanders in the midst of the sea, who are possessed with your war shout; that I may cause them to see Your Majesty as the Protector who appears on the back of his wild bull.[207]

Line 15 perhaps recalls Athirat's words to El that when the palace of Baal is constructed, the Storm-god's lightning and waters shall appear (1.4 V 6-9). As Gaál (1977:31) notes, line 18 recalls the imagery of the West Semitic storm-god astride the bull in a relief from Arslan Tash. The imagery comports with the description of Baal mating with a heifer in 1.5 V, which presupposes a characterization of him as a bull.

Mari texts likewise witness various types of associations between the West Semitic Storm-god and the king. In one text Addu is invoked to march at the side of Zimri-Lim: *i-la-ak ad-du-um i-na šu-me-li-šu*, "March, Addu, at his left side" (Charpin 1987:661). Another text from Mari (A.1968.1'-4') also uses the conflict between the storm-god and the cosmic sea to support royal power.[208] Nur-Sin of Aleppo reports to Zimri-Lim the words of Addu: "I s[et] you on the thr[one of your father]; the weapons with which I battled again Sea (*têmtum*) I gave to you" (*lu-t[e-e]r-ka a-na giš-[gu-za é a-bi-ka] ú-te-er-ka giš-tukul-[meš] sa it-ti te-em-tim am-ta-aḫ-ṣu ad-di-na-ak-kum*; Durand 1993:45). These weapons are known from another text (A.1958): they are said to have been installed in Dagan's temple at Terqa

[206] For an Egyptian example of the parallelism of cosmic and royal enemies, see the myth of Apophis in *ANET* 6-7 and esp. 7 nn. 19, 21.

[207] For the fuller context, see Faulkner in Simpson 1973:286-87.

[208] For full citation, see above p. 34.

(Durand 1993:53). As commentators (Charpin and Durand 1986: 174; Durand 1993; Bordreuil and Pardee 1993) have observed, the Ugaritic witness to Baal's conflict with Yamm corresponds to A.1968.1'-4' which pits Addu against Tiamat. The most impressive biblical example of divine empowerment of the monarch expressed in terms of the West Semitic conflict-myth is Ps 89:26 (RSV 25): *wĕśamtî bayyām yādô ûbannĕhārôt yĕmînô*, "And I shall set on Yamm his hand, and on River(s)[209] his right hand" (*CMHE* 258 n. 177). All of these texts indicate that the monarchies of Egypt, Levantine cities and Mari utilized the imagery of the West Semitic storm-god to dramatize royal power and legitimacy.

The Mari letter (A.1968. lines 1'-4') reflects the notion that the power of the West Semitic storm-god manifest through the king's defeat of his cosmic enemies recapitulates on the cosmic level the king's own power against his enemies. Perhaps the Baal-Yamm conflict, and perhaps the whole of the Baal Cycle, functioned at Ugarit along the lines explicitly mentioned in the Mari text: the divine kingship of Baal mirrors and reinforces the human kingship of the royal patron of the Baal Cycle.[210] This relationship between the kingship of Baal and Niqmaddu, the royal patron of the cycle, may be reflected further in the fact that Baal is the divine patron of the dynasty.[211] It is logical to suppose that if the heartland of Baal's cult such as Mari and the Levantine littoral as well as the periphery in Egypt used the imagery of Baal to support its sovereign, so too Ugarit, a center of his cult, understood this concept of divine and human kingship in its longest and most developed text devoted to

---

[209] In view of the regular use of the singular in Ugaritic, the plural form in this instance may be a plural of majesty.

[210] Similar arguments about the political background of Enuma Elish have been offered. Enuma Elish has been thought to functioned as political apology for the Amorite dynasty at Babylon. Lambert (1964:3-13) argues that Marduk's kingship over the pantheon finds a ready explanation in the events during the reign of Nebuchadnezzar I (ca. 1124-1103), especially in his victory over Elam and the celebrated return of the statue of Marduk to Babylon. An earlier date may be indicated. According to Dalley (1989:229-30), one part of the list of names of Marduk in tablet 7 of Enuma Elish is dependent on the lexical text An-Anum which shows that Enuma Elish or at least this portion of it predates the reign of Nebuchadnezzar I. Jacobsen (1975:76) suggests that the battle between Marduk and Tiamat reflects the political tension between Babylonia and the Sealand that began in the early second millennium. Whatever the origins for the composition of Enuma Elish, it later served as divine confirmation for the king of Babylon when it was recited at the New Year's festival (Nakata 1968; Dalley 1989:231-32; van der Toorn 1991a).

[211] See above p. 90.

Baal. In sum, it appears that the Baal Cycle expresses the political exaltation of the divine king, and by implication that of the human king, as well as the limits of their kingship.

The tradition of the West Semitic conflict myth may be attested not only at Ugarit, Mari and Egypt, but also in the Mesopotamian heartland. According to Jacobsen (1968; 1975:75-76), the Marduk-Tiamat conflict in Enuma Elish derived ultimately from a West Semitic prototype, represented by the Baal-Yamm struggle. Jacobsen bases his view on the observation that the climatic conditions of the thunderstorm and the sea underlying the battle between the storm-god, Marduk, and the cosmic sea, Tiamat, are to be found in the Levant and not in Mesopotamia. He argues that the West Semitic tradition as found in the Baal-Yamm story provided the basis for the East Semitic version of the story. Jacobsen suggests further that the story would have been imported into Mesopotamia by Amorites during the Old Babylonian period. On the basis of putative iconographic evidence, Kaplan (1976) argues for an older date, possibly even the Old Akkadian period.

The text from Mari (A.1968. lines 1′-4′) may provide a link between the Baal Cycle and Enuma Elish. The Ugaritic witness to Baal's conflict with Yamm provides an exemplar of the primary version, while the Mari text pitting Addu against Tiamat constitutes a secondary attestation, and the Enuma Elish depicting Marduk's struggle against Tiamat yet a tertiary witness. The names of the protagonists in the three texts are equated in a variety of sources. One of Baal's standard Ugaritic epithets, *hd*, Haddu, is equivalent to Akkadian Addu. Furthermore, in two corresponding lists of divinities discovered at Ugarit, ^{d}*adad bēl ḫuršân ḫazi* corresponds with *bʿl ṣpn* (RS 20.24.4; KTU 1.118.4; cf. 1.47.5; see Nougayrol, *Ug V*:44-48; Herdner, *Ug VII*:1-3). The same list provides the correlation of ^{d}*tâmtum* with *ym* (Nougayrol, *Ug V*:44-48; Herdner, *Ug VII*:1-3).[212] The Mari text (A.1968. lines 1′-4′) apparently witnesses to the West Semitic conflict tradition with the local names of the deities of Addu and Tiamat. The weapon mentioned in the Mari text also suggests the parallel with the Baal Cycle.

There is wide disagreement over Jacobsen's proposal. Lambert (1965; 1977; 1986) disputes Jacobsen's view and argues that the

---

[212] For further evidence for the cult of Yamm in the second and first millennia, see below pp. 151-52.

account of Marduk's conflict with Tiamat derived from indigenous Mesopotamian traditions concerning the god Ninurta.[213] According to Lambert (1986; cf. Lambert and Walcot 1965:69), the story of Ninurta's battle against the monstrous Anzu bird could have provided the background for the meteorological weaponry of Marduk.[214] J. Day (1985b:12) supports Lambert's position:

> Such common themes as exist between Enuma elish and the Baal-Yamm conflict cannot be attributed to direct influence, but rather be attributed to a common intellectual background. The upshot of all this is that one cannot postulate a West Semitic background to Enuma elish...

Jacobsen has his followers as well. Komoróczy (1973:31-32), Cross (*CMHE* 93, 113), Kaplan (1976), Greenstein (1982:208) and Dalley (1989:230) support Jacobsen's theory (cf. Greenfield 1985:195 n. 7; Malamat 1992:215). Although Assyriologists agree that Marduk's battle over the cosmic Sea was modelled largely on the indigenous Anzu traditions, this battle-scene may have incorporated some West Semitic material. Dalley argues (1989:230) that no Sumerian prototypes contain and therefore explain the cosmic Sea as the enemy in Enuma Elish. The Anzu traditions contain many of the antecedents for Enuma Elish but not the motif of the cosmic Sea.[215] This text also exhibits Marduk's assuming both the name and role of the storm god, Addu. This replacement is mentioned expressly in Enuma Elish 7.119 where Marduk's fourty-sixth name is ^{d}*Addu*.[216] The replacement of Marduk for West Semitic Addu is not without parallel. Line 10 of the obverse of CT 24 50 (BM 47406) likewise exhibits the replacement of Adad with Marduk in its delineation of various deities as aspects of Marduk: "Adad (is) Marduk of rain" (Böhl 1936:210; Lambert 1975b:198). The Mari letter A.1968 would suggest that the West Semitic conflict-myth existed within the larger Mesopotamian cultural sphere. Therefore, it is plausible that

[213] See Jan J. van Dijk 1983:1.9-23; Bottéro and Kramer 1989:659, 661, 668, 674.

[214] See *ANET* 111-13, 514-17; cf. the cautionary remarks of Dalley 1989:230-31.

[215] A different ecological background has been proposed for the Anzu traditions; see Hempel 1987.

[216] Böhl 1936:210; cf. Enuma Elish 5.47-54 and Bottéro and Kramer 1989:664. According to Dalley (1989:277 n. 52), the phonetic writing of the name is "specifically west-semitic."

the complex development of the rendering of Marduk and Tiamat in Enuma Elish involved primarily East Semitic elements, but possibly West Semitic ones as well.

The argument that West Semitic traditions made their way into Mesopotamia is by no means without parallel. Lambert (1982) demonstrates that some West Semitic features in Mesopotamian literature are to be attributed to an "Amorite"[217] importation during the Old Babylonian period. For example, the mount of divine assembly is located in the area of the Anti-Lebanon and Lebanon mountain ranges according to a fragment of the OB version of Gilgamesh and the Cedar Forest. More specifically, *mu-ša-ab a-nu-na-ki*, "the dwelling-place of the Anunnaki" is located in the area of *Ša-ri-a ù La-ab-na-na*, "the Sirion (Anti-Lebanon or Hermon range) and the Lebanon (range)."[218]

The use of the West Semitic conflict myth by the dynasties of Ugarit, Mari and Babylon may have derived from a common cultural heritage. KTU 1.161 invokes a long line of deceased heroes and kings in support of the kingship of Ammurapi and the city of Ugarit.[219] The deceased monarchs include king Niqmaddu, probably a later king than the ruler named in the colophon of the Baal Cycle or the figure by the same name who stands at the beginning of the Ugaritic dynasty (Kitchen 1977:134, 138). Line 10 calls the summoned heroes the "Assembly of Didanu" (*qbṣ ddn*), the same group[220] that KTU 1.15 III 2-4, 13-15 mentions in the blessing pronounced by El on the occasion of king Keret's wedding:

m$^{\flat}$id rm krt	May Keret be exalted greatly
btk rp$^{\flat}$i $^{\flat}$arṣ	Among the Rephaim of the Underworld,
bpḫr qbṣ dtn	In the Gathering of the Assembly of Ditanu.

The figure of Ditanu appears also in KTU 1.124.1-4: *kymġy $^{\flat}$adn $^{\flat}$ilm*

---

[217] By this term I do not mean specifically the kingdom of Amurru, but more generally the second millennium West Semitic stock known especially from Mari.

[218] T. Bauer 1957:255 rev. lines 13, 20; Lambert 1960a:12; *ANET* 504. Examples of specifically East Semitic influence on West Semitic texts are known as well. Texts influenced directly by Mesopotamian models are attested at Ugarit (for a list and discussion, see Mack-Fisher 1990:68-70, 75); these include a piece of Gilgamesh, the Flood story and the "counsels of Shube$^{\flat}$awilum." Lucian's *De Dea Syria* contains motifs considered to show contacts with the Gilgamesh epic (Oden 1977:36-40). Cultural contacts between east and west carried literary traditions in both directions over a long period of time.

[219] For references, see Bordreuil and Pardee 1982; Pitard 1987:75 n. 2.

[220] For the variation in the spellings, *ddn* and *dtn*, see Garr 1986.

rbm ʿm dtn wyšʾal mṯpṭ yld wyʿny nn dtn, "when the lord of the great gods go to Ditanu, and asks (of him) the ruling of (regarding) the child, then Ditanu answers him. . . ".[221] In this instance, Ditanu, a distant ancestor of the dynasty, is consulted for information.[222] Ugaritic *ddn* also occurs in the broken text, RIH 78/11.2. De Moor (1968:332-33), Lipiński (1978:94) and Pardee (1981b:133) compare Ugaritic *ddn/dtn* with *Di-ta-nu* in the genealogy of the Hammurapi dynasty of Babylon and with *Di-ta-na* and *Di-da-a-nu* in Assyrian King List A. As these sources indicate, *ddn/dtn* is a name belonging to an old genealogical stock to which the first Babylonian, Assyrian and Ugaritic dynasties traced their lineages. According to Kitchen (1977:142), *ddn/dtn* was an old West Semitic princely ancestor of approximately the twenty-second century and Keret a western descendant who came to be remembered in Ugaritic tradition.[223] In conclusion, the storm-god's battle against the cosmic sea may have been cherished long before the Amorite dynasties at Ugarit, Mari and Babylon enshrined them in the extant traditions of Baal-Haddu and Marduk.[224]

---

[221] Pardee 1981b; 1988b:179-92; Cazelle 1984:177-82.

[222] This mode of gaining divine information is found also in Israelite society (Deut 18:11; 1 Samuel 28; 2 Kgs 21:6).

[223] See Astour 1973; Levine and de Tarragon 1984:655; Pardee 1988b:165-78.

[224] See Mendenhall 1992:240. Some Indianist scholars believe that the West Semitic conflict myth moved further eastward from Mesopotamia to India (see Smith 1990:76 n. 117). According to Lahiri (1984), the West Semitic conflict myth was transmitted through Mesopotamia to India, and this influence is reflected in the Rgveda. In some texts from the Rgveda (1.32; 1.85; 1.165, 1.170 and 1.171; translated in O'Flaherty 1981:148-51, 167-72; see Velankar 1950), the storm-god, Indra, defeats the cosmic enemy, Vrtra with the aid of weapons made by a divine craftsman, Tvashtr just as the storm-god, Baal, vanquishes the cosmic enemy, Yamm, with the help of weapons fashioned by a divine artisan, Kothar. Wyatt (1988:391-98) suggests other parallels with the Rgveda. He compares Baal's meteorological entourage, "your seven youths (*šbʿt ġlmk*), your eight lads (*tmn ḫnzrk*)" in KTU 1.5 V 8-9, to the seven Maruts, assistants to either Indra or Rudra Siva, for example in Rgveda 8.28.5:

> The Seven carry seven spears;
> seven are the splendours they possess,
> seven the glories they assume.

The theory of borrowing from west to east has been made in various forms, ranging from theories of a direct borrowing to a more complicated model of various influences, with the Semitic conflict-story representing one influence on the development of the Indian narrative (Lahiri 1984; cf. Wyatt 1988:391-98). The proposals have been criticized on various grounds (Lahiri 1984; Santucci 1988). Besides the temporal and spatial distance involved in the theory, only thematic similarities be-

tween the Baal Cycle or Enuma Elish, on the one hand, and the Rgveda, on the other hand, can be adduced to support the idea of a borrowing. Furthermore, the opposite theory has been proposed to account for the similarities. According to Wyatt (1988), the West Semitic conflict myth derived ultimately from the Indian myth of Varaha. There are a few problems also with this theory. Wyatt's criteria for this position are thematic. There are no unquestionably Indo-European elements in the Baal Cycle which point in this direction. Despite the thematic parallels between the West and East Semitic conflict myths and the Indian traditions of Indra, the suggestions of both Lahiri and Wyatt are highly speculative. For further comparative analysis, see Stannard 1992:227-53, 285-86, 295-96. On such parallels, see the comments above of Coogan (1981:81) cited on p. 89, and Lambert (1988:128) cited on pp. 86-87 n. 167.

TEXT, TRANSLATION AND COMMENTARY

KTU 1.1

Other numbers: CTA 1 = UT *ʿnt*, plates ix, x = VI AB = RS 3.361 = AO 16.643 (museum number).

Measurements: 86 by 61 by 38 millimeters.

Physical condition: The tablet is beautifully preserved. The surface is damaged only at the edges; otherwise it is smooth and the signs are especially clear.

Find spot: house of the Great Priest, "tranchée" B 3, point topographique 9 at a depth of .65 cm. = point topographique 345 (Bordreuil and Pardee 1989:31).

KTU 1.1 V

Textual Notes

Line 1. *ḃ*: CTA and KTU read *b* while V has *b*(?). The photo shows all of the sign except the head of the top left-hand vertical wedge. The sign is not a *d* since no third horizontal wedge is visible despite the room for it.

Line 2. *ṁ*: The top left-hand portion of the head of the horizontal wedge is on the broken left-hand edge of the tablet.

Line 3. *n*: All read *n*. The very top left-hand corner of the head of the most left horizontal wedge falls on the broken left-hand edge of the tablet.

Line 4. *ḋ*: All read *d*. Only the most right-hand of the vertical wedges is visible from the photograph. The heads of two horizontal wedges are clear, but a third is not distinguishable. On this basis, one could argue that the reading is *b* and not *d*. Context, however, suggests *d* (cf. line 17).

Line 6. All read a word divider at the beginning of this line, but this word divider shows damage and it does not look like the word divider later in the same line. Furthermore, there is considerable space at the beginning of the line. If there is a word divider at the beginning of the line, one might expect to see some indication of a letter before the left-hand break.
n: This sign is written with four wedges (so also *n* in line 7).

Line 7. *ḃ*: All read *b*, but it is difficult to make out more than one wedge (although there is space for the wedges to form the letter *b*). The reading *b* is suggested by context (cf. line 20). If *b* is not the correct reading, then this is not a temporal particle, as interpreted by Caquot and Snzycer (*TO* 312: "ainsi"). A translation based on the root **bky*, "to weep," would also be excluded.
k: Although the reading is clear, there is damage to the top left-hand wedge. Against CTA and Horwitz (1972:48), the WSRP photograph shows no word divider after *m* (so V).

Line 8. *ỵ*: The reading is legible, but the three vertical wedges of the left-hand side of the sign fall on the left-hand break in the tablet.
d: All read *d*. The sign has only two horizontal wedges.

Line 9. *s*: All read *s*, which is slightly damaged due to a crack that runs through the sign. The reading is also suggested by context (cf. line 22).

Line 10. *ṯ*: All read *t*, but the sign is so damaged that the reading is not secure. The sign also falls along a small crack on the tablet.
KTU's reading of *x(?)x(?)* at the end of this line is apparently no more than damage on the surface of the tablet.

Line 11. *ẓ*: All read *²a*, but the photographs reveal so much damage that the reading is in doubt. Context might suggest the reading (cf. line 23).
KTU reads *x* before *²a* (against V and CTA). The photo shows that the space for

a sign and the damage there is sufficient so that a sign cannot be ruled out.
t: The sign goes through the scribal double lines that mark the edge of the column.

Line 12. *l*: There is a small break in the tablet which obscures the body of the left-hand vertical wedge. Otherwise the sign is clear.

Line 13. °: V and CTA read *w*, KTU *w**. The sign is considerably damaged. Only the two most right-hand horizontal wedges can be read with confidence. The sign may be *ʾa*, *n* or *w*. If the reading is *ʾa* or *n*, perhaps a verb (first sg. or pl.) from the root **g(w)r* is involved (see *MLC* 608).
y: The right-hand wedges are unclear.

Line 14. .: This word divider is written quite high.
r: The sign, especially in the two bottom left-hand horizontal wedges, is a little obscure.
n: The heads of the two right-hand wedges are indistinct.
h: The middle horizontal wedge is barely visible (cf. *h* in line 4).

Line 16. ˙: The word divider is now hardly visible, although all read it.
p: The top wedge comes right up to the edge of the winckelhocken of *š*.

Line 17. *d*: The left vertical wedge is off to the left.
h: The middle wedge is barely visible.

Line 19. *ʾi*: The heads of the two lower horizontal wedges are on top of one another.
š: A break on the tablet runs between the left-hand and middle wedges and it obscures the body of the left-hand wedge.
CTA reads a word-divider after *ʾišqb*, while V and Horwitz (1972:48) do not. The WSRP photograph shows a somewhat damaged word-divider.
l: The middle vertical wedge is only faintly visible.

Line 20. *ġ*: Before *mbkm* is a single vertical wedge which has been read as a word divider (so KTU; cf. V and CTA which read nothing before *mbkm*). Compared to the considerably smaller word divider later in this same line, this sign would appear not be a word divider. It is also unconnected to any other wedge(s) and therefore is likely *g*.
The word divider after the first *m* in this line is no more than a small crack.
Line 21. *d*: The middle and right-hand horizontal wedges of the second *d* in this line cannot be distinguished clearly in the photo. Perhaps as with some other *d*'s in KTU 1.1, this sign has only two horizontal wedges.

Line 22. *ʾi*: The middle horizontal wedge is barely visible.

Line 23. *s*: The wedges have a little space between them, unlike *s* in the preceding line.
n: The sign runs together with the following *m* sign and through the double scribal lines that mark the edge of the column.

Line 24. *ʾu*: The tablet has a break obscuring the body of the middle vertical wedge.

Line 25. *r*: The only portion of the sign which is not easily read is the middle upper horizontal wedge. KTU reads *g** before *r*, but there is no evidence in the photo for such a reading.
m: The bottom of the vertical wedge is partially damaged.
n: The bottom of the vertical wedge is partially damaged.
d: The sign is slightly damaged although the heads of all three wedges are visible.

t: All read *t*. The overall length of the wedge would suggest ʿ (though this is a crowded line), but the stance favors *t*. In ʿ the angle of the left edge to the horizontal edge of the letter tends to be about 45° and the horizontal edge is truly horizontal. The left edge of *t* generally has a higher angle to its horizontal (about 70°) and the horizontal edge goes (left to right) slightly diagonally upwards.

Line 26. *r*: The upper middle horizontal wedge is damaged.

Line 27. °: KTU reads *x* at the beginning of the line. There is room for a sign and enough damage to the space that a sign may be in the space. It may be conjectured that the orientation of the wedge is horizontal.
l̊: V reads *l* (?) while CTA and KTU read *l*. The heads of all three vertical wedges and the bodies of the middle and right-hand wedges are visible.

Line 28. *ḫ̊ǵ*: Both CTA and KTU (with an asterisk) read *.g* at the beginning of this line while V does not read anything in these spaces. A slim head of a vertical wedge apparently indicates the presence of a word divider. The single head of a vertical wedge (twice as wide as that of the word divider) follows, suggesting the sign for *g*.
r: The lower two wedges are slightly damaged, but the reading is clear.
ṣ: The body of the left-hand wedge is slightly damaged.

Line 29. °: There are remains of a sign below *r* and *ṣ* in line 28.

Commentary

Introduction

As Virolleaud observed in his *editio princeps*, it may be inferred from the words repeated in KTU 1.1 V that the column contains two sections consisting of lines 1-14 and 15-28 (*MLC* 98 n. 70, 157). Moreover, the lacunas in one section may be reconstructed on the basis of the more complete portions in parallel lines in the other section. The two major sections open with the standard formula for the passing of time, *ym ymm [yʿtqn]*, "a day, two days [will pass/passed]." The presence of *yʿn*, "he answered," in the middle of each section (lines 7 and 20) indicates that each of the two major parts, 1-14 and 15-28, may be subdivided into two further units, lines 1-6 and 7-14, and lines 15-19 and 20-28(?). With the exception of lines 7 and 20, the column may represent direct discourse, as first and second person suffixes or first or second person verbs in lines 4, 8, 10, 12, 14, 17, 18, 21, 22, 25, 26, 27 indicate (cf. opinions noted in *MLC* 98 n. 70). The two major sections, presented under the rubrics A and B, may be delineated and reconstructed in the following way:

	A		B
line			
2-3	ym ym]m[yᶜtqn]	15-16	ymymm[yᶜtqn]
3	ymǵy]npš	16	ymǵynpš
4	h]d.tngṯnh	17	hd.tngṯnh
5	lḥmk].bṣpn	18	l]ḥmkbṣpn
6	]nšb.bᶜn	19	ʾišqb.ʾaylt
7	]bkmyᶜn	20	bkm.yᶜn
8	ydᶜl]ydᶜt	21	ydᶜ.lydᶜt
9-10	t]ʾasrn[ṯrʾil]	22	tʾasrn.ṯrʾil
10	]trks	23	]rks
11	ʾa]bnm.ʾupqt	23-24	ʾabnm ʾupqt

If line 11 is reconstructed correctly on the basis of lines 23-24, it may indicate the approximate length of lines in this column. The word *ʾupqt* in line 24 apparently follows *ʾabnm* in line 23, which appears likely in view of the parallel in line 11. The amount of space in the lacuna preceding *ʾupqt* in line 24 would be very small; perhaps only a word divider falls in this gap. If so, then the lacunas at the beginnings of the lines in this column would be short. Unfortunately, there is no further evidence to corroborate this reconstruction.

Lines 1-5

Line 1 offers no information. Lines 2-3 and 15-16 mention the passage of "days." The verb **ᶜtq* refers to the passage of time in KTU 1.6 II 26 which uses the same formula as in 1.1 V 2-3.[1] 1.6 II 26-27 reads:

ym ymm yᶜtqn	A day, two days passed;
lymm lyrḥm	From days to months
rḥm ᶜnt tngṯh	Young Anat sought him.

The phrase *ymǵy npš* in lines 3 and 16 is syntactically difficult. The

[1] Pardee 1973; *MLC* 157. Cf. *ᶜattîq yômîn/yômayyā*ʾ, "(the) Ancient of Days," in Dan 7:9, 13, 22.

verb is one of motion, specifically of travel.[2] The noun in Ugaritic may refer to "desire, appetite," "throat" or "lung" as a type of offering; and "person(s)." Perhaps the noun might be understood in the third sense: "he will arrive with a *npš*" (see below). Or, the two words may not belong to the same syntactical unit. Line 4 refers to the purposed meeting of El or Yamm with Baal, presuming that Baal serves as the referent of the pronominal suffix—although this view may be disputed.

As lines 5 and 18 suggest, the location of the meeting between Baal and his enemy may be the mountain known in Ugaritic by both *ṣpn*, Sapan, and *ʾil ṣpn*, "divine Sapan,"[3] in Hittite as Mount Hazzi,[4] in Akkadian as *baʾliṣapûna*,[5] in Greek as Kasios and in Latin as mons Casius,[6] in modern Arabic as Jebel ʾel-Aqraʿ and in modern Turkish as Keldag.[7] The Ugaritic and Hittite names for the mountain, *ṣpn* and *ᵈḫursân ḫazi*, are equated in line 14 of KTU 1.118 = RS 20.24 (see Herdner, *UgVII*:1-3). Standing at a height of 5660 feet (1780 meters), the peak lies about twenty-five miles to the north of Ugarit and 2.5 miles from the coast (Hunt 1991:112).

Sapan is a well-known site of divine conflict. In 1.3 III 35-47 Anat's claims to have engaged various cosmic enemies include an

---

[2] Held (1962:289 n. 1; 1969:74 n. 32) takes the root as an allograph of *mṣʾ*/*mẓʾ* (cf. Aram *mṭʾ*; BH *mṣʾ*).

[3] The most common proposal for the etymology of Sapan is third weak **ṣpy*, "to look out" plus the *-ānu* adjectival morpheme, hence "look-out point" or the like (*Baal* 332-36). This view sometimes presupposes the root **ḥzy*, "to look" behind the Hittite name. One appeal of this approach is that the Storm-god is described as looking out from Mount Hazzi in the myth of Ullikumi: "Then they all joined hands and went up Mount Hazzi. (Tessub), the King of Kummiya, set his eye. He set his eye upon the dreadful Basalt. He beheld the dreadful Basalt, and because of his anger his appearance changed." (Hoffner 1990:55-56). Cross (*CMHE* 28 n. 87) takes *ṣpn* from middle weak, **ṣwp*, "to flow, overflow" with the *-ānu* sufformative which he calls the "adjectival morpheme." Lipiński (1971:62) claims that the middle weak root means "to float," and that Baal Sapan is the "lord of floating," which he considers a suitable title for a patron god of sailors. For criticisms and alternative proposals, see Grave 1980:225; 1982; de Savignac 1986.

[4] Güterbock 1951:145; *ANET* 123 and n. 8; cf. 205 and n. 3; Lambert 1985b:443 n. 42. Cf. Emar 472.58; 473.9; 476.21 (Fleming 1992:271). See also Dijkstra 1991.

[5] For the Akkadian references see *ANET* 282; *CEBCR* 106.

[6] See the survey of classical references in Fauth 1990. Lipiński (cited in Hunt 1991:107) derives Kasios from the Hittite form of the name, Hazzi.

[7] For the modern names of the mountain, see Bordreuil 1989. For the biblical *baʿal ṣĕpōn* located in Egypt (Exod 14:2, 9, and Num 33:7), see Fauth 1990.

allusion to divine battle at Sapan (*CMCOT* 59). The foe in question is difficult to determine, but Yamm, the first enemy in the list of enemies, represents a possible candidate. In any case, this passage attests a tradition of divine battle against Baal at Sapan. KTU 1.6 VI 1-2, 33-35 also situates Baal's conflict against Mot at the site of Sapan. The Hurrian-Hittite myth of Ullikumi places the conflict between the Storm-god and Ullikumi at Mount Hazzi.[8] Zeus also fights Typhon and other monsters on Mount Kasios (Apollodorus, *Bibl.* I, 5, 3.7f.; cf. Iliad 2:782f.; Hesiod, *Theogony*, 820f.).[9] Given the allusion to Sapan in KTU 1.1 V 5, 18, the conflict between Baal and Yamm in 1.2 IV may take place on this mountain. Oldenburg suggests that Baal, now having superseded El, dwells on El's original mountain. Oldenburg (*CEBCR* 125) comments: "Since the attack [in 1.1 V] happens upon Mount Sapân, it is clear that it is El's mountain from where he rules the world." The context does not require that Baal attacks El on Sapan; rather, in this passage Yamm is to meet Baal on Sapan. To judge from the widespread attestation of the various textual traditions, the motif of the Storm-god's conflict at Sapan is old, and as the allusion to this tradition in 1.3 III 35-47 would suggest, it predates the extant copy of the Baal Cycle. It is fitting that Sapan was known as the mountain of the great storm-god, as this mountain receives the heaviest annual rainfall on the Levantine coast at over fifty-seven inches (Hunt 1991:113).

If El is addressed in line 8, then perhaps Yamm, or less likely Baal, is the addressee of line 5. If so, line 4 reports El's wish that Yamm meet and defeat Baal, perhaps at Sapan. Lines 1-5 would appear to represent El's directions to Yamm to attack Baal. After a period of time (lines 2-3), Baal will arrive (line 3); at that time, Yamm should attack Baal, apparently at the site of Sapan (line 5). The picture of one party lying in wait for another has few parallels within the Ugaritic corpus, but the similarities of KTU 1.1 V-IV to 1.12 I are patent (*EUT* 30). KTU 1.12 I 29-37 reads[10]:

---

[8] Güterbock 1951:145; *ANET* 123 and n. 8; cf. 205 and n. 3; Lambert 1985b:443 n. 42.

[9] Zeus' similarities to Baal extend also to epithets, i.e. Baal's title, *rkb ʿrpt*, "Cloudrider" (Weinfeld 1973) and Zeus' epithet, *kelainephēs*, "the one in a black cloud" (Iliad 2:412, 6:267, 15:46, 21:520; Weinfeld 1983a:145).

[10] *Baal* 255-64; *TO* 341-42; *MLC* 482.

ʾilm ypʿr šmthm	El pronounces their names[11]:
bhm qrnm km ṯrm	"On them may there be horns like bulls,
wgbṯt km ʾibrm	And humps like buffaloes,
wbhm pn bʿl	And on them the face of Baal."[12]
bʿl ytlk wyṣd	Baal goes about hunting,
yh pʾat mdbr	He is at the edge of the outback.
wn ymġy ʾaklm	Then he comes upon the Eaters,
wymẓʾa ʿqqm	He encounters the Devourers.

There are five similarities between 1.1 V-IV and 1.12 (*EUT* 30). First, El initiates a plan directed against Baal. Second, this plan is to be effected through a third party, the "eaters" (*ʾaklm*) and "rippers" or "devourers" (*ʿqqm*)[13] in the case of 1.12 II. Third, in both 1.1 IV 17-20 and 1.12 I 29 El formally endorses the third party by "pronouncing the name" (**pʿr šm*). Fourth, the conflict is to transpire while Baal is travelling; in both texts "he will arrive" (*ymġy*). Fifth and finally, the confrontation is described with the verb **ngṯ*, "to seek."[14] The word **ngṯ* describes how Anat "seeks" Baal in 1.6

---

[11] Most commentators take the following lines as narrative, but Oldenburg (*CEBCR* 200) renders them as speech. The idiom **pʿr šm* elsewhere introduces direct discourse (1.2 IV 11, 18).

[12] So most commentators (*TO* 341-42 n. o). De Moor (1988:131 and n. 23; cf. de Moor and van der Lugt 1974:21) adopts this approach and comments: "They were hybrid creatures with an anthropoid face like the bull men of ancient Syrian art...Of course their facial likeness to Baʿlu was intended to provoke a mutual curiosity". The psychological dimension of this interpretation is at once intriguing and problematic: what was the source of the idea of animals with the face of Baal? Might these animals be hypostases of Baal who himself is elsewhere characterized as a virile young bull (1.5 V 18-23; 1.10 III 19-21, 35-37; cf. 1.12 II 54-55)? The word *pn*, "face," is one of the technical terms for hypostasis in West Semitic religion, although as a hypostasis, it usually applies to a goddess (cf. below pp. 281-82). Caquot and Sznycer (*TO* 341-42 n. o) take *pn(y) b* as adversative: "Et Baal se tournera contre eux."

[13] See Renfroe 1992:24, 107.

[14] See *EUT* 30. Ugaritic **ngṯ* is cognate with BH **ngš*, "to approach," as indicated further by the Ugaritic noun *mgṯ*, "offering" (Dietrich and Loretz 1986a:452; for the parallel semantic development, cf. BH **qrb*, "to be near," in the *C*-stem, "to bring near, offer"; *qorbān*, "offering"). See de Moor 1987:131. There has been some discussion over this root and Ug **ngš*. Ug **ngṯ* and **ngš* have been related to Arb roots **ngṯ* and *ngš* meaning "to approach" and "to seek" (so *CML*[1] 111, 156; *UM* 294; Dietrich and Loretz 1986a:452). Ug **ngš* and **ngṯ* have been compared also to BH **ngś*, "to press, drive, overwhelm," and BH **ngš*, "approach" respectively (Ullendorff 1962:340). The root **ngš* probably refers in 1.114.19 to Hby's "approaching" and not "attacking" El (de Moor 1969:173; 1970a:350; Pardee 1988b:60; cf. Dietrich and Loretz 1986a:452), and **ngš* in 1.23.68 describes the ap-

II 6 (*SPUMB* 208-09) and how Baal "stalks" beasts on foot in 1.12 I 40. The intended result, realized in the case of 1.12 II 54-55 but not in 1.1 V, is the defeat of Baal. Similarly, the Elkunirsa myth, especially in fragments 3 A iii 1-19 + 4 A iii 1-15, seems also to reflect an adversarial role for Elkunirsa, that is, El[15] (*ANET* 519; Hoffner 1975:141-42). Hoffner (1990:70) suggests for these broken lines that "Elkunirsa and Ashertu succeed in injuring Baal, for in the next fragment Baal is treated for injuries." The evidence in 1.1 V is most difficult; it may be suggested with all due caution that the point of Yamm's speech in 1.1 V is to induce El to produce a strategy against Baal, just as El does in 1.12 I and the Elkunirsa myth.

Like 1.1 IV 17-20 and 1.12 I 29, the Hurrian-Hittite Song of Ullikumi contains the motif of the older god's naming a new divine champion to attack the storm-god (*CEBCR* 128). In this text Kumarbi speaks (*ANET* 122):

> Kumarbi began to say to his soul:
> "What name [shall I give] him? . . .
> . . . let him go and let his name be Ullikummis!
> Let him ascend to heaven for kingship!
> Let him vanquish Kummiya, the beautiful city!
> Let him attack the Storm-god and tear [him] to pieces like a mortal!
> Let him tread him under foot [like] an ant !

It may be noted that there are some similarities among major divine protagonists in the Ugaritic and Hurrian-Hittite texts (Pope 1989:227-28). The older gods, El and Kumarbi, are the putative heads of the pantheon both challenged by younger storm-gods. The two older gods, both called father of the gods (*ANET* 122), promote and name younger challengers to the storm-gods. The new challengers are related to the sea: Yamm is Sea personified and Ullikumi arises from the sea when he attacks the storm-god. As noted above, the narratives of both texts use the same mountain, Sapan/Hazzi as a backdrop. Direct conflict between the old god and

---

proach of the "beautiful gods" to the watchman of the sown. Both examples would support the interpretation that in 1.6 II 21 **ngš* refers to Mot's "approach" of Baal (see de Moor 1987:87; L'Heureux 1979: 20; cf. *Baal* 199-200, 259).

[15] A form of the name of El meaning "El, Creator of Earth." See *CMHE* 16; Miller 1980; cf. **qny*, "establish" in KTU 3.9.2.

the storm-god is not involved in either Ullikumi or the Baal Cycle. Perhaps the motif of conflict between an older god and a younger god, effected through a third party, has been incorporated into the plot as the vehicle to describe the background leading to the combat in 1.2 IV. This type-scene suits the larger context of the Baal-Yamm conflict as El favors Yamm for kingship and opposes Baal who is an outsider to the family of El and Athirat.

Seeing this type-scene behind 1.1 V 1-5 may provide further clarification of *npš* in 1.1 IV 4. 1.12 I presents Baal hunting; perhaps the same scene is presumed in 1.1 V 1-5. Baal may be hunting, and when he comes, perhaps "he will arrive with a *npš*." The *npš* in this case would be an unnamed animal, perhaps game which he captured during his hunt.[16] This interpretation comports with *nšb* in line 6. The term *nšb* is the divine game described in KTU 1.114.10-11 (cf. line 13):

ʿṯtrt tʿdb nšb lh	Athtart offers a *nšb* to him,
wʿnt ktp	And Anat a shoulder-cut.

As Pardee (1988b:50) notes, the precise meaning of *nšb* is unknown, but as KTU 4.247.16-19 indicates, it is a slaughtered item (cf. Gray, *Ug VII*, 95). On the basis of this interpretation of *npš* and *nšb*, it would be feasible to reconstruct */l/ḥmk* in lines 5 and 18, as Virolleaud and Cassuto suggested. Oldenburg (*CEBCR* 186 n. 1) reads instead */t/ḥmk*, "your decree."

Lines 6-14

Line 7 marks the beginning of a new speech. One reconstruction is to render *bkmyʿn* as "...then he speaks." In any case, this line and its counterpart in line 20, may constitute the only narrative elements in this column. In line 8 Yamm perhaps responds to El and suggests that he should bind Baal (lines 9-10). El's handing over Baal to Yamm finds an analogue or perhaps more precisely anticipates KTU 1.2 I when El does indeed surrenders Baal to Yamm's messengers.[17]

"Stones" (*ʾabnm*) in line 11 was taken by Pope (*EUT* 30, 31) to

---

[16] The word has a wide range of meanings in Ugaritic including human persons (KTU 4.338.1). For other meanings, see Murtonen 1958; Pope 1978; Zevit 1990.

[17] In the Elkunirsa myth the god Elkunirsa hands over the Storm-god to be punished by Ashertu (*ANET* 519; Hoffner 1975:141-42; 1990:69-70).

refer to El's "testicles," which might be supported by appeal to BH *ʾăbānîm*, "stones," used for male genitalia in Qoh 3:5 (Kaufman 1979:157 n. 113). The notion of *ʾabnm* as "testicles" might be feasible, given further the appearance of "my loins" (*mtny*) in line 12 (cf. line 25) and "his loins" (*mtnh*) in line 14. If *ʾabnm* refers to bodily parts, they belong not to El, but to Baal; he is the intended victim of the discussion in this column. Indeed, Pope (*EUT* 31) invokes a parallel from the Kumarbi cycle which would militate against the notion of El's demise. Pope notes the words of Kumarbi, El's counterpart: "Give me my son, I want to devour my son" (*ANET* 121).[18]

The term *ʾupqt* in line 11 is exceptionally difficult to determine; *prima facie* it is a fem. sg. or pl. noun belonging to the root **ʾpq*, which occurs in Ugaritic as *ʾapq*, "channel," a term used regularly in the description of El's abode,[19] and often so understood in this passage (Mullen 1980:105). Given the morphological difference the word may be a verb, however.[20] If it is, it may be *G*-stem passive pf., "be restrained," possibly refering to El's or Yamm's restraint (while the other is expected to deal with Baal?).

Line 12, *ll°grmtny*, is likewise terribly difficult. It corresponds to *kl. tgr.mtnh* in line 14. In view of the verbal form in line 14, the prefixed *l-* in line 12 may be asseverative; given this interpretation of line 12, *kl* may be viewed not as the substantive, "all" or "every," but the conjunction *k-* plus asseverative *l-*. Line 12 may be translated accordingly "for he will surely X my loins" (assuming **mtn* is loins[21]), and line 14 may read correspondingly, "because you shall surely X (to) his loins." In other words, **gr* involves an action between two adversaries. The notion of an attack might be based on either BH **g(w)r*, "to attack, quarrel, stir up strife" (*BDB* 158) or **grh*, "excite, stir up, strife" (*D*-stem), "to engage in strife with" (with *b-*), "to excite onself, wage war" (*Dt*-stem) (*BDB* 173). Either root would comport with the context of line 12.

---

[18] Yet as Pope (*EUT* 31) stresses, "the text is so fragmentary that any guess is hazardous."

[19] On El's abode, see below pp. 227-36.

[20] Cf. *ʾapq tʾapq* in RIH 78/20.12 (Caquot and de Tarragon in Caquot, de Tarragon and Cunchillos 1989:58 n. 147; cf. Watson 1983b:12); BH **ʾpq*, "be constrained or restrained."

[21] Cf. Ak *matnu*; Eblaite *ma-da-nu* (= /matnu/, "tendon" (Fronzaroli 1984:144); BH *motnayim*. For the suggestion that this word in 1.1 V 12, 14 and 25 may mean "gift" (< **ytn*, "to give"), see *MLC* 585.

Line 13 */rq.gb* is likewise difficult. The second word may mean "back" as elsewhere in Ugaritic, in view of *mtny* in the previous and following lines. Possible reconstructions for the first word include */b]rq*, */[d]rq*, */[ṯ]rq*, and */[p]rq*, all roots extant in the Baal Cycle. It is unclear how any of these roots, except perhaps the second, would fit this context. The second reconstruction, in connection with *gb*, "back," might resemble *drqm ʾamtm* in 1.5 I 6 as a phrase for either a part or an aspect of Baal's forearm or a different part of his body. If so, */[d]rq gb* would refer to some part of Baal's body which like his loins in the previous and following lines may be the object of attack.

Lines 15-28

Lines 15-25a repeat many words attested lines 1-14 and add little new information. The name of El[22] as well as his title, *ṯr*, "bull" occur for the first time in the Baal Cycle in line 22 (1.2 I 16; 1.3 IV 54; 1.3 V 35; 1.4 I 4; 1.4 II 10; 1.4 IV 47; etc). The word *ṯr* occurs as PN in KTU 4.360.3, possibly as a hypocoristicon for *ʾil*ṯr*, "El is bull." KTU 1.15 IV 6, 8, 17 and 19 use *ṯr* to describe one group of nobles within Keret's kingdom. According to Philo of Byblos (PE 1.10.31; Attridge and Oden 1981:54-55), the head of the bull was an "emblem of kingship." The description of Yahweh as having horns "like the horns of the wild ox," *kĕtôpōt rĕʾēm*, in Num 24:8, represent reflexes of this imagery to El (see Smith 1990:51). The imagery also serves to represent power or leadership within West Semitic society according to Miller (1970a). Curtis (1990:31) suggests that El's title as bull "would suit the head of the pantheon admirably in the eyes of people who were familiar with herds. The bull was the head of the herd, the strongest and most fearsome of all the group, just as El was the head of the gods and, originally at least, the strongest and most to be feared."

Line 24 fills out the apparently parallel line 11 with the word *ʿrb*,

---

[22] For bibliography pertaining to El, see Pardee 1989-90b:434-36. Given the Ugaritic alphabetic form *ʾil*, the syllabically spelled forms *i?-lu?* and *DINGER-lu*$_4$ (Huehnergard 1987b:107) and BH *ʾēl*, the simplest etymology is middle weak *ʾ*y/wl*, "to be strong" of the stative formation analogous to BH *gēr*, "resident alien" ⟨ **gwr*, "to sojourn" (for a survey of views of the name of El, see *EUT* 16-19). This root is attested in the word *ʾawl* in 1.12 II 56, variously rendered as "first" or "prince" (for discussion, see Huehnergard 1987c:276). Oldenburg (*CEBCR* 164 n. 2) compares *hē dunamis*, "the Power" (Matt 26:64; Mark 14:62) with the name of El, but this NT expression may reflect the BH hypostasis of *derek*, "power, dominion," cognate with Ug *drkt*.

"to enter."[23] The significance of this word in either this line or line 26 is unclear.

The relationship between lines 25-28 and the previous section is also unclear. Line 25 contains *ʾatzd*, perhaps "you are presumptuous" (*CEBCR* 186), or given the collocation of *tzd* and *ltptq* (*Gt*-stem of **pwq*) in line 27, *zd* may be connected with eating, perhaps even provisions.[24] Line 26 may further describe a prelude to conflict: "you will enter; when he raises [his eyes?]." If so, line 28 may be understood as a prediction that [he will fall?] to the earth" (cf. 1.6 VI 22). If this approach to lines 25-28 is correct, then they might be viewed as the continuation of previous lines.

In general, the contents of the column remain unclear. Pope (*EUT* 30-32, 50, 91-94) and Oldenburg (*CEBCR* 124-25, 1875-86) argue that this scene refers to Baal's castration of El and his removal from kingship of the pantheon. This view has been criticized severely for the lack of evidence (L'Heureux 1979:21-26; Mullen 1980:92-101). From the verbs **ʾsr*, "to bind" (lines 9, 10, 22 and 23) and **rks*, "to bind" (lines 10 and 23), it would appear that some sort of conflict is discussed although the protagonists remain unclear (L'Heureux 1979:21-26; Mullen 1980:105). Line 17 mentions Haddu, a title of Baal in the Ugaritic texts meaning "thunderer,"[25] and an unnamed subject of the verb in *tngṯnh* (possibly "you" [sg. or pl.], "she" or "they"). If the suffix of the verb refers to Baal, then Yamm may be the subject of the verb. However, if the *hd tngth* were to be understood as a syntactic unit, then *hd* might be vocative and Yamm the referent of the object. It may be suggested tentatively that the former seems more appropriate to the context. The following column, KTU 1.1 IV, includes a speech apparently of El informing Yamm that he needs to dispose of Baal. The topics of the two columns might be connected: both involve conflict between two divine protagonists. 1.1 IV perhaps provides the general setting for 1.1 V: Baal stands in opposition to Yamm, whom El supports for kingship.

---

[23] On the irregular correspondence of Ugaritic **ʿrb*, "to enter," and Arabic *ġrb*, "to go away," see Fronzaroli 1955:19, 68; *UT* 19.1915.

[24] Muller (1970:233 n. 48) compares Arab **zwd*, "provisions for travelling" (Lane 1267).

[25] On the basis of the Arb root **hdd*, "to thunder." See Pope, *WdM* 254; *Baal* 350; *CEBCR* 59. One danger in such etymologies is that deity may be the source for the attested meaning. Even so, the putative etymology would then reflect a function or aspect of the deity. For bibliography pertaining to Hadad, see Pardee 1989-90b:448-49.

De Moor (1987:27) makes Baal and El the interlocutors in this column. According to de Moor, Baal speakers the words of line 22:

I know for sure, [o Ilu],
[I perceive with certainty]
[that] you would imprison me, Bull Ilu...

It is arguable, however, that Baal is not a participant in this conversation. Perhaps it is Yamm who speaks in the vocative to El, "you shall bind him, Bull El." In either case, it seems that El is not deposed in this column; rather, he sponsors Yamm's kingship. The thrust of Yamm's speech may be that he expects El to dispose of Baal for him. Indeed, there is no indication that Baal castrates or has castrated El. Pope notes friction between El and Baal, especially in KTU 1.12 II, but there is no indication that a conflict erupts between them in 1.1 V, especially not one that results in El's demise. Indeed, El appear enthroned in 1.2 I and later El supports Baal's kingship after the Cloudrider proves himself against Yamm (1.2 IV) and after some cajoling of El by Anat and Athirat (1.3 III-1.4 V). Explicit conflict between El and Baal is not described in the extant Ugaritic material, although it may have existed in Ugaritic tradition besides the extant Baal Cycle's attestation to otherwise peaceful relations between these two great gods. L'Heureux (1979:3-108), Mullen (1980:92-101) and Schloen (1993) rightly question the nature of conflict between El and Baal, yet L'Heureux (1979:17) states that it "may not be possible to exorcize all traces of rivalry between Baal and El." The indirect character of the friction between El and Baal may be deduced also from 1.12 I and the Elkunirsa myth (*ANET* 519).[26]

This rivalry may underly the special character of Yamm's relationship with El compared with cosmic foes in other ancient Near Eastern narratives involving the Storm-god. Unlike Tiamat in Enuma Elish, Yamm presents a threat only to Baal and not to the entire divine assembly. Tiamat threatens the divine council, including Ea, El's counterpart. Furthermore, Marduk is Ea's choice for champion (Enuma Elish 2.98-99). Tiamat is unrelated to Ea and is inimicable to Ea's purposes. In sharp contrast, El calls Yamm "my son" in 1.1 IV 14. Hence Enuma Elish and the Baal Cycle present the relations

[26] For the question of relations between El and Baal, see above pp. 91-94.

among the high god, the Storm-god and the cosmic enemy in very different terms. In the Baal Cycle the divine conflict between the Storm-god and the cosmic foe has been brought into line with other themes, especially the divine family and the precarious character of Baal's kingship.

In sum, it may be guessed that in the first part of 1.1 V, El tells Yamm to dispose of Baal, and Yamm responds that El should do it. In the second part, El agrees to help and Yamm affirms this arrangement. Although there is no firm evidence for this reconstruction, it is consistent with El's adherence to Yamm's demands to surrender Baal in 1.2 I.

KTU 1.1 IV

Textual Notes

Line 1. V does not read this line. CTA has: */—]m. (ṣ/y) [ ]*. KTU reads: *[ ]m.ṣ*/y* t*/p*r* [ ]*. *CML*^{2} suggests *[g]m.ṣ[ḫ]* as a possibility. The line shows the bottoms of four vertical wedges, which appear to represent one vertical wedge, two word dividers and finally an *ṣ*. Then there is a space, and finally either remains of a letter and/or damage to the tablet. CTA's reading of *m* is apparently based on slight evidence of a horizontal wedge before the first vertical wedge. But what may be taken for the barest remains of a letter in the photo may just be due to the poor condition of the tablet. In comparison to the *m* in line 2, one would not expect to be able to see the horizontal wedge of the *m* in line 1, since the horizontal wedge of the *m* in line 2 is written above the head of the vertical wedge of the *m* and the space above the body of the vertical wedge falls in upper broken edge of the tablet (see also *m* in lines 3, 5, 6, 8, 9). Therefore, the reading *m* is by no means likely. The apparent source for the reading *y* lies with the most right-hand of the four vertical wedges. Compared with the other three vertical wedges to its left, the fourth wedge is wider at the top at the edge of the tablet. From the photograph one cannot determine whether or not this is due to the head of a wedge falling within the extant portion of the tablet. This may be part of a sign which is vertical and has more than one wedge, thus *y* (but possibly also *z*, *ḥ*). Yet the alternate reading *ṣ* may be preferable as there is no indication of two or three vertical wedges (as required by *z*, *ḥ* or *y*). Rather, one wedge is apparent from the photograph. The right-hand wedge of *ṣ* is considerably smaller than its left-hand wedge (see *ṣ* in line 4).

Line 2. *ĝ*: Only the top right-hand corner of the head is visible. Context suggests the reading.

°: V and CTA read *r* as part of the reconstructed portion of the line. V suggests *lq[rbm*. CTA Appendix (p. 292), KTU and *CML*^{2} 39 note the possibility of reading *q[ṣm ʾilm]*, a phrase found in KTU 1.114.2. The WSRP photo shows, however, parts of two wedges; the bottom one seems to be a horizontal wedge. This reading would exclude *q[ṣm]* as a possible reconstruction, and leaves *r* as a possible reading. Most tentatively *qḅ[ṣ]* has been reconstructed in the translation above, but this is only a guess.

Line 3. *p*: CTA and KTU read *p* without qualification while V places a question mark after the reading. The photo shows the letter clearly. Only the tip of the body of the upper horizontal wedge is damaged.

Line 4. *ḫ*: The head of the horizontal wedge is slightly damaged.
ʾi: The vertical wedge is separated from the lowest horizontal wedge (cf. *ʾi* in line 6).
m̊: V reads no space after *b*, while CTA (p. 292) and KTU read a possible *m* (so also *MLC* 158; cf. del Olmo Lete 1984:41). Like V, others read *b[mrzḫḫ]* on the basis of KTU 1.114.15 (so *SPUMB* 116). In either case, many accept the reconstruction (Gordon 1977:87; *UT* 19.2312; Barstad 1984:138; *TO* 307 n. 6). The WSRP photo barely shows the head of a horizontal wedge.

Line 5. *b̊*: The sign is damaged. The damaged wedges appear to be filled in with only part of their outline remaining (cf. a similar case in the *d* of line 28, etc.). The right-hand diagonal edge of both horizontal wedges is partially visible.
ṯ̊: This sign is somewhat damaged. V places a question mark after reading *ṯ* (= V's *š̊*). Both CTA and KTU read *ṯ* though with qualification. The sign looks similar to *ṯ* in line 9.
°?: KTU places an *x* at the end of the line signifying space for a sign which is at present illegible. The space there is no greater or less than at the end of the next line where KTU does not read *x*. In either case, it is likely that if any sign is involved here, it includes a horizontal wedge.

Line 6. *ʾi*: The head of the upper horizontal wedge is damaged but legible, and parts of the two other horizontal wedges can be seen from the photo.
l: The middle vertical wedge of this sign is damaged and cannot be read clearly from the photo.
b: Compared to the first *b* in this line, the vertical wedges' heads of the second *b* are written a bit apart.
ʾi: The left and middle wedges are apart (cf. *l* in line 5).

Line 7. *d*: There are only two horizontal wedges.
l: The left vertical wedge overlaps with the middle vertical wedge.
ʾå: At the right-hand edge of the line, the heads of two horizontal edges are visible. The letter *n* would also be a possible reading.

Line 8. °: This could be a word divider as read by V and CTA. Yet this sign looks little like the word divider in the same line or in the preceding or following lines. Moreover, the head of a vertical sign is visible; *ḫ*, *t* and *m* are possible readings.

Lines 9-10a are reconstructed partially on the basis of 1.3 I 10-11.
Line 9. *ʾå*: All read *n*, and KTU offers *ʾa* as an alternative. There is no indication of a middle horizontal wedge making *ʾa* the correct reading. As de Moor (*SPUMB* 118) notes, the reading *rṯn* would be a bi-form of *rṯ*, "mud," which epigraphically is less probable. As in V's hand-copy, *rṯʾa*, "curdled milk," or the like, is more likely (see *GA* 99; *CML*^{2} 39).
y: Compared with *y*'s in line 8, the wedges' heads are not distinct.

t: Only the tip of the body of the wedge is obscured by the right-hand edge of the tablet.
n̂: CTA and KTU (with an asterisk) read *n* after *t*. There is something which might be interpreted as the head of the most left-hand horizontal wedge of an *n*. However, this *n* is not formed like left-hand wedge of the *n* in line 10. The head of the third wedge is smaller than those of the first two wedges.

Line 10. °: KTU reads *x* after the second word divider in this line. There may be the left-hand part of the head of a large horizontal wedge. It may be *m* (but not *p*; cf. *p* in lines 15 and 17).

Line 11. *m*: V has *m*(?), CTA *p*, and KTU *p**. It is a horizontal wedge (cf. *s* in the same line). (The stance of the sign differs considerably from the ˁ in line 13, and is probably not a winkelhocken. It is clearly not a vertical wedge.) The wedge after the single horizontal wedge cannot be determined as it falls on the broken right-hand edge of the tablet. The head of the horizontal wedge appears too big to be either the horizontal wedge of *p*, but it fits well with the head of the horizontal wedge of *m*. If the reading were *p*, however, one would expect to see the second horizontal stroke. It is certainly not above the extant horizontal stroke, for then it would be way above the line. There is no indication of it below the extant horizontal stroke, either. Besides *m*, *t* is a possible reading. The root may be *ʾ*sp* (see del Olmo Lete 1977:38).

Line 12. *h*: This letter is written with four wedges.
r: The most right-hand vertical wedge is slightly damaged. The top left corner of the head and the body of the wedge are obscure.

Line 13. *ṯ*: The head of the horizontal wedge and the winkelhocken are both clear. The right-hand edge of the head of the vertical wedge can be seen, but the rest of the vertical wedge cannot be seen.
⟨*p*⟩: CTA reads *ltn* and emends to *ltpn*. According to KTU the letter is written under *n*. What KTU takes as a *p* does not appear to be a sign.
n: The left-hand wedge's head is damaged, but it is partially visible from the WSRP photo.
All read a word divider after *l*, but compared to the preceding word divider in the same line, what remains could be either scratches on the tablet or a damaged word divider.
CTA and KTU (with an asterisk) read *p* after *d* at the end of the line, while V relegates *p* to the portion of the reconstructed portion of the line. The photo shows neither *p* nor room for any sign.
The end of the line might reconstructed *wyˁn. lṯ⟨p⟩n. ild[bḫ]*, "And Bene⟨fi⟩cent El answered: 'Sa[crifice. . .]" on the basis of *ʾildbḫ.[. . .]* in line 28.

Line 14. *t*: All read *l*, but the left-hand edge of an adjoining vertical wedge, if it existed, would be obscured by the right-hand edge of the tablet. The single horizontal wedge read by all as *t* could be an *m*.

Line 15. *w*: The two left-hand wedges are separated from the rest of the sign.
m: All read *m*. Only the horizontal wedge survives of this sign, justifying V's question mark after it.

Line 16. *n*: Over the most left-hand horizontal wedge, there is something that appears to be a small, vertical wedge. It may represent an inadvertent scribal error. KTU reads a word divider at the end of the line, but this is not visible in the photo.

Line 17. *d*: This sign has two horizontal wedges.

n: The sign is legible, but has slight damage.
ᶜ: This winkelhocken is smaller than normal for this letter.
r: V and CTA read *r*, KTU *r**. The body of the most right-hand horizontal wedge falls along the right-hand side of the tablet and cannot be seen from the photo.

Line 18. *ʾi*: The vertical wedge is slightly damaged.

Line 19. *r̊*: In the photo this sign consists of a damaged area and a horizontal wedge that follows. Just before the horizontal wedge, there are two tips of horizontal wedges. The length of *r* here (which is the largest letter this scribe makes) matches well with *r* in line 15.
t̊: V reads *t*(?), CTA *t* and KTU *t**. The photo shows a clear head of a horizontal wedge (the body is obscure). The reading is possible although the head is rather small for a *t* (other letters with horizontal wedges could be considered.)

Line 20. *k*: The right wedge is separated from the rest of the sign (cf. *k* in line 18).
m: The wedges are close together (cf. *m* in line 19).
d: This letter has only two horizontal wedges.

Line 21. *t*: The head of a single horizontal wedge is visible; other readings besides *t*, are possible. Against V and CTA, KTU reads word divider after *t*. There is no word divider in the WSRP photograph.
d̊: V and CTA read nothing after *d*, but KTU reads *t**. The photo shows clearly the head of a horizontal wedge. Readings other than *t* are feasible, however.

Line 22. All read a word divider after *d*, but the photo only shows scratches. They do not look like the word divider in the preceding line, and they lack the form of the word divider.
b: All that remains of this sign is the top left-hand vertical wedge and the head of the bottom left-hand horizontal wedge. Context suggests the reading *b*, adopted by all (KTU reading with an asterisk).

Line 23. *d*: This sign has only two horizontal wedges.
All read a word divider after *d* (though CTA's drawing does not indicate this word divider). It may be just a scratch on the tablet.
n̊: All read *n*, but the sign looks more like an *ʾa* than *n*. The three horizontal wedges are barely distinguishable in the photo compared to the wedges in the two *n* signs in the same line. The third wedge may lie in the broken edge of the right hand side of the tablet, although the heads of the second and third wedges of *n* are closer than such a reconstruction usually presupposes. The *ʾa* reading might be considered as likely as *n* based on epigraphic considerations. If *n* is not the correct reading, then the speaker is not claiming the "he (Baal?) has abused me/us" (see del Olmo Lete 1977:32, 36).

Lines 24-25. These lines are reconstructed on the basis of KTU 1.2 IV 12-13, 20 and 1.3 IV 2-3.
Line 24. *k*: All read *k*. All that remains of the sign are the top and bottom left horizontal wedges' heads and part of their bodies. The reading *k* is indicated by context.

Line 25. °: Only KTU reads anything after *š*, namely *x*. In support of KTU, the area before before the right-hand edge of the tablet shows the head of a horizontal wedge, perhaps *t*.

Line 26 is reconstructed on the basis of 1.2 IV 12b-13a, 20 (cf. 1.1 IV 24-25a). See *MLC* 160.

Line 27 has been reconstructed on the basis of 1.3 V 1 (*MLC* 160), but the verb governing the reconstructed clause in line 27 differs, however, from the verb in 1.3 V 1.

Line 28. CTA and KTU read a word-divider after *ʾil*. As V and Horwitz (1972:48) argue, the WSRP shows no word-divider after *ʾil*.
d: The sign can be read despite some difficulty.

Line 29. °: Only KTU reads anything after *b*, namely *t**/*n**. The WSRP photo shows the head of a horizontal wedge. Many readings are possible.

Lines 30-32. These lines are restored according to the parallel texts, KTU 1.4 VI 40-43 and 1.22 I 12-14.

Line 31. .: Against V and with CTA and KTU, the WSRP photograph shows a word divider after *m*.

Line 32. *ʾi*: V and CTA read *ʾi*, KTU *i**. All that clearly remains of this sign is the uppermost horizontal wedge. There may be the barest evidence of a second horizontal wedge. The remains compare favorably with some other *ʾi*'s in this tablet, for example in line 26.
ṁ: The head of the horizontal wedge and all of the vertical wedge are visible. Some of the body of the horizontal wedge can be seen as well.
ṙ: The heads of the upper horizontal wedges can be seen from the photo. All read *r*.
ṁ: All read a word divider. There is the head of a vertical wedge which is possible a word divider. Based on the parallels to this line (1.4 VI 40-43 and 1.22 I 12-14), the reconstruction after *ʾimr* would be *[qmṣ.lPim]*. The head of the visible vertical wedge would fit the position expected to be filled by *m* in *[qmṣ]*. Therefore, *m* is read tentatively instead of a word-divider.

Commentary

Introduction

It is difficult to identify the overall structure(s) of this fragmentary column.[28] Three main parts may be inferred. First, a section describes an invitation to a feast, perhaps with a reference to El's drinking in progress in (lines 1-11). Del Olmo Lete (1984:39) describes this section as a "Lamento por Yammu" while others generally characterize this section as a description of the poverty of El's circumstances. Second, El discusses with Athirat the naming of *yw* as Yamm and El commissions Yamm to defeat Baal (lines 12-27). Third, El carries out a feast (lines 28-32).

The location of El's feasting is unclear. The houses mentioned in lines 6 and 21 are different, the first belonging to El and the second to Yamm (cf. Murtonen 1952:91). Indeed, Gibson (*CML*^{2} 39 n. 3)

---

[28] For a massive reconstruction of this column, see del Olmo Lete 1984:39-47.

takes the house in line 21 as that of Yamm indicating that his house is already built. Gibson thus presumes that 1.2 III preceded this column. Palace-building appears later in the Baal Cycle as a mark of victory (1.4 V-VII following 1.2 IV), and at the point when El instructs Yamm to defeat Baal in lines 24-25 of this column, Yamm does not yet have a house (del Olmo Lete 1977:34). The house mentioned in line 21 is that of Yamm, but it has yet to be built.

Lines 1-4

This section contain the hallmarks of a divine feast. According to Lichtenstein (1968-69), the feast in Ugaritic and biblical literature may contain four elements: (1) the preparation of food; (2) the summons to the feast; (3) the service of drink; and (4) the service of food.[29] KTU 1.4 VI contains the four elements in Lichtenstein's schema: Baal prepares the food (lines 39-43); Baal summons deities to his feast (lines 44-46); Baal serves them wine (lines 47-54); and the deities are supplied with food (lines 56-58).[30] Some of these elements do not appear in El's feast in 1.1 IV. Moreover, the motif of the preparation of the meal does not appear prior to lines 28-32 which would seem to constitute a second feast given that the preparation precedes the invitation.

Del Olmo Lete (1977:33) notes that lines 1-12 contain a dialogue between El and some goddess(es), as he is addressed in line 6. Del Olmo Lete (1977:36) and Gibson (*CML*^{2} 39) treat the initial few lines as narrative which introduce a speech at the end of line 4 proclaiming that El sits in his marzeah. This view reconciles the placement of *ṣḥ*, "he/they called," immediately prior to *ʾil yṯb bm[rzḥḥ]*, "El sits in [his] ma[rzeah . . .]". It also accords with the topos of the divine feast: mention of summons (lines 1-4a) followed by the invitation itself (lines 4b-7?). De Moor (1987:24) takes all of lines 1-12 as the speech of Athirat who complains of the poor condition of El and his family and advocates El's naming of Yamm as king. The fault of El's condition lies with the usurper Baal who treats poorly El and the other members of the pantheon. Gibson (*CML*^{2}

---

[29] Sexual activity, or at least an offer of sexual intercourse, may have constituted an optional fifth element, perhaps implied at the end of KTU 1.3 I when Baal eyes his girls following feasting, or in 1.4 IV 31-39 when El offers to Athirat first food and drink and then sexual pleasure. In the parallel in the Elkunirsa myth (*ANET* 519; Hoffner 1990:70) Elkunirsa engages in sexual relations with Ashertu.

[30] Line 55, which includes mention of both drinking and eating, represents a cliché which may connect the feast to the next episode.

4, 39) interprets these lines as part of a speech which includes lines 3 through 8 as well; indeed, lines 1-12 contains some direct discourse indicated by *-k*, "your," in line 6. Hence some sort of feast is already *in medias res*. Since the summons is the only part of feasting preparations where speech customarily occurs, then perhaps line 6 and the section to which it belongs, lines 4b-7 (?), constitute the summons. Del Olmo Lete (1977:36) reconstructs two feasts in lines 1-12; the first is El's feast which is a larger context for lines 1-12, and the second, described in the summons, relates the degraded situation of Yamm's fare. There seems little warrant for postulating two feasts in this manner. Drawing on Lichtenstein's scheme as the background of lines 1-12, a tentative outline may be offered for these lines: (1) invitation in lines 2-8 (?); and (2) drink and food in lines 9-11. However, it is unclear whether the invited guests have arrived yet since they are not mentioned thus far, or whether El has begun drinking prior to their arrival.

El, mentioned by name in line 4 or his servants, may summon deities "near" (?) and "far" in lines 2-3 (cf. **rḥq//*qrb* in Isa 33:13; 57:19) according to de Moor (*SPUMB* 116). The phrase *lq[ṣ ʾilm]* has been reconstructed with KTU 1.114. 2 in mind: *ṣḥ lqṣ ʾilm* (see Pardee 1988b:22, 33-35). The reconstruction *qṣ*, is taken to mean "remotest" in parallelism with *rḥqm* by del Olmo Lete (1977:37), but the epigraphical support for *qṣ* is lacking.[31]

Lines 2-4a might be reconstructed in the following manner:

gm ṣḥ lqb[ṣ ʾilm]	Aloud they summon the ass[embly of the deities (?)][32],
[qrʾu] lrḥqm	[They invite] the distant ones,
lp[ḫr ʾil (?)] ṣḥ	[The assembly of El (?)] they summon.

If *qb[ṣ]* in the first line is unmatched in the subsequent lines, then the term parallel to *lrḥqm* in the second line might fall in the lacuna in the third line. One might suggest terms beginning with *p-*; a substitute might be *pḫr* (or *pḫr ʾil*?), a term used elsewhere for the collectivity of the pantheon. There is, however, no particular warrant for this reconstruction of the third line, and the parallelism for this proposed reconstruction is lacking.

---

[31] See above p. 134.

[32] Cooper (1991:834) takes *ʾil* in line 1.114.6 as the ancestral spirit.

El appears seated "in [his] ma[rzeah]" in line 4. Several commentators[33] suggest this reconstruction on the basis of the same expression in KTU 1.114.15.[34] For the following parallel line del Olmo Lete (1977:36) plausibly reconstructs: *[yšt ʾil yn ʿd šbʿ]*. This reading is likewise based on 1.114.16. De Moor (1987:24) reconstructs the subject and verb governing the first words of line 5: "[Ilu does not notice] *the shameful conduct of the usurper*!" These differences of opinion regarding line 4b illustrate the great difficulty in reconstructing this and subsequent lines: it is clear from parallels to lines 24-25 that maximally only half of each line may be extant, but there is no way to determine how short some of the lines may have been.

Excursus 1: The Marzeah[35] in the Ugaritic Texts

The marzeah was a social institution attested perhaps as early as the late third millennium at Ebla (Pope 1981b:179 n. 65), in the late second millennium at Ugarit (KTU 1.114.15; 3.9; RS 15.88; cf. KTU 1.21 II 5) and Emar (446.92; Fleming 1992:269, 276), in ancient Israel (Jer 16:5; Amos 6:4-7), in one Transjordanian (Moabite?) papyrus dating some time after the mid-sixth century (Bordreuil and Pardee 1990),[36] in a fifth century ostracon from Elephantine in Egypt (Porten 1968:179-86), in a fourth century Phoenician inscription inscribed on a drinking-bowl (Avigad and Greenfield 1982), in Palmyran (CIS II:3980; Ingholt 1955:138-42) and Nabatean inscriptions (Barstad 1984:132), in the Marseilles Tariff deriving from the temple of Baal Sapon in Carthage (KAI 69; *ANET* 656-57), in a first century inscription from Piraeus (KAI 60), and in rabbinic sources.[37] Non-textual evidence is less well-at-

[34] See Pope 1972. For this text see Excursus 1 below on pp. 142, 144.

[35] This common spelling represents an Anglicized form derived from *marzēaḥ*, the common English transliteration for the BH form. Ugaritic *mrzḥ* provides little basis for a modern spelling, but three syllabic forms, *mar-za-i*, *mar-zi-i* and *ma-ar-zi-ḫi* appear in Akkadian texts from Ras Shamra. The first form points to a base **marzaḥu* while the second and third forms suggest a base, **marziḥu*, which corresponds to the BH form. Huehnergard (1987b:178) suggests that the Ugaritic was originally **marzaḥu* with the secondary development of the form **marziḥu* due to "the effect of vowel harmony around the gutteral".

[36] The question of whether or not this text is a forgery has been voiced privately by some scholars.

[37] For various surveys, see Bryan 1973; Porten 1968:179-86; Pope 1972, 1981b; Friedman 1980:200; Avigad and Greenfield 1982; Barstad 1984:127-42; McLaughlin 1991; Ackerman 1992:71-79. For the biblical material, see especially Greenfield 1974; Barstad 1984:127-29, 138-42; Ackerman 1992:76-79. For the variation in spelling between Ugaritic *mrzḥ* and *mrzʿ*, see Garr 1986:46.

tested. According to Barnett (1982), the banquet scene depicted in Assurbanipal's palace in Nineveh showing him reclined on a bed in the presence of his queen represents a marzeah. Palmyra also provides some iconographic evidence in the form of tesserae which depicts cultic personnel standing before various deities (for a summary, see Barstad 1984:135).

Four elements characterize the marzeah in both sacred and secular texts. First, it comprised a limited social group. KTU 3.9 reflects a private association; the marzeah in this text is "the marzeah which Shamumanu established in his house" (*mrzḥ dqny šmmn bbtw*). RS 15.88 (PRU III:88).2-8 is explicit about this feature: "Niqmepa, son of Niqmaddu, king of Ugarit, has established the house of the marzeahs and he has donated it to these marzeahs (i.e. the men of the marzeah) and to their sons forever" (*níq-me-pa mâr níq-ma-adu šàr* ^{al}*u-ga-ri-it it-ta-ši bît* ^{amil}*mar-za-i ù id-di-šu a-na* ^{amil}*mar-za-i-ma a-na mâri*^{M}*-šu-nu a-na da-ri-ti*).[38] Similarly, KTU 3.9.13 mentions "a man of the marzeah" (*mt mrzḥ*).[39] That the members of the marzeah association were landed and belonged to the upper-class may be inferred from RS 18.01 (*PRU IV*:230) which mentions fields belonging to them (see Barstad 1984:139). In divine representations of the marzeah, the precise nature of the group is unclear. Given its restricted use in divine contexts and its absence from numerous descriptions of the divine council, it would appear that the marzeah was not synonymous with the divine assembly. The Rephaim in 1.21 II may be the invited members belonging to this association; certainly if this were the case, the guests would reflect a limited segment of the divine population.

Second, the marzeah met in a private domicile. In KTU 3.9 the marzeah seems to gather in the home of one of its members, Shamumanu. According to RS 15.88.2-8 the king donated a house for another marzeah association. RS 15.70 (*PRU III*:130) mentions "the house of the marzeah-members of Shatrana" (*bit* ^{amil}*mar-ze-i ša ša-at-ra-na*), perhaps the same figure named in RS 16.157 (*PRU III*:83). 5. Based in private houses, the human marzeah was not a public institution. If the marzeah called */m]zrᶜy*, "my marzeah," in 1.21 II 1, 5 and 9 were Danil's, as suggested by Pope (1981b:174),

[38] Cf. $^{lú.meš}$*mar-za-ḫu ša mi-KI* (Emar 446.92); cf. ^{iti}*mar-za-ḫa-na* in Emar 446.85 See Fleming 1992:269, 276.

[39] The number of the *nomen regens* is clarified by the verb, *ydd*, which is singular, while the plural would have been **tdd* as Dobrusin 1981 argues.

then the location of this marzeah might be his home. Barnett proposes that the house of ivory which Ahab built (1 Kgs 22:39) was perhaps a *bêt-marzēaḥ* or "marzeah house."
